#### Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Any statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. We use words or phrases such as "anticipates," "believes," "could," "estimates," "expects," "intends," "plans," "predicts," "projects," "may," "will," "should," "continue," "ongoing," "future," "potential" and phrases to identify forward-looking statements. Examples of forward-looking statements include, but are not limited to, statements about our fiscal 2010 revenues from sell-through distributors; changes to our unrecognized tax benefits and expectations regarding taxes and tax adjustments; the timing of completion of our 2009 restructuring plan; our expectations that a significant portion of our revenue will continue to be dependent on the communications end market; the Asian Pacific market being the primary source of our revenue; the impact of new accounting pronouncements; our benefiting from our cost reduction actions; our expectations regarding research and development investments and increases in capital expenditures; and our beliefs concerning the adequacy of our liquidity and ability to meet our operating and capital requirements and obligations.

Forward-looking statements involve estimates, assumptions, risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. The key factors that could cause our actual results to differ materially from the forward-looking statements include global economic conditions and uncertainty, the concentration of our sales in the communications equipment end market, particularly as it relates to the concentration of our sales in the Asia Pacific region, market acceptance and demand for our new products, the effect of the downturn in the economy on capital markets and credit markets, the impact of competitive products and pricing, unanticipated taxation requirements, or positions of the IRS, unexpected impacts of recent accounting guidance and the other risks that are described herein and that are otherwise described from time to time in our filings with the Securities and Exchange Commission, including but not limited to, the items discussed in "Risk Factors" in Item 1A of Part II of this Report. You should not unduly rely on forward-looking statements because our actual results could differ materially from those expressed in any forward-looking statements made by us. In addition, any forward-looking statement applies only as of the date on which it is made. We do not plan to, and undertake no obligation to, update any forward-looking statements to reflect events or circumstances that occur after the date on which such statements are made or to reflect the occurrence of unanticipated events.

#### LATTICE SEMICONDUCTOR CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

#### Note 1 - Basis of Presentation and Significant Accounting Policies:

The accompanying Condensed Consolidated Financial Statements are unaudited and have been prepared by Lattice Semiconductor Corporation (the "Company", "we", "us" or "our") pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") and in our opinion include all adjustments, consisting of normal recurring adjustments, necessary for the fair statement of results for the interim periods. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. These Condensed Consolidated Financial Statements should be read in conjunction with our audited financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended January 2, 2010.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and classification of assets, such as marketable securities, accounts receivable, inventory, auction rate securities, deferred income taxes and liabilities, accrued expenses (including restructuring charges), income taxes, deferred income and allowances on sales to certain sell-through distributors, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the fiscal periods presented. Actual results could differ from these estimates.

We report based on a 52 or 53-week fiscal year ending on the Saturday closest to December 31. Our third quarter of fiscal 2010 and third quarter of fiscal 2009 ended on October 2, 2010 and October 3, 2009, respectively. All references to quarterly or three and nine months ended financial results are references to the results for the relevant fiscal period.

#### Cash Equivalents and Marketable Securities

We consider all investments that are readily convertible into cash and have original maturities of three months or less, to be cash equivalents. Cash equivalents consist primarily of highly liquid investments in time deposits or money market accounts and are carried at cost. We account for marketable securities as available for sale with unrealized gains or losses recorded as Other comprehensive income, unless losses are considered other-than-temporary, in which case, losses are charged to the Condensed Consolidated Statements of Operations.

#### Concentration Risk

Potential exposure to concentration risk consists primarily of cash equivalents, marketable securities, trade receivables and supply of wafers for our new products. We place our investments primarily through four financial institutions and mitigate the concentration of credit risk by placing percentage limits on the maximum portion of the investment portfolio which may be invested in any one investment instrument. The Company's investment policy defines approved credit ratings for investment securities. Purchased securities must meet or exceed the ratings; however, due to liquidity issues in global credit and capital markets, some of our auction rate securities have fallen below our required credit ratings. Investments consisted primarily of money market instruments, "AA" or better corporate notes and bonds, "AA" or better rated U.S. municipal notes, U.S. government agency obligations and "C" or better rated auction rate securities. See Note 4 for a discussion of the liquidity attributes of our marketable securities.

Concentration of credit risk with respect to trade receivables are mitigated by a geographically diverse customer base consisting primarily of four large distributors, a large number of OEM customers and several contract manufacturers, as well as by our credit and collection process. Accounts receivable are recorded at the invoice amount, do not bear interest, and are shown net of allowances for doubtful accounts of \$0.9 million and \$1.0 million at October 2, 2010 and January 2, 2010, respectively. We perform credit evaluations for essentially all customers and secure transactions with letters of credit or advance payments where appropriate. We regularly review our allowance for doubtful accounts and the aging of our accounts receivable. Write-offs for uncollected trade receivables have not been significant to date.

We enter into arrangements with certain sell-through distributors under which we issue accounts receivable credit adjustments ("distributor advances") to reduce the distributors' working capital requirements for servicing our end customers. Distributor advances are recorded as a reduction of Deferred income and allowances on sales to sell-through distributors. These arrangements are unsecured, bear no interest, are settled on a quarterly basis and are due upon demand. Distributor advances, which have no impact on revenue recognition, totaled \$28.3 million and \$16.5 million at October 2, 2010 and January 2, 2010, respectively.

Current portion of foundry advances was less than \$0.1 million and was \$11.5 million at October 2, 2010 and January 2, 2010, respectively, pursuant to an agreement with Fujitsu Semiconductor Limited ("Fujitsu") in which we agreed to advance \$125.0 million to Fujitsu for future wafer purchases. Under the terms of a letter agreement between the Company and Fujitsu, Fujitsu agreed to repay \$60.0 million in cash to the Company, plus interest, in two installments. \$30.0 million was received on April 15, 2009 and the remaining \$30.0 million was received on October 15, 2009. We expect to receive the remaining advance of less than \$0.1 million in the form of advance credits, including engineering mask set charges, during the fourth quarter of the Company's fiscal 2010. We rely on Fujitsu for essentially all wafer purchases for our new products.

#### Revenue Recognition and Deferred Income

Revenue from sales to customers is recognized upon shipment, or in the case of sales by our sell-through distributors, at the time of reported resale, provided that persuasive evidence of an arrangement exists, the price is fixed or determinable, title has transferred, collection of resulting receivables is probable, there are no customer remaining acceptance requirements and no remaining significant obligations. We sell our products directly to end customers or through a network of independent manufacturers' representatives and indirectly through a network of independent sell-in and sell-through distributors. Distributors provide us periodic data regarding the product, price, quantity, and end customer when products are resold as well as the quantities of our products they still have in stock. We must use estimates and apply judgment to reconcile sell-through distributors' reported inventories to their activities. Any error in our judgment could lead to inaccurate reporting of our Revenue, Cost of products sold, Deferred income and allowances on sales to sell-through distributors, and Net income (loss).

At the time of shipment to a sell-through distributor amounts are invoiced at published list price. The final price is set at the time of resale and is determined in accordance with a distributor price agreement. Amounts invoiced are recorded in Accounts receivable, net and inventory is transferred from Inventories to Deferred income and allowances on sales to sell-through distributors. Revenue and cost of products sold to sell-through distributors are deferred until either the product is resold by the distributor or, in certain cases, return privileges terminate, at which time Revenue and Cost of products sold are reflected in Net income (loss). Our estimate of inventory valued at published list price and held by sell-through distributors with right of return totaled \$54.8 million and \$31.7 million at October 2, 2010 and January 2, 2010, respectively. Distributor advances totaled \$28.3 million and \$16.5 million at October 2, 2010 and January 2, 2010, respectively and are recorded in Deferred income and allowances to sell-through distributors. Deferred costs of sales related to inventory held by sell-through distributors totaled \$8.3 million and \$5.0 million at October 2, 2010 and January 2, 2010, respectively.

During fiscal 2009, the Company completed a program to restructure our distribution channels primarily in the Asia Pacific region from a sell-in to a sell-through distribution model. As a result, we expect the majority of our revenue in fiscal 2010 will be from reported resale from our sell-through distributors. Resale of product by sell-through distributors as a percentage of our total revenue was 38%, 33% and 36% in fiscal years 2009, 2008 and 2007, respectively, and 55% and 56% for the third quarter and nine months ended October 2, 2010, respectively.

Revenue from software licensing was not material for the periods presented.

#### **New Accounting Pronouncements**

In September 2009, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2009-13, "Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements (a consensus of the FASB Emerging Issues Task Force)," ("ASU 2009-13"). ASU 2009-13 provides principles and application guidance on whether multiple deliverables exist, how the arrangement should be separated and the consideration allocated. Additionally, ASU 2009-13 requires an entity to allocate revenue in an arrangement using estimated selling prices of deliverables if a vendor does not have vendor-specific objective evidence or third-party evidence of selling price, eliminates the residual method and requires an entity to allocate revenue using the relative selling price method. This update is effective for the Company beginning January 1, 2011 and can be applied prospectively or retrospectively. The Company is currently assessing the impact of the adoption on its financial statements.

In October 2009, the FASB issued Accounting Standards Update 2009-14, "Software (Topic 985): Certain Revenue Arrangements That Include Software Elements," ("ASU 2009-14"). ASU 2009-14 clarifies which revenue allocation and measurement guidance should be used for arrangements that contain both tangible products and software, in cases where the software is more than incidental to the tangible product as a whole. More specifically, if the software sold with or embedded within the tangible product is essential to the functionality of the tangible product, then this software as well as undelivered

#### **Table of Contents**

software elements that relate to this software are excluded from the scope of existing software revenue guidance. This guidance is to be applied prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. The Company is currently assessing the impact of the adoption on its financial statements.

In January 2010, the FASB issued Accounting Standards Update No. 2010-06, "Fair Value Measurements Disclosures," which amends Subtopic 820-10 of the FASB Accounting Standards Codification to require new disclosures for fair value measurements and provides clarification for existing disclosures requirements ("ASU No. 2010-06"). More specifically, this update will require (a) an entity to disclose separately the amounts of significant transfers in and out of Levels 1 and 2 fair value measurements and to describe the reasons for the transfers; and (b) information about purchases, sales, issuances and settlements to be presented separately (i.e. present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This update clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. ASU No. 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009 with the exception of revised Level 3 disclosure requirements, which are effective for interim and annual reporting periods beginning after December 15, 2010. The Company has adopted part (a) of this ASU in full with respect to the interim period ended July 3, 2010, and part (b) will be adopted in fiscal year 2011.

#### Note 2 - Net Income (Loss) Per Share:

Net income (loss) per share is computed based on the weighted average number of shares of common stock and potentially dilutive securities assumed to be outstanding during the period using the treasury stock method. Potentially dilutive securities consist of stock options, restricted stock units ("RSUs"), employee stock purchase plan ("ESPP") shares, and warrants to purchase shares of common stock. There were no outstanding warrants as of October 2, 2010 or January 2, 2010.

The computation of diluted net income per share for the third quarter and nine months ended October 2, 2010, includes the effects of stock options, RSUs and ESPP shares aggregating 3.8 million and 3.3 million shares, respectively, as they are dilutive, and excludes the effects of stock options and RSUs aggregating 1.9 million and 3.0 million shares, respectively, as they are antidilutive. The computation of diluted net loss per share for the third quarter and nine months ended October 3, 2009, excludes the effects of stock options, RSUs, ESPP shares and warrants aggregating 10.1 million and 11.7 million shares, because the effect was antidilutive. Stock options, RSUs, ESPP shares and warrants are antidilutive when the aggregate of exercise price, unrecognized stock-based compensation expense and excess tax benefit are greater than the average market price for our common stock during the period or when the Company is in a net loss position. Stock options and RSUs that are antidilutive in the third quarter and first nine months of fiscal 2010 could become dilutive in the future.

#### Note 3 - Marketable Securities:

The following table summarizes the contractual maturities of our marketable securities (at fair value and in thousands):

	October 2, 2010	January 2, 2010
Short-term marketable securities:	\$62,448	\$8,471
Long-term marketable securities: Due after ten years	9,523	12,743

No contractual maturity date	196	196	
	9,719	12,939	
Total marketable securities	\$72,167	\$21,410

#### **Table of Contents**

The following table summarizes the composition of our marketable securities (at fair value and in thousands):

October 2, 2010	January 2, 2010
\$62,448	\$8,471
9,523	12,743
196	196
9,719	12,939
\$72,167	\$21,410
	2010 \$62,448 9,523 196 9,719

The following table summarizes the composition of our auction rate securities (in thousands):

	October 2, 2010			January 2, 20	10		
			S&P			S&P	
	Par Value	Fair Value	Credit rating	Par Value	Fair Value	Credit rating	
Long-term marketable securities:							
Federally-insured or FFELP guaranteed student loans	<sup>1</sup> \$11,600	\$9,523	AAA	\$15,725	\$12,743	AAA	
Auction market preferred shares	8,325	196	C	8,325	196	C	
Total Long-term marketable securities	\$19,925	\$9,719		\$24,050	\$12,939		

During the first nine months of fiscal 2010, the Company accepted 13 partial redemptions at 100% of par value (\$0.3 million) of auction rate securities. On July 29, 2010, the Company sold student loan auction rate securities, with a par value of \$3.8 million and fair value of \$2.9 million for \$3.3 million and reported a gain of \$0.4 million in the third quarter of fiscal 2010. The Company intends to sell its auction rate securities as markets for these securities resume or reasonable offers become available. At October 2, 2010, due to continued multiple failed auctions and a determination of illiquidity, the auction rate securities held by the Company are classified as Long-term marketable securities.

Student loan asset-backed notes are insured by the federal government or guaranteed by the Federal Family Educational Loan Program ("FFELP"). Auction market preferred shares are issued by Ambac Assurance Corporation ("AMBAC").

While the auctions for auction rate securities have historically provided a liquid market for these securities, due to liquidity issues in global credit and capital markets, auction rate securities held by us have experienced multiple failed auctions (a portion beginning in October 2007). These instruments are considered illiquid and have been reclassified as Long-term marketable securities on the Condensed Consolidated Balance Sheets. No additional impairment charges were recognized in the first nine months of fiscal 2010. If we were to liquidate our position in these securities, the amount realized could be materially different than the estimated fair value amounts at which we are carrying these securities and there could be a materially detrimental effect on our financial results.

Note 4 - Fair Value of Financial Instruments:

	Fair value measurements as of October 2, 2010				
	Total Level 1 Level 2 L				
Short-term marketable securities	\$62,448	\$62,448	\$	<b>\$</b> —	
Long-term marketable securities	9,719			9,719	

Total assets measured at fair value

\$72,167

\$62,448

\$---

\$9,719

We invest in various financial instruments including corporate and government bonds and notes, commercial paper and auction rate securities. The Company carries these instruments at their fair value in accordance with ASC 820. The framework under the provisions of ASC 820 establishes three levels of inputs that may be used to measure fair value. Each level of input has different levels of subjectivity and difficulty involved in determining fair value.

#### **Table of Contents**

Level 1 instruments generally represent quoted prices in active markets. Therefore, determining fair value for Level 1 instruments generally does not require significant management judgment, and the estimation is not difficult. Our Level 1 instruments consist of federal agency, municipal or corporate notes and bonds that are traded in active markets and are classified as Short-term marketable securities on our Condensed Consolidated Balance Sheet.

Level 2 instruments include inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices for identical instruments in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. We have no investments in Level 2 instruments.

Level 3 instruments include unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Our auction rate securities are classified as Level 3 instruments. Management uses a combination of the market and income approach to derive the fair value of auction rate securities, which include third party valuation results, investment broker provided market information and available information on the credit quality of the underlying collateral. As a result, the determination of fair value for Level 3 instruments requires significant management judgment and subjectivity. Our Level 3 instruments are classified as Long-term marketable securities on our Condensed Consolidated Balance Sheet.

During the nine months ended October 2, 2010 and October 3, 2009, the following changes occurred in our Level 3 instruments (in thousands):

	Nine Months Ended		
	October 2,	October 3,	
	2010	2009	
Beginning fair value of Long-term marketable securities	\$12,939	\$19,485	
Fair value of securities sold or redeemed	(3,220	) (925	)
Temporary or other-than-temporary fluctuations in fair value	_	(904	)
Ending fair value of Long-term marketable securities	\$9,719	\$17,656	

In accordance with ASC 320, "Investments-Debt and Equity Securities," the Company recorded an unrealized gain of less than \$0.1 million during the nine months ended October 2, 2010 on certain Short-term marketable securities (Level 1 instruments), which has been recorded in Accumulated other comprehensive income. Future fluctuations in fair value related to these instruments that the Company deems to be temporary, including any recoveries of previous write-downs, would be recorded to Accumulated other comprehensive income. In addition, during the three and nine months ended October 2, 2010, the Company realized a gain of \$0.4 million and \$0.5 million, respectively, related to the sale of a portion of its Long-term marketable securities portfolio.

If the Company were to determine in the future that any further decline in fair value is other-than-temporary, we would record an impairment charge, which could have a materially detrimental impact on our operating results. If we were to liquidate our position in these securities, it is likely that the amount of any future realized gain or loss would be different from the unrealized gain or loss reported in Accumulated other comprehensive income or the previously reported other-than-temporary impairment charge.

Note 5 - Inventories (in thousands):

	October 2,	January 2,
	2010	2010
Work in progress	\$21,524	\$15,046

10,157 \$31,681 Finished goods 10,879

On December 13, 2008, the Company's Board of Directors approved a stock repurchase program pursuant to which up to \$20.0 million of outstanding common stock may be repurchased from time to time. The duration of the repurchase program was twelve months, and expired on December 13, 2009. During fiscal year 2009, approximately 263,000 shares were repurchased for \$0.3 million, all of which were open market transactions and were funded from available working capital. On May 4, 2010, the Board of Directors approved the retirement of repurchased shares.

On October 21, 2010, the Company's Board of Directors approved a stock repurchase program pursuant to which up to \$20.0 million of outstanding common stock may be repurchased from time to time. The duration of the repurchase program is twelve months. Under the program, the Company may purchase shares of common stock through open market and privately negotiated transaction at prices deemed appropriate by management. The timing and amount of repurchase transactions under this program will depend on market conditions and corporate and regulatory considerations. The purchases will be funded from available working capital.

#### Note 7 - Income Taxes:

We are subject to federal income tax as well as income tax of multiple state and foreign jurisdictions. We are no longer subject to federal, state and local, or foreign income tax examinations for years before 2001. We have federal net operating loss carryforwards that expire at various dates between 2021 and 2029. We have state net operating loss carryforwards that expire at various dates from 2010 through 2029. We also have federal and state credit carryforwards, some of which do not expire, with the remainder expiring at various dates from 2010 through 2030. We have provided a valuation allowance equal to our net federal and state deferred tax assets as we have not met the more likely than not realization threshold for deferred tax asset recognition. We evaluate both positive and negative evidence to determine if some or all of our deferred tax assets should be recognized on a quarterly basis. As of

October 2, 2010, the negative evidence, which includes a three year cumulative pretax loss, outweighs the positive evidence available. In future periods, if we determine that the positive evidence is sufficient to conclude that we are more-likely-than-not to realize some or all of our deferred tax assets, we will recognize a deferred tax asset and a benefit in the period in which such determination is made. As of October 2, 2010, the net deferred tax asset relates to foreign jurisdictions where we have concluded it is more-likely-than-not-that we will realize the net deferred tax assets in future periods.

The Internal Revenue Service ("IRS") has examined our income tax returns for 2001 and 2002, and has issued proposed adjustments of \$1.4 million, plus interest. These adjustments relate to the treatment of acquisition costs and a tax accounting method change for prepaid expenses. Although we do not agree with the proposed adjustment related to the prepaid expense matter, we believe that we have reached a tentative agreement concerning the acquisition costs. During the three months ended March 29, 2008, we made a payment of \$0.3 million related to this tentative agreement. On May 23, 2008, the Company filed a petition with the Tax Court seeking a redetermination of the prepaid expense adjustment. Although the final resolution of this matter is uncertain, we believe that adequate amounts have been provided for as unrecognized tax benefits. There is the possibility of either a favorable or unfavorable effect on our results of operations in the period in which these matters are effectively settled. We will recognize any uncertain tax benefit in the period settled.

We are subject to state and local income tax examinations for the years 2001 through 2003. To date, there are no proposed adjustments that are expected to have a material adverse effect on our results of operations. We are currently under examination in Taiwan related to the 2007 and 2008 tax years. The 2007 exam has been settled with no material adjustments. The 2008 exam has not been settled but there are no proposed adjustments that are expected to have a material adverse effect on our results of operations. We are not currently under examination in any other foreign jurisdictions.

We believe that it is reasonably possible that \$1.5 million of unrecognized tax benefits and \$0.9 million of associated interest and penalties could significantly change during the next twelve months. The \$2.4 million potential change would represent a decrease in unrecognized tax benefits, comprised of items related to matters currently being litigated with the IRS, certain federal and state credits and uncertain income tax positions related to foreign tax filings for years that will no longer be subject to examination under expiring statutes of limitations.

We are paying foreign income taxes, which are reflected in the Provision for income taxes in the Condensed Consolidated Statements of Operations and are primarily related to the cost of operating an offshore research and development subsidiary and sales subsidiaries. We are not currently paying federal income taxes and do not expect to pay such taxes until the benefits of our tax net operating losses are fully utilized. We expect to pay a nominal amount of state income tax. We accrue interest and penalties related to uncertain tax positions in the Provision for income taxes.

#### Note 8 - Restructuring:

During fiscal 2009, we initiated a restructuring plan ("2009 restructuring plan") to lower operating expenses primarily by reducing headcount, reducing occupancy in certain leased facilities and to transfer inventory management, order fulfillment, and direct sales logistics from our headquarters in Oregon to a third party contractor in Singapore. In addition, the Company established an operations center in Singapore to transfer some of its supply chain activities from the Company's headquarters in Oregon. The 2009 restructuring plan will be substantially completed by the fourth quarter of fiscal 2010.

During the third quarter of fiscal 2008, we initiated a restructuring plan ("2008 restructuring plan") to better align operating expenses with near-term revenue expectations, primarily by reducing headcount. The 2008 restructuring plan was substantially complete by the end of fiscal 2008. During the third quarter of fiscal 2007, we approved and initiated a restructuring plan to lower operating expenses primarily by reducing headcount ("2007 restructuring plan").

The 2007 restructuring plan encompassed a reduction in work force, a voluntary separation program for certain employees and the closure of certain leased facilities. The 2007 restructuring plan was substantially complete by the end of fiscal 2009. During the fourth quarter of fiscal 2005, we initiated a restructuring plan ("2005 restructuring plan") to reduce operating expenses. The 2005 restructuring plan encompassed three major components - a streamlining of research and development sites, a voluntary separation program for certain employees and an organizational consolidation within the Company's largest design center.

At October 2, 2010, the Condensed Consolidated Balance Sheet included \$1.1 million primarily related to operating lease commitments and severance and related expenses accrued under the provisions of the 2009 restructuring plan. In addition, the Condensed Consolidated Balance Sheet included \$0.3 million related to operating lease commitments accrued under the provisions of the 2005 restructuring plan.

The following table displays the activity related to all the restructuring plans described above (in thousands):

	Balance at January 2, 2010	expense during nine months ended October 2, 2010	Paid or settled		Adjustment to reserve	ts	Balance at October 2, 2010		Aggregate expense and adjustments
Severance and related costs Lease loss reserve and other Total restructuring plans		\$199 38 \$237	\$(425 (466 \$(891	)	\$(196 — \$(196	)	\$293 1,093 \$1,386	\$16,004 9,090 \$25,094	\$16,007 9,128 \$25,135

#### **Table of Contents**

Total Restructuring included in our Condensed Consolidated Statements of Operations was as follows (in thousands):

	Three Month	s Ended	Nine Months Ended		
	October 2,	October 3,	October 2,	October 3,	
	2010	2009	2010	2009	
Severance and related costs	\$67	\$1,313	\$3	\$1,307	
Lease loss reserve and other	12	1,231	38	1,197	
	\$79	\$2,544	\$41	\$2,504	

We cannot be certain as to the actual amount of any remaining restructuring charges, changes in original estimates or the timing of their recognition for financial reporting purposes.

#### Note 9 - Stock-Based Compensation:

Total stock-based compensation expense included in the Condensed Consolidated Statements of Operations is as follows (in thousands):

Three Months	Ended	Nine Months Ended		
October 2,	October 3,	October 2,	October 3,	
2010	2009	2010	2009	
\$76	\$75	\$235	\$264	
468	369	1,388	1,128

\$1,033	\$1,013	\$3,505	\$3,363	
	October 2, 2010 \$76 468 489	2010 2009 \$76 \$75 468 369 489 569	October 2, October 3, October 2, 2010 2009 2010 \$75 \$235 \$468 369 1,388 489 569 1,882	

#### Note 10 - Legal Matters:

On June 11, 2007, a patent infringement lawsuit was filed by Lizy K. John ("John") against Lattice Semiconductor Corporation in the U.S. District Court for the Eastern District of Texas, Marshall Division. John seeks an injunction, unspecified damages, and attorneys' fees and expenses. The Company filed a request for re-examination of the patent by the United States Patent and Trademark Office ("PTO"), which was granted by the PTO, and the re-examination is in progress. The litigation has been stayed pending the results of the re-examination. Neither the likelihood nor the amount of any potential exposure to the Company can be estimated at this time.

On April 29, 2010, Stragent, LLC ("Stragent") and SeeSaw Foundation ("SeeSaw") filed a patent infringement lawsuit against Lattice Semiconductor Corporation in the U.S. District Court for the Eastern District of Texas, Tyler Division. Stragent and SeeSaw seek unspecified damages and attorneys' fees and expenses. Neither the likelihood nor the amount of any potential exposure to the Company can be estimated at this time.

On July 20, 2010, Intellitech Corporation ("Intellitech") filed a patent infringement lawsuit against Lattice Semiconductor Corporation in the U.S. District Court for the District of Delaware. Intellitech seeks unspecified damages and attorneys' fees and expenses. Neither the likelihood nor the amount of any potential exposure to the Company can be estimated at this time.

We are also exposed to certain other asserted and unasserted potential claims. There can be no assurance that, with respect to potential claims made against us, we could resolve such claims under terms and conditions that would not have a material adverse effect on our business, our liquidity or our financial results.

#### **Table of Contents**

#### Note 11 - Segment and Geographic Information:

We operate in one industry segment comprising the design, development, manufacture and marketing of high performance programmable logic devices. Our revenue by major geographic area based on ship-to location was as follows (dollars in thousands):

	Three Mo	nths End	ed		Nine Months Ended				
	October 2	2, 2010	October 3	, 2009	October 2, 2	2010	October 3, 2009		
United States:	\$8,884	12 %	\$6,108	12 %	\$26,772	12 %	\$21,164	15	%
Export revenue:									
Asia Pacific (primarily China and	12 110	55	27,551	56	122,036	54	77,184	56	
Taiwan)	42,118	33	27,331	30	122,030	34	//,104	56	
Europe	13,691	17	8,414	17	40,465	18	25,135	18	
Japan	10,876	14	5,673	12	30,264	13	11,547	8	
Other Americas	1,568	2	1,351	3	5,151	3	4,303	3	
Total export revenue	68,253	88	42,989	88	197,916	88	118,169	85	
Total revenue	\$77,137	100 %	\$49,097	100 %	\$224,688	100 %	\$139,333	100	%

Our five largest customers make up a significant portion of our total revenue. In the first nine months of fiscal 2010 and fiscal 2009, combined revenue attributable to two large telecommunications equipment providers (one of which was supported through one of our distributors in prior years), accounted for approximately 12% and 20% of total revenue, respectively. Most of our property and equipment is located in the United States.

#### Note 12- Subsequent Events:

On October 12, 2010, the Company announced that effective November 8, 2010, Mr. Darin G. Billerbeck has been appointed to serve as President and Chief Executive Officer. In connection with Mr. Billerbeck's appointment, the Company entered into an offer letter with Mr. Billerbeck that sets forth certain terms related to Mr. Billerbeck's compensation package. The Company and Mr. Billerbeck entered into an employment agreement effective as of November 8, 2010 that included the compensation described in the offer letter and contains additional terms and conditions substantially similar to those set forth in the employment agreements of the Company's other executive officers.

On October 21, 2010, the Company's Board of Directors approved a stock repurchase program pursuant to which up to \$20.0 million of outstanding common stock may be repurchased from time to time. The duration of the repurchase program is twelve months. Under the program, the Company may purchase shares of common stock through open market and privately negotiated transactions at prices deemed appropriate by management. The timing and amount of repurchase transactions under this program will depend on market conditions and corporate and regulatory considerations. The purchases will be funded from available working capital.

#### **Table of Contents**

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Overview

Lattice Semiconductor Corporation ("Lattice" or the "Company") designs, develops and markets high performance programmable logic products and related software. Programmable logic products are widely used semiconductor components that can be configured by the end customer as specific logic circuits, and enable the end customer to shorten design cycle times and reduce development costs. Within the programmable logic market there are two groups of products - programmable logic devices ("PLD") and field programmable gate arrays ("FPGA") - each representing a distinct silicon architectural approach. Products based on the two alternative programmable logic architectures are generally optimal for different types of logic functions, although many logic functions can be implemented using either architecture. We believe that a substantial portion of programmable logic customers utilize both PLD and FPGA architectures. Our end customers are primarily original equipment manufacturers in the wired and wireless communications, computing, industrial, consumer, automotive, medical and military end markets.

#### Critical Accounting Policies and Estimates

Critical accounting policies are those that are both most important to the portrayal of a company's financial condition and results and require management's most difficult, subjective and complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Management believes that there have been no significant changes during the nine months ended October 2, 2010 to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the fiscal year ended January 2, 2010.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and classification of assets, such as marketable securities, accounts receivable, inventory, auction rate securities, deferred income taxes and liabilities, accrued liabilities (including restructuring charges), income taxes, deferred income and allowances on sales to certain sell-through distributors, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the fiscal periods presented. Actual results could differ from those estimates.

#### Recent Accounting Guidance

In September 2009, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update 2009-13, "Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements (a consensus of the FASB Emerging Issues Task Force)", ("ASU 2009-13"). ASU 2009-13 provides principles and application guidance on whether multiple deliverables exist, how the arrangement should be separated and the consideration allocated. Additionally, ASU 2009-13 requires an entity to allocate revenue in an arrangement using estimated selling prices of deliverables if a vendor does not have vendor-specific objective evidence or third-party evidence of selling price, eliminates the residual method and requires an entity to allocate revenue using the relative selling price method. This update is effective for the Company beginning January 1, 2011 and can be applied prospectively or retrospectively. The Company is currently assessing the impact of the adoption on its financial statements.

In October 2009, the FASB issued Accounting Standards Update 2009-14, "Software (Topic 985): Certain Revenue Arrangements That Include Software Elements," ("ASU 2009-14"). ASU 2009-14 clarifies which revenue allocation and measurement guidance should be used for arrangements that contain both tangible products and software, in cases where the software is more than incidental to the tangible product as a whole. More specifically, if the software sold

with or embedded within the tangible product is essential to the functionality of the tangible product, then this software as well as undelivered software elements that relate to this software are excluded from the scope of existing software revenue guidance. This guidance is to be applied prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. The Company is currently assessing the impact of the adoption on its financial statements.

#### **Table of Contents**

In January 2010, the FASB issued Accounting Standards Update No. 2010-06, "Fair Value Measurements Disclosures," which amends Subtopic 820-10 of the FASB Accounting Standards Codification to require new disclosures for fair value measurements and provides clarification for existing disclosures requirements ("ASU No. 2010-06"). More specifically, this update will require (a) an entity to disclose separately the amounts of significant transfers in and out of Levels 1 and 2 fair value measurements and to describe the reasons for the transfers; and (b) information about purchases, sales, issuances and settlements to be presented separately (i.e. present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This update clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. ASU No. 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009 with the exception of revised Level 3 disclosure requirements, which are effective for interim and annual reporting periods beginning after December 15, 2010. The Company has adopted part (a) of this ASU in full with respect to the interim period ended July 3, 2010, and part (b) will be adopted in fiscal year 2011.

#### **Results of Operations**

#### Revenue

Key elements of our Condensed Consolidated Statements of Operations (dollars in thousands) were as follows:

in the second se	Three Mor	nths Ended		Сертино	N	Nine Months Ended								
	October 2,	2010	October 3,	2009	O	october 2, 2	2010	October 3,	October 3, 2009					
Revenue	\$77,137	100.0 %	\$49,097	100.0 %	6 \$2	224,688	100.0 9	6 \$139,333	100.0	%				
Gross margin	45,586	59.1	26,619	54.2	13	33,984	59.6	73,883	53.0					
Research and development	14,814	19.2	14,789	30.1	44	4,654	19.9	43,491	31.2					
Selling, general and administrative	15,818	20.5	12,739	25.9	47	7,621	21.2	39,255	28.1					
Amortization of intangible assets	_	_	_	_		_	_	228	0.2					
Restructuring	79	0.1	2,544	5.2	41	1	0.0	2,504	1.8					
Income (loss) from operations	\$14,875	19.3 %	\$(3,453)	(7.0 )%	6 \$4	41,668	18.5	% \$(11,595)	(8.3	)%				

Revenue in the third quarter and nine months ended October 2, 2010 increased to \$77.1 million and \$224.7 million, respectively, compared to \$49.1 million and \$139.3 million for the third quarter and nine months ended October 3, 2009. Revenue increased across all product lines, end markets, and product classifications (except for two of our mature product families).

#### Revenue by Product Line

FPGA and PLD revenue increased in the third quarter and first nine months of fiscal 2010 when compared to fiscal 2009. There was a 80% and 77% increase in FPGA units sold in the third quarter and first nine months of fiscal 2010 when compared to the third quarter and first nine months of fiscal 2009, respectively, primarily driven by an increase in demand for our New products. PLD revenue also increased across all product classifications (except for two of our mature product families) in the third quarter and first nine months of fiscal 2010 when compared to fiscal 2009, due primarily to an increase in units sold.

The composition of our revenue by product line for the third quarter and first nine months of fiscal 2010 and 2009 was as follows (dollars in thousands):

	Three Mo	ed	Nine Months Ended									
	October 2, 2010 October 3, 2009				)	October 2, 2010			October 3, 2009			
FPGA	\$24,715	32	%	\$15,201	31	%	\$72,737	32	%	\$47,920	34	%
PLD	52,422	68		33,896	69		151,951	68		91,413	66	
Total revenue	\$77,137	100	%	\$49,097	100	%	\$224,688	100	%	\$139,333	100	%
15												

#### **Table of Contents**

#### Revenue by End Market

Although units sold overall were up across all end markets, revenue from the Industrial and other end markets increased 171% when the quarter ended October 2, 2010 is compared to the quarter ended October 3, 2009. By contrast, the communications end market increased 46% over this same quarterly comparison and accounted for approximately 50% and 54% of our total revenue for the quarter ended October 2, 2010 and October 3, 2009, respectively, and 50% and 58% for the nine months ended October 2, 2010 and October 3, 2009, respectively. This is primarily due to strength in the wireless segment of the communications end market. We expect that a significant portion of our revenue will continue to be dependent on the health of the communications end market.

The composition of our revenue by end market for the third quarter and first nine months of fiscal 2010 and 2009 was as follows (dollars in thousands):

	Three Mo	Three Months Ended							Nine Months Ended						
	October 2	October 2, 2010			October 3, 2009			October 2, 2010			October 3, 2009				
Communications	\$38,954	50	%	\$26,670	54	%	\$112,791	50	%	\$80,436	58	%			
Industrial and other	19,575	26		7,234	15		54,668	24		24,177	17				
Computing	10,590	14		8,349	17		33,229	15		17,757	13				
Consumer	8,018	10		6,844	14		24,000	11		16,963	12				
Total revenue	\$77,137	100	%	\$49,097	100	%	\$224,688	100	%	\$139,333	100	%			

#### Revenue by Product Classification

Revenue for New products increased 119% and 109% for the third quarter and first nine months of fiscal 2010, respectively, compared to the third quarter and first nine months of fiscal 2009. Revenue for Mainstream products increased 32% and 42% for the third quarter and first nine months of fiscal 2010 compared to the third quarter and first nine months of fiscal 2009. Mature product revenue increased 20% and 33% for the third quarter and first nine months of fiscal 2010, compared to the third quarter and first nine months of fiscal 2009. For all three product classifications (except for two of our mature product families) the revenue increase was related to an increase in unit sales partially offset by a decrease in average selling price.

The composition of our revenue by product classification for the third quarter and first nine months of fiscal 2010 and 2009 was as follows (dollars in thousands):

	Three M	ed	Nine Months Ended									
	October 2, 2010			October 3, 2009			October 2, 2010			October 3, 2009		
New *	\$35,304	46	%	\$16,120	33	%	\$95,174	42	%	\$45,615	33	%
Mainstream *	25,099	32		18,985	39		76,284	34		53,731	38	
Mature *	16,734	22		13,992	28		53,230	24		39,987	29	
Total revenue	\$77,137	100	%
