PRESS RELEASE

Cape plc Uses Magic s Mobile Enterprise Application Platform to Create an Integrated Business Solution for the Construction Industry

Cape plc Implements Magic s Advanced Technology to Develop a Solution that Runs on Mobile Devices

Or Yehuda, Israel, February 21, 2012 Magic Software Enterprises Ltd. (NASDAQ: MGIC), a global provider of mobile and cloud-enabled application and business integration platforms, announced today that its mobile offering has been successfully implemented by UK-based Cape plc to develop a highly effective, integrated business solution that can run natively on any mobile device.

Cape plc used Magic s technology to develop a fully certified mobile solution that enables its management team to access integrated data from the company s wide range of enterprise systems, including SAP R/3, bespoke .NET applications, and multiple databases, all on a single mobile device screen. By providing an accurate, real-time view of available stock and delivery schedules, this mobile solution empowers Cape managers to reach faster, better informed decisions that drive productivity, save resources, and reduce human error.

David Jones, UK Region Head of IT at Cape plc, said: We have been impressed by the features and proven capabilities of Magic s mobile offering, which has enabled us to develop a solution that improves the efficiency of decision-making processes and increases responsiveness to customer requirements. Magic s future-proof technology lets us develop our solutions, secure in the knowledge that they can run with the same feature-rich user experience on any mobile platform.

It is very exciting to see our vision of a Total Mobility Experience coming to life with Cape plc s innovative solution, says David Akka, Managing Director of Magic Software UK. We are confident that this successful deployment will show the way forward for many more enterprises that are looking for a secure, multiplatform solution to execute their mobility strategy.
