Non-Vested Stock Awards

The Company grants non-vested stock awards to certain directors, officers and employees under the equity incentive plan. The grantees of the non-vested stock awards are entitled to receive all dividends and other distributions paid with respect to the common shares of the Company underlying such non-vested stock awards at the time such dividends or distributions are paid to holders of common shares.

On July 14, 2006 the Company granted 175,000 non-vested stock awards to an officer of the Company. The stock awards were issued at \$6.16 per share and are being expensed over their estimated service period of five years. Compensation expense recognized for these non-vested stock awards was approximately \$65,000 for the three months ended September 30, 2006.

The Company recognized compensation expense for outstanding non-vested stock awards over their vesting periods for an amount equal to the fair value of the non-vested stock awards at grant date. As of September 30, 2006 there was \$3.3 million of total unrecognized compensation cost related to non-vested stock awards granted under the equity incentive plan. That cost is expected to be recognized over a weighted-average period of 3.4 years

The Company recorded a cumulative effect of a change in accounting principle, as a result of the adoption of SFAS No. 123(R), in the amount of \$46,000 as of January 1, 2006 to reflect the change in accounting for forfeitures. Results for prior periods have not been restated.

The following table summarizes the activity relating to the Company's non-vested stock awards for the nine months ended September 30, 2006:

	Number of Non-Vested Stock Awards	Weighted Average Grant Date Fair Value
Non-vested at January 1, 2006	469,837	\$ 8.02
Granted	390,000	6.15
Vested	(269,493)	8.63
Forfeited	(8,001)	7.18
Non-vested at September 30, 2006	582,343	\$ 6.51

Origen Financial, Inc.

Notes to Consolidated Financial Statements (Unaudited)

Note 9 Derivative Instruments and Hedging Activities

In connection with the Company's strategy to mitigate interest rate risk and variability in cash flows on its securitizations and anticipated securitizations the Company uses derivative financial instruments such as interest rate swap contracts. It is not the Company's policy to use derivatives to speculate on interest rates. These derivative instruments are intended to provide income and cash flow to offset potential increased interest expense and cash flow under certain interest rate environments. In accordance with Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities, the derivative financial instruments are reported on the consolidated balance sheet at their fair value.

The Company documents the relationships between hedging instruments and hedged items, as well as its risk management objectives and strategies for undertaking various hedge transactions at the inception of the hedging transaction. This process includes linking derivatives to specific liabilities on the consolidated balance sheet. The Company also assesses, both at the inception of the hedge and on an ongoing basis, whether the derivatives used in hedging transactions are highly effective in offsetting changes in cash flows of the hedged items. When it is determined that a derivative is not highly effective as a hedge or that it has ceased to be a highly effective hedge, the Company discontinues hedge accounting.

When hedge accounting is discontinued because the Company determines that the derivative no longer qualifies as a hedge, the derivative will continue to be recorded on the consolidated balance sheet at its fair value. Any change in the fair value of a derivative no longer qualifying as a hedge is recognized in current period earnings. For terminated cash flow hedges or cash flow hedges that no longer qualify as highly effective, the effective position previously recorded in accumulated other comprehensive income is recorded in earnings when the hedged item affects earnings.

Cash Flow Hedge Instruments

The Company evaluates the effectiveness of derivative financial instruments designated as cash flow hedge instruments against the interest payments related to securitizations or anticipated securitization in order to ensure that there remains a high correlation in the hedge relationship and that the hedge relationship remains highly effective. To hedge the effect of interest rate changes on cash flows or the overall variability in cash flows, which affect the interest payments related to its securitization financing being hedged, the Company uses derivatives designated as cash flow hedges under SFAS No. 133. Once the hedge relationship is established, for those derivative instruments designated as qualifying cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income during the current period, and reclassified into earnings as part of interest expense in the periods during which the hedged transaction affects earnings pursuant to SFAS No. 133. The ineffective portion of the derivative instrument is recognized in earnings in the current period and is included in interest expense for derivatives hedging future interest payments related to recognized liabilities and non-interest income for derivatives hedging future interest payments related to forecasted liabilities. No component of the derivative instrument's gain or loss has been excluded from the assessment of hedge effectiveness. During both the three and nine months ended September 30, 2006, the Company recognized a loss of approximately \$11,000 in interest expense and \$1,000 in other income due to the ineffective portion of these hedges. No ineffectiveness was recognized for the three and nine months ended September 30, 2005.

Table of Contents

Origen Financial, Inc.

Notes to Consolidated Financial Statements (Unaudited)

Note 9 Derivative Instruments and Hedging Activities (Continued)

For the three and nine months ended September 30, 2006, the Company reclassified a net gain of approximately \$2,000 and \$9,000, respectively, attributable to previously terminated cash flow hedges, which has been recorded as a reduction of interest expense. For the three and nine months ended September 30, 2005, the Company reclassified net losses of approximately \$114,000 and \$273,000, respectively, attributable to previously terminated cash flow hedges, which were recorded as an increase in interest expense. As of September 30, 2006, net unrealized losses of approximately \$1.0 million related to cash flow hedges were included in accumulated other comprehensive income. The Company expects to reclassify net losses of approximately \$37,000 from accumulated other comprehensive income into earnings during the next twelve months. The remaining amounts in accumulated other comprehensive income will be reclassified into earnings by March 2020. The fair value of the Company's derivatives accounted for as cash flow hedges at September 30, 2006 approximated a liability of \$3.4 million and is included in other liabilities.

Derivatives Not Designated as Hedge Instruments

As of September 30, 2006, the Company had a certain open interest rate swap contract which is not designated as a hedge. This interest rate swap contract was entered into in connection with another interest rate swap contract which is being accounted for as a cash flow hedge for the purpose of hedging the variability in expected cash flows from the variable-rate debt related to the Company's 2006-A securitization. The change in the fair value of the interest rate swap contract not designated and documented as a hedge is recorded through earnings each period and is included in non-interest income. During both the three and nine months ended September 30, 2006, the Company recognized net gains of approximately \$3,000 related to the change in fair value of this contracts. The fair value of this contracts at September 30, 2006 was approximately \$3,000 and is included in other assets. The Company did not have any derivatives not designated as hedge instruments during the three and nine months ended September 30, 2005.

Note 10 Stockholders Equity

On August 7, 2006, the Company declared a dividend of \$0.03 per common share payable to holders of record as of August 18, 2006. On August 31, 2006 those dividends were paid and totaled approximately \$773,000.

Note 11 Subsequent Events

On November 2, 2006, the Company declared a dividend of \$0.03 per common share payable to holders of record as of November 13, 2006. Payment of the dividend is planned for November 30, 2006.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q contains various forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and we intend that such forward-looking statements will be subject to the safe harbors created thereby. For this purpose, any statements contained in this Form 10-Q that relate to prospective events or developments are deemed to be forward-looking statements. Words such as believes, forecasts, anticipates, intends, plans, expects, similar expressions are intended to identify forward-looking statements. These forward-looking statements reflect our current views with respect to future events and financial performance, but involve known and unknown risks and uncertainties, both general and specific to the matters discussed in this Form 10-Q. These risks and uncertainties may cause our actual results to be materially different from any future results expressed or implied by such forward-looking statements. Such risks and uncertainties include:

the performance of our manufactured housing loans;

our ability to borrow at favorable rates and terms;

the supply of manufactured housing loans;

interest rate levels and changes in the yield curve;

our ability to use hedging strategies to mitigate our exposure to changing interest rates;

changes in, and the costs associated with complying with, federal, state and local regulations, including consumer finance and housing regulations;

applicable laws, including federal income tax laws;

general economic conditions in the markets in which we operate;

and those other risk factors discussed under the heading entitled "Risk Factors" and elsewhere in our Annual Report on Form 10-K for the year ended December 31, 2005. All forward-looking statements included in this document are based on information available to us on the date of this Form 10-Q. We do not intend to update or revise any forward-looking statements that we make in this document or other documents, reports, filings or press releases, whether as a result of new information, future events or otherwise.

The following discussion and analysis of our consolidated financial condition and results of operations as of and for the periods ended September 30, 2006 in this quarterly report on Form 10-Q should be read in conjunction with our Consolidated Financial Statements and the Notes to Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2005.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Overview

In October 2003, we began operations upon the completion of a private placement of \$150 million of our common stock to certain institutional and accredited investors. In February, 2004, we completed another private placement of \$10 million of our common stock to one institutional investor. In connection with and as a condition to the October 2003 private placement, we acquired all of the equity interests of Origen Financial L.L.C. We also took steps to qualify Origen Financial, Inc. as a REIT. In the second quarter of 2004, we completed the initial public offering of our common stock. Currently, most of our operations are conducted through Origen Financial L.L.C., our wholly-owned subsidiary. We conduct the rest of our business operations through our other wholly-owned subsidiaries, including taxable REIT subsidiaries, to take advantage of certain business opportunities and ensure that we comply with the federal income tax rules applicable to REITs.

Recent Developments

On August 25, 2006, we completed our 2006-A securitization of approximately \$224.2 million in principal balance of manufactured housing loans. The securitization was accounted for as a financing. As part of the securitization we issued approximately \$200.6 million in notes payable.

Critical Accounting Policies

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP).

The financial information contained within our statements is, to a significant extent, financial information that is based on approximate measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset, or relieving a liability. In some instances we use a discount factor to determine the present value of assets and liabilities. A change in the discount factor could increase or decrease the values of those assets and liabilities and such changes would result in either a beneficial or adverse impact to our financial results. We use historical loss factors, adjusted for current conditions, to determine the inherent loss that may be present in our loan portfolio. Other estimates that we use are fair value of derivatives and expected useful lives of our depreciable assets. We value our derivative contracts at fair value using either readily available, market quoted prices or from information that can be extrapolated to approximate a market price. Additionally, as a result of the adoption of Statement of Financial Accounting Standards (SFAS) No. 123(R), Share-Based Payment, we make estimates related to future forfeitures of unvested stock awards and stock options. Any change in the estimates of future forfeitures of unvested stock awards and stock options could increase or decrease compensation expense. We are subject to US GAAP that may change from one previously acceptable method to another method. Although the economics of our transactions would be the same, the timing of events that would impact our transactions could change.

Understanding our accounting policies is fundamental to understanding our consolidated financial position and consolidated results of operations. Details regarding our critical accounting policies are described fully in Note 1 in the Notes to Consolidated Financial Statements in our 2005 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Results of Operations****Comparison of the three months ended September 30, 2006 and 2005.****Net Income**

Net income increased \$7.9 million to \$1.8 million for the three months ended September 30, 2006 compared to a net loss of \$6.1 million for the same period in 2005. The increase is the result of an increase of \$5.2 million in net interest income after loan losses and impairment, an increase of \$0.5 million in non-interest income and a decrease in non-interest expenses of \$2.2 million as described in more detail below.

Interest Income

Interest income increased 22.1% to approximately \$18.8 million compared to approximately \$15.4 million. This increase resulted primarily from an increase of \$181.8 million or 24.1% in average interest earning assets from \$753.3 million to \$935.1 million. The increase in interest earning assets includes an increase of approximately \$181.0 million in average manufactured housing loans. The weighted average net interest rate on the loan receivable portfolio decreased to 8.0% from 8.2%.

Interest expense increased \$3.8 million, or 49.4%, to \$11.5 million from \$7.7 million. The majority of our interest expense relates to interest on our loan funding facilities. Average debt outstanding on our loan funding facilities increased \$181.4 million to \$751.7 million compared to \$570.3 million, or 31.8%. The average interest rate on total debt outstanding increased from 5.2% to 5.9%. The higher average interest rate for the three months ended September 30, 2006 compared to the three months ended September 30, 2005 was primarily due to increases in the base LIBOR rate.

The following table presents information relative to the average balances and interest rates of our interest earning assets and interest bearing liabilities for the three months ended September 30 (dollars in thousands):

	2006			2005		
	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate
Interest earning assets:						
Manufactured housing loans ¹	\$ 877,190	\$ 17,637	8.04%	\$ 696,151	\$ 14,329	8.23%

- 1 Net of loan servicing fees.
- 2 Includes facility fees.
- 3 Amount is calculated as annualized net interest income divided by total average interest earning assets.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following table sets forth the changes in the components of net interest income for the three months ended September 30, 2006 compared to the three months ended September 30, 2005 (in thousands). The changes in net interest income between periods have been reflected as attributable to either volume or rate changes. For the purposes of this table, changes that are not solely due to volume or rate changes are allocated to rate changes.

	Volume	Rate	Total
Interest earning assets:			
Manufactured housing loans	\$ 3,726	\$ (418)	\$ 3,308
Investment securities	(2)	(34)	(36)
Other	5	122	127
 Total interest income	 \$ 3,729	 \$ (330)	 \$ 3,399
Interest bearing liabilities:			
Loan funding facilities	\$ 2,364	\$ 1,280	\$ 3,644
Repurchase agreements	(7)	105	98
Notes payable servicing advances	(7)	2	(5)
 Total interest expense	 \$ 2,350	 \$ 1,387	 \$ 3,737
 Decrease in net interest income			 \$ (338)

Non-interest Income

Non-interest income is primarily made up of loan servicing related revenue including loan servicing fees, late charges, commissions on insurance and commitment fees from third-party loan originations. Such revenue increased \$0.5 million, or 12.8%, to \$4.4 million compared to \$3.9 million. This increase was primarily the result of an increase in the average serviced loan portfolio on which servicing fees are collected of approximately \$78.7 million, or 5.3%, from \$1.49 billion to \$1.57 billion.

Provision for Losses

The provision for loan losses decreased 76.1% to \$1.6 million from \$6.7 million. The provision for the three months ended September 30, 2005 included approximately \$3.5 million related to the effects of Hurricane Katrina and Hurricane Rita and approximately \$0.8 million of losses related to the charge-off of loans repurchased from Vanderbilt Mortgage and Finance, Inc. (Vanderbilt) under a previous repurchase agreement. Net charge-offs against the allowance for loan losses decreased 23.1% to \$2.0 million for the three months ended September 30, 2006 compared to \$2.6 million for three months ended September 30, 2005. As a percentage of average loans receivable, net charge-offs, on an annualized basis, decreased to 0.9% compared to 1.5%. We expect net charge-offs as a percentage of average outstanding principal balance to continue to decrease in the future due to the fact that the owned portfolio of loans at September 30, 2006 has a larger concentration of loans originated after December 31, 2001 than was the case for the owned portfolio at September 30, 2005. A change to our underwriting practices and credit scoring model in 2002 has resulted in higher credit quality of loans originated since 2002.

No impairments related to previously purchased loan pools were recognized during the third quarter of 2006. An impairment of \$0.4 million in the carrying value of a previously purchased loan pool was recognized during the third quarter of 2005.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Non-interest Expenses

Personnel expenses decreased approximately \$0.2 million, or 3.4%, to \$5.7 million compared to \$5.9 million. The decrease is primarily the result of a \$0.3 million decrease in stock compensation expense offset by a \$0.1 million increase in salary expense.

Loan origination and servicing expenses increased approximately 8.4% to \$402,000 compared to \$371,000. The change is primarily a result of an increase in custodial and other servicing fees related to the general growth of our servicing portfolio.

Write-down of residual interest decreased \$0.7 million. During the three months ended September 30, 2005 we wrote-off our residual interest in the 2002-A securitization as a result of the effects of Hurricane Katrina and Hurricane Rita.

Loss on recourse buyout decreased \$0.9 million. During the three months ended September 30, 2005 we bought out our recourse obligation with Vanderbilt.

Other operating expenses, which consist of occupancy and equipment, professional fees, travel and entertainment and miscellaneous expenses decreased approximately \$0.4 million to \$2.2 million or 15.4%, compared to \$2.6 million. This decrease is primarily the result of a \$0.2 million decrease in professional fees, a \$0.1 million decrease in travel and entertainment expenses and a \$0.1 million decrease in other miscellaneous expenses.

Comparison of the nine months ended September 30, 2006 and 2005.

Net Income

Net income increased \$8.5 million to \$4.9 million for the nine months ended September 30, 2006 compared to a net loss of \$3.6 million for the same period in 2005. The increase is the result of an increase of \$5.2 million in net interest income after loan losses and impairment, an increase of \$2.2 million in non-interest income and a decrease in non-interest expenses of \$1.1 million as described in more detail below.

Interest Income

Interest income increased 25.2% to approximately \$54.1 million compared to approximately \$43.2 million. This increase resulted primarily from an increase of \$186.8 million or 26.7% in average interest earning assets from \$699.4 million to \$886.2 million. The increase in interest earning assets includes an increase of approximately \$185.4 million in average manufactured housing loans. The weighted average net interest rate on the loan receivable portfolio decreased to 8.2% from 8.3%.

Interest expense increased \$11.5 million, or 58.1%, to \$31.3 million from \$19.8 million. The majority of our interest expense relates to interest on our loan funding facilities. Average debt outstanding on our loan funding facilities increased \$187.9 million to \$705.4 million compared to \$517.5 million, or 36.3%. The average interest rate on total debt outstanding increased from 4.9% to 5.7%. The higher average interest rate for the nine months ended September 30, 2006 compared to the nine months ended September 30, 2005 was primarily due to increases in the base LIBOR rate.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following table presents information relative to the average balances and interest rates of our interest earning assets and interest bearing liabilities for the nine months ended September 30 (dollars in thousands):

	2006			2005		
	Average Balance	Interest	Yield/ Rate	Average Balance	Interest	Yield/ Rate

Repurchase agreements	36	337	373
Notes payable servicing advances	(10)	5	(5)
Total interest expense	\$ 6,965	\$ 4,558	\$ 11,523

Decrease in net interest income \$ (647)

Non-interest Income

Non-interest income is primarily made up of loan servicing related revenue including loan servicing fees, late charges, commissions on insurance and commitment fees from third-party loan originations. Such revenue increased \$2.2 million, or 20.8%, to \$12.8 million compared to \$10.6 million. This increase was primarily the result of an increase in the average serviced loan portfolio on which servicing fees are collected of approximately \$82.5 million, or 5.7%, from \$1.46 billion to \$1.54 billion.

- 1 Net of loan servicing fees.
- 2 Includes facility fees.
- 3 Amount is calculated as annualized net interest income divided by total average interest earning assets.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Provision for Losses

The provision for loan losses decreased 52.9% to \$4.9 million from \$10.4 million. The provision for the nine months ended September 30, 2006 included approximately \$3.5 million related to the effects of Hurricane Katrina and Hurricane Rita and approximately \$0.8 million of losses related to the charge-off of loans repurchased from Vanderbilt under a previous repurchase agreement. Net charge-offs against the allowance for loan loss decreased 16.7% from \$7.8 million, to \$6.5 million. As a percentage of average loans receivable, net charge-offs, on an annualized basis, decreased to 1.0% compared to 1.6%. We expect net charge-offs as a percentage of average outstanding principal balance to continue to decrease in the future due to the fact that the owned portfolio of loans at September 30, 2006 has a larger concentration of loans originated after December 31, 2001 than was the case for the owned portfolio at September 30, 2005. A change to our underwriting practices and credit scoring model in 2002 has resulted in higher credit quality of loans originated since 2002.

Non-interest Expenses

Personnel expenses increased approximately \$0.9 million, or 5.3%, to \$18.0 million compared to \$17.1 million. The increase is primarily the result of a \$0.7 million increase in annual performance bonuses and a \$0.7 million increase in salaries and temporary office staffing expenses, offset by a decrease of \$0.5 million in stock compensation expenses.

Write-down of residual interest decreased \$0.7 million. During the nine months ended September 30, 2005 we wrote-off our residual interest in the 2002-A securitization as a result of the effects of Hurricane Katrina and Hurricane Rita.

Loss on recourse buyout decreased \$0.9 million. During the nine months ended September 30, 2005 we bought out our recourse obligation with Vanderbilt.

Other operating expenses, which consist of occupancy and equipment, professional fees, travel and entertainment and miscellaneous expenses decreased approximately \$0.3 million to \$6.3 million or 4.5%, compared to \$6.6 million. This decrease is primarily the result of a \$0.1 million decrease in professional fees, a \$0.1 million decrease in telephone and data communication expenses and a \$0.1 million decrease in other miscellaneous expenses.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**
Receivable Portfolio and Asset Quality

Net loans receivable outstanding increased 17.8% to \$904.9 million at September 30, 2006 compared to \$768.4 million at December 31, 2005. Loans receivable are comprised of installment contracts and mortgages collateralized by manufactured houses and in some instances real estate.

New loan originations for the three months ended September 30, 2006 decreased 0.7% to \$70.9 million compared to \$71.4 million for the three months ended September 30, 2005. We additionally processed \$15.7 million and \$11.1 million in loans originated under third-party origination agreements for the three months ended September 30, 2006 and 2005, respectively. New loan originations for the nine months ended September 30, 2006 increased 6.5% to \$210.2 million compared to \$197.4 million for the nine months ended September 30, 2005. We additionally processed \$35.9 million and \$23.1 million in loans originated under third-party origination agreements for the nine months ended September 30, 2006 and 2005, respectively.

During the three and nine months ended September 30, 2006, we purchased \$4.2 million in loans from Sun Home Services, Inc., a subsidiary of Sun Communities, Inc. (Sun Communities). The purchase price approximated fair value. Sun Communities owns approximately 20% of our outstanding common stock. We did not purchase any loans from Sun Communities or its affiliates during the three and nine months ended September 30, 2005.

The following table sets forth the average loan balance, weighted average loan coupon and weighted average initial term of the loan receivable portfolio (dollars in thousands):

	September 30, 2006	December 31, 2005
Principal balance of loans receivable	\$ 912,596	\$ 781,650
Number of loans receivable	19,580	17,277
Average loan balance	\$ 47	\$ 45
Weighted average loan coupon ¹	9.51%	9.56%
Weighted average initial term	20 years	20 years

Delinquency statistics for the manufactured housing loan portfolio are as follows (dollars in thousands):

	September 30, 2006			December 31, 2005		
	No. of Loans	Principal Balance	% of Portfolio	No. of Loans	Principal Balance	% of Portfolio
Days delinquent						
31-60	240	\$8,701	1.0%	215	\$8,182	1.0%
61-90	84	2,991	0.3%	68	2,561	0.3%
Greater than 90	147	5,600	0.6%	192	7,480	1.0%

We define non-performing loans as those loans that are 90 or more days delinquent in contractual principal payments. For the three and nine months ended September 30, 2006 the average outstanding principal balance of non-performing loans was approximately \$5.2 million and \$5.8 million, respectively, compared to \$7.0 million for both the three and nine months ended September 30, 2005. Non-performing loans as a percentage of average loans receivable decreased to 0.6% and 0.7% for the three and nine months ended September 30, 2006 as compared to 1.0% and 1.1% for the three and nine months ended September 30, 2005, primarily as a result of higher average balances and improved credit quality in the loan portfolio.

At September 30, 2006 we held 124 repossessed houses owned by us compared to 162 houses at December 31, 2005. The book value of these houses, including repossession expenses, based on the lower of cost or market value was approximately \$2.6 million at September 30, 2006 compared to \$3.5 million at December 31, 2005, a decrease of \$0.9 million or 25.7%.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The allowance for loan losses decreased \$1.6 million to \$8.4 million at September 30, 2006 from \$10.0 million at December 31, 2005. Despite the 18.7% increase in the gross loans receivable balance, net of loans accounted for under the provisions of the American Institute of Certified Public Accountants (AICPA) Statement of Position 03-3 (SOP 03-3), Accounting for Certain Loans or Debt Securities Acquired in a Transfer, the allowance for loan losses decreased 16.0% due to improvements in delinquency rates and net charge-offs. Loans delinquent over 60 days decreased \$1.4 million or 14.0% from \$10.0 million at December 31, 2005 to \$8.6 million at September 30, 2006. The allowance for loan losses as a percentage of gross loans receivable, net of loans accounted for under SOP 03-3, was approximately 0.95% at September 30, 2006 compared to approximately 1.35% at December 31, 2005. Net charge-offs were \$2.0 million and \$6.5 million for the three and nine months ended September 30, 2006, respectively, compared to \$2.6 million and \$7.8 million for the three and nine months ended September 30, 2005.

Our allowance for loan losses includes amounts provided for inherent losses resulting from the damage inflicted by Hurricane Katrina and Hurricane Rita in 2005. Observed trends in the performance of the identified loans through September 30, 2006 and continuing through November 1, 2006, including delinquency rates, losses and recovery percentages, have been more favorable than management's initial expectations. However, there can be no assurance that these trends will continue. At January 1, 2006 our allowance included approximately \$3.4 million of estimated losses related to the effects of Hurricane Katrina and Hurricane Rita. As a result of the more favorable trends, we have reduced a portion of the allowance established for estimated hurricane losses by approximately \$0.6 million and \$1.6 million during the three and nine months ended September 30, 2006. We will continue to gather and interpret data from the affected areas and compare such information to our estimates. Amounts are refined as deemed appropriate.

Changes to our underwriting practices, processes, credit scoring models, systems and servicing techniques in 2002 have resulted in demonstrably superior performance by loans originated in and subsequent to 2002 as compared to loans originated by our predecessors prior to 2002. The pre-2002 loans, despite representing a diminishing percentage of our owned loan portfolio, have had a disproportionate impact on our financial performance.

The following tables indicate the impact of such legacy loans:

Loan Pool Unpaid Principal Balance (dollars in thousands)¹

	2001 and prior	2002 and subsequent
At December 31, 2005		
Dollars	\$ 56,622	\$ 732,033
Percentage of total	7.2%	92.8%
At September 30, 2006		
Dollars	\$ 48,475	\$ 868,071
Percentage of total	5.3%	94.7%

Static Pool Performance (dollars in thousands)¹

	2001 and prior	2002 and subsequent
Nine months ended September 30, 2006		
Dollars defaulted	\$ 4,055	\$ 9,819
Net recovery percentage	37.1%	48.4%
Net losses	\$ 3,495	\$ 5,507

¹ Includes owned portfolio, repossessed inventory and loans sold with recourse.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

While representing less than 6% of the owned loan portfolio at September 30, 2006, the pre-2002 loans accounted for approximately 29% of the defaults during the nine months ended September 30, 2006. Additionally, recovery rates were substantially lower for the pre-2002 loans leading to higher losses as compared to loans from 2002 and later. Management believes that as these loans become a smaller percentage of the owned loan portfolio, the negative impact on earnings will diminish.

Our asset quality statistics for the quarter ended September 30, 2006 reflect our continued emphasis on the credit quality of our borrowers and the improved underwriting and origination practices we have put into place. Continued improvement in delinquency statistics and recovery rates are expected to result in lower levels of non-performing assets and net charge-offs. Long term, lower levels of non-performing assets and net charge-offs should have a positive effect on earnings through decreases in the provision for loan losses and servicing expenses as well as increases in net interest income.

Liquidity and Capital Resources

We require capital to fund our loan originations, acquire manufactured housing loans originated by third parties and expand our loan servicing operations. At September 30, 2006 we had approximately \$3.3 million in available cash and cash equivalents. As a REIT, we are required to distribute at least 90% of our REIT taxable income (as defined in the Internal Revenue Code) to our stockholders on an annual basis. Therefore, as a general matter, it is unlikely we will have any substantial cash balances that could be used to meet our liquidity needs. Instead, these needs must be met from cash provided from operations and external sources of capital. Historically, we have satisfied our liquidity needs through cash generated from operations, sales of our common and preferred stock, borrowings on our credit facilities and securitizations.

Cash provided by operating activities during the nine months ended September 30, 2006, totaled \$13.3 million versus \$13.6 million for the nine months ended September 30, 2005. Cash used in investing activities was \$142.6 million for the nine months ended September 30, 2006 versus \$176.7 million for the nine months ended September 30, 2005. Cash used to originate and purchase loans decreased 1.0%, or \$2.1 million, to \$214.5 million for the nine months ended September 30, 2006 compared to \$216.6 million for the nine months ended September 30, 2005. The change is a result of a decrease of approximately \$26.6 million in manufactured housing loan purchases offset by an increase in origination volume due to increased market share resulting from our focus on customer service and the use of technology to deliver our products and services. Principal collections on loans totaled \$64.0 million for the nine months ended September 30, 2006 as compared to \$41.3 million for the nine months ended September 30, 2005, an increase of \$22.7 million, or 55.0%. The increase in collections is primarily related to the increase in the average outstanding loan portfolio balance, which was \$828.3 million for the nine months ended September 30, 2006 compared to \$642.9 million for the nine months ended September 30, 2005, in addition to improved credit quality and decreased delinquency as a percentage of outstanding loan receivable balance.

The primary source of cash during the nine months ended September 30, 2006 was our 2006-A securitized financing transaction completed in August 2006. We securitized approximately \$224.2 million in principle balance of manufactured housing loans, which was funded by issuing bonds of approximately \$200.6 million. Proceeds from the transaction totaled approximately \$200.6 million, of which approximately \$199.2 million was used to reduce the aggregate balance of notes outstanding under our Citigroup warehouse financing facility.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Continued access to the securitization market is very important to our business. The proceeds from successful securitization transactions generally are applied to paying down our short-term credit facilities giving us renewed borrowing capacity to fund new loan originations. Numerous factors affect our ability to complete a successful securitization, including factors beyond our control. These include general market interest rate levels, the shape of the yield curve and spreads between rates on U.S. Treasury obligations and securitized bonds, all of which affect investors demand for securitized debt. In the event these factors are unfavorable our ability to successfully complete securitization transactions is impeded and our liquidity and capital resources are affected negatively. There can be no assurance that current favorable conditions will continue or that unfavorable conditions will not return.

We currently have a short term securitization facility used for warehouse financing with Citigroup. Under the terms of the agreement, originally entered into in March 2003 and amended periodically, most recently in July 2006, we pledge loans as collateral and in turn we are advanced funds. The facility has a maximum advance amount of \$200 million at an annual interest rate equal to LIBOR plus a spread. Additionally, the facility includes a \$35 million supplemental advance amount that is collateralized by our residual interests in our securitizations. The facility matures on March 22, 2007. The outstanding balance on the facility was approximately \$61.0 million at September 30, 2006.

Additionally, we have four repurchase agreements with Citigroup. Three of the repurchase agreements are for the purpose of financing the purchase of investments in three asset backed securities with principal balances of \$32.0 million, \$3.1 million and \$3.7 million respectively. The fourth repurchase agreement is for the purpose of financing a portion of our interest in the 2004-B securitization with a principal balance of \$4.0 million. Under the terms of the agreements we sell our interest in the securities with an agreement to repurchase them at a predetermined future date at the principal amount sold plus an interest component. The securities are financed at an amount equal to 75% of their current market value as determined by Citigroup. Typically the repurchase agreements are rolled over for 30 day periods when they expire. The annual interest rates on the agreements are equal to LIBOR plus a spread. The repurchase agreements had outstanding principal balances of approximately \$16.8 million, \$1.7 million, \$2.1 million and \$3.0 million at September 30, 2006.

Under the terms of our revolving credit facility with JP Morgan Chase Bank, N.A., we can borrow up to \$5.0 million to fund required principal and interest advances on manufactured housing loans that we service for outside investors. Borrowings under the facility are repaid when we collect monthly payments made by borrowers under such manufactured housing loans. The bank's prime interest rate is payable on the outstanding balance. To secure the loan, we have granted JPMorgan Chase Bank, N.A. a security interest in substantially all our assets excluding securitized assets. The expiration date of the facility is December 31, 2006. The outstanding balance on the facility was approximately \$1.5 million at September 30, 2006.

In September 2005, the Securities and Exchange Commission declared effective our shelf registration statement on Form S-3 for the proposed offering, from time to time, of up to \$200 million of our common stock, preferred stock and debt securities. In addition to such debt securities, preferred stock and other common stock we may sell under the registration statement, we have registered for sale 1,540,000 shares of our common stock pursuant to a sales agreement that we have entered into with Brinson Patrick Securities Corporation. It is anticipated that these shares of common stock will be sold at the price of our common stock prevailing at the time of sale.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Our long-term liquidity and capital requirements consist primarily of funds necessary to originate and hold manufactured housing loans, acquire and hold manufactured housing loans originated by third parties and expand our loan servicing operations. We expect to meet our long-term liquidity requirements through cash generated from operations, but we will require external sources of capital, including sales of shares of our common stock, preferred stock, debt securities and third-party borrowings. We intend to continue to access the asset-backed securities market for the long-term financing of our loans in order to match the interest rate risk between our loans and the related long-term funding source. Our ability to meet our long-term liquidity needs depends on numerous factors, many of which are outside of our control. These factors include general capital market and economic conditions, general market interest rate levels, the shape of the yield curve and spreads between rates on U.S. Treasury obligations and securitized bonds, all of which affect investors' demand for equity and debt securities, including securitized debt securities.

Cash generated from operations, borrowings under our Citigroup facility, loan securitizations, borrowings against our securitized loan interests, convertible debt, equity interests or additional debt financing arrangements (either pursuant to our shelf registration statement on Form S-3 or otherwise) will enable us to meet our liquidity needs for at least the next twelve months depending on market conditions which may affect loan origination volume, loan purchase opportunities and the availability of securitizations. If market conditions require, loan purchase opportunities become available, or favorable capital opportunities become available, we may seek additional funds through additional credit facilities or additional sales of our common or preferred stock.

The risks associated with the manufactured housing business become more acute in any economic slowdown or recession. Periods of economic slowdown or recession may be accompanied by decreased demand for consumer credit and declining asset values. In the manufactured housing business, any material decline in collateral values increases the loan-to-value ratios of loans previously made, thereby weakening collateral coverage and increasing the size of losses in the event of default. Delinquencies, repossessions, foreclosures and losses generally increase during economic slowdowns or recessions. For our finance customers, loss of employment, increases in cost-of-living or other adverse economic conditions could impair their ability to meet their payment obligations. Higher industry inventory levels of repossessed manufactured houses may affect recovery rates and result in future impairment charges and provision for losses. In addition, in an economic slowdown or recession, servicing and litigation costs generally increase. Any sustained period of increased delinquencies, repossessions, foreclosures, losses or increased costs would adversely affect our financial condition, results of operations and liquidity.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

Market risk is the risk of loss arising from adverse changes in market prices and interest rates. Our market risk arises from interest rate risk inherent in our financial instruments. We are not currently subject to foreign currency exchange rate risk or commodity price risk.

The outstanding balance of our variable rate debt under which we paid interest at various LIBOR rates plus a spread, totaled \$281.9 million and \$173.5 million at September 2006 and 2005, respectively. If LIBOR increased or decreased by 1.0% during the nine months ended September 30, 2006 and 2005, we believe our interest expense would have increased or decreased by approximately \$1.3 million and \$1.1 million, respectively, based on the \$180.3 million and \$146.0 million average balance outstanding under our variable rate debt facilities for the nine months ended September 30, 2006 and 2005, respectively. We had no variable rate interest earning assets outstanding during the nine months ended September 30, 2006 or 2005.

The following table shows the contractual maturity dates of our assets and liabilities at September 30, 2006. For each maturity category in the table the difference between interest-earning assets and interest-bearing liabilities reflects an imbalance between re-pricing opportunities for the two sides of the balance sheet. The consequences of a negative cumulative gap at the end of one year suggests that, if interest rates were to rise, liability costs would increase more quickly than asset yields, placing negative pressure on earnings (dollars in thousands).

	Maturity				
	0 to 3 months	4 to 12 months	1 to 5 years	Over 5 years	Total
Assets					
Cash and equivalents	\$ 3,343	\$	\$	\$	\$ 3,343

Furniture, fixtures and equipment, net	206	619	2,475		3,300
Goodwill				32,277	32,277
Other assets	11,354	6,374	4,680	2,546	24,954
Total assets	\$ 60,505	\$ 96,606	\$ 365,809	\$ 501,226	\$ 1,024,146
Liabilities and Stockholders Equity					
Warehouse financing	\$ 15,255	\$ 45,763	\$	\$	\$ 61,018
Securitization financing	24,901	70,316	281,422	333,372	710,011
Repurchase agreements	23,582				23,582
Notes payable servicing advances	1,458				1,458
Other liabilities	20,579	356		4,672	25,607
Total liabilities	85,775	116,435	281,422	338,044	821,676
Preferred stock				125	125
Common stock				258	258
Additional paid-in-capital				219,437	219,437

Edgar Filing: DEUTSCHE BANK AKTIENGESELLSCHAFT - Form 424B2

Accumulated other comprehensive loss	(4)	(32)	177	(1,185)	(1,044)
Distributions in excess of earnings				(16,306)	(16,306)
Total stockholders equity	(4)	(32)	177	202,329	202,470
Total liabilities and stockholders equity	\$ 85,771	\$ 116,403	\$ 281,599	\$ 540,373	\$ 1,024,146
Interest sensitivity gap	\$ (25,266)	\$ (19,797)	\$ 84,210	\$ (39,147)	
Cumulative interest sensitivity gap	\$ (25,266)	\$ (45,063)	\$ 39,147		
Cumulative interest sensitivity gap to total assets	(2.47)%	(4.40)%	3.82%		

We believe the negative effect of a rise in interest rates is reduced by the anticipated securitization of our loans receivable, which in conjunction with our hedging strategies, fixes our cost of funds associated with the loans over the lives of such loans.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The following table shows our financial instruments that are sensitive to changes in interest rates and are categorized by contractual maturity at September 30, 2006, (dollars in thousands):

Table of Contents**Item 4. Controls and Procedures**

Our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of our disclosure controls and procedures are effective as of the end of the period covered by this report. This conclusion is based on an evaluation conducted under the supervision and with the participation of management. Disclosure controls and procedures are those controls and procedures which ensure that information required to be disclosed in our filings is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and regulations, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, in order to allow timely decisions regarding required disclosures.

Our management, including our Chief Executive Officer and Chief Financial Officer, has determined that during the period covered by this report there were no changes in our internal controls over financial reporting that materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.
