NOTES TO PORTFOLIO OF INVESTMENTS - (UNAUDITED)

FIRST TRUST/ABERDEEN GLOBAL OPPORTUNITY INCOME FUND
MARCH 31, 2005

1. VALUATION AND INVESTMENT PRACTICES

PORTFOLIO VALUATION:

The net asset value ("NAV") of the Common Shares of the First Trust/Aberdeen Global Opportunity Income Fund (the "Fund") is computed based upon the value of the Fund's portfolio and other assets. The NAV is determined as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets for those securities. The Fund calculates NAV per Common Share by subtracting the Fund's liabilities (including accrued expenses, dividends payable and any borrowings of the Fund) and the liquidation value of any outstanding Preferred Shares from the Fund's Managed Assets (the value of the securities and other investments the Fund holds plus cash or other assets, including interest accrued but not yet received) and dividing the result by the total number of Common Shares outstanding.

The Fund's investments are valued daily at market value, or in the absence of market value, with respect to any portfolio securities, at fair value in accordance with valuation procedures adopted by the Board of Trustees. A majority of the Fund's assets are valued using market information supplied by third parties. In addition, structured products, including currency-linked notes, credit-linked notes as well as interest rate swaps and credit default swaps, are valued using a pricing service or quotes provided by the selling dealer or financial institution. In the event that market quotations are not readily available, the pricing service does not provide a valuation for a particular asset, or the valuations are deemed unreliable, or if events occurring after the close of the principal markets for particular securities (e.g., domestic debt and foreign securities), but before the Fund values its assets, would materially affect NAV, First Trust Advisors L.P. may use a fair value method to value the Fund's securities and investments. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Fund's Board of Trustees, in accordance with the provisions of the Investment Company Act of 1940.

FOREIGN CURRENCY:

The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at the exchange rates prevailing at the end of the period.

Purchases and sales of investment securities are translated on the respective dates of such transactions. Unrealized gains and losses which result from changes in foreign currency exchange rates have been included in the unrealized appreciation/(depreciation) of investments and net other assets and liabilities. Net realized foreign currency gains and losses include the effect of changes in exchange rates between trade date and settlement date on investment security transactions and foreign currency transactions. The portion of foreign currency gains and losses related to fluctuations in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gains and losses on investment securities sold.

SECURITIES TRANSACTIONS:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date; interest income is not accrued until settlement date. The Fund instructs the custodian to segregate assets of the Fund with a current value at least equal to the amount of its when-issued purchase commitments.

2. UNREALIZED APPRECIATION/(DEPRECIATION)

As of March 31, 2005, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$403,919 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$7,300,073.
