THIRD CENTURY BANCORP

Notes to Unaudited Consolidated Condensed Financial Statements

Third Century Bancorp (Third Century) is an Indiana corporation that was formed on March 15, 2004 for the purpose of owning all of the capital stock of Mutual Savings Bank (Mutual or Bank) following the completion of Mutual's mutual-to-stock conversion. Third Century offered for sale 1,653,125 shares of its common stock at \$10.00 per share in a public offering to eligible depositors that was completed on June 14, 2004. On June 29, 2004, Third Century purchased all of the capital stock issued by Mutual. Prior to that date, Third Century had no assets or liabilities.

The activities of Third Century are primarily limited to holding the stock of Mutual. Mutual conducts business primarily in Johnson County and surrounding counties. Mutual attracts deposits from the general public and originates loans for consumer, residential and commercial purposes. Mutual's profitability is significantly dependent on net interest income, which is the difference between interest income generated from interest-earning assets (i.e. loans and investments) and the interest expense paid on interest-bearing liabilities (i.e. customer deposits and borrowed funds). Net interest income is affected by the relative amount of interest-earning assets and interest-bearing liabilities and the interest received or paid on these balances. The level of interest paid or received by Mutual can be significantly influenced by a number of factors, such as governmental monetary policy, competition within our market area and the performance of the national and local economies.

Mutual also owns one subsidiary, Mutual Financial Services, Inc. (Financial), which is engaged primarily in mortgage life insurance sales and servicing.

Note 1: Basis of Presentation

The accompanying unaudited consolidated condensed financial statements were prepared in accordance with instructions for Form 10-QSB and, therefore, do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America. Accordingly, these financial statements should be read in conjunction with the consolidated financial statements and notes thereto of Mutual for the fiscal year ended December 31, 2005 included in Third Century's Annual Report filed as an attachment to its 10-KSB. However, in the opinion of management, all adjustments (consisting of only normal recurring accruals) which are necessary for a fair representation of the financial statements have been included. The results of operations for the nine-month period ended September 30, 2006, are not necessarily indicative of the results which may be expected for the entire year.

The consolidated condensed balance sheet of Third Century as of December 31, 2005 has been derived from the audited consolidated balance sheet of Third Century as of that date.

Note 2: Change in Accounting Principle

Effective January 1, 2006, Third Century adopted Statement of Financial Accounting Standards No.123(R), *Share-Based Payment* ("SFAS 123(R)"). SFAS 123(R) addresses all forms of share-based payment awards, including shares under employee stock purchase plans, stock options, restricted stock, and stock appreciation rights. SFAS 123(R) requires all share-based payments to be recognized as expense, based upon their fair values, in the financial statements over the vesting period of the awards. Third Century has elected the modified prospective application and, as a result, has recorded no compensation expense as all outstanding options were fully vested at December 31, 2005. Prior to the adoption of SFAS 123(R), Third Century accounted for its stock options in accordance with Accounting Principles Board Opinion (APB) No. 25, "Accounting for Stock Issued to Employees." All options were granted with an exercise price equal to the fair value of the stock at the date of grant and accordingly, no compensation expense was recognized. Certain disclosures required by SFAS 123(R) have been omitted due to their immaterial nature. Prior to

the adoption of SFAS 123(R), unearned compensation related to the RRP shares was classified as a separate component of stockholders' equity. In accordance with SFAS 123(R), on January 1, 2006, the balance in unearned compensation was reclassified to the appropriate equity accounts.

Basic and diluted pro-forma	\$ 0.12	\$ (0.15)

Note 3. Stock Option Plan

Pursuant to the Plan, options may be issued which are defined as incentive stock options or as non-qualified stock options. Incentive stock options are intended to qualify under the provisions of Internal Revenue Code Section 422 ("IRC"), which include, among other things, a requirement that the option price is not less than the fair value of the shares as of the date of grant. Non-qualified stock options are those that do not meet the requirements of the provisions of the IRC, and, accordingly, may contain terms that are different from those in place for incentive stock options. During the third quarter of 2005, Third Century awarded 146,300 options to employees and non-employee directors at an exercise price of \$13.10 which equaled the market price for the stock as of the date of the grant. As a result of the capital restructuring through the \$2.00 return of capital dividend, the exercise price of the options was adjusted to \$11.10. In accordance with SFAS 123(R), a comparison of the fair value of the modified award was made to the fair value of the original award and it was determined that no incremental value was transferred as a result of the modification and no compensation expense was recognized. These options were immediately vested. Through the nine months ending September 30, 2006, there was no activity related to the option plan.

Note 4: Principles of Consolidation

The consolidated financial statements include the accounts of Third Century, Mutual and Financial. All significant intercompany balances and transactions have been eliminated in the accompanying consolidated financial statements.

Note 5: Earnings Per Share

Earnings per share is computed based upon the weighted average common shares outstanding during the period. Unearned ESOP shares and unearned RRP shares are not considered outstanding for the earnings per share calculation. The following table presents the factors used in the earnings per share computation for the three and nine months ending September 30, 2006 and September 30, 2005:

Note 6: Effect of Recent Accounting Pronouncements

The FASB has issued a proposed amendment to SFAS No. 128, Earnings Per Share, to clarify guidance for mandatory convertible instruments, the treasury stock method, contingently issuable shares, and contracts that may be settled in cash or share. The primary impact on Third Century of the proposed Statement is the change to the treasury stock method for year-to-date diluted earnings per share.

Currently, SFAS No. 128 requires that the number of incremental shares included in the denominator be determined by computing a year-to-date weighted average of the number of incremental shares included in each quarterly diluted EPS computation. Under the proposed amendment to SFAS 128, the number of incremental shares included in year-to-date diluted earnings per share would be computed using the average market price of common shares for the year-to-date period, independent of the quarterly computations. This computational change is not expected to have a significant impact on the Third Century's diluted earnings per share.

In March 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 156. This Statement amends SFAS 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, with respect to the accounting for separately recognized servicing assets and servicing liabilities.

SFAS No. 156 requires an entity to initially recognize a servicing asset or servicing liability at fair value each time it undertakes an obligation to service a financial asset by entering into a servicing contract in other specific situations.

In addition, SFAS No. 156 permits an entity to choose either of the following subsequent measurement methods for each class of separately recognized servicing assets and servicing liabilities:

- Amortization method—Amortize servicing assets or servicing liabilities in proportion to and over the period of estimated net servicing income or net servicing loss and assess servicing assets or servicing liabilities for impairment or increased obligation based on fair value at each reporting date.
- Fair value measurement method—Measure servicing assets or servicing liabilities at fair value at each reporting date and report changes in fair value in earnings in the period in which the changes occur.

SFAS No. 156 is effective at the beginning of an entity's first fiscal year that begins after September 15, 2006 and should be applied prospectively for recognition and initial measurement of servicing assets and servicing liabilities. Earlier adoption is permitted as of the beginning of an entity's fiscal year, provided the entity has not yet issued financial statements, including interim financial statements, for any period of that fiscal year.

Third Century did not early adopt SFAS No. 156 on January 1, 2006. Management is currently evaluating the effect of adoption of this Statement on Third Century's financial condition or results of operations.

IndexNote 7. Construction of Franklin Central Branch

In August 2005, Mutual Savings Bank purchased land in Franklin Township, which is located in southeastern Marion County, for \$407,550. Construction of a new branch, to be known as the Franklin Central Branch, began in the fourth quarter of 2005. The board of Mutual awarded a contract to Waugh Company for the construction of the Franklin Central Branch in southeast Marion County. In addition, the Bank entered into contracts with Diebold, Inc., a vendor who provides ATM, vault and teller equipment, and PrinceAlexander, an architectural firm, to perform work for and provide services to the Franklin Central Branch project. These contracts represented estimated construction costs to the Bank as follows:

Land acquisition	\$	407,550
Waugh & Company	\$	766,322
Diebold, Inc.	\$	92,179
PrinceAlexander	\$	67,688
Total	\$	1,333,739

The Franklin Central Branch opened for business on June 1, 2006.

Note 8. Reclassifying Entries to the Consolidated Condensed Financial Statements

Reclassifications to the consolidated condensed income statements for the three and nine months ended September 30, 2005 were made to conform to the consolidated condensed income statement presentation of the three and nine months ended September 30, 2006.

Item 2. Management's Discussion and Analysis or Plan of Operations**Forward Looking Statements**

This Quarterly Report on Form 10-QSB ("Form 10-QSB") contains statements which constitute forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements appear in a number of places in this Form 10-QSB and include statements regarding the intent, belief, outlook, estimate or expectations of Third Century (as defined in the notes to the consolidated condensed financial statements), its directors or its officers primarily with respect to future events and the future financial performance of Third Century. Readers of the Form 10-QSB are cautioned that any such forward looking statements are not guarantees of future events or performance and involve risks and uncertainties, and that actual results may differ materially from those in the forward looking statements as a result of various factors. The accompanying information contained in this Form 10-QSB identifies important factors that could cause such differences. These factors include changes in interest rates; loss of deposits and loan demand to other financial institutions; substantial changes in financial markets; changes in real estate values and the real estate market; or regulatory changes, as discussed further below:

(a) **Regulatory Risk.** The banking industry is heavily regulated. These regulations are intended to protect depositors, not shareholders. Third Century and Mutual are subject to regulation and supervision by the Indiana Department of Financial Institutions, Federal Deposit Insurance Corporation, and the Board of Governors of the Federal Reserve System. The burden imposed by federal and state regulations puts banks at a competitive disadvantage compared to less regulated competitors such as finance companies, mortgage banking companies and leasing companies. The banking industry continues to lose market share to competitors.

(b) **Legislation.** Because of concerns relating to the competitiveness and the safety and soundness of the industry, Congress continues to consider a number of wide-ranging proposals for altering the structure, regulation, and competitive relationships of the nation's financial institutions. Management cannot predict whether or in what form any of these proposals will be adopted or the extent to which the business of Third Century or Mutual may be affected thereby.

Index

(c) **Credit Risk.** One of the greatest risks facing lenders is credit risk, that is, the risk of losing principal and interest due to a borrower's failure to perform according to the terms of a loan agreement. While management attempts to provide an allowance for loan losses at a level adequate to cover probable incurred losses based on loan portfolio growth, past loss experience, general economic conditions, information about specific borrower situations, and other factors (all as discussed below in Critical Accounting Policies--Allowance for Loan Losses), future adjustments to reserves may become necessary, and net income could be significantly affected, if circumstances differ substantially from assumptions used with respect to such factors.

(d) **Exposure to Local Economic Conditions.** Mutual's primary market area for deposits and loans encompasses Johnson County, in central Indiana. A substantial percent of the Bank's business activities are within this area. This concentration exposes the Bank to risks resulting from changes in the local economy. A dramatic drop in local real estate values would, for example, adversely affect the quality of the Bank's loan portfolio.

(e) **Interest Rate Risk.** Third Century's earnings depend to a great extent upon the level of net interest income, which is the difference between interest income earned on loans and investments and the interest expense paid on deposits and other borrowings. Interest rate risk is the risk that the earnings and capital will be adversely affected by changes in interest rates.

(f) **Competition.** The activities of Third Century and Mutual in the geographic market served involve competition with other banks as well as with other financial institutions and enterprises, many of which have substantially greater resources than those available to Third Century. In addition, non-bank competitors are generally not subject to the extensive regulation applicable to Third Century and Mutual.

Critical Accounting Policies

Generally accepted accounting principles are complex and require management to apply significant judgments to various accounting, reporting and disclosure matters. Management of Third Century must use assumptions and estimates to apply these principles where actual measurement is not possible or practical. For a complete discussion of Third Century's significant accounting policies, see Note 1 to the Consolidated Financial Statements as of December 31, 2005. Certain policies are considered critical because they are highly dependent upon subjective or complex judgments, assumptions and estimates. Changes in such estimates may have a significant impact on the financial statements. Management has reviewed the application of these policies with the Audit Committee of Third Century's Board of Directors. Those policies include the following:

Allowance for Loan Losses

The allowance for loan losses represents management's estimate of probable losses inherent in the Bank's loan portfolios. In determining the appropriate amount of the allowance for loan losses, management makes numerous assumptions, estimates and assessments.

The strategy also emphasizes diversification on an industry and customer level, regular credit quality reviews and quarterly management reviews of large credit exposures and loans experiencing deterioration of credit quality.

Mutual's allowance consists of three components: probable losses estimated from individual reviews of specific loans, probable losses estimated from historical loss rates, and probable losses resulting from economic or other deterioration above and beyond what is reflected in the first two components of the allowance.

Index

Larger commercial loans that exhibit probable or observed credit weaknesses are subject to individual review. Where appropriate, reserves are allocated to individual loans based on management's estimate of the borrower's ability to repay the loan given the availability of collateral, other sources of cash flow and legal options available to Mutual. Included in the review of individual loans are those that are impaired as provided in SFAS No. 114, *Accounting by Creditors for Impairment of a Loan*. Any allowances for impaired loans are determined by the present value of expected future cash flows discounted at the loan's effective interest rate or fair value of the underlying collateral. Mutual evaluates the collectibility of both principal and interest when assessing the need for a loss accrual. Historical loss rates are applied to other commercial loans not subject to specific reserve allocations.

Homogenous smaller balance loans, such as consumer installment and residential mortgage loans are not individually risk graded. Reserves are established for each pool of loans based on the expected net charge-offs for one year. Loss rates are based on the average net charge-off history by loan category.

Historical loss rates for commercial and consumer loans may be adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions on loss recognition. Factors which management considers in the analysis include the effects of the national and local economies, trends in the nature and volume of loans (delinquencies, charge-offs and nonaccrual loans), changes in mix, asset quality trends, risk management and loan administration, changes in the internal lending policies and credit standards, collection practices and examination results from bank regulatory agencies and the Bank's internal loan review.

An unallocated reserve is maintained to recognize the imprecision in estimating and measuring loss when evaluating reserves for individual loans or pools of loans. Allowances on individual loans are reviewed quarterly and historical loss rates are reviewed annually and adjusted as necessary based on changing borrower and/or collateral conditions and actual collection and charge-off experience.

Mutual's primary market area for lending is Johnson County, Indiana. When evaluating the adequacy of the allowance, consideration is given to this regional geographic concentration and the closely associated effect changing economic conditions have on Mutual's customers.

Mortgage Servicing Rights

Mortgage servicing rights (MSRs) associated with loans originated and sold, where servicing is retained, are capitalized and included in other intangible assets in the consolidated balance sheet. The value of the capitalized servicing rights represents the present value of future servicing fees arising from the right to service loans in the portfolio. Critical accounting policies for MSRs relate to the initial valuation and subsequent impairment tests. The methodology used to determine the valuation of MSRs requires the development and use of a number of estimates, including anticipated principal amortization and prepayments of that principal balance. Events that may significantly affect the estimates used are changes in interest rates, mortgage loan prepayment speeds and the payment performance of the underlying loans. The carrying value of the MSRs is periodically reviewed for impairment based on a determination of fair value. For purposes of measuring impairment, the servicing rights are compared to a valuation prepared based on a discounted cash flow methodology, utilizing current prepayment speeds and discount rates. Impairment, if any, is recognized through a valuation allowance and is recorded as amortization of intangible assets.

Comparison of Financial Condition at September 30, 2006 and at December 31, 2005

Total assets increased \$3.4 million or 2.64% to \$131.5 million at September 30, 2006 from \$128.1 million at December 31, 2005. Total net loans outstanding grew by \$7.0 million or 6.70% to \$112.6 million at September 30, 2006 from \$105.6 million at December 31, 2005. The majority of the loan originations consisted of adjustable rate, one-to-four family, mortgage loans that have a fixed rate for the first five years (\$4.6 million or 289.96%) and

commercial construction loans (\$1.8 million or 40.29%). Cash and cash equivalents decreased \$1.4 million or 17.83% and held to maturity securities decreased \$3.6 million or 39.53% to fund loan growth through September 30, 2006.

Total liabilities increased by \$6.3 million or 5.97% to \$111.9 million at September 30, 2006 from \$105.6 million at December 31, 2005. The Bank paid off \$10.6 million in advances and borrowed an additional \$18.2 million to meet its daily operational cash flow needs, which resulted in a net increase in Federal Home Loan Bank advances of \$7.6 million or 46.06%. Total deposits decreased \$1.4 million or 1.54% to \$87.2 million at September 30, 2006 from \$88.6 million at December 31, 2005. The majority of the decrease in deposits was in money market savings accounts (decreased \$2.3 million or 13.13%) and NOW checking accounts (decreased \$2.1 million or 11.93%). These decreases were offset by an increase in time deposits of \$2.6 million or 7.54%, which was primarily due to the introduction of certificates of deposit with maturities of eleven and twenty-two months.

Index

Total stockholders' equity decreased to \$19.3 million at September 30, 2006 from \$22.4 million at December 31, 2005, representing a decrease of \$3.1 million or 13.48%. The \$3.3 million return of capital was recognized by the Third Century as a reduction of retained earnings as of March 16, 2006 and represented a significant portion of the decrease. The equity contributed by the ESOP increased \$92,000 to \$295,000 at September 30, 2006 from \$203,000 at December 31, 2005. Third Century paid year-to-date cash dividends, exclusive of the return of capital dividend, of \$187,000.
