Cash flows from investing activities under U.S. GAAP	(4,032)	5,503	(5,418)	3,721

a) Exploration costs

Resource property costs and related exploration expenditures are capitalized in accordance with Canadian GAAP. For U.S. GAAP purposes, the Company expenses, as incurred, the exploration costs relating to unproven mineral properties. When proven and probable reserves are determined for a property and a feasibility study prepared, then subsequent exploration and development costs of the property would be capitalized. The capitalized costs of such properties would then be measured periodically for recoverability of carrying values under Statement of Financial Accounting Standards (SFAS) No. 144.

b) Available for sale securities

Under U.S. GAAP, securities that are available for sale are recorded at fair value and unrealized gains or losses are part of comprehensive income. Under Canadian GAAP, there is no adjustment made for unrealized gains.

c) Comprehensive income

In addition to net income, comprehensive income includes all changes in equity during a period except those resulting from transactions with shareholders. Such items would include the cumulative unrecognized changes in fair value of securities that are available for sale.

d) Flow-through shares

In October 2004 the Company issued by way of private placement 1,980,200 flow-through common shares at \$10.10 per share. The Company received a net premium to market on this issuance of \$2,496,000 which was recorded in share capital as part of the transaction. For U.S. GAAP purposes the proceeds should be allocated between the offering of the shares and the sale of tax benefits when the shares are offered. The allocation is

made based on the difference between the quoted price of the shares and the amount the investor pays for the flow-through shares. A future income tax liability is recognized for the premium paid by the investors.

Upon renouncing the income tax deductions in 2005, the Company recorded a future income tax liability with a corresponding reduction in share capital under Canadian GAAP. For U.S. GAAP purposes the difference between the future income tax liability on renunciation and the premium is recorded as a future income tax expense.
