Media Release

**Syngenta receives registration for innovative seed treatment CRUISER®
in Germany**

Basel, Switzerland, 9 March 2004

Syngenta announced today that its innovative seed treatment insecticide CRUISER® has received registration in Germany. German corn, oil seed rape and sugar beet growers will now be able to benefit from improved insect control. Treating seeds with CRUISER® has been shown to increase crop quality and improve yields by aiding faster germination and more vigorous growth.

CRUISER® is one of the most significant growth products from Syngenta with a sales increase of over 50 percent to \$88 million in 2003. Combined sales in 2003 of the CRUISER® and ACTARA® product family were \$221 million. CRUISER® is now registered in 66 countries on more than 15 crops and is successfully used on corn in the US, soybeans in Brazil and oil seed rape in Canada.

CRUISER® uniquely combines unsurpassed biological performance with environmental safety, said John Atkin, Chief Operating Officer of Syngenta Crop Protection. With the successful introduction of CRUISER® in major markets like Germany, Syngenta is rapidly becoming a leader in seed treatment and has significantly contributed to the growth of this sector in recent years.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection, and ranks third in the high-value commercial seeds market. Sales in 2003 were approximately \$6.6 billion. Syngenta employs some 19'000 people in over 90 countries. Syngenta is listed on the Swiss stock exchange (SYNN) and in New York (SYT). Further information is available at www.syngenta.com.
