**ICICI Bank Ltd. 'BBB-/A-3' Ratings Affirmed; Outlook Stable; SACP Lowered To 'bbb-' On Weakening Asset Quality**

SINGAPORE (S&P Global Ratings) Aug. 5, 2016--S&P Global Ratings said today that it had affirmed its 'BBB-' long-term and 'A-3' short-term foreign currency issuer credit ratings on India-based **ICICI Bank Ltd.** The outlook on the long-term rating is stable. We also affirmed our issue ratings on the bank's outstanding senior unsecured notes and Basel II compliant tier 2 hybrid notes.

"We affirmed the ratings because we expect ICICI Bank to maintain its strong business position supported by its good business diversity, and its satisfactory capitalization and funding, despite weakening asset quality," said S&P Global Ratings credit analyst Amit Pandey.

We have lowered ICICI Bank's stand-alone credit profile (SACP) to 'bbb-' from 'bbb'. This reflects our view that the bank's asset quality will remain under pressure over the next 12 months. We have therefore revised our assessment of ICICI Bank's risk position to moderate from adequate.

We expect ICICI Bank's credit costs to remain high because of continued pressure on asset quality, given the tough operating conditions for capital intensive corporate sectors in India. About 53% of the bank's loans on a stand-alone basis are to the corporate and small and midsize enterprise segments. The rising stress in these exposures has led to an increase in the bank's consolidated gross nonperforming loan (NPL) ratio to 5.7% as of June 30, 2016, from 3.8% as of March 31, 2015. ICICI Bank's exposure to power, metal/mining, and rig companies is likely to continue to contribute to further slippages, in our view. These sectors have come under stress in the current business cycle. The bank's net standard restructured loans of Indian rupee (INR) 72 billion may also contribute to the rise in NPLs.

"We expect ICICI Bank's earnings to remain well above the industry average despite the elevated credit costs," said Mr. Pandey. "This is because of the bank's competitive net interest margins, sizable fee income, and low cost-to-income ratio."

## Edgar Filing: ICICI BANK LTD - Form 6-K

We expect ICICI Bank's core earnings to average around 1.2% of adjusted assets as compared with the industry average of 0.4%. We expect the bank's 12%-14% loan growth--the bulk of which is likely to be contributed by the retail segment as part of its de-risking strategy given the stable asset quality of the portfolio--to keep its risk-adjusted capital (RAC) ratio (pre-diversification) under S&P Global Ratings' framework at 9.0%-9.5% over the next 12-18 months, commensurate with an adequate capital and earnings assessment. ICICI Bank's capitalization could also be supported by stake

divestment in some of its subsidiaries, which we understand the bank is considering.

The stable outlook reflects our expectation that ICICI Bank will maintain its credit profile over the next 18 months.

We are unlikely to downgrade ICICI Bank over the next 18 months. Nevertheless, we expect to lower our rating on the bank in the unlikely scenario of a downgrade of the sovereign rating on **India** (BBB-/Stable/A-3), or if, in our opinion, there is a substantial rise in economic risks faced by the banks operating in India.

S&P Global Ratings does not rate Indian banks above the sovereign because of the direct and indirect influence the sovereign in distress would have on a bank's operations, including its ability to service foreign currency obligations.

We are unlikely to raise the rating on ICICI Bank over the next 18 months. We expect to raise the SACP if, in our opinion, the bank's capitalization improves such that our forecast pre-diversification RAC ratio for the bank increases and stays above 10% on a sustainable basis. This could happen if the bank sells large-scale stake in its subsidiaries and retains that capital.
