PART I.

Item 1. BUSINESS

Introduction

Wild Oats Markets, Inc. ("Wild Oats") is the second largest natural foods supermarket chain in North America. As of March 30, 2001, we operated 109 natural food stores, including two small vitamin stores, in 23 states and British Columbia, Canada under several names, including:

- Wild Oats Market (nationwide)
- Henry's Marketplace (San Diego and Orange County, CA)
- Nature's Fresh and Nature's Northwest (metropolitan Portland, OR)
- Sun Harvest Market (TX)
- Capers Community Market (British Columbia, Canada)

We are dedicated to providing a broad selection of high quality natural and gourmet foods and related products at competitive prices in an inviting and educational store environment emphasizing customer service. Our stores range in size from 2,700 to 45,000 gross square feet and feature natural alternatives for virtually every product category found in conventional supermarkets. Wild Oats provides its customers with a one-stop, full-service shopping alternative to both conventional supermarkets and traditional health food stores. We believe we have developed a differentiated concept that appeals to a broader, more mainstream customer base than the traditional natural foods store. Our comprehensive selection of natural health foods products appeals to health conscious shoppers while we also offer virtually every product category found in a conventional supermarket, including grocery, produce, meat, poultry, seafood, dairy, frozen, food service, bakery, vitamins and supplements, health and body care and household items. Our positioning, coupled with industry data that states that the natural products industry comprises less than 5% of the total grocery industry, offers significant potential for us to continue to expand our customer base.

Wild Oats' sales grew from \$721.1 million during fiscal 1999 to \$838.1 million during fiscal 2000, an increase of 16.2%, due largely to the opening of 11 new stores, the acquisition of two operating stores and the relocation of three stores in fiscal 2000. As part of the strategic repositioning announced by the Company in the second and fourth

quarters of fiscal 2000, the Company identified 22 natural food stores for closure or sale, and during the second, third and fourth quarters of fiscal 2000, the Company closed 10 natural foods stores and sold three natural food stores. The Company also closed five natural food stores in the first quarter of fiscal 2000, and closed two small vitamin stores in the second and third quarters of 2000. As a result, we had 106 stores located in 22 states and Canada at the end of fiscal 2000, as compared to 110 natural foods stores in 22 states and Canada as of the end of fiscal 1999.

As a result of our aggressive growth over the last four years, we have increased our penetration of existing markets, entered new geographic markets and created a stronger platform for future growth. We believe our growth has resulted in operating efficiencies created by:

- warehousing, distribution and administrative economies of scale
- improved volume purchasing discounts
- coordinated merchandising and marketing strategies

Our aggressive growth has also resulted in certain acquisition integration difficulties that have had a negative impact upon our overall operating results in fiscal 2000. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Comparable Store Sales Results."

Natural products industry

Retail sales of natural products have grown from \$7.6 billion in 1994 to \$21.5 billion in 1999, a 23% compound annual growth rate, and total sales of natural products (including over the internet, by practitioners, by multi-level marketers and through mail order) reached \$28.0 billion in 1999. Sales growth in the traditional grocery industry has remained relatively flat over the same period. We believe that this growth reflects a broadening of the natural products consumer base which is being propelled by several factors, including healthier eating patterns, increasing concern regarding food purity and safety and greater environmental awareness. While natural products generally have higher costs of production and correspondingly higher retail prices, we believe that more of the population now attributes added value to high quality natural products and is willing to pay a premium for such products. The increase in the availability of natural products in conventional supermarkets, whose sales of natural products increased by 19.1% in 1999, demonstrates the increase in consumer acceptance of natural products. Despite the increase in natural foods sales within conventional supermarkets, we believe that conventional supermarkets still lack the total shopping experience that natural foods stores offer. Many natural foods stores develop a more personal relationship with increased interaction between store staff and customers than that of conventional supermarkets. Conventional supermarkets may also have less appeal for natural foods shoppers because they are largely dependent on commercial brand names, resulting in a more limited selection of natural products from which to choose. In addition, conventional supermarkets may not be able to match our pricing in many categories because of the greater volume purchase discounts we receive on natural products. As a result, while conventional supermarkets may carry a limited selection of natural foods products, they do not duplicate the inventory of natural foods stores, which carry a more comprehensive selection of natural products sourced from a large number of independent vendors.

Operating strategy

Our objective is to become the grocery store of choice both for natural foods shoppers and quality-conscious consumers in each of our markets by emphasizing the following key elements of our operating strategy:

Destination format.

Our stores are one-stop, full-service supermarkets for customers seeking high quality natural and gourmet foods and related products. In most of our stores, we offer between 10,000 and 25,000 stock-keeping units of natural foods

products in virtually every product category found in a conventional supermarket. Our stores carry a much broader selection of natural and gourmet foods and related products than those offered by typical independent natural foods stores or conventional supermarkets.

High quality, unique products.

We seek to offer the highest quality products throughout our merchandise categories and emphasize unique products and brands not typically found in conventional supermarkets. Each of our stores tailors its product mix to meet the preference of its local market, in particular sourcing produce from local organic growers whenever possible. We also operate regional commissary kitchens and bakeries that provide our stores with fresh bakery items and a unique assortment of prepared foods for the quality and health-conscious consumer.

Educational and entertaining store environment.

Each store strives to create a fun, friendly and educational environment that makes grocery shopping enjoyable, encouraging shoppers to spend more time in the store and to purchase new products. In order to enhance our customers' understanding of natural foods and how to prepare them, we train our store staff to educate customers as to the benefits and quality of our products and prominently feature educational brochures and newsletters, as well as an in-store consumer information department. In addition, many stores offer café seating areas, espresso and fresh juice bars and in-store massage therapists, all of which emphasize the comfortable, relaxed nature of the shopping experience. We believe our knowledgeable store staff and high ratio of store staff to customers results in significantly higher levels of customer service than in a conventional supermarket. In fiscal 2001, we plan to increase staffing levels at many of our stores to address our guests' requests for higher service levels.

Extensive community involvement.

We seek to engender customer loyalty by demonstrating our high degree of commitment to the local community. Each store makes significant monetary and in-kind contributions to local not-for-profit organizations through programs such as "5% Days," where a store may, once each calendar quarter, donate 5% of its gross sales from one day to a local not-for-profit group, and a "Charity Work Benefit" where we pay employees for time spent working for local charities.

Multiple store formats.

We operate two store formats: natural foods supermarkets, which emphasize natural and organic products and high-quality service; and farmers' market stores, which emphasize fresh produce, natural living and value. Our multiple store format enables us to customize our stores to specific site characteristics and to meet the unique needs of a variety of markets. We believe that this multiple store format strategy allows us to operate successfully in a diverse set of markets, enabling us to reach a broader customer base and to increase our market penetration.

Competitive pricing.

We seek to offer products at prices which are at or below those of other natural foods stores. We have implemented a competitive price program designed to ensure that high quality, all natural items in each product category are offered at prices that are competitive with those offered on similar items in conventional supermarkets. We have also expanded our private label programs to include a large selection of high quality private label products under our "Wild Oats®" and "A Wild Oats Down to Earth Value" lines at competitive prices. We believe these pricing programs broaden our consumer appeal and encourage our customers to fill more of their shopping needs at our stores.

Motivated staff.

We have developed a unique culture by encouraging active participation and communication among all staff members, advocating store-level participation in a variety of marketing, merchandising and operating decisions and rewarding staff based upon the achievement of targeted store-level sales, profitability and other financial performance criteria. In addition, we seek to hire individuals dedicated to the concept of natural foods and a healthy lifestyle. We believe that these practices translate into a satisfied and motivated staff and a high level of customer service.

In the first half of fiscal 2000, as part of a strategic repositioning announced by the Company, we conducted an in-depth survey of our guests and staff to determine who our target customers are and how best to market to and serve those target customers. The Company developed, from that survey data, a comprehensive strategic plan to increase sales, service, guest satisfaction and staff satisfaction. A test of several marketing and service initiatives was commenced in 14 stores in January 2001, including new merchandising, increased advertising, increases in staffing and implementation of certain personnel initiatives. The Company will evaluate the results from these stores through the first half of 2001 and then determine which, if any, of these initiatives will be implemented throughout the Company.

Growth strategy

Our growth strategy is to increase sales and income through:

- improved guest service and store execution
- opening of new stores
- year over year comparable store sales growth

We plan to open and relocate as many as eight stores in fiscal 2001. We intend to continue our expansion strategy by increasing penetration in existing markets and expanding into new regions which we believe are currently underserved by natural foods retailers. While we believe that most of our store expansion will result from new store openings, we may continue to evaluate acquisition opportunities in both existing and new markets.

As of the date of this report, we have opened four new stores (Irvine, California; Westport, Connecticut; Omaha, Nebraska and Cleveland, Ohio) in fiscal 2001. We currently have leases or letters of intent signed for seven additional new stores to be opened or relocated in the remainder of fiscal 2001 and in fiscal 2002, including two relocations of existing stores. The proposed sites are in southern California (three sites), south Florida, Kentucky, Missouri and Maine.

Our growth strategy will be affected in fiscal 2001 and beyond by our ability to successfully renegotiate the terms of our existing credit facility, which is currently in non-monetary default as a result of two financial covenant violations, although the lenders have not accelerated repayment of our outstanding borrowings. We are currently negotiating an amendment to the credit facility to waive the outstanding defaults and provide covenant relief in exchange for an increase in interest rates, limitations on the execution of leases and capital expenditures, and the granting of a security interest in certain of our assets. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources."

Acquisition of assets of independent and small chain natural foods store operators

. During fiscal 2000, we acquired two operating natural foods grocery stores in Hemet and Escondido, California.

Opening of new stores.

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

In fiscal 2000, we opened 11 new stores in Laguna Niguel, San Diego (two) and Yorba Linda, California; Kansas City, Kansas; St. Louis, Missouri; Reno, Nevada; Cleveland and Cincinnati, Ohio; Bend and Portland, Oregon; and relocated three stores in West Hartford, Connecticut; Las Vegas, Nevada; and Salt Lake City, Utah. We also closed 15 underperforming natural foods stores and two small vitamin stores, as well as sold three stores in related transactions. To date in fiscal 2001, we have opened four new stores in Irvine, California; Westport, Connecticut; Omaha, Nebraska and Cleveland, Ohio; and closed one store. In fiscal 1999, we opened eight new stores in Phoenix, Arizona; San Diego, California; Hinsdale and Evanston, Illinois; Madison, New Jersey; Albuquerque, New Mexico; Tulsa, Oklahoma; and Nashville, Tennessee; and relocated five stores in Phoenix, Arizona; Ft. Collins, Colorado; Portland, Oregon; Salt Lake City, Utah; and Memphis, Tennessee.

Year over year comparable store sales growth.

Comparable store sales declined 2.6% in 2000, due to greater than expected competition and cannibalization of existing stores, integration difficulties from certain stores acquired in fiscal 1999 and difficulties in implementing our operating strategies. After in-depth examination of our operations and surveying of our guests and staff, we formulated a strategic plan to increase sales that includes increasing store size, staffing levels, and advertising, as well as remerchandising with an emphasis on food service, artisan products and mercantile. We intend to attract new customers, generate repeat business and gradually increase the size of the average transaction by introducing, expanding and improving key merchandise categories such as perishables (produce, deli and prepared foods) and private label products, as well as implementing expanded marketing programs and improving customer service through aggressive training programs.

Our comparable store sales results have been negatively affected in the past by planned cannibalization, which is the loss of sales at an existing store when we open a new store nearby. The greater than expected cannibalization we experienced in fiscal 2000 as a result of the opening of stores in existing markets has diminished and will continue to diminish as we approach the one-year anniversary of the new stores. There can be no assurance that comparable store sales for any particular period will not decrease in the future.

Products

We offer our customers a broad selection of unique, high-quality products that are natural alternatives to those found in conventional supermarkets. We generally do not offer well-known national conventional brands and focus instead on a comprehensive selection of lesser-known natural branded products within each category. Although the core merchandise assortment is similar at each of our stores, individual stores adapt the product mix to reflect local and regional preferences. Our stores source produce from local organic growers whenever possible and typically offer a variety of local products unique to the region. In addition, in certain markets, our stores may offer more food service, gourmet and ethnic items as well as feature more value-added services such as gift baskets, catering and home delivery, while in other markets, a store may focus more on bulk foods, produce and staple grocery items. We regularly introduce new high-quality and locally-grown products in our merchandise selection to minimize overlap with products carried by conventional supermarkets.

In addition, we intend to continue to expand and enhance our prepared food and in-store café environment. We believe that consumers are increasingly seeking convenient, healthy, "ready-to-eat" meals and that by increasing our commitment to this category we can provide an added service to our customers, broaden our customer base and further differentiate us from conventional supermarkets and traditional natural foods stores.

Quality standards.

Our objective is to offer products that generally meet the following standards:

- free of preservatives, artificial colors, chemical additives and added hormones
- organically grown, whenever possible
- minimally processed
- not tested on animals

We continually evaluate new products, quality issues and controversial ingredients and frequently counsel store managers on compliance with our product standards.

Private label.

The natural foods industry is highly fragmented and characterized by many small independent vendors. As a result, we believe that our customers do not have strong loyalty to particular brands of natural foods products. In contrast to conventional supermarkets whose private label products are intended to be low cost alternatives to name-brand products, we have developed our "Wild Oats®" private label program in order to build brand loyalty to specific products based on our relationship with our customers and our reputation as a natural foods authority. Through this program, we have successfully introduced a number of high quality, unique private label products, such as cereals, breads, salad dressings, vitamins, chips, salsa, pretzels, cookies, juices, pasta, pasta sauces, oils, frozen products such as pizza and veggie burgers, and pet foods. In fiscal 2000, we introduced a new line of "Wild Oats®" imported goods, including olive oil, roasted red peppers, pickles and cherries. We intend to continue to expand our private label product offerings on a selected basis. In fiscal 1999, we introduced our "A Wild Oats Down to Earth Value" label of "staple" products, such as peanut butter, cookies, coffee, canned tomatoes, bottled water and paper products, to offer our customers quality natural products at competitive prices.

Pricing.

In general, natural and gourmet foods and related products have higher costs of production and correspondingly higher retail prices than conventional grocery items. Our pricing strategy has been to maintain prices that are at or below those of our natural foods competitors while educating our customers about the higher quality and added value of our products to differentiate them from conventional products. Like most conventional supermarkets, we regularly feature dozens of sale items. Sale items are promoted through a variety of media, including direct mail, newspapers and in-store flyers. We regularly monitor the prices at natural foods and conventional supermarket competitors to ensure our prices remain competitive.

Company culture and store operations

Company culture.

Our culture is embodied in our mission statement, which stresses responsibility to our guest, our staff, our bottom line, and our communities. In particular, we believe that knowledgeable, satisfied and motivated staff members have a positive impact on store performance and overall profitability. We have made a substantial commitment to staff training, including the creation of "Wild Oats University," an in-house training program, and in fiscal 2000 we hired a Vice President of Training and Development to oversee staff training, with a focus on improved guest service.

Management and employees.

Our stores are organized into geographic regions, each of which has a regional director who is responsible for the store operations within his or her region and who reports to our senior management. The regional directors are responsible for, and frequently visit, their cluster of stores to monitor financial performance and ensure adherence to our operating

standards. We maintain a staff of corporate level department specialists including Natural Living, Food Service, Produce, Meat/Poultry/Seafood and Grocery purchasing directors who manage centralized buying programs and assist with store-level merchandising, pricing and staff training to ensure company-wide adherence to product standards and store concept.

Staff members at the store and home-office levels participate in an incentive plan that ties compensation awards to the achievement of specified store-level or company-wide sales, profitability and other performance criteria. We also seek to foster enthusiasm and dedication in our staff members through comprehensive benefits packages, including health and disability insurance and an employer-matching 401(k) plan.

Purchasing and distribution

We have a centralized purchasing function which sets product standards, approves products and negotiates volume purchase discount arrangements with distributors and vendors. Individual store purchases are handled through department managers who make purchasing decisions within these established parameters. This approach enables each store to customize its product mix to meet the needs and preferences of its customers while adhering to our established product standards and allowing each store to benefit from our volume purchasing discounts.

The wholesale segment of the natural foods industry provides a large and growing array of product choices across the full range of grocery product categories. Although we purchase products from approximately 8,000 suppliers, in fiscal 2000 approximately 27% of the Company's inventory purchases were from United Natural Foods Inc. ("UNFI"), a wholesale distributor that operates multiple warehouses nationwide and with whom we are in the second of a four-year buying agreement. We believe that UNFI has the capacity to service all of our existing stores as well as most of our future sites. As a result of our rapid growth, we have been able to negotiate greater volume discounts with this distributor and certain other vendors. In fiscal 1999, we entered into a supply agreement with Nutricia (formerly GNP), under which Nutricia manufactures for us certain private label vitamins and supplements. The agreement has a three-year term, but is terminable by either party with advance notice. We have no supply contracts with the majority of our smaller vendors, who could discontinue selling to us at any time. Although we believe that we could develop alternative sources of supply, any such termination may create a short-term disruption in store-level merchandise selection.

Most products are delivered directly to our stores by vendors and distributors. We currently operate four warehouse facilities in Denver, Colorado; Los Angeles and San Diego, California and San Antonio, Texas, which receive and distribute truckload purchases of produce and grocery items and distribute products that cannot be delivered directly to the stores by outside vendors. We maintain a small fleet of local delivery vans and over-the-road trucks. As we enter new markets, we will evaluate the need for additional warehouse and distribution facilities.

We operate six commissary kitchens in Phoenix, Arizona; Los Angeles, California; Denver, Colorado; Santa Fe, New Mexico; Portland, Oregon and Vancouver, British Columbia, Canada, as well as a bakeries in Phoenix and Tucson, Arizona; San Diego, California and Denver, Colorado. These facilities produce deli food, take-out food, bakery products and certain private label items for sale in our stores. Each kitchen can make daily deliveries to stores within a hundred mile radius of the facility. We will evaluate the need for new commissary kitchens as we expand into new markets.

Marketing

We recognize the importance of building brand awareness within our trade area and advertise in traditional media outlets such as radio, newspapers, outdoor and direct mail to gain new customer trial and repeat business. As part of our marketing strategy, we have increased our use of radio, direct mail and newspaper inserts to increase our market exposure to a broader base of customers. Our farmers' market format stores primarily use flyers and "weekly specials" advertising to generate consumer interest and increase customer traffic. We also focus on in-store consumer education

through the use of a variety of media, including in-store flyers, informational brochures and signage that promote the depth of our merchandise selection, benefits of natural products and competitive prices. When we first enter a new market, we execute an intense marketing campaign to build awareness of our new store and its selection of natural products. After the initial campaign, this advertising is supplemented by the marketing strategies described above.

Our advertising costs historically have been less than 1.5% of sales, although as part of our strategic repositioning, we intend to expand our advertising program in certain regions, which will increase advertising expense in those regions. We operate a multifaceted annual promotional program to our vendors which allows for different degrees of promotional participation. In exchange for participation in our promotional program, vendors receive access to national advertising programs and feedback on volume movement.

Management information systems

Our management information systems have been designed to provide detailed store-level financial data, including sales, gross margin, payroll and store contribution, to regional directors and store directors and to our headquarters on a timely basis. Currently, certain inventory management systems are processed manually. We purchased a software system that allows us to establish centralized pricing on certain merchandise and to track product movement, and have implemented such system in all of our Wild Oats stores. In the first half of fiscal 2001, we will be installing the system to track product movement in our Henry's Marketplace stores in the metropolitan San Diego area. The Henry's stores host their own pricing structure.

We have implemented new, faster credit card processing systems company-wide to reduce transaction time at the cash register and the cost to us of individual credit card transactions. We have also implemented a wide-area network to allow faster data transmissions between our headquarters and stores, and between our stores and our credit card processor. The credit card processing system is fully operational in our stores, with the exception of the stores in Canada and a few of our smaller stores.

In fiscal 1999, we standardized our timekeeping systems throughout our stores, and installed new software that now allows us to process payroll in-house instead of through a third-party processor. In the first quarter of fiscal 2001, we began processing our Canadian payroll in-house. We believe that by handling payroll in-house, we have greater accuracy in payroll processing, greater control over payroll and, in the future, we expect to realize a cost savings by not paying outside processing fees.

Competition

Our competitors currently include other independent and multi-unit natural foods supermarkets, smaller traditional natural foods stores, conventional supermarkets and specialty grocery stores. While certain conventional supermarkets, smaller traditional natural foods stores and small specialty stores do not offer as complete a range of products as we do, they compete with us in one or more product categories. A number of other natural foods supermarkets offer a range of natural foods products similar to those offered in our stores. We believe that the principal competitive factors in the natural foods industry include customer service, quality and variety of selection, store location and convenience, price and store atmosphere. We believe that our primary competitor is Whole Foods Market, Inc., a company based in Texas. We currently compete directly with Whole Foods in California, Colorado, Florida, Illinois, Massachusetts, New Mexico and Texas.

Employees

As of March 1, 2001, we employed approximately 6,730 full-time individuals and 2,350 part-time individuals. Approximately 8,830 of our employees are engaged at the store-level and 250 are devoted to regional administrative and corporate activities. We believe that we maintain a good relationship with our employees. One small group of employees at one of our acquired stores was unionized at the time of the store's acquisition and continues to be

unionized, and the workforce was unionized at another smaller store subsequently sold as part of a multi-store transaction in fiscal 2000. We anticipate that in the future one or more of our stores may be the subject of attempted organizational campaigns by labor unions representing grocery industry workers, and that from time to time certain of our stores may be picketed by local labor unions relating to area wage and benefit standards. Four of our stores (including two Henry's stores in metropolitan San Diego, California) are currently being picketed relating to area standards.

Going Concern Matters

The financial statements accompanying this report on Form 10-K have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. As discussed in "Notes to Consolidated Financial Statements - Note 2 - Going Concern Matters", the terms of our credit facility require, among other things, compliance with certain financial ratios on a quarterly basis. As a result of restructuring charges incurred during fiscal 2000, we were not in compliance with the fixed charge coverage ratio and minimum net income covenants under our credit facility as of and for the quarter ended December 30, 2000, and as a result, our lenders have issued a notice of default, although no acceleration of outstanding debt has been requested. All borrowings outstanding under the credit facility at December 30, 2000 are considered to be due on demand and accordingly, are classified as a current liability at December 30, 2000. We currently do not have sufficient funds to pay all outstanding indebtedness. The Company currently is negotiating an amendment of its credit facility that may include the payment of an amendment fee, an increase in interest rates, a security interest in certain of our assets and additional covenants relating to capital expenditures and new leases. In conjunction with the Company's negotiations to amend its credit facility and obtain less restrictive covenants and other terms and conditions therein, the Company also proposes to raise approximately \$30.0 million in equity financing to provide additional liquidity. If the Company's lenders accept the amendments currently proposed by the Company, then the Company's borrowing capacity would be limited to \$125 million, the maturity date of the credit facility would remain August 1, 2003, the interest rate would be increased periodically, and all existing events of default would be waived as of the amendment date. If we are not successful in negotiating an amendment acceptable to our lenders, the lenders could accelerate repayment of all outstanding indebtedness. We currently do not have sufficient funds to repay all outstanding indebtedness. Although no assurances can be given, we expect that we would be in compliance throughout the term of the amended credit facility with respect to the financial and other covenants, including those regarding funded debt ratio, fixed charge coverage ratio, minimum year-to-date net income, tangible net worth, capital expenditure limits, and new lease limits. We believe that cash generated from operations will be sufficient to satisfy the Company's currently budgeted capital expenditure and debt service requirements through fiscal 2001 and that no additional funding will be necessary. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources."

PART II.

Item 6. SELECTED FINANCIAL DATA

(in thousands, except per-share amounts and number of stores)

The following data for the fiscal years ended December 30, 2000; January 1, 2000; January 2, 1999; December 27, 1997; and December 28, 1996 are derived from the consolidated financial statements of the Company. The following data should be read in conjunction with the Company's consolidated financial statements, related notes thereto and other financial information included elsewhere in this report on Form 10-K.

FISCAL YEAR	2000	1999	1998	1997	1996

(1) In fiscal 1999 the Company recorded \$281,000 in expenses associated with a cumulative effect of a change in accounting principle. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Preopening Expenses."

(2) As a result of restructuring charges incurred during fiscal 2000 and as discussed elsewhere in this document, the Company was not in compliance with certain covenants under the credit facility as of and for the quarter ended December 30, 2000. Accordingly, all outstanding borrowings (\$123,944) under the credit facility at December 30, 2000 are classified as a current liability.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report on Form 10-K contains certain forward-looking statements regarding our future results of operations and performance. Important factors that could cause differences in results of operations include, but are not limited to, the Company's ability to negotiate a suitable amendment to its outstanding line of credit facility, the success of the Company's currently proposed strategic repositioning initiatives, the successful transition of operating authority to our new Chief Executive Officer Perry Odak, the timing and execution of new store openings, relocations, remodels, sales and closures, the timing and impact of promotional and advertising campaigns, the impact of competition, changes in product supply, changes in management information needs, changes in customer needs and expectations, governmental and regulatory actions, and general industry or business trends or events, changes in economic or business conditions in general or affecting the natural foods industry in particular, and competition for and the availability of sites for new stores and potential acquisition candidates. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Cautionary Statement Regarding Forward-Looking Statements." All information stated herein has been revised to reflect the stock-for-stock transactions, accounted for as poolings of interests, with Henry's Marketplace, Inc. and Sun Harvest Farms, Inc., which were consummated on September 27, 1999 and December 15, 1999, respectively.

Overview

Store openings, closings, sales, remodels, relocations and acquisitions

. In fiscal 2000, we opened 11 new stores in Laguna Niguel, San Diego (two) and Yorba Linda, California; Kansas City, Kansas; St. Louis, Missouri; Reno, Nevada; Cleveland and Cincinnati, Ohio; Bend and Portland, Oregon; and relocated three stores in West Hartford, Connecticut; Las Vegas, Nevada; and Salt Lake City, Utah. We also acquired two operating natural food stores in Escondido and Hemet, California. We plan to open or relocate as many as eight stores in fiscal 2001. Through the date of this report, we have opened four new stores in Irvine, California; Westport, Connecticut; Omaha, Nebraska and Cleveland, Ohio. As of December 30, 2000, the Company had closed 15 natural food stores and two small vitamin stores and sold three natural food stores. The locations of the closed or sold stores are: Hollywood, Mission Viejo, San Diego and Santa Barbara, California; Denver, Colorado; Hartford and Norwalk, Connecticut; Framingham, Massachusetts; Las Vegas, Nevada (two stores); Madison, New Jersey; Santa Fe, New Mexico (two stores); Memphis, Tennessee; Dallas and San Antonio (one natural foods and two small vitamin stores), Texas; and Salt Lake City, Utah (two stores).

Our ability to open additional stores in fiscal 2001 and beyond will depend upon our ability to successfully negotiate an amendment to our existing credit facility. As of December 30, 2000, we were in non-monetary default as a result of our violation of certain financial covenants contained in our credit facility, although our lenders have not accelerated repayment on our outstanding debt. All borrowings outstanding under the credit facility at December 30, 2000 are considered to be due on demand and accordingly are classified as a current liability at December 30, 2000. We are currently negotiating an amendment to the credit facility that, if agreed upon, will waive the outstanding defaults in exchange for limitations on our execution of new leases and capital expenditures, as well other financial covenants, increased interest rates and an amendment fee. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources."

As has been our past practice, we will continue to evaluate the profitability, strategic positioning, impact of potential competition on and sales growth potential of all of our stores on an ongoing basis. We may, from time to time, make decisions regarding closures, disposals, relocations or remodels in accordance with such evaluations. As a result of such evaluations and as part of the strategic repositioning described below, in fiscal 2000 we closed 15 operating grocery stores and two small vitamin stores and sold three stores in related transactions. To date, in the first quarter of fiscal 2001, we have closed one store identified for closure as part of the strategic repositioning described below, and are considering the sale or closure of as many as six more stores in the first half of fiscal 2001.

Restructuring and asset impairment charges; strategic repositioning.

In the second quarter of fiscal 2000, we undertook an assessment of our inventory of operating and vacant properties as part of a strategic repositioning of the Company. We made certain decisions related to our operations which identified ten stores to be sold or closed and resulted in a restructuring charge of \$20.6 million. In the fourth quarter of fiscal 2000, as part of the ongoing assessment, we further determined that we would close or sell an additional twelve stores whose performance did not meet Company expectations. As a result of this decision to close or sell additional stores, the Company recorded an additional pre-tax restructuring charge of \$21.4 million in the fourth quarter of fiscal 2000. As of December 30, 2000, the Company had closed 10 and sold three of the stores identified for sale or closure as part of these restructuring and asset impairment charges. The locations of the closed stores are: Mission Viejo, San Diego and Santa Barbara, California; Denver, Colorado; Framingham, Massachusetts; Madison, New Jersey; Santa Fe, New Mexico; Memphis, Tennessee; and Dallas and San Antonio, Texas. The locations of the three sold stores are: Hollywood, California; Norwalk, Connecticut; and Santa Fe, New Mexico. As of December 30, 2000, eight stores remained to be sold or closed by the end of fiscal 2001 and one in the first quarter of fiscal 2002. One of the remaining stores to be closed, in Denver, Colorado, was closed during the first quarter of fiscal 2001. As the result of customer research and internal assessments performed in fiscal 2000, the Company expanded the scope of its strategic repositioning and plans to spend up to \$20 million through fiscal 2001 for additional staff training, advertising, store and corporate office level staffing and other strategic initiatives designed to improve our store sales results.

Results of Operations.

Our results of operations have been and will continue to be affected by, among other things, the number, timing and mix of store openings, acquisitions, relocations or closings. New stores build their sales volumes and refine their merchandise selection gradually and, as a result, generally have lower gross margins and higher operating expenses as a percentage of sales than more mature stores. We anticipate that the new stores opened in fiscal 2001 will experience operating losses for the first six to 12 months of operation, in accordance with historical trends. Further, acquired stores, while generally profitable as of the acquisition date, generate lower gross margins and store contribution margins than our company average due to their substantially lower volume purchasing discounts and the integration of the acquired stores into our operating systems. Over time, we expect that the gross margin and store contribution margin of acquired stores approach our company average.

Other factors that could cause acquired stores to perform at lower than expected levels include, among other things, turnover of regional and store management, disruption of advertising, changes in product mix and delays in the integration of purchasing programs. The Company continues to experience integration difficulties with certain of the stores acquired or added to our store base in fiscal 1999, and as a result such stores are having a negative impact on our consolidated results of operations. We expect that these stores will take substantially longer to show gross margin and store contribution margin improvements. As part of the Company's strategic repositioning, we plan to increase advertising expenditures and staffing at some of our acquired stores to change prior practices that may have contributed to weaker than expected performance from such stores.

We are actively upgrading, remodeling or relocating some of our older stores. We plan to complete the remodel or remerchandise as many as 10 of our older stores in the first half of fiscal 2001. Remodels and relocations typically cause short-term disruption in sales volume and related increases in certain expenses as a percentage of sales, such as payroll. Remodels on average take between 90 and 120 days to complete. Certain remodels in fiscal 2000 took longer to complete, resulting in greater than projected sales disruptions. We cannot predict whether sales disruptions and the related impact on earnings may be greater in time or volume than projected in certain remodeled or relocated stores.

Store format and clustering strategy.

We operate two store formats: natural foods supermarkets and farmers' markets. The natural foods supermarket format is generally 20,000 to 35,000 gross square feet, and the farmers' markets are generally 15,000 to 25,000 gross square feet. Our profitability has been and will continue to be affected by the mix of natural foods supermarkets and farmers' market stores opened, acquired or relocated and whether stores are being opened in markets where we have an existing presence. As part of our strategic repositioning, we intend to increase the size of our natural foods supermarket stores over time to an average size of 28,000 to 30,000 square feet. We are currently making revisions to our store format and design, including, among other things, expanding the average size of our natural foods supermarket format stores to an average of 28,000 to 30,000 square feet, expanding our selections of gourmet and crossover products, housewares, gift items, beer and wine, bakery and floral and redesigning store layouts and signage. We also plan to expand the Henry's Marketplace® farmers' market-style store format as our second, parallel store format. We believe this format, which is primarily located in the metropolitan San Diego, California area, appeals to a more value-conscious customer.

In the past, we have pursued a strategy of clustering stores in each of our markets to increase overall sales, reduce operating costs and increase customer awareness. In prior years, when we opened a store in a market where we had an existing presence, our sales and operating results declined at certain of our existing stores in that market. However, over time, the affected stores generally achieved store contribution margins comparable to prior levels on the lower base of sales. Certain new stores opened in fiscal 1999 and fiscal 2000 have caused a greater degree of cannibalization than previously expected, and at this time it does not appear that the store contribution margins at the older, affected stores in these regions will rebound to their prior levels. In certain existing markets the sales and operating results trends for other stores may continue to experience temporary declines related to the clustering of stores. We are currently reevaluating our clustering strategy in response to greater than expected sales cannibalization in certain existing markets where we opened new stores in fiscal 2000.

Comparable store sales results.

Sales of a store are deemed to be comparable commencing in the thirteenth full month of operations for new, relocated and acquired stores. A variety of factors affect our comparable store sales results, including, among others:

- the opening of stores by us or by our competitors in markets where we have existing stores
- the relative proportion of new or relocated stores to mature stores
- the timing of advertising and promotional events
- store remodels
- our ability to effectively execute our operating plans
- changes in consumer preferences for natural foods products
- availability of produce and other seasonal merchandise
- general economic conditions.

Past increases in comparable store sales may not be indicative of future performance.

Our comparable store sales results have been negatively affected in the past by, among other factors, planned cannibalization, which is the loss of sales at an existing store when we open a new store nearby, resulting from the implementation of our store clustering strategy. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Store format and clustering strategy." Comparable store sales results were negatively affected in fiscal 2000 by planned cannibalization due to the openings in fiscal 1999 and fiscal 2000 of new or relocated stores in several of our existing markets, including, among others: Phoenix, Arizona; San Diego, California; Kansas City and St. Louis, Missouri; Portland, Oregon; Albuquerque, New Mexico; Nashville, Tennessee and Salt Lake City, Utah. For certain stores opened in fiscal 1999 and fiscal 2000, we experienced a higher degree of cannibalization than in the past in markets where we expected higher demand for additional stores. Certain stores, such as the Henry's Marketplace

® format stores, which depend heavily on produce sales, are more susceptible to sales fluctuations resulting from the availability and price of certain produce items. In addition, in fiscal 2000 certain stores faced greater than expected competition both from other natural foods grocery stores and from increased natural foods offerings in conventional and gourmet grocery stores, which negatively affected comparable store sales results. As a result of the higher degree of cannibalization, as well as reduced levels of marketing in certain regions, delays in remodels, increased competition in some regions, difficulty in properly executing our operating plans and other factors, comparable store sales decreased 3.5% in the fourth quarter of fiscal 2000 and 2.6% for fiscal 2000. We expect comparable store sales results to be flat to low single-digits for fiscal 2001 as a whole, with the results flat to slightly negative in the first half of the year and improving in the remainder of the year. There can be no assurance that comparable store sales for any particular period will not decrease in the future.

Pre-opening expenses.

Pre-opening expenses include labor, rent, utilities, supplies and certain other costs incurred prior to a store's opening. Pre-opening expenses have averaged approximately \$250,000 to \$350,000 per store historically, although the amount per store may vary depending on the store format and whether the store is the first to be opened in a market, or is part of a cluster of stores in that market.

In April 1998, the American Institute of Certified Public Accountants issued Statement of Position 98-5, "Accounting for Costs of Start-Up Activities." Statement of Position 98-5 requires that pre-opening costs be expensed as incurred. Statement of Position 98-5 is effective for fiscal years beginning after December 15, 1998, and the initial application should be reported as a cumulative effect of a change in accounting principle. We adopted Statement of Position 98-5

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

in fiscal 1999 and recorded approximately \$281,000 as a cumulative effect of a change in accounting principle, net of taxes, during fiscal 1999.

Results of Operations

The following table sets forth for the periods indicated, certain selected income statement data expressed as a percentage of sales:

FISCAL YEAR ENDED	2000	1999	1998
Sales	100.0%	100.0%	100.0%
Cost of goods sold and occupancy costs	<u>69.4</u>	<u>69.3</u>	<u>69.6</u>

	====	====	====

Fiscal 2000 Compared to Fiscal 1999

Fiscal 2000 and 1999 each contained 52 weeks of operations.

Sales.

Sales for the fiscal year ended December 30, 2000, increased 16.2% to \$838.1 million from \$721.1 million in fiscal 1999. The increase was primarily due to the acquisition of two stores, the opening of 11 new stores, and the relocation

of three stores, as well as the inclusion of a full year of sales for the eight new stores opened, five stores relocated, and 17 stores acquired in fiscal 1999. Comparable store sales decreased 2.6% for fiscal 2000, as compared to a 6% increase for fiscal 1999.

Gross Profit.

Gross profit for the fiscal year ended December 30, 2000, increased 15.7% to \$256.2 million from \$221.5 million in fiscal 1999. The increase in gross profit is primarily attributable to the acquisition of two stores, the opening of 11 new stores and the relocation of three stores. As a percentage of sales, gross profit decreased to 30.6% in fiscal 2000 from 30.7% in fiscal 1999 due primarily to acquisition integration difficulties in Oregon, Massachusetts and Texas.

Direct Store Expenses.

Direct store expenses for the fiscal year ended December 30, 2000, increased 22.5% to \$191.0 million from \$155.9 million in fiscal 1999. The increase in direct store expenses is attributable to the increase in the number of stores operated by the Company. As a percentage of sales, direct store expenses increased to 22.8% in fiscal 2000 from 21.6% in fiscal 1999 due to the increased number of acquired and newly-opened stores in late fiscal 1999, acquisition integration difficulties and significant investments that the Company has made in employee benefit programs, particularly expanded health insurance offerings.

Selling, General and Administrative Expenses.

Selling, general and administrative expenses for the fiscal year ended December 30, 2000, increased 16.3% to \$32.5 million from \$27.9 million in fiscal 1999. The increase is primarily attributable to additions in the corporate and regional staff necessary to support the Company's accelerated growth in fiscal 1999. As a percentage of sales, selling, general and administrative expenses remained constant at 3.9% in fiscal 2000 from fiscal 1999. As part of the Company's expanded strategic repositioning, we expect to spend additional funds on marketing at the national level, as well as increased corporate and regional support staffs. As a result of these increased expenditures, we expect that selling, general and administrative expenses will increase in fiscal 2001.

Pre-Opening Expenses.

As previously discussed herein, in April 1998, the AICPA issued SOP 98-5, *Accounting for the Costs of Start-Up Activities*. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Pre-Opening Expenses." Pre-opening expenses for the fiscal year ended December 30, 2000, increased 18.9% to \$3.3 million from \$2.8 million in fiscal 1999. The increase in pre-opening expenses is attributable to the increase in the number of stores opened. As a percentage of sales, pre-opening expenses remained constant at 0.4% due to the opening of 14 new stores (including three relocations) in fiscal 2000 as compared to 13 new stores (including five relocations) in fiscal 1999.

Restructuring and Asset Impairment Charges.

Restructuring and asset impairment charges for fiscal 2000 were \$42.0 million as compared to \$12.6 million in fiscal 1999. The expenses for 2000 consisted of two separate strategic repositioning efforts. During the second quarter of fiscal 2000, the Company's management made certain decisions relating to the strategic repositioning of the Company's operations which resulted in a restructuring and asset impairment charge of \$20.6 million. These decisions included the closure of three natural food stores during the second quarter of fiscal 2000 (\$4.7 million); the planned sale or closure of seven stores during the remainder of fiscal 2000 (\$9.9 million); exit costs of previously closed or abandoned sites (\$5.6 million); and the discontinuation of e-commerce activities (\$400,000). The \$5.6 million charge related to changes in estimates for previously closed or abandoned sites. The significant components of the \$5.6 million charge were (a) \$3.6 million of additional lease-related liabilities, and (b) \$2.0 million of fixed asset

impairments for 15 previously closed stores. Components of the restructuring and asset impairment charge consist primarily of abandonment of fixed (\$8.9 million) and intangible assets (\$6.4 million); and noncancelable lease obligations and lease related liabilities (\$5.3 million). Substantially all of the restructuring charges are non-cash expenses.

During the fourth quarter of fiscal 2000, the Company expanded its strategic repositioning and, as a part of such expansion, decided to close or sell twelve under performing stores. This decision resulted in an additional restructuring charge of \$21.4 million. This restructuring charge consists primarily of costs associated with the abandonment of fixed (\$13.6 million) and intangible assets (\$1.7 million) and noncancelable lease obligations and lease related liabilities (\$6.1 million). Substantially all of the restructuring charges are non-cash expenses. See "Notes to Consolidated Financial Statements - Note 12 - Restructuring and Asset Impairment Charges".

Loss on Investment.

In the second quarter of fiscal 2000, the Company recorded a loss on investment of \$2.1 million related to the reduction in value of the Company's investment in an e-commerce nutritional company.

Interest Expense, Net.

Net interest expense for the fiscal year ended December 30, 2000, increased to \$8.9 million, from \$4.3 million in fiscal 1999. As a percentage of sales, net interest expense increased to 1.0% from 0.6% in fiscal 1999. The increase is primarily attributable to increased borrowings on our line of credit to fund acquisitions, new stores, relocations and remodels. Interest expense may increase in the future as a result of increased borrowing and/or an expected increase in the interest rate under our credit facility. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources" below.

Fiscal 1999 Compared to Fiscal 1998

Fiscal 1999 contained 52 weeks of operations as compared to 53 weeks in fiscal 1998.

Sales.

Sales for the fiscal year ended January 1, 2000, increased 35.9% to \$721.1 million from \$530.7 million in fiscal 1998. The increase was primarily due to the acquisition of 17 stores, the opening of eight new stores, and the relocation of five stores, as well as the inclusion of a full year of sales for the nine new stores opened and seven stores acquired in fiscal 1998. Comparable store sales increased 6% for fiscal 1999, as compared to 4% for fiscal 1998.

Gross Profit.

Gross profit for the fiscal year ended January 1, 2000, increased 37.3% to \$221.5 million from \$161.3 million in fiscal 1998. The increase in gross profit is primarily attributable to the acquisition of seventeen stores and the opening of eight new stores. As a percentage of sales, gross profit increased to 30.7% in fiscal 1999 from 30.4% in fiscal 1998 due to the maturation of the Company's store base and the Company's increasing volume purchase discounts.

Direct Store Expenses.

Direct store expenses for the fiscal year ended January 1, 2000, increased 37.8% to \$155.9 million from \$113.1 million in fiscal 1998. The increase in direct store expenses is attributable to the increase in the number of stores operated by the Company. As a percentage of sales, direct store expenses increased to 21.6% in fiscal 1999 from 21.3% in fiscal 1998 due to the increased number of acquired and newly-opened stores in fiscal 1999 over fiscal 1998.

Selling, General and Administrative Expenses.

Selling, general and administrative expenses for the fiscal year ended January 1, 2000, increased 39.5% to \$27.9 million from \$20.0 million in fiscal 1998. As a percentage of sales, selling, general and administrative expenses increased to 3.9% from 3.8% in fiscal 1998. The increases are primarily attributable to additions in the corporate and regional staff necessary to support the Company's growth. In addition, the Company moved its corporate office during the fourth quarter of fiscal 1998 to a larger facility to accommodate an increased support staff for its larger base of stores. There is a full year of additional selling, general and administrative expenses for rent and utilities on the new facility in fiscal 1999, as compared to one quarter in fiscal 1998.

Pre-Opening Expenses.

As previously discussed herein, in April 1998, the AICPA issued SOP 98-5, *Accounting for the Costs of Start-Up Activities*. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Pre-Opening Expenses." Pre-opening expenses for the fiscal year ended January 1, 2000, decreased 19.8% to \$2.8 million from \$3.4 million in fiscal 1998. The decrease in pre-opening expenses is attributable to the decrease in the number of stores opened. As a percentage of sales, pre-opening expenses decreased to 0.4% from 0.6% due to the opening of eight new stores in fiscal 1999 as compared to nine new stores in fiscal 1998.

Restructuring and Asset Impairment Charges.

Restructuring and asset impairment charges for the fiscal year ended January 1, 2000, were \$12.6 million, as compared to \$393,000 in fiscal 1998. Components of the restructuring charge consist of noncancelable lease obligations and lease-related liabilities (\$1.2 million) and impairment of fixed (\$7.8 million) and intangible assets (\$1.9 million). These decisions included (1) a change in the Company's strategic direction, resulting in the closure in the second quarter of fiscal 1999 of its two "Farm to Market" stores located in Buffalo Grove, Illinois, and Tempe, Arizona (\$4.5 million), and (2) exit costs of previously closed or abandoned sites (\$6.4 million). During the first quarter of fiscal 1999, the Company revised its prior exit cost estimates for lease-related liabilities and also determined that it could not recover the previously estimated net realizable value of the fixed assets of the ten stores closed in fiscal 1998. As a result, the Company recorded a restructuring charge of \$6.4 million for the exit costs of stores that were previously closed or abandoned sites prior to fiscal 1999. The significant components of the \$6.4 million charge were (a) fixed asset (\$3.2 million) and goodwill (\$1.9 million) impairments and (b) additional lease-related liabilities (\$1.3 million).

During the third quarter of fiscal 1999, the Company recognized restructuring charges related to the pooling transaction with Henry's that totaled \$645,000. Components of the restructuring charge consist primarily of noncancelable lease obligations (\$287,000) and professional fees associated with the pooling (\$323,000).

During the fourth quarter of fiscal 1999, the Company recognized restructuring charges related to the pooling transaction with Sun Harvest that totaled \$1.1 million. Components of the restructuring charge consist primarily of professional fees associated with the pooling (\$869,000) and employee-related costs (\$128,000).

During fiscal 1998, a \$393,000 restructuring charge was recorded in conjunction with two pooling-of-interests transactions. The restructuring charge consists of employee severance costs (\$201,000), fixed asset write-downs (\$162,000) and lease cancellation costs (\$30,000).

Interest Expense, Net.

Net interest expense for the fiscal year ended January 1, 2000, increased to \$4.3 million, from \$28,000 in fiscal 1998. As a percentage of sales, net interest expense increased to 0.6% from less than 0.1% in fiscal 1998. The increase is primarily attributable to increased borrowings on our line of credit to fund acquisitions and new stores.

Liquidity and Capital Resources

Our primary sources of capital have been cash flow from operations, trade payables, bank indebtedness, and the sale of equity securities. Primary uses of cash have been the financing of new store development, new store openings, relocations, remodels and acquisitions.

Net cash provided by operating activities was \$41.0 million during fiscal 2000 as compared to \$53.9 million during fiscal 1999. Cash from operating activities decreased during this period primarily due to decreases in net income offset by restructuring and asset impairment charges. Net cash provided by operating activities was \$53.9 million during fiscal 1999 and \$32.1 million during fiscal 1998. Cash from operating activities increased during this period primarily due to increases in net income before depreciation and amortization expense and restructuring and asset impairment charges. We have not required significant external financing to support inventory requirements at our existing and new stores because we have been able to rely on vendor financing for most of the inventory costs, and we anticipate that vendor financing will continue to be available for new store openings.

Net cash used by investing activities was \$72.8 million during fiscal 2000 as compared to \$120.0 million during the same period in fiscal 1999. The decrease is due to the opening of 11 new stores, the acquisition of two stores, the relocation of three stores and several store remodels in fiscal 2000, as compared to eight new stores, five relocated stores, 17 acquired stores and several store remodels in fiscal 1999. Net cash used by investing activities was \$63.5 million during fiscal 1998 due to the acquisition of seven stores, the opening of nine new stores, the relocation of one store, and construction costs incurred for new stores in development that opened during 1999.

Net cash provided by financing activities was \$22.3 million during fiscal 2000 as compared to \$76.0 million during fiscal 1999. The decrease reflects lower incremental borrowings under our revolving line of credit to fund fewer store acquisitions during fiscal 2000. Net cash provided by financing activities was \$76.0 million during fiscal 1999 and net cash used by financing activities was \$4.0 million during fiscal 1998. The increase reflects increased borrowing under our revolving line of credit related to acquisition activity, as well as repayment of \$17.5 million in debt.

In the third quarter of fiscal 2000, we renewed and increased our existing revolving credit facility to \$157.5 million. The facility as increased and amended has two separate lines of credit, a revolving line for \$111.2 million and the remainder in a term loan facility, each with a three-year term expiring August 1, 2003. The facility currently bears interest at the default rate, which is the prime rate. The credit agreement includes certain financial and other covenants, as well as restrictions on payments of dividends. As of December 30, 2000, we were in violation of two financial covenants, and the lending group issued a notice of default, although it has not accelerated our repayment obligations. All borrowings outstanding under the credit facility at December 30, 2000 are considered to be due on demand and accordingly are classified as a current liability at December 30, 2000. As a result of the covenant violations, our borrowings under the credit facility have been limited to \$125 million. We are currently negotiating an amendment to the credit facility to waive the defaults and modify certain of the covenants that may include an increase in our interest rate and certain limitations on the execution of new leases and capital expenditures, as well as other financial covenants and a security interest in certain of our assets. If we are unsuccessful in negotiating an amendment acceptable to our lenders, such lenders could accelerate repayment of existing borrowings. The Company currently does not have sufficient available funds to repay in the event of an acceleration of our debt. The Company is also proposing to raise approximately \$30.0 million in equity financings to provide additional liquidity. As of December 30, 2000, there were \$77.6 million in borrowings outstanding under the revolving facility and \$46.3 million in borrowings outstanding under the term loan. If we are successful in negotiating an amendment to our existing credit facility, we believe that cash generated from operations will be sufficient to meet our capital expenditure requirements in fiscal 2001.

We spent approximately \$60.6 million during fiscal 2000 for new store construction, development, remodels and maintenance capital expenditures, exclusive of acquisitions, and anticipate that we will spend \$35.0 to \$40.0 million in fiscal 2001 for new store construction, equipment, leasehold improvements, remodels and maintenance capital

expenditures and relocations of existing stores, exclusive of acquisitions. Our average capital expenditures to open a leased store, including leasehold improvements, equipment and fixtures, have ranged from approximately \$2.0 to \$3.0 million historically, excluding inventory costs and initial operating losses. We anticipate that our average capital expenditures will be \$2.5 to \$4.0 million in the future, partly because of increases in the size of new stores and partly because our new store prototype requires more expensive fixturing. Delays in opening new stores may result in increased capital expenditures and increased pre-opening costs for the site, as well as lower than planned sales for the Company.

We anticipate cash flows from operations of approximately \$40.0 million in fiscal 2001. Although there can be no assurance that actual capital expenditures will not exceed anticipated levels, we believe that cash generated from operations will be sufficient to satisfy the Company's capital expenditure requirements through fiscal 2001.

In fiscal 2000 we sold certain unimproved real property acquired as part of the acquisition of the outstanding stock of Nature's Fresh Northwest and an office building acquired as part of the pooling of interests transaction with Sun Harvest Farms, Inc., both in fiscal 1999.

The cost of initial inventory for a new store is approximately \$300,000 to \$800,000 depending on the store format; however, we obtain vendor financing for most of this cost. Pre-opening costs currently are approximately \$250,000 to \$350,000 per store and are expensed as incurred. The amounts and timing of such pre-opening costs will depend upon the availability of new store sites and other factors, including the location of the store and whether it is in a new or existing market for us, the size of the store, and the required build-out at the site. Costs to acquire future stores, if any, are impossible to predict and could vary materially from the cost to open new stores. There can be no assurance that actual capital expenditures will not exceed anticipated levels. We believe that cash generated from operations will be sufficient to satisfy our cash requirements, exclusive of additional acquisitions, through fiscal 2001.

New Accounting Pronouncement

In June 1998, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("FAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities." In June 2000, FAS No. 138 "Accounting for Certain Derivative Instruments and Hedging Activities, an Amendment of FAS 133," was issued. FAS No. 133 and No. 138 address the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and hedging activities. The Company is required to adopt FAS No. 133 and No. 138 in the first quarter of fiscal 2001, but does not expect such adoption to materially affect financial statement presentation.

Cautionary Statement Regarding Forward-Looking Statements

This Report on Form 10-K contains "forward-looking statements," within the meaning of the Private Securities Litigation Reform Act of 1995, that involve known and unknown risks. Such forward-looking statements include statements as to the Company's plans to open, acquire or relocate additional stores, the anticipated performance of such stores, the impact of competition, the sufficiency of funds to satisfy the Company's cash requirements through fiscal 2001, our ability to negotiate an amendment to our credit facilities acceptable to our lenders, our expectations for comparable store sales, our plans for expanding store format, other elements of our strategic repositioning, levels of cannibalization, expected levels of direct store expenses, selling, general and administrative expenses, pre-opening expenses and capital expenditures and other statements containing words such as "believes," "anticipates," "estimates," "expects," "may," "intends" and words of similar import or statements of management's opinion. These forward-looking statements and assumptions involve known and unknown risks, uncertainties and other factors that may cause the actual results, market performance or achievements of the Company to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Important factors that could cause such differences include, but are not limited to, the success of the Company's proposed strategic repositioning plan, the availability and integration of acquisitions, the timing and execution of new store openings, relocations, remodels, sales and closures, the timing and impact of promotional and advertising campaigns, the impact

of competition, changes in product supply, changes in management information needs, changes in customer needs and expectations, governmental and regulatory actions, and general industry or business trends or events, changes in economic or business conditions in general or affecting the natural foods industry in particular, competition for and the availability of sites for new stores and potential acquisition candidates, and factors such as timing of closures and sales of stores. The Company undertakes no obligation to update any forward-looking statements in order to reflect events or circumstances that may arise after the date of this Report.

The accompanying notes are an integral part of these consolidated financial statements

WILD OATS MARKETS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Summary of Significant Accounting Policies

Organization.

Wild Oats Markets, Inc. ("Wild Oats" or the "Company"), headquartered in Boulder, Colorado, owns and operates natural foods supermarkets in the United States and Canada. The Company also operates bakeries, commissary kitchens, and warehouses that supply the retail stores. The Company's operations are concentrated in one market segment, grocery stores, and are geographically concentrated in the western and central parts of the United States of America.

Basis of Presentation.

Certain amounts in the prior years' financial statements have been reclassified to conform to the current year presentation.

Principles of Consolidation.

The Company's consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.

Fiscal Year.

The Company reports its financial results on a 52- or 53-week fiscal year ending on the Saturday closest to December 31. Fiscal years for the consolidated financial statements included herein ended on December 30, 2000, January 1,

2000, and January 2, 1999. Fiscal 2000 was a 52-week year, fiscal 1999 was a 52-week year and fiscal 1998 was a 53-week year.

Cash and Cash Equivalents.

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Inventories.

Inventories consisting of products held for sale are stated at the lower of cost (first-in, first-out) or market, as determined by the retail inventory method. Perishable inventories are valued at the lower of cost (first in, first out) or market.

Property, Plant and Equipment.

Property, plant and equipment are recorded at cost. Depreciation is computed on a straight-line basis over the estimated useful lives of machinery and equipment (three to ten years). Depreciation is computed on a straight-line basis over the estimated useful lives of buildings (30 years). Leasehold improvements are amortized on a straight-line basis over the shorter of the useful life of the asset or the lease term. Major renewals and improvements are capitalized, while maintenance and repairs are expensed as incurred. Upon sale or retirement of assets, the cost and related accumulated depreciation or amortization are eliminated from the respective accounts and any resulting gains or losses are reflected in operations. Applicable interest charges incurred during the construction of assets are capitalized as one of the elements of cost and are amortized over the assets' estimated useful lives. All construction-related overhead and a portion of direct administrative expenses are capitalized and allocated to assets based on the relative asset costs.

Intangible Assets.

Intangible assets consist primarily of goodwill, which is amortized using the straight-line method over 40 years, and are shown net of accumulated amortization of \$8.8 million and \$7.1 million at December 30, 2000 and January 1, 2000, respectively. Amortization expense related to intangible assets totaled approximately \$3.1 million, \$2.6 million and \$1.4 million in fiscal 2000, 1999 and 1998, respectively.

Impairment of Long-Lived Assets.

The Company monitors the carrying value of its long-lived assets, including intangible assets, for potential impairment at the store level. The triggering events for such evaluations include a significant decrease in the market value of an asset, acquisition and construction costs in excess of budget, or current period losses combined with a history of losses or a projection of continuing losses. If an impairment is identified, based on undiscounted future cash flows, the Company compares the asset's future cash flows, discounted to present value using a risk-adjusted discount rate, to its current carrying value and records a provision for impairment as appropriate. With respect to equipment and leasehold improvements associated with closed stores, the value of these assets is adjusted to reflect recoverable values estimated based on the Company's previous efforts to dispose of similar assets, with consideration for current economic conditions.

Store Closing Costs

The Company plans to complete store closures or sales within a one-year period following the commitment date. Costs related to store closures and sales are reflected in the income statement as "Restructuring and Asset Impairment Charges." For stores the Company intends to sell, the Company actively markets the stores to potential buyers. Stores

held for disposal are reduced to their estimated net realizable value. For stores the Company intends to close, a lease-related liability is recorded for the present value of the estimated remaining noncancelable lease payments after the closing date, net of estimated subtenant income, or for estimated lease settlement costs. In addition, the Company records a liability for costs to be incurred after the store closing which are required under leases or local ordinances for site preservation during the period before lease termination. The value of equipment and leasehold improvements related to a closed store is reduced to reflect recoverable values based on the Company's previous efforts to dispose of similar assets and current economic conditions.

Severance costs incurred in connection with store closings are recorded when the employees have been identified and notified of the termination benefits to be made to the employees.

Lease-related liabilities and the recoverability of assets to be disposed of are reviewed quarterly, and changes in previous estimates are reflected in operations. Significant cash payments associated with closed stores relate to ongoing payments of rent, common area maintenance, insurance charges, and real property taxes as required under continuing lease obligations.

Pre-Opening Expenses.

Beginning in fiscal 1999, the Company adopted SOP 98-5, *Accounting for the Costs of Start-Up Activities*, which requires that pre-opening costs be expensed as incurred and was effective for fiscal years beginning after December 15, 1998. The Company recorded \$281,000 as a cumulative effect of change in accounting principle, net of taxes, during the first quarter of fiscal 1999. Through fiscal 1998, pre-opening expenses were deferred until the store's opening date, at which time such costs were expensed in full. Beginning in fiscal 1999, pre-opening expenses are recognized as incurred.

Concentration of Risk.

The Company purchases approximately 27% of its cost of goods sold from one vendor. The Company's reliance on this supplier can be shifted, over a period of time, to alternative sources of supply, should such changes be necessary. However, if the Company could not obtain products from this supplier for factors beyond its control, the Company's operations would be disrupted in the short term while alternative sources of product were secured.

Revenue Recognition.

Revenue for sales of the Company's products is recognized at the point of sale. SEC Staff Accounting Bulletin 101 did not have an impact on the Company's revenue recognition policy.

Advertising.

Advertising is expensed as incurred. Advertising expense was \$6.8 million, \$7.3 million and \$6.8 million for fiscal 2000, 1999 and 1998, respectively.

Fair Value of Financial Instruments.

The carrying amounts of the Company's financial instruments, including cash and cash equivalents, short-term trade receivables and payables, approximate their fair values due to the short-term nature of the instruments. The fair value of the Company's long-term debt approximates its carrying value due to the variable interest rate feature of the instrument.

Derivative Financial Instruments

. The Company uses an interest rate swap to manage interest costs and the risk associated with changing interest rates. As interest rates change, the differential paid or received is recognized in interest expense of the related period.

Long-Term Investment.

The Company's long-term investment in an e-commerce nutrition company of \$228,000 and \$1,500,000 at December 30, 2000 and 1999, respectively, is recorded under the cost method as the Company is unable to exercise effective control. In the second quarter of fiscal 2000, the Company recorded a loss on investment of \$2.1 million related to the reduction in value of the Company's investment in the e-commerce nutrition company. In the Company's previous fiscal 2000 financial statements, this \$2.1 million loss on investment was reflected in loss from operations as part of the restructuring charge. This loss on investment has now been presented separately after loss from operations in these amended financial statements.

Use of Estimates.

The preparation of these financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Foreign Currency Translation.

The functional currency for the Company's Canadian subsidiary is the Canadian dollar. Translation into U.S. dollars is performed for assets and liabilities at the exchange rate as of the balance sheet date. Income and expense accounts are translated at average exchange rates for the year. Adjustments resulting from the translation are reflected as a separate component of other comprehensive income. Translation adjustments are not tax-effected as they relate to investments that are permanent in nature.

Self-Insurance

. The Company is self-insured for certain losses relating to worker's compensation claims and employee medical and dental benefits. The Company has purchased stop-loss coverage in order to limit its exposure to any significant levels of claims. Self-insured losses are accrued based upon the Company's estimates of the aggregate uninsured claims incurred using certain actuarial assumptions followed in the insurance industry and the Company's historical experiences.

Earnings Per Share.

Basic earnings per share is based on the weighted-average number of common shares outstanding, and diluted earnings per share is based on the weighted-average number of common shares outstanding and all dilutive potential common shares outstanding, except where the effect of their inclusion would be antidilutive. A reconciliation of the basic and diluted per-share computations is as follows (in thousands, except per-share data):

FISCAL YEAR	2000	1999	1998

New Accounting Pronouncement.

In June 1998, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("FAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities." In June 2000, FAS No. 138 "Accounting for Certain Derivative Instruments and Hedging Activities, an Amendment of FAS 133," was issued.

FAS No. 133 and No. 138 address the accounting for derivative instruments, including certain derivative instruments embedded in other contracts, and hedging activities. The Company is required to adopt FAS No. 133 and No. 138 in the first quarter of fiscal 2001, but does not expect such adoption to materially affect financial statement presentation.

2. Going Concern Matters

These consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The terms of our credit facility require, among other things, compliance with certain financial ratios, including a funded debt (i.e., debt/EBITDA) ratio and a fixed charge coverage ratio, on a quarterly basis. As a result of restructuring and asset impairment charges incurred during fiscal 2000, we were not in compliance with the fixed charge coverage ratio and minimum net income covenants under our credit facility as of and for the quarter ended December 30, 2000, and as a result, our lenders have issued a notice of default, although no acceleration of outstanding debt has been requested. All borrowings outstanding under the credit facility at December 30, 2000 are considered to be due on demand and accordingly are classified as a current liability at December 30, 2000. We currently do not have sufficient funds to pay all outstanding indebtedness. These factors raise substantial doubt about our ability to continue as a going concern. The Company currently is negotiating an amendment of its credit facility that may include the payment of an amendment fee, an increase in interest rates, a security interest in assets and additional covenants relating to capital expenditures and new leases. In conjunction with the Company's negotiations to amend its credit facility and obtain less restrictive covenants and other terms and conditions therein, the Company also proposes to raise approximately \$30.0 million or more in equity financings to be used to provide additional liquidity. If the Company's lenders accept the amendments currently proposed by the Company, then the Company's borrowing capacity would be limited to \$125 million, the maturity date of the credit facility would continue to be August 1, 2003, the interest rate would be increased periodically, and all existing events of default would be waived as of the amendment date.

A breach of any of the terms and conditions of the amended credit facility agreement could result in acceleration of our indebtedness, in which case the debt would become immediately due and payable. Although no assurances can be given, we expect that we would be in compliance throughout the term of the amended credit facility with respect to the financial and other covenants, including those regarding funded debt ratio, fixed charge coverage ratio, minimum year-to-date net income, tangible net worth, capital expenditure limits, and new lease limits. We believe that cash generated from operations will be sufficient to satisfy the Company's currently budgeted capital expenditure and debt service requirements through fiscal 2001 and that no additional funding will be necessary.

3. Business Combinations

Fiscal 2000

In May 2000, the Company acquired the assets and operations of two operating natural food supermarkets located in southern California, for a purchase price of \$13.7 million in cash. The acquisition was accounted for using the purchase method and the excess of cost over the fair value of the assets acquired of \$12.9 million was allocated to goodwill, which is being amortized on a straight-line basis over 40 years.

Fiscal 1999

Poolings of Interests

. On December 15, 1999, the Company issued approximately 890,000 shares of common stock in exchange for all of the outstanding stock of Sun Harvest Farms, Inc. and an affiliate in a transaction accounted for as a pooling of interests. Accordingly, the financial position, results of operations and cash flows of Sun Harvest have been combined with those of the Company in these financial statements. Certain reclassifications have been made to the prior financial statements of Sun Harvest to conform with the Company's financial presentations and policies. There were

no intercompany transactions between the Company and Sun Harvest for all periods presented.

On September 27, 1999, the Company issued approximately 2.1 million shares of common stock in exchange for all of the outstanding stock of Henry's Marketplace, Inc. in a transaction accounted for as a pooling of interests. Accordingly, the financial position, results of operations and cash flows of Henry's have been combined with those of the Company in these financial statements. Certain reclassifications have been made to the prior financial statements of Henry's to conform with the Company's financial presentation and policies. There were no intercompany transactions between the Company and Henry's for all periods presented.

Results of Pooled Company Prior to Transaction.

Separate results of operations for the Company's, Henry's, and Sun Harvest's (including the affiliated entity) operations for the periods prior to the transaction are as follows (in thousands):

FISCAL YEAR	1999	1998
Sales:		
Wild Oats	\$ 593,109	\$ 398,857
Henry's	74,979	81,026
Sun Harvest	<u>53,003</u>	<u>50,843</u>

=====

Purchase Transactions.

On November 15, 1999, the Company acquired the assets and operations of four natural foods supermarkets located in metropolitan Boston, Massachusetts, for a purchase price of \$12.5 million in cash. The acquisition was accounted for using the purchase method and the excess of cost over the fair value of the assets acquired of \$787,000 was allocated to goodwill, which is being amortized on a straight-line basis over 40 years.

On May 29, 1999, the Company acquired all of the outstanding stock of Nature's Fresh Northwest, Inc., a Delaware corporation that owned seven operating natural food stores, one new site and one relocation in development in metropolitan Portland, Oregon. The purchase price for this acquisition aggregated \$40.0 million in cash, including the assumption by the Company of a \$17.0 million promissory note owed by Nature's to the seller. The acquisition was accounted for using the purchase method and the excess of cost over the fair value of the assets acquired and liabilities assumed of \$32.6 million was allocated to goodwill, which is being amortized on a straight-line basis over 40 years.

On April 30, 1999, the Company acquired the operations of three existing natural foods supermarkets in Norwalk and Hartford, Connecticut and Melbourne, Florida. The purchase price for this acquisition aggregated \$6.6 million in cash. The acquisition was accounted for using the purchase method, and the excess of cost over the fair value of the assets acquired and liabilities assumed of \$6.1 million was allocated to goodwill, which is being amortized on a straight-line basis over 40 years.

On February 1, 1999, the Company acquired the operations of three existing natural foods supermarkets in Tucson, Arizona. The purchase price for this acquisition aggregated \$18.4 million in cash. The acquisition was accounted for using the purchase method, and the excess of cost over the fair value of the assets acquired of \$17.0 million was allocated to goodwill, which is being amortized on a straight-line basis over 40 years.

The fair values of the purchased assets and liabilities of these purchased acquisitions are as follows (in thousands):

Current assets (\$697 of cash)	\$
	8,912
Equipment	26,604
Building and land	9,153
Other assets	89
Liabilities	(24,730)
Goodwill	<u>57,352</u>

\$

77,380
=====

Fiscal 1998

In January, May, June and December 1998, in four separate transactions, the Company acquired the assets and assumed certain liabilities of five operating natural foods supermarkets in Nashville, Tennessee; New York, New York; Santa Barbara, California; Victoria, British Columbia, Canada and Boulder, Colorado. The purchase price for these acquisitions aggregated \$10.6 million in cash and a note payable of \$3.1 million that was repaid in full in January 1999. The acquisitions were accounted for using the purchase method, and the excess of cost over the fair value of the assets acquired of \$12.0 million was allocated to goodwill, which is being amortized on a straight-line basis over 40 years.

The fair values of the acquired assets and liabilities of these acquisitions are as follows (in thousands):

Current assets (\$127 of cash)	\$
	1,304
Equipment	1,397
Other assets	25
Liabilities	(1,022)
Goodwill	<u>12,014</u>
	-
	\$
	13,718
	=====

Also during fiscal 1998, the Company issued 200,045 shares of the Company's common stock in exchange for all of the common stock of two companies operating natural foods grocery stores in Columbus, Ohio and Little Rock, Arkansas. These acquisitions were accounted for as poolings of interests, and accordingly, the Company's consolidated financial statements for fiscal 1998 include the operations of the stores for the entire year, adjusted to conform with the Company's accounting policies and presentation. The Company's financial statements prior to fiscal 1998 were not restated to include the results of these pooling transactions as the effect is immaterial. Restructuring, acquisition-related expenses of \$393,000 were recorded in conjunction with the poolings.

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

The following unaudited pro forma combined results of operations of the Company and the acquired businesses discussed above have been prepared as if the transactions occurred as of the beginning of the respective periods presented (in thousands):

FISCAL YEAR	2000	1999
Sales	\$ 846,017	\$ 815,180
Net income (loss)	(14,469)	18,802
Basic income (loss) per share	(0.63)	0.82
Diluted income (loss) per share	(0.63)	0.80

The unaudited pro forma results above are not necessarily representative of the actual results that would have occurred or may occur in the future, if the transactions had been in effect on the dates indicated. The pre-acquisition historical results of the acquired businesses discussed above are not reflected in the Company's historical financial statements.

4. Property, Plant and Equipment

Property, plant and equipment consist of the following (in thousands):

	2000	1999
FISCAL YEAR ENDED		
Machinery and equipment	\$ 117,777	\$ 101,585
Leasehold improvements	78,974	60,977
Land and building	11,082	13,322
Construction in progress	<u>27,521</u>	<u>35,157</u>
Less accumulated depreciation	235,354	211,041
and amortization	<u>(66,819)</u>	<u>(54,885)</u>
	\$ 168,535	\$ 156,156
	=====	=====

Depreciation and amortization expense related to property, plant and equipment totaled approximately \$22.5 million, \$19.6 million and \$14.2 million in fiscal 2000, 1999 and 1998, respectively. Property, plant and equipment includes approximately \$890,000 of interest capitalized during fiscal 2000 and \$776,000 during fiscal 1999. No interest was capitalized during fiscal 1998. The amounts shown above include \$1,086,000 of machinery and equipment which are accounted for as capitalized leases and which have accumulated amortization of \$291,000 at December 30, 2000. There were \$969,000 of machinery and equipment accounted for as capitalized leases as of January 1, 2000, with

accumulated amortization of \$275,000.

5. Accrued Liabilities

Accrued liabilities consist of the following (in thousands):

FISCAL YEAR ENDED	2000	1999
Wages and employee costs	\$ 16,510	\$ 14,370
Sales and personal property taxes	3,034	3,565
Real estate costs	14,328	4,984
Deferred charges and other accruals	<u>3,562</u>	<u>7,462</u>
	\$ 37,434	\$ 30,381
	=====	=====

6. Notes Payable and Long-Term Debt

Long-term debt outstanding consists of the following (in thousands):

FISCAL YEAR ENDED	2000	1999
Mortgage payable to lending institution payable in monthly installments of \$3,899, including interest, secured by real estate		\$ 176
Note payable to corporation due and payable March 23, 2000; 0% interest; unsecured		95
Note payable to corporation; variable interest rate per annum based on lender's external borrowing rate; principle and interest due November 28, 2000		6,629
Capitalized leases	\$ 624	937
Bank line of credit due March 1, 2000; bearing interest, at the Company's option, at the prime rate or LIBOR plus 1.15% (7.3375% on January 1, 2000); unsecured		15,500
Bank line of credit due March 2, 2002; bearing interest, at the Company's option, at the prime rate or LIBOR plus 1.15% (\$63,000,000 at 7.3375%; \$15,000,000 at 7.275%; \$1,700,000 at 8.5% on January 1, 2000); unsecured		79,700

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

Bank line of credit due August 1, 2003; bearing interest at the prime rate (9.5% on December 30, 2000); unsecured	77,621	
Bank term debt due August 1, 2003; bearing interest at the prime rate (9.5% on December 30, 2000); unsecured	46,323	
	124,568	103,037
Less current portion	<u>(124,215)</u>	<u>(22,709)</u>
	\$ 353	\$ 80,328
	=====	=====

The maturities of notes payable and long-term debt are as follows (in thousands):

FISCAL YEAR ENDING	
2001	\$ 124,215
2002	324
2003	19
2004	10
Thereafter	<u>0</u>
	\$ 124,568
	=====

The Company has a \$157.5 million revolving line of credit. The facility has two separate lines of credit, one in the amount of \$111.2 million and the other in the amount of \$46.3 million, each with a three-year term expiring on August 1, 2003. Both currently bear interest at the default rate, which is the prime rate. The line of credit agreement includes certain financial and other covenants, as well as restrictions on the payment of dividends. In addition, the Company has two letters of credit outstanding as of December 30, 2000 that total \$1.1 million and expire in January 2001 (\$30,000) and November 2001 (\$1.0 million).

As a result of restructuring and asset impairment charges incurred during fiscal 2000, we were not in compliance with the fixed charge coverage ratio and minimum net income covenants under our credit facility as of and for the quarter ended December 30, 2000, and as a result, our lenders have issued a notice of default, although no acceleration of outstanding debt has been requested. All borrowings outstanding under the credit facility at December 30, 2000 are considered to be due on demand and accordingly are classified as a current liability at December 30, 2000. We currently do not have sufficient funds to pay all outstanding indebtedness. These factors raise substantial doubt about our ability to continue as a going concern. The Company currently is negotiating an amendment of its credit facility that may include the payment of an amendment fee, an increase in interest rates, a security interest in assets and

additional covenants relating to capital expenditures and new leases. (See Note 2 to "Notes to Consolidated Financial Statements".)

In September 2000, the Company entered into an interest rate swap to hedge its exposure on variable rate debt positions. Variable rates are predominantly linked to LIBOR as determined by one month intervals. The interest rate provided by the swap on variable rate debt is 6.7%. At December 30, 2000, the notional principal amount at the interest rate swap agreement was \$50.0 million, expiring in August 2003. The notional amount is the amount used for the calculation of interest payments which are exchanged over the life of the swap transaction on the amortized principal balance. In fiscal 2000, the gains (losses) in interest expense associated with this agreement were approximately \$(12,000).

7. Income Taxes

Income (loss) before income taxes consists of the following (in thousands):

FISCAL YEAR	2000	1999	1998

During fiscal 2000, 1999 and 1998, the Company recognized \$293,000, \$1,418,000 and \$1,153,000, respectively, as a tax benefit directly to additional paid-in-capital related to noncompensatory stock plans.

8. Capital Stock

The Company declared 3-for-2 stock splits for all stockholders of record as of December 22, 1997, and November 17, 1999, effective January 7, 1998 and December 1, 1999, respectively. All shares and per-share prices presented herein have been retroactively restated to reflect the stock splits.

In October 1999, the Company's shareholders approved an increase in the authorized common stock of the Company to 60,000,000 shares.

9. Stock Plans, Options and Warrants

Employee Stock Purchase Plan.

In August 1996, the Company's board of directors approved and adopted an Employee Stock Purchase Plan ("Purchase Plan") covering an aggregate of 287,307 shares of common stock. The Purchase Plan is intended to qualify as an employee stock purchase plan within the meaning of Section 423 of the Internal Revenue Code. Under the Purchase Plan, the board of directors may authorize participation by eligible employees, including officers, in periodic offerings. The offering period for any offering will be no more than 27 months. The board authorized an offering commencing on the initial public offering date of October 22, 1996 and ending June 30, 1997, and sequential six-month offerings thereafter.

Employees are eligible to participate in the currently authorized offerings if they have been employed by the Company or an affiliate of the Company incorporated in the United States of America for at least six months preceding October 22, 1996. Employees can have up to 15% of their earnings withheld pursuant to the Purchase Plan (10% under the currently authorized offerings) and applied on specified purchase dates (currently the last day of each authorized offering) to the purchase of shares of common stock. The price of common stock purchased under the Purchase Plan will be equal to 85% of the lower of the fair market value of the common stock on the commencement date of each offering or the relevant purchase date. As of December 30, 2000, there were approximately \$460,000 of payroll deductions of which \$449,000 were used to purchase 124,431 of common stock on January 2, 2001.

The Board suspended participation in the Purchase Plan effective January 29, 2001, when the available pool of shares was substantially exhausted. The Company is seeking shareholder approval at its annual meeting in May 2001 to

increase the pool of stock by 500,000 shares.

Equity Incentive Plan.

The Company's Equity Incentive Plan (the "Incentive Plan") was adopted by the board of directors in August 1996. As of December 30, 2000, 4,650,221 shares of common stock were reserved for issuance under the Incentive Plan.

The Incentive Plan provides for the grant of incentive stock options to employees (including officers and employee-directors) and nonqualified stock options, restricted stock purchase awards and stock bonuses to employees and directors. The exercise price of options granted under the Incentive Plan is determined by the board of directors, provided that the exercise price for an incentive stock option cannot be less than 100% of the fair market value of the common stock on the grant date and the exercise price for a nonqualified stock option cannot be less than 85% of the fair market value of the common stock on the grant date. Outstanding options generally vest over a period of five years and generally expire ten years from the grant date.

Fair Values.

The Company applies Accounting Principles Board Opinion No. 25 and related Interpretations in accounting for its stock plans. Accordingly, no compensation expense has been recognized for these plans. Had compensation cost for these plans been determined based on the fair value at the grant dates as prescribed by FAS No. 123, Accounting for Stock-Based Compensation, the Company's net income (loss) allocable to common stock and basic and diluted income (loss) per share would have been reduced to the pro forma amounts indicated below:

FISCAL YEAR	2000	1999	1998
Net income (loss)			
As reported	\$ (15,021)	\$ 12,488	\$ 16,439
Pro forma	\$ (19,269)	\$ 8,855	\$ 6,825
Basic income (loss) per share			
As reported	\$ (0.65)	\$ 0.55	\$ 0.73
Pro forma	\$ (0.83)	\$ 0.39	\$ 0.30
Diluted income (loss) per share			
As reported	\$ (0.65)	\$ 0.53	\$ 0.71
Pro forma	\$ (0.83)	\$ 0.38	\$ 0.30

The fair value of the employees' purchase rights was estimated using the Black-Scholes model with the following weighted-average assumptions:

FISCAL YEAR	2000	1999	1998
--------------------	-------------	-------------	-------------

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

Estimated dividends	None	None	None
Expected volatility	68%	46%	46%
Risk-free interest rate	4.8%	5.6%	4.5%
Expected life (years)	0.5	0.5	0.5
Weighted-average fair value per share	\$1.16	\$4.96	\$4.66

The fair value of each option grant under the Incentive Plan is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

FISCAL YEAR	2000	1999	1998
Estimated dividends	None	None	None
Expected volatility	68%	46%	46%
Risk-free interest rate	5.75%	5.6%	4.5 - 4.7%
Expected life (years)	7	7	7

A summary of the status of the Company's Incentive Plan as of the 2000, 1999, and 1998 fiscal year ends and changes during the years ending on those dates is presented below:

=====

=====

At December 30, 2000, options exercisable for 1,297,646 shares were available for future grant under the Incentive Plan. At January 1, 2000 and January 2, 1999, options for 661,588 and 620,448 shares with weighted average exercise prices of \$9.74 and \$7.67, respectively, were exercisable. The weighted-average grant-date per-share fair values of options granted during fiscal 2000, 1999 and 1998 were \$10.13, \$20.18 and \$17.91, respectively.

10. Litigation

In August 1998, the Company filed Wild Oats Markets, Inc. v. Plaza Acquisition, Inc. in United States District Court for the Northern District of Illinois, Eastern Division, seeking recovery of \$300,000 in tenant improvement allowances owed to it by its landlord for the build-out of the Company's Buffalo Grove, Illinois store. The landlord counterclaimed for \$1 million in damages and after the Company closed the Buffalo Grove store in May 1999, the landlord increased its counterclaim to \$3 million, including accelerated rent resulting from an alleged breach of a continuous operations clause in the lease. After a trial in November 2000, the court awarded the landlord approximately \$27,000 in damages.

Alfalfa's Canada, Inc., a Canadian subsidiary of the Company, is a defendant in a suit brought in the Supreme Court of British Columbia, by one of its distributors, Waysafer Wholefoods Limited and one of its principals, seeking monetary damages for breach of contract and injunctive relief to enforce a buying agreement for the three Canadian stores entered into by a predecessor of Alfalfa's Canada. Under the buying agreement, the stores must buy products carried by the plaintiff if such are offered at the current advertised price of its competitors. The suit was filed in September 1996. In June 1998, Alfalfa's Canada filed a Motion for Dismissal on the grounds that the contract in dispute constituted a restraint of trade. The Motion was subsequently denied. We do not believe its potential exposure in connection with the suit will have a material adverse effect on the Company's consolidated results of operations, financial position, or cash flows.

In January 2001, we were named as defendant in Glades Plaza, LP v. Wild Oats Markets, Inc., a suit filed in the 15th Judicial Circuit Court, Palm Beach County, Florida, by a landlord alleging we breached our lease obligations when we gave notice of termination of the lease for landlord's default in not timely turning over the premises. The plaintiff seeks unspecified damages.

In February 2001, we were named as defendant in Grange Investments, Inc. v. Wild Oats Markets, Inc., a suit filed in United States District Court, District of Connecticut, by the purchaser of a former Wild Oats store for breach of a noncompetition covenant. The plaintiff seeks injunctive relief and damages. The parties are currently in settlement discussions.

We also are named as defendant in various actions and proceedings arising in the normal course of business. In all of these cases, the Company is denying the allegations and is vigorously defending against them and, in some cases, has filed counterclaims. Although the eventual outcome of the various lawsuits cannot be predicted, it is management's opinion that these lawsuits will not result in liabilities that would materially affect the Company's consolidated results of operations, financial position, or cash flows.

11. Commitments

The Company has numerous operating leases related to facilities occupied and store equipment. These leases generally contain renewal provisions at the option of the Company. Total rental expense (consisting of minimum rent and contingent rent) under these leases was \$34.5 million, \$25.5 million and \$17.1 million during fiscal 2000, 1999 and 1998, respectively.

Future minimum lease payments under noncancelable operating leases as of December 30, 2000 are summarized as follows (in thousands):

FISCAL YEAR

2001	\$ 37,160
2002	38,024
2003	37,333
2004	35,234
2005	33,303
Thereafter	<u>318,287</u>
Total minimum lease payments	\$ 499,341

=====

Minimum rentals for operating leases do not include contingent rentals which may become due under certain lease terms which provide that rentals may be increased based on a percentage of sales. During fiscal 2000, 1999 and 1998, the Company paid contingent rentals of \$445,000, \$938,000 and \$755,000, respectively.

Included in the \$499.3 million of minimum lease payments is \$42.7 million, which is related to lease costs for closed stores. The Company is actively working to defease these payments through assignments, subleases or terminations of the lease obligations.

As of December 30, 2000, the Company had commitments under construction contracts totaling \$1.7 million.

12. Restructuring and Asset Impairment Charges

During the second quarter of fiscal 2000, the Company's management made certain decisions relating to the strategic repositioning of the Company's operations which resulted in a restructuring and asset impairment charge of \$20.6 million. These decisions included the closure of three natural food stores during the second quarter of fiscal 2000 (\$4.7 million); the sale or closure of seven stores during the remainder of fiscal 2000 (\$9.9 million); exit costs of previously closed or abandoned sites (\$5.6 million); and the discontinuation of e-commerce activities (\$400,000). The \$5.6 million charge related to changes in estimates for previously closed or abandoned sites. The significant components of the \$5.6 million charge were (a) \$3.6 million of additional lease-related liabilities, and (b) \$2.0 million of fixed asset impairments for 15 previously closed stores. Components of the restructuring and asset impairment charge consist primarily of impairment of fixed (\$8.9 million) and intangible assets (\$6.4 million); and noncancelable lease obligations and lease related liabilities (\$5.3 million). Substantially all of the restructuring charges are non-cash expenses.

During the fourth quarter of fiscal 2000, the Company expanded its strategic repositioning and, as a part of such expansion, decided to close or sell twelve under performing stores. This decision resulted in an additional restructuring charge of \$21.4 million. This restructuring charge consists primarily of costs associated with the impairment of fixed (\$13.7 million) and intangible assets (\$1.6 million) and noncancelable lease obligations and lease related liabilities (\$6.1 million). Substantially all of the restructuring charges are non-cash expenses.

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

The assets written off as part of the second and fourth quarter 2000 charges consist of the following:

Goodwill impairment	\$ 8,041,000
Leasehold interest impairment	2,537,000
Fixed asset impairment	<u>20,030,000</u>
Total	\$ 30,608,000 =====

During the first quarter of fiscal 1999, the Company's management made certain decisions relating to the Company's operations and selected store closures, which resulted in \$10.9 million of restructuring charges. Components of the restructuring charge consist of noncancelable lease obligations and lease-related liabilities (\$1.2 million) and impairment of fixed (\$7.8 million) and intangible assets (\$1.9 million). These decisions included (1) a change in the Company's strategic direction, resulting in the closure in the second quarter of fiscal 1999 of its two "Farm to Market" stores located in Buffalo Grove, Illinois, and Tempe, Arizona (\$4.5 million), and (2) exit costs of previously closed or abandoned sites (\$6.4 million). During the first quarter of fiscal 1999, the Company revised its prior exit cost estimates for lease-related liabilities and also determined that it could not recover the previously estimated net realizable value of the fixed assets of the ten stores closed in fiscal 1998. As a result, the Company recorded a restructuring charge of \$6.4 million for the exit costs of stores that were previously closed or abandoned sites prior to fiscal 1999. The significant components of the \$6.4 million charge were (a) fixed asset (\$3.2 million) and goodwill (\$1.9 million) impairments and (b) additional lease-related liabilities (\$1.3 million).

During the third quarter of fiscal 1999, the Company recognized restructuring charges related to the pooling transaction with Henry's that totaled \$645,000. Components of the restructuring charge consist primarily of noncancelable lease obligations (\$287,000) and professional fees associated with the pooling (\$323,000).

During the fourth quarter of fiscal 1999, the Company recognized restructuring charges related to the pooling transaction with Sun Harvest that totaled \$1.1 million. Components of the restructuring charge consist primarily of professional fees associated with the pooling (\$869,000) and employee-related costs (\$128,000).

During fiscal 1998, a \$393,000 restructuring charge was recorded in conjunction with two pooling-of-interests transactions (see Note 3). The restructuring charge consists of employee severance costs (\$201,000), fixed asset write-downs (\$162,000) and lease cancellation costs (\$30,000).

(amounts in thousands)

Balance, December 30, 2000	\$ --	\$ 9,879	\$ --		\$ 9,879
	===	=====	=====	=====	

The significant components of the restructuring accrual as of December 30, 2000 are as follows:

\$ 72,000

Edgar Filing: WILD OATS MARKETS INC - Form 10-K/A

Lease-related liabilities of stores closed during fiscal 1999

Lease-related liabilities of stores included in the restructuring charge for the second quarter of fiscal 2000 4,214,000

Lease-related liabilities of stores included in the restructuring charge for the fourth quarter of fiscal 2000 5,593,000

Total \$ 9,879,000

=====

In the Company's previous fiscal 2000 financial statements, the accrued liability for restructuring was presented as \$14,260,000, which included \$4,381,000 for fixed assets impairment reserves for stores held for sale or closure as of December 30, 2000. These impairment reserves have now been reclassified from this restructuring liability to offset the appropriate fixed assets captions, resulting in a \$4,381,000 reduction to both the fixed assets and restructuring liability captions in these amended 2000 financial statements. Also, as indicated in footnote 1, the loss on the long-term investment of \$2.1 million was removed from the restructuring activity in the above table in these amended financial statements.

Sales and store contribution to profit (sales less cost of goods sold, occupancy costs, and direct store expenses) for closed or sold stores identified as part of the restructuring charges are as follows for fiscal 2000, 1999 and 1998 and include the results of the stores' operations through the date of closing or sale (in thousands):

<u>FISCAL YEAR (unaudited)</u>	<u>2000</u>	<u>1999</u>	<u>1998</u>
Sales	\$ 95,242	\$138,506	\$145,218
Store contribution to profit	\$ 146	\$ 9,452	\$ 9,676

13. 401(k) Plan

The Company maintains a tax-qualified employee savings and retirement plan (the "401(k) Plan") covering the Company's employees. Pursuant to the 401(k) Plan, eligible employees may elect to reduce their current compensation by up to the lesser of 15% of their annual compensation or the statutorily prescribed annual limit (\$10,500 in fiscal 2000) and have the amount of such reduction contributed to the 401(k) Plan. The 401(k) Plan provides for additional matching contributions to the 401(k) Plan by the Company in an amount determined by the Company prior to the end of each plan year. Total Company contributions during fiscal 2000, 1999 and 1998 were approximately \$1.0 million, \$557,000 and \$408,000, respectively. The trustees of the 401(k) Plan, at the direction of each participant, invest the assets of the 401(k) Plan in designated investment options. The 401(k) Plan is intended to qualify under Section 401 of the Internal Revenue Code.

The Company, through Henry's, also sponsored a 401(k) plan in fiscal 1999 covering Henry's employees with at least 12 months of service. Contributions are discretionary. Henry's contributed \$90,000 and \$106,000 to this 401(k) plan for fiscal 1999 and 1998, respectively.

The Company, through Sun Harvest, also sponsored a 401(k) plan in fiscal 1999 covering Sun Harvest employees with at least 12 months of service. Contributions are discretionary. Sun Harvest contributed \$36,000 and \$36,000 to this 401(k) plan for fiscal 1999 and 1998, respectively.

14. Stockholder Rights Plan

The Company has a stockholder rights plan having both "flip-in" and "flip-over" provisions. Stockholders of record as of May 22, 1998 received the right ("Right") to purchase a fractional share of preferred stock at a purchase price of \$145 for each share of common stock held. In addition, until the Rights become exercisable as described below and in certain limited circumstances thereafter, the Company will issue one Right for each share of common stock issued after May 22, 1998. For the "flip-in provision," the Rights would become exercisable only if a person or group acquires beneficial ownership of 15% (the "Threshold Percentage") or more of the outstanding common stock. Holdings of certain existing affiliates of the Company are excluded from the Threshold Percentage. In that event, all holders of Rights other than the person or group who acquired the Threshold Percentage would be entitled to purchase shares of common stock at a substantial discount to the then-current market price. This right to purchase common stock at a discount would be triggered as of a specified number of days following the passing of the Threshold Percentage. For the "flip-over" provision, if the Company was acquired in a merger or other business combination or transaction, the holders of such Rights would be entitled to purchase shares of the acquiror's common stock at a substantial discount.

15. Deferred Compensation Plan

Effective fiscal 1999, the Company maintains a nonqualified Deferred Compensation Plan (the "DCP") for certain members of management. Eligible employees may contribute a portion of base salary or bonuses to the plan annually. The DCP provides for additional matching contributions by the Company in an amount determined by the Company prior to the end of each plan year. Total Company matching contributions to the DCP during fiscal 2000 and 1999 were approximately \$75,000 and \$21,000, respectively.

16. Quarterly Information (Unaudited)

The following interim financial information presents the fiscal 2000 and 1999 consolidated results of operations on a quarterly basis (in thousands, except per-share amounts):

17. Related Party Transactions

Elizabeth C. Cook and Michael C. Gilliland, executive officers and directors of the Company, each own part interest in Pretty Good Groceries, LLC ("PGG"), which operates two grocery stores in Boulder, Colorado. PGG purchases certain items through the Company's volume purchase discount programs with its distributors, for which PGG pays the Company the cost of such items on a monthly basis. The Company does not receive any profit from the purchase of such items by PGG. Ms. Cook and Mr. Gilliland also are trustees of Wild Oats Community Foundation ("Foundation"), a non-profit organization. In fiscal 1998, the Foundation opened Wild Oats Wellness Centers in Boulder, Colorado and Albuquerque, New Mexico in space subleased from the Company. In fiscal 1999, the Foundation opened a Wellness Center in Denver, Colorado and closed the center in Albuquerque, New Mexico. The Foundation pays to the Company the same rent as paid by the Company for the space. There are no material transactions between the Company and the Foundation. Subsequent to December 30, 2000, the Foundation assigned the leases to the two remaining Wellness Centers to third-party operators.

In fiscal 2000, the Company recorded a note receivable in the amount of \$75,000 from a related party that was a subtenant at one of the Company's stores. The principal balance on the note at December 30, 2000 was approximately \$63,000. The note matures in March 2005 and provides for payment of principal and interest at a rate of 7.0%

Subsequent to December 30, 2000, the Company borrowed \$2.0 million from Ms. Cook and Mr. Gilliland. The loan has no maturity date and bears interest at 9.0%.

18. Subsequent Events

Effective March 19, 2001, Michael Gilliland resigned as the Company's Chief Executive Officer. Mr. Gilliland was replaced by Perry D. Odak as the Company's Chief Executive Officer and President. Mr. Odak has a five-year employment agreement with the Company. Mr. Odak purchased five percent of the outstanding stock of the Company, on a fully diluted basis, in exchange for cash and a full recourse promissory note with a five-year maturity date. His employment agreement also provides that upon the issuance of equity in an offering within nine months after the commencement of his employment, he will be granted options, exercisable for up to a maximum of 300,000 shares, to

maintain his percentage ownership in the Company's stock.

REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Stockholders of Wild Oats Markets, Inc.

In our opinion, based on our audits and the reports of other auditors, the consolidated financial statements listed in the index appearing under Item 14(a)(1) on page 51 present fairly, in all material respects, the financial position of Wild Oats Markets, Inc. and its subsidiaries (the "Company") at December 30, 2000 and January 1, 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 30, 2000, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, based on our audits and the reports of other auditors, the financial statement schedule listed in the index appearing under Item 14(a)(2) on page 51 present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. The consolidated financial statements give retroactive effect to the mergers of Henry's Marketplace, Inc. and Sun Harvest Farms, Inc. and its affiliate on September 17, 1999 and December 15, 1999, respectively, in transactions accounted for as poolings of interests, as described in Note 3 to the consolidated financial statements. We did not audit the financial statements of Henry's Marketplace, Inc., which statements reflect total revenues of \$81,025,852 for the fifty-two weeks ended December 27, 1998. Those statements were audited by other auditors whose report thereon has been furnished to us, and our opinion expressed herein, insofar as it related to the amounts included for Henry's Marketplace, Inc. for the fifty-two weeks ended December 27, 1998, is based solely on the report of the other auditors. Additionally, we did not audit the financial statements of Sun Harvest Farms, Inc., which statements reflect total revenues of \$41,155,576 and \$50,841,400 for the thirty-nine weeks ended September 28, 1999, and the fiscal year ended December 29, 1998, respectively. Those statements were audited by other auditors whose report thereon has been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included for Sun Harvest Farms, Inc. for the thirty-nine weeks ended September 28, 1999 and the fiscal year ended December 29, 1998, is based solely on the report of the other auditors. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits and the reports of other auditors provide a reasonable basis for our opinion.

In 1999, the Company changed its method of accounting for pre-opening expenses as discussed in Note 1 to the consolidated financial statements.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company is in violation of certain financial covenants with its lenders and as a result the lenders may request full payment of the outstanding debt upon demand. The Company currently would be unable to make such payment, which raises substantial doubt about its ability to continue as a going concern. The Company currently is negotiating an amendment to its credit facility with the lenders and plans to raise approximately \$30.0 million in private equity financing. Management's plans in regard to these matters are further described in Note 2. The financial statements do not include any adjustments that may result from the outcome of this uncertainty.

PricewaterhouseCoopers LLP

Denver, Colorado

March 28, 2001

Independent Auditors' Report

The Board of Directors
Henry's Marketplace, Inc.

We have audited the statements of earnings, stockholders' equity and cash flows of Henry's Marketplace, Inc. for the fifty-two weeks ended December 27, 1998. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the results of operations and cash flows of Henry's Marketplace, Inc. for the fifty-two weeks ended December 27, 1998, in conformity with generally accepted accounting principles.

KPMG LLP

San Diego, California

February 5, 1999

Report of Independent Auditors

The Board of Directors

Sun Harvest Farms, Inc.

We have audited the accompanying balance sheets of Sun Harvest Farms, Inc. (the Company) as of September 28, 1999, December 29, 1998, and December 30, 1997, and the related statements of income, shareholder's equity (deficit) and cash flows for the nine-month period ended September 28, 1999 and the fiscal years ended December 29, 1998, December 30, 1997, and December 31, 1996, not separately presented herein. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made

by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Sun Harvest Farms, Inc. as of September 28, 1999, December 29, 1998, and December 30, 1997, and the results of its operations and its cash flows for the nine-month period ended September 28, 1999 and the fiscal years ended December 29, 1998, December 30, 1997, and December 31, 1996, in conformity with generally accepted accounting principles.
