## Stock Exchange Announcement

4 June 2004

# Novo Nordisk receives EU approval of Levemir®, new long-acting insulin analogue

Novo Nordisk announced today that the European Commission has granted marketing authorisation for Levemir®, the company s new, long-acting insulin analogue for the treatment of diabetes.

Novo Nordisk will launch Levemir® in the UK later this month and in other European markets in the second half of 2004.

With Levemir® Novo Nordisk is the only company in the world with a full range of insulin analogues - rapid-acting NovoRapid®, premixed NovoMix® 30 and now also the long-acting analogue Levemir®.

That is an important milestone for Novo Nordisk and people with diabetes because Levemir® caters for a so far unmet medical need in basal insulin therapy and is highly differentiated from competing basal insulin products, says Mads Krogsgaard Thomsen, executive vice president and chief science officer.

Levemir® is a long-acting insulin analogue that provides a more predictable day-to-day control of blood glucose levels compared to conventional insulin preparations<sup>1-6</sup>. Among the benefits for people with diabetes, it has been demonstrated that Levemir® reduces fasting blood glucose and the risk of hypoglycaemia, especially at night-time<sup>1-5</sup>. In addition, studies have shown that people using Levemir® do not experience the undesirable weight gain often associated with conventional insulin preparations<sup>1-5</sup>, <sup>7</sup>.

The EU approval of Levemir® does not change Novo Nordisk s expectations for the financial results for 2004.

Novo Nordisk is a healthcare company and a world leader in diabetes care. The company has the broadest diabetes product portfolio in the industry, including the most advanced products within the area of insulin delivery systems. In addition, Novo Nordisk has a leading position within areas such as haemostasis management, growth hormone therapy and hormone replacement therapy. Novo Nordisk manufactures and markets pharmaceutical products and services that make a
