## Forward-Looking Statements

*This Annual Report on Form 10-K includes forward-looking statements. A cautionary statement regarding forward-looking statements is set forth under the caption Information Concerning Forward-Looking Statements in Item 7. This report should be considered in light of such cautionary statement and the risk factors disclosed in Item 1A.*

## PART I

### Item 1. BUSINESS

#### General

Wausau Paper Corp. ( Wausau Paper ) manufactures, converts, and sells paper and paper products within three principal operating segments: Specialty Products, Printing & Writing, and Towel & Tissue. All three of our business segments market their products under the Wausau Paper® trademark. Our headquarters is located in Mosinee, Wisconsin. At December 31, 2007, we had approximately 2,800 employees at ten operating facilities located in six states.

#### Financial Information About Segments

Information relating to our sales, a measure of operating profit or loss, and total assets by segment is set forth in Note 12 of the Notes to Consolidated Financial Statements.

#### Narrative Description of Business

Wausau Paper competes in different markets within the paper industry. Each of our business segments serves distinct market niches. The various markets for our products are highly competitive, with competition based on service, quality, and price.

Wausau Paper's ten operating facilities are organized into the three business segments as described below.

Effective January 1, 2007, for tax and administrative purposes, we reorganized the various subsidiaries which comprised our operating segments. Each segment is organized as a single member limited liability company and operates as a direct subsidiary of Wausau Paper.

*Specialty Products*

Specialty Products produces a wide variety of technical specialty papers at three facilities located in Rhinelander, Wisconsin; Mosinee, Wisconsin; and Jay, Maine. The markets for technical specialty papers are diverse and highly fragmented. Specialty Products' market position varies by product, but it is a leading producer of supercalendered backing papers used as a base from which peel-and-stick pressure sensitive labels are dispensed. These backing papers are designed for high-speed labeling machines, which apply labels on consumer products such as shampoo and deodorant. Specialty Products is also North America's largest producer of unsaturated masking tape base paper used in the production of masking tape. Other products

include a broad range of food, medical, and industrial papers used in a variety of applications including grease-resistant protective barrier paper for food packaging, lightweight paper for sterilized medical packaging, interleaver paper used in steel processing and to protect polished steel after production, siliconized release papers used in pressure sensitive tapes, labels and composites, and coating and laminating base papers used in composite can construction.

Specialty Products papers are sold to manufacturers and converters, primarily in the United States, that serve a host of industries including consumer products, food service, product identification, medical packaging, and manufacturing.

Under the Wausau Paper® trademark, products are marketed under a variety of brands including EcoSelect™, ExperTec®, DuraTec®, InvenTec®, ProGard®, ProRedi®, ProPly®, and ProTec®.

Primary competition for Specialty Products comes from approximately 8 paper producing companies of which our principal competitors include UPM, Packaging Dynamics Corporation, Ahlstrom Corporation, Boise Cascade, LLC, and Neenah Paper, Inc.

Specialty Products also operates converting facilities in Columbus, Wisconsin, and Jackson, Mississippi, which produce moisture-barrier laminated roll wrap used to protect rolls of paper during storage and shipment, and related specialty finishing and packaging products such as custom coating, laminating, and converting, as well as, consumer products including fabric softener sheets that are sold through retail merchandisers. On December 14, 2007, the roll wrap business was sold to Cascades Sonoco, Inc. Specialty Products will continue to manufacture roll wrap and related products for the buyer during a post-closing transition period which expires on July 2, 2008. Specialty Products will utilize other existing facilities to continue to produce consumer products after the expiration of the post-closing transition period.

### ***Printing & Writing***

Printing & Writing produces and converts fine printing and writing paper products in three facilities. At facilities in Appleton and Brokaw, Wisconsin; and Brainerd, Minnesota, Printing & Writing manufactures and converts a broad line of premium uncoated printing, writing, imaging, text, cover; and board grades, in various weights, colors, sizes, and finishes. Prior to December 31, 2007, Printing & Writing operated a manufacturing facility in Groveton, New Hampshire. In December 2007, we ceased papermaking operations at this facility allowing us to reduce our exposure to unprofitable commodity paper and other non-strategic business. Due to the interchangeability of our printing and writing paper production on our paper machines within the Printing & Writing business segment, as well as shared distribution, sales and marketing, and customer service, we will continue to manufacture and sell the same broad line of fine printing and writing paper products at our remaining Printing & Writing facilities. In 2007, approximately 39% of the fine printing and writing papers we produced were colored papers. Distribution warehouses are currently maintained in Appleton and Brokaw, Wisconsin; Dallas, Texas; Groveton, New Hampshire; and Los Angeles, California.

Under the Wausau Paper® trademark, products are marketed under a variety of brands, including Astrobrights®, Astropaque®, Royal, Exact®, Professional Series™, and Creative Collection™. These papers are used for printed and photocopied documents such as flyers, annual reports, brochures, announcements, and greeting cards. Approximately 73% of Printing & Writing's

products are sold in sheet form to paper distributors, who sell to commercial printers, in-plant print shops, quick printers, and copy centers and to office supply and mass merchandisers to reach consumers. Products are also sold in roll form to converters that serve, as an example, the greeting card, envelope, and announcement industry. The segment's fine printing and writing sales are estimated to be approximately 3% of the total North American uncoated free-sheet market although a greater share is held in certain segments of this market.

Competition in printing and writing grades comes from major integrated paper companies as well as smaller, privately held non-integrated companies. We estimate that the number of principal competitors in the printing and writing grade papers portion of the uncoated free-sheet market is approximately 8 of which our principal competition includes International Paper Company, Domtar, Inc., Neenah Paper, Inc., Mohawk Fine Papers, Inc., Boise Cascade, LLC, and Finch Paper.

### *Towel & Tissue*

Towel & Tissue produces a broad line of paper towel and tissue products which are marketed along with soap and dispensing system products for the industrial and commercial away-from-home market.

Under the Wausau Paper® trademark, Bay West® towel and tissue products, made primarily from recycled material, are marketed under a number of brands including DublSoft®, EcoSoft™, OptiCore®, Revolution®, Dubl-Nature®, and Dubl-Tough®. These products include washroom roll and folded towels, tissue products, a variety of towel, tissue, and soap dispensers, windshield folded towels, industrial wipers, dairy towels, household roll towels, and other premium towel and tissue products. Products are sold to paper and sanitary supply distributors in North America that serve factories and other commercial and industrial locations, health service facilities, office buildings, restaurants, theme parks, airports, and hotels. Towel & Tissue operates a paper mill located in Middletown, Ohio and a converting facility and its main distribution warehouse are located in Harrodsburg, Kentucky. In addition, Towel & Tissue currently maintains distribution warehouses in Danville, Kentucky, and Los Angeles, California.

Competition comes from major integrated paper companies and smaller converters who service consumer and food service markets as well as the industrial and institutional markets concentrated on by Towel & Tissue. Our major competitors include Georgia-Pacific Corporation, Kimberly Clark Corporation, and SCA Hygiene Products.

### *Export Sales*

Currently, foreign sales represent approximately 8 percent of Wausau Paper's consolidated net sales, with sales to Canada representing 6 percent of consolidated net sales. Refer to Note 12 of the Notes to Consolidated Financial Statements for our geographic data.

***Raw Materials***

Pulp is the basic raw material for paper production and represents approximately one-half of the total raw material cost of making paper. The Mosinee mill within the Specialty Products

3

---

business segment is our only facility with a pulp producing operation. During 2007, the Mosinee pulp mill provided a percentage of the fiber needs to our Wisconsin paper operations as follows: Mosinee, 60% and Rhinelander, 5%. The balance of our pulp needs at the Mosinee and Rhinelander mills and all of the pulp used at our other facilities (an aggregate of approximately 530,000 air-dried metric tons in 2007) was purchased on the open market, principally from pulp mills throughout the United States and Canada. We have purchased, and may, from time to time in the future, purchase pulp futures contracts as a hedge against significant future increases in the market price of pulp.

In 2007, wood fiber that is required for operation of our pulp mill was purchased on the open market in the form of pulpwood and chips from independent contractors. In addition, approximately 3% of the timber consumed in pulping operations was produced from Wausau Paper-owned timberlands. Open-market pulpwood was purchased from approximately 200 independent loggers at market prices under contracts that typically provide for the delivery of a specified amount of wood and are entered into on a quarterly basis. Open-market chips were also purchased from independent sawmills.

Recycled, de-inked fiber with a high content of post-consumer waste is purchased from domestic suppliers as part of the fiber requirements for Printing & Writing's recycled products. Recycled fiber is in adequate supply and readily obtainable. Additionally, Towel & Tissue fulfills substantially all of its de-inked fiber needs from 100% recycled wastepaper which is readily available from domestic suppliers. Approximately 140,000 standard tons of wastepaper is consumed annually to produce approximately 60% of our parent roll requirements. The balance of our parent roll supply needs is purchased from outside sources at then current market prices.

Various chemicals are used in the pulping and papermaking processes. These industrial chemicals are available from a number of suppliers and are purchased at current market prices.

### ***Energy***

Wausau Paper's paper mills consume significant amounts of electrical and steam energy which are adequately supplied by public utilities or generated at Wausau Paper operated facilities. We generate approximately 33% of our electrical power needs from spent pulping liquor, fuel oil, coal, wood chips, fiber cake, natural gas, and hydropower. Spent pulping liquor, wood chips, and fiber cake are byproducts of mill operations. We continue to explore alternative power sources as an ongoing business practice.

We contract for the supply and delivery of natural gas at some of our facilities. Under these contracts, we are committed to the transportation of a fixed volume of natural gas from our natural gas suppliers to our facilities. We are not required to buy or sell minimum gas volumes under the agreement, but are required to pay a minimum transportation fee for the contracted period. Contracts expire at various times between 2008 and 2019. At December 31, 2007, we also have volume commitments for the supply of fuel oil, natural gas, paper, and certain raw materials. These obligations expire between 2008 and 2010. We may also purchase, from time to time, natural gas contracts with fixed prices for a certain portion of our facility requirements.

4

---

### ***Patents and Trademarks***

Wausau Paper adopts trademarks and develops inventions and files trademark and patent applications for them, as appropriate. Trademarks include Wausau Paper®, EcoSelect™, ProPly®, ExperTec®, DuraTec®, InvenTec®, ProGard®, ProRedi®, ProTec®, Astrobrights®, Astropaque®, Exact®, Bay West®, EcoSoft™, EcoSelect™, DublSoft®, OptiCore®, Revolution®, Dubl-Nature®, Dubl-Tough®, and Wave 'N Dry®, among others. Our patents cover various paper towel and tissue dispensers, metering or other mechanisms for towel and tissue dispensers and cabinets, and certain silicone release papers. We consider our trademarks and patents, in the aggregate, to be material to our business, although we believe the loss of any one such mark or patent right would not have a material adverse effect on our business. We do not own or hold material licenses, franchises, or concessions.

### ***Seasonal Nature of Business***

The markets for some of the grades of paper produced by Wausau Paper tend to be somewhat seasonal. However, the marketing seasons for these grades are not necessarily the same. Overall, we generally experience lower sales in the first quarter, in comparison to the rest of the year, primarily due to reduced business activity for many customers following the year-end holiday season.

### ***Working Capital***

As is customary in the paper industry, we carry adequate amounts of raw materials and finished goods inventory to facilitate the manufacture and rapid delivery of paper products to our customers.

### ***Major Customers***

No single customer accounted for 10% or more of our consolidated net sales during 2007. On a segment basis, two customers accounted for approximately 30% of our Printing & Writing business net sales and one customer accounted for approximately 14% of our Towel & Tissue net sales while no single customer in Specialty Products business segment comprised 10% or more of the respective segment net sales.

### ***Backlog***

Consolidated order backlogs at December 31, 2007, increased to approximately 49,900 tons representing \$65.4 million in sales compared to 48,300 tons, or \$59.9 million of sales at December 31, 2006, and 42,500 tons, or \$52.1 million in sales at December 31, 2005. The change in customer order backlog at December 31, 2007, compared to December 31, 2006, does not necessarily indicate a change in business conditions, as a large portion of orders is shipped directly from inventory upon receipt and does not impact backlog numbers. A backlog of unmade customer orders is monitored to optimize paper machine production. The entire backlog at December 31, 2007 is expected to be shipped during fiscal 2008. Information on backlogs by business segment is included in Item 7 of this report.

### ***Research and Development***

Research and development projects for the last three fiscal years primarily involved development of a variety of new release liners for Specialty Products line of peel-and-stick liner papers, food-packaging/food-service papers, and the development of new color and writing grades at Printing & Writing. Expenditures for product development were \$2.6 million, \$2.1 million, and \$1.9 million in 2007, 2006, and 2005, respectively.

### ***Environment***

Wausau Paper is subject to extensive regulation by various federal, state, provincial, and local agencies concerning compliance with environmental control statutes and regulations. These regulations impose limitations, including effluent and emission limitations, on the discharge of materials into the environment, as well as require us to obtain and operate in compliance with conditions of permits and other governmental authorizations. Future regulations could materially increase our capital requirements and certain operating expenses in future years.

We have a strong commitment to protecting the environment. Like our competitors in the paper industry, we face increasing capital investments and operating expenses to comply with expanding and more stringent environmental regulations. We estimate that our capital expenditures for environmental compliance purposes will approximate \$0.8 million in 2008.

We believe that capital expenditures associated with compliance with environmental regulations will not have a material adverse effect on our competitive position, consolidated financial condition, liquidity, or results of operations.

Wausau Paper is not involved in any proceedings under the Comprehensive Environmental Response, Compensation and Liability Act. In 1986, the Wisconsin Department of Natural Resources ( DNR ) named a subsidiary of Wausau Paper as a potentially responsible party ( PRP ) for the Gorski landfill in Mosinee, Wisconsin. Our estimate of remediation and water replacement costs associated with the landfill is approximately \$1.5 million. These costs will likely be shared among the members of an ad hoc group of PRPs. We are of the opinion that our share of these costs will not have a material adverse effect on our operations, financial condition, or liquidity. We are continuing to pursue coverage of defense costs and liability coverage with our insurance carriers.

Note 9 of the Notes to Consolidated Financial Statements discusses our policies with respect to the accrual of remediation costs. Estimates of costs for future remediation are necessarily imprecise due to, among other things, the identification of presently unknown remediation sites and the allocation of costs among PRPs. We believe that our share of the costs of cleanup for our current remediation site will not have a material adverse impact on our consolidated financial position. As is the case with most manufacturing and many other entities, there can be no assurance that we will not be named as a PRP at additional sites in the future or that the costs associated with such additional sites would not be material.

*Employees*

We had approximately 2,800 employees at the end of 2007. Most hourly mill employees are covered under collective bargaining agreements. A new three-year labor agreement was negotiated with United Steel Workers Local 2-1260 and 1381 at Printing & Writing's Brokaw, Wisconsin facility in 2007, retroactive to June 1, 2006. Also, a new three-year labor contract was negotiated with the United Steelworkers Local 04-00061 at our Printing & Writing's Groveton, New Hampshire facility. Later in 2007, we negotiated a settlement agreement with the United Steelworkers Local 04-00061 directly as a result of the decision to cease papermaking operations at Printing & Writing's Groveton, New Hampshire facility in December 2007. Labor agreements will expire at other facilities in 2008, 2009, and 2010.

We maintain good labor relations at all facilities and expect that new multi-year contracts will be negotiated at competitive rates.

## **Executive Officers of the Company**

The following information relates to executive officers of Wausau Paper as of March 14, 2008. Unless otherwise specified, current positions listed for an executive officer have been held for a minimum of five years.

### **San W. Orr, Jr., 66**

Chairman of the Board of the Company and Advisor, Estates of A. P. Woodson and family; Chief Executive Officer of the Company (2000; 1994-1995; 1989-1990); formerly Chairman of the Board (1987-1997) and a Director (1972-1997) of Mosinee Paper Corporation; also a Director of Marshall & Ilsley Corporation.

### **Thomas J. Howatt, 58**

President and Chief Executive Officer. Previously, Senior Vice President, Printing & Writing (1997-2000), Vice President and General Manager, Printing & Writing Division (1994-1997), Vice President and General Manager, Wausau Papers of New Hampshire (1993-1994), Vice President Operations, Brokaw Division (1990-1993), and prior thereto, Vice President, Administration, Brokaw Division.

### **Stuart R. Carlson, 61**

Executive Vice President, Administration. Previously, Senior Vice President, Specialty Paper Group (1997-2000), and Senior Vice President -Administration (1993-1996), and Vice President Human Resources (1991-1993) of Mosinee Paper Corporation. Also Director of Human Resources, Georgia Pacific, Inc. (1990-1991) and Corporate Director of Industrial Relations, Great Northern Nekoosa Corporation (1989-1990).

### **Albert K. Davis, 60**

Executive Vice President, Specialty Products. Previously, Vice President of Operations (1996-2000), Vice President of Engineering (1990-1996), and Director of Engineering (1983-1990), Rhineland Paper Company, Inc.

### **Pete R. Chiericozzi, 64**

Senior Vice President, Towel & Tissue since September, 2003. Previously, Consultant, Self-employed (2002), Vice President, Sales and Marketing, SCA Tissue (2001), Executive Vice President, Sales and Marketing, Georgia-Pacific Tissue (2000), Executive Vice-President, Wisconsin Tissue (Division of Chesapeake Corporation) (1999).

### **Daniel R. Trettin, 58**

Senior Vice President, Printing & Writing since November, 2006. Previously, Vice President, Technology (2005-2006), Vice President, Naheola Operations (2002-2005), Vice President, Manufacturing (2001-2002), Vice President, Wisconsin Operations (1997 -2001), and General Manager, Wisconsin Operations (1993-1997), Georgia-Pacific.

**Scott P. Doescher, 48**

Senior Vice President, Finance, Secretary and Treasurer. Previously, Vice President, Finance, Printing & Writing Group (1998-2001), Director of Finance, Printing & Writing Division (1992-1998) and Corporate Director Financial Analysis and Internal Audit and Assistant Secretary/Treasurer (1988-1992).

**Available Information**

Information regarding our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments to these reports, are available, free of charge, on our website by going to Investor Information SEC Filings at [www.wausaupaper.com](http://www.wausaupaper.com). These reports are available as soon as reasonably practicable after we electronically file such reports with or furnish them to the Securities and Exchange Commission ( SEC ).

**Item 1A. RISK FACTORS**

*An investment in Wausau Paper stock involves risk. You should carefully consider the following risk factors and the other information contained in this Annual Report on Form 10-K and in other reports that we file from time to time with the SEC. Our business, financial condition and results of operations could be harmed if any of the following risks occur. In that case, the trading price of our common stock may decline. In addition to the following risk factors, you should carefully review the cautionary statement made under Information Concerning Forward-Looking Statements in Item 7.*

**The segments of the paper industry in which we operate are highly competitive and increased competition could reduce our sales and profitability.**

We compete in different markets within the paper industry on the basis of the quality of our products, customer service, product development activities, price, and distribution. All of our markets are highly competitive. Our competitors vary in size, and many have greater financial and marketing resources than we do. In some of our markets, the industry's capacity to make products exceeds current demand levels. Competitive conditions in some of our segments have caused us to incur lower net selling prices and reduced gross margins and net earnings. These conditions may continue indefinitely. See Item 1 of this report for information regarding the number and identities of our competitors in our operating segments. See Item 7 concerning recent competitive conditions in the markets we serve.

As a producer of specialty papers, we target markets in which our relative size, equipment and product development capabilities, and customer service emphasis provide us a competitive advantage. We work to limit our exposure to commodity products where larger competitors with more efficient equipment generally have production cost

advantages. Recent improvements in some commodity products have narrowed the quality differential between these products and our specialty products. Changes of this nature could further commoditize and reduce the size of our target markets.

9

---

**Changes within the paper industry may adversely affect our financial performance.**

Changes in the identity, ownership structure, and strategic goals of our competitors and the emergence of new competitors in our target markets may harm our financial performance. New competitors may include foreign-based companies and commodity-based domestic producers who could enter our specialty markets if they are unable to compete in their traditional markets. The paper industry has also experienced consolidation of producers and distribution channels. Further consolidation could unite other producers with distribution channels through which we currently sell, limiting access to our target markets.

**Our business and financial performance may be adversely affected by downturns in the target markets that we serve or reduced demand for the types of products we sell.**

Demand for our products is often affected by general economic conditions as well as product-use trends in our target markets. These changes may result in decreased demand for our products. For example, our away-from-home towel and tissue business usually declines during periods of economic slowdowns as business and recreational travel is curtailed. Also, demand for uncoated freesheet papers, the broad market category in which Printing & Writing competes, has declined in six of the last eight years due to such factors as general economic conditions, office employment trends and the increased use of electronic communications. There may be periods during which demand for our products is insufficient to enable us to operate our production facilities in an economical manner. The occurrence of these conditions is beyond our ability to control and, when they occur, they may have a significant impact on our sales and results of operations.

**The cost of raw materials and energy used to manufacture our products could increase.**

Raw materials comprise approximately 55% of our cost of sales, with market pulp, purchased parent rolls, and wastepaper accounting for approximately three-quarters of this total. Raw material prices will change based on supply and demand on a worldwide spectrum. Pulp price changes can occur due to worldwide consumption levels of pulp, pulp production capacity, expansions or curtailments, inventory building or depletion, and pulp producer cost changes related to wood availability, environmental issues, or other variables.

We purchase the majority of our energy needs. Energy costs may fluctuate significantly due to increased worldwide consumption levels, disruptions in supply due to natural catastrophes or political turmoil, or decreased production capacity.

We may not be able to pass increased cost for raw materials or energy to our customers if the market or existing agreements with our customers do not allow us to raise the prices of our finished products. Even if we are able to pass through increased cost of raw materials or energy, the resulting increase in the selling prices for our products could

reduce the volume of products we sell and decrease our revenues. While we may try, from time to time, to hedge against price increases, we may not be successful in doing so.

We currently purchase approximately 40%, or 70,000 tons per year, of our towel and tissue parent roll consumption from other producers in the paper industry. A disruption in supply of

10

---

these parent rolls could have an adverse affect on our ability to meet demand for our products and a significant increase in the cost of these parent rolls could unfavorably impact profitability.

**The failure to develop new products could reduce the overall demand for our products and our net income.**

We have a goal of generating at least 25% of our annual revenue from products introduced within the previous three years. Our sales volume and net earnings may decrease if we do not satisfy new customer product preferences or fail to meet new technology demands of our customers.

**If we fail to maintain satisfactory relationships with our larger customers, our business may be harmed.**

We do not have long-term, fixed quantity supply agreements with our customers. Due to competition or other factors we may lose business from our customers, either partially or completely. The loss of one or more of our significant customers, or a substantial reduction of orders by any of our significant customers, could harm our business and results of operations. Moreover, our customers may vary their order levels significantly from period to period, and customers may not continue to place orders with us in the future at the same levels as in prior periods. In the event we lose any of our larger customers, we may not be able to replace that revenue source, which could harm our financial results.

**We may be unable to maintain our relationships with organized labor unions.**

The majority of our hourly production workforce is represented by labor unions. While we believe we enjoy satisfactory relationships with all of the labor organizations that represent our employees, we cannot guarantee that labor-related disputes will not arise. Labor disputes could result in disruptions in production and could also cause increases in production costs, which could damage our relationships with our customers and adversely affect our business and financial results.

**The costs of complying with environmental regulations may increase substantially and adversely affect our consolidated financial condition, liquidity, or results of operations.**

We are subject to various environmental laws and regulations that govern discharges into the environment and the handling and disposal of hazardous substances and wastes. Environmental laws impose liability and clean-up responsibility for releases of hazardous substances into the environment. We will continue to incur substantial capital and operating expenses in order to comply with current law. Any changes in these laws or their interpretation by government agencies or the courts may significantly increase our capital expenditures and operating expenses and

decrease the amount of funds available for investment in other areas of operation. In addition, we may be required to eliminate or mitigate any adverse effects on the environment caused by the release of hazardous materials, whether or not we had knowledge of, or were responsible for, such release. We may also incur liability for personal injury and property damages as a result of discharges into the environment. The costs of remediation of known environmental sites, such as described in Note 9 of the Notes to Consolidated Financial

Statements, may exceed current estimates and there may be additional sites not now known to us that may require significant remediation expenses in the future. If costs or liabilities related to environmental compliance increase significantly, our consolidated financial condition, liquidity, or results of operations may be adversely affected.

**We may be unable to generate sufficient cash flow to simultaneously fund our operations, finance capital expenditures, satisfy other obligations, and make dividend payments on our common stock.**

Our business is capital intensive and requires significant expenditures for equipment maintenance and new or enhanced equipment for environmental compliance matters, and to support our business strategies. We expect to meet all of our near- and longer-term cash needs from a combination of operating cash flow, cash and cash equivalents, execution of our previously announced timberland sales program, our existing credit facility or other bank lines of credit, and other long-term debt. If we are unable to generate sufficient cash flow from these sources or if we are unable to secure needed credit, we could be unable to meet our near- and longer-term cash needs or make dividend payments.

**If we have a catastrophic loss or unforeseen or recurring operational problems at any of our facilities, we could suffer significant lost production and/or cost increases.**

Our paper making and converting facilities and distribution warehouses may suffer catastrophic loss due to fire, flood, terrorism, mechanical failure, or other natural or man-made events. If any of these facilities were to experience a catastrophic loss, it could disrupt our operations, delay production, delay or reduce shipments, reduce revenue, and result in significant expenses to repair or replace the facility. These expenses and losses may not be adequately covered by property or business interruption insurance. Even if covered by insurance, our inability to deliver our products to customers, even on a short-term basis, may cause us to lose market share on a more permanent basis.

**Our acquisitions, facility closings, or other structural changes may result in financial results that are different than expected.**

In the normal course of business, we frequently engage in discussions with third parties relating to the possible acquisition of additional facilities and may consider, from time to time, the acquisition of another business. We also continually review and may implement structural changes designed to improve our operations or to reflect anticipated changes in long-term market conditions. As a result of recent or similar future transactions, our financial results may differ from the investment community's expectations in a given quarter, or over the long term. We may have difficulty integrating the acquisition of a newly acquired company in a way that enhances the performance of our combined businesses or product lines to realize the value from expected synergies. We may also have difficulty integrating a new manufacturing facility into current operations. These difficulties can arise for a variety of reasons, including, the size and complexity of the acquisition, the retention of key employees, the retention of key customers, and the ability to integrate manufacturing systems and transfer our corporate culture to new employees and facilities. In addition, we have closed or disposed of certain businesses and assets in response to changes in market conditions or strategic plans.

In October 2007, we

12

---

announced a three-part recovery plan to improve profitability of our Printing & Writing business segment, which included the closure of the Groveton, New Hampshire facility, a sales and marketing effort focused on core products and brands, and strategic investment alternatives to enhance capabilities and reduce costs. If we do not realize the expected benefits or synergies of such transactions or strategic plans, our consolidated financial position, liquidity, and results of operations could be negatively impacted.

**If we incur a material weakness in our internal control over financial reporting, it could have a material adverse effect on our business, operating results, and stock price.**

Section 404 of the Sarbanes-Oxley Act of 2002 and related rules and regulations promulgated by the SEC (collectively, Section 404 ) require us to assess and report on our internal control over financial reporting as of the end of each fiscal year. In our report under Section 404 which is included in Item 8 of this report, we have concluded that our internal control over financial reporting is effective. Our auditors have concurred on that assessment.

If we should develop a material weakness in our control over financial reporting, it could have a material adverse effect on the company. A material weakness is a control deficiency, or a combination of control deficiencies, that results in there being more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis by management or employees in the normal course of performing their assigned functions. If a material weakness occurs, it could adversely affect our financial reporting process and our financial statements. If we fail to maintain an effective internal control environment it could have a material adverse effect on our business, operating results, and our stock price.

**Future changes in financial accounting standards may adversely affect our reported results of operations.**

A change in financial accounting standards can have a significant effect on our reported results. New accounting pronouncements may adversely affect our reported financial results in the future or require us to restate results we have already reported. New financial accounting standards or interpretations may require us to recognize additional expenses in the future or change the manner in which amounts currently recognized are determined. Such additional expense recognition may result in lower reported net earnings or increased balance sheet liabilities, either of which may reduce the market price of our common stock or affect our compliance with various covenants relating to our indebtedness.

**We may incur significant, unexpected liabilities from current or future claims, including matters now threatened or in litigation.**

We deal with claims which are threatened or made by third parties in the normal course of our business. Some claims result in formal administrative or legal proceedings in which the amounts claimed are significant. We assess each

claim and make a judgment whether the claim will have a material adverse effect on our consolidated financial condition, liquidity, or results of operations. Claims which we believe could have material adverse effect if not resolved in our favor, or other claims which we believe to be significant, are discussed in Item 3 of this report

and in Note 9 of the Notes to Consolidated Financial Statements for the most recent fiscal year which are included in Item 8 of this report. Our reports do not disclose or discuss all claims of which we are aware. Our assessment of the materiality of any claim is based upon the amount involved, the underlying facts, and our assessment of the likelihood of a material adverse outcome. If our assessment of a claim as immaterial is not correct, we may not have made adequate provision for such loss and our consolidated financial condition, liquidity, or results of operations could be harmed.

**We may become involved in claims concerning intellectual property rights, and we could suffer significant litigation or related expenses in defending our own intellectual property rights or defending claims that we infringed the rights of others.**

None of our trademarks or patents is, in itself, considered to be material to our business. However, taken together, we consider our intellectual property to be a material asset. We may lose market share and suffer a decline in our revenue and net earnings if we cannot successfully defend one or more trademarks or patents.

We do not believe that any of our products infringe the valid intellectual property rights of third parties. However, we may be unaware of intellectual property rights of others that may cover some of our products or services. In that event, we may be subject to significant claims for damages.

Any litigation regarding patents or other intellectual property could be costly and time-consuming and could divert our management and key personnel from our business operations. Claims of intellectual property infringement might also require us to enter into license agreements, which would reduce our operating margins, or in some cases, we may not be able to obtain license agreements on terms acceptable to us.

**Some anti-takeover provisions in our articles of incorporation and bylaws, as well as provisions of Wisconsin law, could impair a takeover attempt.**

Our articles of incorporation and bylaws, and our shareholders rights plan, could have the effect of rendering more difficult or discouraging an acquisition of Wausau Paper that is deemed undesirable by our board of directors. These include provisions that:

- 

permit our board of directors to issue one or more series of preferred stock with rights and preferences designated by our board, including stock with voting, liquidation, dividend, and other rights superior to our common stock;

- 

impose advance notice requirements for shareholder proposals and nominations of directors to be considered at shareholder meetings;

- 

divide our board of directors into three classes of directors serving staggered terms;

- 

allow the board of directors to fill any vacancies on our board;

14

---

•

under our articles of incorporation, prohibit us from entering into a business combination transaction with any person who acquires 10% of our voting stock at any time (an interested 10% shareholder ) unless certain fair price requirements are met or, in the alternative, either (a) two-thirds of the shares entitled to vote which are not held by the interested shareholder are voted for the transaction, or (b) the board of directors has approved the transaction;

•

under Wisconsin law, require that two-thirds of our voting stock must vote to approve any merger with another corporation, a share exchange, or the sale of substantially all of our assets;

•

under Wisconsin law, prohibit us from entering into a business combination transaction with an interested 10% shareholder for a period of three years from the date such person makes such an acquisition unless our board of directors had approved the business combination or the acquisition of shares before the date of the acquisition;

•

under Wisconsin law, prohibit us from entering into a business combination transaction with an interested 10% shareholder at any time after a period of three years from the date of becoming an interested 10% shareholder unless our board of directors had approved the acquisition of shares before the date of the acquisition, the business combination meets certain fair price requirements, or the business combination is approved by a majority of the shares entitled to vote which are not beneficially owned by the interested 10% shareholder;

•

under Wisconsin law, reduce the voting power of any shares held by a shareholder who holds in excess of 20% of the shares outstanding to 10% of the full voting power of the excess shares;

•

require a vote by the holders of four-fifths of our outstanding shares to amend the provisions of our articles or bylaws described above; and

•

require that, in many potential takeover situations, rights issued under our shareholder rights plan become exercisable to purchase our common stock and potentially other securities at a price substantially discounted from the then applicable market price.

These provisions and similar provisions that could apply to us in the future may discourage potential takeover attempts, discourage bids for our common stock at a premium over market price, or otherwise adversely affect the market price of, and the voting and other rights of the holders of, our common stock. Such provisions could also discourage proxy contests and make it more difficult for shareholders to elect directors other than the candidates nominated by our board of directors.

**Item 1B. UNRESOLVED STAFF COMMENTS**

Not applicable

15

---

**Item 2. PROPERTIES**

Wausau Paper's headquarters are located in Mosinee, Wisconsin. Executive officers and corporate staff who perform corporate accounting, financial, and human resource services are located in the corporate headquarters, as are certain business segment personnel. Our operating facilities consist of the following:

Facility	Product	Number of Paper Machines	Practical Capacity* (tons)	2007 Actual (tons)
<u>Specialty Products</u>				
Rhineland, WI	Paper	4	152,000	146,800
Jay, ME	Paper	2	74,000	69,200
Mosinee, WI	Paper	4	119,000	117,100
	Pulp		96,000	83,800
Columbus, WI and Jackson, MS **	Laminated/ Coated Papers	N/A	150,000	46,800
<u>Printing &amp; Writing</u>				
Brokaw, WI	Paper	4	178,000	164,200
Brainerd, MN	Paper	2	176,000	95,200
Appleton, WI	Converting	N/A	120,000	53,500
<u>Towel &amp; Tissue</u>				
Middletown, OH	Towel & Tissue	2	110,000	106,600
	Deink Pulp		110,000	101,700
Harrodsburg, KY	Converted Towel & Tissue	N/A	190,000	169,200

\* Practical capacity is the amount of finished product a mill can produce with existing papermaking equipment, grade mix and workforce and usually approximates maximum, or theoretical, capacity. At Wausau Paper's converting operations it reflects the approximate maximum amount of product that can be made on existing equipment, but would require additional days and/or shifts of operation to achieve.

\*\* The converting facilities in Columbus, Wisconsin, and Jackson, Mississippi, relate to the moisture-barrier laminated roll wrap business, which was sold to Cascades Sonoco, Inc. on December 14, 2007. We will continue to manufacture roll wrap and related products for the buyer during a post-closing transition period which expires on July 2, 2008. The practical capacity represents the maximum amount of product that can be made on the existing equipment that was acquired by the buyer as part of this transaction. We have retained the real property at the roll wrap production facilities and intend to sell the property following the completion of the transition period.

Edgar Filing: WAUSAU PAPER CORP. - Form 10-K

Wausau Paper currently maintains warehouse distribution facilities in order to provide prompt delivery of its products. The facilities are:

Segment	Location	Square Feet	Owned or Leased (Expiration Date)
Printing & Writing	Appleton, WI	36,000	Owned
	Brokaw, WI	174,000	Owned
	Groveton, NH	80,000	Owned
	Dallas, TX	70,000*	Leased (December 2008)
	Los Angeles, CA	59,000*	Leased (December 2008)
Towel & Tissue	Los Angeles, CA	36,000*	Leased (December 2008)
	Harrodsburg, KY	460,000	Owned
	Danville, KY	506,000	Leased (January 2013)

\*

guaranteed space

Aggregate of approximately 95,000 square feet under one agreement which will expire in December 2008.

Specialty Products, Printing & Writing, and Towel & Tissue also lease limited space in various warehouses to facilitate deliveries to specific customers.

We own approximately 100,000 acres of timberland in the state of Wisconsin. The growing stock inventory on our timberlands is an estimated 8 million board feet of saw timber and an estimated 566,000 cords of pulpwood. During 2005, we announced our intent to sell approximately 42,000 acres of timberlands. During 2007 we sold approximately 5,200 acres of our timberlands resulting in an after-tax gain of \$6.0 million. A total of approximately 21,600 acres remains in the timberland sales program. Our timberland sales program is expected to continue at a pace

in 2008 that will allow us to complete our sales program over the next two to three years.

17

---

### **Item 3. LEGAL PROCEEDINGS**

Wausau Paper has been named as a potentially responsible party with respect to a Mosinee, Wisconsin landfill. See Environment in Item 1 and Note 9 in Notes to Consolidated Financial Statements included in Item 8 of this report.

We strive to maintain compliance with applicable environmental discharge regulations at all times. However, from time to time, our operating facilities may exceed permitted levels of materials into the environment or inadvertently discharge other materials. Such discharges may be caused by equipment malfunction, prevailing environmental conditions, or other factors. It is our policy to report any violation of environmental regulations to the appropriate environmental authority as soon as we become aware of such an occurrence and to work with such authorities to take appropriate remedial or corrective actions.

We may be involved from time to time in various other legal and administrative proceedings or subject to various claims in the normal course of its business. Although the ultimate disposition of legal proceedings cannot be predicted with certainty, in the opinion of management, the ultimate disposition of any threatened or pending matters, either individually or on a combined basis, will not have a material adverse effect on our consolidated financial condition, liquidity, or results of operations. See Item 1A, page 13, concerning the possible effect of unexpected liabilities from current or future claims.

### **Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

No matters were submitted to a vote of shareholders during the fourth quarter of 2007.

**PART II****Item 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS, AND ISSUER PURCHASES OF EQUITY SECURITIES****Market and Dividend Information**

Wausau Paper common stock is traded on the New York Stock Exchange under the symbol "WPP".

As of the record date of the annual meeting, February 15, 2008, (the "Record Date") there were approximately 2,500 holders of record of Wausau Paper common stock. We estimate that as of the Record Date there were approximately 40,100 additional beneficial owners whose shares were held in street name or in other fiduciary capacities. As of the Record Date, there were 49,757,042 shares of common stock outstanding.

The following table sets forth the range of high and low sales price information of Wausau Paper common stock and the dividends declared on the common stock, for the calendar quarters indicated.

Calendar Quarter	Market Price		Cash Dividend
	High	Low	Declared
<b>2007</b>			
<b>First Quarter</b>	<b>\$15.60</b>	<b>\$13.57</b>	<b>*</b>
<b>Second Quarter</b>	<b>\$15.58</b>	<b>\$12.73</b>	<b>\$.17</b>

\* In 2007, includes after-tax expense of \$28.8 million (\$45.9 million pre-tax) or \$0.57 per share for closure costs and restructuring expenses as a result of the ceasing of papermaking operations at Printing & Writing's Groveton, New Hampshire mill. In addition, effective January 1, 2007, we reorganized the various subsidiaries which comprised our operating segments to align more closely to our operating structure resulting in state tax benefits of \$11.6 million or \$0.23 per share primarily related to the release of valuation allowances on state net operating loss and credit carryovers of certain subsidiaries.

\*\* In 2006, includes impact to accumulated other comprehensive loss of \$36.6 million (\$58.1 million pre-tax) for the adoption of Statement of Financial Accounting Standards No. 158, Employer's Accounting for Defined Benefit Pension and Other Postretirement Benefit Plans.

\*\*\* In 2005, includes after-tax expense of \$24.2 million (\$38.4 million pre-tax) or \$0.47 per share for closure costs and restructuring expense as a result of closing the sulfite pulp mill at Printing & Writing's Brokaw, Wisconsin facility.

\*\*\*\* In 2003, includes after-tax income of \$2.6 million (\$4.2 million pre-tax) or \$0.05 per share for a fee for licensing certain patent dispenser technologies as a result of a settlement of all claims of the parties in a patent litigation case.

## **Item 7. MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

### **Information Concerning Forward-Looking Statements**

The following discussion and analysis of our financial condition and results of operations contains forward-looking statements that involve risks, uncertainties, and assumptions. Forward-looking statements are not guarantees of performance. If the risks or uncertainties ever materialize or the assumptions prove incorrect, the results of Wausau Paper and our consolidated subsidiaries may differ materially from those expressed or implied by such forward-looking statements and assumptions. All statements other than statements of historical fact are statements that could be deemed forward-looking statements. Forward-looking statements may be identified by, among other things, beliefs or expectations that certain events may occur or are anticipated and projections or statements of expectations with respect to various aspects of our business, our plans or intentions, our stock performance, the industry within which we operate, the economy, and any other expressions of similar import or covering other matters relating to our business and operations. Risks, uncertainties, and assumptions relating to our forward-looking statements include the level of competition for our products, changes in the paper industry, downturns in our target markets, changes in the price or availability of raw materials and energy, the failure to develop new products that meet customer needs, adverse changes in our relationships with large customers and our labor unions, costs of compliance with environmental regulations, our ability to fund our operations, unforeseen operating problems, changes in strategic plans or our ability to execute such plans, maintenance of adequate internal controls, changes in financial accounting standards, unforeseen liabilities arising from current or prospective claims, and the effect of certain organizational anti-takeover provisions. These and other risks, uncertainties, and assumptions are described under the caption "Risk Factors" in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2007, and from time to time in our other filings with the Securities and Exchange Commission after the date of such annual report. We assume no obligation, and do not intend, to update these forward-looking statements.

### **Critical Accounting Policies and Estimates**

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States which require us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and revenues and expenses during the periods reported.

Actual results could differ from those estimates. We believe the following are the accounting policies which could have the most significant effect on our reported results and require subjective or complex judgments by management.

#### *Allowance for Doubtful Accounts*

We record allowances for doubtful accounts based upon customer-specific analysis and general matters such as current assessment of past-due balances. Additional allowances for doubtful accounts may be required if there is an increase in past-due balances or for customer-specific

circumstances, such as financial difficulty. The allowance for doubtful accounts was \$1.1 million and \$1.4 million at December 31, 2007 and 2006, respectively.

### ***Excess and Obsolete Inventory***

We record allowances for excess and obsolete inventory based on historical and estimated future demand and market conditions. Additional inventory allowances may be required if future demand or market conditions are less favorable than we have estimated.

### ***Impairment of Long-Lived Assets***

In accordance with Statement of Financial Accounting Standards ( SFAS ) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets , we evaluate the recoverability of the carrying amount of long-lived assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be fully recoverable. We use judgment when applying the impairment rules to determine when an impairment test is necessary. Factors we consider which could trigger an impairment review include significant underperformance relative to historical or forecasted operating results, a significant decrease in the market value of an asset, a significant change in the extent or manner in which an asset is used, and significant negative or industry trends.

Impairment losses are measured as the amount by which the carrying value of an asset exceeds its estimated fair value. We are required to make estimates of our future cash flows related to the asset subject to review. These estimates require assumptions about demand for our products, future market conditions, and technological developments. Other assumptions include determining the discount rate and future growth rates.

See Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements for a summary of our asset impairment tests, which resulted in a pre-tax impairment loss of approximately \$0.4 million in 2007.

### ***Income Taxes***

Wausau Paper's estimates of income taxes payable, deferred income taxes, and the effective tax rate are based on an analysis of many factors including interpretations of federal, state, and foreign income tax laws, the difference between tax and financial reporting basis of assets and liabilities, estimates of amounts currently due or owed, realization of income tax benefits in future years, and current accounting standards. Estimates are reviewed and updated on a quarterly basis as facts and circumstances change and actual results are known. In addition, federal and state taxing authorities periodically review our estimates and interpretations of income tax laws. Adjustments to the

effective income tax rate and recorded assets and liabilities may occur in future periods if actual results differ significantly from original estimates and interpretations.

### ***Pension Benefits***

Defined benefit pension costs and obligations are actuarially determined and are affected by assumptions including discount rate, the expected rate of return on plan assets, and assumed annual rate of compensation increase for plan employees, among other factors. Changes in discount rate and differences from actual and assumed asset returns as well as changes in other assumptions will affect the amount of pension expense recognized in future periods.

Additional information regarding pension benefits is available in Note 6 Pension and Other Post-retirement Benefit Plans in the Notes to Consolidated Financial Statements.

### ***Other Post-retirement Benefits***

The costs and obligations for post-retirement benefits other than pension are also actuarially determined and are affected by assumptions including the discount rate and expected future increase in per capita costs of covered post-retirement health care benefits. Changes in the discount rate and differences between actual and assumed per capita health care costs may affect the recorded amount of the expense in future periods. Additional information regarding post-retirement benefits is available in Note 6 Pension and Other Post-retirement Benefit Plans in the Notes to Consolidated Financial Statements.

### ***Litigation, Claims, and Contingencies***

We record environmental liabilities based on estimates for known environmental remediation exposures utilizing information received from third-party experts and our past experience with these matters. At third-party sites where more than one potentially responsible party has been identified, we record a liability for its estimated allocable share of costs related to our involvement with the site as well as an estimated allocable share of costs related to the involvement of insolvent or unidentified parties. Environmental liability estimates may be affected by changing determinations of what constitutes an environmental exposure or acceptable level of cleanup. To the extent that remediation procedures change or the financial condition of other potentially responsible parties is adversely affected, the estimate of our environmental liabilities may change.

### ***Stock-based Compensation Plans***

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment ( SFAS 123R ), using the modified prospective application transition method. The modified prospective application transition method requires that as of the effective date, compensation cost related to share-based payment transactions is recognized as an operating expense in the statement of operations over the

requisite service period of the grant based on the grant-date fair value of the award. As such, prior periods will not reflect restated amounts. The grant-date fair value of an award is estimated using a binomial option-pricing model that incorporates assumptions based upon expectations and information available at the measurement date of the award. These assumptions include the expected term of the award, the expected dividend yield over the expected term of the award, the risk-free interest rate over the expected term of the award, the expected volatility of the stock price over the

expected term of the award, and estimated forfeitures over the expected term of the award. See Note 1 Description of the Business and Summary of Significant Accounting Policies and Note 8 Stock Compensation Plans in the Notes to Consolidated Financial Statements for additional information on the impact of this statement.

### **New Accounting Pronouncements**

On January 1, 2007, we adopted the provisions of Financial Accounting Standards Board ( FASB ) Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 ( FIN 48 ). FIN 48 defines the thresholds for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority. This Interpretation provides guidance on the derecognition, measurement and classification of income tax uncertainties, along with interest and penalties. As a result of the implementation of FIN 48, we recognized a \$0.04 million decrease in the liability for unrecognized tax benefits, which was accounted for as an increase to retained earnings at January 1, 2007. Additional information regarding the adoption of FIN 48 is contained in Note 1 Description of the Business and Summary of Significant Accounting Policies and in Note 7 Income Taxes in the Notes to Consolidated Financial Statements.

In September 2006, the FASB issued FASB Staff Position ( FSP ) No. AUG AIR-1, Accounting for Planned Major Maintenance Activities. This FSP prohibits companies from recognizing planned major maintenance costs under the accrue-in-advance method that allowed the accrual of a liability over several reporting periods before the maintenance is performed. FSP AUG AIR-1 is applicable to entities in all industries and must be retrospectively applied. In accordance with FSP AUG AIR-1, on January 1, 2007, we adopted the direct expensing method, under which the costs of planned major maintenance activities are expensed in the period in which the costs are incurred. The application of FSP AUG AIR-1 affected our 2006 interim period reporting and did not result in a cumulative effect adjustment to our annual consolidated financial statements.

### **Future Accounting Pronouncements**

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Benefit Plans ( SFAS 158 ), which requires that we recognize in our financial statements the overfunded or underfunded status of a defined benefit post-retirement plan as an asset or liability and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. SFAS 158 also requires additional disclosures regarding certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the gains or losses, prior service credits, and transition assets or obligations. On December 31, 2006, we adopted the recognition and disclosure provisions of SFAS 158 and recognized a charge of \$36.6 million, net of income taxes, to other comprehensive income in the Consolidated Statement of Stockholders Equity. In addition, SFAS 158 also requires the measurement of the funded status of a plan as of the date of the year end financial statements. The requirement to measure plan assets and benefit obligations as of the date of the year end financial statements is effective for fiscal years ending after December 15, 2008. See Note 1 Description of the Business and Summary of Significant Accounting Policies and Note 6 Pension and Other

Post-retirement Benefit Plans in the Notes to Consolidated Financial Statements for additional information regarding the adoption of SFAS 158 and additional information required to be disclosed in accordance with SFAS 158.

In September 2007, the FASB ratified Emerging Issues Task Force ( EITF ) 06-11 Accounting for the Income Tax Benefits of Dividends on Share-Based Payment Awards ( EITF 06-11 ). EITF 06-11 provides that tax benefits associated with dividends on share-based payment awards be recorded as a component of additional paid-in capital. EITF 06-11 is effective, on a prospective basis, for fiscal years beginning after December 15, 2007. Additional information regarding the adoption of EITF 06-11 is contained in Note 1 Description of the Business and Summary of Significant Accounting Policies in the Notes to Consolidated Financial Statements. We do not expect the adoption of EITF 06-11 to have a material effect on the consolidated financial statements.

Other significant accounting policies, not involving the same level of uncertainties as those previously discussed, are important to an understanding of the Consolidated Financial Statements. Additional information regarding significant accounting policies is available in Note 1 Description of the Business and Summary of Significant Accounting Policies in the Notes to Consolidated Financial Statements.

## **Operations Review**

### *Overview*

In 2007, we reported a net loss of \$1.8 million compared to net earnings of \$17.6 million in 2006. Significantly higher manufacturing costs were experienced during 2007 as compared to 2006, including fiber increases of approximately \$45 million, which unfavorably impacted net earnings.

Our Towel & Tissue business segment's financial performance remained strong in 2007 with operating margins near long-term target levels. Despite modest demand growth in the away-from-home market, Towel & Tissue operating profits approached record levels as we continued to increase shipments of higher-margin, value-added products. The financial performance of our Printing & Writing and Specialty Products business units fell below long-term target levels in 2007 with results impacted by increased raw material costs, flat to declining demand in certain market segments in which we compete, and highly competitive product pricing. In response, action, which included the closure of a Printing & Writing paper mill and the sale of the roll wrap business of Specialty Products, was taken during the fourth quarter to address underperforming portions of these business units. These and other improvement initiatives are intended to help us achieve a long-term return-on-capital-employed target of 15% on a consolidated basis. Our ability to ultimately achieve this target will be influenced by internal initiatives as well as external factors including general economic conditions, the price of energy and raw materials, competitive factors, and changes in market demand and paper pricing.

In December 2007, we ceased papermaking operations at Printing & Writing's Groveton, New Hampshire mill as part of a three part recovery plan. The closure resulted in after-tax charges in 2007 of \$28.8 million for closure costs and restructuring expenses. The shutdown of the

Groveton mill allowed us to reduce our exposure to unprofitable commodity paper and other non-strategic business and will reduce annual Printing & Writing capacity by approximately 105,000 tons. Due to the interchangeability of our printing and writing paper production on our paper machines within the Printing & Writing business segment, as well as shared distribution, sales and marketing, and customer service, we will continue to manufacture and sell the same broad line of premium printing and writing papers within our remaining Printing & Writing mills. The second part of Printing & Writing's recovery plan is a refocus of sales and marketing efforts on achieving growth of our premium product brands, while the third part focuses on strategic investment alternatives to enhance capabilities and reduce costs. In December 2007, we also sold the roll wrap portion of our Specialty Products business due to continuing decline in the paper mill roll packaging markets. We will continue to manufacture roll wrap and related products for the buyer during a post-closing transition period which expires on July 2, 2008. As a result of the transaction, we recorded an after-tax credit of \$0.4 million. Additional information on the closure of the Groveton, New Hampshire mill and the sale of the Specialty Products roll wrap business is available in Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements.

In addition to restructuring initiatives, we continued to pursue our core business strategies in 2007, focusing on strategic markets, product innovation, benchmark customer service, and operational excellence to drive long-term results. During 2007, revenues from products developed in the previous three years exceeded our corporate goal of 25%, and paper mill productivity increased 3% in 2007 following a 2% improvement in 2006. In addition, we targeted key areas, including disciplined management of capital spending, containment of manufacturing and administrative costs, and improvement in working capital efficiencies, to increase our return on capital employed. We achieved a composite internal rate of return for capital projects approved in 2007 that exceeded our goal of 17%. Our cost containment efforts resulted in costs, after equalizing for production volume and mix differences as well as fiber and energy price variations, which were slightly below 2006 levels. Our efforts to improve working capital efficiencies continued to drive progress, improving inventory turns and decreasing inventories as compared to 2006.

Effective January 1, 2007, we reorganized the various subsidiaries which comprised our operating segments to align more closely with our operating structure. Each segment is now organized as a single member limited liability company and operates as a direct subsidiary of Wausau Paper Corp. The new structure will allow us to utilize state net operating loss and credit carryovers of certain subsidiaries for which full valuation allowances had been previously established due to the fact that separate state tax returns were filed under our previous structure. As a result of the restructuring, we recorded net state tax benefits of \$11.6 million primarily due to the reversal of these valuation allowances. In addition, the assets and operating results of one facility were reclassified from the Corporate and unallocated segment to the Towel & Tissue segment. Certain prior-year segment information has been reclassified to conform to the 2007 presentation. Additional information on the reorganization is available in Note 7 Income Taxes in the Notes to Consolidated Financial Statements.

*Net Sales*

(all dollar amounts in thousands)	2007	2006	2005
Net sales	<b>\$1,240,438</b>	\$1,188,178	\$1,097,093
Percent increase	<b>4%</b>	8%	5%

Net sales for the year ended December 31, 2007, were \$1,240.4 million compared to net sales of \$1,188.2 million for the year ended December 31, 2006. Total shipments in 2007 of 917,032 tons were comparable with the 919,072 tons shipped in 2006. Net sales in 2005 were \$1,097.1 million, and total tons shipped were 882,267 tons.

Compared to 2006, the average net selling price for 2007 improved 5%, or \$56 million, with actual product selling prices providing \$49 million of the improvement, while product mix enhancements increased net sales by approximately \$7 million. Average net selling price increased approximately 4%, improving net sales by \$44 million, in 2006 as compared to 2005, with more than 3 percentage points of the net selling price improvement, or approximately \$34 million, attributable to actual selling price increases and the balance due to improved overall product mix.

Discussion of market conditions and trends is included in the segment summaries that follow. If published market data is available, it is referenced in the discussion. Certain markets within which we compete are small and highly fragmented. Where industry data is not available, our analysis is based on more subjective market indicators, such as order patterns for our products and discussions with customers regarding overall industry volumes.

Specialty Products recorded net sales of \$488.3 million on total shipments of 384,827 tons for the year ended December 31, 2007, compared with net sales of \$468.9 million on shipments of 394,079 tons in 2006. Net sales and shipments in 2005 were \$459.0 million and 403,747 tons, respectively. While product shipments in 2007 declined more than 2% from 2006, average net selling price increased more than 6%, or \$29 million, resulting in a year-over-year increase in net sales. In 2007 as compared to 2006, actual product price increases improved average net selling price by more than 4% and net sales by \$20 million, and product mix enhancements improved average net selling price by 2% and net sales by \$9 million. Average net selling price increased 4% in 2006 compared with 2005, improving net sales by approximately \$18 million, with actual selling price increases accounting for the majority of the average net selling price gain.

Market demand improved in Specialty Products largest product category, pressure-sensitive backing papers, increasing an estimated 3% in 2007 and 4% in 2006. Demand in Specialty Products second largest product category, food-packaging/food-service papers, also increased an estimated 3% in 2007 and 4% in 2006. Demand for paper mill roll packaging products declined in both 2007 and 2006 as production of newsprint and other paper grades trended lower across the industry. Demand for other industrial and consumer papers was relatively flat in 2007, after declining slightly in 2006, with select segment growth in tape base being offset by slowing demand in industrial categories tied to building and construction markets. Despite recent growth in demand, markets remained competitive

with competition coming from paper-based products as well as other film-based substrates.

Shipments of Specialty Products pressure-sensitive backing papers decreased less than 1% in 2007 after decreasing 1% in 2006, while food-packaging/food-service shipments increased 17% in 2007 compared to a decrease of 5% in 2006. Shipments of lower-price fill products decreased approximately 59% in 2007 compared to an increase of 60% in 2006. Paper mill roll packaging shipments decreased another 13% in 2007, after declining 13% in 2006. In December 2007, we sold the roll wrap portion of our Specialty Products business. The sale of the roll wrap business will cause a further decline of shipments of paper mill roll packaging and once operations cease is expected to reduce annual net sales by approximately \$40 million. Additional information on the sale of the roll wrap business is available in Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements. As 2008 began, demand and product pricing within select Specialty Products product categories has continued to improve.

Net sales for the Printing & Writing business segment were \$444.5 million in 2007 on shipments of 357,233 tons compared with 2006 net sales of \$431.0 million on shipments of 354,243 tons. In 2005, net sales were \$378.1 million and shipments were 316,234 tons. For the year ended December 31, 2007, average net selling price improved approximately 3%, increasing net sales by more than \$11 million as compared to the year ended December 31, 2006. Actual product price increases improved average selling price by nearly 5% and net sales by \$19 million, which offset a deterioration in product mix that decreased average net selling price and net sales by 2% and nearly \$8 million, respectively. Comparing 2006 to 2005, average net selling price improved 2% in 2006, increasing net sales by \$9 million as compared to 2005, with actual selling price increases accounting for the majority of the average net selling price gain.

Demand for uncoated freesheet papers decreased more than 3% in 2007 following an increase of less than 1% in 2006. Uncoated freesheet demand, impacted by such factors as employment trends and increased electronic data communications, declined in six of the last eight years. Demand in the text and cover segment of the uncoated freesheet market declined 5% in 2007 following a 3% decline in 2006. As a result of continued competitive market conditions, shipments of our premium printing and writing papers, including text and cover, decreased 11% in 2007, following a decrease of 4% in 2006. Shipments through Printing & Writing's retail distribution channel such as office supply stores and other retailers increased 6% in 2007 and 26% in 2006. At the same time, shipments through Printing & Writing's largest distribution channel, traditional paper merchants, increased 4% in 2007 and 7% in 2006. Product pricing has remained very competitive despite the industry-wide capacity rationalization that has occurred in recent years. The shutdown of papermaking operations at the Groveton, New Hampshire mill is expected to reduce net sales by approximately \$70 million in 2008. As 2008 began, prices were relatively stable despite seasonally weak market conditions.

Towel & Tissue 2007 net sales were \$307.6 million and shipments were 174,972 tons compared to 2006 net sales of \$288.3 million and shipments of 170,750 tons. In 2005, net sales were \$260.0 million on shipments of 162,286 tons. Average net selling price increased approximately 5% in 2007 as compared to 2006, favorably impacting net sales by \$13 million. Actual net selling price increases accounted for approximately \$9 million of the average net selling price gain, while \$4 million of the average net selling price gain was attributable to product mix enhancements. Average net selling price increased 6% in 2006 as compared to 2005, favorably impacting net sales by more than \$15 million. Actual product price increases improved average

net selling price by more than 4% and net sales by \$11 million, while product mix enhancements improved average net selling price and net sales by 2% and more than \$4 million, respectively.

The away-from-home segment of the towel and tissue market grew 1% in 2007 and nearly 2% in 2006. Steady growth has resulted in a balanced market and pricing leverage over the past two years. As a result, significant selling price increases were implemented in 2007 and 2006. Shipments of Towel & Tissue's higher-priced, value-added products increased 14% in 2007 and 15% in 2006, while shipments of lower-priced standard products decreased 5% in 2007 after increasing 1% in 2006.

Approximately 40%, or 70,000 tons per year, of Towel & Tissue's total parent roll consumption is purchased from other towel and tissue manufacturers. Industry supply of these parent rolls was readily available throughout 2007 and 2006. We believe that adequate parent roll supply will continue to be available to meet our converting needs. As 2008 began, away-from-home towel and tissue market conditions remained stable with demand continuing to expand at a moderate rate.

### *Gross Profit on Sales*

(all dollar amounts in thousands)	2007	2006	2005
Gross profit on sales	<b>\$77,699</b>	\$122,418	\$52,626
Gross profit margin	<b>6%</b>	10%	5%

Gross profit margin decreased to \$77.7 million, or 6.3% of net sales in 2007 compared with \$122.4 million or 10.3% of net sales in 2006. Gross profit margin in 2005 was \$52.6 million, or 4.8% of net sales. Factors that favorably contributed to gross profit margin in 2007 compared to 2006 included improved average net selling price, increased shipment volume, and lower average energy prices. These favorable impacts were more than offset by unfavorable fiber prices, mix-driven material consumption costs, and decreased gains from the timberland sales program. Our timberland sales program favorably impacted gross profit margin by \$9.6 million in 2007, \$17.3 million in 2006, and \$2.2 million in 2005. Additionally, in December 2007, we ceased papermaking operations at our Groveton, New Hampshire paper mill, which was part of manufacturing operations for our Printing & Writing business segment. As a result of the closure, we recognized \$38.8 million of expense in cost of sales for the year ended December 31, 2007, consisting of accelerated depreciation on assets that were abandoned and an adjustment of spare parts and inventory to net realizable value. For additional information on the ceasing of papermaking operations at the Groveton, New Hampshire mill, refer to Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements.

In 2006, improvements in average selling price and shipment volumes, operational efficiency gains, and gains from the timberland sales program more than offset higher energy and fiber costs as compared to the same period in 2005. In addition, 2005 gross profit margins were impacted by charges of \$37.1 million related to inventory write-downs of pulp mill inventory to net realizable value, accelerated depreciation on long-lived assets that were abandoned upon closure, and a portion of severance and benefit continuation costs with respect to the closure of the sulfite pulp mill at

our Brokaw mill. Pulp mill closure charges recognized in cost of sales for

30

---

2006 were \$0.3 million. For additional information on the closure of our sulfite pulp mill, refer to Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements.

Raw materials comprise approximately 55% of our total cost of sales with market pulp and wastepaper accounting for approximately three-quarters of this total. Labor and fringes are approximately 20% of our total cost of sales while utilities account for approximately 10%. Other operating expenses, including outbound freight, depreciation, and maintenance, comprise the remaining 15% of our cost of sales.

Fiber prices consisting primarily of market pulp, wastepaper, linerboard, pulpwood, and purchased towel and tissue parent rolls increased over the last four years. As compared to 2006, 2007 fiber costs increased approximately \$45 million after increasing approximately \$25 million in 2006 as compared with 2005.

In 2007, pulp prices and wastepaper prices trended higher throughout the entire year, increasing significantly from pricing levels at the end of 2006. During the first quarter of 2006, pulp prices increased slightly from pricing at the end of 2005, and increased significantly in the following three quarters of 2006. Also in 2006, wastepaper prices trended higher in the second and third quarters before holding relatively stable through the fourth quarter. In 2007, we consumed approximately 530,000 air-dried metric tons of market pulp and 140,000 standard tons of wastepaper.

Approximately 520,000 air-dried metric tons of market pulp and 140,000 standard tons of wastepaper were consumed in 2006. The average consumption price of market pulp, the primary raw material used in the production of paper, increased approximately \$62 per air-dried metric ton, or more than \$33 million, in 2007 as compared to 2006. As compared with 2005, the average price of market pulp increased approximately \$40 per air-dried metric ton, or \$19 million in 2006. The average price of wastepaper, used in the production of towel and tissue products, increased \$57 per standard ton, or more than \$8 million, in 2007 as compared to 2006. As compared with 2005, the average price of wastepaper increased \$5 per standard ton, or less than \$1 million, in 2006. Total costs for linerboard, used in the production of moisture-barrier laminated roll wrap, increased \$2 million in 2007 as compared to 2006. Total costs for linerboard also increased nearly \$2 million in 2006 as compared to 2005. Purchased towel and tissue parent rolls, used in Towel & Tissue's converting operation, increased \$22 per standard ton, or approximately \$2 million, in 2007 as compared to 2006, after increasing \$53 per standard ton, or more than \$4 million the year before.

Energy-related prices consisting primarily of natural gas, electricity, coal, fuel oil, and transportation trended lower in 2007 as compared to 2006, although declines in natural gas prices were somewhat offset by price volatility with other energy components. During 2006, overall energy prices increased modestly in comparison with 2005. In total, energy-related costs decreased nearly \$4 million in 2007 as compared with 2006, while increasing \$4 million in 2006 as compared with 2005.

The average price of natural gas decreased approximately 15%, or more than \$6 million, in 2007 as compared to 2006 after decreasing approximately 2%, or less than \$1 million, in 2006 compared with the prior year. Through our cost reduction efforts, we have been successful in improving our energy efficiencies and have maintained relatively stable natural gas consumption in recent years. We currently consume more than 3 million decatherms annually and have

substituted fuel oil and coal when economics allowed. We price protect, from time to time, certain volumes of natural gas through fixed-price contracts. Our policy allows for the price protection of up to 50% of our expected use on a rolling 12-month basis. Early in 2008, we had a portion of our first quarter requirements price protected.

Price increases were experienced in 2007 with other sources of energy that are significant to our operations. As compared with 2006, 2007 electricity costs increased 6% or \$2 million, and coal costs increased 4% or nearly \$1 million, while fuel oil costs remained stable. As compared with 2005, 2006 electricity costs increased 8% or \$2 million, fuel oil costs increased 20% or more than \$1 million, and coal costs increased 10% or nearly \$2 million. In addition, transportation prices increased \$2 million in 2007 as compared with 2006 after increasing \$6 million from 2005.

Market pulp list prices continued their upward trend in early 2008 while natural gas prices and prices of other energy sources have remained relatively stable. However, natural gas prices are well above historical averages and remain quite volatile.

Labor and fringe costs increased 1.2% in 2007 as compared to 2006 and decreased 0.9% in 2006 as compared to 2005. Depreciation expenses increased 72% in 2007 as compared to 2006, due primarily to accelerated depreciation related to the December 2007 shutdown of papermaking operations at the Groveton, New Hampshire mill. Depreciation expenses decreased 42% in 2006 compared with 2005 due primarily to accelerated depreciation related to the 2005 closure of the sulfite pulp mill at our Brokaw facility. For additional information, refer to Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements. Other operating costs, including maintenance, were relatively stable in 2007 compared to the same period in the prior year.

Specialty Products gross profit margins were 5.8% in 2007, 5.7% in 2006, and 7.4% in 2005.

The improvement in average net selling price in 2007 compared to 2006 offset higher energy, fiber and other manufacturing costs, resulting in relatively flat gross profit margins. Fiber prices increased approximately \$18 million in 2007 as compared with 2006 while energy prices increased less than \$1 million over the same period. In 2006 as compared with 2005, the improvement in average net selling price only partially offset higher energy, fiber and other manufacturing costs, resulting in reduced gross profit margins. Fiber prices increased nearly \$13 million in 2006 as compared with 2005 while energy prices increased more than \$3 million over the same period.

Printing & Writing recorded a negative gross margin of 5.7% in 2007, a gross profit margin of 3.5% in 2006, and a negative gross margin of 9.7% in 2005. Gross profit in 2007 was unfavorably impacted by a \$38.8 million charge to cost of sales as a result of the shutdown of papermaking operations at the Groveton, New Hampshire mill. The shutdown, which impacted 2007 gross profit margins by approximately 9 percentage points, included accelerated depreciation on the related papermaking assets that were abandoned and an adjustment of spare parts and mill inventory to net realizable value. Additional charges of \$6.8 million are expected to impact gross margins during 2008. In addition, increases in average net selling price and decreases in energy prices in 2007 as compared to 2006 were unable to offset significant increases in fiber costs, contributing to lower gross margins. Fiber prices increased

approximately \$17 million in 2007 as compared with 2006 while energy prices declined nearly \$5 million over the same period. An improvement in the 2006 gross profit margin from 2005 was the result of average net selling price increases, sales volume gains and slightly lower energy prices which more than offset increases of more than \$7 million in fiber prices. Gross profit in 2005 was also unfavorably impacted by a \$37.1 million charge to cost of sales as a result of the fourth-quarter closure of the sulfite pulp mill located in Brokaw. The pulp mill closure charge, which impacted 2005 gross profit margins by nearly 10 percentage points, included accelerated depreciation on pulp mill related assets that were abandoned as a result of the closure and a write-down of related pulp mill inventory to net realizable value.

Towel & Tissue gross profit margin was 20.7% in 2007, 22.3% in 2006, and 21.6% in 2005. Significant selling price increases were unable to offset increased manufacturing costs, including wastepaper and towel and tissue parent roll costs, depreciation, amortization, and freight costs, resulting in decreased 2007 margins compared to 2006. Fiber and paper prices increased more than \$10 million in 2007 as compared with 2006 while energy prices increased less than \$1 million. Also, other manufacturing costs, including depreciation, amortization, and freight, increased by approximately \$6 million in 2007 compared to 2006. In 2006, selling price increases and mix enhancements offset increased energy and fiber prices, improving margins as compared to 2005. Energy prices increased nearly \$2 million in 2006 as compared with 2005 while fiber prices increased slightly more than \$5 million.

Consolidated customer order backlogs increased to approximately 49,900 tons, representing \$65.4 million in sales at December 31, 2007, compared to 48,300 tons, representing \$59.9 million in sales as of December 31, 2006.

Consolidated customer order backlogs were 42,500 tons, or \$52.1 million in sales as of December 31, 2005. The increase in customer order backlogs as of December 31, 2007, compared to December 31, 2006, was due to increases in our Specialty Products and Towel & Tissue business segments, while customer order backlogs decreased in our Printing & Writing business segment. Our Specialty Products business segment backlog totaled 40,100 tons at December 31, 2007, compared to 34,700 tons at December 31, 2006. Towel & Tissue's backlog tons increased to 2,400 tons at December 31, 2007, from 2,200 tons at December 31, 2006. In the Printing & Writing business segment, backlog tons were 7,400 tons at December 31, 2007, compared to 11,400 tons at December 31, 2006. The change in customer backlog at December 31, 2007, compared to December 31, 2006, does not necessarily indicate a change in business conditions, as a large portion of orders is shipped directly from inventory upon receipt and does not impact backlog numbers. The entire backlog at December 31, 2007, is expected to be shipped during fiscal 2008.

### ***Labor***

A new three-year labor agreement was negotiated with United Steel Workers Local 2-1260 and 1381 at Printing & Writing's Brokaw, Wisconsin facility in 2007, retroactive to June 1, 2006. Also, a new three-year labor contract was negotiated with the United Steelworkers Local 04-00061 at our Printing & Writing's Groveton, New Hampshire facility. Later in 2007, we negotiated a settlement agreement with the United Steelworkers Local 04-00061 directly as a result of the decision to cease papermaking operations at Printing & Writing's Groveton, New Hampshire facility in December 2007. Labor agreements will expire at other facilities in 2008,

2009, and 2010. We maintain good labor relations at all facilities and expect that new multi-year contracts will be negotiated at competitive rates.

### *Selling and Administrative Expenses*

(all dollar amounts in thousands)	2007	2006	2005
Selling and administrative expense	<b>\$84,199</b>	\$82,695	\$74,423
Percent increase/(decrease)	<b>2%</b>	11%	(2%)
As a percent of net sales	<b>7%</b>	7%	7%

Selling and administrative expenses for the year ending December 31, 2007, were \$84.2 million compared to \$82.7 million in the same period of 2006. Selling and administrative expenses were \$74.4 million for the year ending December 31, 2005. In 2007, stock-based incentive compensation programs resulted in a credit of \$1.9 million compared to expense of \$2.3 million in 2006. After adjusting for stock-based incentive compensation programs, increased compensation and benefits accounted for the majority of the increase in selling and administrative expense.

In 2005, selling and administrative expenses were impacted by stock incentive program credits of \$2.4 million. After adjusting for stock-based incentive compensation programs, increased compensation, benefits, legal, and consulting expenses accounted for the balance of the increase in selling and administrative expenses in 2006 as compared to 2005. For additional information on our stock incentive programs, refer to Note 8 Stock Compensation Plans in the Notes to Consolidated Financial Statements.

### *Restructuring Charge*

For the year ended December 31, 2007, we recorded pre-tax restructuring charges of \$7.3 million related to employee severance benefits and other associated closure costs directly related to the sale of the roll wrap portion of our Specialty Products business and the shutdown of papermaking operations at our Printing & Writing's Groveton, New Hampshire mill. Additional pre-tax restructuring charges directly related to the roll wrap business and the Groveton mill closure are expected to be \$0.6 million and \$13.6 million, respectively, in 2008.

We recorded a pre-tax \$1.3 million closure charge for the year ending December 31, 2005, for employee severance benefits and other associated closure costs directly related to the closure of the sulfite pulp mill located at Printing & Writing's Brokaw papermaking mill. Other associated closure costs of approximately \$0.2 million were recorded in the first half of 2006.

For additional information, refer to Note 2 Restructuring and Divestitures in the Notes to Consolidated Financial Statements.

***Other Income and Expense***

(all dollar amounts in thousands)	2007	2006	2005
Interest expense	<b>\$11,080</b>	\$11,252	\$10,957
Other income, net	<b>793</b>	624	496

Interest expense decreased for the year ending December 31, 2007, to \$11.1 million compared to \$11.3 million for the year ending December 31, 2006, due principally to a decline in average long-term debt balances during the year.

Interest expense for the year ending December 31, 2005, was \$11.0 million. Long-term debt levels were \$139.4 million, \$160.3 million, and \$161.0 million as of December 31, 2007, 2006, and 2005, respectively.

In 2008, interest expense is expected to decline from 2007 levels. Interest capitalized in 2007, 2006, and 2005 was not significant. Our capitalized interest policy is outlined in Note 1 Description of the Business and Summary of Significant Accounting Policies in the Notes to Consolidated Financial Statements.

Other income includes interest income of \$0.7 million, \$0.3 million, and \$0.5 million in 2007, 2006, and 2005, respectively. The increase in interest income in 2007 was driven primarily by higher average cash and cash equivalent balances.

***Income Taxes***

(all dollar amounts in thousands)	2007	2006	2005
Income tax (credit) provision	<b>\$(22,229)</b>	\$10,823	\$(14,125)
Effective tax rate	<b>(92.4%)</b>	37.5%	(42.3%)

Effective January 1, 2007, we reorganized the various subsidiaries which comprised our operating segments to align more closely with our operating structure. Each segment is now organized as a single member limited liability company and operates as a direct subsidiary of Wausau Paper Corp. The new structure will allow us to utilize state net operating loss and credit carryovers of certain subsidiaries for which full valuation allowances had been previously established due to the fact that separate state tax returns were filed under our previous structure.

As a direct result of the reorganization, we recorded state tax benefits of \$11.6 million which related to the release of valuation allowances and a revision to the state tax rate utilized to determine our deferred tax assets and liabilities from our previous tax structure to our single member limited liability company tax structure. In the fourth quarter of 2007, we recognized an additional \$1.6 million in one-time state tax benefits associated primarily with state net

operating loss recognition. The effective tax rate for 2007, excluding the state tax benefits, was 37%. The effective rate for 2008 is expected to be in the range of 37% to 38%.

**Liquidity and Capital Resources***Cash Flows and Capital Expenditures*

(all dollar amounts in thousands)	<b>2007</b>	2006	2005
Cash provided by operating activities	<b>\$ 54,813</b>	\$ 37,982	\$ 18,223
Percent increase/(decrease)	<b>44%</b>	108%	(74%)
Working capital	<b>\$112,922</b>	\$139,065	\$130,719
Percent increase/(decrease)	<b>(19%)</b>	6%	(6%)
Current ratio	<b>1.7:1</b>	1.9:1	1.9:1
Capital expenditures	<b>\$ 30,088</b>	\$ 23,856	\$ 31,494
Percent increase/(decrease)	<b>26%</b>	(24%)	7%

Cash provided by operating activities increased in 2007 compared to 2006, primarily due to decreased inventory levels and increases in accounts payable and other liabilities, which was somewhat offset by increased receivable balances in 2007 as compared to 2006. In 2006, cash provided by operating activities increased compared to 2005 due, in part, to improved net earnings in 2006, somewhat stable year-over-year inventory levels, and cash received from income tax refunds. These factors were somewhat offset by increased receivable balances in 2006 compared to 2005.

In 2007, we continued our initiative to limit capital spending to necessary maintenance-related and high-return capital projects. We also met our targeted composite internal rate of return of 17% for capital approved. Capital expenditures totaled \$30.1 million, \$23.9 million, and \$31.5 million in 2007, 2006, and 2005, respectively. In 2008, it is expected that capital spending will be approximately \$45 million.

During 2005, we announced our intent to sell approximately 42,000 acres of timberlands, generating expected after-tax earnings of \$29 million. During 2007, we sold approximately 5,200 acres of timberlands for an after-tax gain of \$6.0 million. We sold approximately 14,000 acres of timberlands for an after-tax gain of \$10.8 million in 2006 and approximately 1,200 acres of timberlands for an after-tax gain of \$1.3 million in 2005. A total of approximately 21,600 acres remains in the timberland sales program. Our timberland sales program is expected to continue at a pace that will allow us to complete our sales program over the next two to three years. We do not plan to implement additional timberland sales programs in the future.

We believe that the available credit under our credit agreements and our earnings for 2008 will be sufficient to meet our cash flow needs for capital, working capital, and investing activities in 2008.

**Debt and Equity**

(all dollar amounts in thousands)	2007	2006	2005
Short-term debt	\$ 175	\$ 184	\$ 86
Long-term debt	139,358	160,287	161,011
Total debt	139,533	160,471	161,097
Stockholders equity	280,915	274,074	310,219
Total capitalization	420,448	434,545	471,316
Long-term debt/capitalization ratio	33%	37%	34%

At December 31, 2007, total debt was \$139.5 million, a decrease of \$21.0 million from the \$160.5 million reported at December 31, 2006. The decrease in total debt is a result of the repayment of the unsecured private placement notes that matured on August 31, 2007. The repayment was funded by cash provided by operations and net borrowings under our \$125 million unsecured revolving-credit agreement.

The total amount of long-term debt outstanding includes a private placement of \$103.5 million in unsecured senior notes. The original private placement was issued August 31, 1999, for \$138.5 million. On August 31, 2007, \$35 million of the unsecured private placement notes matured and were repaid. The remaining notes mature in 2009 and 2011 at \$68.5 million and \$35 million, respectively. In addition, we have a \$125 million unsecured revolving-credit agreement with five financial institutions that expires on July 27, 2011. Under the agreement, we may elect the base for interest from either domestic or offshore rates. In addition, the agreement provides for sublimits of \$50 million for the issuance of standby letters of credit and \$10 million for certain short-term bid loans among the bank group. There were \$15.0 million in outstanding borrowings under this agreement at December 31, 2007. There were no outstanding borrowings under the agreement at December 31, 2006 and 2005.

On October 19, 2007, the minimum net worth covenants under the \$125 million unsecured revolving-credit agreement and the \$138.5 million note purchase agreement were amended. Under the amendments, the minimum consolidated net worth covenant is initially \$200 million and will be adjusted quarterly to include 25% of quarterly consolidated net income, with no deduction for any net loss, and proceeds from equity sales.

We maintain an unrated commercial paper placement agreement with a bank to issue up to \$50 million of unsecured debt obligations. The agreement requires unused credit availability under our revolving-credit agreement equal to the amount of outstanding commercial paper. There were no outstanding borrowings under this agreement at December 31, 2007, 2006, and 2005.

On November 2, 2004, we entered into a loan agreement with the Economic Development Authority of the city of Brainerd, Minnesota. Under the agreement, we borrowed \$500,000, of which \$100,000 was forgivable upon meeting certain employment criteria at our Brainerd, Minnesota, facility by November 1, 2006. The employment criteria were

met in 2006, therefore, \$100,000 of the loan was forgiven. Interest is payable quarterly on the outstanding balance at a rate of 2% per annum. In accordance with the agreement, quarterly payments of principal and interest began on January 1, 2006. The loan is due and payable no later than November 1, 2013.

In August 1995, we obtained \$19 million in industrial development bond financing to fund an upgrade of the Brokaw mill wastewater treatment plant. The bonds mature in 2023 and bear interest at short-term rates. The bonds are supported by a letter of credit that is issued under our revolving-credit agreement.

On December 31, 2007, we had a total of approximately \$90 million available for borrowing under existing credit facilities.

We do not have material market risk associated with derivative instruments, including interest-rate risk, foreign currency exchange risk, or commodity-price risk. We conduct U.S. dollar denominated export transactions or immediately exchange all foreign currency attributable to export sales for U.S. dollars.

In April 2000, our Board of Directors authorized the repurchase of 2,571,000 shares of Wausau Paper common stock. This authorization added to the balance remaining on a 1998 authorization to repurchase 5,650,000 shares of Wausau Paper common stock. We repurchased 962,800 and 474,400 shares of common stock during 2007 and 2006, respectively. We repurchased 658,700 shares of common stock during 2005. Repurchases may be made from time to time in the open market or through privately negotiated transactions. At December 31, 2007, there were 542,774 shares available for purchase under the existing authorization. In February 2008, our Board of Directors authorized the repurchase of an additional 2,500,000 shares of Wausau Paper common stock.

During 2007, 2006, and 2005, the Board of Directors declared cash dividends of \$0.34 per share of common stock.

*Commitments and Contractual Obligations*

The following is a summary of our contractual obligations and payments due by period subsequent to December 31, 2007:

(all dollar amounts in thousands)	Total	Payments Due by Period					
		2008	2009	2010	2011	2012	Thereafter
Long-term debt	\$137,761	\$ 49	\$68,567	\$ 69	\$50,076	\$	\$19,000
Interest on debt	30,668	8,826	6,916	3,576	2,615	754	7,981
Capital lease	138	126	12				
Operating leases	5,756	1,006	986	975	956	956	877
Capital spending commitments	3,093	3,093					
Retirement plan contributions	5,980	5,980					
Post-retirement benefit plan contributions	5,280	5,280					
Purchase obligations	90,430	30,372	24,332	23,441	1,466	1,416	9,403
	\$279,106	\$54,732	\$100,813	\$28,061	\$55,113	\$3,126	\$37,261

As discussed in Note 7 Income Taxes in the Notes to Consolidated Financial Statements, on January 1, 2007, we adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. At December 31, 2007, we had a liability for unrecognized tax benefits, including related interest and penalties, totaling \$6.7 million, of which approximately \$3.8 million is expected to be paid within one year. For the remaining liability, due to the uncertainties related to these tax matters, we are unable to make a reasonably reliable estimate when cash settlement with a taxing authority will occur.

For additional information on debt and interest obligations, please refer to Note 4 Debt in the Notes to Consolidated Financial Statements. For additional information on capital and operating leases, please refer to Note 5 Lease Commitments in the Notes to Consolidated Financial Statements. Commitments for capital spending and additional information with respect to the purchase obligations are described in Note 9 Commitments and Contingencies in the Notes to Consolidated Financial Statements. We also have various employee benefit plan obligations that are described in Note 6 Pension and Other Post-retirement Benefit Plans.

**Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK**

We do not have a material market risk associated with derivative instruments, including interest rate risk, foreign currency exchange risk, or commodity-price risk. We conduct U.S. dollar denominated export transactions or immediately exchange all foreign currency attributable to export sales for U.S. dollars. On August 31, 1999, we issued notes in the amount of \$138.5 million. The principal amounts, maturities, and interest rates on the notes are: (1) \$35 million, 8 years, 7.20%; (2) \$68.5 million, 10 years, 7.31%; and (3) \$35 million, 12 years, 7.43%. The amount of outstanding notes was \$103.5 million and \$138.5 million at December 31, 2007, and 2006, respectively. The fair value of this fixed rate debt was \$108.2 million at December 31, 2007, and \$141.8 million at December 31, 2006. The potential loss in fair value on such fixed-rate debt obligations from a hypothetical 10% increase in market interest rates would not be material to the overall fair value of the debt. We currently have no plans to repurchase our outstanding fixed-rate instruments and, therefore, fluctuations in market interest rates would not have an effect on our results of operations or stockholders' equity.

We also have \$19,000,000 of Industrial Development Bonds due July 1, 2023, at variable rates of interest. The fair value of these obligations approximated their carrying values at December 31, 2007 and 2006, and would not have been materially affected by a 10% hypothetical change in market interest rates.

**Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

**Management Report on Internal Control Over Financial Reporting**

We are responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of our internal control over financial reporting as of December 31, 2007. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework.

Based on our assessment, we believe that, as of December 31, 2007, our internal control over financial reporting is effective based on those criteria.

Our independent registered public accounting firm has issued a report on internal control over financial reporting. This report appears on page 42.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of  
Wausau Paper Corp.

We have audited the internal control over financial reporting of Wausau Paper Corp. and subsidiaries (the Company) as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2007, of the Company and our report dated February 15, 2008 expressed an unqualified opinion on those financial statements.

DELOITTE & TOUCHE LLP

Milwaukee, WI

February 15, 2008

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of  
Wausau Paper Corp.

We have audited the accompanying consolidated balance sheets of Wausau Paper Corp. and subsidiaries (the Company ) as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders equity, and cash flows for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2007 and 2006, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America.

As described in Note 1 to the consolidated financial statements, the Company adopted Statement of Financial Accounting Standards No. 158, Employer s Accounting for Defined Benefit Pension and Other Postretirement Plans on December 31, 2006 and Statement of Financial Accounting Standards No. 123R, Share-based Payment on January 1, 2006.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2007, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 15, 2008 expressed an unqualified opinion on the Company s internal control over financial reporting.

## **Wausau Paper Corp. and Subsidiaries**

### **Notes to Consolidated Financial Statements**

#### **Note 1**

##### **Description of the Business and Summary of Significant Accounting Policies**

Wausau Paper Corp. manufactures, converts, and sells paper and paper products within three principal segments: Specialty Products, Printing & Writing, and Towel & Tissue. The majority of our products are sold within the United States and Canada.

Specialty Products produces a wide variety of technical specialty papers that include supercalendered backing papers for pressure-sensitive labeling applications, tape backing, and packaging materials for a broad range of food, medical, and industrial applications.

Printing & Writing manufactures, converts, and markets a broad line of premium printing and writing grades.

Towel & Tissue produces a complete line of towel and tissue products that are marketed along with soap and dispensing systems for the industrial and commercial away-from-home market.

##### **Basis of Presentation**

The consolidated financial statements include the accounts of Wausau Paper Corp. and our subsidiaries. All significant intercompany transactions and accounts have been eliminated in consolidation.

##### **Use of Estimates**

The preparation of the accompanying financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Actual results may differ from these estimates.

## **Cash and Cash Equivalents**

We define cash equivalents as highly liquid, short-term investments with an original maturity of three months or less. Cash and cash equivalents are stated at cost, which approximates market.

There were approximately \$13.6 million and \$15.2 million of cash and cash equivalents on deposit with one bank at December 31, 2007 and 2006, respectively.

## **Inventories**

Pulp, finished paper products, and approximately 96% of raw materials are valued at the lower of cost, determined on the last-in, first-out (LIFO) method, or market. All other inventories are valued at the lower of average cost or market. Liquidations in individual LIFO inventory pools decreased cost of sales by \$1.5 million and \$1.4 million for the years ended December 31, 2007 and 2006, respectively.

## **Property, Plant, and Equipment**

Property, plant, and equipment are stated at cost and are depreciated over the estimated useful lives of the assets using the straight-line method for financial statement purposes. Land and construction in progress are stated at cost. The cost and related accumulated depreciation of all plant and equipment retired or otherwise disposed of are removed from the accounts, and any resulting gains or losses are included in the Consolidated Statements of Operations.

Buildings are depreciated over a 20- to 45-year period; machinery and equipment over a three- to 20-year period. Maintenance and repair costs are charged to expense as incurred. Improvements that extend the useful lives of the assets are added to the plant and equipment accounts.

Our policy is to capitalize interest incurred on debt during the course of projects that exceed one year in construction and \$1 million, or projects that exceed \$10 million. Interest capitalized in 2007, 2006, and 2005 was not significant.

We assess the recoverability of assets to be held and used by comparing the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets, based on a discounted cash flow analysis. See Note 2 to the Consolidated Financial Statements for a discussion of asset impairment losses recorded in 2007. No impairment losses were recorded in 2006 or 2005.

Timber and timberlands are stated at net depleted value. We capitalize the cost of purchasing timberlands and reforestation costs. Interest and taxes related to timberlands are expensed as incurred. Reforestation costs include site preparation, planting, fertilizing, herbicide application, and thinning. Temporary logging roads are expensed while long-term logging roads are capitalized and amortized over the estimated useful lives of the roads, which is generally 15 to 20 years. Depletion is recorded as timber is harvested and included in inventory until conversion into saleable product. Depletion is calculated using the block and units-of-production methods. Under these methods, the capitalized costs of large land tracts are divided by the estimated volume of timber anticipated to be harvested on each tract. As the timber is harvested, depletion is either recorded as each block is harvested or as a percentage of each block harvested. The cost and related depletion of timberlands sold under our timberland sales program is removed from the accounts, and any resulting gains or losses are included as a component of cost of sales in the Consolidated Statements of Operations. Timberland sales gains of \$9.6 million, \$17.3 million, and \$2.2 million were included in cost of sales in the Consolidated Statements of Operations for the years ended December 31, 2007, 2006, and 2005, respectively.

## **Income Taxes**

Estimates of income taxes refundable and payable, deferred income tax assets and liabilities, and the effective tax rate are based on an analysis of many factors including interpretations of Federal, state, and foreign income tax laws, the difference between tax and financial reporting basis of assets and liabilities, estimates of amounts currently due or owed, realization of income tax benefits in future years, and current accounting standards. Estimates are reviewed and

updated on a quarterly basis as facts and circumstances change and actual results are known. Adjustments to the effective income tax rate and recorded assets and liabilities may occur in future periods if actual results differ significantly from original estimates and interpretations.

### **Treasury Stock**

Common stock purchased for treasury is recorded at cost. At the date of subsequent reissue, the treasury stock account is reduced by the cost of such stock on the weighted-average cost basis.

### **Accumulated Other Comprehensive Loss**

For all periods presented, the accumulated other comprehensive loss is comprised of cumulative net actuarial losses and prior service cost not yet recognized as a component of net periodic benefit costs for retirement plans and other post-retirement benefit plans, net of tax of \$17.5 million and \$35.9 million at December 31, 2007 and 2006, respectively.

### **Revenue Recognition**

Revenue is recognized, net of estimated discounts, allowances and returns upon shipment of goods at which time title passes to the customer. Upon shipment, the customer is obligated to pay us and we have no remaining obligation. We grant credit to customers in the ordinary course of business.

Shipping and handling costs billed to customers are included in net sales, and the related costs are included in cost of sales in the Consolidated Statements of Operations.

### **Stock-based Compensation Plans**

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment ( SFAS 123R ), using the modified prospective application transition method. The modified prospective application transition method requires that as of the effective date, compensation cost related to share-based payment transactions is recognized as an operating expense in the statement of operations over the requisite service period of the grant based on the grant-date fair value of the award. As such, prior periods will not reflect restated amounts.

Prior to January 1, 2006, we measured compensation cost for stock-based compensation plans using the intrinsic value based method prescribed under Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees. As a result, compensation expense for restricted stock was recognized ratably over the service period based upon the grant-date market value and compensation expense for performance stock awards was recognized ratably over the performance period based on changes in quoted market prices of Wausau Paper common stock and the likelihood of achieving performance goals. The exercise price of all employee stock options was at least equal to their grant-date market value. Accordingly, no compensation expense was recorded for stock options granted to employees.

Under SFAS 123R, share-based payment awards that are settled in cash continue to be classified as a liability; however, rather than remeasuring the award at the intrinsic value each reporting period, the award is remeasured at its fair value each reporting period until final settlement. The difference between the liability as previously computed (i.e., intrinsic value) and the fair value of the liability award on January 1, 2006, was \$0.4 million net of any related tax effects (\$0.7 million pre-tax), and was recorded as a cumulative effect of a change in accounting principle in the Consolidated Statement of Operations. SFAS 123R also requires us to report the tax benefit from the tax deduction that is in excess of recognized compensation costs (excess tax benefits) as a financing cash flow rather than an operating cash flow. Before the adoption of SFAS 123R, we reported the entire tax benefit related to the exercise of stock options as an operating cash flow. See Note 8 to the Consolidated Financial Statements for a further discussion on stock-based compensation plans.

## Earnings Per Share

We present both basic and diluted net (loss) earnings per share ( EPS ) amounts. Basic EPS is calculated based on the weighted average number of common shares outstanding during the respective year, while diluted EPS is calculated based on the weighted average number of common shares and common stock equivalents outstanding during the respective year. The difference between basic and diluted EPS is solely attributable to stock-based compensation plans. See Note 8 for information on stock-based compensation plans. We use the treasury-stock method to calculate the impact of outstanding awards of stock options, restricted stock, and restricted stock unit awards, referred to as performance units. Stock options for which the exercise price exceeds the average market price over the period have an antidilutive effect on EPS and, accordingly, are excluded from the calculation.

For the years ended December 31, 2007, 2006, and 2005, stock-based grants for 2,102,810, 667,944, and 2,160,804 shares, respectively, were excluded from the diluted EPS calculation because the shares were antidilutive.

Basic and diluted (loss) earnings per share are reconciled as follows:

(all amounts in thousands, except per share data)	2007	2006	2005
Net (loss) earnings	\$ (1,825)	\$ 17,619	\$(19,465)
Basic weighted average common shares outstanding	50,477	50,935	51,448
Dilutive securities:			
Stock compensation plans		314	
Diluted weighted average common shares outstanding	50,477	51,249	51,448
Net (loss) earnings per share basic	\$ (0.04)	\$ 0.35	\$ (0.38)
Net (loss) earnings per share diluted	\$ (0.04)	\$ 0.34	\$ (0.38)

## **Derivatives**

In the past, we have used derivative instruments to mitigate our exposure to interest rate risk. We do not issue such instruments for trading purposes. At December 31, 2007 and 2006, there were no derivative instruments outstanding.

## **Research and Development Expenses**

Research and development costs are expensed as incurred. Expenditures for product development were \$2.6 million, \$2.1 million, and \$1.9 million in 2007, 2006, and 2005, respectively.

## **New Accounting Pronouncement**

On January 1, 2007, we adopted the provisions of Financial Accounting Standards Board ( FASB ) Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 ( FIN 48 ). FIN 48 defines the threshold for recognizing the benefits of tax return positions in the financial statements as more-likely-than-not to be sustained by the taxing authority. The literature also provides guidance on the derecognition, measurement, and classification of income tax uncertainties, along with any related interest and penalties. FIN 48 also includes guidance concerning accounting for income tax uncertainties in interim periods and increases the level of disclosures associated with any recorded income tax uncertainties. As a result of the implementation of FIN 48, we recognized a \$0.04 million decrease in the liability for unrecognized tax benefits, which was accounted for as an increase to retained earnings at January 1, 2007. See Note 7 to the Consolidated Financial Statements for a further discussion on income tax uncertainties.

In September 2006, the FASB issued FASB Staff Position ( FSP ) No. AUG AIR-1, Accounting for Planned Major Maintenance Activities. This FSP prohibits companies from recognizing planned major maintenance costs under the accrue-in-advance method that allowed the accrual of a liability over several reporting periods before the maintenance is performed. FSP AUG AIR-1 is applicable to entities in all industries and must be retrospectively applied. In accordance with FSP AUG AIR-1, on January 1, 2007, we adopted the direct expensing method, under which the costs of planned major maintenance activities are expensed in the period in which the costs are incurred. The application of FSP AUG AIR-1 affected our 2006 interim period reporting and did not result in a cumulative effect adjustment to our annual consolidated financial statements.

## **Future Accounting Pronouncements**

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Benefit Plans* ( SFAS 158 ), which requires that we recognize in our financial statements the overfunded or underfunded status of a defined benefit post-retirement plan as an asset or liability and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. SFAS 158 also requires additional disclosures regarding certain effects on net periodic benefit cost for the next fiscal year that arise from delayed recognition of the

gains or losses, prior service credits, and transition assets or obligations. On December 31, 2006, we adopted the recognition and disclosure provisions of SFAS 158 and recognized a charge of \$36.6 million, net of income taxes, to other comprehensive income in the Consolidated Statements of Stockholders' Equity. In addition, SFAS 158 also requires the measurement of the funded status of a plan as of the date of the year end financial statements. The requirement to measure plan assets and benefit obligations as of the date of the year end financial statements is effective for fiscal years ending after December 15, 2008. We do not expect the adoption of the measurement date provisions of SFAS 158 to have a material effect on the consolidated financial statements. See Note 6 to the Consolidated Financial Statements for additional information required to be disclosed in accordance with SFAS 158.

In September 2007, the FASB ratified Emerging Issues Task Force ( EITF ) 06-11 Accounting for the Income Tax Benefits of Dividends on Share-Based Payment Awards ( EITF 06-11 ). EITF 06-11 provides that tax benefits associated with dividends on share-based payment awards be recorded as a component of additional paid-in capital. EITF 06-11 is effective, on a prospective basis, for fiscal years beginning after December 15, 2007. We do not expect the adoption of EITF 06-11 to have a material effect on the consolidated financial statements.

## **Reclassifications**

On January 1, 2007, we reorganized the various subsidiaries which comprised our operating segments to align more closely with our operating structure. As a result of the reorganization, the assets and operating results of one facility were reclassified from the Corporate and unallocated segment to the Towel & Tissue segment.

In addition, certain prior-year amounts in the consolidated financial statements and the notes to consolidated financial statements have been reclassified to conform to the 2007 presentation.

## **Note 2 Restructuring and Divestitures**

In December 2007, the roll wrap portion of our Specialty Products business was sold to Cascades Sonoco, Inc., resulting in a pre-tax gain of \$1.2 million, which is included in cost of sales in the Consolidated Statements of Operations for the year ending December 31, 2007. We will continue to manufacture roll wrap and related products for the buyer during a post-closing transition period which expires on July 2, 2008. Pre-tax restructuring expense of \$0.2 million reflected in the Consolidated Statements of Operations was related to severance and benefit continuation costs and other associated closure costs for the year ending December 31, 2007. We have retained the real property at the roll wrap production facilities and intend to sell the property following the completion of the transition period. Subsequent to the sale of the roll wrap business, asset impairment testing was completed on the remaining net assets, resulting in pre-tax impairment charges of \$0.4 million to reduce the carrying values of the remaining net assets to their estimated fair values. The impairment charges are reflected in cost of sales in the Consolidated Statements of Operations. Additional pre-tax closure charges of approximately \$0.8 million are expected to be incurred in 2008.

In October 2007, we announced plans to cease Printing & Writing's papermaking operations at our Groveton, New Hampshire mill. Papermaking operations ceased in December 2007, and the

majority of the papermaking assets were abandoned. The closure resulted in the elimination of approximately 300 permanent jobs. Due to the interchangeability of our printing and writing paper production on our paper machines within the Printing & Writing business segment, as well as shared distribution, sales and marketing, and customer service, we will continue to manufacture and sell the same broad line of premium printing and writing papers within our remaining Printing & Writing mills. Cost of sales for the year ending December 31, 2007, as reflected in the Consolidated Statements of Operations, includes \$38.8 million in pre-tax charges for accelerated depreciation and an adjustment of spare parts and mill inventory to net realizable value. Pre-tax restructuring expense, as reflected in the Consolidated Statements of Operations, related to severance and benefit continuation costs and other associated closure costs was \$7.1 million for the year ended December 31, 2007.

The following table sets forth information with respect to the Groveton, New Hampshire mill closure charges:

(all dollar amounts in thousands)	<b>2007</b>
Depreciation on abandoned equipment	<b>\$35,134</b>
Inventory and spare parts write-down	<b>4,155</b>
Severance and benefit continuation	<b>2,982</b>
Other associated costs	<b>3,605</b>
Total	<b>\$45,876</b>

At December 31, 2007, \$3.1 million was recorded as a current liability for restructuring expenses, consisting of severance and benefit continuation costs and other associated closure costs. Additional pre-tax closure charges of approximately \$20.4 million primarily for additional depreciation on assets in use at December 31, 2007, and contract termination costs are expected to be recognized during 2008.

In July 2005, we announced plans to permanently close the sulfite pulp mill at our Brokaw, Wisconsin, papermaking facility. The pulp mill was closed in November 2005 and the related long-lived assets were abandoned. The closure resulted in the elimination of 57 permanent jobs, or approximately 10% of the facility's total workforce. The cost of sales for the years ended December 31, 2006 and 2005, as reflected in the Consolidated Statements of Operations, includes \$0.3 million and \$37.1 million, respectively, in pre-tax charges for adjustments of pulp mill inventory to net realizable value and, in 2005, accelerated depreciation on the long-lived assets that were abandoned upon closure and a portion of the severance and benefit continuation expense. Pre-tax restructuring expense related to other associated closure costs was \$0.2 million and \$1.3 million for the years ended December 31, 2006 and 2005, respectively.

The following table sets forth information with respect to pulp mill closure charges:

(all dollar amounts in thousands)	2006	2005
Depreciation on abandoned equipment	\$	\$31,970
Inventory write-down	275	4,635
Severance and benefit continuation		862
Other associated costs	226	973
Total	\$501	\$38,440

There were no charges to cost of sales or restructuring expense in the Consolidated Statements of Operations related to the pulp mill closure for the year ended December 31, 2007.

Subtotal	<b>137,899</b>	158,111
Premium on senior notes	<b>1,634</b>	2,360
Total debt	<b>139,533</b>	160,471
Less: current maturities of long-term debt (see Note 5)	<b>(175)</b>	(184)
Total long-term debt	<b>\$139,358</b>	\$160,287

We had \$138.5 million in unsecured private placement notes that were closed and funded on August 31, 1999. On August 31, 2007, \$35 million of the unsecured private placement notes matured and were repaid. The principal amounts, maturities, and interest rates on the remaining notes are (1) \$68.5 million, 10 years, 7.31%; and (2) \$35 million, 12 years, 7.43%. In connection with the note offering, we entered into an interest-rate swap agreement under which the interest rate paid by us with respect to (1) \$58.5 million of the 10-year notes was the three-month LIBOR rate, plus .4925%, and (2) \$30 million of the 12-year notes was the three-month LIBOR rate, plus .55%. During 2001, we terminated this interest-rate swap arrangement in exchange for cash payments of \$6.4 million. The amounts received from the swap counterparties at termination approximated the fair values of the swaps at the respective termination dates. The premium recorded on debt during the period the swaps were outstanding will continue to be amortized using the effective interest-rate method over the remaining term of the respective debt instruments. See Note 11 for additional information regarding the interest-rate swap and amortization of debt premium.

We have a \$125 million unsecured revolving-credit agreement with five financial institutions that expires on July 27, 2011. Under the facility, we may elect a base rate which is a fluctuating rate per annum for interest from either domestic or offshore rates plus an applicable rate based upon our consolidated leverage ratio. In addition, the facility provides for sublimits of \$50 million for the issuance of standby letters of credit and \$10 million for certain short-term bid loans among the bank group. We pay the banks a facility fee under this agreement based on quarterly

debt/capitalization ratios. Total facility fees paid under this agreement and previous agreements were \$166,000 in 2007, \$268,000 in 2006, and \$303,000 in 2005. There were \$15.0 million in outstanding borrowings under this agreement at December 31, 2007. There were no borrowings against the agreement at December 31, 2006.

In addition to representations and warranties, covenants, and provisions for default customary for facilities of this nature for customers of the banks having similar creditworthiness, we are

required to maintain a consolidated leverage ratio of not more than 55%, a consolidated interest coverage ratio of not less than 3 to 1, and an adjustable minimum net worth covenant. On October 19, 2007, Wausau Paper, the financial institutions participating in the revolving-credit agreement and the required holders of our \$138.5 million senior notes agreed to amend the minimum net worth covenant. Under the amendment, the minimum consolidated net worth requirement is initially \$200 million and will be adjusted quarterly to include 25% of quarterly consolidated net income, with no deduction for any net loss, and proceeds from equity sales. The adjustable minimum net worth requirement was \$200 million at December 31, 2007. As of December 31, 2007 and 2006, we were in compliance with all required covenants.

We maintain an unrated commercial paper placement agreement with a bank to issue up to \$50 million of unsecured debt obligations. The agreement requires unused credit availability under our revolving-credit agreement equal to the amount of outstanding commercial paper. There were no borrowings under this agreement at December 31, 2007 and 2006.

On November 2, 2004, we entered into a loan agreement with the Economic Development Authority of the city of Brainerd, Minnesota. Under the agreement, we borrowed \$500,000, of which \$100,000 was forgivable upon meeting certain employment criteria at our Brainerd, Minnesota, facility by November 1, 2006. The employment criteria were met in 2006, therefore, \$100,000 of the loan was forgiven. Interest is payable quarterly on the outstanding balance at a rate of 2% per annum. In accordance with the agreement, quarterly payments of principal and interest began on January 1, 2006. The loan is due and payable no later than November 1, 2013.

In August 1995, we obtained \$19 million in industrial development bond financing to fund an upgrade of the Brokaw mill wastewater treatment plant. The bonds mature in 2023 and bear interest at short-term rates. The bonds are supported by a letter of credit that is issued under our revolving-credit agreement.

The aggregate annual maturities of long-term debt, excluding capital leases (see Note 5), are as follows:

(all dollar amounts in thousands)	Annual maturities
2008	\$ 49
2009	68,567
2010	69
2011	50,076
2012	
Thereafter	19,000

**Note 5****Lease Commitments**

We have various leases for real estate, mobile equipment, and machinery that generally provide for renewal privileges or for purchase at option prices established in the lease agreements. Property, plant, and equipment include the following amount for capitalized leases as of December 31:

(all dollar amounts in thousands)	<b>2007</b>	2006
Machinery and equipment	<b>\$ 393</b>	\$ 393
Allowance for amortization	<b>(144)</b>	(65)
Net value	<b>\$ 249</b>	\$ 328

Lease amortization is included in depreciation expense.

Future minimum payments, by year and in the aggregate, under capitalized leases and noncancelable operating leases with initial or remaining terms of one year or more consisted of the following at December 31, 2007:

(all dollar amounts in thousands)	Capital Leases	Operating Leases
2008	\$126	\$1,006
2009	12	986
2010		975
2011		956
2012		956
Thereafter		877
Total minimum payments	\$138	\$5,756

Rental expense for all operating leases was as follows:

(all dollar amounts in thousands)

**2007**

2006

2005

Rent expense

**\$8,809**

\$8,508

\$7,691

60

---

**Note 6**

**Pension and Other Post-retirement Benefit Plans**

We sponsor defined benefit pension plans covering substantially all employees. Retirement benefits for salaried and nonunion employees are based on pay and company performance. Plans covering hourly employees provide benefits based on years of service and fixed benefit amounts for each year of service. The defined benefit pension plans are funded in accordance with federal laws and regulations.

We have supplemental retirement agreements with certain present and past key officers, directors, and employees. The principal cost of such plans is being or has been accrued over the period of active employment to the full eligibility date. The supplemental retirement agreements are unfunded.

We also provide certain defined benefit post-retirement health and life insurance plans that cover qualifying retirees. Benefits and eligibility for various employee groups vary by location and union agreements. The defined benefit post-retirement plans are unfunded.

As described in Note 1, effective December 31, 2006, we adopted SFAS 158, which requires that we recognize in our financial statements the overfunded or underfunded status of a defined benefit post-retirement plan as an asset or liability and to recognize changes in that funded status in the year which the changes occur through comprehensive income. In addition, SFAS 158 also requires the measurement of the funded status of a plan as of the date of the year end financial statements. The requirement to measure plan assets and benefit obligations as of the date of the year end financial statements is effective for fiscal years ending after December 15, 2008. Accordingly, we plan to adopt the measurement date provisions of SFAS 158 for our fiscal year ending December 31, 2008. We do not expect the adoption of the measurement date provisions of SFAS 158 to have a material effect on the consolidated financial statements. We selected September 30, 2007 and 2006, as the measurement dates for plan assets and obligations in 2007 and 2006, respectively.

Edgar Filing: WAUSAU PAPER CORP. - Form 10-K

The following schedules present changes in, and components of, net assets (liabilities) for retirement and other post-retirement benefits:

(all dollar amounts in thousands)	Retirement Benefits		Other Post retirement Benefits	
	2007	2006	2007	2006
<b>Change in benefit obligation:</b>				
Benefit obligation at September 30, 2006 and 2005	\$ 196,551	\$ 193,432	\$ 106,909	\$ 97,418
Service cost	7,799	7,833	2,516	3,201
Interest cost	11,026	10,382	5,146	5,242
Amendments	3,374	2,278	(20,295)	
Net actuarial (gain) loss	(7,266)	(6,112)	(8,538)	5,531
Participant contributions			2,248	2,030
Benefits paid	(10,231)	(11,262)	(7,146)	(6,513)
Benefit obligation September 30, 2007 and 2006	\$ 201,253	\$ 196,551	\$ 80,840	\$ 106,909
<b>Change in plan assets:</b>				
Fair value at September 30, 2006 and 2005	\$ 164,834	\$ 147,096	\$	\$
Actual gain	27,700	11,955		
Company contributions	16,395	17,045	4,898	4,483
Participant contributions			2,248	2,030
Benefits paid	(10,231)	(11,262)	(7,146)	(6,513)
Fair value at September 30, 2007 and 2006	\$ 198,698	\$ 164,834	\$	\$
<b>Net amount recognized:</b>				
Funded status at September 30, 2007 and 2006	\$ (2,555)	\$ (31,717)	\$ (80,840)	\$(106,909)
Cash contribution subsequent to measurement date	3,799	4,402	841	1,296
Curtailement (expense) income	(3,111)		607	
Unrecognized net loss after remeasurement	3,056			
Accrued benefit cost at December 31	\$ 1,189	\$ (27,315)	\$ (79,392)	\$(105,613)
<b>Amounts recognized in the Consolidated Balance Sheets consist of:</b>				
Noncurrent assets	\$ 17,953	\$	\$	\$
Current liabilities	(567)	(554)	(5,280)	(4,100)
Noncurrent liabilities	(16,197)	(26,761)	(74,112)	(101,513)
Net amount recognized at December 31	\$ 1,189	\$ (27,315)	\$ (79,392)	\$(105,613)

For 2007 and 2006, the amendments to retirement benefit plans reflect union negotiated rate increases. For 2007, the amendment to other post-retirement benefit plans is primarily related to cost sharing changes for the non-union and two union plans. In addition for 2007, the curtailment recognized relates to the closure of Printing & Writing s Groveton, New Hampshire mill. See Note 2 to the Consolidated Financial Statements for additional information on the Groveton closure.

Amounts recognized in Accumulated Other Comprehensive Loss, net of tax, consist of:

(all dollar amounts in thousands)	Retirement Benefits		Other Post retirement Benefits	
	2007	2006	2007	2006
Prior service cost (credit)	\$ 8,884	\$10,217	\$(11,265)	\$ (3,148)
Net loss	10,882	25,998	17,724	28,125
Net amount recognized at December 31	\$19,766	\$36,215	\$ 6,459	\$24,977

The total accumulated benefit obligation for qualified defined benefit pension plans was \$198.9 million and \$193.4 million at September 30, 2007 and 2006, respectively. At September 30, 2007, plan assets exceeded the total accumulated benefit obligation for all of the qualified defined benefit pension plans. At September 30, 2006, the total accumulated benefit obligation for pension plans exceeded the plan assets for all of the qualified defined benefit pension plans.

Asset category	Pension Benefits		
	Target Allocations	Percentage of Plan Assets at Measurement Date	
		2007	2006
Equity securities	60.0%	65.8%	69.5%
Debt securities	40.0%	34.2%	30.5%
Total	100.0%	100.0%	100.0%

Wausau Paper's Benefits Committee, as established by the Board of Directors, monitors pension assets and the performance of pension investments. The Benefits Committee manages toward an asset allocation consisting of approximately 60% equity securities and 40% debt securities. An external investment manager is used to assist us in establishing our investment strategies and policies. We consider the historical and projected returns for each asset category and believe that the investment strategy employed will provide a blended rate of return on pension assets consistent with current pension valuation assumptions.

Although we do not have a minimum funding requirement for defined benefit pension plans in 2008, we may elect to make contributions of up to \$6.0 million directly to pension plans. We also expect to contribute \$5.3 million, net of subsidy reimbursements, directly to other post-retirement plans. Benefit payments expected to be paid and subsidy amounts to be received in each of the next five years and in the aggregate for the five years thereafter are:

Edgar Filing: WAUSAU PAPER CORP. - Form 10-K

(all dollar amounts in thousands)	Pension	Other Post-retirement	
	Benefit Payments	Benefit Payments	Subsidy
2008	\$10,538	\$ 5,534	\$ 254
2009	\$11,187	\$ 5,964	\$ 285
2010	\$12,125	\$ 6,376	\$ 311

---

The components of net periodic benefit costs recognized in the Consolidated Statements of Operations and the amounts recognized in other comprehensive income are as follows:

(all dollar amounts in thousands)	Pension Benefits			Other Post retirement Benefits		
	2007	2006	2005	2007	2006	2005
Components of net periodic benefit cost:						
Service cost	\$ 7,799	\$ 7,833	\$ 7,250	\$ 2,516	\$ 3,201	\$ 2,513
Interest cost	11,026	10,382	9,584	5,146	5,242	4,740
Expected return on plan assets	(13,416)	(12,011)	(10,832)			
Amortization of:						
Prior service cost (benefit)	2,413	2,156	2,250	(3,829)	(3,324)	(3,055)
Actuarial loss	2,468	3,190	1,862	2,332	1,967	1,352
Settlements			316			
Subtotal	10,290	11,550	10,430	6,165	7,086	5,550
Components charged to restructuring expense:						
Curtailments	3,111			(607)		
Total net periodic benefit cost	\$ 13,401	\$ 11,550	\$ 10,430	\$ 5,558	\$ 7,086	\$ 5,550
Recognized in other comprehensive income (before tax effect):						
Net actuarial loss	\$ (21,496)			\$ (8,537)		
Prior service cost (credit)	3,375			(20,295)		
Amortization of:						
Net actuarial loss	(2,468)			(2,332)		
Prior service cost (credit)	(5,524)			3,829		
Total recognized in other comprehensive income	(26,113)			(27,335)		
Total recognized in net periodic benefit cost and other comprehensive income	\$ (12,712)			\$ (21,777)		

The estimated prior service cost and net actuarial loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive loss into net periodic benefit cost over the year ended December 31, 2008, are charges of \$1.9 million and \$0.7 million, respectively. The estimated prior service credit and net actuarial loss for the other post-retirement benefit plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the year ended December 31, 2008, are a credit of \$3.3 million and a charge of \$1.9 million, respectively.

Edgar Filing: WAUSAU PAPER CORP. - Form 10-K

The weighted average assumptions used in the calculation of the year-end obligation and net periodic benefit costs are as follows:

	Pension Benefits			Other Post retirement Benefits		
	2007	2006	2005	2007	2006	2005
Weighted-average assumptions used to determine benefit obligations at September 30:						
Discount rate	<b>6.25%</b>	5.75%	5.50%	<b>6.25%</b>	5.75%	5.50%
Rate of compensation increase	<b>4.25%</b>	4.25%	4.25%	<b>n/a</b>	n/a	n/a
Weighted-average assumptions used to determine net periodic benefit cost for year ended December 31:						
Discount rate	<b>5.75%</b>	5.50%	5.75%	<b>5.75%</b>	5.50%	5.75%
Expected return on plan assets	<b>8.25%</b>	8.25%	8.25%	<b>n/a</b>	n/a	n/a
Rate of compensation increase	<b>4.25%</b>	4.25%	4.25%	<b>n/a</b>	n/a	n/a
Assumed health care cost trend rates at December 31:						
Health care cost trend rate assumed	<b>n/a</b>	n/a	n/a	<b>9%</b>	9%	10%
Ultimate trend rate	<b>n/a</b>	n/a	n/a	<b>5%</b>	5%	5%
Year that the rate reaches the ultimate trend rate	<b>n/a</b>	n/a	n/a	<b>2010</b>	2010	2010

Assumed health care cost trend rates significantly affect reported amounts for retiree medical benefits. For 2007, the effect of a one-percentage-point change in the assumed health care cost trend rate would have had the following effects:

(all dollar amounts in thousands)	One percentage point	
	Increase	Decrease
Effect on the post-retirement benefit obligation	\$15,435	\$(12,683)
Effect on the sum of the service and interest cost components	\$ 1,277	\$( 1,032)

We also sponsor defined contribution pension plans, several of which provide for company contributions based on a percentage of employee contributions. The cost of such plans totaled \$2.8 million, \$2.7 million, and \$2.7 million in 2007, 2006, and 2005, respectively.

We have deferred-compensation agreements with certain present and past key officers, directors, and employees which allow participants to defer a portion of their compensation. The principal cost of such plans is being or has been accrued over the period of active employment to the full eligibility date. The annual cost of the deferred-compensation agreements was a credit of \$0.4 million for the year ending December 31, 2007, and a charge of \$0.9 million for the year ending December 31, 2006. At December 31, 2007 and 2006, the amounts accrued under the deferred-compensation agreements were \$8.7 million and \$7.9 million, respectively, and are included in current and other noncurrent liabilities on the Consolidated Balance Sheets.

**Note 7****Income Taxes**

Deferred tax assets and liabilities are determined based on the estimated future tax effects of temporary differences between the financial statement and tax bases of assets and liabilities, as measured by the current enacted tax rates. Deferred tax expense (credit) is the result of changes in the deferred tax asset and liability.

The (credit) provision for income taxes is comprised of the following:

(all dollar amounts in thousands)	2007	2006	2005
Current tax expense (credit):			
Federal	\$ 5,272	\$ 11,632	\$ (1,074)
State	299	2,993	827
Total current	5,571	14,625	(247)
Deferred tax (credit) expense:			
Federal	(14,087)	(3,212)	(10,615)
State	(13,713)	(590)	(3,263)
Total deferred	(27,800)	(3,802)	(13,878)
Total (credit) provision for income taxes	\$(22,229)	\$ 10,823	\$(14,125)

A reconciliation between taxes computed at the federal statutory rate and our effective tax rate follows:

(all dollar amounts in thousands)	2007		2006		2005	
Federal statutory tax rate	\$ (8,419)	(35.0%)	\$10,119	35.0%	\$(11,757)	(35.0%)
State taxes (net of federal tax benefits)	(2,160)	(8.9)	1,729	6.1	(2,796)	(8.3)
State tax benefit due to reorganization	(11,645)	(48.5)				
Export sales benefit			(380)	(1.3)	(438)	(1.3)
Other	(5)		(645)	(2.3)	866	2.3
Effective tax rate	\$(22,229)	(92.4%)	\$10,823	37.5%	\$(14,125)	(42.3%)

Effective January 1, 2007, we reorganized the various subsidiaries which comprised our operating segments to align more closely with our operating structure. Each segment is now organized as a single member limited liability

company and operates as a direct subsidiary of Wausau Paper Corp. The new structure will allow us to utilize state net operating loss and credit carryovers of certain subsidiaries for which full valuation allowances had been previously established due to the fact that separate state tax returns were filed under our previous structure. We recorded net state tax benefits of \$11.6 million primarily as a result of the reversal of these valuation allowances. At the end of 2007, \$192.6 million of unused state operating loss and credit carryovers existed, which may be used to offset future state taxable income in various amounts through the year 2022. Under the provisions of SFAS No. 109, the benefits of state tax losses are recognized as a deferred tax asset, subject to appropriate valuation allowances.

Edgar Filing: WAUSAU PAPER CORP. - Form 10-K

The major temporary differences that give rise to the deferred tax assets and liabilities at December 31, 2007 and 2006, are as follows:

(all dollar amounts in thousands)	2007	2006
Deferred tax assets:		
Accrued compensated absences	\$ 4,046	\$ 4,281
Post-retirement benefits	32,061	40,522
State net operating loss carry forward	16,571	15,466
Other	27,051	26,736
Gross deferred tax asset	79,729	87,005
Less valuation allowance	(1,878)	(12,267)
Net deferred tax assets	77,851	74,738
Deferred tax liabilities:		
Property, plant, and equipment	(104,166)	(120,271)
Other	(21,745)	(13,597)
Gross deferred tax liability	(125,911)	(133,868)
Net deferred tax liability	\$ (48,060)	\$ (59,130)

The total deferred tax assets (liabilities) as presented in the accompanying consolidated balance sheets are as follows:

(all dollar amounts in thousands)	2007	2006
Net deferred tax assets	\$ 6,046	\$ 7,444
Net long term deferred tax liabilities	(54,106)	(66,574)
Net deferred tax liability	\$(48,060)	\$(59,130)

A valuation allowance has been recognized for certain state loss carry forwards and future deductible items, as cumulative losses create uncertainty about the realization of the tax benefits in future years.

On January 1, 2007, we adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 ( FIN 48 ). FIN 48 clarifies whether or not to recognize assets or liabilities for tax positions taken that may be challenged by a taxing authority. As a result of the implementation of FIN 48, we recognized a \$0.04 million decrease in the liability for unrecognized tax benefits, which was accounted for as an increase to retained earnings at January 1, 2007.

The following table summarizes the activity related to our liability for unrecognized tax benefits, of which approximately \$4.2 million would impact our effective tax rate if recognized:

(all dollar amounts in thousands)	<b>2007</b>
Balance at January 1	<b>\$ 4,420</b>
Increases related to current year tax positions	<b>90</b>
Increases related to tax positions in prior years	<b>1,779</b>
Decreases related to tax positions in prior years	<b>(1,347)</b>
Balance at December 31	<b>\$ 4,942</b>

We record penalties and accrued interest related to uncertain tax positions in the provision for income taxes in the Consolidated Statements of Operations. During 2007, we accrued potential penalties and interest of approximately \$0.8 million related to these unrecognized tax benefits. In total, as of December 31, 2007, we have recorded a liability for potential interest and penalties of approximately \$1.8 million, which is included in the liability for unrecognized tax benefits. At December 31, 2007, the liability for uncertain tax positions was \$6.7 million, with \$3.8 million of the liability recorded as a current liability and \$2.9 million recorded as a noncurrent liability.

The Internal Revenue Service ( IRS ) is continuing examinations of our 1998 to 2003 tax returns that are anticipated to be concluded in 2008. These examinations relate to certain research and development credits recorded during these respective tax return years. In addition, we are currently open to audit under the statute of limitations by the IRS for the years ending December 31, 2004 through 2007. We also file income tax returns in numerous state jurisdictions with varying statutes of limitations. The anticipated charges with respect to the aforementioned items are included in the liability for uncertain tax positions recorded at December 31, 2007.

## **Note 8**

### **Stock Compensation Plans**

Effective January 1, 2006, we adopted SFAS No. 123 (revised 2004), Share-Based Payment ( SFAS 123R ), using the modified prospective application transition method. The modified prospective application transition method requires that as of the effective date, compensation cost related to share-based payment transactions is recognized as an operating expense in the statement of operations over the requisite service period of the grant based on the grant-date fair value of the award. As such, prior periods will not reflect restated amounts.

Prior to January 1, 2006, we measured compensation cost for stock-based compensation plans using the intrinsic value based method prescribed under Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to

Employees. As a result, compensation expense for restricted stock was recognized ratably over the service period based upon the grant-date market value and compensation expense for performance stock awards was recognized ratably over the performance period based on changes in quoted market prices of Wausau Paper common stock and the likelihood of achieving performance goals. The exercise price of all employee stock

options was at least equal to their grant-date market value. Accordingly, no compensation expense was recorded for stock options granted to employees.

Under SFAS 123R, share-based payment awards that are settled in cash continue to be classified as a liability; however, rather than remeasuring the award at the intrinsic value each reporting period, the award is remeasured at its fair value each reporting period until final settlement. The difference between the liability as previously computed (i.e., intrinsic value) and the fair value of the liability award on January 1, 2006, was \$0.4 million net of any related tax effects (\$0.7 million pre-tax), and was recorded as a cumulative effect of a change in accounting principle in the Consolidated Statement of Operations.

SFAS 123R also requires us to report the tax benefit from the tax deduction that is in excess of recognized compensation costs (excess tax benefits) as a financing cash flow rather than an operating cash flow. Before the adoption on January 1, 2006, we reported the entire tax benefit related to the exercise of stock options as an operating cash flow.

### **Stock Options, Restricted Stock Awards, and Performance Units**

We have one stock incentive plan, the 2000 Stock Incentive Plan, under which awards to grantees are issued. Under the 2000 Stock Incentive Plan, in addition to stock options, awards of restricted shares of common stock and restricted stock units, referred to as performance units, may be granted. We also maintain various other employee stock option plans under which options are outstanding. The plans provide for the determination of purchase price, time, and method of exercise. We are authorized to deliver up to 3.7 million shares of our common stock upon exercise of non-qualified stock options or incentive stock options, or upon grant or in payment of performance shares, performance units, and restricted stock under the various incentive plans. As of December 31, 2007, there were 1.6 million shares available under the 2000 Stock Incentive Plan for future grant. We use treasury stock to deliver common stock shares under these plans.

For the years ended December 31, 2007 and 2006, we recognized approximately \$1.0 million and \$0.7 million, respectively, in share-based compensation expense which included fixed option grants and performance unit awards.

We recognize compensation expense on grants of stock options, restricted stock, and performance unit share-based compensation awards on a straight-line basis over the requisite service period of each award. As of December 31, 2007, total unrecognized compensation cost related to share-based compensation awards was approximately \$0.4 million, net of estimated forfeitures, which we expect to recognize over a weighted average period of approximately 0.8 years.

#### ***Options***

Non-qualified stock options are granted for terms up to 20 years from the grant date. The option price is equal to the fair market value of Wausau Paper common stock at the date of grant for incentive and non-qualified options. Fixed option grant agreements define service condition vesting requirements and other transferability restrictions on a grant-by-grant basis, and performance-based options vest in relation to defined performance.

The following table summarizes the status of all outstanding stock options as of December 31, 2007, 2006, and 2005, and changes during those years:

	<b>2007</b>		2006		2005	
	<b>Weighted</b>		Weighted		Weighted	
	<b>Average</b>		Average		Average	
	<b>2007</b>	<b>Exercise</b>	2006	Exercise	2005	Exercise
	<b>Shares</b>	<b>Price</b>	Shares	Price	Shares	Price
Outstanding at January 1	<b>1,939,624</b>	<b>\$12.30</b>	2,489,842	\$12.32	2,259,732	\$13.15
Granted	<b>509,102</b>	<b>14.45</b>	106,000	14.03	624,562	12.49
Terminated/canceled	<b>(447,102)</b>	<b>15.42</b>	(509,218)	13.35	(394,452)	17.37
Exercised			(147,000)	10.23		
Outstanding at December 31	<b>2,001,624</b>	<b>\$12.16</b>	1,939,624	\$12.30	2,489,842	\$12.32
Exercisable at December 31	<b>1,881,624</b>	<b>\$12.09</b>	1,839,624	\$12.36	2,026,624	\$12.32
Fair value of options granted during the year		<b>\$ 4.83</b>		\$ 3.97		\$ 4.14

The preceding table includes performance-based options that vest in relation to achieving defined performance criteria. The following table summarizes the status of outstanding performance-based stock options as of December 31, 2007, 2006, and 2005, and changes during those years:

	<b>2007</b>		2006		2005	
	<b>Weighted</b>		Weighted		Weighted	
	<b>Average</b>		Average		Average	
	<b>2007</b>	<b>Exercise</b>	2006	Exercise	2005	Exercise
	<b>Shares</b>	<b>Price</b>	Shares	Price	Shares	Price
Outstanding at January 1	<b>66,000</b>	<b>\$10.74</b>	456,218	\$12.08	456,108	\$16.26
Granted	<b>413,102</b>	<b>15.17</b>			384,562	12.10
Terminated/canceled	<b>(413,102)</b>	<b>15.17</b>	(378,218)	9.18	(384,452)	16.93
Exercised			(12,000)	10.71		
Outstanding at December 31	<b>66,000</b>	<b>\$10.74</b>	66,000	\$10.74	456,218	\$12.08
Exercisable at December 31	<b>66,000</b>	<b>\$10.74</b>	66,000	\$10.74	78,000	\$10.74

As a result of not achieving certain operating profit levels for the years ended December 31, 2007, 2006, and 2005, no compensation expense was recorded for performance-based option grants.

Edgar Filing: WAUSAU PAPER CORP. - Form 10-K

Additional information regarding all grants outstanding and exercisable at December 31, 2007, is as follows:

(all dollar amounts in thousands, except per share data)

Range of Exercise Prices	Outstanding Options	Weighted Average Remaining Contractual Life (years)	Weighted Average Exercise Price	Exercisable Options	Weighted Average Exercise Price
\$8.75 \$12.85	1,159,981	13.0	\$ 9.94	1,099,981	\$ 9.93
\$12.98 \$18.50	841,643	11.8	15.22	781,643	15.31
Total	2,001,624			1,881,624	
Aggregate intrinsic value	\$ 18			\$ 18	

For the year ended December 31, 2007, we estimated the fair value of each option on the date of grant using the binomial tree model and the following weighted average assumptions:

Average risk-free interest rate	4.76%
Expected dividend yield	2.60%
Expected volatility	32.41%
Expected term (years)	6.5

The average risk-free rate is determined on the grant date using the yield on zero-coupon U.S. Treasury strips. The rate is duration-matched to the term of the option, which may entail an extrapolation of the rate. The expected dividend yield is calculated using the ten year historical yield of Wausau Paper's dividends. The expected volatility assumption is based on a 20 percent weighting factor for implied volatilities of comparable exchange traded-options and an 80 percent weighting factor of the monthly average historical volatilities of Wausau Paper common stock over the expected life of the award. The expected term of the options is calculated using the remaining contractual lives of the grants and expected exercise and expected termination behavior based upon historical data for Wausau Paper.

The table below presents stock option exercise and vesting activity for the years ended December 31, 2007 and 2006:

(all dollar amounts in thousands)	Year Ended December 31,	
	2007	2006

Total intrinsic value of stock options exercised	\$	\$ 551
Cash received from stock option exercises		1,503
Income tax benefit from the exercise of stock options		102
Total fair value of stock options vested during period	<b>182</b>	156

71

---

***Restricted Stock***

On December 17, 2004, we granted 5,000 shares of restricted stock. In accordance with the plan, the 5,000 shares were valued at the fair value of Wausau Paper's stock on the date of grant and reflected in equity as a reduction in treasury stock outstanding. Compensation expense was recognized for the restricted stock award on a straight-line basis over the vesting period of the entire award with the balance of unearned compensation reflected in the equity section of the balance sheet. Under the plan, shares of restricted stock have voting rights. Cash dividends on the restricted shares were deferred and held by us until satisfaction of the vesting requirements which occurred on December 17, 2005. For the year ended December 31, 2005, \$84,000 in expense was recognized for restricted stock. There were no issuances of restricted stock during the years ended December 31, 2007, 2006, or 2005.

***Performance Units***

Under the 2000 Stock Incentive Plan, we granted performance units that vested in relation to (1) achieving certain operating profit levels and (2) completion of a service requirement. Upon satisfaction of the vesting requirements, the performance units and a dividend equivalent calculated based upon shares earned will be paid out in whole shares of Wausau Paper's common stock, with fractional shares paid in cash. Prior to vesting, no shares are issued and performance units have no voting rights. Effective January 1, 2006, compensation expense is determined based upon the closing sales price of our common stock on the date of the award and is recognized over the requisite service period of the grant once we have determined that achievement of the performance condition is probable. If it is improbable that the performance condition will be met, no compensation cost is recognized. Service condition vesting ranges from zero to two years. For performance unit grants vested prior to the adoption of SFAS 123R, compensation cost was recognized as expense over the service period to the extent the fair market value of Wausau Paper's stock exceeded the grant price of the performance units until the measurement date. At the measurement date, total compensation expense was fixed and any unrecognized cost was expensed over the remaining service period.

The following table summarizes the activity relating to performance unit grants:

	<b>2007</b>	2006	2005
Outstanding at January 1 (number of units)	<b>66,465</b>	90,529	75,993
Granted	<b>48,317</b>	12,269	43,533
Terminated	<b>(1,394)</b>	(5,676)	(18,404)
Settled	<b>(32,155)</b>	(30,657)	(10,593)
Outstanding at December 31 (number of units)	<b>81,233</b>	66,465	90,529

The aggregate intrinsic value of performance units outstanding at December 31, 2007, was approximately \$0.7 million. Total compensation expense recognized for performance units for the years ended December 31 totaled \$0.5

million in 2007, \$0.5 million in 2006, and \$0.4 million in 2005.

72

---

## Stock Appreciation Rights

We maintain various stock appreciation rights plans that entitle certain management employees to receive cash equal to the sum of the appreciation in the value of the stock and the hypothetical value of cash dividends which would have been paid on the stock covered by the grant assuming reinvestment in Wausau Paper stock. The stock appreciation rights granted may be exercised in whole or in such installments and at such times as specified in the grant. In all instances, the rights lapse if not exercised within 20 years of the grant date.

The following table summarizes the activity relating to our stock appreciation rights plans:

	<b>2007</b>	2006	2005
Outstanding at January 1 (number of shares)	<b>253,797</b>	253,797	253,797
Terminated			
Exercised			
Outstanding and exercisable at December 31 (number of shares)	<b>253,797</b>	253,797	253,797
Price range of outstanding and exercisable rights:			
\$4.06    \$9.58	<b>243,797</b>	243,797	243,797
\$17.16	<b>10,000</b>	10,000	10,000

At December 31, 2007, the weighted average remaining contractual life on outstanding stock appreciation rights with an exercise price of between \$4.06 and \$9.58 was 2.1 years, and with an exercise price of \$17.16 was 11 years.

## Dividend Equivalents

We maintain a Dividend Equivalent Plan. Upon termination of employment, or at the time of exercise of options granted in tandem with the dividend equivalents, participants are entitled to receive the cash value of the grant. The cash value is determined by the sum of the value of cash dividends that would have been paid on the stock covered by the grant had it been actual stock and assuming all such hypothetical dividends had been reinvested in Wausau Paper stock. All of the outstanding dividend equivalents were fully vested as of January 1, 2006.

The following table summarizes the activity relating to our dividend equivalent plan:

	<b>2007</b>	2006	2005
Outstanding at January 1 (number of shares)	<b>151,750</b>	154,750	154,750
Exercised		(3,000)	
Outstanding and exercisable at December 31 (number of shares)	<b>151,750</b>	151,750	154,750

For the year ended December 31, 2006, \$8,827 was paid to a participant in settlement of outstanding dividend equivalent awards.

Effective January 1, 2006, share-based compensation provisions or credits related to stock appreciation rights and dividend equivalents are determined based upon a remeasurement to their fair value at each reporting period in accordance with the provisions of SFAS 123R. Prior to January 1, 2006, additions or reductions to compensation expense for stock appreciation rights and dividend equivalents were recognized in each period based upon the quoted market value of the shares and the exercise provisions. The (credit) provision for stock appreciation rights and dividend equivalents is shown in the following table.

(all dollar amounts in thousands)	2007	2006	2005
Stock appreciation rights	<b>\$(1,750)</b>	\$ 866	\$(1,897)
Dividend equivalents	<b>(224)</b>	164	(175)
Total	<b>\$(1,974)</b>	\$1,030	\$(2,072)

***Prior Year Pro forma Expense***

The following table illustrates the effect on net earnings and earnings per share as if the fair value-based method provided by SFAS No. 123 had been applied for all outstanding and unvested awards for periods prior to the adoption of SFAS 123R:

(all dollar amounts in thousands, except per share data)	2005
Net loss:	
As reported	\$(19,465)
Add: Total stock based employee compensation credit under APB No. 25, net of related tax effects	(1,505)
Deduct: Total stock based employee compensation expense determined under fair value based method for all awards, net of related tax effects	468
Pro forma	\$(20,502)

## Note 9

### Commitments and Contingencies

#### Litigation and Other Claims

Wausau Paper may be involved from time to time in various legal and administrative proceedings or be subject to various claims in the normal course of its business. Although the ultimate disposition of legal proceedings cannot be predicted with certainty, in the opinion of management, the ultimate disposition of any threatened or pending matters, either individually or on a combined basis, will not have a material adverse effect on our consolidated financial condition, liquidity, or results of operations.

#### Environmental Matters

We are subject to extensive regulation by various federal, state, provincial, and local agencies concerning compliance with environmental control statutes and regulations. These regulations impose limitations, including effluent and emission limitations, on the discharge of materials into the environment, as well as require us to obtain and operate in compliance with conditions of permits and other governmental authorizations. Future regulations could materially increase our capital requirements and certain operating expenses in future years.

In 1986, the Wisconsin Department of Natural Resources ( DNR ) named a subsidiary of Wausau Paper as a potentially responsible party ( PRP ) for the Gorski landfill in Mosinee, Wisconsin. Our estimate of remediation and water replacement costs associated with the landfill is approximately \$1.5 million. These costs will likely be shared among the members of an ad hoc group of PRPs. We are of the opinion that our share of these costs will not have a material adverse effect on our operations, financial condition, or liquidity. We are continuing to pursue coverage of defense costs and liability coverage with our insurance carriers.

It is our policy to accrue remediation costs when it is probable that such costs will be incurred and when a range of loss can be reasonably estimated. Estimates of loss are developed based on currently available information including environmental studies performed by third-party experts and our past experience with these matters. Our accrued environmental liabilities, including all remediation and landfill closure costs, totaled \$5.8 million and \$5.7 million at December 31, 2007 and 2006, respectively. The provision for remediation and landfill costs was not significant for the years ended December 31, 2007, 2006, and 2005, respectively. We periodically review the status of all significant existing or potential environmental issues and adjust our accruals as necessary. The accruals do not reflect any possible future insurance recoveries. Estimates of costs for future remediation are necessarily imprecise due to, among other things, the identification of presently unknown remediation sites and the allocation of costs among PRPs. We believe that our share of the costs of cleanup for our current remediation site will not have a material adverse impact on our consolidated financial position. As is the case with most manufacturing and many other entities, there can be no assurance that we will not be named as a PRP at additional previously or currently owned sites in the future

or that the costs associated with such additional sites would not be material.

75

---

## **Other Commitments**

As of December 31, 2007, we were committed to spend approximately \$3.1 million on capital projects, which were in various stages of completion.

We contract for the supply and delivery of natural gas at some of our facilities. Under these contracts, we are committed to the transportation of a fixed volume of natural gas from our natural gas suppliers to our facilities. We are not required to buy or sell minimum gas volumes under the agreement but are required to pay a minimum transportation fee for the contracted period. Contracts expire at various times between 2008 and 2019. At December 31, 2007, we also have commitments for the purchase of machine clothing from various suppliers and volume commitments for the supply of fuel oil, natural gas, coal, paper, and certain raw materials. These obligations expire between 2008 and 2010. We may also purchase, from time to time, natural gas contracts with fixed prices for a certain portion of our facility requirements.

## **Note 10**

### **Preferred Share Purchase Rights Plan**

We maintain a rights plan under which one preferred share purchase right is issued for each outstanding share of common stock. Each right entitles its holder to purchase 1 one-thousandth of a share of Series A Junior Participating Preferred Stock, at an exercise price of \$60 per 1 one-thousandth of a preferred share, subject to adjustment. The rights will become exercisable only if a person or group (with certain exceptions) acquires beneficial ownership of 15% or more of the outstanding common stock (an Acquiring Person). Once exercisable, each holder of a right, other than the Acquiring Person, will thereafter have the right to receive common stock having a market value of two times the exercise price of the right. Upon the occurrence of certain events, each holder of a right, other than an Acquiring Person, will have the right to receive (in lieu of preferred shares) our common stock (or a successor company) that has a market value of two times the exercise price of the right. Until exercisable, the rights will not be issued or traded in separate form from the common stock. After any person or group becomes an Acquiring Person, and prior to the acquisition by the Acquiring Person of 50% or more of the common stock, we may exchange the rights, other than rights owned by the Acquiring Person, at an exchange ratio of one share per right (subject to adjustment). At any time prior to any person or group becoming an Acquiring Person, we may redeem the rights at a price of \$0.01 per right. The rights will expire on October 31, 2008.

## **Note 11**

### **Financial Instruments**

Financial instruments consisted of the following:

**Cash and Cash Equivalents**

The carrying amount approximates fair value due to the relatively short period to maturity for these instruments.

76

---

## **Accounts Receivable, Accounts Payable, and Accrued Liabilities**

The carrying amounts approximate fair value due to the relatively short-term nature of these instruments.

## **Long-Term Debt**

The fair value of our long-term debt is estimated based on current rates offered to us for debt of the same remaining maturities. At December 31, 2007 and 2006, the fair value of the long-term debt exceeded the carrying value by approximately \$4.7 million and \$3.3 million, respectively.

## **Interest Rate Agreement**

Interest-rate swaps designated in fair value hedge relationships have been used by us in the past to mitigate the risk of reductions in the fair value of existing fixed-rate long-term notes due to decreases in LIBOR-based interest rates.

Gains and losses on these instruments were reflected in interest expense in the period in which they occurred, and an offsetting gain or loss is also reflected in interest expense based on changes in the fair value of the debt instrument being hedged due to changes in LIBOR-based interest rates. During 2001, the interest rate agreements were terminated. The amounts received from the swap counterparties at termination approximated the fair values of the swaps at the respective termination dates. The premium recorded on debt during the period the swaps were outstanding will continue to be amortized using the effective interest rate method over the remaining term of the respective debt instruments. Debt premium amortization reduced interest expense by approximately \$0.7 million for the years ended December 31, 2007, 2006, and 2005.

## **Note 12 Segment Data**

We have reclassified certain prior-year interim segment information to conform to the 2007 presentation. The reclassifications are the result of restructuring the assets and operating results of one facility from the Corporate and Unallocated segment to the Towel & Tissue segment.

## **Factors Used to Identify Reportable Segments**

Our operations are classified into three principal reportable segments: Specialty Products, Printing & Writing, and Towel & Tissue, each providing different products. Separate management of each segment is required because each

business unit is subject to different marketing, production, and technology strategies.

**Products From Which Revenue Is Derived**

Specialty Products produces specialty papers at its manufacturing facilities in Rhinelander, Wisconsin; Mosinee, Wisconsin; and Jay, Maine. Specialty Products also includes two converting facilities that produce laminated roll wrap and related specialty finishing and packaging products. Printing & Writing produces a broad line of premium printing and writing grades at manufacturing facilities in Brokaw, Wisconsin; and Brainerd, Minnesota. Printing & Writing segment information also includes the manufacturing facility in Groveton, New

Hampshire, which ceased papermaking operations in December 2007. For additional information on the closure of the Groveton, New Hampshire mill, please see Note 2 to the Consolidated Financial Statements. Printing & Writing also includes a converting facility that converts printing and writing grades. Towel & Tissue produces a complete line of towel and tissue products that are marketed along with soap and dispensing systems for the away-from-home market. Towel & Tissue operates a paper mill in Middletown, Ohio, and a converting facility in Harrodsburg, Kentucky.

During 2007, no single customer accounted for 10% or more of our consolidated net sales. On a segment basis, two customers accounted for approximately 30% of Printing & Writing net sales and one customer accounted for approximately 14% of Towel & Tissue net sales, while no single customer of the Specialty Products business segment comprised 10% or more of the respective segment net sales.

### Measurement of Segment Profit and Assets

We evaluate performance and allocate resources based on operating profit or loss. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies.

### Reconciliations

The following are reconciliations to corresponding totals in the accompanying consolidated financial statements:

(all dollar amounts in thousands)	2007	2006	2005

\* In 2007, the first quarter includes state income tax benefits of \$12.0 million and the second quarter includes state income tax charges of \$0.4 million, primarily related to the release of valuation allowances on state net operating loss and credit carryovers of certain subsidiaries due to the reorganization of various subsidiaries which comprised our operating segments to align more closely to our operating structure. Also in 2007, the fourth quarter includes after-tax expense of \$28.8 million (\$45.9 million pre-tax) or \$0.57 per share, related to closure costs and restructuring expenses as a result of the ceasing of papermaking operations at Printing & Writing's Groveton, New Hampshire mill. In 2005, the second, third, and fourth quarters include after-tax expense of \$6.0 million (\$9.5 million pre-tax) or \$0.12 per share, \$13.6 million (\$20.8 million pre-tax) or \$0.26 per share, and \$5.1 million (\$8.1 million pre-tax) or \$0.10 per share, respectively, related to closure costs and restructuring expenses related to the closing of the sulfite pulp mill at Printing & Writing's Brokaw, Wisconsin facility.

\*\* The comparative interim financial data has been reclassified as a result of the adoption of FSP AUG AIR-1 in 2007. The adoption of this FSP affected our interim period reporting only and did not result in an adjustment to the annual consolidated financial statements.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of  
Wausau Paper Corp.

We have audited the consolidated financial statements of Wausau Paper Corp. and subsidiaries (the Company) as of December 31, 2007 and 2006, and for each of the three years ended December 31, 2007, and the Company's internal control over financial reporting as of December 31, 2007, and have issued our reports thereon dated February 15, 2008 (which reports express an unqualified opinion and include an explanatory paragraph relating to the Company's adoption of Statement of Financial Accounting Standards No. 158, Employer's Accounting for Defined Benefit Plans on December 31, 2006 and Statement of Financial Accounting Standards No. 123R, Share-based Payment on January 1, 2006 as described in Note 1). Our audits also included the consolidated financial statement schedule of the Company listed in Item 8. This consolidated financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

DELOITTE & TOUCHE LLP

Milwaukee, WI

**Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES**

Not applicable.

**Item 9A. CONTROLS AND PROCEDURES****Disclosure Controls and Procedures**

As of the end of the period covered by this Form 10-K, management, under the supervision, and with the participation, of the our President and Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 as amended (the Exchange Act )) pursuant to Rule 13a-15. Based upon, and as of the date of such evaluation, the President and Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective.

**Internal Control Over Financial Reporting**

Management's report on our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act), and the related report of our independent registered public accounting firm, are set forth in Item 8 of this report under "Management's Report on Internal Control Over Financial Reporting" on page 41 and "Report of Independent Registered Public Accounting Firm" on page 42. No changes in our internal control over financial reporting occurred during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Item 9B. OTHER INFORMATION**

Not applicable.

82

---

**PART III**

**Item 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT**

**Directors and Executive Officers**

Information relating to our directors is incorporated into this Form 10-K by this reference to the disclosure in our proxy statement relating to the 2008 annual meeting of shareholders (the 2008 Proxy Statement ) under the subcaption Election of Directors Election of Directors.

Information relating to our executive officers is found in Part I of this Form 10-K.

Information required under Rule 405 of Regulation S-K is incorporated into this Form 10-K by this reference to the disclosure in the 2008 Proxy Statement under the subcaption Stock Ownership Section 16(a) Beneficial Ownership Reporting Compliance.

**Code of Ethics**

We have adopted a Code of Business Conduct and Ethics for all directors, officers, and employees and a Code of Compliance and Reporting Requirements for Chief Executive Officer and Senior Financial Officers which covers our Chief Executive Officer, Chief Financial Officer, Controller, Manager of Corporate Accounting, and Manager of Internal Audit. Each of these codes is available at About Wausau Paper Corporate Governance on the Company s website (www.wausaupaper.com). Shareholders may also obtain a free copy by writing to the address set forth under the following subcaption. In the event we amend or waive any provision of the Code of Compliance and Reporting Requirements for Chief Executive Officer and Senior Financial Officers applicable to its principal executive officers, principal financial officers, or controller, we intend to disclose such amendment or waiver at the website address where the code may also be found.

## **Corporate Governance Guidelines and Committee Charters**

We have adopted Corporate Governance guidelines and charters for the Board of Directors Audit, Compensation, and Corporate Governance Committees. These guidelines and charters are available at [About Wausau Paper Corporate Governance](#) on our website ([www.wausaupaper.com](http://www.wausaupaper.com)). Shareholders may also request a free copy of these documents by writing to:

Mosinee, WI 54455-9099

### **Audit Committee**

Our Board of Directors has appointed an Audit Committee in accordance with Section 3(a)(58)(A) of the Exchange Act. The members of the Audit Committee satisfy the NYSE and SEC rules for independence applicable to audit committees of listed companies. Mr. Freels (Chairman), Mr. Baur, Mr. Knetter, and Mr. Kuester serve on the Audit Committee.

### **Financial Expert**

Our Board of Directors has determined that Gary W. Freels is an audit committee financial expert. Mr. Freels is an independent director under NYSE listing standards. Mr. Freels has 26 years of experience in commercial banking and, for the last 12 years, has managed the investment portfolios of the private foundation he serves as chief executive officer. He has also served on the Audit Committee since 1996, and as its chairman since April, 2004.

## **Item 11. EXECUTIVE COMPENSATION**

### **Director Compensation**

Information relating to director compensation is incorporated into this Form 10-K by this reference to the disclosure in the 2008 Proxy Statement under the subcaption Election of Directors Director Compensation for 2007.

### **Executive Officer Compensation**

Information relating to the compensation of executive officers is incorporated into this Form 10-K by this reference to the disclosure in the 2008 Proxy Statement under the caption Executive Compensation.

**Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS**

Information concerning (1) any person or group known to us to be the beneficial owner of more than 5% of our voting stock, and (2) ownership of its equity securities by management is incorporated by reference to the material under the heading "Stock Ownership" in the 2008 Proxy Statement.

The following table provides information with respect to compensation plans under which our common stock is authorized for future issuance:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights <sup>(1)(2)</sup> (a)	Weighted-average exercise price of outstanding options, warrants and rights <sup>(1)(2)(3)</sup> (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) <sup>(1)(2)</sup> (c)
Equity compensation plans approved by security holders	1,966,657	\$12.16	1,558,821
Equity compensation plans not approved by security holders		n/a	
Total	1,966,657	\$12.16	1,558,821

<sup>(1)</sup> Shares indicated relate to common stock issuable upon exercise of options awarded under the 1991 Employee Stock Option Plan and upon exercise of options or the vesting of performance units awarded under the 2000 Stock Incentive Plan.

<sup>(2)</sup> Table excludes options with respect to 116,200 shares granted under stock option plans of Mosinee Paper Corporation as of December 17, 1997 (the date of the merger between Wausau Paper Mills Company and Mosinee Paper Corporation) at a weighted-average exercise price of \$11.58. No additional options will be granted pursuant to the former Mosinee Paper Corporation stock-option plans.

<sup>(3)</sup> The exercise price calculation is based only on outstanding options to purchase 1,885,424 shares. Shares issuable pursuant to performance units have no exercise price.

## **Beneficial Ownership**

Information relating to security ownership of certain beneficial owners and management is incorporated into this Form 10-K by this reference to the disclosure in the 2008 Proxy Statement beginning under the caption **Stock Ownership**.

## **Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS**

Information relating to certain relationships and related transactions with our directors and officers and the independence of our directors is incorporated into this Form 10-K by this reference to the disclosure in the 2008 Proxy Statement under the subcaption **Corporate Governance Review, Approval, or Ratification of Related Party Transactions** and **Corporate Governance Director Independence**.

**Item 14. PRINCIPAL ACCOUNTING FEES AND SERVICES**

Information relating to the fees and services of our principal accountant is incorporated into this Form 10-K by this reference to the disclosure in the 2008 Proxy Statement under the subcaption Report of the Audit Committee and Related Matters Independent Auditor and Fees, and Report of the Audit Committee and Related Matters Audit Committee Pre-Approval Policies.

**PART IV**
