PART I. FINANCIAL INFORMATION

Item 1. Consolidated Financial Statements

In the opinion of management, these financial statements reflect all adjustments, consisting of valuation adjustments and normal recurring accruals, necessary for a fair statement of our financial position, results of operations and cash flows for such periods.

Harris & Harris Group, Inc.® (the "Company," "us," "our" and "we"), is an internally managed, non-diversified management investment company that has elected to operate as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act"). Certain information and disclosures normally included in the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP") have been condensed or omitted as permitted by Regulation S-X and Regulation S-K. Accordingly, they do not include all information and disclosures necessary for a fair presentation of our financial position, results of operations and cash flows in conformity with GAAP. The results of operations for any interim period are not necessarily indicative of the results for the full year. The accompanying consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2015.

HARRIS & HARRIS GROUP, INC.

Notes to Consolidated Schedule of Investments

(1) See "Footnote to Consolidated Schedule of Investments" on page 37 for a description of the "Valuation Procedures."

We classify "Energy" companies as those that seek to improve performance, productivity or efficiency, and to reduce environmental impact, waste, cost, energy consumption or raw materials. We classify "Electronics" companies as those that address problems in electronics-related industries, including semiconductors and computing. We classify "Life Sciences" companies as those that address problems in life sciences-related industries, including precision health and precision medicine, biotechnology, agriculture, advanced materials and chemicals, health care, bioprocessing, water, industrial biotechnology, food, nutrition and energy.

Investments in unaffiliated companies consist of investments in which we own less than five percent of the voting shares of the portfolio company. Investments in non-controlled affiliated companies consist of investments in which we own five percent or more, but less than 25 percent, of the voting shares of the portfolio company, or where we hold one or more seats on the portfolio company's board of directors but do not control the company.

(3) Investments in controlled affiliated companies consist of investments in which we own 25 percent or more of the voting shares of the portfolio company or otherwise control the company, including control of a majority of the seats on the board of directors, or more than 25 percent of the seats on the board of directors, with no other entity or person in control of more director seats than us. Among our controlled affiliated companies, ProMuc, Inc., and Interome, Inc., were 100 percent owned by us at September 30, 2016.

The aggregate cost for federal income tax purposes of investments in unaffiliated privately held companies is (4) \$10,878,510. The gross unrealized appreciation based on the tax cost for these securities is \$90,884. The gross unrealized depreciation based on the tax cost for these securities is \$6,254,378.

(5) All or a portion of the investments or instruments are pledged as collateral under our Loan Facility with Orix Corporate Capital, Inc.

The aggregate cost for federal income tax purposes of investments in unaffiliated rights to milestone payments is (6) \$781,863. The gross unrealized appreciation based on the tax cost for these securities is \$2,660,882. The gross unrealized depreciation based on the tax cost for these securities is \$0.

The aggregate cost for federal income tax purposes of investments in unaffiliated publicly traded companies is (7) \$2,664,644. The gross unrealized appreciation based on the tax cost for these securities is \$0. The gross unrealized depreciation based on the tax cost for these securities is \$1,742,039.

(8) We are subject to legal restrictions on the sale of our investment(s) in this company.

(9) Represents a non-income producing investment. Investments that have not paid dividends or interest within the last 12 months are considered to be non-income producing.

(10) Initial investment was made in 2016.

We received shares of Xenio Corp. as part of the consideration distributed to shareholders of Bridgelux, Inc., for (11) the sale of Bridgelux, Inc., to an investment group led by China Electronics Corporation and ChongQing Linkong Development Investment Company. The close of this transaction occurred on August 1, 2016.

The Company's securities of OpGen, Inc., were subject to a lock-up agreement that restricted our ability to trade these securities. The lock-up agreement expired on August 18, 2016. A total of 300,833 shares and 300,833 (12) warrants are not qualifying assets under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire non-qualifying assets unless, at the time the acquisition is made, qualifying assets are at least 70 percent of our total assets.

The accompanying unaudited notes are an integral part of these consolidated financial statements.

HARRIS & HARRIS GROUP, INC.

CONSOLIDATED SCHEDULE OF INVESTMENTS AS OF SEPTEMBER 30, 2016

(Unaudited)

The aggregate cost for federal income tax purposes of investments in non-controlled affiliated privately held (13) companies is \$51,750,473. The gross unrealized appreciation based on the tax cost for these securities is \$14,862,714. The gross unrealized depreciation based on the tax cost for these securities is \$20,627,446.

D-Wave Systems, Inc., is located and is doing business primarily in Canada. We invested in D-Wave through Parallel Universes, Inc., a Delaware company. Our investment is denominated in Canadian dollars and is subject (14) to foreign currency translation. See "Note 3. Summary of Significant Accounting Policies." D-Wave is not a qualifying asset under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire non-qualifying assets unless, at the time the acquisition is made, qualifying assets are at least 70 percent of our total assets.

(15) Represents a non-operating entity that exists to collect future payments from licenses or other engagements and/or monetize assets for future distributions to investors and debt holders.

(16) Produced Water Absorbents, Inc., also does business as ProSep, Inc.

The aggregate cost for federal income tax purposes of investments in non-controlled affiliated publicly traded (17) companies is \$17,073,716. The gross unrealized appreciation based on the tax cost for these securities is \$0. The gross unrealized depreciation based on the tax cost for these securities is \$11,641,901.

A total of 200,000 shares of our holdings in Adesto Technologies Corporation are not qualifying assets under (18) Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire non-qualifying assets unless, at the time the acquisition is made, qualifying assets are at least 70 percent of our total assets.

The aggregate cost for federal income tax purposes of investments in controlled affiliated companies is (19) \$24,382,537. The gross unrealized appreciation based on the tax cost for these securities is \$1,370,317. The gross unrealized depreciation based on the tax cost for these securities is \$18,505,433

On August 4, 2015, SiOnyx, Inc., reorganized its corporate structure to become a subsidiary of a new company, (20) Black Silicon Holdings, Inc. Our security holdings of SiOnyx converted into securities of Black Silicon Holdings. SiOnyx was then acquired by an undisclosed buyer. Black Silicon Holdings owns a profit interest in the undisclosed buyer.

(21) On August 19, 2015, UberSeq, Inc., changed its name to NGX Bio, Inc.

(22) On October 19, 2016, Senova Systems, Inc., sold substantially all of its assets to an undisclosed buyer for an up-front payment and potential future payments upon achievement of milestones.

The aggregate cost for federal income tax purposes of investments in privately held equity method investments is (23) \$251,244. Under the equity method, investments are carried at cost, plus or minus the Company's equity in the increases and decreases in the investee's net assets after the date of acquisition and certain other adjustments.

(24) See "Note 11. Commitments and Contingencies."

The accompanying unaudited notes are an integral part of these consolidated financial statements.

HARRIS &
HARRIS GROUP,
INC.
CONSOLIDATED
SCHEDULE OF
INVESTMENTS
AS OF
DECEMBER 31,
2015

Notes to Consolidated Schedule of Investments

- (1) See "Footnote to Consolidated Schedule of Investments" on page 37 for a description of the "Valuation Procedures."
- We classify "Energy" companies as those that seek to improve performance, productivity or efficiency, and to reduce environmental impact, waste, cost, energy consumption or raw materials. We classify "Electronics" companies as those that address problems in electronics-related industries, including semiconductors and computing. We classify "Life Sciences" companies as those that address problems in life sciences-related industries, including precision health and precision medicine, biotechnology, agriculture, advanced materials and chemicals, health care, bioprocessing, water, industrial biotechnology, food, nutrition and energy.
- Investments in unaffiliated companies consist of investments in which we own less than five percent of the voting shares of the portfolio company. Investments in non-controlled affiliated companies consist of investments in which we own five percent or more, but less than 25 percent, of the voting shares of the portfolio company, or where we hold one or more seats on the portfolio company's board of directors but do not control the company.
- (3) Investments in controlled affiliated companies consist of investments in which we own 25 percent or more of the voting shares of the portfolio company or otherwise control the company, including control of a majority of the seats on the board of directors, or more than 25 percent of the seats on the board of directors, with no other entity or person in control of more director seats than us. Among our controlled affiliated companies, ProMuc, Inc., was 100 percent owned by us at December 31, 2015.
- The aggregate cost for federal income tax purposes of investments in unaffiliated privately held companies is
- (4) \$18,857,235. The gross unrealized appreciation based on the tax cost for these securities is \$10,390. The gross unrealized depreciation based on the tax cost for these securities is \$13,491,153.
- (5) All or a portion of the investments or instruments are pledged as collateral under our Loan Facility with Orix Corporate Capital, Inc.
- The aggregate cost for federal income tax purposes of investments in unaffiliated rights to milestone payments is
- (6) \$781,863. The gross unrealized appreciation based on the tax cost for these securities is \$2,580,188. The gross unrealized depreciation based on the tax cost for these securities is \$0.
- The aggregate cost for federal income tax purposes of investments in unaffiliated publicly traded companies is
- (7) \$1,623,029. The gross unrealized appreciation based on the tax cost for these securities is \$0. The gross unrealized depreciation based on the tax cost for these securities is \$665,485.
- (8) We are subject to legal restrictions on the sale of our investment(s) in this company.
- (9) Represents a non-income producing investment. Investments that have not paid dividends or interest within the last 12 months are considered to be non-income producing.
- On July 21, 2015, Bridgelux, Inc., signed a definitive agreement to be acquired by an investment group led by
- (10) China Electronics Corporation and ChongQing Linkong Development Investment Company. The close of this transaction is subject to customary regulatory approvals.
- (11) In February of 2016, Cambrios Technologies Corporation ceased operations and began liquidation of its assets through a general assignment for the benefit of creditors.
- (12) We received our shares of Magic Leap, Inc., as part of the consideration paid for one of our portfolio companies in an acquisition during the second quarter of 2015. A total of 4,394 shares of our 29,291 shares of Magic Leap are held in escrow to satisfy indemnity claims through May 1, 2016.

(13) Initial investment was made in 2015.

The aggregate cost for federal income tax purposes of investments in non-controlled affiliated privately held
(14) companies is \$49,262,921. The gross unrealized appreciation based on the tax cost for these securities is
\$10,504,995. The gross unrealized depreciation based on the tax cost for these securities is \$17,858,654.

The accompanying notes are an integral part of this consolidated schedule.

35

HARRIS &
HARRIS GROUP,
INC.
CONSOLIDATED
SCHEDULE OF
INVESTMENTS
AS OF
DECEMBER 31,
2015

D-Wave Systems, Inc., is located and is doing business primarily in Canada. We invested in D-Wave through Parallel Universes, Inc., a Delaware company. Our investment is denominated in Canadian dollars and is subject (15) to foreign currency translation. See "Note 2. Summary of Significant Accounting Policies." D-Wave is not a qualifying asset under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire non-qualifying assets unless, at the time the acquisition is made, qualifying assets are at least 70 percent of our total assets.

(16) Produced Water Absorbents, Inc., also does business as ProSep, Inc.

(17) In March of 2015, Ultora, Inc., ceased operations and began liquidation of its assets through a general assignment for the benefit of creditors.

The aggregate cost for federal income tax purposes of investments in non-controlled affiliated publicly traded (18) companies is \$23,165,788. The gross unrealized appreciation based on the tax cost for these securities is \$2,163,265. The gross unrealized depreciation based on the tax cost for these securities is \$6,957,948.

As of December 31, 2015, the Company's shares of Adesto Technologies Corporation were subject to a lock-up (19) agreement that restricts our ability to trade these securities. A total of 200,000 shares are not qualifying assets under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire non-qualifying assets unless, at the time the acquisition is made, qualifying assets are at least 70 percent of our total assets.

As of December 31, 2015, a portion of the Company's shares and warrants of Enumeral Biomedical Holdings, (20) Inc., were subject to a lock-up agreement that restricts our ability to trade these securities. The lock-up period on our securities of Enumeral Biomedical Holdings expired on January 31, 2016. A portion of our shares were held in escrow as of the end of 2015. This escrow period expired with no claims against the escrowed shares.

The Company's shares of OpGen, Inc., became freely tradeable on November 2, 2015. A total of 300,833 shares (21) and 300,833 warrants are not qualifying assets under Section 55(a) of the 1940 Act. Under the 1940 Act, we may not acquire non-qualifying assets unless, at the time the acquisition is made, qualifying assets are at least 70 percent of our total assets.

The aggregate cost for federal income tax purposes of investments in controlled affiliated companies is (22) \$23,205,336. The gross unrealized appreciation based on the tax cost for these securities is \$271,755. The gross unrealized depreciation based on the tax cost for these securities is \$16,466,557.

On August 4, 2015, SiOnyx, Inc., reorganized its corporate structure to become a subsidiary of a new company, (23) Black Silicon Holdings, Inc. Our security holdings of SiOnyx converted into securities of Black Silicon Holdings. SiOnyx was then acquired by an undisclosed buyer. Black Silicon Holdings owns a profit interest in the undisclosed buyer.

(24) On August 19, 2015, UberSeq, Inc., changed its name to NGX Bio, Inc.

The aggregate cost for federal income tax purposes of investments in privately held equity method investments is (25) \$165,936. Under the equity method, investments are carried at cost, plus or minus the Company's equity in the increases and decreases in the investee's net assets after the date of acquisition and certain other adjustments.

(26) As part of our initial investment in Accelerator IV-New York Corporation, the Company made an additional operating and investment commitment. See "Note 11. Commitments and Contingencies."

The accompanying notes are an integral part of this consolidated schedule.

HARRIS &
HARRIS GROUP,
INC.
FOOTNOTE TO
CONSOLIDATED
SCHEDULE OF
INVESTMENTS

VALUATION PROCEDURES

I. Determination of Net Asset Value

The 1940 Act requires periodic valuation of each investment in the portfolio of the Company to determine its net asset value. Under the 1940 Act, unrestricted securities with readily available market quotations are to be valued at the current market value; all other assets must be valued at "fair value" as determined in good faith by or under the direction of the Board of Directors.

The Board of Directors is also responsible for (1) determining overall valuation guidelines and (2) ensuring that the investments of the Company are valued within the prescribed guidelines.

The Valuation Committee, comprised of all of the independent Board members, is responsible for determining the valuation of the Company's assets within the guidelines established by the Board of Directors. The Valuation Committee receives information and recommendations from management. An independent valuation firm also reviews select portfolio company valuations prepared by management. The independent valuation firm does not provide proposed valuations.

The fair values assigned to these investments are based on available information and do not necessarily represent amounts that might ultimately be realized when that investment is sold, as such amounts depend on future circumstances and cannot reasonably be determined until the individual investments are actually liquidated or become readily marketable.

The deal team, which is comprised of the Chief Executive Officer, President and Senior Associate, meets at the end of each quarter to discuss portfolio companies and propose fair valuations for all privately held securities, restricted publicly traded securities and publicly traded securities without reliable market quotations. The Valuation Committee book is prepared with the use of data from primary sources whenever reasonably practicable. Proposed valuations for each portfolio company are communicated to the Valuation Committee in the Valuation Committee book and at the Valuation Committee meeting after the end of each quarter. The Valuation Committee determines the fair value of each private security and publicly traded securities without reliable market quotations. All valuations are then reported to the full Board of Directors along with the Chief Financial Officer's calculation of net asset value.

II. Approaches to Determining Fair Value

Accounting Standards Codification Topic 820, "Fair Value Measurements and Disclosures," ("ASC 820") defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). It applies fair value terminology to all valuations whereas the 1940 Act applies market value terminology to readily marketable assets and fair value terminology to other assets.

The main approaches to measuring fair value utilized are the market approach, the income approach and the hybrid approach.

Market Approach (M): The market approach may use quantitative inputs such as prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities and the values of market multiples derived from a set of comparable companies. The market approach may also use qualitative inputs such as progress toward milestones, the long-term potential of the business, current and future financing requirements and the rights and preferences of certain securities versus those of other securities. The selection of the relevant inputs used to derive value under the market approach requires judgment considering factors specific to the significance and relevance of each input to deriving value.

Income Approach (I): The income approach uses valuation techniques to convert future amounts (for example, revenue, cash flows or earnings) to a single present value amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Those valuation techniques include present value techniques; option-pricing models, such as the Black-Scholes-Merton formula (a closed-form model) and a binomial model (a lattice model), which incorporate present value techniques; and the multi-period excess earnings method, which is used to measure the fair value of certain assets.

Hybrid Approach (H): The hybrid approach uses elements of both the market approach and the income approach. The hybrid approach calculates values using the market and income approach, individually. The resulting values are then distributed among the share classes based on probability of exit outcomes.

ASC Topic 820 classifies the inputs used to measure fair value by these approaches into the following hierarchy:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities;
 - Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 inputs are in those markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers; and
 - Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.
- Unobservable inputs are those inputs that reflect our own assumptions that market participants would use to price the asset or liability based upon the best available information.

Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement and are not necessarily an indication of risks associated with the investment.

III. Investment Categories

The Company's investments can be classified into five broad categories for valuation purposes:

- Equity-related securities;
- Long-term fixed-income securities;
- Short-term fixed-income securities;
- Investments in intellectual property, patents, research and development in technology or product development; and
- All other securities.

The Company applies the methods for determining fair value discussed above to the valuation of investments in each of these five broad categories as follows:

A. EQUITY RELATED SECURITIES

Equity-related securities, including options or warrants, are fair valued using the market, income or hybrid approaches. The following factors may be considered to fair value these types of securities:

- Readily available public market quotations;
- The cost of the Company's investment;
- Transactions in a company's securities or unconditional firm offers by responsible parties as a factor in determining valuation;
- The financial condition and operating results of the company;
- The company's progress towards milestones;
- The long-term potential of the business and technology of the company;
- The values of similar securities issued by companies in similar businesses;

- Multiples to revenue, net income or EBITDA that similar securities issued by companies in similar businesses receive
- Estimated time to exit;
- Volatility of similar securities in similar businesses;
- The proportion of the company's securities we own and the nature of any rights to require the company to register restricted securities under applicable securities laws; and
- The rights and preferences of the class of securities we own as compared with other classes of securities the portfolio company has issued.

When the income approach is used to value warrants, the Company uses the Black-Scholes-Merton formula.

The Company values two investments using the equity method.

• Equity Method (E): Under the equity method, investments are carried at cost, plus or minus the Company's equity in the increases and decreases in the investee's net assets after the date of acquisition and certain other adjustments.

B. LONG-TERM FIXED-INCOME SECURITIES

1. Readily Marketable. Long-term fixed-income securities for which market quotations are readily available are valued using the most recent bid quotations when available.

2. Not Readily Marketable. Long-term fixed-income securities for which market quotations are not readily available are fair valued using the income approach. The factors that may be considered when valuing these types of securities by the income approach include:

- Credit quality;
- Interest rate analysis;
- Quotations from broker-dealers;
- Prices from independent pricing services that the Board believes are reasonably reliable; and
- Reasonable price discovery procedures and data from other sources.

C. SHORT-TERM FIXED-INCOME SECURITIES

Short-term fixed-income securities are valued in the same manner as long-term fixed-income securities until the remaining maturity is 60 days or less, after which time such securities may be valued at amortized cost if there is no concern over payment at maturity.

D. INVESTMENTS IN INTELLECTUAL PROPERTY, PATENTS, RESEARCH AND DEVELOPMENT IN TECHNOLOGY OR PRODUCT DEVELOPMENT

Such investments are fair valued using the market approach. The Company may consider factors specific to these types of investments when using the market approach including:

- The cost of the Company's investment;
- Investments in the same or substantially similar intellectual property or patents or research and development in technology or product development or offers by responsible third parties;
- The results of research and development;

Product development and milestone progress;
Commercial prospects;
Term of patent;
Projected markets; and
Other subjective factors.

E. ALL OTHER SECURITIES

All other securities are reported at fair value as determined in good faith by the Valuation Committee using the approaches for determining valuation as described above.

For all other securities, the reported values shall reflect the Valuation Committee's judgment of fair values as of the valuation date using the outlined basic approaches of valuation discussed in Section II. They do not necessarily represent an amount of money that would be realized if we had to sell such assets in an immediate liquidation. Thus, valuations as of any particular date are not necessarily indicative of amounts that we may ultimately realize as a result of future sales or other dispositions of investments we hold.

IV. Frequency of Valuation

The Valuation Committee shall value the Company's investment assets (i) as of the end of each calendar quarter at the time sufficiently far in advance of filing of the Company's reports on Form 10-Q and Form 10-K to enable preparation thereof, (ii) as of within 48 hours of pricing any common stock of the Company by the Company (exclusive of Sundays and holidays) unless the proposed sale price is at least 200 percent of any reasonable net asset value of such shares, and (iii) as of any other time requested by the Board of Directors.

V. Regular Review

The Chief Financial Officer shall review these Valuation Procedures on an annual basis to determine the continued appropriateness and accuracy of the methodologies used in valuing the Company's investment assets, and will report any proposed modifications to these Valuation Procedures to the Board of Directors for consideration and approval.

The Chief Executive Officer and the Chief Financial Officer and the individuals responsible for preparing the Valuation Committee book shall meet quarterly before each Valuation Committee meeting to review the methodologies for the valuation of each security, and will highlight any changes to the Valuation Committee.

VI. Other Assets

Non-investment assets, such as fixtures and equipment, shall be valued using the cost approach less accumulated depreciation at rates determined by management and reviewed by the Audit Committee. Valuation of such assets is not the responsibility of the Valuation Committee.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1. THE COMPANY

Harris & Harris Group, Inc. (the "Company," "us," "our" and "we"), is a non-diversified management investment company operating as a business development company ("BDC") under the Investment Company Act of 1940 (the "1940 Act") that specializes in making investments in companies commercializing and integrating products enabled by disruptive technologies predominantly in the life sciences industry. We operate as an internally managed investment company whereby our officers and employees, under the general supervision of our Board of Directors, conduct our operations.

H&H Ventures Management, Inc.SM ("Ventures") is a 100 percent wholly owned subsidiary of the Company. Ventures is taxed under Subchapter C (a "C Corporation") of the Internal Revenue Code of 1986 (the "Code"). Harris Partners I, L.P., is a limited partnership and, from time to time, may be used to hold certain interests in our portfolio companies. The partners of Harris Partners I, L.P., are Ventures (sole general partner) and the Company (sole limited partner). Ventures pays taxes on income generated by its operations as well as on any non-passive investment income generated by Harris Partners I, L.P. For the period ended September 30, 2016, there was no non-passive investment income generated by Harris Partners I, L.P. Ventures, as the sole general partner, consolidates Harris Partners I, L.P. The Company consolidates its wholly owned subsidiary, Ventures, for financial reporting purposes.

The Company is the Managing Member of H&H Co-Investment Partners, LLC, a limited liability company formed to facilitate the opportunity for interested investors to co-invest alongside the Company in its portfolio companies. The Company is also the Investment Manager of two series formed by H&H Co-Investment Partners, H&H Co-Investment Partners, LLC D-Wave Co-Investment Series J and H&H Co-Investment Partners, LLC HZO Co-Investment Series III. As of September 30, 2016, H&H Co-Investment Partners did not have any capital under management. The Company expects to receive management fees and/or carried interest in profits generated on invested capital from any capital under management if and when capital is raised. The Company does not expect to consolidate the operations of H&H Co-Investment Partners if and when it has capital under management.

NOTE 2. INTERIM FINANCIAL STATEMENTS

Our interim financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and in conformity with accounting principles generally accepted in the United States of America ("GAAP") applicable to interim financial information. Accordingly, the information presented on our interim financial statements does not include all information and disclosures necessary for a fair statement of our financial position, results of operations and cash flows in conformity with GAAP for annual financial statements. In the opinion of management, these financial statements reflect all adjustments, consisting of valuation adjustments and normal recurring accruals, necessary for a fair statement of our financial position, results of operations and cash flows for such periods. The results of operations for any interim period are not necessarily indicative of the results for the full year. These financial statements should be read in conjunction with the financial statements and notes thereto contained in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

NOTE 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed in the preparation of the consolidated financial statements:

Principles of Consolidation. The consolidated financial statements have been prepared in accordance with GAAP and include the accounts of the Company and its wholly owned subsidiary. The Company is an investment company following accounting and reporting guidance in Accounting Standards Codification 946. In accordance with GAAP and Regulation S-X, the Company may only consolidate its interests in investment company subsidiaries and controlled operating companies whose business consists of providing services to the Company. Our wholly owned subsidiary, Ventures, is a controlled operating company that provides services to us and is, therefore, consolidated. All significant intercompany accounts and transactions have been eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the current period presentation. Amounts reported in "Net decrease (increase) in unrealized depreciation on investments" have been reclassified from prior years. Amounts related to portfolio company investments were previously reported as a single amount and have been reclassified to present unrealized (depreciation) appreciation from unaffiliated companies, controlled affiliated companies, non-controlled affiliated

41

companies, publicly traded companies and unaffiliated rights to milestone payments. There was no impact to the total amounts reported in any period.

Use of Estimates. The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ from these estimates, and the differences could be material. The most significant estimates relate to the fair valuations of our investments.

Portfolio Investment Valuations. Investments are stated at "value" as defined in the 1940 Act and in the applicable regulations of the Securities and Exchange Commission ("SEC") and in accordance with GAAP. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily available and (ii) the fair value as determined in good faith by, or under the direction of, the Board of Directors for all other assets. (See "Valuation Procedures" in the "Footnote to Consolidated Schedule of Investments.") As of September 30, 2016, our financial statements include investments fair valued by the Board of Directors at \$61,611,808 and two investments valued under the equity method at \$251,244. The fair values were determined in good faith by, or under the direction of, the Board of Directors. The fair value amount includes the values of our privately held investments as well as the warrants of Champions Oncology, Inc., Enumeral Biomedical Holdings, Inc., and OpGen, Inc., which are publicly traded companies. Our investments in Accelerator IV-New York Corporation and AgTech Accelerator Corporation are accounted for under the equity method of accounting as they represent non-controlling interests in operating entities that provide investment advisory services to the Company. Under the equity method, investments are carried at cost, plus or minus the Company's equity in the increases and decreases in the investee's net assets after the date of acquisition and certain other adjustments. The Company's share of the net income or loss of the investee is included in "Share of loss on equity method investments" on the Company's "Consolidated Statements of Operations." Upon sale of investments, the values that are ultimately realized may be different from the fair value presented in the Company's financial statements. The difference could be material.

Cash. Cash includes demand deposits. Cash is carried at cost, which approximates fair value.

Unaffiliated Rights to Milestone Payments. At September 30, 2016, and December 31, 2015, the outstanding potential milestone payments from Amgen, Inc.'s acquisition of BioVex Group, Inc., were valued at \$2,975,353 and \$2,900,232, respectively. The milestone payments are derivatives and are fair valued using the probability-adjusted, present value of proceeds from future payments that would be due upon successful completion of certain regulatory and sales milestones. On November 17, 2014, the Company received a payment of \$2,070,955 owing to the achievement of the first milestone. On November 23, 2015, the Company received a payment of \$2,070,955 owing to the achievement of the second milestone. If all the remaining milestones are met, we would receive \$5,384,482. At September 30, 2016, and December 31, 2015, the outstanding potential milestone payments from Canon, Inc.'s acquisition of Molecular Imprints, Inc., were valued at \$467,392 and \$461,819, respectively. On October 1, 2015, the Company received a payment of \$795,567 owing to the achievement of the first milestone. If all the remaining milestones are met, we would receive an additional \$938,926. At September 30, 2016, and December 31, 2015, the outstanding potential milestone payments from Laird Technologies, Inc.'s acquisition of Nextreme Thermal Solutions, Inc., were valued at \$0. If all the remaining milestones are met, we would receive approximately \$400,000. There can be no assurances as to how much of these amounts we will ultimately realize or when they will be realized, if at all.

Funds Held in Escrow from Sale of Investments. At September 30, 2016, and December 31, 2015, there were funds held in escrow fair valued at \$116,872 and \$311,137, respectively, relating to the sale of Molecular Imprints, Inc.'s semiconductor lithography equipment business to Canon, Inc. On April 20, 2016, the Company received proceeds of \$390,492 from the release of a portion of the funds held in escrow following the transaction. The remaining funds held in escrow are expected to be released in April of 2017, net of settlement of any indemnity claims and expenses related

to the transaction. If the funds held in escrow for this transaction are released in full, we would receive \$234,336 and realize a gain of \$117,464. At September 30, 2016, and December 31, 2015, there were funds held in escrow fair valued at \$0 and \$63,428, respectively, relating to the sale of the Molecular Imprints' non-semiconductor business to Magic Leap, Inc. On May 18, 2016, the Company received proceeds of \$130,522, following the expiration of the one-year escrow period established at the closing of the transaction.

Receivable From Sale of Investments. At September 30, 2016, we had a receivable totaling \$53,162 from the sale of our publicly traded shares of OpGen, Inc. and Champions Oncology, Inc., which settled on October 3, and October 4, 2016.

Prepaid Expenses. We include prepaid insurance premiums and deferred financing charges in "Prepaid expenses." Prepaid insurance premiums are recognized over the term of the insurance contract and are included in "Insurance expense" in the Consolidated Statements of Operations. Deferred financing charges consist of fees and expenses paid in connection with the closing of loan facilities and are capitalized at the time of payment. Deferred financing charges are amortized over the term of the Loan

Facility discussed in "Note 5. Debt." Amortization of the financing charges is included in "Interest and other debt expenses" in the Consolidated Statements of Operations.

Property and Equipment. Property and equipment are included in "Other assets" and are carried at \$147,404 and \$180,089 at September 30, 2016, and December 31, 2015, respectively, representing cost, less accumulated depreciation of \$424,657 and \$445,476, respectively. Depreciation is provided using the straight-line method over the estimated useful lives of the property and equipment. We estimate the useful lives to be five to ten years for furniture and fixtures, three years for computer equipment, and the lesser of ten years or the remaining life of the lease for leasehold improvements. Substantially all of our fixed assets are pledged as collateral under the Company's four-year \$20,000,000 Multi-Draw Term Loan Facility Credit Agreement, by and among the Company, as borrower, Orix Corporate Capital, Inc., as administrative agent and lender and the other lenders party thereto from time to time (the "Loan Facility").

Post-Retirement Plan Liabilities. The Company provides a Retiree Medical Benefit Plan for employees who meet certain eligibility requirements. Until it was terminated on May 5, 2011, the Company also provided an Executive Mandatory Retirement Benefit Plan for certain individuals employed by us in a bona fide executive or high policy-making position. The net periodic post-retirement benefit cost for the year includes service cost for the year and interest on the accumulated post-retirement benefit obligation. Unrecognized actuarial gains and losses are recognized as net periodic benefit cost pursuant to the Company's historical accounting policy. The impact of plan amendments is amortized over the employee's average service period as a reduction of net periodic benefit cost. Unamortized plan amendments are included in "Accumulated other comprehensive income" in the Consolidated Statements of Assets and Liabilities.

Interest Income Recognition. Interest income, including amortization of premium and accretion of discount, is recorded on an accrual basis. When accrued interest is determined not to be recoverable, the Company ceases accruing interest and writes off any previously accrued interest. Securities are deemed to be non-income producing if investments have not paid dividends or interest within the last 12 months. These write-offs are reversed through interest income. During the three months and nine months ended September 30, 2016, the Company earned \$117,056 and \$255,653, respectively, in interest on subordinated secured debt, non-convertible promissory notes, senior secured debt and interest-bearing accounts. During the three months and nine months ended September 30, 2015, the Company earned \$46,070 and \$158,559, respectively, in interest on senior secured debt, subordinated secured debt, non-convertible promissory notes and interest-bearing accounts. During the three months and nine months ended September 30, 2016, the Company recorded, on a net basis, \$97,871 and \$306,947, respectively, of bridge note interest. During the three months and nine months ended September 30, 2015, the Company recorded, on a net basis, \$82,959 and \$341,949, respectively, of bridge note interest. The total for the nine months ended September 30, 2015, included a partial write-off of previously accrued bridge note interest of \$1,427.

Yield-Enhancing Fees on Debt Securities. Yield-enhancing fees received in connection with our non-convertible debt investments are deferred. The unearned fee income is accreted into income based on the effective interest method over the life of the investment. For the three months and nine months ended September 30, 2016, total yield-enhancing fees accreted into investment income were \$35,975, and \$80,533, respectively. For the three months and nine months ended September 30, 2015, total yield-enhancing fees accreted into investment income were \$44,014 and \$90,062, respectively.

Fees for Providing Managerial Assistance to Portfolio Companies. For the three months and nine months ended September 30, 2016, the Company earned income of \$315,250 and \$685,103, respectively, owing to certain of its employees providing managerial assistance to certain portfolio companies, primarily from Interome, Inc., totaling \$300,000 and \$600,000, respectively, for the three months and nine months ended September 30, 2016. Fees were also received from certain other portfolio companies, namely Adesto Technologies Corporation, OpGen, Inc., TARA

Biosystems, Inc., Fleet Health Alliance, LLC, and Muses Labs, Inc., during 2016. For the three months and nine months ended September 30, 2015, the Company earned income of \$71,359 and \$84,859, respectively, owing to certain of its employees providing managerial assistance to certain of its portfolio companies.

Stock-Based Compensation. The Company has a stock-based employee compensation plan. The Company accounts for the Amended and Restated Harris & Harris Group, Inc. 2012 Equity Incentive Plan (the "Stock Plan") by determining the fair value of all share-based payments to employees, including the fair value of grants of employee stock options and restricted stock awards, and records these amounts as an expense in the Consolidated Statements of Operations over the vesting period with a corresponding increase (decrease) to our additional paid-in capital. For the three months and nine months ended September 30, 2016, and September 30, 2015, the increase (decrease) to our operating expenses was offset by the increase (decrease) to our additional paid-in capital, resulting in no net impact to our net asset value. Additionally, the Company does not record the potential tax benefits associated with the expensing of stock options or restricted stock because the Company currently intends to qualify as a regulated investment company ("RIC") under Subchapter M of the Code, and the deduction attributable to such expensing, therefore, is unlikely to provide any additional tax savings. The amount of non-cash, stock-based compensation expense recognized

in the Consolidated Statements of Operations is based on the fair value of the awards the Company expects to vest, recognized over the vesting period on a straight-line basis for each award, and adjusted for actual awards vested and pre-vesting forfeitures. The forfeiture rate is estimated at the time of grant and revised, if necessary, in subsequent periods if the actual forfeiture rate differs from the estimated rate and is accounted for in the current period and prospectively. See "Note 9. Stock-Based Compensation" for further discussion.

Rent expense. Our lease at 1450 Broadway, New York, New York, commenced on January 21, 2010. The lease expires on December 31, 2019. The base rent is \$36 per square foot with a 2.5 percent increase per year over the 10 years of the lease, subject to a full abatement of rent for four months and a rent credit for six months throughout the lease term. We apply these rent abatements, credits, escalations and landlord payments on a straight-line basis in the determination of rent expense over the lease term. Certain leasehold improvements were also paid for on our behalf by the landlord, the cost of which is accounted for as property and equipment and "Deferred rent" in the accompanying Consolidated Statements of Assets and Liabilities. These leasehold improvements are depreciated over the lease term. We also leased office space in California until December 31, 2015.

Realized Gain or Loss and Unrealized Appreciation or Depreciation of Portfolio Investments. Realized gain or loss is recognized when an investment is disposed of and is computed as the difference between the Company's cost basis in the investment at the disposition date and the net proceeds received from such disposition. Realized gains and losses on investment transactions are determined by specific identification. Unrealized appreciation or depreciation is computed as the difference between the fair value of the investment and the cost basis of such investment.

Income Taxes. As we currently intend to continue to qualify as a RIC under Subchapter M of the Code and distribute any ordinary income, the Company does not accrue for income taxes. The Company has capital loss carryforwards that can be used to offset net realized capital gains. The Company recognizes interest and penalties in income tax expense. We pay federal, state and local income taxes on behalf of our wholly owned subsidiary, Ventures, which is a C corporation. See "Note 10. Income Taxes" for further discussion.

Foreign Currency Translation. The accounting records of the Company are maintained in U.S. dollars. All assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the rate of exchange of such currencies against U.S. dollars on the date of valuation. The Company does not isolate the portion of the results of operations that arises from changes in foreign currency rates on investments held on its Consolidated Statements of Operations.

Securities Transactions. Securities transactions are accounted for on the date the transaction for the purchase or sale of the securities is entered into by the Company (i.e., trade date). Securities transactions outside conventional channels, such as private transactions, are recorded as of the date the Company obtains the right to demand the securities purchased or to collect the proceeds from a sale and incurs the obligation to pay for the securities purchased or to deliver the securities sold.

Concentration of Credit Risk. The Company places its cash and cash equivalents with financial institutions and, at times, cash held in depository accounts may exceed the Federal Deposit Insurance Corporation's insured limit and is subject to the credit risk of such institutions to the extent it exceeds such limit.

Concentration of Investor Risk. As of September 30, 2016, two investors, Ariel Investments and Granahan Investment Management, owned approximately 13.6 percent and 5.1 percent, respectively, of our outstanding shares.

Recent Accounting Pronouncements. On August 26, 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments." This ASU is intended to reduce diversity in practice in how certain

transactions are classified in the statement of cash flows. The guidance will affect how distributions received from equity method investees will be reported. The guidance will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017, with early adoption permitted. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On June 16, 2016, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." This ASU is intended to introduce new guidance for the accounting for credit losses on instruments within scope based on an estimate of current expected credit losses. The guidance will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019, with early adoption permitted. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On March 30, 2016, the FASB issued ASU 2016-09, "Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting." This ASU is intended to simplify several aspects of the accounting for share-based payment award transactions. The guidance will be effective for fiscal years, and interim periods within those fiscal years,

beginning after December 15, 2016, with early adoption permitted. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On March 15, 2016, the FASB issued ASU 2016-07, "Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting." This ASU eliminates the requirement to apply the equity method of accounting retrospectively when a reporting entity obtains significant influence over a previously held investment. This ASU should be applied prospectively for investments that qualify for the equity method of accounting after the effective date. The guidance will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016, with early adoption permitted. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On February 25, 2016, the FASB issued ASU 2016-02, "Leases" (Topic 842). This ASU revises the accounting for leases. Under the new guidance, lessees are required to recognize a right-of-use asset and a lease liability for all leases. The new guidance will continue to classify leases as either financing or operating, with classification affecting the pattern of expense recognition. The accounting applied by a lessor under the new guidance will be substantially equivalent to current lease accounting guidance. This ASU is required to be applied with a modified retrospective approach to each prior reporting period presented and provides for certain practical expedients. The guidance will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018, with early adoption permitted. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On January 5, 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." This ASU affects the accounting for equity investments, requiring that all equity investments in unconsolidated entities (other than those accounted for using the equity method of accounting) be measured at fair value through earnings. There will no longer be an available-for-sale classification (changes in fair value reported in other comprehensive income) for equity securities with readily determinable fair values. The guidance will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On April 7, 2015, the FASB issued ASU 2015-03, "Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." This ASU requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of related debt liability, consistent with debt discounts. Under the former guidance, such costs were recorded as an asset. On August 18, 2015, the FASB clarified that this ASU does not apply to line of credit arrangements. Accordingly, companies may continue to present debt issuance costs for line of credit arrangements as an asset and subsequently amortize the deferred debt costs ratably over the term of the arrangement. This guidance was adopted on January 1, 2016. Management determined that this ASU does not have any impact on the Company's Consolidated Financial Statements as the Company does not issue debt as part of its business operations.

On February 18, 2015, the FASB issued ASU 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis." This ASU amends the current consolidation guidance. The amendments affect both the variable interest entity and voting interest entity consolidation models. This guidance was adopted on July 1, 2016. Management determined that this ASU does not have any impact on the Company's Consolidated Financial Statements. The Company does not hold any variable interests and is, therefore, not required to consolidate using the consolidation models defined in this ASU.

On August 27, 2014, the FASB issued ASU 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern." This ASU

requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued and provides guidance on determining when and how to disclose going concern uncertainties in the financial statements. Certain disclosures will be required if conditions give rise to substantial doubt about an entity's ability to continue as a going concern. This guidance will be effective for fiscal years, and interim periods within those fiscal years, ending after December 15, 2016, with early adoption permitted. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

On June 19, 2014, the FASB issued ASU 2014-12, "Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could be Achieved After the Requisite Service Period." This ASU provides more explicit guidance for treating share-based payment awards that require a specific performance target that affects vesting and that could be achieved after the requisite service period as a performance condition. This guidance was adopted on January 1, 2016. Management determined that this ASU does not have any impact on the Company's Consolidated Financial Statements as the Company does not have share-based payment awards that require a specific performance target that affects vesting and that could be achieved after the requisite service period as a performance condition.

On May 28, 2014, the FASB and the International Accounting Standards Board ("IASB") issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)," their final converged standard on revenue recognition. This ASU provides a single, comprehensive revenue recognition model for all contracts with customers and supersedes current revenue recognition guidance. The guidance contains principles that an entity will apply to determine the measurement of revenue and timing of when it is recognized. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. This ASU also includes enhanced disclosures that are significantly more comprehensive than those in existing revenue standards. ASU 2014-09 was to be effective for the Company beginning on January 1, 2017, but, on July 9, 2015, the FASB voted to approve a one-year deferral of the effective date. This new guidance is now expected to be effective for the Company beginning on January 1, 2018. The guidance allows for either "full retrospective" adoption, meaning the standard is applied to all of the periods presented, or "modified retrospective" adoption, meaning the standard is applied only to the most current period presented in the financial statements. The impact of this ASU on the Company's Consolidated Financial Statements is currently being evaluated.

NOTE 4. BUSINESS RISKS AND UNCERTAINTIES

We invest primarily in privately held companies, the securities of which are inherently illiquid. We also have investments in small publicly traded companies. Although these companies are publicly traded, their stock may not trade at high volumes, which may restrict our ability to sell our positions and prices can be volatile. We may also be subject to restrictions on transfer and/or other lock-up provisions after these companies initially go public. These privately held and publicly traded businesses tend to not have attained profitability, and many of these businesses also lack management depth and have limited or no history of operations. Because of the speculative nature of our investments and the lack of a liquid market for and restrictions on transfers of privately held investments, there is greater risk of loss relative to traditional marketable investment securities.

We do not choose investments based on a strategy of diversification. We also do not rebalance the portfolio should one of our portfolio companies increase in value substantially relative to the rest of the portfolio. Therefore, the value of our portfolio may be more vulnerable to microeconomic events affecting a single sector, industry or portfolio company and to general macroeconomic events that may be unrelated to our portfolio companies. These factors may subject the value of our portfolio to greater volatility than a company that follows a diversification strategy. As of September 30, 2016, and December 31, 2015, our largest 10 investments by value accounted for approximately 80 percent and 79 percent, respectively, of the value of our equity-focused portfolio. Our largest three investments, by value, D-Wave Systems, Inc., Metabolon, Inc., and AgBiome, LLC accounted for approximately 18 percent, 17 percent and 12 percent, respectively, of our equity-focused portfolio at September 30, 2016. Our largest three investments, by value, Adesto Technologies Corporation, Metabolon, Inc., and HZO, Inc, accounted for approximately 19 percent, 18 percent and 10 percent, respectively, of our equity-focused portfolio at December 31, 2015. D-Wave Systems, Inc., Metabolon, Inc., AgBiome, LLC, and HZO, Inc., are privately held portfolio companies. Adesto Technologies Corporation is a publicly traded portfolio company.

Approximately 90 percent of the portion of our equity-focused portfolio that was fair valued was comprised of securities of 26 privately held companies, as well as the warrants of publicly traded Champions Oncology, Inc., OpGen, Inc., and Enumeral Biomedical Holdings, Inc. Approximately 0.4 percent of the portion of our equity-focused portfolio that was valued according to the equity method was comprised of two privately held companies. Because there is typically no public or readily ascertainable market for our interests in the small privately held companies in which we invest, the valuation of the securities in that portion of our portfolio is determined in good faith by our Valuation Committee, which is comprised of all of the independent members of our Board of Directors. The values are determined in accordance with our Valuation Procedures and are subject to significant estimates and judgments. The fair value of the securities in our portfolio may differ significantly from the values that would be placed on these

securities if a ready market for the securities existed. Any changes in valuation are recorded in our Consolidated Statements of Operations as "Net increase in unrealized depreciation on investments." Changes in valuation of any of our investments in privately held companies from one period to another may be significant.

NOTE 5. DEBT

The Company has a Loan Facility with Orix Corporate Capital, Inc., which may be used to fund investments in portfolio companies. The Loan Facility, among other things, matures on September 30, 2017, and bears interest at 10 percent per annum in cash. The borrowing period for the Loan Facility ended on September 30, 2016. The Company has the option to have interest accrue at a rate of 13.5 percent per annum if the Company decides not to pay interest in cash monthly. The Company currently pays interest in cash on its outstanding borrowings. The Loan Facility also requires payment of a draw fee on each borrowing equal to 1.0 percent of such borrowing and an unused commitment fee of 1.0 percent per annum. Fee payments under the Loan Facility are made quarterly in arrears. The Company may prepay the loans or reduce the aggregate commitments under the Loan Facility at any time prior to the maturity date, as long as certain conditions are met, including payment of required prepayment or termination fees. The Loan Facility is secured by all of the assets of the Company and its wholly owned subsidiaries, subject to certain customary exclusions. The Loan Facility contains certain affirmative and negative covenants, including without limitation: (a) maintenance of certain minimum liquidity requirements; (b) maintenance of an eligible asset leverage ratio of not less than 4.0:1.0; (c) limitations on liens; (d) limitations on the incurrence of additional indebtedness; and (e) limitations on structural changes, mergers and disposition of assets (other than in the normal course of our business activities).

At September 30, 2016, and December 31, 2015, the Company had outstanding debt of \$5,000,000. The weighted average annualized interest rate for each of the three months and nine months ended September 30, 2016, was 10 percent, exclusive of amortization of closing fees and other expenses. The weighted average annual interest rate for the year ended December 31, 2015, was 10 percent. The weighted average debt outstanding for the three months and nine months ended September 30, 2016, was \$5,000,000. The weighted average debt outstanding for the year ended December 31, 2015, was \$5,000,000. The remaining capacity under the Loan Facility was \$0 at September 30, 2016. Unamortized fees and expenses of \$174,880 and \$306,040 related to establishing the Loan Facility are included as "Prepaid expenses" in the Consolidated Statements of Assets and Liabilities as of September 30, 2016, and December 31, 2015, respectively. These amounts are amortized over the term of the Loan Facility, and \$131,160 was amortized in the nine months ended September 30, 2016, and in the nine months ended September 30, 2015. The Company paid \$38,333 and \$114,167 in non-utilization fees during the three months and nine months ended September 30, 2016, respectively. The Company paid \$38,333 and \$126,250 in non-utilization fees during the three months and nine months ended September 30, 2015, respectively. The Company paid \$127,778 and \$380,556 in interest expense for the three months and nine months ended September 30, 2016, respectively. The Company paid \$127,778 and \$254,167 in interest expense for the three months and nine months ended September 30, 2015. During the nine months ended September 30, 2016, and September 30, 2015, the Company paid \$0 and \$50,000, respectively, in utilization fees associated with a drawdown of the Loan Facility. At September 30, 2016, the Company was in compliance with all covenants required by the Loan Facility.

NOTE 6. FAIR VALUE OF INVESTMENTS

At September 30, 2016, our financial assets valued at fair value were categorized as follows in the fair value hierarchy:

Description	Fair Value Measurement at Reporting Date Using:			
	September 30, 2016	Unadjusted Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Privately Held Portfolio Companies:				
Preferred Stock	\$47,805,431	\$0	\$0	\$47,805,431
Bridge Notes	6,378,368	0	0	6,378,368
Warrants	137,180	0	0	137,180
Rights to Milestone Payments	3,442,745	0	0	3,442,745
Common Stock	2,202,449	0	0	2,202,449
Senior Secured Debt	1,424,750	0	0	1,424,750
Publicly Traded Portfolio Companies:				
Common Stock	\$6,133,535	\$6,133,535	\$0	\$0
Warrants	220,885	0	118,197	102,688
Total Investments:	\$67,745,343	\$6,133,535	\$118,197	\$61,493,611
Funds Held in Escrow From Sales of Investments:	\$116,872	\$0	\$0	\$116,872
Total Financial Assets:	\$67,862,215	\$6,133,535	\$118,197	\$61,610,483

Financial Instruments Disclosed, but not Carried, at Fair Value

The following table presents the carrying value and the fair value of the Company's financial liabilities disclosed, but not carried, at fair value as of September 30, 2016, and the level of each financial liability within the fair value hierarchy:

Description	Carrying Value	Fair Value	Level 1	Level 2	Level 3
Term Loan Credit Facility ⁽¹⁾	\$5,000,000	\$5,000,000	\$0	\$0	\$5,000,000
Total	\$5,000,000	\$5,000,000	\$0	\$0	\$5,000,000

⁽¹⁾Fair value of the Term Loan Credit Facility is equal to the carrying amount of this credit facility.

Significant Unobservable Inputs

The table below presents the valuation technique and quantitative information about the significant unobservable inputs utilized by the Company in the fair value measurements of Level 3 assets. Unobservable inputs are those inputs for which little or no market data exists and, therefore, require an entity to develop its own assumptions.

Description	Fair Value at September 30, 2016	Valuation Technique(s)	Unobservable Input(s)	Range(s) (Weighted Average (a))
Preferred Stock	\$13,549,791	Hybrid Approach	Price Per Share	\$2.26 - \$2.62 (\$2.56)
			Non-Performance Risk	0.0% (0.0%)
			Volatility	51.5% - 96.6% (58.4%)
			Time to Exit / Cash Flows (Years)	5.0 (5.00)
Preferred Stock	17,217,614	Income Approach	Probability of Achieving Independent Milestones	12.5% - 100.0% (53.6%)
			Probability of Achieving Dependent Milestones	32.0% - 83.0% (63.2%)
			Price Per Share	\$0.30 - \$3.11 (\$2.05)
			Non-Performance Risk	-8.6% - 24.0% (19.1%)
			Volatility	50.1% - 124.6% (76.8%)
			Time to Exit / Cash Flows (Years)	0.3 - 10.8 (5.14)
Preferred Stock	17,038,026	Market Approach	Price Per Share	\$2.76 (\$2.76)
			Volatility	49.4% - 56.1% (55.1%)
			Revenue Multiples	4.6 - 4.9 (4.84)
			Time to Exit (Years)	0.2 - 5.0 (2.0)
Preferred Stock	664,693	Income Approach	Discount for Lack of Marketability	23.5% - 25.8% (25.5%)
Bridge Notes	5,713,675	Market Approach	Estimated Value to Cost Ratio at Payout	0.23 - 1.00 (0.64)
Bridge Notes		Market Approach	Estimated Value to Cost Ratio at Conversion	0.53 - 1.58 (1.11)
Common Stock	717,186	Hybrid Approach	Price Per Share	\$2.26 (\$2.26)
			Volatility	96.6% (96.6%)
			Non-Performance Risk	0.0% (0.0%)
			Time to Exit (Years)	5.0 (5.00)
Common Stock	921,647	Income Approach	Non-Performance Risk	0.0% (0.0%)
			Volatility	124.6% (124.6%)
			Time to Exit (Years)	6.0 (6.0)
			Price Per Share	\$0.50 (\$0.50)
Common Stock	563,616	Market Approach	Volatility	56.1% (56.1%)

			Probability of Achieving Independent Milestones	50% (50%)
Funds Held in Escrow from Sales of Investments	116,872	Income Approach	Time to Cash Flows (Years)	0.5 (0.5)
Total	\$61,610,483			

(a) Weighted average based on fair value at September 30, 2016.

Valuation Methodologies and Inputs for Level 3 Assets

The following sections describe the valuation techniques and significant unobservable inputs used to measure Level 3 assets.

Preferred Stock, Bridge Notes and Common Stock

Preferred stock, bridge notes and common stock are valued by either a market, income or hybrid approach using internal models with inputs, most of which are not market observable. Common inputs for valuing Level 3 preferred stock, bridge note and private common stock investments include prices from recently executed private transactions in a company's securities or unconditional firm offers, revenue multiples of comparable publicly traded companies, merger and acquisition ("M&A") transactions consummated by comparable companies, discounts for lack of marketability, rights and preferences of the class of securities we own as compared with other classes of securities the portfolio company has issued, particularly related to potential liquidity scenarios of an initial public offering ("IPO") or an acquisition transaction, estimated time to exit, volatilities of comparable publicly traded companies and management's best estimate of risk attributable to non-performance risk. We employ option pricing models as a primary methodology to derive value for companies that have consummated arm's length financings within one year of the date of valuation. We use alternative methods such as multiples to revenues and/or the present value of future cash flows to derive value for certain companies that have not had a recent arm's length financing or where option pricing models yield results that differ substantially from values derived by other market-based approaches. We define non-performance risk as the risk that the price per share (or implied valuation of a portfolio company) or the effective yield of a debt security of a portfolio company, as applicable, does not appropriately represent the risk that a portfolio company with negative cash flow will be: (a) unable to raise capital, will need to be shut down and will not return our invested capital; or (b) able to raise capital, but at a valuation significantly lower than the implied post-money valuation of the last round of financing. We also include discount factors for adjustments to transaction/sale values and discount ratios for discounted cash flows in our definition of non-performance risk. Increases in non-performance risk are reflected by negative percentages. Decreases in non-performance risk are reflected by positive percentages. We assess non-performance risk for each private portfolio company quarterly. Our assessment of non-performance risk typically includes an evaluation of the financial condition and operating results of the company, the company's

progress towards milestones, and the long-term potential of the business and technology of the company and how this potential may or may not affect the value of the shares owned by us. An increase to the non-performance risk or a decrease in the private offering price of a future round of financing from that of the most recent round would result in a lower fair value measurement and/or a change in the distribution of value among the classes of securities we own. An increase in the volatility assumption generally increases the enterprise value calculated in an option pricing model. An increase in the time to exit assumption also generally increases the enterprise value calculated in an option pricing model. Variations in the expected time to exit or expected volatility assumptions have a significant impact on fair value. We increased the time to exit used to derive value beginning with

the second quarter of 2016, versus prior quarters based on an updated analysis of our weighted-average holding periods. We may also consider changes in market values for sets of comparable companies when recent private transaction information is not available.

Option pricing models place a high weighting on liquidation preferences, which means that small differences in how the preferences are structured can have a material effect on the fair value of our securities at the time of valuation and also on future valuations should additional rounds of financing occur with senior preferences. As such, valuations calculated by option pricing models may not increase if 1) rounds of financing occur at higher prices per share, 2) liquidation preferences include multiples on investment, 3) the amount of invested capital is small and/or 4) liquidation preferences are senior to prior rounds of financing.

Bridge notes commonly contain terms that provide for the conversion of the full amount of principal, and sometimes interest, into shares of preferred stock at a defined price per share and/or the price per share of the next round of financing. The use of a discount for non-performance risk in the valuation of bridge notes would indicate the potential for conversion of only a portion of the principal, plus interest when applicable, into shares of preferred stock or the potential that a conversion event will not occur and that the likely outcome of a liquidation of assets would result in payment of less than the remaining principal outstanding of the note. Non-performance risk is not considered a significant input for bridge notes as of September 30, 2016. An increase in non-performance risk would result in a lower fair value measurement. Conversely, we may acquire or hold notes that are pari passu with other notes but have different conversion terms. In such cases, we may apply an adjustment factor to reflect the differences in the terms with respect to values.

Warrants and Options

We use the Black-Scholes-Merton option-pricing model to determine the fair value of warrants and options held in our portfolio unless there is a publicly traded active market for such warrants and options or another indication of value such as a sale of the portfolio company. Option pricing models, including the Black-Scholes-Merton model, require the use of subjective input assumptions, including expected volatility, expected life, expected dividend rate, and expected risk-free rate of return. In the Black-Scholes-Merton model, variations in the expected volatility or expected term assumptions have a significant impact on fair value. Because certain securities underlying the warrants in our portfolio are not publicly traded, many of the required input assumptions are more difficult to estimate than they would be if a public market for the underlying securities existed.

An input to the Black-Scholes-Merton option-pricing model is the value per share of the type of stock for which the warrant is exercisable as of the date of valuation. This input is derived according to the methodologies discussed in "Preferred Stock, Bridge Notes and Common Stock."

Rights to Milestone Payments

Rights to milestone payments are valued using a probability-weighted discounted cash flow model. As part of Amgen Inc.'s acquisition of our former portfolio company, BioVex Group, Inc., we are entitled to potential future milestone payments based upon the achievement of certain regulatory and sales milestones. We are also entitled to future milestone payments from Laird Technologies Inc.'s acquisition of our former portfolio company, Nextreme Thermal Solutions, Inc., and from Canon, Inc.'s acquisition of Molecular Imprints, Inc. We assign probabilities to the achievements of the various milestones. Milestones identified as independent milestones can be achieved irrespective of the achievement of other contractual milestones. Dependent milestones are those that can only be achieved after another, or series of other, milestones are achieved. The interest rates used in these models are observable inputs from

sources such as the published interest rates for corporate bonds of the acquiring or comparable companies.

Subordinated Secured Debt and Senior Secured Debt

We invest in non-convertible debt investments through subordinated secured debt and senior secured debt. We value these securities using an income approach. The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present value amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts. Common inputs for valuing Level 3 debt investments include: the effective yield of the debt investment or, in the case where we have received warrant coverage, the warrant-adjusted effective yield of the security, adjustments for changes in the yields of comparable publicly traded high-yield debt funds and risk-free interest rates and an assessment of non-performance risk. For non-convertible debt investments, an increase in yields would result in a lower fair value measurement. Furthermore, yields would decrease, and value would increase, if the company is exceeding targets and risk has been substantially reduced from the level of risk that existed at the time of investment. Yields would increase, and values would

decrease, if the company is failing to meet its targets and risk has been increased from the level of risk that existed at the time of investment.

The following chart shows the components of change in the financial assets categorized as Level 3 for the three months ended September 30, 2016.

	Beginning Balance 7/1/2016	Total Realized (Losses) Gains Included in Changes in Net Assets	Transfers	Total Unrealized (Depreciation) Appreciation Included in Changes in Net Assets	Investments in Portfolio Companies, Interest on Bridge Notes and Amortization of Loan Fees, Net	Disposals and Settlements	Ending Balance 9/30/2016	Amount of Total (Depreciation) Appreciation for the Period Included in Changes in Net Assets Attributable to the Change in Unrealized Losses or Gains Relating to Assets Still Held at the Reporting Date
Preferred Stock	\$52,442,790	\$(2,665,608) ¹	\$250,000 ³	\$(854,869)	\$750,000	\$(2,116,882)	\$47,805,431	\$(3,098,476)

¹Represents gross realized losses of \$7,207,390 net of gross realized gains of \$302,325.

²Represents a gross realized loss.

³Represents a gross realized gain.

⁴Transfers among asset classes are owing to conversions or exercises at financing events. These do not represent transfers in or out of Level 3.

⁵There was a \$101,431 transfer from "Warrants" of OpGen, Inc. from Level 3 investments to a Level 2 investment.

⁶There was a \$29,732 transfer from "OTC Traded Common Stock" of Enumeral Biomedical Holdings, Inc. from Level 3 investments to a Level 1 investment.

We elected to use the beginning of period values to recognize transfers in and out of Level 3 investments. For the nine months ended September 30, 2016, there were transfers out of Level 3 investments totaling \$131,163. A total of 129,327 of our shares of Enumeral Biomedical Holdings, Inc., transferred from Level 3 investments to Level 1 investments owing to the use of their unadjusted closing share price on their respective stock exchanges on September 30, 2016, to derive their value. Transfers from Level 3 investments to Level 2 investments occur when observable inputs replace unobservable inputs as the primary inputs used to derive value.

At December 31, 2015, our financial assets valued at fair value were categorized as follows in the fair value hierarchy:

Description	Fair Value Measurement at Reporting Date Using:			
	December 31, 2015	Unadjusted Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Privately Held Portfolio Companies:				
Preferred Stock	\$48,568,205	\$0	\$0	\$48,568,205
Bridge Notes	4,275,728	0	0	4,275,728
Warrants	480,025	0	0	480,025
Rights to Milestone Payments	3,362,051	0	0	3,362,051

We elected to use the beginning of period values to recognize transfers in and out of Level 2 and Level 3 investments. For the three months ended September 30, 2015, there were transfers out of Level 3 investments totaling \$7,496,886. Certain of our shares of Enumeral Biomedical Holdings, Inc., and OpGen, Inc., transferred from Level 3 investments owing to the use of their unadjusted closing share price on their respective stock exchanges on September 30, 2015, to

derive their value.

¹ There was a \$126,972 transfer from "Preferred Stock" into Funds Held in Escrow From Sales of Investments" owing to the sale of Molecular Imprints, Inc.

For the nine months ended September 30, 2015, there were transfers out of Level 3 investments totaling \$9,829,170. Our shares of Accelerator IV-New York Corporation transferred from a Level 3 investment owing to its qualification as an equity method investment. Certain of our shares of Enumeral Biomedical Holdings, Inc., and OpGen, Inc.,

transferred from Level 3 investments owing to the use of their unadjusted closing share price on their respective stock exchanges on September 30, 2015, to derive their value.

NOTE 7. DERIVATIVES

At September 30, 2016, and December 31, 2015, we had rights to milestone payments from Amgen, Inc.'s acquisition of our former portfolio company, BioVex Group, Inc. These milestone payments were fair valued at \$2,975,353 and \$2,900,232 as of September 30, 2016, and December 31, 2015, respectively. At September 30, 2016, and December 31, 2015, we had rights to milestone payments from Laird Technologies, Inc.'s acquisition of our former portfolio company, Nextreme Thermal Solutions, Inc. These milestone payments were fair valued at \$0 as of September 30, 2016, and December 31, 2015. At September 30, 2016, and December 31, 2015, we had rights to milestone payments from Canon, Inc.'s acquisition of our former portfolio company, Molecular Imprints, Inc. These milestone payments were fair valued at \$467,392 and \$461,819 as of September 30, 2016, and December 31, 2015 respectively. These milestone payments are contingent upon certain milestones being achieved in the future. The Company is not subject to master-netting arrangements.

The following tables present the value of derivatives held at September 30, 2016, and the effect of derivatives held during the three months and nine months ended September 30, 2016, along with the respective location in the financial statements.

Statements of Assets and Liabilities:

NOTE 8. EMPLOYEE BENEFITS

We administer a plan to provide medical and dental insurance for retirees and their spouses who, at the time of their retirement, have 10 years of service with us and have attained 50 years of age or have attained 45 years of age and have 15 years of service with us (the "Medical Benefit Retirement Plan"). On March 7, 2013, the Board of Directors amended the Medical Benefit Retirement Plan. The amendment limits the medical benefit to \$10,000 per year for a period of ten years. The amendment does not affect benefits accrued by former employees or one current employee who is grandfathered under the former terms of the plan.

Our accumulated postretirement benefit obligation was re-measured as of the plan amendment date, which resulted in a \$1,101,338 decrease in our liability. A deferred gain of \$1,101,338 owing to this amendment was included in "Accumulated other comprehensive income" as of March 31, 2013. This amount is being amortized over a service period of 5.27 years. During the three months and nine months ended September 30, 2016, a total of \$52,246 and \$156,738, respectively, was amortized and included as a reduction of "Salaries, benefits and stock-based compensation" on our Consolidated Statements of Operations. All of the amounts reported in the Consolidated Statements of Comprehensive Loss relate to the plan amendment.

NOTE 9. STOCK-BASED COMPENSATION

The Company maintains the Stock Plan, which provides for the grant of equity-based awards of stock options to our officers and employees and restricted stock to our officers, employees and non-employee directors subject to compliance with the 1940 Act and an exemptive order granted on April 3, 2012, by the SEC permitting us to award shares of restricted stock (the "Exemptive Order").

Stock Option Awards

During the nine months ended September 30, 2016, and the year ended December 31, 2015, the Compensation Committee of the Board of Directors of the Company did not grant any stock options. The Compensation Committee does not plan to grant new stock options to employees.

The stock options outstanding are fully vested and, therefore, fully expensed.

No options were exercised during the nine months ended September 30, 2016, and September 30, 2015. Upon exercise, shares would be issued from our previously authorized but unissued shares.

A summary of the changes in outstanding stock options for the nine months ended September 30, 2016, is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Grant Date Fair Value	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Options Outstanding at January 1, 2016	1,402,912	\$ 9.85	\$ 6.34	0.70	\$ 0
Granted	0	0	0	0	
Exercised	0	0	0	0	
Forfeited or Expired	(1,205,060)	10.34	6.85	0	
Options Outstanding and Exercisable at September 30, 2016	197,852	\$ 6.86	\$ 3.25	1.26	\$ 0

The aggregate intrinsic value in the table above with respect to outstanding options is calculated as the difference between the Company's closing stock price of \$1.39 on September 30, 2016, and the exercise price, multiplied by the number of in-the-money options. This amount represents the total pre-tax intrinsic value that would have been received by the option holders had all option holders exercised their awards on September 30, 2016.

Restricted Stock

On June 7, 2016, an additional 12,000 shares of restricted stock were granted to the non-employee members of the Board of Directors.

For the three months and nine months ended September 30, 2016, we recognized \$112,950 and \$47,027, respectively, of compensation expense related to restricted stock awards. Our compensation expense of \$47,027 for the nine months ended September 30, 2016, includes \$421,591 of compensation expense, net of a reversal of previously recognized compensation expense of \$374,564 owing to pre-vested forfeitures. As of September 30, 2016, there was unrecognized compensation cost of \$442,340 related to restricted stock awards. This cost is expected to be recognized over a remaining weighted average period of approximately 10 months.

Non-vested restricted stock awards as of September 30, 2016, and changes during the nine months ended September 30, 2016, were as follows:

	Shares	Weighted-Average Grant Date Fair Value Per Share
Outstanding at January 1, 2016	1,062,329	\$ 2.66
Granted	12,000	1.74
Vested based on service	(35,074)	3.31
Shares withheld related to net share settlement of restricted stock	(13,860)	3.37
Forfeited	(283,370)	2.65
Outstanding at September 30, 2016	742,025	\$ 2.61

Non-vested restricted stock awards as of September 30, 2015, and changes during the nine months ended September 30, 2015, were as follows:

	Shares	Weighted-Average Grant Date Fair Value Per Share
Outstanding at January 1, 2015	1,165,495	\$ 2.73
Granted	10,000	2.72
Vested based on service	(40,842)	3.39
Shares withheld related to net share settlement of restricted stock	(17,325)	3.37
Forfeited	(3,999)	3.44
Outstanding at September 30, 2015	1,113,329	\$ 2.69

Under net settlement procedures currently applicable to our outstanding restricted stock awards for current employees, upon each settlement date, restricted stock awards are withheld to cover the required withholding tax, which is based on the value of the restricted stock award on the settlement date as determined by the closing price of our common stock on the vesting date. The remaining amounts are delivered to the recipient as shares of our common stock. During the nine months ended September 30, 2016, 39,600 restricted stock awards vested, of which 25,740 restricted stock awards were net settled by withholding 13,860 shares, which represented the employees' minimum statutory obligation for each such employee's applicable income and other employment taxes and remitted cash totaling \$22,315 to the appropriate tax authorities. During the nine months ended September 30, 2015, 58,167 restricted stock awards vested, of which 49,500 restricted stock awards were net settled by withholding 17,325 shares, which represented the employees' minimum statutory obligation for each such employee's applicable income and other employment taxes and remitted cash totaling \$47,644 to the appropriate tax authorities. The amount remitted to the tax authorities for the employees' tax obligation was reflected as a financing activity within our Consolidated Statements of Cash Flows. The shares withheld by us as a result of the net settlement of restricted stock awards are not considered issued and outstanding, thereby reducing our shares outstanding used to calculate net asset value per share.

NOTE 10. INCOME TAXES

We have elected to be treated as a RIC under the Code and operate in a manner so as to qualify for the tax treatment applicable to RICs.

In order to qualify as a RIC, we must, in general, (1) annually, derive at least 90 percent of our gross income from dividends, interest, gains from the sale of securities and similar sources; (2) quarterly, meet certain investment

diversification requirements; and (3) annually, distribute at least 90 percent of our investment company taxable income as a dividend. We may either distribute or retain our net capital gain from investments to the extent they are not offset by capital loss carryforwards, but any net capital gain not distributed will be subject to corporate income tax and the excise tax described below to the extent not offset by the capital loss carryforward. We currently intend to consider designating net capital gains for distribution as "cash

62

dividends," "designated undistributed capital gains" or "deemed dividends" or some combination thereof. We will be subject to a four percent excise tax to the extent we fail to distribute at least 98 percent of our annual net ordinary income and 98.2 percent of our capital gain net income and would be subject to income tax to the extent we fail to distribute 100 percent of our investment company taxable income. As of January 1, 2016, we had capital loss carryforwards of \$5,252,546, which we intend to use to offset current year capital gains, if any. During the nine months ended September 30, 2016, we realized net capital losses of \$10,139,591.

Because of the specialized nature of our investment portfolio, we generally can satisfy the diversification requirements under the Code if we receive a certification from the SEC pursuant to Section 851(e) of the Code that we are "principally engaged in the furnishing of capital to other corporations which are principally engaged in the development or exploitation of inventions, technological improvements, new processes, or products not previously generally available."

Although we received SEC certifications for 1999 to 2015, there can be no assurance that we will receive such certification for 2016 or subsequent years (to the extent we need additional certifications as a result of changes in our portfolio). If we require, but fail to obtain, the SEC certification for a taxable year, we may fail to qualify as a RIC for such year. We also will fail to qualify for favorable RIC tax treatment for a taxable year if we do not satisfy the 90 percent Income Test or Annual Distribution Requirement for such year. In the event we do not satisfy the 90 percent Income Test, the Diversification Tests or the Annual Distribution Requirement for any taxable year, we will be subject to federal tax with respect to all of our taxable income, whether or not distributed. In addition, all our distributions to shareholders in that situation generally will be taxable as ordinary dividends.

Although we currently intend to qualify as a RIC for each taxable year, under certain circumstances we may choose to take action with respect to one or more taxable years to ensure that we would be taxed under Subchapter C of the Code (rather than Subchapter M) for such year or years. Additionally, income from fees and consulting payments generally does not qualify as good RIC income under the 90 percent Income Test. As we generate more income from such payments, it is possible that we may fail to qualify as a RIC for a taxable year owing to an inability to satisfy the 90 percent Income Test. We believe this income will be greater in 2016 than in past years, and there can be no assurances that we will satisfy the 90 percent Income Test in 2016 or qualify as a RIC for such year. Furthermore, our ownership percentages in our portfolio have grown over the last several years, which make it more difficult to pass certain RIC diversification tests when companies in our portfolio are successful and we want to invest more capital in those companies to increase our investment returns. As long as the aggregate values of our non-qualifying assets remain below 50 percent of total assets, we will continue to qualify as a RIC. Rather than selling portfolio companies that are performing well in order to pass our RIC diversification tests, we may opt instead not to qualify as a RIC. We will choose to take such action only if we believe that the result of the action will benefit us and our shareholders.

For the three months ended September 30, 2016, and September 30, 2015, our income tax expense was \$50 and \$376, respectively, in federal, state and local taxes. For the nine months ended September 30, 2016, and September 30, 2015, our income tax expense was \$4,541 and \$2,081, respectively, in federal, state and local taxes. At September 30, 2016, and September 30, 2015, we had \$0 accrued for federal, state and local taxes payable by the Company.

We pay federal, state and local taxes on behalf of Ventures, which is taxed as a C Corporation. For the three months ended September 30, 2016, and September 30, 2015, our income tax expense for Ventures was \$50 and \$325, respectively. For the nine months ended September 30, 2016, and September 30, 2015, our income tax (benefit) expense for Ventures was \$(615) and \$1,125, respectively.

NOTE 11. COMMITMENTS AND CONTINGENCIES

On May 4, 2016, the Company made a \$150,000 investment in AgTech Accelerator Corporation ("AgTech"). This initial investment was part of an overall \$300,000 operating commitment to AgTech. AgTech will be identifying emerging agricultural innovation companies for the Company to invest in directly. In addition to this operating commitment, the Company has an unfunded \$1,200,000 investment commitment to be invested in the identified portfolio companies over a five-year period. If the Company defaults on these commitments, the other investors may purchase the Company's shares of AgTech for \$0.001 per share. In the event of default, the Company would still be required to contribute the remaining operating commitment.

The Company's aggregate operating and investment commitments in AgTech amounted to \$300,000 and \$1,200,000, respectively. During the nine months ended September 30, 2016, \$150,000 in capital related to the operating commitment was called. As of September 30, 2016, the Company had remaining unfunded commitments of \$150,000 and \$1,200,000, or approximately 50 percent and 100 percent, of the total operating and investment commitments, respectively. On October 28, 2016, the remaining \$150,000 in capital related to the operating commitment was called. The withdrawal of contributed capital is not permitted. The transfer or assignment of capital is subject to approval by AgTech.

On July 21, 2014, the Company made a \$216,012 investment in Accelerator IV-New York Corporation ("Accelerator"). This initial investment was part of an overall initial \$666,667 operating commitment to Accelerator. Accelerator will be identifying emerging biotechnology companies for the Company to invest in directly. In addition to this operating commitment, the Company had an initial \$3,333,333 investment commitment to be invested in the identified portfolio companies over a five-year period. If the Company defaults on these commitments, the other investors may purchase the Company's shares of Accelerator for \$0.001 per share. In the event of default, the Company would still be required to contribute the remaining operating commitment. During the third quarter of 2016, the board of directors of Accelerator voted to modify the operating commitment and investment commitment distributions, which resulted in the Company's operating commitment to be set at \$833,333 and investment commitment to be set at \$3,166,667. The amendment to the investors agreement that will finalize these allocations is expected to be executed before the end of 2016.

The Company's aggregate operating and investment commitments in Accelerator amounted to \$833,333 and \$3,166,667, respectively. During the year ended December 31, 2015, \$262,215 in capital related to the operating commitment and \$1,132,950 in capital related to the investment commitment was called. During the nine months ended September 30, 2016, \$103,680 in capital related to the operating commitment and \$550,290 in capital related to the investment commitment was called. As of September 30, 2016, the Company had remaining unfunded commitments of \$251,426 and \$1,483,427, or approximately 30.2 percent and 46.8 percent, of the total operating and investment commitments, respectively. The withdrawal of contributed capital is not permitted. The transfer or assignment of capital is subject to approval by Accelerator.

NOTE 12. SHARE REPURCHASE PROGRAM

On August 6, 2015, our Board of Directors authorized a repurchase of up to \$2.5 million of the Company's common stock in the open market within a six-month period. Under the repurchase program, we may, but we are not obligated to, repurchase our outstanding common stock in the open market from time to time provided that we comply with the prohibitions under our Insider Trading Policies and Procedures and the guidelines specified in Rule 10b-18 of the Securities Exchange Act of 1934, as amended, including certain price, market volume and timing constraints. In addition, any repurchases are conducted in accordance with the 1940 Act. During the year ended December 31, 2015, we repurchased 509,082 shares at an average price of approximately \$2.36 per share, inclusive of commissions. This represented a discount of approximately 18.1 percent of the net asset value per share at December 31, 2015. The total dollar amount of shares repurchased in this period was \$1,199,994, leaving a maximum of \$1,300,006 available for future program purchases as of December 31, 2015. This six-month period expired on February 6, 2016. On March 3, 2016, our Board of Directors reauthorized the repurchase of up to \$2.5 million of the Company's common stock within a six-month period from the proxy mailing date of April 29, 2016. This six-month period expired on October 31, 2016. As of September 30, 2016, no additional repurchases had occurred, leaving a maximum of \$2.5 million available for future repurchases. On November 3, 2016, our Board of Directors reauthorized the repurchase of up to \$2.5 million of the Company's common stock within a six-month period from the date of notice to investors, which has yet to be determined.

NOTE 13. CHANGE IN NET ASSETS PER SHARE

The following table sets forth the computation of basic and diluted per share net increases (decreases) in net assets resulting from operations for the nine months ended September 30, 2016, and September 30, 2015.

	For the Three Months Ended		For the Nine Months Ended	
	September 30, 2016	2015	September 30, 2016	2015
Numerator for decrease in net assets per share resulting from operations	\$(6,022,037)	\$(16,904,625)	\$(13,256,696)	\$(22,356,159)
Denominator for basic weighted average shares	30,880,829	31,251,950	30,859,267	31,272,790
Basic net decrease in net assets per share resulting from operations	\$(0.20)	\$(0.54)	\$(0.43)	\$(0.71)
Denominator for diluted weighted average shares	30,880,829	31,251,950	30,859,267	31,272,790
Diluted net decrease in net assets per share resulting from operations	\$(0.20)	\$(0.54)	\$(0.43)	\$(0.71)
Anti-dilutive shares by type:				
Stock Options	197,852	1,402,912	197,852	1,402,912
Restricted Stock ¹	95,025	220,329	95,025	220,329
Total anti-dilutive shares	292,877	1,623,241	292,877	1,623,241

¹ A total of 647,000 and 839,000 market-based shares of restricted stock were outstanding during each of the nine months ended September 30, 2016, and September 30, 2015, respectively. These shares vest when the volume-weighted stock price is at or above pre-determined stock price targets over a 30-day period. These pre-determined stock price targets range from \$5.00 per share to \$9.00 per share. These shares were not included in the computation of diluted net asset value per share because as of the end of the reporting period none of the pre-determined stock price targets were met.

For the nine months ended September 30, 2016, and September 30, 2015, the calculation of net decrease in net assets resulting from operations per diluted share did not include stock options or shares of restricted stock because such shares were anti-dilutive. Stock options and restricted stock awards may be dilutive in future periods in which there are both a net increase in net assets resulting from operations and either significant increases in our average stock price or significant decreases in the amount of unrecognized compensation cost during the period.

NOTE 14. RELATED PARTY TRANSACTIONS

As a BDC, we provide managerial assistance to our portfolio companies. In certain cases, we earn fees for providing such assistance. During the three months and nine months ended September 30, 2016, we earned fees totaling \$315,250 and \$685,103, respectively. During the three months and nine months ended September 30, 2015, we earned fees totaling \$71,359 and \$84,859, respectively.

NOTE 15. UNCONSOLIDATED SIGNIFICANT SUBSIDIARIES

The following unconsolidated portfolio company is considered a significant subsidiary under SEC Regulation S-X Rule 10-01(b)(1) and Regulation S-X Rule 4-08(g) as of September 30, 2016. Accordingly, summarized, comparative financial information is presented below for this unconsolidated significant subsidiary.

Senova Systems, Inc.

The following table shows unaudited summarized financial information for Senova Systems, Inc.

	Nine Months Ended September 30,	
	2016	2015
Net revenue	\$ 18,990	\$ 31,500
Net operating loss	(769,504)	(1,103,636)
Loss before taxes	(769,504)	(1,103,636)
Net loss	(840,186)	(1,145,723)

NOTE 16. SUBSEQUENT EVENTS

On October 13, 2016, the Company made a \$500,000 follow-on investment in Petra Pharma Corporation, a privately held portfolio company.

On October 14, 2016, the Company made a \$47,272 follow-on investment in Senova Systems, Inc., a privately held portfolio company.

On October 19, 2016, Senova Systems, Inc., sold substantially all of its assets to an undisclosed buyer for an up-front payment and potential future milestone payments. Even if all of the milestone payments are received in full, we do not expect to recover our cost basis of approximately \$4 million.

On October 28, 2016, the Company made a \$150,000 follow-on investment in AgTech Accelerator Corporation, a privately held portfolio company.

During October of 2016, we have sold the remaining 316,335 shares of OpGen, Inc., at an average sale price per share of \$1.70 for net proceeds, after commission, of \$538,833.

During October of 2016, we have sold an additional 111,618 shares of Champions Oncology, Inc., at an average sale price per share of \$1.67 for net proceeds, after commission, of \$186,478.

On November 4, 2016, the Company made a \$30,000 follow-on investment in Interome, Inc., a privately held portfolio company.

Net unrealized gains (losses) includes rounding adjustments to reconcile change in net asset value per share. See (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" for a description of unrealized losses on investments.

(2) Amounts listed as zero are amounts calculated as less than \$0.005.

(3) Not annualized.

The accompanying unaudited notes are an integral part of this schedule.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this section should be read in conjunction with the Company's unaudited September 30, 2016, Consolidated Financial Statements and the Company's audited 2015 Consolidated Financial Statements and notes thereto.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that involve substantial risks and uncertainties. These forward-looking statements are not historical facts, but rather are based on current expectations, estimates and projections about the Company, our current and prospective portfolio investments, our industry, our beliefs, and our assumptions. Words such as "anticipates," "expects," "intends," "plans," "will," "may," "continue," "believes," "seeks," "estimates," "would," "could," "should," "targets," "projects," and variations of these words and similar expressions are intended to identify forward-looking statements. The forward-looking statements contained in this Quarterly Report involve risks and uncertainties, including statements as to:

- our future operating results;
 - our business prospects and the prospects of our portfolio companies;
 - the impact of investments that we expect to make;
 - our contractual arrangements and relationships with third parties;
 - the dependence of our future success on the general economy and its impact on the industries in which we invest;
 - the ability of our portfolio companies to achieve their objectives;
 - our expected financings and investments;
 - the adequacy of our cash resources and working capital; and
 - the timing of cash flows, if any, from the operations and/or monetization of our positions in our portfolio companies.
- These statements are not guarantees of future performance and are subject to risks, uncertainties, and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements, including without limitation:
- an economic downturn could impair our portfolio companies' ability to continue to operate, which could lead to the loss of some or all of our investments in such portfolio companies;
 - a contraction of available credit and/or an inability to access the equity markets could impair our investment activities;
 - interest rate volatility could adversely affect our results, particularly if we elect to use leverage as a material part of our investment strategy;
 - currency fluctuations could adversely affect the results of our investments in foreign companies, particularly to the extent that we receive payments denominated in foreign currency rather than U.S. dollars; and
 - the risks, uncertainties and other factors we identify in "Risk Factors" and elsewhere in this Quarterly Report on Form 10-Q and in our other filings with the Securities and Exchange Commission ("SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2015.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and, as a result, the forward-looking statements based on those assumptions also could be inaccurate. Important assumptions include our ability to originate new investments, certain margins and levels of profitability and the availability of additional capital. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this Quarterly Report on Form 10-Q should not be regarded as a representation by us that our plans and objectives will be achieved. These risks and uncertainties include those described or identified in "Risk Factors" and elsewhere in this Quarterly Report on Form 10-Q. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Quarterly Report on Form 10-Q.

Background

We incorporated under the laws of the state of New York in August 1981. In 1983, we completed an initial public offering ("IPO"). In 1984, we divested all of our assets except Otisville BioTech, Inc., and became a financial services company with the investment in Otisville as the initial focus of our business activity.

In 1992, we registered as an investment company under the 1940 Act, commencing operations as a closed-end, non-diversified management investment company. In 1995, we elected to become a BDC subject to the provisions of Sections 55 through 65 of the 1940 Act.

Overview

We identify and invest in transformative companies enabled by what we believe is disruptive science. We then provide strategic, operational and management resources, and creative financial solutions to these companies.

We believe we provide four core benefits to our shareholders. First, we provide shareholders with access to disruptive science-enabled companies, particularly ones that are targeting opportunities in the precision health and precision medicine markets that would otherwise be difficult to access or inaccessible for most current and potential shareholders. Second, we have an existing portfolio of companies in exciting markets at varying stages of maturity that provide a potential pipeline of investment returns over time. Third, we provide access for accredited investors to co-invest with us in our portfolio companies when we acquire pre-emptive rights and either lack sufficient capital to fully exercise those rights, or otherwise determine that such investment is not appropriate for us. Fourth, we are able to invest opportunistically in multiple types of securities to take advantage of market inefficiencies.

We believe our future growth will be driven by building companies that are targeting the growing market of precision health and precision medicine. We believe that by operating these precision health and precision medicine companies as controlled partner companies rather than as traditional portfolio company investments, we can provide more meaningful growth for our shareholders. Our team is already actively engaged in this market and in operating these companies.

Precision Health and Precision Medicine

We define precision health as a focus on preventative care and well-being at the individual level. It includes medical technologies, digital technologies, genetic and biochemical technologies, and machine learning technologies that permit individuals to take control of their health and well-being at all stages of their lives, especially ahead of the period in their lives when chronic disease becomes more prevalent and even potentially dominant. We define

precision medicine as an approach for disease treatment and prevention that takes into account individual variability in genes, environment and lifestyle for each person.

We believe the best way to generate value for our shareholders is to operate these companies as majority-owned subsidiaries or controlled portfolio companies in which we are actively involved and to influence the development of these companies through board representation and management support, in addition to the influence we exert through our equity ownership. This level of control and influence was difficult for us to maintain and exert while making traditional investments owing to our relatively small asset base as compared with other investors. We believe our ability to be a long-term, patient partner that can generate returns on invested capital through dividends, consulting income, fee income and other sources of cash flows in addition to the sale of our securities of our investee companies is a competitive advantage for us and provides flexibility in how we build and invest in companies.

As of September 30, 2016, we had twelve portfolio companies focused on the precision health and precision medicine market. We had controlling positions in four of these twelve companies.

Review of Third Quarter 2016

During the third quarter of 2016, we continued to take steps to position the Company for potential future growth. We believe a number of accomplishments, including those by our portfolio companies during the quarter, have the potential to contribute to this goal. These steps and accomplishments include:

We increased our investment income by 132 percent and decreased our net operating loss by 46 percent during the third quarter of 2016 as compared with the third quarter of 2015. We increased our investment income by 97 percent and decreased our net operating loss by 41 percent during the first nine months of 2016 as compared with the first nine months of 2015.

A number of our portfolio companies announced financings and/or business milestones during the quarter, including: D-Wave Systems, Inc., which announced details of its most advanced quantum computing system, featuring a new 2,000 qubit processor. The company made the announcement at its inaugural users group conference in Santa Fe, New Mexico.

D-Wave Systems, Inc., also announced the formation of D-Wave Government Inc., a U.S. subsidiary formed to provide D-Wave's quantum computer systems to the U.S. government. The company also announced the members of the subsidiary's independent board, which include prominent executives with extensive experience at U.S. government agencies including the Department of Energy, the Department of Defense, the National Science Board, the Defense Science Board and the Intelligence Community.

HZO, Inc., which announced a collaboration with Rakuten Kobo to protect its latest eReader, the Kobo Aura ONE. Mersana Therapeutics, Inc., which announced that it has clearance from the FDA to begin a Phase 1 clinical trial for its antibody-drug conjugate therapy for cancer. In conjunction with this clearance, the company received a \$20 million milestone payment from Takeda.

The following announcements were made by companies we are building that are focused on the precision health and medicine market.

Interome, Inc., announced that it is a co-organizer of the UnDx Consortium™. This organization brings together five precision medicine technology providers and prominent experts from medical centers and universities across the country to collaborate in an effort to produce new hypotheses for a set of seven patients struggling with undiagnosed diseases. The UnDx Consortium met to explore results of cutting-edge tests analyzing samples from these patients and their families. That meeting is the beginning of what is expected to evolve into an ongoing forum to explore the potential of combining precision medicine technologies to diagnose and treat disease.

Interome, Inc., announced that collaborators and organizers of the UnDx Consortium met again at the 14th annual Future in Review (FiRe) conference in Park City, UT, from September 27-30, 2016. The conversation included a summary of the UnDx Consortium, a discussion of hypotheses resulting from the analysis of data from the Consortium on August 16, 2016, in San Diego, CA, and the proposed next steps for the Consortium.

Muses Labs, Inc., presented data from a pilot study of its MEND Protocol for the treatment of early Alzheimer's disease at the Alzheimer's Association International Conference 2016. MEND Protocol is a multi-step cognitive evaluation process that uses advanced data processing technology to first assess which risk factors are present in an individual.

Muses Labs, Inc., and Metabolon, Inc., announced a partnership to study and apply metabolomics in individuals with pre- and early-symptomatic cognitive decline and Alzheimer's disease. The companies stated that they expect to bring new clinical trial services and updated care protocols to the market.

Metabolon, Inc., announced that it closed a round of financing of \$15 million from a new investor, Essex Woodlands.

Metabolon, Inc., announced that it launched its Meta IMD™ test for diagnosis of inherited metabolic disorders.

EchoPixel, Inc., announced that its medical virtual reality system is ready for clinical implementation. The system is being distributed to customers in collaboration with the HP Zvr Interactive Virtual Reality Display and workstation.

EchoPixel, Inc.'s 3D visualization technology was profiled in an article and video by ABC News.

We also faced the following challenges during this quarter:

Net asset value per share decreased from \$2.88 as of December 31, 2015, to \$2.44 as of September 30, 2016.

Our price per share decreased from \$2.20 as of December 31, 2015, to \$1.39 as of September 30, 2016, and \$1.25 as of November 8, 2016.

We sold 1,093,461 shares of OpGen, Inc., a publicly traded portfolio company, in open market transactions for net proceeds, after commission, of \$1,843,175, or an average sale price of \$1.69 per share. At September 30, 2016, we held 316,335 shares of OpGen, which we valued at \$518,789. We sold the remaining 316,335 shares subsequent to the end of the third quarter of 2016 at an average sale price per share of \$1.70 for net proceeds, after commission, of \$538,833. Our average cost basis in OpGen was \$4.02 per share.

We sold 98,465 shares of Champions Oncology, Inc., a publicly traded portfolio company, in open market transactions for net proceeds, after commission, of \$164,805, or an average sale price of \$1.67 per share. At September 30, 2016, we held 145,075 shares of Champions Oncology, which we valued at \$243,726. We sold an additional 111,618 shares subsequent to the end of the third quarter of 2016 at an average sale price per share of \$1.67 for net proceeds, after commission, of \$186,478. Our average cost basis in Champions Oncology is \$6.66 per share. Senova Systems, Inc., sold substantially all of its assets to an undisclosed buyer for an up-front payment and potential future milestone payments. Even if all of the milestone payments are received in full, we do not expect to recover our cost basis of approximately \$4 million.

The values of public equities, particularly those of microcapitalization companies, are highly volatile. The price per share and market capitalization of Adesto Technologies Corporation decreased in value from \$3.28 at June 30, 2016, to \$2.22 at September 30, 2016, and closed at \$2.05 at November 8, 2016. Champions Oncology, Inc., decreased in value from \$2.15 at June 30, 2016, to \$1.68 at September 30, 2016, and closed at \$1.70 at November 8, 2016.

Enumeral Biomedical Holdings, Inc., decreased in value from \$0.20 at June 30, 2016, to \$0.18 at September 30, 2016, and closed at \$0.14 at November 8, 2016. While the price per share and market capitalization of OpGen, Inc., increased in value from \$1.52 at June 30, 2016, to \$1.64 at September 30, 2016, the price per share of each company's common stock continues to trade significantly below the price per share at the time of each company's initial public listing. Additionally, the stock prices of comparable public market companies that impact the market's valuation of certain of our portfolio companies also decreased during the quarter. Our own stock price has been under considerable pressure from these and other headwinds.

Even though the financings of some of our portfolio companies may have occurred at increases in price per share from prior rounds of financing, such increases may not be reflected in full in our values owing to other rights and preferences afforded to investors in those rounds of financing. This challenge, in part, limited the positive potential contribution to our net asset value per share by companies that completed such rounds of financing during the third quarter of 2016.

Portfolio Summary

As of September 30, 2016, we had 23 privately held, equity-focused companies in our portfolio that have yet to complete liquidity events (e.g., public listings or merger and acquisition ("M&A") transactions) and are not in the process of liquidating their assets. These do not include 1) our publicly traded and unrestricted securities of Adesto Technologies Corporation, Champions Oncology, Inc., Enumeral Biomedical Holdings, Inc., and OpGen, Inc.; 2) our investment in Nano Terra, Inc., which was originally structured as a non-convertible debt investment; 3) our rights to milestone payments from Amgen, Inc., Laird Technologies, Inc., and Canon, Inc.; 4) our portfolio companies, Laser Light Engines, Inc., and Ensemble Therapeutics Corporation, which are in the process of selling, licensing or liquidating their assets and/or have shut down; 5) our portfolio companies, Black Silicon Holdings, Inc., and SynGlyco, Inc., that exist to collect payments from the sale of subsidiaries or assets; and 6) our portfolio company, Senova Systems Inc., which has entered into an acquisition agreement. As of September 30, 2016, we valued these 23 privately held equity-focused companies at \$55,614,179. Including the companies referenced above, we valued our total portfolio at \$67,996,587 as of September 30, 2016.

Summary of Returns

Since our investment in Otisville in 1983 through September 30, 2016, we have made a total of 113 equity-focused investments. We have completely exited 80 and partially exited 3 of these 113 investments, recognizing aggregate net realized gains of \$78,373,306 on invested capital of \$152,258,923, or 1.5 times invested capital. For the securities of the 28 privately held, equity-focused companies in our portfolio held at September 30, 2016, we have net unrealized depreciation of \$29,056,523 on invested capital of \$87,158,193. We have aggregate net realized gains on our exited companies, offset by unrealized depreciation for our 28 privately held, equity-focused investments of \$49,316,783 on invested capital of \$239,417,116. The above net realized gains do not take into consideration our annual operating expenses over the period from 1983 to September 30, 2016, which expenses are directly or indirectly borne by our shareholders. At September 30, 2016, from first dollar in, the investment weighted average holding period for the 28 privately held equity-focused investments was 9.0 years. Historically, as measured from first dollar in to last dollar out, the investment weighted average holding period for the 80 investments we have fully exited was 6.0 years.

The amount of net realizations includes the following exits during the nine months ended September 30, 2016:

- Realized gain of \$302,324 on our investment in Magic Leap, Inc.
- Realized loss of \$3,418,349 on our investment in Cambrios Technologies Corporation.
- Realized loss of \$1,244,955 on our investment in Ultora, Inc.
- Realized loss of \$2,999,470 on our investment in Bridgelux, Inc.
- Realized loss of \$2,551,242 on our investment in OpGen, Inc.
- Realized loss of \$491,236 on our investment in Champions Oncology, Inc.

The aggregate net realized gains and the cumulative invested capital do not reflect the cost or value of our freely tradable shares of Adesto Technologies Corporation, Champions Oncology, Inc., Enumeral Biomedical Holdings, Inc., and OpGen, Inc., that we owned as of September 30, 2016. The aggregate net realized gains also do not include potential milestone payments that could occur as part of the acquisitions of BioVex Group, Inc., Nextreme Thermal Solutions, Inc., or Molecular Imprints, Inc., at points in time in the future. If these amounts were included as of September 30, 2016, our aggregate net realized gains and cumulative invested capital from 1983 through September 30, 2016, would be \$71,334,732 and \$171,754,440, respectively, or 1.4 times invested capital.

Recent and Potential Liquidity Events From Our Portfolio as of September 30, 2016

On April 18, 2014, Canon, Inc., completed its acquisition of Molecular Imprints, Inc.'s semiconductor lithography equipment business. On October 1, 2015, the Company received proceeds of \$795,567 upon the achievement of the first milestone associated with this transaction. As of September 30, 2016, we valued the remaining potential milestone payments from the sale of Molecular Imprints at \$467,392. On April 20, 2016, the Company received proceeds of \$390,492 from the release of a portion of the funds held in escrow following the transaction. We could receive an additional \$234,336 from amounts held in escrow as well as up to \$938,926 upon the achievement of certain additional milestones. There can be no assurance as to the timing and how much of the remaining amount we will ultimately realize in the future, if any. With the

closing of the transaction, a new spin-out company, which retained the name "Molecular Imprints, Inc.," was formed to continue development and commercialization of nanoscale patterning in consumer and biomedical applications, and we became a shareholder of the new company.

On May 1, 2015, the spin-out of Molecular Imprints, Inc.'s non-semiconductor business was acquired by Magic Leap, Inc. Upon closing of the transaction, we received our initial payment of \$705,794 and 24,897 shares of Series B Preferred Stock of Magic Leap. On May 18, 2016, the Company received additional proceeds of \$130,522 and 4,394 shares of Series B Preferred Stock of Magic Leap following the expiration of the one-year escrow period established at the closing of the transaction.

In July 2015, SynGlyco, Inc., negotiated the acceleration and settlement of payments due to it from the sale of its synthesis business to Corden Pharmaceuticals. This acceleration of payments yielded proceeds that paid off in full our senior secured debt investment with a payment to us of \$567,500. We received additional repayments for our outstanding secured convertible bridge notes of approximately \$750,000 during the first quarter of 2016. Additionally, SynGlyco sold a portion of its intellectual property portfolio to an undisclosed buyer for \$75,000. These payments may bring our total cash distributions from this investment to approximately \$1.7 million. We invested approximately \$8.8 million in SynGlyco beginning with our initial investment in 2007. We valued our securities of the company at \$59,150 as of September 30, 2016.

On July 21, 2015, Bridgelux, Inc., signed a definitive agreement to be acquired by an investment group led by China Electronics Corporation and ChongQing Linkong Development Investment Company. This transaction closed on August 1, 2016. On August 5, 2016, the Company received \$1,932,229 in cash and 221,938 shares of a new spin-out company, Xenio, Inc. We invested approximately \$5 million in Bridgelux beginning with our initial investment in 2005. We valued our securities of Xenio at \$184,653 as of September 30, 2016.

On May 18, 2016, the Company agreed to sell its shares of Magic Leap, Inc., to two undisclosed buyers for aggregate gross proceeds of \$640,928. The Company received proceeds of \$257,347 from the sale of 11,761 shares of Magic Leap on June 28, 2016. On July 5, 2016, the Company received additional proceeds of \$383,581 from the sale of our remaining 17,530 shares of Magic Leap.

As of September 30, 2016, we valued the remaining potential milestone payments from the sale of BioVex Group, Inc., at \$2,975,353. If all the remaining milestone payments were to be paid by Amgen, Inc., we would receive an additional \$5,384,482. There can be no assurance as to the timing and how much of this amount we will ultimately realize in the future.

As of September 30, 2016, we have sold 1,093,461 shares of our position in OpGen, Inc., in open market transactions, for net proceeds, after commission, of \$1,843,175 or an average sale price of \$1.69 per share. Our average cost basis in OpGen is \$4.02 per share. As of September 30, 2016, we have sold 98,465 shares of our position in Champions Oncology, Inc., in open market transactions for net proceeds, after commission, of \$164,805 or an average sale price of \$1.67 per share. Our average cost basis in Champions Oncology is \$6.66 per share.

On October 19, 2016, Senova Systems, Inc., sold substantially all of its assets to an undisclosed buyer for an up-front payment and potential future milestone payments. While we expect to receive a return of some of our invested capital in conjunction with this transaction, even if all of the milestone payments are received in full, we do not expect to recover our cost basis of approximately \$4 million.

Our portfolio companies often plan for and/or begin the process of pursuing potential sales and/or IPOs of those companies by hiring bankers and/or advisors to attempt to pursue such liquidity events. We consider these efforts to be in the ordinary course of business for those companies until the potential and timing of a transaction become

tangible through events such as acceptance of letters of intent to acquire a company and/or the beginning of a road show to pursue an IPO.

Maturity of Current Equity-Focused Portfolio

Our current portfolio is comprised of companies at varying stages of maturity in a diverse set of industries. As our portfolio companies mature, we seek to invest in new early- and mid-stage companies that may mature into mid- and late-stage companies. This continuous progression creates a pipeline of investment maturities that may lead to future sources of positive contributions to net asset value per share as these companies mature and potentially experience liquidity events. Our pipeline of investment maturities for the 23 privately held equity-focused companies that have yet to complete liquidity events and 4 publicly traded equity-focused companies in our portfolio that are not in the process of being sold or shut down are shown in the figure below.

* Indicates publicly traded company as of September 30, 2016.

Note: Equity-focused portfolio companies and stage classifications as of September 30, 2016, not including:

- 1) our rights to milestone payments associated with the acquisitions of BioVex Group, Inc., Nextreme Thermal Solutions, Inc., and Molecular Imprints, Inc.;
- 2) portfolio companies currently in the process of selling, licensing or liquidating their assets and/or have shut down, or exist to collect payments from the sale of subsidiaries or assets, including Ensemble Therapeutics Corporation, Laser Light Engines, Inc., SynGlyco, Inc., Senova Systems, Inc., and Black Silicon Holdings, Inc.; and
- 3) our investment in Nano Terra, Inc., which was originally structured as a non-convertible debt investment.

We expect some of our portfolio companies to transition between stages of maturity over time. This transition may be forward if the company is maturing and is successfully executing its business plan or may be backward if the company is not successfully executing its business plan or decides to deviate from its original business plan. Transitions backward may be accompanied by an increase in non-performance risk, which reduces valuation. We discuss non-performance risk and its implications on value below in the section titled "Valuation of Investments."

For the quarter ended September 30, 2016, we categorize our new portfolio companies, Genome Profiling, LLC, and Xenio, Inc., as early-stage companies.

Ownership of Our Portfolio Companies

By studying our portfolio in greater detail, it is evident to us that potential returns from approximately half of the companies in our portfolio could be the real drivers of net asset value growth over the coming years. These companies include ones in which we have substantial ownership and ones where we currently believe the potential value at exit is substantial. The table below provides some additional detail on our ownership of the 23 privately held, equity-focused

companies in our portfolio that have yet to complete liquidity events (e.g., public listings or M&A transactions) and are not in the process of liquidating their assets.

Portfolio Company	Voting Ownership Range
Interome, Inc.*	
ProMuc, Inc.*	
NGX Bio, Inc.*	
EchoPixel, Inc.	>=20%
Produced Water Absorbents, Inc.	
TARA Biosystems, Inc.*	
ABSMaterials, Inc.	15-20%
HZO, Inc.	
AgTech Accelerator Corporation	10-15%
ORIG3N, Inc.	
Metabolon, Inc.	
Accelerator IV-New York Corporation	5-10%
AgBiome, LLC	
Petra Pharma Corporation	
Lodo Therapeutics Corporation	2.5-5%
Nanosys, Inc.	
D-Wave Systems, Inc.**	
Mersana Therapeutics, Inc.	
Xenio Corp.	
Fleet Health Alliance, LLC***	0-2.5%
Genome Profiling, LLC***	
Muses Labs, Inc.***	
Phylagen, Inc.***	

* Denotes a controlled affiliated company.

** We own voting and non-voting classes of preferred equity of D-Wave Systems, Inc. If the non-voting preferred equity was included in the calculation, our ownership of D-Wave would be in the 2.5-5% range.

We own convertible bridge notes in Fleet Health Alliance, LLC, Genome Profiling, LLC, Muses Labs, Inc., and

*** Phylagen, Inc. While these convertible bridge notes have certain rights and preferences, they are not voting securities. We currently expect that these securities will convert into voting equity securities in each company at some future date.

We often invest in multiple rounds of financing over the life of a portfolio company; however, as a company matures, we may decide to reduce our investments in later rounds of financing or decide not to participate in them at all owing primarily to our focus on investing the majority of our capital in companies we control and are in the precision health and precision medicine markets. That said, we believe these maturing companies may be good investment opportunities. We founded H&H Co-Investment Partners, LLC, to provide the opportunity to accredited investors to participate in these later-stage rounds of financing in what we believe to be our most promising portfolio companies.

The price per share at which we invest may or may not change and may or may not increase from round to round. Additionally, we generally purchase preferred stock that is convertible into shares of common stock of the portfolio company. This conversion, if it occurs, generally coincides with a public offering or public listing event, but it may also occur in the event of a recapitalization of the company. This conversion may or may not be on a one share of

preferred for one share of common stock basis. The table below shows this investment history and current conversion ratio for our 12 active, privately held portfolio companies in which we have made at least one investment in convertible preferred equity.

75

Portfolio Company	Price Per Share of Round of Financing	Classes of Equity Owned By H&H	No. of Shares of Each Security Owned by H&H	H&H Ownership on As Converted Basis	Fair Value as of 9/30/16

⁽¹⁾ We did not invest in these rounds of financing of D-Wave Systems, Inc., Mersana Therapeutics, Inc., and Nanosys, Inc., and, hence, do not hold these shares.

⁽²⁾ At the time of our initial investment in HZO, Inc., in 2011, in addition to Series B Convertible Preferred Stock, we purchased shares of Series A Convertible Preferred Stock from certain initial investors in the company. As part of the terms of the Series II round of financing, the Series A Convertible Preferred Stock converted into shares of common stock and the Series B Convertible Preferred Stock was renamed Series I Convertible Preferred Stock.

⁽³⁾ We invested in multiple rounds of financing in Mersana Therapeutics, Inc., between 2002 and 2012 when the company completed a Series A-1 round of financing that included the conversion of all of the prior outstanding classes of preferred stock into common stock, including those shares held by us.

Level of Involvement in Our Portfolio Companies

The 1940 Act generally requires that BDCs offer to "make available significant managerial assistance" to portfolio companies. We are actively involved with our portfolio companies through membership on boards of directors, as observers to the boards of directors and/or through frequent communication with management. As of September 30, 2016, we held at least one board seat or observer rights on 18, or 78 percent, of our 23 equity-focused, privately held portfolio companies that are not in the process of being shut down or have not agreed to be acquired as of September 30, 2016.

Investments and Current Investment Pace

The following is a summary of our initial and follow-on equity-focused investments from January 1, 2012, to September 30, 2016. We consider a "round led" to be a round where we were the new investor or the leader of a group of investors in an investee company. Typically, but not always, the lead investor negotiates the price and terms of the deal with the investee company.

Investments in Our Equity-Focused Portfolio of Investments
in Privately Held and Publicly Traded Companies

	2012	2013	2014	2015	Nine Months Ended September 30, 2016
Total Incremental Investments	\$15,141,941	\$18,076,288	\$14,276,808	\$11,963,021	\$6,469,032
No. of New Investments	2	2	3	4	5
No. of Follow-On Investment Rounds	26	37	33	31	17
No. of Rounds Led	3	9	8	8	8
Average Dollar Amount – Initial	\$1,407,500	\$550,001	\$338,677	\$395,738	\$223,402
Average Dollar Amount – Follow-On	\$474,113	\$449,359	\$401,842	\$334,841	\$314,825

Our Sources of Liquid Capital

The sources of liquidity that we use to make our investments are classified as primary and secondary liquidity. As of September 30, 2016, and December 31, 2015, our total primary and secondary liquidity was \$19,790,530 and \$37,053,638, respectively. We do not include funds available and undrawn from our credit facility as primary or secondary liquidity. We believe it is important to examine both our primary and secondary liquidity when assessing the strength of our balance sheet and our future investment capabilities.

Primary liquidity is comprised of cash and certain receivables. As of September 30, 2016, we held \$13,384,820 in cash and \$272,175 in certain receivables. As of December 31, 2015, we held \$17,922,630 in cash and \$30,427 in certain receivables.

The following proceeds added to our primary liquidity during the nine months ended September 30, 2016:

- \$685,103 in fees for providing managerial assistance to certain portfolio companies;
- \$1,932,229 from the sale of our investment in Bridgelux, Inc.;
- \$750,000 from the repayment of certain bridge notes in SynGlyco, Inc.;
- \$640,928 from the sale of our shares of Magic Leap, Inc.;
- \$390,492 from the release of a portion of the funds held in escrow from the sale of Molecular Imprints, Inc.'s semiconductor lithography equipment business to Canon, Inc.;
- \$130,522 from the release of the funds held in escrow from the sale of Molecular Imprints' non-semiconductor business to Magic Leap;
- \$119,242 from the repayment of certain bridge note principal and interest of Black Silicon Holdings, Inc.;
- \$113,950 from the repayment of a bridge note in EchoPixel, Inc.;
- \$1,843,175, net of commissions, from the sale of 1,093,461 shares of our investment in OpGen, Inc., in open market transactions; and
- \$164,805, net of commissions, from the sale of 98,465 shares of our investment in Champions Oncology, Inc., in open market transactions.

Future payments upon achieving milestones from the sale of BioVex Group, Inc., and the sale of Molecular Imprints to Canon would also add to our primary liquidity if these milestones are achieved successfully. The probability-adjusted values of the future milestone payments for the sales of BioVex and Molecular Imprints, as determined at the end of each fiscal quarter, are included as an asset on our Consolidated Statements of Assets and Liabilities and will be included in primary liquidity only if and when payment is received for achievement of the milestones.

Our secondary liquidity is comprised of the stock of unrestricted publicly traded companies. Although these companies are publicly traded, their stock may not trade at high volumes and prices may be volatile, which may restrict our ability to sell our positions at any given time. As of September 30, 2016, our secondary liquidity was \$6,133,535. Adesto Technologies Corporation, Champions Oncology, Inc., Enumeral Biomedical Holdings, Inc., and OpGen, Inc., account for \$3,929,107, \$243,726, \$1,441,913 and \$518,789, respectively, of the total amount of secondary liquidity based on the closing price of their common stock as of September 30, 2016. We were subject to a lock-up agreement restricting our ability to trade our securities of OpGen as of June 30, 2016. The lock-up period on our securities of OpGen expired on August 18, 2016. We were subject to lock-up agreements restricting our ability to trade our securities of Enumeral Biomedical and Adesto Technologies, exclusive of the general restriction on the transfer of unregistered securities, as of December 31, 2015. The lock-up period on our 7,966,368 shares and warrants for the purchase of 1,755,120 shares of common stock of Enumeral Biomedical expired on January 31, 2016. The lock-up period on our 1,769,868 shares of common stock of Adesto Technologies expired on April 25, 2016.

As of December 31, 2015, our secondary liquidity was \$19,100,581. Champions Oncology, Inc., accounted for \$944,819 of the total amount of secondary liquidity based on the volume weighted average price of its common stock during the quarter ended December 31, 2015. Adesto Technologies Corporation, Enumeral Biomedical Holdings, Inc., and OpGen, Inc., accounted for \$13,645,682, \$1,831,468 and \$2,678,612, respectively, of the total amount of secondary liquidity based on the closing price of their common stock as of December 31, 2015.

The borrowing period on our Loan Facility ended on September 30, 2016, so this facility is no longer available to increase our liquidity. As of September 30, 2016, we had \$5,000,000 in debt outstanding relating to this Loan Facility.

Current Business Environment

The success of our business is predicated on our ability to build companies that provide returns on our invested capital through increases in value of our ownership of those companies, through realized returns generated through the sale of our securities of those companies and, currently to a lesser extent, through short-term income generated from our involvement with those companies. All of these factors can be affected by the current business environment.

Our ability to increase the value of our ownership in our investee companies requires that the current business environment be favorable for the companies to be able to execute on their business and attract additional capital at progressively lower costs over time. These two factors may not necessarily be linked as, more often than not, the price of capital is determined by new investors, and there may not be sufficient competition that would provide the company with more leverage in negotiations of price and terms. This situation is especially impactful in private financings and public financings of small capitalization companies where there are limited investors from which to raise capital. The IPO of our portfolio company, Adesto Technologies Corporation, is an example of this situation where the values of publicly traded comparable companies were substantially above the value at which Adesto Technologies was able to raise capital in the transaction. We believe this situation will continue for the foreseeable future given the decrease in investors willing to invest in small capitalization companies. That said, certain companies

will continue to raise capital at increasing valuations and under favorable terms, and for such companies, the current business environment can be supportive of such events.

Even if a company raises additional capital, our participation may be limited owing to our available capital. These situations are occurring more frequently, particularly as the types of companies in which we invest are raising large rounds of financing from deep-pocketed investors. The impact to us is dilution, which may affect value and our ultimate returns, and loss of control. The current business environment is dominated by such large funds, which make it difficult for us to maintain ownership and control in certain companies. This factor is part of the reason for our shift in focus to build companies that we can finance and control with our available capital and investments that produce income where our returns are not as impacted by dilution or loss of control.

The most pronounced issue for certain of our portfolio companies in terms of execution related to the current business environment is the continued pressure on the price of oil. Our exposure to this market is limited to our investment in Produced Water Absorbents, Inc., which is valued at approximately 1.9 percent of our net assets.

Our ability to generate realized returns through the sale of the securities of our investee companies is impacted by the values of publicly traded companies, particularly microcapitalization companies and the global environment for M&A transactions. The valuations of microcapitalization indices increased during the third quarter of 2016. According to the Dow Jones Venturesource, the IPO market for biotechnology companies improved during the third quarter, but it remains difficult for technology companies to complete such offerings. IPOs overall during the first nine months of 2016 were well behind the pace of IPOs during the past two years. The number of M&A transactions decreased by 12 percent compared with the second quarter of 2016. We believe the current business environment is relatively risk-averse, which leads to liquid capital being shifted from risky companies, which are often microcapitalization companies, to less risky companies and results in a decrease in the overall value of those companies. Given the uncertainty over future interest rates, the U.S. Presidential election, the oil and gas markets, and the global economy, particularly in China, we expect that the values of microcapitalization companies will be volatile, which may affect our ability to monetize our positions in our publicly traded portfolio companies and the value which is ultimately realized from these investments.

Our short-term income is generated through interest income from convertible and non-convertible debt investments, and fees for providing managerial assistance to our investee companies. We believe the current business environment is supportive for us to be able to continue to generate income from these sources as the majority of such income comes from securities or engagements with companies outside of the oil and gas industries and is associated with companies that we control.

Valuation of Investments

We value our privately held investments and certain publicly traded investments that are determined to not trade in an active market each quarter as determined in good faith by our Valuation Committee, a committee of all the independent directors, within guidelines established by our Board of Directors in accordance with the 1940 Act. See "Footnote to Consolidated Schedule of Investments" contained in "Consolidated Financial Statements" for additional information.

The values of privately held companies are inherently more difficult to determine than those of publicly traded companies at any single point in time because securities of these types of companies are not actively traded. We believe, perhaps even more than in the past, that illiquidity, and the perception of illiquidity, can affect value. Management believes further that the long-term effects of the difficult market for raising capital and difficult exit environment will continue to affect negatively the fundraising ability of weak companies regardless of near-term improvements in the overall global economy and public markets and that these factors can also affect value.

We note that while the valuations of our privately held portfolio companies may decrease, sometimes substantially, such decrease may facilitate an increase in our ownership of the overall company in conjunction with a follow-on investment in such company. In these cases, the ultimate return on our overall invested capital could be greater than it would have been without such interim decrease in valuation.

Option pricing models use call option theory to derive the value of sets of classes of securities taking into account the financial rights and preferences of classes of securities such as liquidation preference, redemption rights and dividends. This method treats common and preferred stock as call options on the company's enterprise value. It derives breakpoints based on liquidation preferences of the preferred stock and then calculates the values of those liquidation

preferences and the company as a whole using Black-Scholes-Merton equations. The sum of these values yields the estimated enterprise value of the portfolio company. This method of derivation is often referred to as “backsolve” as it uses the price per share of the most recent round of financing to backsolve for the values of the other classes of outstanding securities of the company.

Option pricing models use the following inputs in their calculations:

- Last Round Price per Share
- Liquidation Preferences (including dividends and redemptions, if any)
- Estimated Time to Exit
- Estimated Volatility
- Risk-Free Interest Rate
- Outstanding Capitalization of the Company

Variations in these inputs and assumptions can have a significant impact on fair value. Beginning with the quarter ended June 30, 2016, we increased the estimate of length of time to exit across the portfolio based on an updated analysis of our historical investment-weighted average holding periods. Companies that are valued using market comparables and/or volatilities derived from publicly traded securities are subject to the volatilities within those markets.

Given the consideration of the liquidation preferences, option pricing models more accurately represent scenarios where liquidation preferences are honored, as they would be in an M&A scenario, but not in public offering scenarios where it is common to have all classes of preferred stock converted to common stock. Liquidation preferences are business terms that are common in the types of companies in which we commonly invest and are generally used to provide some downside protection should the company not meet expectations. They can be structured on parity with prior rounds of financing or senior to prior rounds of financing. They can include multiples on the amounts invested and can provide for further distributions following the initial preference or be restricted to the amount of invested capital.

This high weighting of liquidation preferences means that small differences in how the preferences are structured can have a material effect on the fair value of our securities at the time of valuation and also on future valuations should additional rounds of financing occur with senior preferences. As such, valuations calculated by option pricing models may not increase if 1) rounds of financing occur at higher prices per share, 2) liquidation preferences include multiples on investment, 3) the amount of invested capital is small and/or 4) liquidation preferences are senior to prior rounds of financing.

We note that the ultimate return on any investment may be materially different than the fair value derived as of the date of valuation.

Four of our portfolio companies trade in public exchanges and are subject to the volatility inherent in the public markets. The following table illustrates the range of values of these securities.

Public Companies' Trading History

	Price Per Share on November 8, 2016	Q3 2016 Trading Range	H&H Ownership Value in Q3 2016 Trading Range ⁽¹⁾	52 Week Trading Range	H&H Ownership Value in 52 Week Trading Range ⁽¹⁾
Adesto Technologies Corporation	\$2.05	\$1.98 - \$3.98	\$3.5 - \$7.0 million	\$1.98-\$8.50	\$3.5 - \$15.0 million
Champions Oncology, Inc. ⁽²⁾	\$1.70	\$1.11 - \$2.41	\$0.2 - \$0.3 million	\$1.11-\$5.49	\$0.2 - \$0.8 million
Enumeral Biomedical Holdings, Inc.	\$0.14	\$0.11 - \$0.22	\$0.9 - \$1.8 million	\$0.11-\$0.42	\$0.9 - \$3.3 million
OpGen, Inc.	N/A ⁽³⁾	\$1.36 - \$4.65	\$0.4 - \$1.5 million	\$1.02-\$4.65	\$0.3 - \$1.5 million
Total:			\$5.0 - \$10.6 million		\$4.9 - \$20.6 million

(1) Calculated based on common shares held as of September 30, 2016.

(2) On August 12, 2015, Champions Oncology effected a 12:1 reverse stock split; trading range reported on a split-adjusted basis.

(3) We no longer hold shares of common stock of OpGen, Inc., as of October 21, 2016.

In each of the years in the period of 2012 through 2015 and for the nine months ended September 30, 2016, excluding our rights to milestone payments, we recorded the following gross write-ups in privately held securities as a percentage of net assets at the beginning of the year ("BOY"), gross write-downs in privately held securities as a percentage of net assets at the beginning of the year, and change in value of private portfolio securities as a percentage of net assets at the beginning of the year.

81

Gross Write-Ups and Write-Downs of the Privately Held Portfolio

	2012	2013	2014	2015	Nine Months Ended September 30, 2016

From June 30, 2016, to September 30, 2016, the value of our equity-focused portfolio, including our rights to potential future milestone payments from the sales of BioVex Group, Inc., Nextreme Thermal Solutions, Inc., and Molecular Imprints, Inc., decreased by \$7,037,339, from \$74,936,174 to \$67,898,835.

From June 30, 2016, to September 30, 2016, not including our rights to potential future milestone payments from the sale of BioVex Group, Inc., Nextreme Thermal Solutions, Inc., and Molecular Imprints, Inc., our equity-focused portfolio companies decreased in value by \$7,486,227 from \$71,942,317 to \$64,456,090.

We note that our Valuation Committee and ultimately our Board of Directors take into account multiple sources of quantitative and qualitative inputs to determine the value of our privately held portfolio companies.

We also note that our Valuation Committee does not set the value of our unrestricted or registered shares of Enumeral Biomedical Holdings, Inc., which trade publicly over-the-counter, or the value of our unrestricted shares of Adesto Technologies Corporation, Champions Oncology, Inc., or OpGen, Inc., all of which trade on the NASDAQ Capital Market.

Three portfolio companies, HZO, Inc., Adesto Technologies Corporation and Metabolon, Inc., accounted for approximately \$6.3 million, or 76 percent, of the gross write-downs of our portfolio companies held for the quarter ended September 30, 2016.

The primary contributing factor for the decrease in value of HZO, Inc., was a change in accounting estimates used to derive value, particularly related to a decrease in the length of time in the future of projected revenues used as an input to value.

The primary contributing factor for the decrease in value of Adesto Technologies Corporation was the decrease in the price per share of the company's publicly traded stock from \$3.28 as of June 30, 2016, to \$2.22 as of September 30, 2016.

The primary contributing factor for the decrease in value of Metabolon, Inc., was the terms of a secondary market transaction that is expected to close in the fourth quarter of 2016.

Two portfolio companies, AgBiome, LLC, and TARA Biosystems, Inc., accounted for \$2.5 million or 84 percent of the gross write-ups of our portfolio companies held for the quarter ended September 30, 2016.

The primary contributing factor for the increase in the valuation of AgBiome, Inc., was a change in the accounting estimates used to derive value, based primarily on the change in value of publicly traded comparable companies from the date of the last equity round of financing of AgBiome and the valuation date since the last equity round of financing occurred more than one year prior to the valuation date.

The primary contributing factor for the increase in valuation of TARA Biosystems, Inc., was the terms of a new round of financing of the company that is currently expected to close in mid-to-late November 2016.

As of September 30, 2016, our top ten investments by value accounted for approximately 80 percent of the value of our equity-focused portfolio.

Top Ten Equity-Focused Investments by Value

Portfolio Company	Value as of 09/30/2016	Cumulative % of Equity Focused Venture Capital Portfolio
D-Wave Systems, Inc.	\$11,498,191	18%
Metabolon, Inc.	\$10,796,323	35%
AgBiome, LLC	\$7,837,991	47%
HZO, Inc.	\$5,755,099	56%
Adesto Technologies Corporation*	\$3,929,107	62%
TARA Biosystems, Inc.	\$3,223,388	67%
Mersana Therapeutics, Inc.	\$2,784,940	71%
ORIG3N, Inc.	\$2,669,372	75%
EchoPixel, Inc.	\$1,687,431	78%
Enumeral Biomedical Holdings, Inc.*	\$1,502,708	80%

* Adesto Technologies and Enumeral Biomedical ranks by value include the value of their Level 1 asset shares.

Results of Operations

We present the financial results of our operations utilizing accounting principles generally accepted in the United States of America ("GAAP") for investment companies. On this basis, the principal measure of our financial performance during any period is the net increase (decrease) in our net assets resulting from our operating activities, which is the sum of the following three elements:

Net Operating Income (Loss) - the difference between our income from interest, dividends, and fees and our operating expenses.

Net Realized Gain (Loss) on Investments - the difference between the net proceeds of sales of portfolio securities and their stated cost.

Net Increase (Decrease) in Unrealized Appreciation or Depreciation on Investments - the net unrealized change in the value of our investment portfolio.

Owing to the structure and objectives of our business, we generally expect to experience net operating losses and seek to generate increases in our net assets from operations through the long-term appreciation and monetization of our portfolio company investments. We have relied, and continue to rely, primarily on proceeds from sales of investments, rather than on investment income, to defray a significant portion of our operating expenses. Because such sales are unpredictable, we attempt to maintain adequate working capital to provide for fiscal periods when there are no such sales.

The potential for, or occurrence of, inflation could result in rising interest rates for government-backed debt. We may also invest in both short- and long-term U.S. government and agency securities. To the extent that we invest in short- and long-term U.S. government and agency securities, changes in interest rates result in changes in the value of these obligations that result in an increase or decrease of our net asset value. The level of interest rate risk exposure at any

given point in time depends on the market environment, the expectations of future price and market movements, and the quantity and duration of long-term U.S. government and agency securities held by the Company, and it will vary from period to period. During the nine months ended September 30, 2016, and September 30, 2015, we did not hold any U.S. government securities.

Three months ended September 30, 2016, as compared with the three months ended September 30, 2015

In the three months ended September 30, 2016, and September 30, 2015, we had net decreases in net assets resulting from operations of \$6,022,037 and \$16,904,625, respectively.

Investment Income and Expenses:

We had net operating losses of \$856,765 and \$1,587,808 for the three months ended September 30, 2016, and September 30, 2015, respectively. The variation in these results is primarily owing to the changes in investment income and operating expenses, including non-cash expense, reflected in salaries, benefits and stock-based compensation of \$112,950 in 2016 primarily associated with the compensation cost for restricted stock as compared with \$185,991 for the same period in 2015. During the three months ended September 30, 2016, and September 30, 2015, total investment income was \$566,152 and \$244,402, respectively. During the three months ended September 30, 2016, and September 30, 2015, total operating expenses were \$1,422,917 and \$1,832,210, respectively.

During the three months ended September 30, 2016, as compared with the same period in 2015, investment income increased, reflecting increases in fees for providing managerial assistance to portfolio companies, increases in interest income from convertible bridge notes and non-convertible promissory notes, and increases in interest income from senior secured debt securities, offset by decreases in yield-enhancing fees on debt securities. Our fees for providing managerial assistance to portfolio companies increased for the three months ended September 30, 2016, and include \$300,000 earned from Interome, Inc., a newly founded portfolio company that we currently control and manage, pursuant to a consulting agreement between the Company and Interome executed during the first quarter of 2016 and expiring on December 31, 2016. This consulting agreement is currently expected to provide the Company with \$900,000, in aggregate, in fees for providing managerial assistance to Interome for 2016. During the three months ended September 30, 2016, and September 30, 2015, we did not hold any U.S. government securities primarily owing to the continued low yields available over the durations of maturities in which we were willing to invest.

Operating expenses, including non-cash, stock-based compensation expense, were \$1,422,917 and \$1,832,210 for the three months ended September 30, 2016, and September 30, 2015, respectively. The decrease in operating expenses for the three months ended September 30, 2016, as compared with the three months ended September 30, 2015, was primarily owing to decreases in salaries, benefits and stock-based compensation expense, administration and operations expense, rent expense, insurance expense, directors' fees and expenses, and custody fees, offset by increases in professional fees.

Salaries, benefits and stock-based compensation expense decreased by \$337,830, or 35.3 percent, for the three months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of a decrease in salaries and benefits owing primarily to a decrease in our employee headcount, a decrease in employee bonus expense of \$73,500, and a decrease in compensation cost of \$73,041 for restricted stock awards associated with the Stock Plan. At September 30, 2016, we had seven full-time employees and one part-time employee as compared with nine full-time employees and one part-time employee at September 30, 2015. Administration and operations expense decreased by \$39,357, or 37.4 percent, for the three months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of decreases in travel-related expenses and net decreases in general office and administration expenses. Rent expense decreased by \$8,042, or 9.7 percent, for the three months ended September 30, 2016, as compared with September 30, 2015. Our rent expense of \$75,266 for the three months ended September 30, 2016, includes \$90,063 of rent paid in cash, net of \$14,797 non-cash rent expense, credits and abatements that we recognize on a straight-line basis over the lease term. Our rent paid in cash of \$90,063 includes \$18,046 of real estate tax escalation charges on our corporate headquarters located at 1450 Broadway in New York City. Insurance expense decreased by \$7,584, or 10.3 percent, for the three months ended September 30, 2016, as compared with

September 30, 2015. Directors' fees and expenses decreased by \$18,699, or 19.0 percent, for the three months ended September 30, 2016, as compared with September 30, 2015. Custody fees decreased by \$5,693, or 36.3 percent, for the three months ended September 30, 2016, as compared with September 30, 2015.

Professional fees increased by \$8,276, or 3.0 percent, for the three months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of increases in certain consulting and accounting fees, offset by a decrease in certain legal fees.

Realized Gains and Losses from Investments:

During the three months ended September 30, 2016, we realized net losses on investments of \$5,969,189. During the three months ended September 30, 2015, we realized net gains on investments of \$1,275,596, respectively.

During the three months ended September 30, 2016, we realized net losses of \$5,969,189 consisting primarily of a realized loss of \$2,551,242 on the sale of 1,093,461 shares of OpGen, Inc., a realized loss of \$491,236 on the sale of 98,465 shares of Champions Oncology, Inc., and a realized loss of \$2,926,802 on the sale of our investment in Bridgelux, Inc.

During the three months ended September 30, 2015, we realized net gains of \$1,275,596 consisting primarily of a realized gain of \$1,790,891 on the repayment of certain bridge notes of Black Silicon Holdings, Inc., a realized gain of \$11,152 on the sale of 25,000 shares of Solazyme, Inc., a realized gain of \$1,942 on our escrow payment from the sale of Molecular Imprints, Inc., to Canon, Inc., and a realized gain of \$74 on our escrow payment relating to the sale of our investment in Molecular Imprints, Inc., to Magic Leap, Inc., offset by a realized loss of \$296,813 on our investment in Bridgelux, Inc., owing to the expiration of certain warrants, and a realized loss of \$231,656 owing to the cancellation of our warrants in SiOnyx, Inc.

Net Unrealized Appreciation and Depreciation of Portfolio Securities:

During the three months ended September 30, 2016, net unrealized depreciation on total investments decreased by \$886,939, or 2.2 percent, from accumulated net unrealized depreciation of \$40,673,339 at June 30, 2016, to accumulated net unrealized depreciation of \$39,786,400 at September 30, 2016. During the three months ended September 30, 2015, net unrealized depreciation on total investments increased by \$16,532,025, or 60.8 percent, from accumulated net unrealized depreciation of \$27,193,633 at June 30, 2015, to accumulated net unrealized depreciation of \$43,725,658 at September 30, 2015.

During the three months ended September 30, 2016, net unrealized depreciation on our portfolio company investments decreased by \$886,939, from net unrealized depreciation of \$40,673,339 at June 30, 2016, to net unrealized depreciation of \$39,786,400 at September 30, 2016, owing to write-ups in the valuations of the following portfolio company investments:

Investment	Amount of Write-Up
AgBiome, LLC	\$ 1,639,832
TARA Biosystems, Inc.	828,053
Champions Oncology, Inc.	349,833
ORIG3N, Inc.	68,030
D-Wave Systems, Inc.	52,224
Nano Terra, Inc.	13,168
NGX Bio, Inc.	11,271
Nanosys, Inc.	6,253
SynGlyco, Inc.	5,444
Mersana Therapeutics, Inc.	3,921
Phylagen, Inc.	1,059

The write-ups for the three months ended September 30, 2016, were partially offset by write-downs in the valuations of the following portfolio company investments:

Investment	Amount of Write-Down
HZO, Inc.	\$ 3,146,545
Adesto Technologies Corporation	1,876,060
Metabolon, Inc.	1,256,463
EchoPixel, Inc.	536,614
Produced Water Absorbents, Inc.	390,895
ProMuc, Inc.	320,373
Senova Systems, Inc.	251,376
Enumeral Biomedical Holdings, Inc.	150,966
ABSMaterials, Inc.	117,122
Ensemble Therapeutics Corporation	88,043
Petra Pharma Corporation	24,890
Black Silicon Holdings, Inc.	23,271
Lodo Therapeutics Corporation	11,063

In addition to the write-ups listed above, we had a decrease in unrealized depreciation of \$2,923,099 on our investment in Bridgelux, Inc., owing to a realized loss on the sale of its securities.

We had a decrease in unrealized depreciation of \$2,841,807 on our investment in OpGen, Inc., owing primarily to a realized loss on the partial sale of its securities.

We had a decrease in unrealized depreciation of \$447,724 on the rights to milestone payments from Amgen, Inc.'s acquisition of BioVex Group, Inc.

We had a decrease in unrealized depreciation of \$1,164 on the rights to milestone payments from Canon, Inc.'s acquisition of Molecular Imprints, Inc.

In addition to the write-downs listed above, we had an increase in unrealized depreciation of \$112,262 on our investment in D-Wave Systems, Inc., owing to foreign currency translation.

During the three months ended September 30, 2015, net unrealized depreciation on our venture capital investments increased by \$16,532,025, from net unrealized depreciation of \$27,193,633 at June 30, 2015, to net unrealized depreciation of \$43,725,658 at September 30, 2015, owing to write-downs in the valuations of the following portfolio company investments:

Investment	Amount of Write-Down
Adesto Technologies Corporation	\$ 8,308,722
Enumeral Biomedical Holdings, Inc.	1,953,820
Black Silicon Holdings, Inc.	1,859,236
Produced Water Absorbents, Inc.	1,696,200
Nanosys, Inc.	1,565,039
OpGen, Inc.	1,455,455
Metabolon, Inc.	808,049
Ensemble Therapeutics Corporation	580,720
Cambrios Technologies Corporation	306,121

SynGlyco, Inc.	139,510
Senova Systems, Inc.	66,695
Nano Terra, Inc.	2,517

The write-downs for the three months ended September 30, 2015, were partially offset by write-ups in the valuations of the following portfolio company investments:

Investment	Amount of Write-Up
Bridgelux, Inc.	\$ 297,188
Mersana Therapeutics, Inc.	200,714
AgBiome, LLC	160,485
Champions Oncology, Inc.	122,204
HZO, Inc.	45,925
D-Wave Systems, Inc.	15,943
EchoPixel, Inc.	14,442
NGX Bio, Inc.	7,467
ABSMaterials, Inc.	6,169
Magic Leap, Inc.	4,205
ORIG3N, Inc.	2,192

In addition to the write-ups listed above, we had an increase in unrealized depreciation of \$524,387 on our investment in D-Wave Systems, Inc., owing to foreign currency translation.

We had an increase in unrealized depreciation of \$19,388 on our investment in Solazyme, Inc., owing to a realized gain on the sale of its securities.

We had a decrease in unrealized depreciation of \$1,245,279 on the rights to milestone payments from Amgen, Inc.'s acquisition of BioVex Group, Inc.

We had a decrease in unrealized depreciation of \$631,621 on the rights to milestone payments from Canon, Inc.'s acquisition of Molecular Imprints, Inc.

Nine months ended September 30, 2016, as compared with the nine months ended September 30, 2015

In the nine months ended September 30, 2016, and September 30, 2015, we had net decreases in net assets resulting from operations of \$13,256,696 and \$22,356,159, respectively.

Investment Income and Expenses:

We had net operating losses of \$3,066,997 and \$5,209,460 for the nine months ended September 30, 2016, and September 30, 2015, respectively. The variation in these results is primarily owing to the changes in investment income and operating expenses, including non-cash expense, net of forfeitures, included in salaries, benefits and stock-based compensation of \$47,027 in 2016 primarily associated with the compensation cost for restricted stock as compared with \$617,972 for the same period in 2015. During the nine months ended September 30, 2016, and September 30, 2015, total investment income was \$1,328,236 and \$675,429, respectively. During the nine months ended September 30, 2016, and September 30, 2015, total operating expenses were \$4,395,233 and \$5,884,889, respectively.

During the nine months ended September 30, 2016, as compared with the same period in 2015, investment income increased, reflecting increases in fees for providing managerial assistance to portfolio companies and increases in interest income from senior secured debt securities, offset by decreases in interest income from convertible bridge notes and non-convertible promissory notes and decreases in yield-enhancing fees on debt securities. Our fees for providing managerial assistance to portfolio companies of \$685,103 for the nine months ended September 30, 2016, include \$600,000 earned from Interome, Inc., a newly founded portfolio company that we currently control and manage, pursuant to a consulting agreement between the Company and Interome executed during the first quarter of 2016 and expiring on December 31, 2016. This consulting agreement is currently expected to provide the Company with \$900,000, in aggregate, in fees for providing managerial assistance to Interome for 2016.

During the nine months ended September 30, 2016, and September 30, 2015, we did not hold any U.S. government securities primarily owing to the decrease in yield available over the durations of maturities in which we were willing to invest.

Operating expenses, including non-cash, stock-based compensation expenses, were \$4,395,233 and \$5,884,889 for the nine months ended September 30, 2016, and September 30, 2015, respectively. The decrease in operating expenses for the nine months ended September 30, 2016, as compared with the nine months ended September 30, 2015, was primarily owing to decreases in salaries, benefits and stock-based compensation expense, administration and operations expense, professional fees, rent expense, insurance expense, directors' fees and expenses, and custody fees, offset by increases in interest and other debt expense.

Salaries, benefits and stock-based compensation expense decreased by \$1,172,501, or 38.9 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of a decrease in salaries and benefits owing primarily to a decrease in our employee headcount, a decrease in employee bonus expense of \$137,500 and a decrease in compensation cost of \$570,945 for restricted stock awards associated with the Stock Plan. At September 30, 2016, we had seven full-time employees and one part-time employee as compared with nine full-time employees and one part-time employee at September 30, 2015. Administration and operations expense decreased by \$23,039, or 6.8 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of decreases in travel-related expenses, offset by increases in general office and administration expenses and costs associated with a portfolio company presentation event. Professional fees decreased by \$230,178, or 19.7 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of decreases in certain legal, accounting and consulting fees. Rent expense decreased by \$29,065, or 13.3 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015. Our rent expense of \$189,707 for the nine months ended September 30, 2016, includes \$233,719 of rent paid in cash, net of \$44,012 non-cash rent expense, credits and abatements that we recognize on a straight-line basis over the lease term. Our rent paid in cash of \$233,719 includes \$18,046 of real estate tax escalation charges on our corporate headquarters located at 1450 Broadway in New York City. Insurance expense decreased by \$21,806, or 10.1 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015. Directors' fees and expenses decreased by \$62,464, or 21.8 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015, primarily owing to less meetings held by the Board of Directors than were held in the comparable period in 2015. Custody fees decreased by \$12,619, or 26.7 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015.

Interest and other debt expense increased by \$64,305, or 11.5 percent, for the nine months ended September 30, 2016, as compared with September 30, 2015, primarily as a result of utilization fees associated with a drawdown of the Loan Facility.

Realized Gains and Losses from Investments:

During the nine months ended September 30, 2016, we realized net losses on investments of \$10,139,591. During the nine months ended September 30, 2015, we realized net gains on investments of \$4,224,413.

During the nine months ended September 30, 2016, we realized net losses of \$10,139,591 consisting primarily of a realized loss of \$3,418,349 on our investment in Cambrios Technologies Corporation, a realized loss of \$1,244,955 on our investment in Ultora, Inc., a realized loss of \$2,999,470 on our investment in Bridgelux, Inc., a realized loss of \$2,551,242 on the sale of 1,093,461 shares of OpGen, Inc., and a realized loss of \$491,236 on the sale of 98,465 shares of Champions Oncology, Inc., offset by a realized gain of \$302,324 on our investment in Magic Leap, Inc., a realized gain of \$196,228 on our escrow payment from the sale of our investment in Molecular Imprints, Inc., to

Canon, Inc., and a realized gain of \$67,094 on our escrow payment from the sale of our investment in Molecular Imprints, Inc., to Magic Leap, Inc.

During the nine months ended September 30, 2015, we realized net gains of \$4,224,413 consisting primarily of a realized gain of \$3,109,347 on the sale of our investment in Nantero, Inc., a realized gain of \$1,790,891 on the repayment of certain bridge notes of Black Silicon Holdings, Inc., a realized gain of \$242,485 on the sale of our investment in Molecular Imprints, Inc., a realized gain of \$52,563 on the sale of 50,000 shares of Solazyme, Inc., a realized gain of \$8,942 on the sale of certain warrants of GEO Semiconductor, Inc., and a realized gain of \$4,609 on our escrow payment from the sale of our investment in Molecular Imprints to Canon, Inc., offset by a realized loss of \$296,813 on our investment in Bridgelux, Inc., owing to the expiration of certain warrants, a realized loss of \$293,786 on our investment in Metabolon, Inc., owing to the expiration of certain warrants, a realized loss of \$231,656 owing to the cancellation of our warrants in SiOnyx, Inc., a realized loss of \$98,644 on our investment in D-Wave Systems, Inc., owing to the expiration of certain warrants, and a realized loss of \$63,532 on our escrow payment owing to the sale of our investment in Molecular Imprints to Magic Leap, Inc.

Net Unrealized Appreciation and Depreciation of Portfolio Securities:

During the nine months ended September 30, 2016, net unrealized depreciation on total investments decreased by \$122,804, or less than one percent, from accumulated net unrealized depreciation of \$39,909,204 at December 31, 2015, to accumulated net unrealized depreciation of \$39,786,400 at September 30, 2016. During the nine months ended September 30, 2015, net unrealized depreciation on total investments increased by \$21,119,183, or 93.4 percent, from accumulated net unrealized depreciation of \$22,606,475 at December 31, 2014, to accumulated net unrealized depreciation of \$43,725,658 at September 30, 2015.

During the nine months ended September 30, 2016, net unrealized depreciation on our portfolio company investments decreased by \$122,804, from net unrealized depreciation of \$39,909,204 at December 31, 2015, to net unrealized depreciation of \$39,786,400 at September 30, 2016, owing to write-ups in the valuations of the following portfolio company investments:

Investment	Amount of Write-Up
D-Wave Systems, Inc.	\$4,230,643
AgBiome, LLC	2,347,701
Mersana Therapeutics, Inc.	1,495,379
TARA Biosystems, Inc.	1,098,563
ORIG3N, Inc.	342,471
ABSMaterials, Inc.	109,417
Phylagen, Inc.	90,884
Nano Terra, Inc.	35,563
Black Silicon Holdings, Inc.	25,553
Petra Pharma Corporation	7,598
Lodo Therapeutics Corporation	1,422

The write-ups for the nine months ended September 30, 2016, were partially offset by write-downs in the valuations of the following portfolio company investments:

Investment	Amount of Write-Down
Adesto Technologies Corporation	\$9,716,575
Metabolon, Inc.	2,825,521
HZO, Inc.	1,627,577
Senova Systems, Inc.	1,490,560
Produced Water Absorbents, Inc.	1,179,641
Ensemble Therapeutics Corporation	909,292
EchoPixel, Inc.	489,661
Enumeral Biomedical Holdings, Inc.	416,300
ProMuc, Inc.	320,373
Nanosys, Inc.	289,984
NGX Bio, Inc.	141,239
SynGlyco, Inc.	112,257
Champions Oncology, Inc.	55,496

In addition to the write-ups listed above, we had a decrease in unrealized depreciation of \$3,418,349 on our investment in Cambrios Technologies Corporation owing to a realized loss on the write-off of its securities.

We had a decrease in unrealized depreciation of \$2,577,469 on our investment in Bridgelux, Inc., owing to a realized loss on the sale of its securities.

89

We had a decrease in unrealized depreciation of \$2,264,599 on our investment in OpGen, Inc., owing primarily to a realized loss on the partial sale of its securities.

We had a decrease in unrealized depreciation of \$1,244,955 on our investment in Ultora, Inc., owing to a realized loss on the write-off of its securities.

We had a decrease in unrealized depreciation of \$336,410 on our investment in D-Wave Systems, Inc., owing to foreign currency translation.

We had an decrease in unrealized depreciation of \$75,121 on the rights to milestone payments from Amgen, Inc.'s acquisition of BioVex Group, Inc.

We had a decrease in unrealized depreciation of \$5,573 on the rights to milestone payments from Canon, Inc.s acquisition of Molecular Imprints, Inc.

In addition to the write-downs listed above, we had an increase in unrealized depreciation of \$10,390 on our investment in Magic Leap, Inc., owing to a realized gain on the sale of its securities.

During the nine months ended September 30, 2015, net unrealized depreciation on our venture capital investments increased by \$21,119,183, from net unrealized depreciation of \$22,606,475 at December 31, 2014, to net unrealized depreciation of \$43,725,658 at September 30, 2015, owing to write-downs in the valuations of the following portfolio company investments:

Investment	Amount of Write-Down
Adesto Technologies Corporation	\$ 7,473,744
Produced Water Absorbents, Inc.	6,079,455
Enumeral Biomedical Corp.	4,939,054
Nanosys, Inc.	3,039,996
Metabolon, Inc.	972,162
Bridgelux, Inc.	751,346
Ensemble Therapeutics Corporation	679,948
HZO, Inc.	414,288
Cambrios Technologies Corporation	281,101
Magic Leap, Inc.	14,927
Ultora, Inc.	7,525
Nano Terra, Inc.	2,663

The write-downs for the nine months ended September 30, 2015, were partially offset by write-ups in the valuations of the following portfolio company investments:

Investment	Amount of Write-Up
AgBiome, LLC	\$2,016,636
OpGen, Inc.	927,975
Black Silicon Holdings, Inc.	521,649
Champions Oncology, Inc.	336,607
NGX Bio, Inc.	279,008
Mersana Therapeutics, Inc.	230,422
Accelerator IV - New York Corporation	164,385

SynGlyco, Inc.	98,700
Senova Systems, Inc.	52,135
D-Wave Systems, Inc.	41,182
EchoPixel, Inc.	36,329
ABSMaterials, Inc.	7,245
ORIG3N, Inc.	5,938

90

We had an increase in unrealized depreciation of \$1,909,935 on our investment in Nantero, Inc., owing to a realized gain on the sale of its securities.

We had an increase in unrealized depreciation of \$1,116,758 on our investment in D-Wave Systems, Inc., owing to foreign currency translation.

We had an increase in unrealized depreciation of \$10,840 on our investment in Solazyme, Inc., owing to a realized gain on the sale of its securities.

We had an increase in unrealized depreciation of \$7,870 on our investment in GEO Semiconductor, Inc., owing to a realized gain on the sale of certain warrants.

We had a decrease in unrealized depreciation of \$1,229,623 on the rights to milestone payments from Amgen, Inc.'s acquisition of BioVex Group, Inc.

We had a decrease in unrealized depreciation of \$634,595 on the rights to milestone payments from Canon, Inc.'s acquisition of Molecular Imprints, Inc.

Financial Condition

September 30, 2016

At September 30, 2016, our total assets and net assets were \$82,422,674 and \$75,322,949, respectively. At December 31, 2015, our total assets and net assets were \$96,461,286 and \$88,711,671, respectively.

At September 30, 2016, our net asset value per share was \$2.44, as compared with \$2.88 at December 31, 2015. At September 30, 2016, and December 31, 2015, our shares outstanding were 30,880,829 and 30,845,754, respectively.

Significant developments in the nine months ended September 30, 2016, included a decrease in the holdings of our portfolio company investments of \$9,156,317 and a decrease in our cash of \$4,537,810. The decrease in our portfolio company investments from \$77,152,904 at December 31, 2015, to \$67,996,587 at September 30, 2016, resulted primarily from a decrease in the net value of our portfolio company investments held of \$15,625,349, offset by new and follow-on investments of \$6,469,032. The decrease in our cash from \$17,922,630 at December 31, 2015, to \$13,384,820 at September 30, 2016, is primarily owing to new and follow-on portfolio company investments totaling \$6,469,032 and the payment of cash for operating expenses of \$4,453,661, offset by proceeds of \$1,932,229 from the sale of our investment in Bridgelux, Inc., proceeds of \$1,843,175 from the sale of certain of our shares of OpGen, Inc., proceeds of \$750,000 from the repayment of certain bridge notes in SynGlyco, Inc., proceeds of \$685,103 in fees for providing managerial assistance to certain portfolio companies, proceeds of \$640,928 from the sale of our shares of Magic Leap, Inc., proceeds of \$390,492 from the release of a portion of the funds held in escrow from the sale of Molecular Imprints, Inc.'s semiconductor lithography equipment business to Canon, Inc., proceeds of \$164,805 from the sale of certain of our shares of Champions Oncology, Inc., proceeds of \$130,522 from the release of the funds held in escrow from the sale of Molecular Imprints' non-semiconductor business to Magic Leap, proceeds of \$119,242 from the repayment of certain bridge note principal and interest of Black Silicon Holdings, Inc., and proceeds of \$113,950 from the repayment of a bridge note in EchoPixel, Inc.

The following table is a summary of additions to our portfolio of investments made during the nine months ended September 30, 2016:

New Investments	Amount of Investment
Interome, Inc.	\$ 300,010
Genome Profiling, LLC	230,000
Fleet Health Alliance, LLC	225,000
Muses Labs, Inc.	212,000
AgTech Accelerator Corporation	150,000

Follow-On Investments	Amount of Investment
Produced Water Absorbents, Inc.	\$875,000
ORIG3N, Inc.	750,000
Lodo Therapeutics Corporation	550,290
EchoPixel, Inc.	500,000
NGX Bio, Inc.	500,000
EchoPixel, Inc.	350,000
Interome, Inc.	350,000
Interome, Inc.	300,000
Interome, Inc.	50,000
Mersana Therapeutics, Inc.	261,300
HZO, Inc.	250,000
Senova Systems, Inc.	250,000
Produced Water Absorbents, Inc.	125,000
Accelerator IV-New York Corporation	103,680
ABSMaterials, Inc.	100,000
Senova Systems, Inc.	21,250
Senova Systems, Inc.	15,500
NGX Bio, Inc.	2
Total	\$6,469,032

The following table summarizes the value of our portfolio company investments as compared with their cost at September 30, 2016, and December 31, 2015:

	September 30, 2016	December 31, 2015
Portfolio company investments, at cost	\$107,782,987	\$117,062,108
Net unrealized (depreciation)	(39,786,400)	(39,909,204)
Portfolio company investments, at value	\$67,996,587	\$77,152,904

Cash Flow

Net cash used in operating activities for the nine months ended September 30, 2016, was \$4,514,057, primarily reflecting the purchase of portfolio company investments of \$6,469,032 and the payment of operating expenses of \$4,453,661, offset by proceeds from the sale of investments and repayment of principal of \$6,085,343.

Net cash used in investing activities for the three months ended September 30, 2016, was \$1,438.

Net cash used in financing activities for the three months ended September 30, 2016, was \$22,315.

Net cash used in operating activities for the nine months ended September 30, 2015, was \$3,529,183, primarily reflecting the purchase of venture capital investments of \$7,462,571 and the payment of operating expenses, offset by proceeds from the sale of investments and repayment of principal of \$8,966,871.

Net cash used in investing activities for the nine months ended September 30, 2015, was \$6,806, primarily reflecting the purchase of fixed assets.

Net cash provided by financing activities for the nine months ended September 30, 2015, was \$4,214,694, primarily reflecting a partial drawdown from the Loan Facility, offset by the purchase of treasury stock and the net settlement of restricted stock.

Liquidity and Capital Resources

Our liquidity and capital resources are generated and are generally available through our cash holdings, cash flows from payments received on our non-convertible debt investments, fees received for providing managerial assistance to portfolio companies, proceeds received from periodic follow-on equity offerings and realized capital gains retained for reinvestment.

We fund our day-to-day operations using interest earned and proceeds from our cash holdings and fees from providing managerial assistance. We believe the increase or decrease in the value of our portfolio company investments does not materially affect the day-to-day operations of the Company or our daily liquidity. As of September 30, 2016, and December 31, 2015, we had no investments in money market mutual funds.

The draw period for our Loan Facility ended on September, 30, 2016. As of September 30, 2016, we had \$5,000,000 in debt outstanding. We have not issued any debt securities, and, therefore, are not subject to credit agency downgrades.

As an investment company, it is critical that we have capital available to support our best companies until we have an opportunity for liquidity in our investments. As such, we will continue to maintain a substantial amount of liquid capital on our balance sheet.

Although we cannot predict future market conditions, we continue to believe that our current cash and our ability to adjust our investment pace will provide us with adequate liquidity to execute our current business strategy.

At September 30, 2016, and December 31, 2015, our total primary liquidity was \$13,656,995 and \$17,953,057, respectively. Our primary liquidity is principally comprised of our cash and certain receivables. The decrease in our primary liquidity from December 31, 2015, to September 30, 2016, is primarily owing to new and follow-on portfolio company investments totaling \$6,469,032 and the payment of cash for operating expenses of \$4,453,661, offset by proceeds of \$1,932,229 from the sale of our investment in Bridgelux, Inc., proceeds of \$1,843,175 from the sale of certain of our shares of OpGen, Inc., proceeds of \$750,000 from the repayment of certain bridge notes in SynGlyco, Inc., proceeds of \$685,103 in fees for providing managerial assistance to certain portfolio companies, proceeds of \$640,928 from the sale of our shares of Magic Leap, Inc., proceeds of \$390,492 from the release of a portion of the funds held in escrow from the sale of Molecular Imprints, Inc.'s semiconductor lithography equipment business to Canon, Inc., proceeds of \$164,805 from the sale of certain of our shares of Champions Oncology, Inc., proceeds of \$130,522 from the release of the funds held in escrow from the sale of Molecular Imprints' non-semiconductor business to Magic Leap, proceeds of \$119,242 from the repayment of certain bridge note principal and interest of Black Silicon Holdings, Inc., and proceeds of \$113,950 from the repayment of a bridge note in EchoPixel, Inc.

At September 30, 2016, and December 31, 2015, our secondary liquidity was \$6,133,535 and \$19,100,581, respectively. Our secondary liquidity consists of our publicly traded securities and does not include the value of warrants we hold in Champions Oncology, Inc., Enumeral Biomedical Holdings, Inc., and OpGen, Inc. Although these companies are publicly traded, their stock may not trade at high volumes and prices can be volatile, which may restrict our ability to sell our positions at any given time. We may also be restricted for a period of time in selling our positions in these companies due to our shares being unregistered. As of September 30, 2016, our publicly traded securities are not restricted from sale.

As of September 30, 2016, we had \$5,000,000 in debt outstanding.

We do not include funds held in escrow from the sale of investments in primary or secondary liquidity. These funds become primary liquidity if and when they are received at the expiration of the escrow period.

We believe that the current and future environment for access to capital to fund the types of companies in which we invest may adversely affect the valuation of investment portfolios, lead to tighter lending standards and result in reduced access to capital. These conditions may lead to a decline in net asset value and/or decline in valuations of our portfolio companies in future quarters. Although we cannot predict future market conditions, we continue to believe that our current cash and our ability to adjust our investment pace will provide us with adequate liquidity to execute our current business strategy.

Except for a rights offering, we are generally not able to issue and sell our common stock at a price below our net asset value per share, exclusive of any distributing commission or discount, without shareholder approval. As of September 30, 2016, our net asset value per share was \$2.44 per share and our closing market price was \$1.39 per share. We do not currently have shareholder approval to issue or sell shares below our net asset value per share.

Borrowings

On September 30, 2013, the Company entered into the Loan Facility that may be used by the Company to fund investments in portfolio companies. The draw period for the Loan Facility ended on September 30, 2016. The Loan Facility, among other things, matures on September 30, 2017, and bears interest at 10 percent per annum in cash. The Company has the option to have interest accrue at a rate of 13.5 percent per annum if the Company decides not to pay interest in cash monthly. The Company currently plans to pay interest in cash if and when any borrowings are outstanding. The Loan Facility also requires payment of a draw fee on each borrowing equal to 1.0 percent of such borrowing and an unused commitment fee of 1.0 percent per annum. Interest and fee payments under the Loan Facility are made quarterly in arrears. The Company may prepay the loans or reduce the aggregate commitments under the Loan Facility at any time prior to the maturity date, as long as certain conditions are met, including payment of required prepayment or termination fees. The Loan Facility is secured by all of the assets of the Company and its wholly owned subsidiaries, subject to certain customary exclusions. The Loan Facility contains certain affirmative and negative covenants, including without limitation: (a) maintenance of certain minimum liquidity requirements; (b) maintenance of an eligible asset leverage ratio of not less than 4.0:1.0; (c) limitations on liens; (d) limitations on the incurrence of additional indebtedness; and (e) limitations on structural changes, mergers and disposition of assets (other than in the normal course of our business activities).

At September 30, 2016, and December 31, 2015, the Company had \$5,000,000 in debt outstanding. The remaining capacity under the Loan Facility was \$0 at September 30, 2016.

Contractual Obligations

A summary of our significant contractual payment obligations is as follows:

Payments Due by Period

	Total	Less than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Multi-Draw Loan Facility ⁽¹⁾	\$5,506,944	\$5,506,944	\$0	\$0	\$0
Operating leases	978,964	293,082	608,328	77,554	0
Total	\$6,485,908	\$5,800,026	\$608,328	\$77,554	\$0

⁽¹⁾ As of September 30, 2016, we had \$0 of unused borrowing capacity under our Loan Facility. Amounts include interest payable assuming \$5,000,000 remains outstanding through the maturity date in 2017.

On May 4, 2016, the Company made a \$150,000 investment in AgTech Accelerator Corporation ("AgTech"). This initial investment was part of an overall \$300,000 operating commitment to AgTech. AgTech will be identifying emerging agricultural innovation companies for the Company to invest in directly. In addition to this operating commitment, the Company has an unfunded \$1,200,000 investment commitment to be invested in the identified portfolio companies over a five-year period. If the Company defaults on these commitments, the other investors may purchase the Company's shares of AgTech for \$0.001 per share. In the event of default, the Company would still be required to contribute the remaining operating commitment.

The Company's aggregate operating and investment commitments in AgTech amounted to \$300,000 and \$1,200,000, respectively. During the nine months ended September 30, 2016, \$150,000 in capital related to the operating commitment was called. As of September 30, 2016, the Company had remaining unfunded commitments of \$150,000 and \$1,200,000, or approximately 50 percent and 100 percent, of the total operating and investment commitments,

respectively. On October 28, 2016, the remaining \$150,000 in capital related to the operating commitment was called. The withdrawal of contributed capital is not permitted. The transfer or assignment of capital is subject to approval by AgTech.

On July 21, 2014, the Company made a \$216,012 investment in Accelerator IV-New York Corporation ("Accelerator"). This initial investment was part of an overall \$666,667 operating commitment to Accelerator. Accelerator will be identifying emerging biotechnology companies for the Company to invest in directly. In addition to this operating commitment, the Company has a \$3,333,333 investment commitment to be invested in the identified portfolio companies over a five-year period. If the Company defaults on these commitments, the other investors may purchase the Company's shares of Accelerator for \$0.001 per share. In the event of default, the Company would still be required to contribute the remaining operating commitment. During the third quarter of 2016, the board of directors of Accelerator voted to modify the operating commitment and investment

commitment distributions, which resulted in the Company's operating commitment to be set at \$833,333 and investment commitment to be set at \$3,166,667. The amendment to the investors agreement that will finalize these allocations is expected to be executed before the end of 2016.

The Company's aggregate operating and investment commitments in Accelerator amounted to \$833,333 and \$3,166,667, respectively. During the year ended December 31, 2015, \$262,215 in capital related to the operating commitment and \$1,132,950 in capital related to the investment commitment was called. During the nine months ended September 30, 2016, \$103,680 in capital related to the operating commitment and \$550,290 in capital related to the investment commitment was called. As of September 30, 2016, the Company had remaining unfunded commitments of \$251,426 and \$1,483,427, or approximately 30.2 percent and 46.8 percent, of the total operating and investment commitments, respectively. The withdrawal of contributed capital is not permitted. The transfer or assignment of capital is subject to approval by Accelerator.

Critical Accounting Policies

The Company's significant accounting policies are described in Note 3 to the Consolidated Financial Statements and in the Footnote to the Consolidated Schedule of Investments. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and those that require management's most difficult, complex or subjective judgments. The Company considers the following accounting policies and related estimates to be critical:

Valuation of Portfolio Investments

The most significant estimate inherent in the preparation of our consolidated financial statements is the valuation of investments and the related amounts of unrealized appreciation and depreciation of investments recorded. As a BDC, we invest in primarily illiquid securities that generally have no established trading market.

Investments are stated at "value" as defined in the 1940 Act and in the applicable regulations of the SEC and U.S. GAAP. ASC 820 defines fair value, establishes a framework for measuring fair value and expands disclosures about assets and liabilities measured at fair value. ASC 820 provides a consistent definition of fair value that focuses on exit price in the principal, or most advantageous, market and prioritizes, within a measurement of fair value, the use of market-based inputs over entity-specific inputs. ASC 820 also establishes the following three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date.

Level 1 - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets;

Level 2 - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 inputs are in those markets for which there are few transactions, the prices are not current, little public information exists or instances where prices vary substantially over time or among brokered market makers; and

Level 3 - inputs to the valuation methodology are unobservable and significant to the fair value measurement. Unobservable inputs are those inputs that reflect our own assumptions that market participants would use to price the asset or liability based upon the best available information.

Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement and are not necessarily an indication of risks associated with the investment. See "Note 6. Fair Value of Investments" in the accompanying notes to our consolidated financial statements for additional information regarding fair value measurements.

Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily available and (ii) the fair value as determined in good faith by, or under the direction of, the Board of Directors for all other assets. See "Valuation Procedures" in the "Footnote to Consolidated Schedule of Investments" for additional information. As of September 30, 2016, our financial statements include investments fair valued at \$61,611,808, and two investments valued under the equity method at \$251,244. The fair values were determined in good faith by, or under the direction of, the Board of Directors. As of September 30, 2016, approximately 82 percent of our net assets represent investments in portfolio companies valued by the Board of Directors.

Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment, although our valuation policy is intended to provide a consistent basis for determining fair value of the portfolio investments. Factors that may be considered include, but are not limited to, the cost of the Company's investment; transactions in the portfolio company's securities or unconditional firm offers by responsible parties; the financial condition and operating results of the company; the long-term potential of the business and technology of the company; the values of similar securities issued by companies in similar businesses; volatilities of similar securities issued by companies in similar businesses; expected time to exit; multiples to revenues, net income or EBITDA that similar securities issued by companies in similar businesses receive; the proportion of the company's securities we own and the nature of any rights to require the company to register restricted securities under the applicable securities laws; management's assessment of non-performance risk; the achievement of milestones; discounts for restrictions on transfers of publicly traded securities; and the rights and preferences of the class of securities we own as compared with other classes of securities the portfolio has issued.

In addition, with respect to our debt investments for which no readily available market quotations are available, we will generally consider the financial condition and current and expected future cash flows of the portfolio company; the creditworthiness of the portfolio company and its ability to meet its current debt obligations; the relative seniority of our debt investment within the portfolio company's capital structure; the availability and value of any available collateral; and changes in market interest rates and credit spreads for similar debt investments.

Historically, difficult funding environments have resulted in companies not receiving financing and being subsequently closed down with a loss of investment to venture investors, and other companies receiving financing but at significantly lower valuations than the preceding rounds, leading to very deep dilution for those who do not participate in the new rounds of investment. Our best estimate of this non-performance risk has been quantified and included in the valuation of our portfolio companies as of September 30, 2016.

All investments recorded at fair value are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels related to the amount of subjectivity associated with the inputs to fair valuation of these assets are as discussed above.

As of September 30, 2016, approximately 90 percent of our portfolio company investments were classified as Level 3 in the hierarchy, indicating a high level of judgment required in their valuation.

The values assigned to our assets are based on available information and do not necessarily represent amounts that might ultimately be realized, as these amounts depend on future circumstances and cannot be reasonably determined until the individual investments are actually liquidated or become readily marketable. Upon sale of investments, the values that are ultimately realized may be materially different from what is presently estimated.

Stock-Based Compensation

Determining the appropriate fair-value model and calculating the fair value of share-based awards on the date of grant requires judgment. Historically, we have used the Black-Scholes-Merton option pricing model to estimate the fair value of employee stock options.

Management uses the Black-Scholes-Merton option pricing model in instances where we lack historical data necessary for more complex models and when the share award terms can be valued within the model. Other models may yield fair values that are significantly different from those calculated by the Black-Scholes-Merton option pricing model.

Management uses a binomial lattice option pricing model in instances where it is necessary to include a broader array of assumptions. We used the binomial lattice model for the 10-year NQSOs granted on March 18, 2009, and for performance-based restricted stock awards. These awards included accelerated vesting provisions or target stock prices that were based on market conditions.

Option pricing models require the use of subjective input assumptions, including expected volatility, expected life, expected dividend rate, and expected risk-free rate of return. Variations in the expected volatility or expected term assumptions have a significant impact on fair value. As the volatility or expected term assumptions increase, the fair value of the stock option increases. The expected dividend rate and expected risk-free rate of return are not as significant to the calculation of fair value. A higher assumed dividend rate yields a lower fair value, whereas higher assumed interest rates yield higher fair values for stock options.

In the Black-Scholes-Merton model, we used the simplified calculation of expected term as described in the SEC's Staff Accounting Bulletin 107 because of the lack of historical information about option exercise patterns. In the binomial lattice model, we use an expected term that assumes the options will be exercised at two times the strike price because of the lack of option exercise patterns. Future exercise behavior could be materially different than that which is assumed by the model.

Expected volatility is based on the historical fluctuations in the Company's stock. The Company's stock has historically been volatile, which increases the fair value of the underlying share-based awards.

GAAP requires us to develop an estimate of the number of share-based awards that will be forfeited owing to employee turnover. Quarterly changes in the estimated forfeiture rate can have a significant effect on reported share-based compensation, as the effect of adjusting the rate for all expense amortization after the grant date is recognized in the period the forfeiture estimate is changed. If the actual forfeiture rate proves to be higher than the estimated forfeiture rate, then an adjustment will be made to increase the estimated forfeiture rate, which would result in a decrease to the expense recognized in the financial statements. If the actual forfeiture rate proves to be lower than the estimated forfeiture rate, then an adjustment will be made to decrease the estimated forfeiture rate, which would result in an increase to the expense recognized in the financial statements. Such adjustments would affect our operating expenses and additional paid-in capital, but would have no effect on our net asset value.

Pension and Post-Retirement Benefit Plan Assumptions

The Company provides a Retiree Medical Benefit Plan for employees who meet certain eligibility requirements. Until it was terminated on May 5, 2011, the Company also provided an Executive Mandatory Retirement Benefit Plan for certain individuals employed by us in a bona fide executive or high policy-making position. Our former President accrued benefits under this plan prior to his retirement, and the termination of the plan has no impact on his accrued benefits. Several statistical and other factors that attempt to anticipate future events are used in calculating the expense and liability values related to our post-retirement benefit plans. These factors include assumptions we make about the discount rate, the rate of increase in health care costs, and mortality, among others.

The discount rate reflects the current rate at which the post-retirement medical benefit and pension liabilities could be effectively settled considering the timing of expected payments for plan participants. In estimating this rate, we consider the Citigroup Pension Liability Index in the determination of the appropriate discount rate assumptions. The weighted average rate we utilized to measure our post-retirement medical benefit obligation as of December 31, 2015, and to calculate our 2016 expense was 4.15 percent. We used a discount rate of 3.08 percent to calculate our pension obligation for the Executive Mandatory Retirement Benefit Plan.

Recent Developments - Portfolio Companies

On October 13, 2016, the Company made a \$500,000 follow-on investment in Petra Pharma Corporation, a privately held portfolio company.

On October 14, 2016, the Company made a \$47,272 follow-on investment in Senova Systems, Inc., a privately held portfolio company.

On October 19, 2016, Senova Systems, Inc., sold substantially all of its assets to an undisclosed buyer for an up-front payment and potential future milestone payments. Even if all of the milestone payments are received in full, we do not

expect to recover our cost basis of approximately \$4 million.

On October 28, 2016, the Company made a \$150,000 follow-on investment in AgTech Accelerator Corporation, a privately held portfolio company.

During October of 2016, we have sold the remaining 316,335 shares of OpGen, Inc., at an average sale price per share of \$1.70 for net proceeds, after commission, of \$538,833.

During October of 2016, we have sold an additional 111,618 shares of Champions Oncology, Inc., at an average sale price per share of \$1.67 for net proceeds, after commission, of \$186,478.

On November 4, 2016, the Company made a \$30,000 follow-on investment in Interome, Inc., a privately held portfolio company.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our business activities contain elements of risk. We consider the principal types of market risk to be valuation risk, interest rate risk and foreign currency risk. Although we are risk-seeking rather than risk-averse in our investments, we consider the management of risk to be essential to our business.

Valuation Risk

Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which market quotations are readily available and (ii) fair value as determined in good faith by, or under the direction of, the Board of Directors for all other assets. (See the "Valuation Procedures" in the "Footnote to Consolidated Schedule of Investments" contained in "Item 1. Consolidated Financial Statements.")

Because there is typically no public market for our interests in the privately held companies in which we invest, the valuation of the equity interests in that portion of our portfolio is determined in good faith by our Board of Directors with the assistance of our Valuation Committee, comprised of the independent members of our Board of Directors, in accordance with our Valuation Procedures. In the absence of a readily ascertainable market value, the determined value of our portfolio of equity interests may differ significantly from the values that would be placed on the portfolio if a ready market for the equity interests existed. Determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment, although our valuation policy is intended to provide a consistent basis for determining fair value of the portfolio investments. Factors that may be considered include, but are not limited to, readily available public market quotations; the cost of the Company's investment; transactions in the portfolio company's securities or unconditional firm offers by responsible parties; the financial condition and operating results of the company; the long-term potential of the business and technology of the company; the estimated time to exit our investment; the values and volatilities of similar securities issued by companies in similar businesses; multiples to revenues, net income or EBITDA that similar securities issued by companies in similar businesses receive; the proportion of the company's securities we own and the nature of any rights to require the company to register restricted securities under the applicable securities laws; management's assessment of non-performance risk; the achievement of milestones; and the rights and preferences of the class of securities we own as compared with other classes of securities the portfolio has issued.

In addition, with respect to our debt investments for which no readily available market quotations are available, we will generally consider the financial condition and current and expected future cash flows of the portfolio company; the creditworthiness of the portfolio company and its ability to meet its current debt obligations; the relative seniority of our debt investment within the portfolio company's capital structure; the availability and value of any available collateral; and changes in market interest rates and credit spreads for similar debt investments. Any changes in valuation are recorded in our Consolidated Statements of Operations as "Net (increase) decrease in unrealized depreciation on investments." Changes in valuation of any of our investments in privately held companies from one period to another may be volatile.

Investments in privately held, early-stage companies are inherently more volatile than investments in more mid- to late-stage companies. Such early-stage companies are easily affected by both internal and external forces. Our investee companies may lose much or all of their value in response to an internal or external adverse event. Conversely, these early-stage companies may gain in value in response to an internal or external positive development.

The values assigned to our assets are based on available information and do not necessarily represent amounts that might ultimately be realized, as these amounts depend on future circumstances and cannot be reasonably determined

until the individual investments are actually liquidated or become readily marketable. Upon sale of investments, the values that are ultimately realized may be materially different from what is presently estimated.

Interest Rate Risk

Interest rate sensitivity refers to the change in earnings that may result from changes in the level of interest rates. Our borrowings under our Loan Facility bear interest at a fixed rate of 10 percent per annum, and, therefore, changes in interest rate benchmarks, such as LIBOR, will not affect the interest rate risk on our Loan Facility.

We may also invest in both short- and long-term U.S. government and agency securities. To the extent that we invest in short- and long-term U.S. government and agency securities, changes in interest rates result in changes in the value of these obligations that result in an increase or decrease of our net asset value. The level of interest rate risk exposure at any given point

in time depends on the market environment, the expectations of future price and market movements, and the quantity and duration of long-term U.S. government and agency securities held by the Company, and it will vary from period to period.

In addition, market interest rates for high-yield corporate debt are an input in determining value of our investments in debt securities of privately held and publicly traded companies. Significant changes in these market rates could affect the value of our debt securities as of the date of measurement of value. Our investment income could be adversely affected should such debt securities include floating interest rates. We do not currently have any investments in debt securities with floating interest rates.

Foreign Currency Risk

Most of our investments are denominated in U.S. dollars. We currently have one investment denominated in Canadian dollars. We are exposed to foreign currency risk related to potential changes in foreign currency exchange rates. The potential loss in fair value on this investment resulting from a 10 percent adverse change in quoted foreign currency exchange rates is \$468,534 at September 30, 2016.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures. As of the end of the period covered by this report, the Company's management, under the supervision and with the participation of our chief executive officer and chief financial officer, conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as required by Rules 13a-15 of the 1934 Act). Disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the 1934 Act is recorded, processed, summarized and reported, within time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the issuer's management, as appropriate, to allow timely decisions regarding required disclosures. As of September 30, 2016, based upon this evaluation of our disclosure controls and procedures, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective.

(b) Changes in Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the 1934 Act) during the third quarter of 2016 to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We, and our consolidated subsidiaries, are not currently subject to any material pending legal proceedings threatened against us as of September 30, 2016. From time to time, we may be a party to certain legal proceedings incidental to the normal course of our business including the enforcement of our rights under contracts with our portfolio companies. We do not believe the outcome of these legal proceedings will have a material effect upon our business, financial condition or results of operations.

Item 1A. Risk Factors

Investing in our common stock involves significant risks relating to our business and investment objective. You should carefully consider the risks and uncertainties described in our Annual Report on Form 10-K for the year ended December 31, 2015, before you purchase any of our common stock.

The risks described in our Annual Report on Form 10-K are not the only risks facing our Company. Unknown additional risks and uncertainties, or ones that we currently consider immaterial, may also impair our business. If any of these risks or uncertainties materialize, our business, financial condition or results of operations could be materially adversely affected. In this event, the trading price of our common stock could decline, and you could lose all or part of your investment.

As of September 30, 2016, we believe that the following updates should be considered to the risk factors previously disclosed in response to “Item 1A. Risk Factors” of our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Approximately 55.7 percent of the net asset value attributable to our equity-focused portfolio company investments, or 47.6 percent of our net asset value, as of September 30, 2016, is concentrated in D-Wave Systems, Inc., Metabolon, Inc., AgBiome, LLC, and HZO, Inc.

At September 30, 2016, we valued our investment in D-Wave Systems, Inc., which had a historical cost to us of \$5,689,311, at \$11,498,191, our investment in Metabolon, Inc., which had a historical cost to us of \$7,231,212, at \$10,796,323, our investment in AgBiome, LLC, which had a historical cost to us of \$3,021,746, at \$7,837,991, and our investment in HZO, Inc., which had a historical cost to us of \$9,132,398, at \$5,755,099, which collectively represent 55.7 percent of the net asset value attributable to our equity-focused portfolio company investments, excluding our rights to potential future milestone payments from the sale of BioVex Group, Inc., to Amgen, Inc., or 47.6 percent of our net asset value.

Any downturn in the business outlook and/or substantial changes in the funding requirements of D-Wave Systems, Inc., Metabolon, Inc., AgBiome, LLC, and HZO, Inc., could have a significant effect on the value of our current investments in those companies, and the overall value of our portfolio, and could have a significant adverse effect on the value of our common stock.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Sales of Unregistered Equity Securities

We did not engage in unregistered sales of equity securities during the nine months ended September 30, 2016.

Issuer Purchases of Equity Securities

On August 6, 2015, our Board of Directors authorized a repurchase of up to \$2.5 million of the Company's common stock in the open market within a six-month period. Under the repurchase program, we may, but we are not obligated to, repurchase our outstanding common stock in the open market from time to time provided that we comply with the prohibitions under our Insider Trading Policies and Procedures and the guidelines specified in Rule 10b-18 of the Securities Exchange Act of 1934, as amended, including certain price, market volume and timing constraints. In addition, any repurchases are conducted in accordance with the 1940 Act. During the year ended December 31, 2015, we repurchased 509,082 shares at an average price of approximately \$2.36 per share, inclusive of commissions. This represented a discount of approximately 18.1 percent of the net asset value per

101

share at December 31, 2015. The total dollar amount of shares repurchased in this period was \$1,199,994, leaving a maximum of \$1,300,006 available for future program purchases as of December 31, 2015. This six-month period expired on February 6, 2016. On March 3, 2016, our Board of Directors reauthorized the repurchase of up to \$2.5 million of the Company's common stock within a six-month period from the proxy mailing date of April 29, 2016. This six-month period expired on October 31, 2016. As of September 30, 2016, no additional repurchases had occurred, leaving a maximum of \$2.5 million available for future repurchases. On November 3, 2016, our Board of Directors reauthorized the repurchase of up to \$2.5 million of the Company's common stock within a six-month period from the date of notice to investors, which has yet to be determined.

The following table discloses on a monthly basis the total number of shares repurchased (including the total number of shares repurchased under this program), the average price paid per share, and the maximum number of shares (or approximate dollar value) of shares that may yet be repurchased under the program.

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Program	(d) Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Program
August 21-31, 2015	88,875	\$ 2.54	88,875	\$ 2,274,557
September 1-30, 2015	209,944	2.44	298,819	1,762,338
October 1-12, 2015	119,365	2.20	418,184	1,500,003
November 30, 2015	11,899	2.22	430,083	1,473,643
December 1-9, 2015	78,999	2.20	509,082	1,300,006

(A) Common stock, warrants, options, membership units and, in some cases, preferred stock are generally non-income producing and restricted. The principal amount of debt and the number of shares of common and preferred stock and number of membership units are shown in the accompanying Consolidated Schedules of Investments as of September 30, 2016, and December 31, 2015.

(B) Represents the total amount of interest or dividends and yield-enhancing fees on debt securities credited to income for the portion of the year an investment was a control or affiliate investment, as appropriate. Amounts credited to preferred or common stock represent accrued bridge note interest related to conversions that occurred during the first nine months of 2016.

(C) Gross additions include increases in investments resulting from new portfolio investments, paid-in-kind interest or dividends, the amortization of discounts and fees. Gross additions also include net increases in unrealized appreciation or decreases in unrealized depreciation.

(D) Gross reductions include decreases in investments resulting from principal collections related to investment repayments or sales, the amortization of premiums and acquisition costs. Gross reductions also include net increases in unrealized depreciation or decreases in unrealized appreciation.

(E) We own 25 percent of Senova Systems, Inc., but we do not have significant representation on its board of directors.

**Information related to the amount of equity in the net profit and loss for the year for the investments listed has not been included in this schedule. This information is not considered to be meaningful owing to the complex capital structures of the portfolio companies, with different classes of equity securities outstanding with different preferences in liquidation. These investments are not consolidated, nor are they accounted for under the equity method of accounting, with the exception of Accelerator IV-New York Corporation and AgTech Accelerator Corporation, which are accounted for under the equity method.
