Forward-looking Statements

This Annual Report on Form 10-K includes forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. In some cases, you can identify forward-looking statements by terminology such as may, will, intend, could, expect, anticipate, believe, predict, potential might or continue or the negative of such terms or other comparable Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our and the television broadcast industry's actual results, levels of activity, performance, achievements and prospects to be materially different from those expressed or implied by such forward-looking statements. These risks, uncertainties and other factors include those identified under Risk Factors in this Annual Report on Form 10-K. In light of these risks, uncertainties and assumptions, the forward-looking events discussed in this Annual Report on Form 10-K might not occur.

We do not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, after the date of this Annual Report on Form 10-K. In addition, we make no representation with respect to any materials available on the Internet, including materials available on our website.

PART I

Item 1. Business

ACME Communications, Inc. (the Company or we) owns and operates ten broadcast television stations in medium-sized markets across the United States. Nine of our stations are network affiliates of The WB Network, making us the third largest WB Network affiliated station group in the country. Our television stations broadcast in markets that cover in aggregate approximately 5.4% of the total U.S. television households. Mr. Kellner, our Chairman and Chief Executive Officer, is also a founder and Chief Executive Officer of The WB Network, and was President of Fox Broadcasting Company from its inception in 1986 through 1993. In March 2001, Mr. Kellner also became Chairman and Chief Executive Officer of AOL Time Warner's Television Networks division.

Since our formation in 1997, we have focused primarily on acquiring and developing independently-owned stations, under-performing stations and construction permits for new stations in markets that we believe have the growth potential and demographic profile to support a successful WB Network affiliate. We believe that medium-sized markets provide advantages such as fewer competitors and lower operating costs compared to large markets. Our strategy is to capitalize on these advantages and to grow our revenues and cash flow with an emphasized focus on local sales. Since we centralize many of our stations' administrative functions and primarily provide entertainment programming, our station general managers are able to focus on increasing sales and improving operating margins. Additionally, since many of the stations we own are in markets where the Federal Communications Commission allows dual ownership of broadcast television stations (duopoly), our long-term strategy also includes acquiring such second stations.

Like The WB Network, we target our programming at younger audiences, in particular, young adults, teens and kids. We believe that these younger audiences are a growing and increasingly important demographic target for advertisers, and that our affiliation with The WB Network affords us a significant competitive advantage over other network affiliated television broadcasters in attracting these younger audiences. Since its launch in 1995 and through the 2000/2001 season, The WB Network was the only English-language broadcast network in the United States to increase its audience share in these key target demographic groups. To build and retain our audience share during non-network hours, we also acquire the broadcast rights to popular syndicated programming that we believe complements The WB Network programming. In addition, we broadcast local programming such as news in St. Louis, local weather updates and local and regional sports programming in selected markets. We believe this programming enhances our ability to sell advertising time to local and regional advertisers and increase audience awareness of our newly launched stations.

Table of Contents

Programming

Our programming includes:

The WB Network prime time programming (at nine of our ten stations)

Kids WB! (at nine of our ten stations);

syndicated programming; and

local programming.

Prime Time Programming. In prime time, The WB Network is currently ranked number one among female teens and, based on the average age of their viewers, is the youngest broadcast network today. Prime time programming includes: *7th Heaven, Smallville, Gilmore Girls, Charmed, Dawson's Creek, Reba,* and *Sabrina: The Teenage Witch*. When The WB Network began broadcasting in 1995, it provided two hours of prime time programming per week. The WB Network is currently providing 13 hours of prime time programming Sunday through Friday. Beginning in the fall of 2002, The WB Network's prime time programming will increase to 15 hours each week.

Kids WB! Programming. The WB Network launched Kids WB! in September 1995 with three hours of programming on Saturdays, and currently provides 14 hours of kids programming Monday through Saturday. Kids WB! programming includes *Pokémon, X-Men: Evolution, Jackie Chan Adventures* and *The Mummy*.

Syndicated Programming. In addition to The WB Network programming, our stations air syndicated programs. Generally, our most profitable programming time periods are those immediately before and after The WB Network programming. Consequently, during these time periods, we air programs that are targeted to the audiences similar in demographics as those that watch The WB Network prime time programs. These syndicated programs include *Everybody Loves Raymond, Judge Judy, King of the Hill, Drew Carey,* and *Spin City*. We have secured future broadcast rights for certain of our stations to *That 70s Show, Will and Grace* and other shows. We have multi-year contracts to air most of our syndicated programming.

Local Programming. Each of our stations also airs programming of local interest, which we believe creates immediate viewership at our start-up stations, increases local awareness of our stations and expands our advertiser base. At KWBP, our station in Portland, and at KUWB, our station in Salt Lake City, we air weather updates throughout each evening, a format we intend to replicate at our other stations. KUWB also airs their locally produced show *WB A.M.* from 5:30 a.m. through 8:00 a.m., Monday through Friday. *WB A.M.* provides our Salt Lake City viewers up-to-the-minute weather and traffic information. Many of our stations, air certain regional and local sporting events including games of the St. Louis Cardinals and the St. Louis Blues at KPLR and the University of Oregon Ducks and Oregon State University Beavers at KWBP. In addition, KPLR airs a nightly 30-minute local newscast.

Table of Contents**Our Stations**

The following table provides general information concerning our stations:

Station	Channel	Marketplace	November 2001 Audience Share(2)					Beginning of ACME Operation

- (1) All television stations throughout the United States are grouped into 210 markets that are ranked in size according to the number of households with televisions in the market for the 2001/2002 season.
- (2) All share information is from Nielsen Media Research.
- (3) Prime Time represents the hours of programming provided by The WB Network, except for KASY in Albuquerque Santa Fe, NM for which programming is provided by UPN.
- (4) Sign-on to Sign-off represents the hours from 7:00 a.m. through 1:00 a.m., Monday through Sunday.

KPLR: St. Louis, Missouri

Designated Market Area: 22 TV Households: 1,144,000

Total Age 2+ Population: 2,883,602

Market Description. Thirty-three percent of the total population of St. Louis is under 25 years of age. The estimated average household income in the St. Louis market is approximately \$48,000 per year. Major employers in the market include Anheuser-Busch, Emerson Electric, May Department Stores, Monsanto, and Ralston Purina.

Station Overview. We began operating KPLR under a local marketing agreement in October 1997 and acquired the station in March 1998. KPLR signed on the air in 1959 and has been affiliated with The WB Network since the network's launch. In addition to carrying The WB

Edgar Filing: ACME COMMUNICATIONS INC - Form 10-K

Network prime time programming and Kids WB!, the station broadcasts a daily 9pm, half-hour local newscast and also has the exclusive broadcast rights to air games of the St. Louis Cardinals and the St. Louis Blues. In addition, the station's syndicated programming currently includes *Everybody Loves Raymond*, *Friends*, *The Drew Carey Show*, *Spin City*, *Sabrina: The Teenage Witch* and *Cheers*. The station has contracted for the future exclusive market broadcast rights to popular shows such as *Will & Grace* and *The That 70's Show*, both beginning in September 2002. Using the unweighted average of the three major sweeps periods (February, May and November) in the Monday through Sunday, 5:00 p.m. to 12:00 a.m. time period among adults aged 18-49 (the Average Sweeps), KPLR's ratings decreased 17% over the Average Sweeps ratings for 2000. In the November 2001 sweeps period, KPLR again delivered the highest household rating in WB prime time to rank number one

Table of Contents

versus all other WB affiliates in the country. KPLR also took top honors among adults aged 18 – 34. In the St. Louis market, KPLR continued to rank number one in the Monday through Sunday, 5:00 p.m. to 1:00 a.m. time period among St. Louis teens and persons aged 12 – 24.

KWBP: Portland, Oregon

Designated Market Area: 23 TV Households: 1,069,000

Total Age 2 + Population: 2,662,966

Market Description. Thirty-two percent of the total population of Portland is under 25 years of age. The estimated average household income in the Portland market is approximately \$45,900 per year. Major employers in the market include Intel, Fred Meyer, Providence Health System, U.S. Bank of Oregon, Tektronix and Safeway.

Station Overview. We began operating KWBP under a local marketing agreement in February 1997 and acquired the station in June 1997. KWBP signed on the air in 1989 and has been affiliated with The WB Network since the network's launch. In addition to carrying The WB Network prime time programming and Kids WB!, the station's syndicated programming currently includes *King of the Hill*, *Judge Judy*, *The Drew Carey Show* and *Judge Joe Brown*. In addition, the station has contracted for the future exclusive-market broadcast rights to popular shows such as *That 70's Show*, which begins airing in September 2002. KWBP's Average Sweeps ratings increased 9% over the Average Sweeps ratings for 2000. In the November 2001 sweeps period, KWBP delivered an average weekly cumulative number of 561,000 households from sign-on to sign-off, representing a 2% decrease from November 2000.

KUWB: Salt Lake City, Utah

Designated Market Area: 35 TV Households: 783,000

Total Age 2+ Population: 2,317,360

Market Description. Forty-five percent of the total population of Salt Lake City is under 25 years of age. The estimated average household income in the Salt Lake City market is approximately \$45,200 per year. Major employers in the market include Intermountain Health Care, Brigham Young University, IOMEGA, ICON Health and Fitness and Smith Food & Drug Centers

Station Overview. We began operating KUWB in April 1998 under a local marketing agreement and acquired the station in September 1998. KUWB has been affiliated with The WB Network since the network's launch. When we began operating the station, we replaced the primarily religious paid programming and infomercials that were being run on the station in all non-WB Network time periods with syndicated programming. The station's syndicated programming currently includes *Everybody Loves Raymond*, *The Drew Carey Show*, *Spin City* and *Sabrina: The Teenage Witch*. It also carries the NBC-affiliated *Saturday Night Live*. The station has contracted for the future exclusive-market broadcast rights to popular shows such as *That 70's Show*, which begins airing in September 2002. KUWB's Average Sweeps ratings remained unchanged from the Average Sweeps ratings for 2000. In the November 2001 sweeps period, KUWB delivered an average weekly cumulative number of 376,000 households from sign-on to sign-off, an increase of 1% compared to November 2000.

KWBQ: Albuquerque – Santa Fe, New Mexico

KASY: Albuquerque – Santa Fe, New Mexico

Designated Market Area: 48 TV Households: 607,000

Total Age 21 Population: 1,603,207

Market Description. Thirty-six percent of the total population of Albuquerque – Santa Fe is under 25 years of age. The estimated average household income in the Albuquerque – Santa Fe market is approximately \$39,900 per year. Major employers in the market include Intel, Motorola, General Electric, General Mills, Philips and Levi Strauss.

Table of Contents

KWBQ Station Overview. We launched KWBQ in March 1999 with The WB Network prime time programming and Kids WB!. In addition, the station's syndicated programming currently includes *Everybody Loves Raymond*, *King of the Hill*, *Spin City*, *Seinfeld* and *Third Rock from the Sun*. The station has contracted for the future exclusive-market broadcast rights to popular shows such as *That 70's Show*, which begins airing in September 2002. KWBQ's Average Sweeps ratings increased 76% over the Average Sweeps ratings for 2000. In the November 2001 sweeps period, the station increased its weekly circulation 17% from 181,000 homes in November 2000 to 212,000 homes.

KASY Station Overview. We began operating KASY, the UPN affiliate in the market, under an interim local marketing agreement (LMA) on November 1, 1999 and closed our purchase of the station on December 3, 1999. The station has been a UPN affiliate since that network's launch in January 1995. Prior to November 1999, the station had been operating as an LMA by another station owner in the market. The station's syndicated programming includes *Judge Judy*, *Texas Justice* and *Judge Joe Brown*. All of the future program rights negotiated for KWBQ are also available to air on KASY. KASY's Average Sweeps ratings increased 43% over the Average Sweeps ratings for 2000. During the November 2001 ratings period, KASY reached an average of 244,000 households, sign-on to sign-off, Monday through Sunday, 7:00 a.m. to 1:00 a.m., an 11% increase over the homes reached just a year before.

WBDT: Dayton, Ohio

Designated Market Area: 60 TV Households: 495,000

Total Age 2+ Population: 1,230,568

Market Description. Thirty-three percent of the total population of Dayton, Ohio is under 25 years of age. The estimated average household income in the Dayton market is approximately \$46,000 per year. Major employers in the market include Chrysler Corp/ Acustar Inc., General Motors, Bank One Dayton, American Matsushita and BF Goodrich.

Station Overview. We acquired WBDT in June 1999. WBDT signed on the air in October 1980 and has been affiliated with The WB Network since our acquisition of the station. The station's syndicated programming currently includes *Everybody Loves Raymond*, *Just Shoot Me*, *Texas Justice*, and *Sabrina: The Teenage Witch*, and the station has contracted for the future exclusive-market broadcast rights to popular shows such as *Will & Grace* and *That 70's Show*, both beginning in September 2002. In October of 2001, Dayton became Nielsen's 52nd metered market. WBDT's Average Sweeps ratings increased 71% over the Average Sweeps ratings for 2000. During the November 2001 sweeps period, WBDT reached an average of 282,000 households weekly, representing a 101% increase over the November 2000 sweeps period.

WBXX: Knoxville, Tennessee

Designated Market Area: 62 TV Households: 478,000

Total Age 2+ Population: 1,162,433

Market Description. Thirty-one percent of the total population of Knoxville is under 25 years of age. The estimated average household income in the Knoxville market is approximately \$39,300 per year. Major employers in the market include the University of Tennessee, TVA, Oakridge National Laboratories, Alcoa and Nippondenso.

Station Overview. We launched WBXX in October 1997. In addition to carrying The WB Network prime time programming and Kids WB!, the station also airs games of the Atlanta Braves. In addition, the station's syndicated programming currently includes *King of the Hill*, *Friends*, *The Drew Carey Show*, *Spin City* and *Just Shoot Me*. The station has contracted for the future exclusive-market broadcast rights to popular shows such as *Dharma & Gregg* and *That 70's Show*, both beginning in September 2002. WBXX's Average Sweeps ratings increased 2% over the Average Sweeps ratings for 2000. During the November 2001 sweeps period, WBXX reached an average of 157,000 households weekly, representing a 9% decrease over the November 2000 sweeps period. Nielsen has announced that in October 2002, Knoxville will become a metered market.

Table of Contents

WIWB: Green Bay Appleton, Wisconsin

Designated Market Area: 69 TV Households: 406,000

Total Age 2+ Population: 1,022,553

Market Description. Thirty-four percent of the total population of Green Bay Appleton is under 25 years of age. The estimated average household income in the Green Bay Appleton market is approximately \$43,100 per year. Major employers in the market include Fort James Corporation, the Oneida Tribe of Indians of Wisconsin, Schneider National, Humana, Shopko Stores, American Medical Security, Bellin Memorial Hospital and Procter & Gamble Paper Products.

Station Overview. We acquired WIWB in June 1999. WIWB signed on the air in August 1998 and has been affiliated with The WB Network since our acquisition of the station. The station's syndicated programming currently includes *Everybody Loves Raymond*, *Frasier*, and *Sabrina: The Teenage Witch* and the station has contracted for the future exclusive-market broadcast rights to popular shows such as *Will & Grace* and *That 70's Show*, both beginning in September 2002. WIWB's Average Sweeps ratings increased 26% over the Average Sweeps ratings for 2000. In the November 2001 sweeps period, WIWB's cumulative homes reached in the Green Bay/ Appleton market increased 11% over the November 2000 sweeps period to a weekly average of 111,000 homes.

WTVK: Ft. Myers Naples, Florida

Designated Market Area: 76 TV Households: 385,000

Total Age 2+ Population: 908,651

Market Description. Twenty-five percent of the total population of Ft. Myers Naples is under 25 years of age. The estimated average household income in the Ft. Myers Naples market is approximately \$48,800 per year. Major employers in the market include The Lee County School District, Lee Memorial Health System, Columbia Healthcare and Publix SuperMarkets. Ft. Myers Naples became a metered market in April 2001.

Station Overview. We began operating WTVK in March 1998 under a local marketing agreement and acquired the station in June 1998. WTVK signed on the air in October 1990 and has been affiliated with The WB Network since our acquisition of the station. In addition to carrying The WB Network prime time programming and Kids WB!, the station's syndicated programming currently includes *Just Shoot Me*, *Sabrina: The Teenage Witch*, *Spin City*, *The Drew Carey Show* and *Star Trek: Voyager*. The station has contracted for the future exclusive-market broadcast rights to popular shows such as *That 70's Show* and *Dharma & Greg*, both beginning in September 2002. In May 2001, the Ft. Myers Naples market became Nielsen's 51st metered market. WTVK's Average Sweeps ratings decreased 6% over the Average Sweeps ratings for 2000. WTVK delivered an average weekly household cumulative number of 156,000 in November 2001, a 114% increase compared to our circulation in November 2000.

WBUI: Champaign Springfield Decatur, Illinois

Designated Market Area: 82 TV Households: 362,000

Total Age 2+ Population: 876,805

Market Description. Thirty-three percent of the total population of Champaign Springfield Decatur is under 25 years of age. The estimated average household income in the Champaign Springfield Decatur market is approximately \$45,000 per year. Major employers in the market include ADM, Staley's, Caterpillar, Mueller, Illinois Power, Kraft and the University of Illinois.

Station Overview. We acquired WBUI in June 1999. WBUI signed on the air in May 1984 and has been affiliated with The WB Network since our acquisition of the station. The station's syndicated programming currently includes *Everybody Loves Raymond*, *Spin City* *Just Shoot Me*, and *Sabrina: The Teenage Witch*. The station has contracted for the future exclusive market broadcast rights to popular shows such as *That 70's Show*, which begins airing in September 2002. WBUI's Average Sweeps ratings increased 37% over the

Table of Contents

Average Sweeps ratings for 2000. In the November 2001 sweeps period, WBUI's reach in its market increased 27% over the November 2000 period to a weekly average of 117,000 homes.

Pending Station/Construction Permit Acquisitions

In March 2002, we entered into a court-approved asset purchase agreement to buy substantially all of the broadcast assets of station WHPN serving the Madison, Wisconsin marketplace, for a cash purchase price of \$5.6 million. This agreement is subject to regulatory approvals and the satisfaction of other pre-closing conditions. We expect to begin operating the station under an interim LMA on or about April 1, 2002 and expect the transaction to close by mid-summer 2002.

We also own the rights to acquire construction permits to build four other stations—three to be new WB Network affiliates in Lexington, KY, Richmond, VA and Flint-Saginaw Bay Cities, MI and the fourth to be a second station, operated as an independent, in Portland, OR. The acquisition of these construction permits is dependent on the Federal Communications Commission approving the underlying applications. The aggregate purchase price for these four construction permits is approximately \$18.4 million.

Our Affiliation Agreements

Each of our nine WB Network affiliated stations has entered into a station affiliation agreement with The WB Network that provides each station with the exclusive right to broadcast The WB Network programming in its respective market. These affiliate agreements have three to 10-year terms that expire between March 2003 and April 2009. KASY, our UPN affiliated station in Albuquerque-Santa Fe, New Mexico, has entered into an affiliation agreement with UPN that expires in January 2005.

Under the affiliation agreements, The WB Network and UPN retain the right to program and sell approximately 75% of the advertising time available during their prime time schedule with the remaining 25% available for sale by our stations. Both networks retain approximately 50% of the advertising time available during kids programming aired in other dayparts.

For our nine WB Network affiliated stations, in addition to the advertising time retained for sale by The WB Network, each station is also subject to annual compensation payments to The WB Network. The amount of compensation is determined by taking into account the station's average ratings among adults ages 18-49 during The WB Network prime time programming, as well as the number of prime time programming hours provided per week by The WB Network. For our UPN affiliate, KASY, no compensation is paid by either party. We participate in cooperative marketing efforts with The WB Network and UPN whereby the networks reimburse up to 50% of certain approved advertising expenditures by a station to promote network programming. Our affiliation agreements for KPLR, KWBP and WBXX, also entitle those stations to certain most favorable terms agreed to by The WB Network and any affiliate, during the term of the affiliation agreements, and any subsequent modifications.

In addition, as part of our acquisition of WBDT, WIWB and WBUI, we entered into a five-year secondary affiliation agreement with Pax Net at these stations. We are generally obligated to run the Pax Net prime time programming in certain morning dayparts. We retain a portion of the advertising time during this programming for local sales, and Pax Net retains the balance.

Advertising/ Sales

Virtually all of our revenues for 1999, 2000, and 2001 consisted of advertising revenues, and no single advertiser accounted for more than 10% of our gross advertising revenues in these periods. Our advertising revenues are generated both by local advertising and national spot advertising.

Local Advertising. Local advertising revenues are generated by both local merchants and service providers and by regional and national businesses and advertising agencies located in a particular designated market area. Local advertising revenues represented 55% of our net advertising revenues in 1999, 54% in each of 2000 and 2001.

Table of Contents

National Spot Advertising. National spot advertising represents time sold to national and regional advertisers based outside a station's designated market area. National spot advertising revenues represented 45% of our net advertising revenues in 1999, 46% in 2000 and 46% in 2001. National spot advertising primarily comes from:

new advertisers wishing to test a market;

advertisers who are regional retailers and manufacturers without national distribution;

advertisers who need to enhance network advertising in given markets; and

advertisers wishing to place more advertisements in specified geographic areas.

Our Competition

Broadcast television stations compete for advertising revenues primarily with other broadcast television stations in their respective markets and, to a lesser but increasing extent, with radio stations, cable television system operators, newspapers, billboard companies, direct mail and internet sites. ABC, CBS, NBC and Fox programming generally achieve higher household audience levels than that of The WB Network, UPN and syndicated programming aired by independent stations which is attributable to a number of factors, including:

the traditional networks' efforts to reach a broader audience;

historically, less competition;

generally better channel positions;

more network programming being broadcast weekly;

the traditional networks' cross-promotions; and

the traditional networks' more established market presence than The WB Network.

However, because The WB Network and UPN provide fewer hours of programming per week than the traditional networks, we have a significantly higher inventory of advertising time for our own use and, therefore, our programs achieve a share of television market advertising revenues greater than their share of the market's audience. We believe that this available advertising time, combined with our efforts to attract (via our programming) the audiences that are key targets of advertisers, and our focus on advertising sales allows us to compete effectively for advertising revenues within our stations' markets.

The broadcasting industry is continuously faced with technical changes and innovations, the popularity of competing entertainment and communications media, changes in labor conditions, and governmental restrictions or actions of federal regulatory bodies, including the FCC, any of which could possibly have an adverse effect on a television station's operations and profits. Sources of video service other than conventional television stations, the most common being cable television, can increase competition for a broadcast television station by bringing distant broadcasting signals not otherwise available to the station's audience, serving as a distribution system for national satellite-delivered programming and other non-broadcast programming originated on a cable system and selling advertising time to local advertisers. Other principal sources of competition include home video exhibition, direct-to-home broadcast satellite television, entertainment services and multi-channel multi-point distribution services. Currently, two FCC permittees, DirecTV and EchoStar, provide subscription DBS services via high-power communications satellites and small dish receivers, and other companies provide direct-to-home video service using lower powered satellites and larger receivers.

Other technology advances and regulatory changes affecting programming delivery through fiber optic telephone lines and video compression could lower entry barriers for new video channels and encourage the development of increasingly specialized niche programming. The Telecommunications Act of 1996 permits telephone companies to provide video distribution services via radio communication, on a common carrier basis, as cable systems or as open video systems, each pursuant to different regulatory schemes. We cannot

Table of Contents

predict the effect that these and other technological and regulatory changes will have on the broadcast television industry or on the future profitability and value of a particular broadcast television station.

Broadcast television stations compete with other television stations in their designated market areas for the acquisition of programming. Generally, cable systems do not compete with local stations for programming, but various national cable networks do from time to time and on an increasing basis acquire programming that could have been offered to local television stations. Public broadcasting stations generally compete with commercially-rated broadcasters for viewers, but do not compete for advertising revenues. Historically, the cost of programming has increased because of an increase in the number of independent stations and a shortage of quality programming.

Federal Regulation of Television Broadcasting

Television broadcasting is a regulated industry and is subject to the jurisdiction of the FCC under the Communications Act of 1934, as amended from time to time. The Communications Act prohibits the operation of television broadcasting stations except under a license issued by the FCC. The Communications Act empowers the FCC, among other things:

to issue, revoke and modify broadcast licenses;

to decide whether to approve a change of ownership or control of station licenses;

to regulate the equipment used by stations; and

to adopt and implement regulations to carry out the provisions of the Communications Act.

Failure to observe FCC or other governmental rules and policies can result in the imposition of various sanctions, including monetary forfeitures, the grant of short, or less than maximum, license renewal terms or, for particularly egregious violations, the denial of a license renewal application, the revocation of a license or denial of FCC consent to acquire additional broadcast properties.

License Grant, Renewal, Transfer and Assignment. A party must obtain a construction permit from the FCC to build a new television station. Once a station is constructed and commences broadcast operations, the permittee will receive a license which must be renewed by the FCC at the end of each license term (which may be as long as eight years under current law). The FCC grants renewal of a broadcast license if it finds that the station has served the public interest, convenience, and necessity, there have been no serious violations by the licensee of the Communications Act or FCC rules and policies, and there have been no other violations of the Communications Act and FCC rules and policies which, taken together, would constitute a pattern of abuse. If the FCC finds that a licensee has failed to meet these standards, the FCC may deny renewal, condition renewal, or impose some other sanction (such as a forfeiture). Any other party with standing may petition the FCC to deny a broadcaster's application for renewal. However, only if the FCC issues an order denying renewal will the FCC accept and consider applications from other parties for a construction permit for a new station to operate on that channel. The FCC may not consider any new applicant for the channel in making determinations concerning the grant or denial of the licensee's renewal application. Although renewal of licenses is granted in the majority of cases even when petitions to deny have been filed, we cannot be sure our station licenses will be renewed for a full term or without modification.

Table of Contents

Our current licenses expire as follows:

Station (by market ranking)	Expiration Date
KPLR/ St. Louis	February 1, 2006
KWBP/ Portland, OR	February 1, 2007
KUWB/ Salt Lake City	October 1, 2006
KWBQ/ Albuquerque Santa Fe	October 1, 2006
KASY/ Albuquerque Santa Fe	October 1, 2006
WBDT/ Dayton	October 1, 2005
WBXX/ Knoxville	August 1, 2005
WIWB/ Green Bay Appleton	December 1, 2005
WTVK/ Ft. Myers Naples	February 1, 2005
WBUI/ Champaign Decatur Springfield	December 1, 2005

We have also entered into an asset purchase agreement for the acquisition of WHPN-TV in the Madison, Wisconsin market. We anticipate that the closing of that acquisition will probably occur sometime before July 1, 2002. The expiration date for that station's FCC license is December 1, 2005.

The Communications Act prohibits the assignment of a broadcast license or the transfer of control of a broadcast licensee without the prior approval of the FCC. In determining whether to permit the assignment or transfer of control of, or the grant or renewal of, a broadcast license, the FCC considers a number of factors pertaining to the licensee, including:

compliance with various rules limiting common ownership of media properties;

the character of the licensee and those persons holding attributable interests therein; and

compliance with the Communications Act's limitations on alien ownership.

Character generally refers to the likelihood that the licensee or applicant will comply with applicable law and regulation. Attributable interests generally refer to the level of ownership or other involvement in station operations which would result in the FCC attributing ownership of that station or other media outlet to the person or entity in determining compliance with FCC ownership limitations.

To obtain the FCC's prior consent to assign a broadcast license or transfer control of a broadcast licensee, an application must be filed with the FCC. If the application involves a substantial change in ownership or control, the application must be placed on public notice for a period of no less than 30 days during which petitions to deny the application may be filed by interested parties, including certain members of the public. If the FCC grants the application, interested parties have no less than 30 days from the date of public notice of the grant to seek reconsideration or review of that grant by the commission or, as the case may be, a court of competent jurisdiction. The full FCC commission has an additional 10 days to set aside on its own motion any action taken by the FCC's staff. When passing on an assignment or transfer application, the FCC is prohibited from considering whether the public interest might be better served by an assignment or transfer to any party other than the assignee or transferee specified in the application.

Ownership Restrictions. The officers, directors and equity owners of 5% or more of our outstanding voting stock or the voting stock of a company holding one or more broadcast licenses are deemed to have attributable interests in the broadcast company. Also, specified institutional investors, including mutual funds, insurance companies and banks acting in a fiduciary capacity, may own up to (but not as much as) 20% of the outstanding voting stock without being subject to attribution if they exercise no control over the management or policies of the broadcast company. Finally, even if it owns non-voting stock, a third party could be deemed to have an attributable interest if it owns more than 33 percent of a station's (or the Company's) asset value (which is generally defined by the FCC to mean the aggregate of equity plus debt) and either has another attributable interest in the same market as the station(s) or provides more than 15 percent of the weekly programming for the station(s).

Table of Contents

The FCC rules generally prohibit the issuance of a license to any party, or parties under common control, for a television station if that station's Grade B contour overlaps with the Grade B contour of another television station in the same DMA in which that party or those parties already have an attributable interest. FCC rules provide an exception to that general prohibition and allow ownership of two television stations with overlapping Grade B contours under any one of the following circumstances:

there will be eight independent full-power television stations in the DMA after the acquisition or merger and one of the two television stations owned by the same party is not among the top four-ranked stations in the DMA based on audience share;

the station to be acquired is a failing station under FCC rules and policies;

the station to be acquired is a failed station under FCC rules and policies; or

the acquisition will result in the construction of a previously unbuilt station.

FCC regulations also prohibit one owner from having attributable interests in television broadcast stations that reach in the aggregate more than 35% of the nation's television households. For purposes of this calculation, stations in the UHF band, which covers channels 14-69, are attributed with only 50% of the households in their respective markets (while 100% of the market households are attributed to stations in the VHF band, which covers channels 2-13). A recent court decision concluded that the FCC's 35% limitation is not adequately supported by sufficient evidence in the public record and directed the FCC to conduct further proceedings to determine whether a limitation on national television attribution can be justified and, if so, what that limitation should be.

The same court decision vacated pre-existing FCC rules which prohibited common ownership of a television station and cable television system in the same community. The court did not directly question other FCC ownership rules which generally allow the holder of an attributable interest in a television station to have an attributable interest in:

up to six radio stations in a market with 20 independent media voices;

up to four radio stations in a market with 10 independent media voices; and

at least one radio station in any market.

At the same time, FCC rules generally prohibit a party with an attributable interest in a television station from owning a daily newspaper serving a community located within the relevant coverage area of that television station. Those rules are the subject of a pending rulemaking proceeding in which the FCC is seeking evidence and argument to decide whether those rules should be retained, modified, or repealed in their entirety.

Restrictions on Foreign Ownership. The Communications Act prohibits the issuance of broadcast licenses to, or the holding of a broadcast license by, foreign citizens or any corporation of which more than 20% of the capital stock is owned of record or voted by non-U.S. citizens or their representatives or by a foreign government or a representative thereof, or by any corporation organized under the laws of a foreign country. The Communications Act also authorizes the FCC to prohibit the issuance of a broadcast license to, or the holding of a broadcast license by, any corporation controlled by any other corporation of which more than 25% of the capital stock is owned of record or voted by aliens. The FCC has interpreted these restrictions to apply to other forms of business organizations, including partnerships. As a result of these provisions, the licenses granted to our subsidiaries that hold FCC licenses could be revoked if more than 25% of our stock were directly or indirectly owned or voted by aliens. Our certificate of incorporation contains limitations on alien ownership and control substantially similar to those contained in the Communications Act. Pursuant to our certificate of incorporation, we have the right to refuse to sell shares to aliens or to repurchase alien-owned shares at their fair market value to the extent necessary, in the judgment of our board of directors, to comply with the alien ownership restrictions.

Programming and Operation. The Communications Act requires broadcasters to serve the public interest, convenience and necessity. The FCC has gradually restricted or eliminated many of the more

Table of Contents

formalized procedures it had developed to promote the broadcast of programming responsive to the needs of the station's community of license. Licensees continue to be required, however, to present programming that is responsive to community problems, needs and interests and to maintain certain records demonstrating such responsiveness. Complaints from viewers concerning a station's programming will be considered by the FCC when it evaluates the licensee's renewal application, but these complaints may be filed and considered at any time.

Stations must also pay regulatory and application fees and follow various FCC rules that regulate, among other things:

political advertising;

children's programming;

the broadcast of obscene or indecent programming;

sponsorship identification; and

technical operations.

Failure to observe these or other rules and policies can result in the imposition of various sanctions, including monetary forfeitures, the grant of short, less than the maximum, renewal terms, or for particularly egregious violations, the denial of a license renewal application or the revocation of a license.

Review of Must Carry Rules. FCC regulations implementing the Cable Television Consumer Protection and Competition Act of 1992 require each television broadcaster to elect, at three-year intervals beginning October 1, 1993, to either:

require carriage of its signal by cable systems in the station's market which is referred to as must carry rules; or

negotiate the terms on which such broadcast station would permit transmission of its signal by the cable systems within its market, which is referred to as retransmission consent.

The United States Supreme Court upheld the must-carry rules in a 1997 decision. These must carry rights are not absolute, and their exercise is dependent on a variety of factors such as:

the number of active channels on the cable system;

the location and size of the cable system; and

the amount of programming on a broadcast station that duplicates the programming of another broadcast station carried by the cable system.

Therefore, under certain circumstances, a cable system may decline to carry a given station. We have elected must carry for each of our stations on all of the cable systems where such carriage can be elected. See also *Digital Television Services* below.

Local Marketing Agreements. Under FCC rules, the licensee of a television station providing more than 15% of another television station's programming under a local marketing agreement is considered to have an attributable interest in the other station for purposes of the FCC's national and local multiple ownership rules if both stations are located in the same market. The FCC also adopted a grandfathering policy providing that local marketing agreements that are in compliance with the previous FCC rules and policies and were entered into before November 5, 1996, would be permitted to continue in force until the FCC conducts its biennial review of regulations in 2004. Local marketing agreements entered into after November 5, 1996 but prior to the adoption of the new FCC rules in 1999 were grandfathered until August 2001.

Prior to the adoption of the FCC's new rules, we did, from time to time, enter into local marketing agreements, generally in connection with pending station acquisitions. By using local marketing agreements, we can provide programming and other services to a station that we have agreed to acquire before we receive all applicable FCC and other governmental approvals. We are obligated to and will enter into a local

Table of Contents

marketing agreement on or about April 1, 2002 in conjunction with our proposed acquisition of WHPN-TV in the Madison, Wisconsin market.

Subject to ownership restrictions in the new FCC rules and policies, FCC rules and policies generally permit local marketing agreements if the station licensee retains ultimate responsibility for and control of the applicable station, including finances, personnel, programming and compliance with the FCC's rules and policies. We cannot be sure that we will be able to air all of our scheduled programming on a station with which we may have a local marketing agreement or that we would receive the revenue from the sale of advertising for such programming. In the case of the local marketing agreement for WHPN, for example, we are obligated to honor pre-existing programming agreements.

Digital Television Services. The FCC has adopted rules for implementing digital television service in the United States. Implementation of digital television will improve the technical quality of television signals and provide broadcasters the flexibility to offer new services, including high-definition television and data broadcasting.

The FCC has established service rules and adopted a table of allotments for digital television. Under the table, all eligible broadcasters with a full-power television station are allocated a separate channel for digital television operation. Stations will be permitted to phase in their digital television operations over a period of years, after which they will be required to surrender their license to broadcast the analog, or non-digital, television signal. Affiliates of the top four networks in the top thirty markets are already required to be on the air with a digital signal. FCC rules required our stations to be on the air with a digital signal by May 1, 2002. However, the FCC invited television owners to request an extension of that deadline for their respective stations if they needed it, and we filed six-month extension requests for all of our stations and were granted such extensions in March 2002.

In announcing its receptivity to extensions of digital television construction deadlines, the FCC recognized the practical and technical difficulties of requiring television broadcasters to implement digital television. For those same reasons, the FCC suspended most of the construction and service deadlines that had previously been imposed. However, the FCC did not suspend the current regulation (which is mirrored in the Communications Act) that requires television broadcasters to return their analog license to the government by 2006 unless specified conditions exist that, in effect, limit the public's access to digital television transmissions in a particular market.

The Communications Act and the FCC's rules impose certain conditions on the FCC's implementation of digital television service. Among other requirements, the FCC must:

limit the initial eligibility for licenses to existing television broadcast licensees or permittees (who held those licenses or permits by April 3, 1997);

allow digital television licensees to offer ancillary and supplementary services; and

charge appropriate fees to broadcasters that supply ancillary and supplementary services for which such broadcasters derive certain non-advertising revenues.

Equipment and other costs associated with the digital television transition, including the necessity of temporary dual-mode operations, will impose some near-term financial costs on television stations providing the services. The potential also exists for new sources of revenue to be derived from digital television. We cannot predict the overall effect the transition to digital television might have on our business.

Another major issue surrounding the implementation of digital television is the scope of a local cable television system's obligation to carry the signals of local broadcast television stations. The FCC has issued an order stating that, for the present, a cable television system is only obligated to carry a television's digital signal if the station does not have an analog signal. The FCC has not yet determined the scope of a cable television system's must carry obligations when a broadcast television station has both an analog signal and a digital signal that each has a substantial audience.

Table of Contents

Children's Television Act. FCC rules limit the amount of commercial matter that a television station may broadcast during programming directed primarily at children 12 years old and younger. FCC rules further require television stations to serve the educational and informational needs of children 16 years old and younger through the stations' own programming as well as through other means. Television broadcasters must file periodic reports with the FCC to document their compliance with foregoing obligations.

Other FCC and Legislative Matters. The FCC repealed the rule which prohibited one of the major television networks (ABC, CBS, NBC or Fox) from owning another television network. Viacom utilized that change in FCC rules to acquire an interest in UPN. We cannot predict how or when the relaxation of the dual network rule may affect our business.

The Satellite Home Viewer Act and related FCC regulations allow satellite carriers to deliver broadcast programming to subscribers who are unable to obtain television network programming over the air from local television stations. Congress later amended the act to facilitate the ability of satellite carriers to provide subscribers with programming from both local and non-local television stations (regardless of the subscribers' ability to receive the television signals over the air). The FCC has adopted rules to implement certain of those legislative changes and is conducting rulemaking proceedings to implement others. A principal component of the new regulation requires satellite carriers to carry all local television stations in a market if they carry one. We have taken advantage of that regulation to require carriage of our stations on satellite systems in the St. Louis, Portland, Salt Lake City and Albuquerque-Santa Fe markets.

On February 2, 2000, the FCC released a Report and Order which adopted new rules that would have required broadcast licensees to provide equal employment opportunities. The new rules would have required broadcast licensees to widely disseminate information on employment vacancies and to promote diversification in their employment. The new rules were intended to supplement a broadcaster's obligation to refrain from racial or other prohibited discrimination in its employment practices under other applicable federal as well as state and local laws and regulations. On January 16, 2001, the United States Court of Appeals for the District of Columbia Circuit declared certain portions of those new EEO rules to be unconstitutional, and on January 31, 2001, the FCC suspended implementation of all of its EEO rules. On December 12, 2001, the FCC inaugurated a new rulemaking proceeding to consider the adoption of new EEO rules that the FCC hoped would satisfy the court's objections. It cannot be predicted when any new rules will be adopted and what their precise formulation will be.

Federal regulatory agencies and Congress from time to time consider proposals for additional or revised rules. We cannot predict how those proposals or other issues discussed above will be resolved, although their outcome could have an adverse or favorable impact on the broadcasting industry generally or us specifically.

The foregoing summary of FCC and other governmental regulations is not intended to be comprehensive. For further information concerning the nature and extent of federal regulation of broadcast stations, you should refer to the Communications Act, other Congressional acts, FCC rules, and the public notices and rulings of the FCC.

Employees

At December 31, 2001, we had 348 employees, including 41 at KPLR in St. Louis who were subject to collective bargaining agreements. We believe that our relationships with our employees and the union representing our unionized employees are good.

Item 2. Properties

All of our leased studio, office and tower facilities are leased pursuant to long-term leases. We believe that all facilities and equipment are adequate, with minor changes and additions, for conducting operations as presently contemplated. Set forth below is information with respect to our studios and other facilities for our

Table of Contents

current stations. Information as to tower size reflects the height above average terrain of the antenna radiation center.

Market	Approximate Size	Ownership
St. Louis, Missouri		
Studio and office facilities	36,000 sq. ft.	Leased
Tower (analog)	1,011 ft.	Leased
Tower (digital)(3)	945 ft.	Leased
Portland, Oregon		
Studio and office facilities	15,255 sq. ft.	Owned
Tower (analog)	1,785 ft.	Leased
Tower (digital)(2)	1,716 ft.	Owned
Salt Lake City, Utah		
Studio and office facilities	9,500 sq. ft.	Leased
Tower (analog & digital)(2)	4,125 ft.	Owned
Albuquerque Santa Fe, New Mexico		
Studio and office facilities	9,000 sq. ft.	Leased
Tower (analog & digital)	4,183 ft.	Leased
Tower (analog & digital back-up)	4,222 ft.	Leased
Dayton, Ohio		
Studio and office facilities	10,000 sq. ft.	Leased
Tower (analog & digital)	954 ft.	Leased
Knoxville, Tennessee		
Studio and office facilities	8,000 sq. ft.	Leased
Tower (analog & digital)(1)	2,399 ft.	Owned
Green Bay Appleton, Wisconsin		
Studio and office facilities	2,640 sq. ft.	Leased
Tower (analog)(1)	660 ft.	Owned
Tower (digital)(3)	1,089 ft.	Leased
Ft. Meyers Naples, Florida		
Studio and office facilities	5,000 sq. ft.	Leased
Tower (analog & digital)(3)	1496 ft.	Leased
Champaign Springfield Decatur, Illinois		
Studio and office facilities	9,600 sq. ft.	Owned
Tower (analog & digital)(1)	2,001 ft.	Owned

- (1) Tower owned on leased property.
- (2) Represents partnership interests in digital television towers in the Salt Lake and Portland markets.
- (3) Lease commences in 2002.

Item 3. Legal Proceedings

We are, from time to time, are involved in litigation incidental to the conduct of our business. We maintain comprehensive general liability and other insurance that we believe to be adequate for the purpose. We are not currently a party to any lawsuit or proceeding that we believe could have a material adverse effect on our financial condition or results of operations.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders**

No matter was submitted to a vote of the security holders during the fourth quarter of 2001.

Executive Officers of the Registrant

The following table sets forth information about our executive officers at December 31, 2001.

Name	Age	Position
Jamie Kellner	54	Chairman of the Board and Chief Executive Officer
Douglas Gealy	41	President, Chief Operating Officer and Director
Thomas Allen	49	Executive Vice President, Chief Financial Officer and Director
Edward Danduran	49	Vice President, Controller

Jamie Kellner is a founder of ACME and has served as our Chief Executive Officer and Chairman of the Board since 1997. Mr. Kellner is also a founder and Chief Executive Officer of The WB Network since 1993. Previously, Mr. Kellner was President of Fox Broadcasting Company since its inception in 1986 to 1993. In March 2001, Mr. Kellner also became Chairman and Chief Executive Officer of AOL Time Warner's Television Networks division.

Douglas Gealy is a founder of ACME and has served as our President and Chief Operating Officer and as a member of our Board since 1997. Since December of 1996, Mr. Gealy has been involved in development activities for ACME. Before founding ACME, Mr. Gealy served for one year as Executive Vice President of Benedek Broadcasting Corporation. From 1991 to 1996, Mr. Gealy was a Vice President and General Manager of WCMH and its local marketing agreement, WWHO, both in Columbus, Ohio, and following the acquisition of these stations by NBC, served as President and General Manager of these stations.

Thomas Allen is a founder of ACME and has served as our Executive Vice President and Chief Financial Officer and as a member of our Board since 1997. Since June 1996, Mr. Allen has been involved in development activities for ACME. From August 1993 to May 1996, Mr. Allen was the Chief Operating Officer and Chief Financial Officer for Virgin Interactive Entertainment. Before that Mr. Allen served as Senior Vice President and Chief Financial Officer of the Fox Broadcasting Company from 1986 to 1993.

Edward Danduran has been our Vice President and Controller since July 1997. From November 1995 until April 1997, Mr. Danduran was a Financial Consultant for Virgin Interactive Entertainment, Inc. From 1989 to 1995, Mr. Danduran was the Chief Financial Officer of Phoneby, a business communications company.

PART II**Item 5. Market for Registrant's Common Equity and Related Stockholder Matters**

The Company's common stock is traded on the NASDAQ National Market under the symbol ACME. The high sale price of the common stock during 2001 was \$12.75 and the low sale price during the same period was \$4.00. As of March 28, 2002, there were 38 stockholders of record.

We have not declared or paid any cash dividends or distributions on our common stock since our inception. We anticipate that, for the foreseeable future, all earnings will be retained for use in our business and no cash dividends will be paid on our common stock. Any payment of future cash dividends on our common stock will be dependent upon the ability of our subsidiaries to pay dividends or make cash payments or advances to us. Our credit agreement and our subsidiaries' indentures impose restrictions on our subsidiaries' ability to make these payments. Our ability to pay future dividends will also be subject to restrictions under any future debt obligations and other factors that our board of directors deems relevant.

Table of Contents

Below are the Nasdaq high, low and closing prices of ACME Communications, Inc. for each quarter of 2001 and 2000 and the fourth quarter of 1999.

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
2001				
High	\$ 12.75	\$ 11.13	\$ 9.40	\$ 7.35

(1) Equity-based compensation for 1999 is comprised of approximately \$132,000 relating to station operating expenses and \$39.6 million relating to corporate expenses. For 2000 and 2001, approximately \$313,000 relates to station operating expenses and \$216,000 relates to corporate expenses.

(2) Includes the Company's 12% senior secured discount notes, the 10 7/8% senior discount notes, convertible debt, revolving credit facility and capital lease obligations.

(3) We define:

broadcast cash flow as operating income, plus equity-based compensation, depreciation and amortization, LMA fees, amortization of program rights, and corporate expenses, less program payments—the latter as adjusted to reflect reductions for liabilities relating to expired rights or rights which have been written-off in connection with acquisitions;

adjusted EBITDA as broadcast cash flow less corporate expenses;

broadcast cash flow margin is broadcast cash flow as a percentage of net revenues; and

adjusted EBITDA margin is adjusted EBITDA as a percentage of net revenues.

Edgar Filing: ACME COMMUNICATIONS INC - Form 10-K

We have included broadcast cash flow, broadcast cash flow margin, adjusted EBITDA and adjusted EBITDA margin data because management believes that these measures are useful to an investor to evaluate our ability to service debt and to assess the earning ability of our stations' operations. However, you should not consider these items in isolation or as substitutes for net income, cash flows from operating activities or other statement of operations or cash flows data prepared in accordance with generally accepted accounting principles. These measures are not necessarily comparable to similarly titled measures employed by other companies.

- (4) Pro forma net loss is calculated as actual net loss adjusted to reflect (i) a provision for income taxes on earnings before taxes, which gives effect to the Company being C corporation for all periods and (ii) the

20

Table of Contents

impact on the net loss allocated to the minority interest. Actual net loss and pro forma net loss are the same for 1997, 2000 and 2001.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Our ten television stations are regionally diverse and range in market size (based on television households) from 22 through 82 in the nation. All but one of our stations are affiliates of The WB Television Network. Our second station in the Albuquerque Santa Fe marketplace is a UPN affiliate. KPLR St. Louis, our only VHF station, has been broadcasting in that market for over 40 years and is considered a mature television station. Our other nine stations (our Developing Stations) have only been on the air, or achieving measurable ratings, for 2-5 years.

We derive revenues primarily from the sale of advertising time to local, regional and national advertisers. Our revenues depend on popular programming that attracts audiences in the demographic groups targeted by advertisers, allowing us to sell advertising time at satisfactory rates. Our revenues also depend significantly on factors such as the national and local economy and the level of local competition.

Our revenues are generally highest during the fourth quarter of each year, primarily due to increased expenditures by advertisers in anticipation of holiday season consumer spending and an increase in viewership during this period. We generally pay commissions to advertising agencies on local, regional and national advertising and to national sales representatives on national advertising. Our revenues reflect deductions from gross revenues for commissions payable to advertising agencies and national sales representatives.

Our primary ongoing operating expenses are programming costs, employee compensation, advertising and promotion expenditures and depreciation and amortization. Programming expense consists primarily of amortization of broadcast rights relating to syndicated programs as well as news production and sports rights fees. Changes in employee compensation expense result primarily from increases in total staffing levels, from adjustments to fixed salaries based on individual performance and inflation and from changes in sales commissions paid to our sales staff based on levels of advertising revenues. Advertising and promotion expenses consist primarily of media and related production costs resulting from the promotion of our stations and programs. This amount is net of any reimbursement received or due to us for such advertisement and promotion from The WB Network, UPN or from other program suppliers.

In the fall of 2000, we began to experience a noticeable slowdown in non-political advertiser demand. By December 2000, it was clear that there was a dramatic weakness in demand affecting all media related companies and there were broader indications that the U.S. economy was in a slowdown. This slack demand continued through all of 2001, and the resultant effect of the events of September 11, 2001 only made a tough year worse. By industry account, 2001 television revenues declined approximately 15% over 2000, the steepest decline in the last 50 years. Nearly every publicly traded television broadcaster, including the Company, posted year-over-year declines in advertising revenues.

Although television advertising revenues have not declined for two consecutive years since the depression of the 1930 s, some industry analysts have forecast that advertising revenue will again decline in 2002. We remain cautiously optimistic that advertising demand, along with the overall health of the U.S. economy, will rebound in 2002.

Results of Operations

Years Ended December 31, 2001 compared to Year Ended December 31, 2000

Net revenues for the year ended December 31, 2001 decreased \$3.3 million (5%) to \$70.1 million as compared to \$73.4 million for the year ended December 31, 2000. While our revenue grew 8% at our Developing Stations reflecting gains in market shares that outstripped market revenue declines these increases were more than offset by a 17% decline in revenue at KPLR, our station serving the St. Louis marketplace, where market revenue declines were compounded by a slight loss in KPLR s market share. These market share gains and losses track generally with gains and losses in audience shares, while the

Table of Contents

decreases in market revenues reflect weak demand for advertising experienced throughout the media industry in 2001.

Station operating expenses increased to \$56.5 million compared to the prior year's operating expenses of \$54.1 million. This increase of 4% was attributable primarily to our continued investment in programming and sales staffing and related costs at our Developing Stations.

Depreciation and amortization expense for the year was \$21.3 million compared to \$20.9 million for 2000. This \$.4 million increase primarily reflects the higher depreciation expense related to our ongoing transmission upgrades (relating to both our analog and digital facilities) that were placed in service during 2001.

Corporate expenses for 2001 increased to \$3.8 million from \$3.5 million in 2000. Corporate expenses increased 7% in 2001 over 2000 levels due primarily to increased professional fees incurred in connection with potential strategic transactions and increased insurance costs.

Equity-based compensation of \$529,000 in 2001 and 2000 relates to options granted below market value in 1999 to senior management in exchange for their participation in the Company's previously established long-term incentive plan.

Interest expense for the current year was \$29.3 million compared to \$27.3 million for 2000. This \$2.0 million increase in interest expense is the result of increasing principal balances arising from continued amortization of original issuance discounts on our ACME Television subsidiary's 10 7/8% Senior Discount Notes due 2004 (the Television Notes) and our ACME Intermediate subsidiary's 12% Senior Secured Discount Notes due 2005 (the Intermediate Notes).

The tax benefit for 2001 was \$12.6 million, representing an effective tax rate of 31%. The difference in the statutory federal rate of 34% and the Company's effective tax benefit of 31% relates to the impact of non-deductible expenses, principally the amortization of goodwill at KPLR.

Our broadcast cash flow for 2001 was \$13.7 million, compared to a \$20.1 million broadcast cash flow in 2000. This 32% decrease reflects the adverse impact of lower revenue against higher operating expenses compared to 2000.

Our net loss for the current year was \$27.8 million as compared with the \$22.0 million loss incurred in 2000, an increase of \$5.8 million. This increase in our net loss is primarily the result of our increased operating loss and increased interest expense.

Years Ended December 31, 2000 compared to Year Ended December 31, 1999

Net revenues for the year ended December 31, 2000 increased 22% to \$73.4 million as compared to \$60.0 million for the year ended December 31, 1999. This increase reflects revenue gains at each station, and to a lesser extent, to the full-year impact in 2000 of stations acquired or launched during 1999 which were on the air for the full year 2000. Increases in revenue were driven primarily by increased ratings, improved distribution and higher unit prices.

Station operating expenses increased to \$54.1 million compared to the prior year's operating expenses of \$45.7 million. This 18% increase was due primarily to increased programming expenses at many of our developing stations coupled with the full year impact in 2000 of stations acquired or launched during 1999.

Depreciation and amortization expense for the year was \$20.9 million compared to \$17.3 million for 1999. This \$3.6 million increase reflects the full year amortization of intangible assets and increased depreciation relating to the stations that were newly built or acquired in 1999 and ongoing upgrades of existing facilities, and the full year of amortization of the goodwill associated with our purchase of our subsidiary ACME Intermediate, LLC's minority interest upon our IPO in September 1999.

Corporate expenses for 2000 decreased to \$3.5 million from \$6.4 million in 1999. Our 1999 expense included a non-recurring \$3.0 million charge relating to IPO bonuses paid primarily to the Company's senior management founders. All other corporate expenses increased 3% in 2000 over 1999 levels due primarily to

Table of Contents

the increase in costs associated with being a publicly traded company which were offset by a decrease in incentive compensation.

Equity-based compensation of \$529,000 in 2000 relates to options granted below market value in 1999 to senior management in exchange for their participation in the Company's previously established long-term incentive plan. The \$39.7 million in 1999 relates primarily to a charge reflecting the fully vested common stock issued in connection with the Company's initial public offering in September 1999 in exchange for the management carry units that were issued in June 1997 to our senior founding management members.

Interest expense for the current year was \$27.3 million compared to \$28.7 million for 1999. This \$1.4 million decrease in interest expense is the result of the elimination in 2000 of interest charges related to borrowings on the revolving credit facility and the Bridge Loan, both of which were repaid with proceeds from the IPO in October 1999, offset by increasing balances under the company's Senior Notes.

In 2000, the Company sold its studio facility in St. Louis which resulted in a gain of \$1.572 million. We have leased these premises back under a short-term lease and expect to move to new facilities by the spring of 2002. We also sold our studio building in Albuquerque pursuant to a purchase option previously granted and leased those premises back under a long-term lease. The sale of the building in Albuquerque resulted in a loss of approximately \$67,000.

The tax benefit for 2000 was \$8.1 million, representing an effective tax benefit of 27%. The difference in the statutory federal rate of 34% and the Company's effective tax benefit of 27% relates to the impact of non-deductible expenses. Our 1999 tax benefit was \$4.4 million, reflecting the tax benefit of our fourth quarter taxable losses incurred subsequent to the September 30, 1999 termination of our non-taxable status and also includes the one-time impact of that termination.

Prior to the Reorganization, ACME Television Holdings, LLC was a limited liability company, therefore, no income taxes have been provided for its operations other than at its subsidiary ACME Television of Missouri, Inc. which is a C corporation subject to federal and state taxation. Any liability or benefit from the Company's non-taxable entities' consolidated income or loss is the responsibility of, or benefit to, the individual members.

In conjunction with the Reorganization, the Company terminated its non-taxable status. In conjunction with this termination, the Company recorded deferred tax assets and liabilities at the termination date for the difference between the financial statement carrying amount and tax bases of assets and liabilities.

Minority interest represents the allocation of the loss for the respective periods to the minority interest holders of our subsidiary ACME Intermediate Holdings, LLC. Effective with the Company's September 1999 reorganization, the minority interest holders exchanged their membership units of ACME Intermediate Holdings, LLC for stock in ACME Communications, Inc. Accordingly, there was no minority interest recorded for 2000 and the amount allocated to minority interests for 1999 reflects allocations through September 1999, excluding equity-based compensation charges, which were not allocated the minority interest.

Our broadcast cash flow for 2000 was \$20.1 million, compared to a \$14.4 million broadcast cash flow in 1999. This 40% increase is primarily attributable to the increased revenue and margins at most of our stations.

Our net loss for the current year was \$22.0 million as compared with the \$70.8 million loss incurred in 1999, a decrease of \$48.8 million. This decrease in our net loss is primarily the result of the significant reduction in our equity-based compensation expense, a reduction of \$1.4 million in interest expense and our increased revenues and operating margins, net of increased depreciation and amortization expenses.

Liquidity And Capital Resources

Net cash used in operating activities was \$2.7 million for the year ended December 31, 2001 compared to net cash provided by operating activities of \$13.3 million for 2000, an increased use of cash of \$16.0 million. The increased use was primarily due to the payment of cash interest on the Television Notes and increased payments for program rights.

Table of Contents

Net cash used in investing activities was \$12.5 million for the year ended December 31, 2001, compared to \$8.2 million for 2000. The majority of the activity in both years relates to the Company's ongoing capital expenditures for the upgrading of its stations, including the build-out of digital facilities. The 2000 expenditures are net of \$2.6 million in proceeds from the sale of the KPLR studio facility.

Net cash provided by financing activities for the year ended December 31, 2001 was \$1.5 million, which represents the net new borrowings in excess of restricted cash used as collateral and repayments under the Company's various capital lease facilities. In 2000, net cash provided by financing activities was \$2.1 million and represents the net new borrowings in excess of repayments under the Company's various capital lease facilities.

The Company has carried a high debt level since the issuance of its Television Notes and its Intermediate Notes in September 1997. These notes were issued at an original discount. The Television Notes began accruing cash interest on October 1, 2000 and the first semi-annual interest payment of \$9.5 million was on March 31, 2001. The Intermediate Notes will begin accruing cash interest on October 1, 2002 and will have their initial semi-annual interest payment of \$4.2 million on March 31, 2003. Although we have generated positive annual cash flow from our broadcast operations, before considering interest payments, since our inception in 1997, the weak advertising environment in 2001 resulted in our first-ever decline in such cash flow. Accordingly, while we had built cash balances through year-end 2000, these cash balances began to decline in 2001 under the pressure of cash interest expenses and continued capital equipment expenditures.

In late 2000, when we recognized that the slowdown in the demand for advertising was adversely affecting our operating results, we negotiated an amendment to our then current revolving credit facility. This amendment lowered financial covenants for the quarters ended December 31, 2000 through September 30, 2001 and also revised the amortization of our borrowing availability. As the advertising slump worsened in 2001, we further amended the financial covenants under the facility through the third quarter of 2001. Recognizing that we would not be in compliance with the unamended December 31, 2001 financial covenants, we initiated discussions with various asset-based lenders to replace our credit facility in late 2001. At December 31, 2001, there were no borrowings outstanding under the facility and, as expected, we were not in compliance with all of the facility's financial covenants. In February 2002, we completed the replacement of our revolving credit facility with Foothill Capital Corporation, as both agent and lender. The new revolving facility, which like its predecessor is secured by all of our television station assets, allows for borrowings up to \$30 million, contains less restrictive financial covenants and expires May 31, 2004. The agent is obligated to use its best efforts to increase the facility to \$40 million via the placement of additional syndication, but there is no assurance such a placement will be completed. Under this agreement, we have the option to borrow at an interest rate determined by either a base rate (Wells Fargo Bank's prime rate) plus 3 percentage points, or at the LIBOR rate plus 4.25 percentage points. The financial covenants, which are quarterly tests beginning March 31, 2002, included in the new facility are (a) minimum EBITDA, (b) maximum total leverage, (c) minimum cash interest coverage, (d) minimum net tangible worth and (e) maximum capital expenditures (annual basis only). In addition to the financial covenants, the facility contains negative covenants which, among other restrictions, require the lender's approval for certain station acquisitions and dispositions. We are in the process of securing and recording all necessary liens and security interests required by the lender before we can draw against the facility. We expect those requirements to be satisfied by the end of April 2002.

The Company also has \$3.3 million available under a capital lease facility as of December 31, 2001, contingent on our posting additional collateral of \$1.2 million. Borrowings under the currently available capital lease facility will be repaid over four years. Borrowings under previous capital lease facilities are generally paid over five years. At December 31, 2001, amounts due under all capital lease facilities was \$12.7 million bearing an implicit average interest rate of 8.6% per annum. We expect to incur approximately \$9 million in additional capital expenditures in 2002 as we conclude our transition to digital broadcasting, as required by the FCC. After this transition is completed, we expect that our capital expenditures, apart from those related to any pending and future acquisitions, will be average approximately \$250,000 per station per year.

Table of Contents

At December 31, 2001, the Company had \$19.0 million of cash, \$1.7 million of which is restricted to collateralize capital lease obligations, and working capital of \$10.1 million.

The Company believes that existing unrestricted cash balances, funds generated from operations and borrowings under its credit facility and capital lease facility, if necessary, will be sufficient to satisfy the Company's cash requirements for its existing operations for at least the next twelve months. The Company expects that any future acquisitions and (related capital expenditures) of television stations, including the Madison, Wisconsin acquisition and any of the four construction permits, would be financed through these same sources and, if necessary, through additional debt and equity financings. There is no guarantee that such other means of raising capital will be at terms acceptable to the Company, and accordingly current stockholders could be adversely affected by such financings.

Certain Factors That May Effect Future Results and Financial Condition

The following factors could have a material and adverse impact on the Company's business:

Our highly leveraged financial position poses the following risks to stockholders:

cash flow from operations, before interest payments, will not be sufficient to service our indebtedness in the foreseeable future;

our ability to obtain financing in the future for working capital, capital expenditures and general corporate purposes, including acquisitions might be impeded; and

we are more vulnerable to economic downturns and our ability to withstand competitive pressures is limited.

We derive substantially all of our revenues from advertisers in diverse industries. If a number of our advertisers continue to reduce their expenditures because of the current or a future general economic downturn, or an economic downturn in one or more industries or regions, or for any other reason, our results of operations would be materially and adversely affected.

If we do not meet our interest obligations under our indentures or if we otherwise default under these instruments, our debt may be accelerated under these instruments as well as other debt instruments we have. In addition, because we are highly leveraged, it could limit our ability to respond to market conditions or meet extraordinary capital needs. If we are unable to generate sufficient cash flow from operations or borrow under our revolving credit facility to meet our obligations and commitments, we will be required to refinance or restructure our indebtedness or raise additional debt or equity capital. Additionally, we may be required to sell material assets or operations or delay or forego acquisitions. These alternative strategies would likely not be effected on satisfactory terms, if at all.

Our credit agreement and our subsidiaries' indentures contain restrictive covenants that limit our ability to:

incur additional debt;

pay dividends;

merge, consolidate or sell assets;

make acquisitions or investments; or

change the nature of our business.

Our credit agreement also requires us to maintain certain financial covenants. At December 31, 2001 we failed to meet certain of our prior credit agreement financial covenants. Although we did not have any borrowings outstanding under the facility, without waivers or amendments to the agreement, we would not have been able to borrow under the agreement. On February 12, 2002 we entered into a replacement facility with Foothill

Table of Contents

Capital Corporation. Our revolving credit agreement with Foothill Capital Corporation requires us to obtain certain landlord waivers and consents prior to borrowing under the facility. We expect to provide them by the end of April 2002. The agreement also requires us to maintain certain financial covenants, which we expect to be able to meet in the future. However, if we fail to secure the required waivers and consents, or fail to meet some or all of the covenants, we may not be able to borrow under the facility which might adversely affect our ability to make acquisitions as planned or meet general or extraordinary capital needs.

If we experience a change of control, either as defined by our credit agreement or either indenture, we might not have sufficient funds to repay all amounts outstanding under our revolving credit facility and repurchase the notes, as may be required.

We have incurred net losses in each of our fiscal years since inception and expect to continue to experience net losses in the foreseeable future. These net losses are principally a result of interest expense on our outstanding debt and non-cash charges for depreciation expense related to fixed assets.

Our plans to acquire additional television stations during the past two years have been adversely affected by our increased leverage resulting from a decline in our broadcast cash flow and the related constraints in borrowing under our previous revolving credit facility. Our future growth could be limited if we are unable to successfully execute and implement additional station acquisitions. Furthermore, our ability to acquire additional television stations is affected by the following:

many competing acquirors have greater resources available to make such acquisitions than we have;

desired stations might not be available for purchase;

any inability to obtain The WB Network affiliation for all of the stations we acquire;

our lack of the financial resources necessary to acquire additional stations;

failure to obtain FCC approval of the assignments or transfers of control of FCC licenses; and

current FCC rules limit the number of television broadcasting properties that any one person or entity, including its affiliates, may own in any given market which could limit our ability to pursue desired stations.

Generally when we sign acquisition agreements, we enter into interim local marketing agreements with the seller under which we receive some or all of station revenues and pay proportionate station expenses. Because the seller retains ultimate programming control, we bear the economic risks of paying station expenses until closing the acquisition.

Mr. Kellner's consulting agreement provides that he may perform services for other businesses unaffiliated with ours that, in certain limited circumstances, may be competitive. Because of Mr. Kellner's experience in the television broadcast industry, if Mr. Kellner provides services to a competing business, it could materially affect our operations.

Mr. Kellner's position at The WB Network could create conflicts with his position with us if our interests differ from those of The WB Network. Because Mr. Kellner is both our Chief Executive Officer and The WB Network's Chief Executive Officer, The WB Network requires that he recuse himself from any material transaction between The WB Network and us. Additionally, due to his responsibilities with AOL Time Warner's television networks division and The WB Network, Mr. Kellner continues to have limited time available to devote to us.

If we experience a further significant decline in broadcast cash flow from KPLR, we will not have any positive cash flow and will not be able to fulfill our current and future obligations and commitments. Due to negative net cash flow at several of our start-up stations, broadcast cash flow from KPLR accounted for more than 100% of our total broadcast cash flow in 2001.

The required conversion of the broadcast industry to provide digitally transmitted television signals is requiring us to make significant capital expenditures that may not be balanced by consumer demand for digital

Table of Contents

television. The FCC requires all broadcasters to provide a digitally transmitted signal by May 2002 and, generally, to stop using analog signals on the stations by 2006. We have filed requests with the FCC for six-month extensions for implementing our digital transmissions at all of our stations and such requests have been granted, thereby delaying our implementation date to no later than November 2002. As of year-end 2001, digital television sets are present in less than 2% of U.S. television households, and accordingly, we are unable to predict the extent of consumer demand for digital television will be or when that demand will arise.

Contractual Cash Obligations

Our contractual cash obligations, by year of payment, are as follows:

	Long Term Debt	Interest on Long Term Debt	Programming Rights Obligations	Capital Lease Obligations	Operating Lease Obligations	Total Contractual Cash Obligations
2002	\$	\$ 19,031,000	\$ 16,232,000	\$ 4,164,000	\$ 1,941,000	41,368,000
2003		27,627,000	19,128,000	3,603,000	1,864,000	52,222,000
2004	175,000,000	27,627,000	15,936,000	2,878,000	1,770,000	223,211,000
2005	71,634,000	8,596,000	12,487,000	2,601,000	1,365,000	96,683,000
2006			7,209,000	830,000	1,286,000	9,325,000
Thereafter			13,828,000	1,199,000	10,266,000	25,293,000
Total	\$ 246,634,000	\$ 82,881,000	\$ 84,820,000	\$ 15,275,000	\$ 18,492,000	\$ 448,102,000

In addition to the above contractual obligations, the Company expects that its capital expenditures for 2002 will be approximately \$9 million for our existing stations, which are primarily related to our conversion to digital broadcasting as required by the FCC.

Critical Accounting Policies and Estimates

The Company's discussion and analysis of its financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to broadcast rights, bad debts, intangible assets, income taxes, and contingencies and litigation. The Company bases its estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The Company believes the following critical accounting policies affect its more significant judgements and estimates used in the preparation of its consolidated financial statements.

Programming Rights

The Company's programming rights are stated, on a gross basis, at the lower of amortized cost or estimated realizable value. The Company evaluates estimated realizable value of programming rights based on current usage and revenue performance and projected future revenue and usage of such programs. Changes in the Company's programming schedule could impact the estimated realizable value of programming. In addition, estimates of future revenue performance relate to the number of advertising spots which will be sold by the Company and the amount generated from such sales. A decrease in the number of spots sold or the amount for such sales could also impact the Company's estimated realizable value. During 1999, 2000 and 2001, the Company recorded write downs of program rights due to impairments of \$377,000, \$118,000 and \$216,000, respectively.

Table of Contents

Impairment of Asset Values/ Accounting for Intangibles

The carrying values of our long-lived assets (tangible, identifiable intangible and goodwill) are reviewed for impairment based upon estimated future cash flows of the stations. As of December 31, 2001, the Company has not recorded any impairment related to long-lived assets. Future adverse changes in market conditions, changes in technology and other factors could reduce the expected future cash flows and result in an impairment charge.

Revenue Recognition

The Company records revenue from the sale of airtime related to advertising and contracted time at the time of broadcast. The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. The Company utilizes information available to the Company, including the timing of payments and the financial condition of our customers, to estimate the allowance for doubtful accounts. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. It should be noted that the Company does not have a significant concentration of accounts receivable from any single customer or industry segment.

Accounting for Income Taxes

The Company has recorded a tax benefit for losses primarily based on deferred tax liabilities which will generate future taxable income. During 2002, the Company anticipates that tax benefits recognized by the Company will equal deferred tax liabilities. Accordingly, it is likely that the Company will record a valuation allowance for deferred tax assets in excess of deferred tax liabilities as the Company believes that it is not more likely than not that such tax benefit will be realized. This will reduce the tax benefit recorded by the Company in calendar 2002 and thereafter. In the event we were to determine that we would be able to realize a deferred tax asset in the future that is in excess of the net recorded amount, an adjustment to the valuation allowance and a tax benefit would be recorded.

Impact of Recently Issued Accounting Standards

Statements of Financial Accounting Standards Numbers 141 and 142

In June 2001, the Financial Accounting Standards Board (the FASB) issued Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations, and SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 141 requires that the purchase method of accounting be used for all business combinations completed or initiated after June 30, 2001. SFAS No. 141 also specifies criteria that must be met before intangible assets acquired in a purchase method business combination can be recognized and reported apart from goodwill, noting that any purchase price allocable to an assembled workforce may not be accounted for separately. SFAS No. 142 will require that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead, tested for impairment (at least annually) in accordance with the provisions of SFAS No. 142. SFAS No. 142 will also require that intangible assets with definite useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with SFAS No. 121, Accounting for the Impairment of Long Lived Assets and for Long Lived Assets to Be Disposed Of.

The Company adopted the provisions of SFAS No. 141 in June 2001 and will adopt SFAS No. 142 effective January 1, 2002. In accordance with SFAS No. 142, Goodwill and other intangible assets acquired in business combinations that were completed before July 1, 2001 were amortized until the adoption of SFAS No. 142.

As the Company represents one reporting unit, as defined by SFAS No. 142, goodwill has been evaluated on a consolidated basis. The Company determined that the fair value of its goodwill exceeded the carrying value as of January 1, 2002 and, accordingly, there will be no impairment upon adoption of SFAS No. 142. In addition, as prescribed by SFAS No. 142, the Company will no longer amortize goodwill beginning January 1, 2002.

Table of Contents

In the connection with the adoption with Statement 142, the Company determined that its intangible assets have an indefinite life. Accordingly, the Company will be required to test these intangible assets in accordance with the provisions of Statement 142 and will no longer amortize these intangibles beginning January 1, 2002. The Company has also determined that the fair value of its intangible assets exceeded their carrying values as of January 1, 2002 and, accordingly, there is no impairment upon adoption of Statement 142.

As of the proposed date of adoption, January 1, 2002, the Company has unamortized goodwill in the amount of \$106.4 million and unamortized identifiable intangible assets in the amount of \$165.0 million, all of which will be subject to the transition provisions of Statements 141 and 142. Amortization expense related to goodwill and intangible assets was \$16.4 million for the year ended December 31, 2001.

Statement of Financial Accounting Standards Number 143

Also in June 2001, the FASB issued SFAS No. 143, *Accounting for Asset Retirement Obligations*. SFAS No. 143 requires the Company to record the fair value of an asset retirement obligation, as a liability, in the period in which it incurs a legal obligation associated with the retirement of a tangible long-lived asset. The Company is also required to record a corresponding asset that is depreciated over the useful life of the asset. Under SFAS No. 143, the asset retirement liability is to be adjusted each accounting period to reflect the passage of time and any changes in the estimated future cash flows underlying the obligation. The Company is required to adopt SFAS No. 143 on January 1, 2003. The Company does not currently have a significant amount of asset retirement obligation and therefore believes the adoption of SFAS No. 143 will not have a material impact on the Company's financial statements.

Statements of Financial Accounting Standards Number 144

In August 2001, the FASB issued SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which supersedes both SFAS No. 121, and the accounting and reporting provisions of Accounting Principles Board Opinion No. 30 (Opinion 30), *Reporting the Results of Operations - Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, for the disposal of a segment of a business (as previously defined in Opinion 30). SFAS No. 144 retains the fundamental provisions in SFAS No. 121 for recognizing and measuring impairment losses on long-lived assets held for use and long-lived assets to be disposed of by sale. The Company is required to adopt SFAS No. 144 no later than the year beginning after December 15, 2001, and plans to adopt its provisions for the quarter ending March 31, 2002. The adoption of SFAS No. 144 for long-lived assets held for use will not have an impact on the Company's financial statements. The provisions of SFAS No. 144 for assets held for sale or other disposal generally are required to be applied prospectively after the adoption date to newly initiated disposal activities.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

The Company's revolving credit facility has a variable interest rate. Accordingly, the Company's interest expense could be materially affected by future fluctuations in the applicable interest rate. At December 31, 2001, the Company had no borrowings under the revolving credit facility.

We are also exposed to risk from a change in interest rates to the extent we are required to refinance existing fixed rate indebtedness at rates higher than those prevailing at the time the existing indebtedness was incurred. As of December 31, 2001, we had Television Notes totaling \$175.0 million and Intermediate Notes totaling \$71.6 million due in the years 2004 and 2005, respectively. Effective October 1, 2000, the Television Notes began accruing cash interest. The interest payment on these notes amounts to approximately \$9.5 million every six months. Cash interest on the Intermediate Notes is payable semi-annually, in arrears, commencing on March 31, 2003. Based upon the quoted market price, the fair values of the senior discount notes and senior secured discount notes were \$168.0 and \$52.0 million, respectively, as of December 31, 2001.

Item 8. *Financial Statements and Supplemental Data*

INDEPENDENT AUDITORS REPORT

The Board of Directors
ACME Communications, Inc.:

We have audited the accompanying consolidated balance sheets of ACME Communications, Inc. and subsidiaries as of December 31, 2001 and December 31, 2000, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2001. In connection with our audit of the consolidated financial statements, we have also audited the financial statement schedules listed in the index of Item 14. These consolidated financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedules based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ACME Communications, Inc. and subsidiaries as of December 31, 2001 and 2000 and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2001, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedules, when considered in relation to the consolidated financial statements taken as a whole, present fairly in all material respects the information set forth therein.

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(1) Description of the Business and Formation***Formation and Presentation*

ACME Communications, Inc. was formed on July 23, 1999, in preparation for and in conjunction with an initial public offering of its stock.

On September 27, 1999, the Board of Advisors of ACME Television Holdings, LLC and its members approved a merger and reorganization (the Reorganization), whereby ACME Communications became the direct parent of ACME Television Holdings. As a result of the Reorganization, ACME Communications is the ultimate parent of ACME Intermediate Holdings, LLC (ACME Intermediate), and its wholly-owned subsidiary ACME Television, LLC (ACME Television). All transactions contemplated as part of the Reorganization closed on October 5, 1999.

Among the significant transactions of the Reorganization were the exchange of shares of the Company's common stock for members' units, management carry units and convertible debt of ACME Television Holdings. The common stock exchanged for members' units in ACME Television Holdings was recorded at historical cost. The management carry units were treated as a variable compensation plan. As the number of shares of common stock issued to the holders of the management carry units were fixed and fully vested, compensation expense was recorded for the difference between the fair value of the shares issued and the expense previously recorded for the management carry units. The convertible debt was converted pursuant to its original conversion terms, and accordingly, no gain or loss was recognized. Also, the Company acquired the minority interest in ACME Intermediate Holdings for 923,938 shares of the Company's common stock. The acquisition of the minority interest was accounted for at fair market value.

The financial statements for the year ended December 31, 1999 give effect to the exchange of common stock for members' units.

On October 5, 1999, the Company completed its initial public offering of 5,000,000 shares of common stock at \$23 per share, before underwriters' discounts and other issuance costs. The Company received net proceeds of approximately \$105 million.

The accompanying consolidated financial statements are presented for ACME Communications, Inc. (ACME or the Company) and its wholly-owned subsidiaries. Segment information is not presented since all of the Company's revenues are attributed to a single reportable segment.

Nature of Business

ACME Communications is a holding company with no independent operations other than its indirect wholly-owned subsidiary, ACME Television. ACME Television, through its wholly-owned subsidiaries, owns and operates the following ten commercially licensed broadcast television stations located throughout the United States:

Station	Channel	Market	Network Affiliation
KPLR	11	St. Louis	WB
KWBP	32	Portland, OR	WB
KUWB	30	Salt Lake City	WB
KWBQ	19	Albuquerque Santa Fe	WB

WIWB	14	Green Bay Appleton	WB
WTVK	46	Ft. Myers Naples	WB
WBUI	23	Champaign Springfield Decatur	WB

Table of Contents

ACME COMMUNICATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) Summary of Significant Accounting Policies

Basis of Consolidation

The Consolidated Financial Statements include the accounts of the Company and its subsidiaries. All significant inter-company transactions have been eliminated.

Revenue Recognition

Revenue from the sale of airtime related to advertising and contracted time is recognized at the time of broadcast. The Company records such revenues net of commissions of advertising agencies and national sales representatives.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents. Cash and claims to cash that are restricted as to their withdrawal and/or use are considered restricted cash.

Accounts Receivable

Accounts receivable are presented net of the related allowance for doubtful accounts which totaled \$1,009,000 and \$1,193,000 at December 31, 2000 and 2001, respectively.

Concentration of Credit Risk and Fair Value of Financial Statements

Financial instruments that potentially subject the Company to concentration of credit risk consist primarily of accounts receivable and cash. Due to the short-term nature of these instruments, the carrying value approximates the fair market value. The Company believes that concentrations of credit risk with respect to accounts receivable, which are unsecured, are limited due to the Company's ongoing relationship with its clients. The Company provides its estimate of uncollectible accounts. The Company has not experienced significant losses relating to accounts receivable. The estimated fair market value of ACME Intermediate's 12% senior discount notes and ACME Television's 10 7/8% senior secured notes was approximately \$52 million and \$168 million, respectively, at December 31, 2001.

Program Rights

Program rights represent costs incurred for the right to broadcast certain features and syndicated television programs. Program rights are stated, on a gross basis, at the lower of amortized cost or estimated realizable value. The cost of such program rights and the corresponding liability are recorded when the initial program becomes available for broadcast under the contract. Generally, program rights are amortized over the life of the contract on a straight-line basis related to the usage of the program. The portion of the cost estimated to be amortized within one year and after one year are reflected in the balance sheets as current and non-current assets, respectively. The gross payments under these contracts that are due within one year and after one year are similarly classified as current and non-current liabilities.

Property and Equipment

Property and equipment are stated at cost. The cost of maintenance is expensed when incurred. Depreciation and amortization are computed using the straight-line method over the estimated useful lives of the respective assets. When property is retired or otherwise disposed of, the cost and accumulated depreciation

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

are removed from the appropriate accounts and any gain or loss is included in the results of current operations. The principal lives used in determining depreciation rates of various assets are as follows:

Buildings and Improvements	20	30 years
Broadcast and other equipment	3	20 years
Furniture and fixtures	5	7 years
Vehicles	5	years

In June 2001, the Financial Accounting Standards Board (the FASB) issued Statement of Financial Accounting Standards (SFAS) No. 143, Accounting for Asset Retirement Obligations. SFAS No. 143 requires the Company to record the fair value of an asset retirement obligation, as a liability, in the period in which it incurs a legal obligation associated with the retirement of a tangible long-lived asset. The Company is also required to record a corresponding asset that is depreciated over the useful life of the asset. Under SFAS No. 143, the asset retirement liability is to be adjusted each accounting period to reflect the passage of time and any changes in the estimated future cash flows underlying the obligation. The Company is required to adopt SFAS No. 143 on January 1, 2003.

Intangible Assets

Intangible assets consist of broadcast licenses and goodwill, both of which are amortized on a straight-line basis over a 20-year life.

	December 31,	
	2000	2001
	(In thousands)	
Broadcast licenses	\$200,188	\$200,213
Goodwill	127,810	127,810
	<u>327,998</u>	<u>328,023</u>
Less: accumulated amortization	(40,250)	(56,666)
	<u>\$287,748</u>	<u>\$271,357</u>

In June 2001, the FASB issued SFAS No. 141, Business Combinations, and SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 141 requires that the purchase method of accounting be used for all business combinations initiated after June 30, 2001 as well as all purchase method business combinations completed after June 30, 2001. SFAS No. 141 also specifies criteria that must be met before intangible assets acquired in a purchase method business combination can be recognized and reported apart from goodwill, noting that any purchase price allocable to an assembled workforce may not be accounted for separately. SFAS No. 142 will require that goodwill and intangible assets with indefinite useful lives no longer be amortized, but instead, tested for impairment (at least annually) in accordance with the provisions of SFAS No. 142. SFAS No. 142 will also require that intangible assets with definite useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with SFAS No. 121, Accounting for the Impairment of Long Lived Assets and for Long Lived Assets to Be Disposed Of.

The Company adopted the provisions of SFAS No. 141 in June 2001 and will adopt SFAS No. 142 effective January 1, 2002. In accordance with SFAS No. 142, Goodwill and other intangible assets acquired in business combinations that were completed before July 1, 2001 were amortized until the adoption of SFAS No. 142.

As the Company represents one reporting unit, as defined by SFAS No. 142, goodwill has been evaluated on a consolidated basis. In addition, as prescribed by SFAS No. 142, the Company will no longer amortize goodwill beginning January 1, 2002.

Table of Contents

ACME COMMUNICATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In the connection with the adoption with Statement 142, the Company determined that its intangible assets have an indefinite life. Accordingly, the Company will be required to test these intangible assets in accordance with the provisions of Statement 142 and will no longer amortize these intangibles beginning January 1, 2002.

As of the proposed date of adoption, January 1, 2002, the Company has unamortized goodwill in the amount of \$106.4 million and unamortized identifiable intangible assets in the amount of \$165.0 million, all of which will be subject to the transition provisions of Statements 141 and 142. Amortization expense related to goodwill and intangible assets was \$16.4 million for the year ended December 31, 2001.

Barter and Trade Transactions

Revenue and expenses associated with barter agreements in which broadcast time is exchanged for programming rights are recorded at the estimated average rate of the airtime exchanged. Trade transactions, which represent the exchange of advertising time for goods or services, are recorded at the estimated fair value of the products or services received. Barter and trade revenue is recognized when advertisements are broadcast. Merchandise or services received from airtime trade sales are charged to expense or capitalized and expensed when used.

Local Marketing Agreements

In connection with station acquisitions, and pending FCC approval of the transfer of license assets, the Company generally enters into local marketing agreements with the sellers. Under the terms of these agreements, the Company obtains the right to program and sell advertising time on 100% of the station's inventory of broadcast time, incur certain operating expenses and may make payments to the sellers. As the holder of the FCC license, the seller/ licensee retains ultimate control and responsibility for all programming broadcast on the station. The Company, in turn, records revenues from the sale of advertising time and operating expenses for costs incurred. Included in the accompanying consolidated statements of operations for the years ended December 31, 1999, 2000, and 2001 are net revenues of \$125,000, \$0 and \$0, respectively, that relate to local marketing agreements. Payments of fees to the sellers for the years ended December 31, 1999, 2000, and 2001 were \$27,500, \$0 and \$0 respectively. At December 31, 2001, the Company was not obligated for any future payments to sellers.

Carrying Value of Long-lived Assets

The Company follows Statement of Financial Accounting Standards No. 121 (Statement 121), Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of. The carrying value of long-lived assets (tangible, identifiable intangible, and goodwill) is reviewed if the facts and circumstances suggest that they may be impaired. For purposes of this review, assets are grouped at the station level, which is the lowest level for which there are identifiable cash flows. If this review indicates that an asset's carrying value will not be recoverable, as determined based on future expected, undiscounted cash flows, the carrying value is reduced to fair market value.

In August 2001, the FASB issued SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, which supersedes both SFAS No. 121, and the accounting and reporting provisions of Accounting Principles Board Opinion No. 30 (Opinion 30), Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions, for the disposal of a segment of a business (as previously defined in Opinion 30). SFAS No. 144 retains the fundamental provisions in SFAS No. 121 for recognizing and measuring impairment losses on long-lived assets held for use and long-lived assets to be disposed of by sale. The Company is required to adopt SFAS No. 144 no later than the year beginning after December 15, 2001, and plans to adopt its provisions for the quarter ending March 31, 2002. The adoption of SFAS No. 144 for long-

Table of Contents

ACME COMMUNICATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

lived assets held for use will not have an impact on the Company's financial statements. The provisions of SFAS No. 144 for assets held for sale or other disposal generally are required to be applied prospectively after the adoption date to newly initiated disposal activities.

Debt Discount

The Company issued its 12% Senior Secured Discount Notes and 10 7/8% Senior Discount Notes at a discount from the face value of the notes. The 10 7/8% Senior Discount Notes are fully accreted, the Company is accreting the discount on the 12% Senior Secured Discount Notes using the level yield method.

Income Taxes

The Company accounts for income taxes in accordance with Statement of Financial Accounting Standards (SFAS) No. 109, Accounting for Income Taxes. In accordance with SFAS No. 109, income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Prior to the Reorganization, ACME Television Holdings, LLC was a limited liability company, therefore, no income taxes have been provided for its operations other than at its subsidiary ACME Television of Missouri, Inc. which is a C corporation subject to federal and state taxation. Any liability or benefit from the Company's non-taxable entities' consolidated income or loss is the responsibility of, or benefit to, the individual members.

In conjunction with the Reorganization, the Company terminated its non-taxable status. In conjunction with this termination, the Company recorded deferred tax assets and liabilities at the termination date for the difference between the financial statement carrying amount and tax bases of assets and liabilities.

Loss per Share

The Company calculates loss per share in accordance with SFAS No. 128, Earnings Per Share. SFAS No. 128 requires a presentation of basic earnings per share (EPS) and diluted EPS. Basic EPS includes no dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution from securities that could share in the earnings of the Company, similar to fully diluted EPS under Accounting Principles Board Opinion No. 15. In calculating diluted EPS, no potential shares of common stock are to be included in the computation when a loss from continuing operations available to common stockholders exists. The statement requires dual presentation of basic and diluted EPS by entities with complex capital structures.

The Company calculated pro forma net loss per share for 1999 based upon the historical results of operations adjusted to reflect (i) a provision for income taxes on historical earnings before income taxes, which gives effect to the change in the Company's income tax status to a C corporation and (ii) the impact on the net loss allocated to minority interests.

In addition, the Company has reflected the exchange of common stock for units for the year ended December 31, 1999.

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Stock options outstanding amounting to approximately 2.8 million, 3.3 million and 2.5 million shares at December 31, 1999, 2000, and 2001, respectively, were not included in the computation of diluted EPS because to do so would have been antidilutive.

Accounting for Stock Options

The Company has adopted Statement of Financial Accounting Standards No. 123 (SFAS No. 123), Accounting for Stock-Based Compensation, which establishes a fair value based method of accounting for stock-based compensation. SFAS No. 123 encourages but does not require entities to adopt its provisions in place of the provisions of Accounting Principles Board Opinion No. 25 (APB No. 25), Accounting for Stock Issued to Employees . SFAS No. 123 permits entities to recognize the expense of all stock-based awards over the vesting period of the awards. The expense is calculated based on the fair value at the date of grant. Alternatively, APB No. 25 requires that the expense of stock-based employee compensation be recognized based on the difference, if any, between the quoted market price of the stock and the amount the employee must pay to acquire the stock. APB No. 25 specifies various dates to be used to determine the quoted market price, depending on whether the terms of the stock-based compensation award are fixed or variable. Under SFAS No. 123 if an entity elects to follow APB No. 25 it must provide pro forma net income disclosure for employee stock option grants made, as if the fair-value-based method defined in SFAS No. 123 had been applied. The Company has elected to apply the provisions of APB No. 25 and provide the pro forma disclosure provisions of SFAS No. 123.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates include the allowance for doubtful accounts net of the realizable value of programming rights and the evaluation of the recoverability of intangible assets. Actual results could differ from those estimates.

Reclassifications

Certain amounts previously reported in 1999 and 2000 have been reclassified to conform to the 2001 financial statement presentation.

(3) Property and Equipment

Property and equipment consist of the following:

	December 31,	
	2000	2001
	(In thousands)	
Land	\$ 541	\$ 541
Buildings and improvements	5,459	6,100

Total property and equipment, at	39,444	51,132
Less: Accumulated depreciation	(9,973)	(14,639)
	<hr/>	<hr/>
Net property and equipment	\$29,471	\$ 36,493
	<hr/>	<hr/>

Table of Contents

ACME COMMUNICATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Included in property and equipment are assets subject to capital leases with a total cost of \$12,844,000 and \$18,551,000 and the associated accumulated depreciation of \$3,648,000 and \$5,009,000 at December 31, 2000 and 2001, respectively. The construction in process account includes transmitters and other equipment purchased mainly for our upgrade to digital broadcasting capabilities.

(4) Acquisitions

During 1997, the Company entered into an agreement that provided it with the right to: (i) acquire 49% of the licensee of KUPX (formerly KZAR) in exchange for membership units valued at \$6.0 million, and (ii) pay \$3.0 million for an option to acquire the remaining 51% interest in the licensee of KUPX for \$5.0 million, exercisable immediately after the station commences on-air operations. On December 15, 1997, the Company acquired the 49% interest in the licensee of KUPX, paid \$3.0 million to acquire the option and loaned the sellers \$4.0 million (to be applied to the subsequent majority interest purchase price). On January 22, 1998, the Company issued \$6.0 million of its member units to the sellers for the 49% interest in the license of KUPX in connection with the above transaction. The amount of the issuance was based upon a fixed dollar amount of consideration. The Company accounted for the 49% investment using the equity method of accounting. On February 16, 1999, the Company acquired the remaining 51% interest in KUPX. The \$4.0 million loan was applied against the remaining purchase price of \$5.0 million.

In May 1998 the Company and the majority owners of KUPX entered into an agreement with another broadcaster in Salt Lake City to (i) swap KUPX for KUWB, subject to FCC approval (ii) enable the Company to operate KUWB under a local marketing agreement and (iii) enable the owner of KUWB to operate KUPX under a local marketing agreement. Pursuant to the LMA's, the Company retains all operating revenues and expenses (excluding depreciation and amortization) of KUWB and the owner of KUWB retains all operating revenues and expenses (excluding depreciation and amortization) of KUPX. In March 1999, the FCC approved the swap of KUPX for KUWB and the transaction closed during the third quarter of 1999. The Company has accounted for the swap as a business combination and has recorded KUPX at its fair value. There was no significant difference between the fair value of KUPX and the historical cost of KUWB.

On August 22, 1997, the Company entered into an agreement with affiliates of the sellers of KZAR to acquire 100% of the interests in the construction permit for KAUC for a consideration of \$10,000. This agreement was consummated on January 22, 1998. Subsequently, the call letters of KAUC were changed to KWBC. Construction of KWBC was completed and the station commenced broadcasting in March 1999.

On April 23, 1999, the Company acquired the non-FCC license assets of three Paxson Communication Corporation stations serving the Dayton, OH, Green Bay Appleton, WI and Champaign Decatur Springfield, IL markets for \$32.0 million. On June 23, 1999, following FCC approval of the transfer of the FCC licenses to ACME, the Company acquired the licenses and completed the acquisition of the three stations by making a final payment to PCC of \$8.0 million. The Company entered into local marketing agreements with the seller wherein the Company, effective June 2, 1999, retained all revenues generated by the stations, bore all operating expenses of the stations (excluding amortization) and had the right to program the stations (subject to the seller's ultimate authority for programming) and the stations' existing programming commitments. The local marketing agreement terminated upon the consummation of the acquisition. Consequently, under the local marketing agreement the revenues and operating expenses (excluding amortization) of the station are included in the Company's results of operations from June 2, 1999 to June 23, 1999. The purchase of the FCC licenses was recorded on the consolidated balance sheet of the Company on June 23, 1999 and the Company's results of operations includes revenues and expenses (including amortization of intangible assets) beginning June 24, 1999. The Company financed this \$40.0 million transaction by a \$25.0 million borrowing under its revolving credit agreement and a \$15.0 million loan from certain of its members (the Bridge Loan). The acquisition was accounted for using the purchase method. The excess of the purchase price over the fair market value of the assets acquired of approximately \$35.6 million has been

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

recorded as intangible broadcast licenses and goodwill, all of which are being amortized over a period of 20 years.

On December 3, 1999, the Company acquired substantially all of the assets and assumed certain liabilities of station KASY TV-50, serving the Albuquerque Santa Fe, New Mexico market, from Ramar Communications (Ramar) for approximately \$27 million. The Company entered into an interim LMA arrangement with Ramar to begin operating the station effective November 1, 1999. The interim LMA terminated upon the completion of the acquisition. Under the local marketing agreement, all of the revenues and operating expenses (excluding depreciation and amortization) of the station are included in the Company's results of operations from November 1, 1999 to December 3, 1999. The purchase transaction was recorded on December 3, 1999 and the Company's results of operations (including depreciation and amortization) beginning December 3, 1999.

The unaudited pro forma financial information for the year ended December 31, 1999, set forth below reflects the net revenues and net loss assuming the KUWB, KWBQ, KASY, WBDT, WBUI and WIWB transactions had taken place at the beginning of each respective year. This unaudited pro forma financial information does not necessarily reflect the results of operations that would have occurred had the acquisitions occurred on January 1, 1999.

	Year ended December 31, 1999
Net revenues	\$ 63,109
Net loss	(74,576)
Net loss per share	\$ (9.37)

(5) Unit Offering and 12% Senior Secured Discount Notes

On September 30, 1997, ACME Intermediate issued 71,634 Units (the Unit Offering) consisting of 71,634 membership units (representing 8% of the ACME Intermediate's outstanding membership equity) and \$71,634,000 (par value at maturity) in 12% senior secured discount notes due 2005 (the Intermediate Notes). Cash interest on the Intermediate Notes is payable semi-annually in arrears, commencing with the six-month period ending March 31, 2003. The Intermediate Notes mature on September 30, 2005 and may not be prepaid without penalty prior to October 1, 2003. The net proceeds from the Unit Offering, after the deduction of underwriter fees and other related offering costs, were \$38.3 million and were received by the Company on September 30, 1997. The Company allocated approximately \$4.2 million of such net proceeds to minority interest, \$35.6 million to the Intermediate Notes and \$1.5 million to prepaid financing costs—the latter which is being amortized over the eight-year term of the Intermediate Notes. The Intermediate Notes contain certain covenants and restrictions including restrictions on future indebtedness and restricted payments, as defined, and limitations on liens, investments, transactions with affiliates and certain asset sales. The Company was in compliance with all such covenants and restrictions at December 31, 2001. In connection with the Reorganization the membership units issued in the Unit Offering (representing a minority interest) were acquired by the Company for shares of the Company's stock. The acquisition of minority interest was recorded based upon the fair market value of the stock issued.

The Intermediate Notes are secured by a first priority lien on the limited liability company interests in ACME Television and ACME Subsidiary Holdings II, LLC, both of which are direct wholly-owned subsidiaries of ACME Intermediate. ACME Subsidiary Holdings II, LLC was formed solely to own a 0.5% interest in ACME Television, has no other assets or operations and does not constitute a substantial portion of the collateral for the Intermediate Notes.

Table of Contents

ACME COMMUNICATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(6) 10 7/8% Senior Discount Notes

On September 30, 1997, ACME Television issued 10 7/8% senior discount notes due 2004 (the "Television Notes") with a face value of \$175,000,000 and received \$127,370,000 in gross proceeds from such issuance. The Television Notes provide for semi-annual cash interest payments starting on March 31, 2001. At December 31, 2000 and 2001 \$4,758,000 in accrued interest on the Television Notes was included in current accrued liabilities. The Television Notes are effectively subordinated to ACME Television's bank revolver and to ACME Television's capital equipment finance facilities. The Television Notes mature on September 30, 2004. The Television Notes may not be prepaid without penalty prior to October 1, 2003.

The Television Notes contain certain covenants and restrictions including restrictions on future indebtedness and limitations on investments, and transactions with affiliates. ACME Television was in compliance with all such covenants and restrictions at December 31, 2001.

Costs associated with the issuance of these notes, including the underwriters fees and related professional fees are included in long-term other assets and are being amortized over the seven year term of the Television Notes.

ACME Television's subsidiaries (hereinafter referred to in this section collectively as Subsidiary Guarantors) are fully, unconditionally, and jointly and severally liable for ACME Television's Notes. The Subsidiary Guarantors are wholly owned and constitute all of ACME Television's direct and indirect subsidiaries except for ACME Finance Corporation, a wholly owned finance subsidiary of ACME Television with essentially no assets or independent operations that is jointly and severally liable with the Company on the Television Notes. The Company has not included separate financial statements of the aforementioned subsidiaries because (i) ACME Television is a holding company with no independent operations other than its investments in its subsidiaries and (ii) the separate financial statements and other disclosures concerning such subsidiaries are not deemed material to investors.

(7) Bank Revolver

ACME Television had a revolving credit facility (the "Loan Agreement") with Canadian Imperial Bank Corporation (CIBC), as agent and lead lender. Under the terms of the Loan Agreement, advances bore interest at a base rate, that at our option, was either the bank's prime rate or LIBOR, plus a spread. Commitment fees were charged at a rate of .5% per annum, paid quarterly, on the unused portion of the facility. On December 29, 2000, the Loan Agreement was amended to provide less restrictive financial covenants and the Company voluntarily reduced the Bank's aggregate commitment from \$36 million to \$30 million as of December 31, 2000 and the commitment amortization rate was reduced throughout the balance of the term. The aggregate commitment at December 31, 2001 was \$22 million. The term of the agreement was to end September 30, 2002. As of December 31, 2000 and 2001 there were no outstanding balances under the Loan Agreement. ACME Television was not in compliance with all of the material covenants of the Loan Agreement at December 31, 2001.

In February 2002, the Company completed the replacement of the revolving credit facility with Foothill Capital Corporation, as both agent and lender. The new revolving facility, which like its predecessor is secured by all of the Company's television station assets, allows for borrowings up to \$30 million, contains less restrictive financial covenants and expires May 31, 2004. The agent is obligated to use its reasonable best efforts to increase the facility to \$40 million via the placement of additional syndication, but there is no assurance such a placement will be completed. Under this agreement, the Company has the option to borrow at an interest rate determined by either a base rate (Wells Fargo Bank's prime rate) plus 3 percentage points, or at the LIBOR rate plus 4.25 percentage points. The financial covenants, which are quarterly tests beginning March 31, 2002, included in the new facility are (a) minimum EBITDA, (b) maximum total leverage, (c) minimum cash interest coverage, (d) minimum net tangible worth and (e) maximum capital expendi-

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

tures (annual basis only). In addition to the financial covenants, the facility contains negative covenants which require the lender's approval for certain station acquisitions and dispositions.

Costs associated with the procuring of bank credit facilities, including loan fees and related professional fees, are included in long-term other assets and are amortized over the term of the facilities. There is approximately \$292,000 in capitalized cost related to the CIBC facility as of December 31, 2001 that will be expensed in the first quarter of 2002.

(8) Convertible Debentures

On June 30, 1997 and on September 30, 1997 the Company issued convertible debentures to certain investors in the aggregate amount of \$24,756,000. The debentures bore an interest rate of 10% per annum, compounded annually.

Pursuant to the terms of the debentures, on September 30, 1999, the holders elected to convert all of the outstanding principal and accrued interest into membership units of ACME Television Holdings, LLC which were then converted into ACME Communications, Inc. common stock in connection with the Reorganization. The conversion rate was fixed by contract and represented 24,756 membership units that were converted to 3,926,191 shares of common stock.

(9) Bridge Loan

On April 23, 1999, the Company entered into a \$15.0 million loan agreement with certain investors, and the proceeds were used to partially fund the acquisition of the property and equipment assets of Stations WBDT, WBWI and WBUI.

The entire loan, plus the accrued interest, was repaid at the closing of our initial public offering on October 5, 1999.

(10) Commitments and Contingencies*Obligations Under Operating Leases*

The Company is obligated under non-cancelable operating leases for office space, office equipment, broadcast equipment and tower sites. Future minimum lease payments under non-cancelable operating leases with initial or remaining terms of one year or more as of December 31, 2001 are:

	(In thousands)
2002	\$ 1,941
2003	1,864
2004	1,770
2005	1,365
2006	1,286
Thereafter	10,266
Total	\$ 18,492

Total rental expense under operating leases for the twelve months ended December 31, 1999, 2000 and 2001 was approximately \$850,000, \$1,740,000 and \$1,785,000, respectively.

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Obligations Under Capital Leases*

As of December 31, 2001, certain equipment was leased under capital equipment facilities. Future minimum lease payments under capital leases as of December 31, 2001 are:

	(In thousands)
2002	\$ 4,164
2003	3,603
2004	2,878
2005	2,601
2006	830

Less: Current portion	(3,290)
	<hr/>
Long-term portion	\$ 9,436
	<hr/>

Program Rights Payable

Commitments for program rights that have been executed, but which have not been recorded in the accompanying financial statements, as the underlying programming is not yet available for broadcast, were approximately \$50,768,000 as of December 31, 2001.

Maturities on the Company's program rights payables (including commitments not recognized in the accompanying financial statements due to the lack of current availability for broadcast) for each of the next five years are:

	(In thousands)
2002	\$ 16,232
2003	19,128
2004	15,936
2005	12,487
2006	7,209
Thereafter	13,828
	<hr/>
Total	\$ 84,820
	<hr/>

Certain Compensation Arrangements

In June 1997, the Company issued an aggregate of 100 management carry units to certain members of management. These units entitled holders to certain distribution rights upon achievement of certain returns by non-management investors and are subject to forfeiture or repurchase by the Company in the event of termination of each individual's employment by the Company under certain specified circumstances.

Edgar Filing: ACME COMMUNICATIONS INC - Form 10-K

These management carry units were accounted for as a variable plan and expensed as it became probable that any such distributions would be made. The Company determined the value of these at the issuance date to be immaterial. Upon the closing of the IPO these management carry units were exchanged for fully vested shares of our common stock. During 1999, the Company recorded an expense of \$39.6 million relating to the units. No expense was recorded relating to these units in 2000 or 2001.

Non-current deferred tax liabilities:		
Fixed asset depreciation	(146)	(572)
Intangible amortization	(27,164)	(29,438)
Book interest expense for original issue discount on 12% Senior Secured Discount Notes, due 2005	3,184	6,127
Deferred compensation	546	760
Net operating loss carryforward	9,575	21,056
Program amortization	(1,801)	(354)
Charitable contributions	98	97
Other	94	(92)
	<u>(15,614)</u>	<u>(2,416)</u>
Total net deferred income tax liabilities	<u>\$ (14,475)</u>	<u>\$ (1,607)</u>

At December 31, 2001, the Company had, for federal tax purposes, net operating loss carryforwards totaling approximately \$55.1 million that expire at various dates through 2021. The Internal Revenue Code substantially restricts the ability of a corporation to utilize existing net operating losses and credits in the event of an ownership change. Therefore, the Company's net operating loss carryforwards for federal income tax purposes may be limited if changes in ownership occur. For state tax purposes the Company had approximately \$54.7 million in net operating loss carryforwards that expire at various dates through 2021. Of this \$54.7 million approximately \$8.0 million relating to the state of New Mexico expire at various dates through 2006 and approximately \$1.5 million relating to the state of California expire at various dates through 2011.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income in specific tax jurisdictions during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making the assessment. Based primarily upon the reversal of temporary differences which will become deductible, management has concluded that it is more likely than not that the Company will realize the benefits of these deductible differences at December 31, 2001 and 2000.

(12) Related Party Transactions

Edgar Filing: ACME COMMUNICATIONS INC - Form 10-K

The Company's stations have entered into affiliation agreements and, from time to time, related marketing arrangements with The WB Network. Jamie Kellner, Chairman of the Board and Chief Executive Officer, is the chief executive officer of The WB Network.

ACME COMMUNICATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In connection with the acquisition of WBUI, WIWB and WBDT in June of 1999, we paid CEA, Inc. a broker's fee of \$125,000. CEA, Inc. also received compensation from the seller in connection with the purchase of WBUI, WIWB and WBDT. At the time of the transaction one of our directors, Mr. Collis, was an officer of an affiliate of CEA, Inc. Mr. Collis is no longer affiliated with CEA, Inc. or its affiliate.

(13) Defined Contribution Plan

In 1998, the Company established a 401(k) defined contribution plan (the Plan) which covers all eligible employees (as defined in the Plan). Participants are allowed to make non-forfeitable contributions up to 15% of their annual salary, but may not exceed the annual maximum contribution limitations established by the Internal Revenue Service. The Company currently matches 50% of the amounts contributed by each participant but does not match participants' contributions in excess of 6% of their contribution per pay period. The Company contributed and expensed \$173,000 to the Plan for the year ended December 31, 1999, \$273,000 for the year ended December 31, 2000 and \$331,000 for the year ended December 31, 2001.

(14) Stock Option Compensation

Our 1999 Stock Incentive Plan provides additional means to attract, motivate, reward and retain key personnel. The Compensation Committee of the Board of Directors (the plan administrator) has the authority to grant different types of stock and cash incentive awards and to select participants. While only stock options and restricted stock awards are contemplated at this time, other forms of awards may be granted give us flexibility to structure future incentives. Our employees, officers, directors, and consultants may be selected to receive awards under the plan.

A maximum of 4,200,000 shares of our common stock may be issued under the plan, (approximately 25.08% of our current outstanding shares). The number of shares subject to stock options and stock appreciation rights granted under the plan to any one person in a calendar year cannot exceed 1,000,000 shares. The number of shares subject to all awards granted under the plan to any one person in a calendar year cannot exceed 1,000,000 shares. Performance-based awards payable solely in cash that are granted under the plan to any one person in a calendar year cannot provide for payment of more than \$1,000,000.

Each share limit and award under the plan is subject to adjustment for certain changes in our capital structure, reorganizations and other extraordinary events. Shares subject to awards that are not paid or exercised before they expire or are terminated are available for future grants under the plan.

Currently outstanding options represent 10-year stock option grants. The outstanding option grants consist of:

Options to acquire 283,500 shares upon conversion of our long-term incentive compensation plan awards. These options were granted at an exercise price of \$15.00 per share and vest in equal thirds on December 31, 2000, 2001 and 2002.

Options to acquire approximately an additional 341,500 shares granted as incentives to employees and other eligible persons. Of these grants, options to acquire 58,500 shares were granted at an exercise price of \$18.00 per share and options to acquire 283,000 shares were granted at \$23.00 per share, the initial public offering price of our shares of common stock. These options vest in equal installments over five years.

Options to acquire an additional 2,209,091 shares, or approximately 13% of our common stock after giving effect to the Company's initial public offering, were granted to Messrs. Kellner, Gealy, and Allen. Of this number, options to acquire 838,635 shares were granted to Mr. Kellner, options to acquire 685,228 shares were granted to Mr. Gealy, and options to acquire 685,228 shares were granted to Mr. Allen. These options were granted at \$23.00 per share, the initial public offering price of our

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

shares of common stock and vest in four equal annual installments. The first installment vested on September 29, 2000. On November 12, 2001 Messrs. Kellner, Gealy and Allen entered into a Stock Option Cancellation and Amendment Agreement that cancelled 419,318, 342,613 and 342,613, respectively, (50%) of these options. Vesting of these options accelerates upon a change of control, death, disability or termination without cause.

Options to acquire 451,000 shares granted as incentives to employees during the year ended December 31, 2000. These options were granted at exercise prices ranging from \$9.13 to \$25.06 per share (market price at the date of grant) and vest equally over five years.

Options to acquire 478,000 shares granted as incentives to employees during the year ended December 31, 2001. These options were granted at exercise prices ranging from \$6.95 to \$10.56 per share (market price at the date of grant) and vest equally over three years. Stock option activity during the years ended December 31, 1999, 2000 and 2001 consisted of the following:

	1999		2000		2001	
	Number of Shares	Weighted Average Price Per Share	Number of Shares	Weighted Average Price Per Share	Number of Shares	Weighted Average Price Per Share
Stock options outstanding, beginning of year		\$	2,831,591	\$22.56	3,263,391	\$21.31
Options granted:						
1999 at \$15.00 to \$23.00 per share	2,834,091	22.56				
2000 at \$9.13 to \$25.06 per share			451,050	16.49		
2001 at \$6.95 to \$10.56 per share					478,000	7.00
Options forfeited or terminated	2,500	23.00	19,250	23.38	1,209,118	22.55
Options exercised						
Stock options outstanding, end of year	2,831,591	\$22.56	3,263,391	\$21.31	2,532,273	\$18.02
Stock options exercisable, end of year	552,273	\$23.00	1,263,785	\$22.36	1,213,485	\$21.27
Options available for grant, end of year	1,368,409		936,609		1,667,727	

The following table summarizes information concerning currently outstanding and exercisable options:

Range of Exercise Prices	Outstanding Stock Options			Exercisable Stock Options	
	Shares	Weighted-Average Remaining Contractual Life	Weighted Average Exercise Price	Shares Exercisable	Weighted Average Exercise Price
\$ 6.95-\$10.00	691,050	9.6 years	\$ 7.65	43,700	\$ 9.13
\$ 10.56-\$15.00	273,500	7.7 years	\$ 14.92	179,000	\$ 15.00
\$ 18.00-\$24.88	1,567,723	7.8 years	\$ 23.14	700,849	\$ 23.03
	2,532,273			923,549	

Edgar Filing: ACME COMMUNICATIONS INC - Form 10-K

The Company applies Accounting Principles Board Opinion No. 25 and related interpretations, in accounting for its stock option plan. Accordingly, no compensation cost has been recognized for options

Table of Contents**ACME COMMUNICATIONS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

granted at or above fair market value at the time of grant. For the grants that were made at an option price lower than fair market value at the time of grant, compensation expense of \$132,000 was recognized in the fourth quarter of 1999 (the first quarter of the vesting period) and \$529,000 for the years ended December 31, 2000 and 2001. The options granted at below fair market value at the date of grant were granted upon conversion of the Company's Long Term Incentive Plan (LTIP) in 1999. The Company recognized compensation expense under the LTIP of \$338,000 during the year ended December 31, 1999. All amounts expensed prior to the conversion of the LTIP (\$738,000) are netted against the total of the below market option compensation expense to arrive at the expense to be recognized over the vesting period of such options.

Had the Company chosen to adopt the provisions of Statement of Financial Accounting Standards No. 123, and recognized compensation cost based upon the fair value of all options granted (including those granted at or above fair market value) at the date of grant, the Company's net loss (in thousands) and net loss per share for the years ended December 31, 1999, 2000 and 2001 would have been as follows:

	As Reported			Proforma		
	1999	2000	2001	1999	2000	2001
Net loss to common stockholders	\$ (70,779)	\$ (22,038)	\$ (27,849)	\$ (72,403)	\$ (29,395)	\$ (35,683)
Net loss per common share	\$ (7.96)	\$ (1.32)	\$ (1.66)	\$ (9.09)	\$ (1.75)	\$ (2.13)

The fair value of the options granted were used to calculate the pro forma net income and net income per common share above, on the date of grant, using a binomial option-pricing model with the following weighted average assumptions:

	1999	2000	2001
Dividend yield			
Expected volatility	50.00	121.00%	140.58%
Risk free interest rate	6.11%	5.87%	3.25%
Expected life (in months)	60	60	60
Weighted average fair value of grants	\$ 12.03	\$ 13.99	\$ 5.29

(15) Selected Quarterly Data (Unaudited)

	Q-1	Q-2	Q-3	Q-4	Year to Date

PART IV

Item 14. Exhibits, Financial Statement Schedules and Reports on Form 8-K

(a)1. Financial Statements

The following financial statements are included in Item 8:

ACME Communications, Inc. and Subsidiaries:

Consolidated Balance Sheets as of December 31, 2001 and December 31, 2000.

Consolidated Statements of Operations for the years ended December 31, 2001, December 31, 2000 and December 31, 1999.

Consolidated Statements of Stockholders' Equity for the years ended December 31, 2001, December 31, 2000 and December 31, 1999.

Consolidated Statements of Cash Flows for the years ended December 31, 2001, December 31, 2000 and December 31, 1999.

Notes to the Consolidated Financial Statements.

(a)2. Financial Statement Schedules

The following financial statement schedules are included in Item 14 (d):

Schedule I Condensed Financial Information of ACME Communications, Inc. (Parent Company):

Balance Sheet as of December 31, 2001 and December 31, 2000.

Statements of Operations for the years ended December 31, 2001, December 31, 2000 and December 31, 1999.

Statements of Stockholders' Equity for the years ended December 31, 2001, December 31, 2000 and December 31, 1999.

Statements of Cash Flows for the years ended December 31, 2001, December 31, 2000 and December 31, 1999.

Notes to the Condensed Financial Statements

Schedule II Valuation and Qualifying Accounts

All other schedules have been omitted since the required information is not present or not present in amounts sufficient to require submission of the schedule, or because the information required is included in the consolidated financial statements or the notes thereto, included in Item 8 herewith.

NOTES TO CONDENSED FINANCIAL INFORMATION

1. Formation and Basis of Presentation

Pursuant to the rules and regulations of the Securities and Exchange Commission, the Condensed Financial Statements of ACME Communications, Inc., do not include all of the information and notes normally include with financial statements prepared in accordance with generally accepted accounting principles. It is therefore suggested that these Condensed Financial Statements be read in conjunction with the Consolidated Financial Statements and Notes thereto included at Item 8 of this filing.

ACME Communications, Inc. was formed on July 23, 1999, in preparation for and in conjunction with an initial public offering of its stock.

On September 27, 1999, the Board of Advisors of ACME Television Holdings, LLC and its members approved a merger and reorganization (the Reorganization), whereby ACME Communications became the direct parent of ACME Television Holdings, LLC. As a result of the Reorganization, ACME Communications is the ultimate parent of ACME Intermediate Holdings, LLC, and its wholly-owned subsidiary ACME Television, LLC. All transactions contemplated as part of the Reorganization closed on October 5, 1999.

Among the significant transactions of the Reorganization were the exchange of shares of the Company's common stock for members' units, management carry units and convertible debt of ACME Television Holdings, LLC. The common stock exchanged for members' units in ACME Television Holdings, LLC was recorded at historical cost. The management carry units were treated as a variable compensation plan. As the number of shares of common stock issued to the holders of the management carry units were fixed and fully vested, compensation expense was recorded for the difference between the fair value of the shares issued and the MCU expense previously recorded. The convertible debt was converted pursuant to its original conversion terms, and accordingly, no gain or loss was recognized. Also, the Company acquired the minority interest in ACME Intermediate Holdings, LLC for 923,938 shares of the Company's common stock. The acquisition of the minority interest was accounted for at fair market value.

The financial statements give effect to the exchange of common stock for members' units for the year ended December 31, 1999.

On October 5, 1999, the Company completed its initial public offering of 5,000,000 shares of common stock at \$23 per share, before underwriters' discounts and other issuance costs. The Company received net proceeds of approximately \$105 million.

The accompanying condensed financial statements are presented for ACME Communications, Inc.

2. Cash Dividends

There have been no cash dividends declared by the Company.

3. Intangible asset

The acquisition of ACME Intermediate Holdings LLC's minority interest during the Reorganization in October of 1999 was accounted for at fair market value. The difference between the fair market value and the carrying value of the minority interest was \$21,103,000 and was recorded as an intangible asset with a useful life of 20 years. Amortization expense for the year ended December 31, 1999 was \$264,000 and \$1,055,000 for the years ended December 31, 2000 and 2001.

4. Long-Term Debt

There are no cash interest payments due on ACME Intermediate Holdings, LLC's Senior Secured Discount Notes until March 31, 2003. At December 31, 2000 and 2001, ACME Television, LLC has \$4,758,000 included in accrued liabilities for the interest payments due March 31, 2001 and 2002, respectively, on ACME Television, LLC's Senior Discount Notes.
