SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:  
None

Indicate by check mark whether the registrant (1) has filed all reports  
required to be filed by Section 13 or 15(d) of the Securities Exchange Act of  
1934 during the preceding 12 months (or for such shorter period that the  
Registrant is required to file such reports) and (2) has been subject to such  
filing requirements for the past 90 days. Yes  No .

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [ ]

The aggregate market value of voting stock held by non-affiliates as of March 23, 2001 (based upon the closing price of \$16.22 per common share as quoted on the New York Stock Exchange), is approximately \$1,000 million. For purposes of this computation, the shares of voting stock held by directors, officers and employee benefit plans of the registrant and its wholly owned subsidiaries were deemed to be stock held by affiliates. The number of shares of common stock outstanding at March 23, 2001, was 63,450,643 shares, excluding 14,445,943 shares held by the registrant, its subsidiaries and certain Company trusts, which are not entitled to be voted.

### DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's Annual Report to Shareholders for the year ended December 31, 2000, are incorporated by reference into Parts I and II of this Annual Report on Form 10-K as indicated herein. Portions of the Registrant's definitive Proxy Statement relating to the 2001 Annual Meeting of Shareholders, to be filed with the Securities and Exchange Commission, are incorporated by reference in Part III of this Annual Report on Form 10-K as indicated herein.

### DISCLOSURE CONCERNING FORWARD-LOOKING STATEMENTS

All statements, other than statements of historical fact, included in the 2000 Annual Report to Shareholders (the 'Annual Report to Shareholders') of Millennium Chemicals Inc. (the 'Company') and in this Annual Report on Form 10-K, including, without limitation, the statements under 'Management's Discussion and Analysis of Financial Condition and Results of Operations' included in the Annual Report to Shareholders and incorporated by reference in this Annual Report on Form 10-K, are, or may be deemed to be, forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 (the 'Exchange Act'). Important factors that could cause actual results to differ materially from those discussed in such forward-looking statements ('Cautionary Statements') include: the balance between industry production capacity and operating rates, on the one hand, and demand for the products of the Company and Equistar Chemicals, LP ('Equistar'), including titanium dioxide, ethylene and polyethylene, on the other hand; the economic trends in the United States and other countries which serve as the Company's and Equistar's marketplaces; customer inventory levels; competitive pricing pressures; the cost and availability of the

2

Company's and Equistar's feedstocks and other raw materials, including natural gas and ethylene; operating interruptions (including leaks, explosions, fires, mechanical failures, unscheduled downtime, transportation interruptions, spills, releases and other environmental risks); competitive technology positions; failure to achieve the Company's or Equistar's productivity improvement and cost-reduction targets or to complete construction projects on schedule; and, other unforeseen circumstances.

Some of these Cautionary Statements are discussed in more detail under 'Business' in this Annual Report on Form 10-K and in 'Management's Discussion and Analysis of Financial Condition and Results of Operations' in the Annual Report to Shareholders. Readers are cautioned not to place undue reliance on Cautionary Statements, which reflect management's opinions only as of the date hereof. The Company undertakes no obligation to revise or publicly release the results of any revision to any Cautionary Statements. All subsequent written and

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

oral forward-looking statements attributable to the Company or persons acting on behalf of the Company are expressly qualified in their entirety by such Cautionary Statements.

3

### ITEM 1. BUSINESS

Millennium Chemicals Inc. (the 'Company') is a major international chemical company, with leading market positions in a broad range of commodity, industrial, performance and specialty chemicals.

The Company has three principal wholly owned operating subsidiaries: Millennium Inorganic Chemicals Inc. (collectively, with its non-United States affiliates, 'Millennium Inorganic Chemicals'), Millennium Petrochemicals Inc. ('Millennium Petrochemicals'), and Millennium Specialty Chemicals Inc. ('Millennium Specialty Chemicals'). The Company also owns a 29.5% interest in Equistar, a joint venture owned by the Company, Lyondell Chemical Company ('Lyondell') and Occidental Petroleum Corporation ('Occidental'). The Company accounts for its interest in Equistar as an equity investment.

The Company has leading market positions in the United States and the world:

Millennium Inorganic Chemicals is the second-largest producer of titanium dioxide ('TiO<sub>2</sub>') in the world, with manufacturing facilities in the United States, the United Kingdom, France, Brazil and Australia. Millennium Inorganic Chemicals is also the largest merchant seller of titanium tetrachloride ('TiCl<sub>4</sub>') in North America and Europe and a major producer of silica gel;

Millennium Petrochemicals is the second-largest producer of vinyl acetate monomer ('VAM') and acetic acid in North America;

Millennium Specialty Chemicals is the world's largest producer of terpene-based fragrance and flavor chemicals; and

Through its 29.5% interest in Equistar, the Company is a partner in one of the largest chemical producers in the world. Equistar is the world's third-largest, and North America's second-largest, producer of ethylene. Equistar is also the third largest producer of polyolefins in North America, and a leading producer of propylene, performance polymers, oxygenated chemicals, aromatics and specialty products.

The Company owns an 85% interest in La Porte Methanol Company, L.P. ('La Porte Methanol Company'), a Delaware limited partnership that owns a methanol plant located in La Porte, Texas, and certain related facilities that were contributed to the partnership by Millennium Petrochemicals. These operations were wholly owned by Millennium Petrochemicals until they were contributed to the partnership on January 18, 1999.

The Company was incorporated in Delaware on April 18, 1996. The Company's office in the United Kingdom is located at Laporte Road, Stallingborough, Grimsby, North East Lincolnshire, DN40 2PR, England. Its telephone number in the United Kingdom is 0345-662663. The Company's principal executive offices in the United States are located at 230 Half Mile Road, P.O. Box 7015, Red Bank, NJ 07701-7015. Its telephone number in the United States is (732) 933-5000 and its fax number is 732-933-5240. Its website is: <http://www.millenniumchem.com>.

Recent Developments. On March 23, 2001, the Company announced that it would

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

restructure its operating businesses into two business units, the 'Growth and Development' unit and the 'Operational Excellence' unit. Growth and Development will be focused on identifying, developing and managing businesses believed by the Company's management to have growth potential and operating margins exceeding chemical industry averages. The Growth and Development unit will include the Company's Fragrance and Flavor Chemicals segment and the Millennium Performance Chemicals business unit. The Operational Excellence unit will be managed to focus on steady cash flow and disciplined growth, and will include the Company's Acetyls segment and its high-volume TiO<sub>2</sub> business, as well as the Company's interest in Equistar. In connection with this restructuring, the Company announced that it would realign its Operations Committee and management structure, close its office in Cincinnati, Ohio and take a one-time charge of approximately \$10 million in the first half of 2001. Annual cost savings associated with these steps are expected to exceed that amount.

### DEVELOPMENT OF BUSINESS

The Company has been an independent, publicly owned company since its demerger (i.e., spin-off) on October 1, 1996 (the 'Demerger') from Hanson PLC ('Hanson'). In connection with the Demerger,

4

Hanson transferred its chemical operations to the Company and the Company issued to Hanson's shareholders all of the Company's then-outstanding common stock, par value \$0.01 per share (the 'Common Stock').

On December 1, 1997, the Company contributed to Equistar substantially all of the net assets comprising its former polyethylene, alcohol and related products business segment, which had been owned by Millennium Petrochemicals. In exchange, the Company received a 43% interest in Equistar, Equistar repaid \$750 million of debt due to the Company from its contributed businesses, the Company retained \$250 million of certain accounts receivable and Equistar assumed certain liabilities from the Company. A subsidiary of the Company guarantees \$750 million of Equistar's bank debt. The Company used the \$750 million received from Equistar, together with collected proceeds of the retained accounts receivable, to repay debt under its revolving credit facility. Lyondell contributed to Equistar substantially all of the assets comprising its petrochemical and polymer business segments, as well as a \$345 million note. In exchange, Lyondell received a 57% interest in Equistar, and Equistar assumed \$745 million of Lyondell's debt and certain liabilities from Lyondell. On May 15, 1998, the Company and Lyondell expanded Equistar with the addition of the ethylene, propylene, ethylene oxide, ethylene glycol and other ethylene oxide derivatives businesses of Occidental's chemical subsidiary. Occidental contributed substantially all of the net assets of these businesses (including approximately \$205 million of related debt) to Equistar. In exchange, Equistar borrowed an additional \$500 million, \$420 million of which was distributed to Occidental and \$75 million of which was distributed to the Company. Equistar is now owned 41% by Lyondell, 29.5% by Occidental and 29.5% by the Company. Equistar is governed by a Partnership Governance Committee consisting of representatives of each partner. Approval of Equistar's strategic plans and other major decisions requires the consent of the representatives of the three partners. All decisions of Equistar's Governance Committee that do not require the consent of the representatives of the three partners may be made by Lyondell's representatives alone.

On December 31, 1997, the Company completed the purchase of the shares of Rhone-Poulenc Chimie S.A.'s Thann et Mulhouse TiO<sub>2</sub> and related intermediate and specialty chemical operations in France for \$185 million, including assumed

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

debt. The operations in France provide capacity to produce approximately 125,000 metric tons per year of TiO<sub>2</sub>.

On July 1, 1998, the Company completed the acquisition of 99% of the voting shares and 72% of the outstanding shares of Titanio do Brazil S.A. ('Tibras'), Brazil's only integrated TiO<sub>2</sub> producer, for \$129 million, including assumed debt. The two operations comprising Tibras included a plant which has the capacity to produce approximately 60,000 metric tons per year of TiO<sub>2</sub> and a mineral sands mine with over two million metric tons of recoverable reserves.

On January 18, 1999, the Company completed certain transactions with Linde AG ('Linde') relating to the Company's synthesis gas ('syngas') unit in La Porte, Texas and a 15% interest in its methanol business, whereby the Company received \$123 million in cash. Linde operates the syngas unit under a lease with a purchase option. The Company has the right to require Linde to purchase the syngas unit under certain circumstances. In addition, Linde holds a 15% interest in the La Porte Methanol Company and operates the La Porte Methanol Company's methanol plant. Linde has the obligation to purchase an additional 5% interest in the La Porte Methanol Company upon the occurrence of certain events.

On May 26, 1999, the Company sold its 26.4% combined subordinated and general partnership interests in Suburban Propane Partners, L.P. and Suburban Propane, L.P. (collectively, 'Suburban Propane') to Suburban Propane and its management for \$75 million in cash.

In 1999, the Company repurchased approximately 8.9 million shares of Common Stock under a \$200 million share repurchase program. In 2000, the Company repurchased an additional 3.5 million shares for \$65 million, reducing the total outstanding shares by approximately 16% as a result of the two programs.

On February 1, 2000, Millennium Inorganic Chemicals completed the acquisition of Hanwha Advanced Ceramics of South Korea, a company located near Perth, Western Australia that produces a broad range of zirconia products that complement Millennium Inorganic Chemicals' current manufacturing operations in Thann, Alsace, France.

5

On May 26, 2000, Millennium Petrochemicals executed a long-term agreement with E.I. du Pont de Nemours and Company ('DuPont') to toll acetic acid produced at Millennium Petrochemicals' La Porte, Texas plant through DuPont's nearby VAM plant, thereby acquiring all the current VAM production at DuPont's plant not utilized internally by DuPont. The tolling commenced January 1, 2001. As a result, Millennium Petrochemicals' total annual VAM sales are expected to exceed one billion pounds per year, increasing its share of the global VAM market from approximately 8% to approximately 11%.

In this Annual Report on Form 10-K: (i) references to the Company are to the Company and its consolidated subsidiaries, except as the context otherwise requires; (ii) references to the activities of, and financial information with respect to, the Company prior to October 1, 1996 are to the historical activities and combined historical financial information of the businesses that were transferred to the Company by Hanson in connection with the Demerger; (iii) references to 'tpa' are to metric tons per annum (a metric ton is equal to 1,000 kilograms or 2,204.6 pounds); and, (iv) references to the Company's and Equistar's annual rated, processing or production capacity are based upon engineering assessments made by the Company and Equistar, respectively. Actual production may vary depending on a number of factors including feedstocks, product mix, unscheduled maintenance and demand.

# Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

## BUSINESS SEGMENTS

The Company's principal operations are grouped into three business segments: 'Titanium Dioxide and Related Products,' which are produced by Millennium Inorganic Chemicals; 'Acetyls,' which are produced by Millennium Petrochemicals; and, Fragrance and Flavor Chemicals, which are produced by Millennium Specialty Chemicals. See Note 12 of the Company's Consolidated Financial Statements included in the Annual Report to Shareholders for financial information about the Company's business segments; such information is incorporated herein by reference.

On December 1, 1997, the Company contributed the businesses comprising its former polyethylene, alcohol and related products segment to Equistar. Since December 1, 1997, the Company's interest in Equistar has been accounted for as an equity investment. See Note 3 to the Company's Consolidated Financial Statements included in the Annual Report to Shareholders for additional information about Equistar's business, and the Financial Statements of Equistar included in this Annual Report on Form 10-K for additional financial information about Equistar.

## PRINCIPAL PRODUCTS

The following is a description of the principal products of the Company's consolidated subsidiaries:

PRODUCT -----	USES ----
Titanium dioxide and related products:	
Titanium dioxide ('TiO[u]2').....	A white pigment used to provide whiteness, brightness and opacity in coatings and paints, plastics, paper and rubber.
Titanium tetrachloride ('TiCl[u]4').....	An intermediate product used in making TiO[u]2, catalysts, specialty pigments and surface treatment for glass. TiCl4 is also the raw material used to make titanium metal, which in turn is used to make a wide variety of products, including eyeglass frames, aerospace parts and golf clubs.
Zirconium-based compounds.....	Chemicals used in coloring for ceramics, in pigment surface treatment and to enhance optics.
Specialty TiO[u]2.....	Micro-pure and ultra-fine products used in environmental, optical, electronic and ultra-violet absorption applications.
Silica gel.....	Inorganic product used to reduce gloss and control flow in coatings. Also used to stabilize and extend the shelf life of beer, plastic films, powdered food products and pharmaceuticals.

(table continued on next page)

(table continued from previous page)

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

PRODUCT -----	USES ----
Acetyls:	
Vinyl acetate monomer ('VAM').....	A petrochemical product used to produce adhesives, water-based paints, textile coatings, paper coatings and a variety of polymer products.
Acetic acid.....	An intermediate used to produce VAM, terephthalic acid (used to produce polyester for textiles and plastic bottles) and industrial solvents.
Methanol.....	A feedstock used to produce acetic acid; methyl tertiary butyl ether ('MTBE'), a gasoline additive and, formaldehyde. The Company is a producer of methanol through its 85% interest in La Porte Methanol Company.
Fragrance and flavor chemicals:	
Terpene fragrance chemicals.....	Individual components that are blended to make fragrances used in detergents, soaps, perfumes, personal care items and household goods.
Terpene flavor chemicals.....	Individual components that are blended to impart or enhance flavors used in toothpaste, chewing gum and other consumer products.

For a description of Equistar's principal products, see 'Equity Interest in Equistar,' below.

### MILLENNIUM INORGANIC CHEMICALS

#### TITANIUM DIOXIDE

Millennium Inorganic Chemicals is the second-largest producer of TiO<sub>2</sub> in the world, based on reported production capacities. TiO<sub>2</sub> is a white pigment used for imparting whiteness, brightness and opacity in a wide range of products, including paints and coatings, plastics, paper and elastomers.

The following table sets forth Millennium Inorganic Chemicals' annual production capacity, as of the date of this report, using the chloride process and the sulfate process discussed below, and the approximate percentage of its total production capacity represented by each such process.

MILLENNIUM INORGANIC CHEMICALS' RATED TIO<sub>2</sub> CAPACITY  
(METRIC TONS PER ANNUM)

PROCESS -----	CAPACITY -----	
Chloride.....	483,000	68%
Sulfate.....	229,000	32%
	-----	---
Total.....	712,000	100%

TiO<sub>2</sub> is produced in two crystalline forms: rutile and anatase. Rutile TiO<sub>2</sub> is a more tightly packed crystal that has a higher refractive index than anatase TiO<sub>2</sub> and, therefore, better opacification and tinting strength in many applications. Some rutile TiO<sub>2</sub> products also provide better resistance to the harmful effects of weather. Rutile TiO<sub>2</sub> is the preferred form for use in coatings, ink and plastics. Anatase TiO<sub>2</sub> has a bluer undertone and is less

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

abrasive than rutile TiO<sub>2</sub>. It is often preferred for use in paper, ceramics, rubber and man-made fibers.

TiO<sub>2</sub> producers process titaniferous ores to extract a white pigment using one of two different technologies. The sulfate process is a wet chemical process that uses concentrated sulfuric acid to extract TiO<sub>2</sub>, in either anatase or rutile form. The sulfate process generates higher volumes of waste materials, including iron sulfate and spent sulfuric acid. The chloride process is a high temperature process in which chlorine is used to extract TiO<sub>2</sub> in rutile form, with greater purity and higher control

7

over the size distribution of the pigment particles than the sulfate process permits. In general, the chloride process is also less intensive than the sulfate process in terms of capital investment, labor and energy. Because much of the chlorine can be recycled, the chloride process produces less waste subject to environmental regulation. Once an intermediate TiO<sub>2</sub> pigment has been produced by either the chloride or sulfate process, it is 'finished' into a product with specific performance characteristics for particular end-use applications through proprietary processes involving surface treatment with various chemicals and combinations of milling and micronizing.

Due to customer preferences, as well as economic and environmental factors, the industry's worldwide chloride-process capacity has increased significantly relative to sulfate-process capacity during the last 25 years and currently represents just over half of total industry capacity. Millennium Inorganic Chemicals is the world's second-largest producer of TiO<sub>2</sub> by the chloride production process.

Millennium Inorganic Chemicals' TiO<sub>2</sub> plants are located in the four major world markets for TiO<sub>2</sub>: North America, South America, Western Europe and the Asia/Pacific region. The North American plants, consisting of two in Baltimore, Maryland and two in Ashtabula, Ohio, have aggregate production capacities of 248,000 tpa using the chloride process and 44,000 tpa using the sulfate process. The plant in Salvador, Bahia, Brazil has a capacity to produce approximately 60,000 tpa using the sulfate process. Millennium Inorganic Chemicals also owns a mineral sands mine located at Mataraca, Paraiba, Brazil, which supplies the Brazilian plant with titanium ores. The mine has over two million metric tons of recoverable reserves and a capacity to produce over 100,000 tpa of titanium ores, which are generally consumed in the Salvador TiO<sub>2</sub> plant, and 16,000 tpa of zircon, which is sold to third parties. Millennium Inorganic Chemicals' Stallingborough, United Kingdom, plant has chloride-process production capacity of 150,000 tpa. The plants in France at Le Havre, Normandy and Thann, Alsace have sulfate-process capacities of 95,000 tpa and 30,000 tpa, respectively. The Kemerton plant in Western Australia has chloride-process production capacity of 85,000 tpa.

Millennium Inorganic Chemicals' TiO<sub>2</sub> plants operated at an average of 93% of installed capacity during 2000, 88% of installed capacity during 1999 and 93% during 1998. The decline in the operating rate in 1999 compared to 1998 was due to planned and unplanned production shutdowns at certain facilities. Planned cutbacks in production were made early during 1999 in response to seasonal slowness in demand and price competition in Europe. In addition, the Company shut down the Stallingborough, United Kingdom plant during the fall of 1998 to complete a significant expansion of capacity and a new technology introduction at the facility, and the Company experienced operational difficulties during 1999 in connection therewith. The increased operating rate in 2000 compared to 1999 was due to the resolution of most of the startup issues at the

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Stallingborough plant and to improved operating performance during the year at most other plants.

Titanium-bearing ores used in the TiO<sub>2</sub> extraction process (ilmenite, natural rutile and leucosene) occur as mineral sands and hard rock in many parts of the world. Mining companies increasingly treat these natural ores to extract iron and other minerals and produce slags or synthetic rutilites with higher TiO<sub>2</sub> concentrations, resulting in lower rates of waste by-products during the TiO<sub>2</sub> production process. Ores are shipped by bulk carriers from terminals in the country of origin to TiO<sub>2</sub> production plants, usually located near port facilities. Millennium Inorganic Chemicals obtains ores from a number of suppliers in South Africa, Australia, Canada and Norway, generally pursuant to one- to three-year supply contracts. At the present time, the market for chloride-process feedstock is beginning to loosen due to additional new synthetic titanium ore capacity. Rio Tinto Iron & Titanium Inc. (through its affiliates Richards Bay Iron & Titanium (Proprietary) Limited and QIT-Fer et Titane Inc.) and Iluka Resources Limited are the world's largest producers of titanium ores and upgraded titaniferous raw materials and accounted for approximately 81% of the titanium ores and upgraded titaniferous raw materials purchased by Millennium Inorganic Chemicals in 2000.

Other major raw materials used in the production of TiO<sub>2</sub> are chlorine, caustic soda, petroleum and metallurgical coke, aluminum, sodium silicate, sulfuric acid, oxygen and nitrogen. In addition, natural gas and electricity are used as energy sources. The number of sources for and availability of these materials is specific to the particular geographic region in which the facility is located. For Millennium Inorganic Chemicals' Australian plant, chlorine and caustic soda are obtained exclusively from one supplier under a long-term supply agreement.

8

Millennium Inorganic Chemicals has experienced tightness in various raw material and energy markets, including sulfate-process feedstock, caustic soda and natural gas, but not to an extent requiring curtailed production. There are certain risks related to the acquisition of raw materials from less-developed or developing countries. A number of Millennium Inorganic Chemicals' raw materials, in addition to ore, are provided by only a few vendors and, accordingly, if one significant supplier or a number of significant suppliers were unable to meet their obligations under present supply arrangements, Millennium Inorganic Chemicals could suffer reduced supplies and/or be forced to incur increased prices for its raw materials. Such an event could have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company.

Of the total 659,000 metric tons of TiO<sub>2</sub> sold by Millennium Inorganic Chemicals in 2000, approximately 61% was sold to customers in the paint and coatings industry, approximately 20% to customers in the plastics industry, approximately 16% to customers in the paper industry and approximately 3% to other customers. Millennium Inorganic Chemicals' ten largest customers accounted for approximately 25% of its TiO<sub>2</sub> sales in 2000. Millennium Inorganic Chemicals experiences some seasonality in its sales because its customers' sales of paints and coatings are greatest in the spring and summer months. TiO<sub>2</sub> is sold either directly by Millennium Inorganic Chemicals to its customers or, to a lesser extent, through agents or distributors. TiO<sub>2</sub> is distributed by rail, truck and ocean carrier in either dry or slurry form.

The global markets in which the Company's TiO<sub>2</sub> business operates are all highly competitive. Millennium Inorganic Chemicals competes primarily on the

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

basis of price, product quality and service. Certain of Millennium Inorganic Chemicals' competitors are partially vertically integrated, producing titanium-bearing ores as well as  $TiO_2$ . Millennium Inorganic Chemicals is vertically integrated at its Brazilian facility, which owns a titanium ore mine that supplies the facility. Millennium Inorganic Chemicals' major competitors are DuPont; Kerr-McGee Chemical Corporation (both directly and through various joint ventures) ('Kerr-McGee Chemicals'), a unit of Kerr-McGee Corporation; Huntsman Tioxide ('Huntsman'), a unit of Huntsman Corporation; and, Kronos, Inc. ('Kronos'), a unit of NL Industries Inc. DuPont, Millennium Inorganic Chemicals, Kerr-McGee Chemicals, Huntsman and Kronos, collectively, account for approximately three-quarters of the world's production capacity.

$TiO_2$  competes with other whitening agents, which are generally less effective but less expensive. Paper manufacturers have, in recent years, developed alternative technologies, which reduce the amount of  $TiO_2$  used in paper.

New plant capacity additions in the  $TiO_2$  industry are slow to develop because of the substantial capital expenditure and the significant lead time (three to five years typically for a new plant) needed for planning, obtaining environmental approvals and permits, construction of manufacturing facilities and arranging for raw material supplies. Debottlenecking and other capacity expansions at existing plants require substantially less time and capital and can increase overall industry capacity.

### MILLENNIUM PERFORMANCE CHEMICALS

Millennium Inorganic Chemicals produces a number of specialty and performance products that are marketed through its Performance Chemicals business unit. During 2000, the silica gel and cadmium-based pigment products, formerly part of Millennium Specialty Chemicals, were added to the Millennium Performance Chemicals business unit.

**Titanium Tetrachloride:** Millennium Performance Chemicals is the largest merchant seller of  $TiCl_4$  in North America and Europe. It produces  $TiCl_4$  at its Ashtabula, Ohio and Thann, Alsace, France plants.  $TiCl_4$  is distributed by rail and truck as anhydrous  $TiCl_4$  and as an aqueous solution, titanium oxychloride. These products are sold into a wide variety of markets, including the titanium metal, pharmaceutical, catalyst, pearlescent pigment and surface treatment markets. The principal competitors in the  $TiCl_4$  market are Toho Titanium Co. and Kronos.

**Zirconium-based Compounds and Chemicals:** A wide range of zirconium products is produced at the Rockingham, Western Australia and Thann, Alsace, France plants. These products are sold globally into the electronics, ceramics, catalyst, glass and colored pigments markets. In addition, Millennium Performance Chemicals sells zirconium dioxide internally to Millennium Inorganic Chemicals and to

other  $TiO_2$  producers to enhance the durability and treat the surfaces of various  $TiO_2$  products. The principal competitors in this market are Daiichi Kigenso Kagakugyo Co., Ltd. and MEL Chemicals, a subsidiary of Luxfer Holdings, PLC.

**Specialty  $TiO_2$  Products:** Specialty  $TiO_2$  products are produced at the Thann facility in Alsace, France. These non-pigmentary products of less than 150 nanometres in size are produced and sold for their physicochemical

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

characteristics in various applications. Millennium Performance Chemicals is a major supplier of ultrafine TiO<sub>2</sub> used to remove nitrogen oxides from power plant emissions and to remove sulfur in diesel engine exhaust. The principal competitors in the specialty TiO<sub>2</sub> products market are Ishihara Sangyo Kaisha, Ltd., Kerr-McGee Chemicals and Tayca Corporation.

**Silica Gel:** Millennium Performance Chemicals produces several grades of fine-particle silica gel at the St. Helena plant in Baltimore, Maryland and markets them internationally. Fine-particle silica gel is a chemically and biologically inert form of silica with a particle size ranging from three to ten microns. The Company's fine-particle silica is used in coatings as a flattening or matting (gloss reduction) agent and in food and pharmaceutical applications. Other grades of fine-particle silica gel are chill-proofing agents used to stabilize chilled beer and prevent clouding. Fine-particle silica is distributed in dry form in palletized bags by truck and ocean carrier. The principal competitors in the silica gel business are W.R. Grace & Co., PQ Corporation and Ineos Silicas Americas LLC.

**Cadmium-based Pigments:** Millennium Performance Chemicals manufactures a line of cadmium-selenium based colored pigments at the St. Helena, Maryland plant and markets them internationally. In addition to their brilliance, cadmium colors are light and heat stable. These properties promote their use in such applications as artists' colors, plastics and glass colors. Due to concern for the toxicity of heavy metals, including cadmium, Millennium Performance Chemicals has introduced low-leaching cadmium-based pigments that meet all United States government requirements for landfill disposal of non-hazardous waste. Colored pigments are distributed in dry form in drums, by truck and by ocean carrier. The principal competitors in the cadmium pigments business include Johnson Matthey plc and James M. Brown Limited.

### MILLENNIUM PETROCHEMICALS

The following table sets forth information concerning the annual production capacity, as of the date of this report, of Millennium Petrochemicals' principal products:

MILLENNIUM PETROCHEMICALS' RATED CAPACITY  
(MILLIONS OF POUNDS PER ANNUM)

PRODUCT	CAPACITY
-----	-----
Acetic Acid.....	1,000
Vinyl Acetate Monomer.....	850

In addition, Millennium Petrochemicals owns an 85% interest in La Porte Methanol Company, which owns a methanol plant with an annual production capacity of 207 million gallons per annum. For a description of the plant and La Porte Methanol Company, see 'La Porte Methanol Company,' below.

### ACETIC ACID

Millennium Petrochemicals is the second-largest producer of acetic acid in North America and the third-largest producer worldwide, based on reported production capacities. Its acetic acid plant is located at La Porte, Texas and has an annual production capacity as of December 31, 2000 of one billion pounds. In 2000, Millennium Petrochemicals used approximately 60% of its acetic acid production internally to produce VAM at La Porte. The process used by Millennium Petrochemicals to produce acetic acid is proprietary to the Company.

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

The principal starting feedstocks for the production of acetic acid are carbon monoxide and methanol. Millennium Petrochemicals purchases all of its carbon monoxide from Linde pursuant to a long-term contract based primarily on cost of production. Linde produces this carbon monoxide at the

10

syngas plant leased by Linde from Millennium Petrochemicals pursuant to a lease that commenced on January 18, 1999. La Porte Methanol Company, 85% owned by the Company, supplies all of Millennium Petrochemical's requirements for methanol. (See 'La Porte Methanol Company,' below.)

Acetic acid not consumed internally by Millennium Petrochemicals is sold predominantly under contract. These contracts range in term from one to six years. Export sales constituted approximately 25% of total acetic acid sales in 2000. Acetic acid is shipped by ocean-going vessel, barge, tank car and tank truck.

Millennium Petrochemicals' principal competitors in the acetic acid business are Celanese AG ('Celanese'); BP Amoco p.l.c. ('BP'); Kyodo Sakusan, Acetex Chemie S.A., a subsidiary of Acetex Corporation ('Acetex'), and Eastman Chemical Corp.

### VINYL ACETATE MONOMER

Millennium Petrochemicals is the second-largest producer of VAM in North America and the third-largest producer worldwide, based on reported production capacities. Its VAM plant is located at La Porte, Texas and has an annual production capacity of 850 million pounds as of December 31, 2000. The process used by Millennium Petrochemicals to produce VAM is proprietary to the Company.

The principal feedstocks for the production of VAM are acetic acid and ethylene. Millennium Petrochemicals supplies its entire requirements for acetic acid from its internal production and buys all of its ethylene requirements from Equistar under a long-term supply contract based on market prices.

On May 26, 2000, Millennium Petrochemicals executed a long-term agreement with DuPont to toll acetic acid produced at Millennium Petrochemicals' La Porte, Texas plant through DuPont's nearby VAM plant, thereby acquiring all the current VAM production at DuPont's plant not utilized internally by DuPont. The tolling fee is based on the market price of ethylene, plus a processing charge. The term of the agreement is from January 1, 2001 to December 31, 2006, and thereafter from year to year. As a result, Millennium Petrochemicals' total annual VAM sales are expected to exceed one billion pounds per year, increasing its share of the global VAM market from approximately 8% to approximately 11%.

Millennium Petrochemicals sells VAM under contracts that range from one to eight years, as well as on a spot basis. Millennium Petrochemicals also sells VAM to Equistar pursuant to a long-term contract at a formula-based price. The majority of sales are completed under contract. Millennium Petrochemicals ships this product by barge, ocean-going vessel, pipeline, tank car and tank truck. Export sales represented approximately 40% of Millennium Petrochemical's total VAM sales in 2000. Millennium Petrochemicals has bulk storage arrangements for VAM in the Netherlands, the United Kingdom, Italy, Turkey, South Africa, Indonesia, Malaysia and Korea, to better serve its customers' requirements in those regions.

Millennium Petrochemicals' principal competitors in the VAM business are

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Celanese, BP, Union Carbide Corporation, Acetex and Dairen Chemical Corporation.

### MILLENNIUM SPECIALTY CHEMICALS

#### FRAGRANCE AND FLAVOR CHEMICALS

Millennium Specialty Chemicals is one of the world's leading producers of chemicals derived from crude sulfate turpentine ('CST'), and is the largest purchaser and distiller of CST in the world. Millennium Specialty Chemicals' primary turpentine-based products are intermediate fragrance chemicals, such as linalool and geraniol, which are used in fragrance compounds and also provide the starting point for the production of a number of other fragrance ingredients. In addition, Millennium Specialty Chemicals supplies chemicals for use as flavors, as vitamin intermediates and in a number of other industrial applications.

Millennium Specialty Chemicals operates manufacturing facilities for its fragrance chemicals in Jacksonville, Florida and Brunswick, Georgia. The Jacksonville site has facilities for the fractionation of turpentine into alpha- and beta-pinene, sophisticated equipment to further upgrade fragrance chemical products, as well as manufacturing facilities for synthetic pine oil, anethole, WS-3 and a number of other

11

fragrance and flavor chemicals. The Brunswick site produces linalool and geraniol from the alpha-pinene component of CST utilizing a proprietary and, the Company believes, unique technology. The Company believes that this technology provides Millennium Specialty Chemicals with a significant advantage in raw material availability. The Company's technology also has significant environmental advantages. Linalool and geraniol produced at the Brunswick site are generally further processed at the Jacksonville site to produce fragrance chemicals, including citral, citronellol and pseudoionone. In addition, Millennium Specialty Chemicals operates the world's largest dihydromyrcenol facility at Brunswick, with a rated annual capacity of over five million pounds.

CST, which is Millennium Specialty Chemicals' key raw material for producing fragrance chemicals, is a by-product of the kraft process of papermaking. Millennium Specialty Chemicals purchases CST from approximately 50 pulp mills in North America. Additionally, Millennium Specialty Chemicals purchases quantities of both CST and gum turpentine or its derivatives from Asia, Europe and South America, as business conditions dictate.

Millennium Specialty Chemicals has experienced tightness in CST supply from time to time, together with corresponding price increases. Generally, Millennium Specialty Chemicals seeks to enter into long-term supply contracts with pulp mills in order to ensure a stable supply of CST. The sale of CST generates relatively insignificant revenues and profits for the pulp mills that serve as Millennium Specialty Chemicals' principal suppliers. Accordingly, Millennium Specialty Chemicals attempts to work closely and cooperatively with its suppliers and provides them with incentives to produce more CST. For example, Millennium Specialty Chemicals employs two full-time employees whose sole responsibility is to work with pulp mills to recover CST more efficiently and economically.

Fragrance chemicals are used primarily in the production of perfumes. The major consumers of perfumes worldwide are soap and detergent manufacturers. Millennium Specialty Chemicals sells directly worldwide to major soap, detergent and fabric conditioner manufacturers and fragrance compounders and, to a lesser

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

extent, producers of cosmetics and toiletries. Approximately 80% of Millennium Specialty Chemicals' 2000 terpene fragrance chemical sales were to the fragrance chemicals market, with additional sales to the pine oil cleaner and disinfectant markets. Approximately 60% of Millennium Specialty Chemicals' 2000 terpene fragrance chemical sales were made outside the United States to approximately 50 different countries. Sales are made primarily through Millennium Specialty Chemicals' direct sales force, while agents and distributors are used in outlying areas where volume does not justify full-time sales coverage.

The markets in which Millennium Specialty Chemicals' terpene fragrance business competes are highly competitive. Millennium Specialty Chemicals competes primarily on the basis of quality, service and the ability to conform its products to the technical and qualitative requirements of its customers. Millennium Specialty Chemicals works closely with many of its customers in developing products to satisfy their specific requirements. Millennium Specialty Chemicals' supply agreements with customers are typically short-term in duration (up to one year). Therefore, its business is substantially dependent on long-term customer relationships based upon quality, innovation and customer service. Customers from time to time change the formulations of an end product in which one of Millennium Specialty Chemicals' fragrance chemicals is used, which may affect demand for such fragrance chemicals. Millennium Specialty Chemicals' ten largest terpene chemical customers accounted for approximately 55% of its total sales in 2000. Millennium Specialty Chemicals' major competitors are BASF AG, Givaudan S.A., Kuraray Co. LTD and International Flavors & Fragrances Inc.

### RESEARCH AND DEVELOPMENT

The Company's expenditures for research and development totaled \$26 million, \$26 million and \$21 million in 2000, 1999 and 1998, respectively. Research and development expenditures at Millennium Inorganic Chemicals increased by approximately \$5 million from 1998 to 1999 due to its strategic initiative to increase its focus on new product development and process technology.

Millennium Inorganic Chemicals has research facilities in Baltimore, Maryland; Stallingborough, United Kingdom; and, Bunbury, Western Australia. Millennium Specialty Chemicals has research facilities in Jacksonville, Florida. Millennium Petrochemicals leases laboratory space from Equistar in

12

Cincinnati, Ohio. The Company's research efforts are principally focused on improvements in process technology, product development, technical service to customers, applications research and product quality enhancements.

### INTERNATIONAL EXPOSURE

The Company generates revenue from export sales (i.e., sales outside the United States by domestic operations), as well as revenue from the Company's operations conducted outside the United States. Export sales, which are made to approximately 90 countries, amounted to approximately 11%, 9% and 10% of total revenues in 2000, 1999 and 1998, respectively. Revenue from non-United States operations amounted to approximately 40%, 42% and 38% of total revenues in 2000, 1999 and 1998, respectively, principally reflecting the operations of Millennium Inorganic Chemicals in Europe, Western Australia and Brazil. Identifiable assets of the non-United States operations represented 29% of total identifiable assets at both December 31, 2000 and 1999, principally reflecting the assets of these operations. In addition, the Company obtains a portion of its principal raw materials from sources outside the United States. Millennium Inorganic Chemicals

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

obtains ores used in the production of TiO<sub>2</sub> from South Africa, Australia, Canada and Norway under contracts with a number of suppliers. Millennium Specialty Chemicals obtains a portion of its requirements of CST and gum turpentine and its derivatives from suppliers in Indonesia and other Asian countries, Europe and South America.

The Company's export sales and its non-United States manufacturing and sourcing are subject to the usual risks of doing business abroad, such as fluctuations in currency exchange rates, transportation delays and interruptions, political and economic instability and disruptions, restrictions on the transfer of funds, the imposition of duties and tariffs, import and export controls, and changes in governmental policies. The Company's exposure to the risks associated with doing business abroad will increase as the Company expands its worldwide operations. From time to time, the Company utilizes derivative instruments to hedge the impact of currency fluctuations on its purchases and sales.

The functional currency of each of the Company's non-United States operations (principally, the operations of Millennium Inorganic Chemicals in the United Kingdom, France, Brazil and Australia) is the local currency. As a result of translating the functional currency financial statements of all its foreign subsidiaries into United States dollars, consolidated shareholders' equity decreased approximately \$46 million in both 2000 and 1999. Future events, which may significantly increase or decrease the risk of future movement in foreign currencies in which the Company conducts business, cannot be predicted.

In addition, the Company generates revenue from export sales and revenue from operations conducted outside the United States that may be denominated in currencies other than the relevant functional currency. The Company hedges certain revenues and costs to minimize the impact of changes in the exchange rates of those currencies compared to the respective functional currencies. The Company does not use derivative financial instruments for trading or speculative purposes. Foreign currency losses on unhedged transactions aggregated \$4 million in 2000, \$13 million in 1999 and \$4 million in 1998.

### EQUITY INTEREST IN EQUISTAR

Through its 29.5% interest in Equistar, the Company is a partner in one of the largest chemical producers in the world with total 2000 revenues of \$7.5 billion and assets of \$6.6 billion at the end of 2000. Equistar is currently the world's third-largest, and North America's second-largest, producer of ethylene. Ethylene is the world's most widely used petrochemical. Equistar currently is also the third-largest producer of polyolefins in North America, and a leading producer of propylene, polypropylene, performance polymers, oxygenated products, aromatics and specialty products.

Equistar commenced operations on December 1, 1997, when the Company contributed substantially all of the assets comprising its former polyethylene, alcohol and related products segment to Equistar and Lyondell contributed substantially all the assets comprising its petrochemical and polymer business segments to Equistar. On May 15, 1998, the Company and Lyondell expanded Equistar with the addition of the ethylene, propylene, ethylene oxide, ethylene glycol and other ethylene oxide derivatives businesses of Occidental's chemicals subsidiary. In December 1999, to further the Company's

business strategy to de-emphasize commodity chemicals, the Company's Board of Directors approved actions to advance efforts to dispose of the Company's

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

interest in Equistar. On September 14, 2000, the Company announced that it had not received an acceptable offer for its Equistar interest and that it had terminated active marketing of its stake.

Equistar's petrochemicals business unit manufactures and markets olefins, oxygenated products, aromatics and specialty products. Equistar's olefins products are primarily ethylene, propylene and butadiene. Olefins and their co-products are basic building blocks used to create a wide variety of products. Ethylene is used to produce polyethylene, ethylene oxide, ethylene dichloride and ethylbenzene. Propylene is used to produce polypropylene and propylene oxide. Equistar's oxygenated products include ethylene oxide, ethylene glycol, ethanol and MTBE. Oxygenated products have uses ranging from paint to cleaners to polyester fibers to gasoline additives. Equistar's aromatics are benzene and toluene.

Equistar's polymers business unit manufactures and markets polyolefins, including high density polyethylene, low density polyethylene, linear low density polyethylene, polypropylene and performance polymers. Polyethylene is used to produce packaging film, grocery and trash bags, housewares, toys and lightweight high-strength plastic bottles and containers for milk, juices, shampoos and detergents. Polypropylene is used in a variety of products including carpets, upholstery, housewares, automotive components, rigid packaging and plastic caps and other closures. Equistar's performance polymers include enhanced grades of polyethylene, such as wire and cable insulating resins; polymeric powders; polymers for adhesives, sealants and coatings; reactive polyolefins; and, liquid polyolefins.

### EQUISTAR'S PETROCHEMICAL BUSINESS UNIT

Equistar produces petrochemicals at twelve facilities located in six states. Equistar's Chocolate Bayou, Corpus Christi and two Channelview, Texas olefin plants use petroleum liquids, including naphtha, condensates and gas oils (collectively, 'Petroleum Liquids'), to produce ethylene. Assuming the co-products are recovered and sold, the cost of ethylene production from Petroleum Liquids historically has been less than the cost of producing ethylene from natural gas liquid feedstocks, including ethane, propane and butane (collectively, 'NGLs'). The use of Petroleum Liquids results in the production of a significant amount of co-products, such as propylene, butadiene, benzene and toluene, and specialty products such as dicyclopentadiene, isoprene, resin oil, piperlyenes and hydrogen. Olefin plants with the flexibility to consume a wide range of raw materials generally are able to maintain higher profitability during periods of changing energy and petrochemical prices than olefin plants that are restricted in their raw material processing capability, assuming the co-products are recovered and sold. Equistar's Channelview and Corpus Christi, Texas facilities can process 100% and 70% Petroleum Liquids, respectively, or up to 80% and 70% NGLs, respectively, subject to the availability of NGLs. The Chocolate Bayou facility processes 100% Petroleum Liquids.

Equistar's Morris, Illinois; Clinton, Iowa; Lake Charles, Louisiana; and, La Porte, Texas plants are designed to use primarily NGLs, which primarily produce ethylene with some co-products, such as propylene. Equistar's La Porte, Texas facility can process heavier NGLs such as butane and natural gasoline. A comprehensive pipeline system connects Equistar's Gulf Coast plants with major olefin customers. Raw materials are sourced both internationally and domestically from a wide variety of sources. The majority of Equistar's Petroleum Liquids requirements are purchased via contractual arrangements. Equistar obtains a portion of its olefin raw material requirements from LYONDELL-CITGO Refining LP, a joint venture owned by Lyondell and CITGO Petroleum Corporation ('LCR'), at market-related prices. Raw materials are shipped via vessel and pipeline.

Equistar produces ethylene oxide and derivatives thereof, including ethylene

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

glycol, at facilities located at Pasadena, Texas and through a joint venture located in Beaumont, Texas that is 50% owned by Equistar and 50% owned by DuPont. Equistar produces synthetic ethanol at Tuscola, Illinois and denatures ethanol at facilities in Newark, New Jersey, and Anaheim, California.

14

The following table outlines Equistar's primary petrochemical products and the annual processing capacity for each product.

PRODUCT	ANNUAL CAPACITY
<b>Olefins:</b>	
Ethylene.....	11.6 billion pounds
Propylene.....	5.0 billion pounds(a)
Butadiene.....	1.2 billion pounds
<b>Oxygenated Products:</b>	
Ethylene oxide.....	1.1 billion pounds
Ethylene glycol.....	1 billion pounds
Ethylene oxide derivatives.....	225 million pounds
MTBE.....	284 million gallons(b)
Ethanol.....	50 million gallons
<b>Aromatics:</b>	
Benzene.....	310 million gallons
Toluene.....	66 million gallons
<b>Specialty Products:</b>	
Dicyclopentadiene.....	130 million pounds
Isoprene.....	145 million pounds
Resin oil.....	150 million pounds
Piperylenes.....	100 million pounds
Hydrogen.....	44 billion cubic feet
Alkylate.....	337 million gallons(c)
Diethyl ether.....	5 million gallons

-----

(a) Does not include refinery-grade material or production from the product flexibility unit at Equistar's Channelview, Texas facility, which can convert ethylene and other light petrochemicals into propylene. This facility has a current annual processing capacity of one billion pounds per year of propylene.

(b) Includes up to 44 million gallons per year of capacity, which is operated for the benefit of LCR.

(c) Includes up to 172 million gallons per year of capacity, which is operated for the benefit of LCR.

Ethylene produced by the La Porte, Morris and Clinton facilities is generally consumed as raw material by the polymer operations at those sites, except for the ethylene produced at La Porte and sold to Millennium Petrochemicals for its VAM production. Ethylene and propylene produced at the

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Channelview, Corpus Christi, Chocolate Bayou and Lake Charles olefin plants are generally distributed by pipeline or via exchange agreements to Equistar's Gulf Coast polymer and ethylene oxide and glycol facilities as well as Equistar's affiliates and third parties. As of January 1, 2000, approximately 80% of the ethylene produced by Equistar was consumed internally or sold to Equistar's affiliates at market related prices.

With respect to sales to third parties, Equistar sells a majority of its olefin products to customers with whom its partners have had long-standing relationships, generally pursuant to written agreements that typically provide for monthly negotiation of price, customer purchase of a specified minimum quantity, and three to six year terms with automatic one- or two-year extension provisions. Some contracts may be terminated early if deliveries have been suspended for several months.

Most of the ethylene and propylene production of the Channelview, Chocolate Bayou, Corpus Christi and Lake Charles facilities is shipped via a pipeline system that has connections to numerous Gulf Coast ethylene and propylene consumers. Exchange agreements with other olefin producers allow

15

access to customers who are not directly connected to this pipeline system. Some propylene is shipped by railcar from Clinton, Iowa to Morris, Illinois and some is shipped by ocean-going vessel.

The basis for competition in Equistar's petrochemical products is price, product quality, product deliverability and customer service. Equistar competes with other large domestic producers of petrochemicals, including BP, Chevron Phillips Chemical Company LP ('Chevron Phillips'), The Dow Chemical Company ('Dow'), Exxon Mobil Chemical Company ('Exxon Mobil'), Huntsman Chemical Company and Shell Chemical Company. Industry consolidation has concentrated the industry in fewer, although larger and stronger, competitors.

### EQUISTAR'S POLYMER BUSINESS UNIT

Through facilities located at nine plant sites in four states, Equistar's polymer business unit manufactures a wide variety of polyolefins, including polyethylene, polypropylene and various performance polymers.

Equistar currently manufactures polyethylene using a variety of technologies at five facilities in Texas and at its Morris, Illinois and Clinton, Iowa facilities. The Morris and Clinton facilities are the only polyethylene facilities located in the United States Midwest. These facilities enjoy a freight cost advantage over Gulf Coast producers in delivering products to customers in the United States Midwest and on the East Coast of the United States.

Equistar's Morris, Illinois and Pasadena, Texas facilities manufacture polypropylene using propylene produced as a co-product of Equistar's ethylene production as well as propylene purchased from third parties. Equistar produces performance polymer products, which include enhanced grades of polyethylene and polypropylene, at several of its polymer facilities. Equistar produces wire and cable insulating resins and compounds at Morris, Illinois and La Porte, Texas and wire and cable insulating compounds at Tuscola, Illinois and Fairport Harbor, Ohio. Wire and cable insulating resins and compounds are used to insulate copper and fiber optic wiring in power, telecommunication, computer and automobile applications.

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Equistar's polymer facilities have the capacity to produce annually 3.1 billion pounds of high density polyethylene, 1.5 billion pounds of low density polyethylene, 1.1 billion pounds linear low density polyethylene and 680 million pounds of polypropylene. These annual capacities exclude the capacity of the Port Arthur, Texas facility, which was permanently shut down February 28, 2001. Equistar's polymer facilities also produce wire and cable insulating resins and compounds, polymeric powders, polymers for adhesives, sealants and coatings, reactive polyolefins and liquid polyolefins. These products are enhanced grades of polyethylene; Equistar's capacity to produce these products is included in the capacity figures for polyethylene, discussed above.

With the exception of the Chocolate Bayou polyethylene plant, Equistar's polyethylene and polypropylene production facilities can receive their ethylene and propylene directly from Equistar's petrochemical facilities via Equistar's olefin pipeline system or Equistar's own on-site production. The polyethylene plants at Chocolate Bayou, La Porte and Pasadena, Texas are connected to third parties and can receive ethylene via exchanges or purchases. The polypropylene facility at Morris, Illinois receives propylene from third parties.

Equistar's polymer products are primarily sold to an extensive base of established customers. Fifty percent of these customers have term contracts, typically having a duration of one to three years. The remainder is generally sold without contractual term commitments. In either case, in most of the continuous supply relationships, prices may be changed upon mutual agreement between Equistar and its customer. Equistar sells its polymer products in the United States and Canada primarily through its own sales organization. It generally engages sales agents to market its polymer products in the rest of the world. Polymers are distributed primarily by railcar.

The basis for competition in Equistar's polymer products is price, product performance, product quality, product deliverability and customer service. Equistar competes with other large producers of polymers, including Atofina, BP, Chevron Phillips, Dow, Eastman Chemical Company, Exxon Mobil, Formosa Plastics, Huntsman Chemical Company, Solvay Polymers, Nova Chemicals and Westlake

16

Polymers. Industry consolidation has concentrated the industry in fewer, although larger and stronger, competitors.

MANAGEMENT OF EQUISTAR; AGREEMENTS BETWEEN EQUISTAR, LYONDELL, OCCIDENTAL AND THE COMPANY

Equistar is a Delaware limited partnership. The Company owns its 29.5% interest in Equistar through two wholly owned subsidiaries of Millennium Petrochemicals, one of which serves as a general partner of Equistar and one of which serves as a limited partner. The Amended and Restated Partnership Agreement of Equistar (the 'Equistar Partnership Agreement') governs, among other things, ownership, cash distributions, capital contributions and management of Equistar.

The Equistar Partnership Agreement provides that Equistar is governed by a Partnership Governance Committee consisting of nine representatives, three appointed by each general partner. Matters requiring agreement by the representatives of Lyondell, Occidental and the Company include changes in the scope of Equistar's business, approval of the five-year Strategic Plan (and annual updates thereof), the sale or purchase of assets or capital expenditures of more than \$30 million not contemplated by an approved Strategic Plan,

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

additional investments by Equistar's partners not contemplated by an approved Strategic Plan if the partners are required to contribute more than a total of \$100 million in a specific year or \$300 million in a five-year period (except in specific circumstances set forth under the Equistar Partnership Agreement), borrowing money under certain circumstances, issuing or repurchasing equity securities of Equistar, hiring and firing executive officers of Equistar (other than Equistar's Chief Executive Officer), approving material compensation and benefit plans for employees, commencing and settling material lawsuits, selecting or changing accountants or accounting methods and merging or combining with another business. All decisions of the Partnership Governance Committee that do not require consent of the representatives of Lyondell, Occidental and The Company (including approval of Equistar's annual budget, which must be consistent with the most recently approved Strategic Plan, and selection of Equistar's Chief Executive Officer, who must be reasonably acceptable to the Company and Occidental) may be made by Lyondell's representatives alone. The day-to-day operations of Equistar are managed by the executive officers of Equistar. Dan F. Smith, the Chief Executive Officer of Lyondell, also serves as the Chief Executive Officer of Equistar.

Millennium Petrochemicals and Equistar entered into an agreement on December 1, 1997, providing for the transfer of assets to Equistar. Among other things, such agreement sets forth representations and warranties by Millennium Petrochemicals with respect to the transferred assets and requires indemnification by Millennium Petrochemicals with respect to such assets. Such agreement also provides for the assumption of certain liabilities by Equistar, subject to specified limitations. Lyondell and affiliates of Occidental entered into a similar agreement with Equistar with respect to the transfer of their respective assets and Equistar's assumption of liabilities.

Equistar is party to a number of agreements with Millennium Petrochemicals for the provision of services, utilities and materials from one party to the other at common locations, principally La Porte, Texas, and Cincinnati, Ohio. In general, the goods and services under these agreements, other than the purchase of ethylene by Millennium Petrochemicals from Equistar and the purchase of VAM by Equistar from Millennium Petrochemicals, are provided at cost. Millennium Petrochemicals purchases its ethylene requirements at market-based prices from Equistar pursuant to a long-term contract. Equistar purchases its VAM requirements from Millennium Petrochemicals at a formula-based price pursuant to a long-term contract. Lyondell and affiliates of Occidental also entered into agreements with Equistar for the provision of services. The Company, Lyondell and an affiliate of Occidental have agreed to guarantee the obligations of their respective subsidiaries under each of the agreements discussed above, including the Equistar Partnership Agreement and the asset-transfer agreements.

### LA PORTE METHANOL COMPANY

The La Porte Methanol Company is a Delaware limited partnership that owns a methanol plant and certain related facilities in La Porte, Texas. The partnership is owned 85% by Millennium Petrochemicals and 15% by Linde. Linde is also required to purchase, under certain circumstances, an additional 5% interest in the partnership. A wholly owned subsidiary of Millennium Petrochemicals is

the managing general partner of the partnership. A wholly owned subsidiary of Linde is responsible for operating the methanol plant. The partnership commenced operations on January 18, 1999, when the methanol plant and certain related facilities owned by Millennium Petrochemicals were contributed to the

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

partnership and Linde purchased its partnership interests from Millennium Petrochemicals.

La Porte Methanol Company's methanol plant had an annual production capacity of 207 million gallons as of December 31, 2000. The plant employs a process supplied by a major engineering and construction firm to produce methanol.

Methanol is used primarily as a feedstock to produce acetic acid, MTBE and formaldehyde. Millennium Petrochemicals uses approximately 80 million gallons of La Porte Methanol Company's annual methanol production for the manufacture of acetic acid at Millennium Petrochemicals' La Porte, Texas acetic acid plant. The methanol produced by La Porte Methanol Company which is not either consumed by Millennium Petrochemicals or sold by Linde to one customer is marketed by Millennium Petrochemicals on behalf of Millennium Petrochemicals and Linde. Methanol is sold under contract as well as on a spot basis to large domestic customers. These contracts range from one to four years. The product is shipped by barge and pipeline.

The principal feedstocks for the production of methanol are carbon monoxide and hydrogen, collectively termed synthesis gas or syngas. These raw materials are largely supplied to La Porte Methanol Company from the syngas plant at La Porte, Texas owned by Millennium Petrochemicals and leased to Linde pursuant to a lease that commenced January 18, 1999. La Porte Methanol Company also purchases relatively small volumes of hydrogen from time to time from other parties.

La Porte Methanol Company's principal competitors in the methanol business are Methanex Company, Saudi Basic Industries Corporation, Lyondell Methanol Company, L.P. and Caribbean Petrochemical Marketing Company Limited. The methanol produced by Lyondell Methanol Company, L.P. is marketed by Equistar.

### EMPLOYEES

At December 31, 2000, excluding employees of Equistar and La Porte Methanol Company, the Company had approximately 4,370 full and part-time employees. Approximately 3,520 of the Company's employees were engaged in manufacturing; 465 were engaged in sales, distribution and technology; 305 were engaged in administrative, executive and support functions at the Company's operating subsidiaries; and, 80 were engaged at the corporate level. Approximately 24% of the Company's United States employees are represented by various labor unions, a significant percentage of the Company's European and Brazilian employees are represented by various worker associations, and fewer than 1% of the Company's Australian employees are represented by labor unions. Of the Company's nine collective bargaining agreements or other required labor negotiations, four must be renegotiated on an annual basis, one was successfully renegotiated in the first quarter of 2001 and must be renegotiated again in 2004, three others must be renegotiated in 2003, and another must be renegotiated in 2004. The annual renegotiations are all outside the United States. The Company believes that the relations of its operating subsidiaries with employees and unions are generally good.

### ENVIRONMENTAL MATTERS

The Company's businesses are subject to extensive federal, state, local and foreign laws, regulations, rules and ordinances concerning, among other things, emissions to the air, discharges and releases to land and water, the generation, handling, storage, transportation, treatment and disposal of wastes and other materials and the remediation of environmental pollution caused by releases of wastes and other materials ('Environmental Laws'). The operation of any chemical manufacturing plant and the distribution of chemical products entail risks under Environmental Laws, many of which provide for substantial fines and criminal sanctions for violations. There can be no assurance that material costs or

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

liabilities will not be incurred with respect to such operations and activities. In particular, the production of TiO<sub>2</sub>, TiCl<sub>4</sub>, VAM, acetic acid, methanol and certain other chemicals involves the handling, manufacture or use of substances or compounds that may be considered to be toxic or hazardous within the meaning of certain Environmental Laws, and certain operations have the potential to cause

18

environmental or other damage. Potentially significant expenditures could be required in connection with the repair or upgrade of facilities in order to meet existing or new requirements under Environmental Laws as well as in connection with the investigation and remediation of threatened or actual pollution.

The Company's costs and operating expenses relating to environmental matters were approximately \$47 million, \$45 million and \$29 million in 2000, 1999 and 1998, respectively. These amounts cover, among other things, the Company's cost of complying with environmental regulations and permit conditions, as well as managing and minimizing its waste. Capital expenditures for environmental compliance and remediation were approximately \$7 million, \$12 million and \$15 million in 2000, 1999 and 1998, respectively. In addition, capital expenditures for projects in the normal course of operations and major expansions include costs associated with the environmental impact of those projects that are inseparable from the overall project cost. Capital expenditures and costs and operating expenses relating to environmental matters for years after 2000 will be subject to evolving regulatory requirements and will depend, to some extent, on the amount of time required to obtain necessary permits and approvals.

From time to time, various agencies may serve cease and desist orders or notices of violation on an operating unit or deny its applications for certain licenses or permits, in each case alleging that the practices of the operating unit are not consistent with the regulations or ordinances. In some cases, the relevant operating unit may seek to meet with the agency to determine mutually acceptable methods of modifying or eliminating the practice in question. The Company believes that its operating units generally operate in compliance with the applicable regulations and ordinances in a manner that should not have a material adverse effect on the consolidated financial position, results of operations or cash flows of the Company.

Certain Company subsidiaries have been named as defendants, potentially responsible parties ('PRPs'), or both, in a number of environmental proceedings associated with waste disposal sites and facilities currently or previously owned, operated or used by the Company's subsidiaries or their predecessors, some of which disposal sites or facilities are on the Superfund National Priorities List of the United States Environmental Protection Agency ('EPA') or similar state lists. These proceedings seek cleanup costs, damages for personal injury or property damage, or both. Certain of these proceedings involve claims for substantial amounts, individually ranging in estimates from less than \$300,000 to \$29 million. The Company believes that the range of potential liability for environmental and other legal contingencies, collectively, but which primarily relates to environmental remediation activities and other environmental proceedings, is between \$100 million and \$105 million and has accrued \$105 million as of December 31, 2000.

One potentially significant matter in which a Company subsidiary is a PRP concerns alleged PCB contamination of a section of the Kalamazoo River from Kalamazoo, Michigan to Lake Michigan. This matter was commenced on December 2, 1987 in the United States District Court for the Western District of Michigan, as Kelly v. Allied Paper, Inc. et al. In October 2000, a Draft Remedial

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Investigation and Draft Feasibility Study was completed and submitted to the State of Michigan. This matter has been stayed and now is being addressed through the Comprehensive Environmental Response, Compensation and Liability Act ('CERCLA') by the Kalamazoo River Study Group, of which the Company's subsidiary is a member.

On May 18, 1999, the State of Maryland, Department of the Environment ('MDE'), launched an investigation of the Company's Colors and Silica Plant located in Baltimore, Maryland arising out of allegations made by a former employee that a management employee caused a monitoring device in 1994 to produce inaccurate measurements that were subsequently reported to MDE. The matter was settled in 2000 resulting in a Consent Decree requiring certain corrective actions that have been completed and a payment of \$100,000 in fines, plus a reimbursement of certain costs to the City of Baltimore. In addition, the South Carolina Department of Health and Environmental Control commenced an action on August 17, 2000 in the United States District Court for the District of South Carolina, Greenville Division, against Millennium Petrochemicals, Henkel Corporation, Piedmont Chemicals Inc., Ethox Chemicals, L.L.C. and certain other parties seeking to establish liability under CERCLA and certain South Carolina environmental statutes for certain alleged waste disposal activities

19

at a site in Simpsonville, South Carolina. Included in the suit are claims under South Carolina's statutes for civil penalties and punitive damages that could exceed \$100,000; however, the Company believes that it has substantial defenses to all such claims. In April 1997, the Illinois Attorney General's Office filed a complaint in Grundy County, Illinois Circuit Court seeking monetary sanctions for releases into the environment at Millennium Petrochemicals' Morris, Illinois plant (which was contributed to Equistar on December 1, 1997) in alleged violation of state regulations, and a civil penalty in excess of \$100,000 could result.

Potential costs and expenses related to the matters discussed above, to the extent they are probable and reasonably estimable, have been included in the collective range of potential liabilities referred to above, as well as in the accrual for environmental matters on the Company's balance sheet. The accrual also reflects the fact that certain Company subsidiaries have contractual obligations to indemnify the purchasers of certain discontinued operations against certain environmental and other liabilities. For example, the Company agreed as part of the Demerger transactions to indemnify Hanson and certain of its subsidiaries against certain of such contractual indemnification obligations. In addition, as part of the December 1, 1997 formation of Equistar, Equistar agreed to indemnify Millennium Petrochemicals for certain of the liabilities related to the assets contributed by Millennium Petrochemicals to Equistar, subject to an aggregate limitation of \$7 million, as specified in the Asset Contribution Agreement between Equistar and Millennium Petrochemicals, and Millennium Petrochemicals has agreed to indemnify Equistar for such liabilities in excess of the \$7 million limitation.

No assurance can be given that actual costs for environmental matters will not exceed accrued amounts or that estimates made with respect to indemnification obligations will be accurate. In addition, it is possible that costs will be incurred with respect to sites or indemnification obligations that currently are unknown, or as to which it is currently not possible to make an estimate.

The Company cannot predict whether developments in laws and regulations concerning environmental protection will affect its earnings or cash flow in a

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

materially adverse manner or whether its operating units, Equistar or La Porte Methanol Company will be successful in meeting future demands of regulatory agencies in a manner which will not materially adversely affect the consolidated financial position, results of operations or cash flows of the Company. For example, the Texas Natural Resources Conservation Commission ('TNRCC') has issued final regulations requiring the eight-county Houston/Galveston area to come into compliance with the National Ambient Air Quality Standard for ozone by 2007. The final regulations, if implemented, would require Equistar to make significant reductions in its emissions levels of nitrogen oxides during the next several years. This could result in capital investment by Equistar of between \$150 million and \$300 million before the 2007 deadline, as well as higher annual operating costs, and could thus potentially affect cash distributions from Equistar to the Company. On January 19, 2001, Equistar, individually and as part of an industry coalition, filed a lawsuit against the TNRCC in State District Court in Travis County, Texas. Through this lawsuit, Equistar and the industry coalition seek to encourage adoption of an alternative plan to achieve the same level of air quality improvement with less adverse effects on the region.

### PATENTS, TRADEMARKS AND LICENSES

The Company's subsidiaries have numerous United States and foreign patents, registered trademarks and trade names, together with applications. Millennium Petrochemicals has licensed to others certain of its process technology for the manufacture of VAM. Millennium Petrochemicals is also licensed by others in the application of certain processes and equipment designs. Millennium Inorganic Chemicals generally does not license its proprietary processes to third parties or hold licenses from others. While the patents and licenses of the Company's subsidiaries provide certain competitive advantages and are considered important, particularly with regard to processing technologies such as Millennium Inorganic Chemicals' proprietary chloride-production process, Millennium Petrochemicals' proprietary acetic acid process and Millennium Specialty Chemicals' proprietary terpene chemistry process, the Company does not consider its business, as a whole, to be materially dependent upon any one particular patent or license.

20

### EXECUTIVE OFFICERS

The following individuals serve as executive officers of the Company:

NAME	POSITION
----	-----
William M. Landuyt.....	Chairman of the Board, President and Chief Executive Officer
Robert E. Lee.....	Executive Vice President -- Growth and Development
Timothy E. Dowdle.....	Senior Vice President -- Manufacturing, Operational Excellence Businesses
Peter P. Hanik.....	Senior Vice President -- Technology
George H. Hempstead, III.....	Senior Vice President -- General Counsel and Secretary
Richard A. Lamond.....	Senior Vice President -- Human Resources and Administration
John E. Lushefski.....	Senior Vice President and Chief Financial

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Officer  
David L. Vercollone..... Senior Vice President -- Commercial,  
Operational Excellence Businesses

As noted under 'Item 1 -- Business, Recent Developments' above, the Company announced on March 23, 2001 that it had restructured Company's business and management. As a result of this restructuring, the Executive Committee of the Board of Directors determined that, as of March 21, 2001, the 'executive officers' of the Company are the eight officers who serve as members of the Company's Operations Committee. The following is a brief description of each such executive officer.

Mr. Landuyt, 45, has served as Chairman of the Board and Chief Executive Officer of the Company since the Demerger. He has served as the President of the Company since June 1997. Mr. Landuyt was Director, President and Chief Executive Officer of Hanson Industries (which managed the United States operations of Hanson until the Demerger) from June 1995 until the Demerger, a Director of Hanson from 1992 until September 29, 1996, Finance Director of Hanson from 1992 to May 1995, and Vice President and Chief Financial Officer of Hanson Industries from 1988 to 1992. He joined Hanson Industries in 1983. He is a member and a Co-Chairman of the Partnership Governance Committee of Equistar. He is also a director of Bethlehem Steel Corporation.

Mr. Lee, 44, has served as Executive Vice President -- Growth and Development of the Company since March 21, 2001. He was President and Chief Executive Officer of Millennium Inorganic Chemicals from June 1997 to March 21, 2001. From the Demerger to June 1997, he served as the President and Chief Operating Officer of the Company. He has been a Director of the Company since the Demerger. Mr. Lee was a Director and the Senior Vice President and Chief Operating Officer of Hanson Industries from June 1995 until the Demerger, an Associate Director of Hanson from 1992 until the Demerger, Vice President and Chief Financial Officer of Hanson Industries from 1992 to June 1995, Vice President and Treasurer of Hanson Industries from 1990 to 1992, and Treasurer of Hanson Industries from 1987 to 1990. He joined Hanson Industries in 1982.

Mr. Dowdle, 49, has served as Senior Vice President -- Manufacturing, Operational Excellence Businesses, of the Company since March 21, 2001. He served as Senior Vice President -- Global Manufacturing of Millennium Inorganic Chemicals from January 1999 to March 21, 2001 and as Vice President -- Manufacturing of Millennium Inorganic Chemicals from September 1997 to January 1999. Mr. Dowdle served as General Manager of Millennium Petrochemicals' Morris Complex from June 1993 to September 1997. He joined Millennium Petrochemicals in December 1980.

Mr. Hanik, 54, has served as Senior Vice President -- Technology of the Company since March 21, 2001. He was President and Chief Executive Officer of Millennium Petrochemicals from March 1998 to March 21, 2001. Prior to that time, he served as Vice President, Chemicals and Supply Chain of Millennium Petrochemicals, where he was responsible for the Company's acetyls business. Mr. Hanik joined Millennium Petrochemicals in 1974 and has been associated with the plastic and chemical industries for over 30 years.

21

Mr. Hempstead, 57, has served as Senior Vice President -- General Counsel and Secretary of the Company since March 21, 2001. He served as Senior Vice President -- Law and Administration and Secretary of the Company from the Demerger to March 21, 2001. He was Senior Vice President -- Law and

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Administration of Hanson Industries from June 1995 until the Demerger, an Associate Director of Hanson from 1990 until the Demerger, and a Director of Hanson Industries from 1986 until the Demerger. Mr. Hempstead was Senior Vice President and General Counsel of Hanson Industries from 1993 to June 1995 and Vice President and General Counsel of Hanson Industries from 1982 to 1993. He initially joined Hanson Industries in 1976.

Mr. Lamond, 54, has served as Senior Vice President -- Human Resources and Administration of the Company since March 21, 2001 and as Vice President -- Human Resources of the Company from November 1997 to March 21, 2001. He served as Vice President -- Human Resources for Millennium Inorganic Chemicals from March 1997 to November 1997 and as Vice President -- Human Resources for Grove Worldwide, a subsidiary of Hanson, from September 1994 to March 1997.

Mr. Lushefski, 45, has served as Senior Vice President and Chief Financial Officer of the Company since the Demerger. He was a Director and the Senior Vice President and Chief Financial Officer of Hanson Industries from June 1995 until the Demerger. He was Vice President and Chief Financial Officer of Peabody Holding Company, a Hanson subsidiary which held Hanson's coal mining operations, from 1991 to May 1995 and Vice President and Controller of Hanson Industries from 1990 to 1991. Mr. Lushefski initially joined Hanson Industries in 1985. Mr. Lushefski is a member of the Equistar Partnership Governance Committee.

Mr. Vercollone, 53, has served as Senior Vice President -- Commercial, Operational Excellence Businesses, of the Company since March 21, 2001. He served as Senior Vice President, Commercial Operations of Millennium Inorganic Chemicals from 1998 to March 21, 2001, and as Senior Vice President -- Global Sales and Marketing and General Manager -- Americas of Millennium Inorganic Chemicals from 1997 to 1998. From 1990 to 1997, he was Vice President and General Manager -- Americas of Millennium Inorganic Chemicals. Mr. Vercollone joined Millennium Inorganic Chemicals as Vice President Sales and Marketing in 1986 and served in that position until 1997. Prior to joining Millennium Inorganic Chemicals, Mr. Vercollone spent 17 years with Union Carbide Corporation in their Unipol Polymers Division, where he held a number of positions in sales and marketing.

### ITEM 2. PROPERTIES

Set forth below is a list of the Company's principal manufacturing facilities (other than those of Equistar and La Porte Methanol Company), all of which are owned. In addition, the Company owns a mineral sands mine in Mataraca, Paraiba, Brazil that supplies Millennium Inorganic Chemicals' TiO<sub>2</sub> plant in Brazil with titanium ore, and Millennium Petrochemicals owns a syngas plant in La Porte, Texas, which it leases to Linde. The Company's operating subsidiaries also lease warehouses and offices, none of which are material to the Company's business or operations. The Company believes that its properties are well maintained and are in good operating condition.

22

LOCATION	PRODUCTS
-----	-----
Millennium Inorganic Chemicals Ashtabula, Ohio*.....	TiO <sub>2</sub> and TiCl <sub>4</sub>

-----

- \* Millennium Inorganic Chemicals has two TiO[u]2 manufacturing plants at Ashtabula, Ohio, both of which use the chloride process, and two TiO[u]2 manufacturing plants located in Baltimore, Maryland (Hawkins Point), one of which uses the chloride process for manufacturing TiO[u]2 and the other of which uses the sulfate process.

### ITEM 3. LEGAL PROCEEDINGS

The Company and various Company subsidiaries are defendants in a number of pending legal proceedings incidental to present and former operations. These include several proceedings alleging injurious exposure of the plaintiffs to various chemicals and other materials manufactured by the Company's current and former subsidiaries. Typically, such proceedings involve large claims made by many plaintiffs against many defendants in the chemical industry. The Company does not expect that the outcome of these proceedings, either individually or in the aggregate, will have a material adverse effect upon the consolidated financial position, results of operations or cash flows of the Company.

In addition, together with other alleged past manufacturers of lead pigments for use in paint and lead-based paint, an alleged former subsidiary of a discontinued operation has been named as a defendant or third-party defendant in various legal proceedings alleging that it and other manufacturers are responsible for personal injury and property damage allegedly associated with the use of lead pigments in paint and lead-based paint. These proceedings consist of three cases in the State of New York, one of which has been brought by the New York City Housing Authority; a case brought by the State of Rhode Island; a case brought by The City of St. Louis; a purported class action personal injury case filed on behalf of all purportedly lead-poisoned children in Ohio; seven cases filed in Baltimore, Maryland, one on behalf of several plaintiffs alleging personal injury, one purported class action for property damage on behalf of homeowners who allegedly have lead-based paint in their homes and five cases that have been filed but not served on behalf of five plaintiffs who recently achieved majority status; one personal injury case filed in Milwaukee, Wisconsin; a case brought by the County of Santa Clara, California, individually and as a purported class action; a personal injury/medical monitoring case brought in Illinois; two cases filed by school districts in Harris County, Texas; and, a personal injury case filed on behalf of two minors in San Francisco, California.

The pending legal proceedings referred to above are as follows: Brenner, et al. v. American Cyanamid Company, et al., commenced in the Supreme Court of the State of New York on November 9, 1993; The City of New York, et al. v. Lead

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Industries Association, Inc. (hereinafter referred to as 'LIA'), et al., commenced in the Supreme Court of New York on June 8, 1989; Kayla Sabater, et al. v. LIA, et al., commenced in the Supreme Court of New York, Bronx County on November 25, 1998; Jackson, et al. v. The Glidden Co., et al., commenced in the Court of Common Pleas, Cuyahoga County, Ohio on

23

August 12, 1992; State of Rhode Island v. LIA, et al., commenced in the Superior Court of Providence, Rhode Island on October 12, 1999; City of St. Louis v. LIA, et al., commenced in St. Louis, Missouri Circuit Court on January 25, 2000; Steven Thomas, et al. v. LIA, et al., commenced in the Milwaukee County, Wisconsin Circuit Court on September 10, 1999; Reginald Smith, et al. v. LIA, et al. and Joan Young, et al. v. LIA et al. (formerly Cofield et al. v. LIA et al.), both commenced in the Baltimore City, Maryland Circuit Court on September 29, 1999; The County of Santa Clara, a political subdivision of the State of California, individually and on behalf of 11 of those similarly situated v. Atlantic Richfield et al., commenced in the Santa Clara County, California Superior Court on March 23, 2000; Lewis et al. v. LIA et al., commenced in state court in Cook County, Illinois on June 20, 2000; Spring Branch Independent School District v. LIA et al., commenced in state court in Harris County, Texas on June 20, 2000; Houston Independent School District v. LIA et al., commenced in state court in Harris County, Texas on June 30, 2000; Justice, et al. v. Sherwin-Williams Company, et al. commenced in state court in San Francisco County, California on August 28, 2000; and, five cases all commenced in state court in Baltimore, Maryland: Hall, et al. v. LIA, et al. commenced on June 19, 2000; Hart v. LIA, et al. commenced on June 26, 2000; Williams v. LIA, et al. commenced on July 11, 2000; Randle v. LIA, et al. commenced on August 10, 2000; and, Johnson, et al. v. Clinton, et al. commenced on October 10, 2000.

There can be no assurance that additional litigation will not be filed. The legal proceedings seek recovery under a variety of theories, including negligence, failure to warn, breach of warranty, conspiracy, market share liability, fraud, misrepresentation and nuisance. The plaintiffs in these actions generally seek to impose on the defendants responsibility for alleged damages and health concerns associated with the use of lead pigments in paint and lead-based paint. These cases are in various pre-trial stages. The trial court in the Brenner case cited below had ruled that a market share theory of recovery was applicable to this type of lead case, which is the first time any court made such a determination. The New York Appellate Division unanimously reversed the trial court's decision, ruling that the market share theory is not applicable to this type of lead case. The Company is vigorously defending all litigation related to the use of lead. Although liability, if any, that may result is not reasonably capable of estimation, the Company currently believes that, based on information currently available, the disposition of such claims in the aggregate should not have a material adverse effect on the consolidated financial position, results of operations or cash flows of the Company.

In addition, various laws and administrative regulations have, from time to time, been enacted or proposed at the federal, state and local levels and may be proposed in the future that seek to (i) impose various obligations on present and former manufacturers of lead pigment and lead paint with respect to asserted health concerns associated with the use of such products, and (ii) effectively overturn court decisions in which an alleged former subsidiary of the Company and other defendants have been successful. No legislation or regulations have been adopted to date that are expected to have a material adverse effect on the consolidated financial position, results of operations or cash flows of the Company.

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Celanese filed suit against Millennium Petrochemicals on September 30, 1999 in the United States District Court for the Southern District of Texas alleging infringement of a Celanese patent relating to acetic acid production technology. In the suit, Celanese seeks monetary damages and injunctive relief. The Company has substantial defenses to this lawsuit and is vigorously defending it.

For information concerning the Company's environmental proceedings, see 'Environmental Matters' in Item 1 of this Annual Report on Form 10-K, which is incorporated by reference herein.

### ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

24

## PART II

### ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY AND RELATED SHAREHOLDER MATTERS

The data regarding the Company's Common Stock, Dividends and Shareholders contained under the caption 'Common Stock and Dividend Data' on page 48 of the Annual Report to Shareholders are incorporated into this Annual Report on Form 10-K by reference.

As of March 23, 2001, there were 19,347 record holders of Common Stock. The closing price per share of Common Stock as reported by the New York Stock Exchange on such date was \$16.22.

### ITEM 6. SELECTED FINANCIAL DATA

The selected financial data and quarterly financial data of the Company contained on pages 46 and 47 of the Annual Report to Shareholders are incorporated into this Annual Report on Form 10-K by reference. Such selected financial data were derived from the Consolidated Financial Statements of the Company, and should be read in conjunction with such financial statements, including the Notes thereto, and 'Management's Discussion and Analysis of Financial Condition and Results of Operations,' which are incorporated by reference into this Annual Report on Form 10-K from the Annual Report to Shareholders.

### ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Company's 'Management's Discussion and Analysis of Financial Condition and Results of Operations' contained on pages 18 through 26 of the Annual Report to Shareholders is incorporated into this Annual Report on Form 10-K by reference. Such information should be read in conjunction with the Company's Consolidated Financial Statements, including the Notes thereto. In connection with the forward-looking statements which appear in 'Management's Discussion and Analysis of Financial Condition and Results of Operations,' the 'Cautionary Statements' that appear immediately after the Table of Contents in this Annual Report on Form 10-K should be reviewed carefully.

### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The discussions under the captions 'Foreign Currency Matters,' 'Financial

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Instruments and other Market Related Risks' and 'Euro Conversion' in the Company's 'Management's Discussion and Analysis of Financial Condition and Results of Operations' and the discussion under the caption 'Off Balance Sheet Risk' in Note 7 to the Company's Consolidated Financial Statements, each of which is included in the Annual Report to Shareholders, are incorporated into this Annual Report on Form 10-K by reference.

### ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The Consolidated Financial Statements of the Company, including the Notes thereto, and the report of PricewaterhouseCoopers LLP thereon, contained on pages 27 through 45 of the Annual Report to Shareholders are incorporated into this Annual Report on Form 10-K by reference.

In addition, the Supplemental Financial Information and Financial Statement Schedule listed in Item 14(a)(1)(ii) and (2) of this Annual Report on Form 10-K, including the report of PricewaterhouseCoopers LLP thereon, are incorporated herein by reference.

### ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

## PART III

### ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

The information included under the caption 'Executive Officers' in Item 1 of this Annual Report on Form 10-K is incorporated herein by reference.

25

The information to be included under the captions 'Election of Directors' and 'Other Matters -- Section 16(a) Beneficial Ownership Reporting Compliance' in the Company's definitive proxy statement to be filed with the Commission pursuant to Regulation 14A of the Exchange Act in connection with the Annual Meeting of the Company's Shareholders to be held on May 18, 2001 (the 'Proxy Statement') is incorporated herein by reference.

### ITEM 11. EXECUTIVE COMPENSATION

The information to be included under the captions 'Corporate Governance -- Directors' Remuneration and Attendance at Meetings' and 'Executive Compensation' in the Proxy Statement is incorporated herein by reference.

### ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information to be included under the caption 'Ownership of Common Stock' in the Proxy Statement is incorporated herein by reference.

### ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information about loans between the Company and certain of its executive officers to be included under the caption 'Executive Agreements and Other Relationships' in the Proxy Statement is incorporated herein by reference. The amount of the loans disclosed therein is the largest aggregate amount of indebtedness outstanding between the Company and each such executive officer during the period January 1, 2000 and the date of this Annual Report on Form

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

10-K, as well as the amount outstanding on the date hereof, except as otherwise disclosed therein with respect to Mr. Landuyt.

### PART IV

#### ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULE AND REPORTS ON FORM 8-K

(a) THE FOLLOWING DOCUMENTS ARE FILED AS PART OF THIS REPORT:

1. (i) The Consolidated Financial Statements of the Company, including the Notes thereto, and the report of PricewaterhouseCoopers LLP thereon, contained on pages 27 through 45 of the Annual Report to Shareholders, consist of the following:

	PAGE OF THE COMPANY'S ANNUAL REPORT -----
-- Report of PricewaterhouseCoopers LLP.....	27
-- Consolidated Balance Sheets -- December 31, 2000 and 1999.....	28
-- Consolidated Statements of Operations -- Years Ended December 31, 2000, 1999 and 1998.....	29
-- Consolidated Statements of Cash Flows -- Years Ended December 31, 2000, 1999 and 1998.....	30
-- Consolidated Statements of Changes in Shareholders' Equity -- Years Ended December 31, 2000, 1999 and 1998..	31
-- Notes to Consolidated Financial Statements.....	32 - 45

With the exception of the information listed directly above and the information specifically incorporated by reference into Items 1, 5, 6, 7, 7A and 8 of this Annual Report on Form 10-K, the Annual Report to Shareholders is not to be deemed filed as a part of this Annual Report on Form 10-K.

(ii) Supplemental Financial Information.

26

The Supplemental Financial Information relating to the Company, Millennium America Inc. ('Millennium America') and Equistar consist of the following:

	PAGE OF THIS REPORT -----
Report of PricewaterhouseCoopers LLP.....	F-1
Supplemental Financial Information of the Company:

REPORT OF INDEPENDENT ACCOUNTANTS ON  
SUPPLEMENTAL FINANCIAL INFORMATION AND  
THE FINANCIAL STATEMENT SCHEDULE

To the Board of Directors of  
MILLENNIUM CHEMICALS INC.

Our audits of the consolidated financial statements referred to in our report dated January 26, 2001, appearing on page 27 of the 2000 Annual Report to Shareholders of Millennium Chemicals Inc. (which report and consolidated financial statements are incorporated by reference in this Annual Report on Form 10-K) also included an audit of the Supplemental Financial Information of Millennium Chemicals Inc. and the Financial Statement Schedule listed in Item 14(a) of this Annual Report on Form 10-K. In our opinion, such Supplemental Financial Information of Millennium Chemicals Inc. and the Financial Statement Schedule present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

PRICEWATERHOUSECOOPERS LLP

MILLENNIUM CHEMICALS INC.  
SUPPLEMENTAL FINANCIAL INFORMATION

Millennium America Inc. ('Millennium America'), a wholly owned indirect subsidiary of Millennium Chemicals Inc. (the 'Company'), is a holding company for all of the Company's operating subsidiaries other than its operations in the United Kingdom, France, Brazil and Australia. Millennium America is the issuer of the 7% Senior Notes due November 15, 2006, and the 7.625% Senior Debentures due November 15, 2026, and is the principal borrower under the Company's Revolving Credit Agreement. The Senior Notes and Senior Debentures, as well as the borrowings under the Revolving Credit Agreement, are guaranteed by the Company. Accordingly, the following Condensed Consolidating Balance Sheets at December 31, 2000 and 1999, and the Condensed Consolidating Statements of Operations and Cash Flows for each of the three years in the period ended December 31, 2000, are provided for Millennium Chemicals Inc. as supplemental financial information of the Company.

To the Partnership Governance Committee  
of EQUISTAR CHEMICALS, LP:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income and comprehensive income, of partners' capital and of cash flows present fairly, in all material respects, the financial position of Equistar Chemicals, LP (the 'Partnership') and its subsidiaries at December 31, 2000 and 1999, and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Partnership's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

EQUISTAR CHEMICALS, LP  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. FORMATION OF THE PARTNERSHIP AND OPERATIONS

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Pursuant to a partnership agreement ('Partnership Agreement'), Lyondell Chemical Company ('Lyondell') and Millennium Chemicals Inc. ('Millennium') formed Equistar Chemicals, LP ('Equistar' or 'Partnership'), a Delaware limited partnership, which commenced operations on December 1, 1997. From December 1, 1997 to May 15, 1998, Equistar was owned 57% by Lyondell and 43% by Millennium. Lyondell owns its interest in Equistar through two wholly owned subsidiaries, Lyondell Petrochemical G.P. Inc. and Lyondell Petrochemical L.P. Inc. ('Lyondell LP'). Millennium also owns its interest in Equistar through two wholly owned subsidiaries, Millennium Petrochemicals GP LLC and Millennium Petrochemicals LP LLC ('Millennium LP').

On May 15, 1998, Equistar was expanded with the contribution of certain assets from Occidental Petroleum Corporation ('Occidental') (see Note 3). These assets included the ethylene, propylene and ethylene oxide ('EO') and EO derivatives businesses and certain pipeline assets held by Oxy Petrochemicals Inc. ('Oxy Petrochemicals'), a former subsidiary of Occidental, a 50% interest in a joint venture ('PD Glycol') between PDG Chemical Inc. and E.I. DuPont de Nemours and Company, and a lease to Equistar of the Lake Charles, Louisiana olefins plant and related pipelines held by Occidental Chemical Corporation ('Occidental Chemical') (collectively, 'Occidental Contributed Business'). Occidental Chemical and PDG Chemical Inc. are both wholly owned, indirect subsidiaries of Occidental. The Occidental Contributed Business included olefins plants at Corpus Christi and Chocolate Bayou, Texas, EO/ethylene glycol ('EG') and EG derivatives businesses located at Bayport, Texas, Occidental's 50% ownership of PD Glycol which operates EO/EG plants at Beaumont, Texas, 950 miles of owned and leased ethylene/propylene pipelines, and the lease to Equistar of the Lake Charles, Louisiana olefins plant and related pipelines.

In exchange for the Occidental Contributed Business, two subsidiaries of Occidental were admitted as limited partners and a third subsidiary was admitted as a general partner in Equistar for an aggregate partnership interest of 29.5%. In addition, Equistar assumed approximately \$205 million of Occidental indebtedness and Equistar issued a promissory note to an Occidental subsidiary in the amount of \$420 million, which was subsequently paid in cash in June 1998. In connection with the contribution of the Occidental Contributed Business and the reduction of Millennium's and Lyondell's ownership interests in the Partnership, Equistar also issued a promissory note to Millennium LP in the amount of \$75 million, which was subsequently paid in June 1998. These payments are included in 'Distributions to partners' in the accompanying Statements of Partners' Capital and of Cash Flows. The consideration paid for the Occidental Contributed Business was determined based upon arms-length negotiations between Lyondell, Millennium and Occidental. In connection with the transaction, Equistar and Occidental also entered into a long-term agreement for Equistar to supply the ethylene requirements for Occidental Chemical's U.S. manufacturing plants.

Upon completion of this transaction, Equistar is now owned 41% by Lyondell, 29.5% by Millennium and 29.5% by Occidental, all through wholly owned subsidiaries.

Equistar owns and operates the petrochemicals and polymers businesses contributed by Lyondell, Millennium and Occidental ('Contributed Businesses'), which consist of 17 manufacturing facilities primarily on the U.S. Gulf Coast and in the U.S. Midwest. The petrochemicals segment manufactures and markets olefins, oxygenated products, aromatics and specialty products. Olefins include ethylene, propylene and butadiene, and oxygenated products include ethylene oxide, ethylene glycol, ethanol and methyl tertiary butyl ether ('MTBE'). The petrochemicals segment also includes the production and sale of aromatics, including benzene and toluene. The polymers segment manufactures and markets polyolefins, including high-density polyethylene ('HDPE'), low-density polyethylene ('LDPE'), linear low-density polyethylene ('LLDPE'), polypropylene,

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

and performance polymers, all of which are used in the production of a wide variety of consumer and industrial products. The performance polymers include enhanced grades of polyethylene, including wire and cable insulating resins, and polymeric

F-12

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

powders. The concentrates and compounds business, which was part of performance polymers products, was sold effective April 30, 1999 (see Note 5).

The Partnership Agreement provides that Equistar is governed by a Partnership Governance Committee consisting of nine representatives, three appointed by each partner. Most of the significant decisions of the Partnership Governance Committee require unanimous consent, including approval of the Partnership's Strategic Plan and annual updates thereof.

Pursuant to the Partnership Agreement, net income is allocated among the partners on a pro rata basis based upon their percentage ownership of Equistar. Distributions are made to the partners based upon their percentage ownership of Equistar. Additional cash contributions required by the Partnership will also be based upon the partners' percentage ownership of Equistar.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

**Basis of Presentation** -- The consolidated financial statements include the accounts of Equistar and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

**Revenue Recognition** -- Revenue from product sales is recognized upon delivery of products to the customer.

**Cash and Cash Equivalents** -- Cash equivalents consist of highly liquid debt instruments such as certificates of deposit, commercial paper and money market accounts purchased with an original maturity date of three months or less. Cash equivalents are stated at cost, which approximates fair value. Equistar's policy is to invest cash in conservative, highly rated instruments and limit the amount of credit exposure to any one institution. Equistar performs periodic evaluations of the relative credit standing of these financial institutions which are considered in Equistar's investment strategy.

Equistar has no requirements for compensating balances in a specific amount at a specific point in time. The Partnership does maintain compensating balances for some of its banking services and products. Such balances are maintained on an average basis and are solely at Equistar's discretion. As a result, none of Equistar's cash is restricted.

**Accounts Receivable** -- Equistar sells its products primarily to companies in the petrochemicals and polymers industries. Equistar performs ongoing credit evaluations of its customers' financial condition and, in certain circumstances, requires letters of credit from them. The Partnership's allowance for doubtful accounts, which is reflected in the accompanying Consolidated Balance Sheets as a reduction of accounts receivable, totaled \$9 million and \$6 million at December 31, 2000 and 1999, respectively.

**Property, Plant and Equipment** -- Property, plant and equipment are recorded at cost. Depreciation of property, plant and equipment is computed using the

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

straight-line method over the estimated useful lives of the related assets, ranging from 5 to 30 years. Upon retirement or sale, Equistar removes the cost of the assets and the related accumulated depreciation from the accounts and reflects any resulting gains or losses in the Consolidated Statements of Income. Equistar's policy is to capitalize interest cost incurred on debt during the construction of major projects exceeding one year.

Turnaround Maintenance and Repair Expenses -- Cost of major repairs and maintenance incurred in connection with substantial overhauls or maintenance turnarounds of production units at Equistar's manufacturing facilities are deferred and amortized on a straight-line basis until the next planned turnaround, generally five to seven years. These costs are maintenance, repair and replacement costs that are necessary to maintain, extend and improve the operating capacity and efficiency rates of the production units. Equistar amortized \$24 million, \$25 million and \$20 million of deferred turnaround maintenance and repair costs for the years ended December 31, 2000, 1999 and 1998, respectively.

Deferred Software Costs -- Costs to purchase and develop software for internal use are deferred and amortized on a straight-line basis over a range of 3 to 10 years. Equistar amortized \$13 million, \$12

F-13

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

million and \$6 million of deferred software costs for the years ended December 31, 2000, 1999 and 1998, respectively.

Goodwill -- Goodwill includes goodwill contributed by Millennium and goodwill recorded in connection with the contribution of Occidental's assets. Goodwill is being amortized using the straight-line method over 40 years. Accumulated amortization of goodwill was \$232 million, \$199 million and \$166 million at December 31, 2000, 1999 and 1998, respectively.

Investment in PD Glycol -- Equistar holds a 50% interest in a joint venture with E.I. DuPont de Nemours and Company that owns an ethylene glycol facility in Beaumont, Texas. This investment was contributed by Occidental in 1998. The investment in PD Glycol is accounted for using the equity method of accounting. At December 31, 2000 and 1999, Equistar's underlying equity in the net assets of PD Glycol exceeded the cost of the investment by \$7 million and \$8 million, respectively. The excess is being accreted into income on a straight-line basis over a period of 25 years.

Environmental Remediation Costs -- Expenditures related to investigation and remediation of contaminated sites, which include operating facilities and waste disposal sites, are accrued when it is probable a liability has been incurred and the amount of the liability can be reasonably estimated. The estimated liabilities have not been discounted to present value. Environmental remediation costs are expensed or capitalized in accordance with accounting principles generally accepted in the United States of America.

Exchanges -- Inventory exchange transactions, which involve homogeneous commodities in the same line of business and do not involve the payment or receipt of cash, are not accounted for as purchases and sales. Any resulting volumetric exchange balances are accounted for as inventory in accordance with the normal LIFO valuation policy.

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Income Taxes -- The Partnership is not subject to federal income taxes as income is reportable directly by the individual partners; therefore, there is no provision for income taxes in the accompanying financial statements.

Use of Estimates -- The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Comprehensive Income -- Equistar had no items of other comprehensive income during the years ended December 31, 2000, 1999 and 1998.

Long-Lived Asset Impairment -- In accordance with SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of, Equistar reviews its long-lived assets, including goodwill, for impairment on an exception basis whenever events or changes in circumstances indicate a potential loss in utility. Impairment losses are recognized in 'Restructuring and other unusual charges' in the Consolidated Statements of Income.

Derivatives -- Adoption of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, did not have a significant impact on the Consolidated Financial Statements of Equistar. The statement is effective for Equistar's calendar year 2001.

Reclassifications -- Certain previously reported amounts have been reclassified to conform to classifications adopted in 2000.

### 3. OCCIDENTAL CONTRIBUTED BUSINESS

On May 15, 1998, Equistar was expanded with the contribution of certain assets from Occidental. The acquisition was accounted for using the purchase method of accounting and, accordingly, the results of operations for these assets are included in the accompanying Consolidated Statements of Income

F-14

#### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

prospectively from May 15, 1998. Occidental contributed assets and liabilities to Equistar with a net fair value of \$2.1 billion in exchange for a 29.5% interest in the Partnership. Equistar also issued a promissory note to an Occidental subsidiary in the amount of \$420 million, which was subsequently paid in cash in June 1998. The fair value was allocated to the assets contributed and liabilities assumed based upon the estimated fair values of such assets and liabilities at the date of the contribution. The fair value was determined based upon a combination of internal valuations performed by Lyondell, Millennium and Occidental using the income approach. The fair values of the assets contributed and liabilities assumed by the Partnership on May 15, 1998 were as follows:

(MILLIONS OF DOLLARS)

Total current assets.....	\$ 281
Property, plant and equipment.....	1,964
Investment in PD Glycol.....	58

Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Goodwill.....	43
Deferred charges and other assets.....	49
	-----
Total assets.....	\$2,395
	-----
	-----
Other current liabilities.....	\$ 79
Long-term debt.....	205
Other liabilities and deferred credits.....	14
Partners' capital.....	2,097
	-----
Total liabilities and partners' capital.....	\$2,395
	-----
	-----

The unaudited pro forma combined historical results of Equistar as if the Occidental Contributed Business had been contributed on January 1, 1998 were as follows:

FOR THE YEAR ENDED  
DECEMBER 31, 1998

-----  
(MILLIONS OF DOLLARS)

Sales and other operating revenues.....	\$4,869
Restructuring and other unusual charges.....	14
Operating income.....	320
Net income.....	154

The unaudited pro forma data presented above are not necessarily indicative of the results of operations of Equistar that would have occurred had such transaction actually been consummated as of January 1, 1998, nor are they necessarily indicative of future results.

4. RELATED PARTY TRANSACTIONS

Product Transactions with Lyondell -- Lyondell has purchased benzene, ethylene, propylene and other products at market-related prices from Equistar since Lyondell's acquisition of ARCO Chemical Company in July 1998. Currently, Equistar sells ethylene, propylene and benzene to Lyondell at market-related prices pursuant to agreements dated effective as of August 1999. Under the agreements, Lyondell is required to purchase 100% of its benzene, ethylene and propylene requirements for its Channelview and Bayport, Texas facilities, with the exception of quantities of one product that Lyondell is obligated to purchase under a supply agreement with an unrelated third party entered into prior to 1999 and expiring in 2015. The initial term of each of the agreements between Equistar and Lyondell expires on December 31, 2014. After the initial term, each of those agreements automatically renews for successive one-year periods and either party may terminate any of the agreements on one year's notice. The pricing terms under the agreements between Equistar and Lyondell are similar to the pricing terms under the ethylene sales agreement between Equistar and Occidental Chemical. In addition, a wholly owned subsidiary of Lyondell licenses MTBE technology to Equistar. Lyondell also purchases a significant portion of the MTBE produced by Equistar at one of its two Channelview units at market-related prices. Sales to Lyondell totaled \$572 million, \$242 million and \$89 million for the years ended

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

December 31, 2000 and 1999 and for the period from August 1, 1998 to December 31, 1998, respectively. Purchases from Lyondell totaled \$2 million, \$6 million and \$2 million for the years ended December 31, 2000 and 1999 and for the period from August 1, 1998 to December 31, 1998, respectively.

Product Transactions with Occidental Chemical -- Equistar and Occidental Chemical entered into a Sales Agreement, dated May 15, 1998 ('Ethylene Sales Agreement'). Under the terms of the Ethylene Sales Agreement, Occidental Chemical agreed to purchase an amount of ethylene from Equistar equal to 100% of the ethylene feedstock requirements of Occidental Chemical's United States plants less any quantities up to 250 million pounds tolled in accordance with the provisions of such agreement. Upon three years notice from either party to the other, Equistar's maximum supply obligation in any calendar year under the Ethylene Sales Agreement may be 'phased down' as set forth in the agreement, provided that no phase down may occur prior to January 1, 2009. In accordance with the phase down provisions of the agreement, the annual minimum requirements set forth in the agreement must be phased down over at least a five year period so that the annual required minimum cannot decline to zero prior to December 31, 2013 unless certain specified force majeure events occur. The Ethylene Sales Agreement provides for sales of ethylene at market-related prices. In addition to ethylene, Equistar sells methanol, ethers, and glycols to Occidental Chemical. During the years ended December 31, 2000 and 1999 and the period from May 15, 1998 to December 31, 1998, Equistar sold Occidental Chemical \$558 million, \$435 million and \$171 million, respectively, of product, primarily under the Ethylene Sales Agreement.

Equistar also purchases various products from Occidental Chemical. During the years ended December 31, 2000 and 1999 and the period from May 15, 1998 to December 31, 1998, purchases from Occidental Chemical totaled \$2 million, \$2 million and \$4 million, respectively.

Product Transactions with Millennium -- Equistar sells ethylene to Millennium at market-related prices pursuant to an agreement entered into in connection with the formation of Equistar. Under this agreement, Millennium is required to purchase 100% of its ethylene requirements for its LaPorte, Texas facility. The initial term of the contract expired December 1, 2000 and thereafter, renews annually. Either party may terminate on one year's notice. Neither party has provided notice of termination of the agreement. The pricing terms of this agreement are similar to the pricing terms of the Ethylene Sales Agreement with Occidental Chemical. Equistar sold Millennium \$90 million, \$54 million, and \$41 million of ethylene in 2000, 1999 and 1998, respectively.

Equistar purchases vinyl acetate monomer ('VAM') feedstock from Millennium at formula-based market prices pursuant to an agreement entered into in connection with the formation of Equistar. Under this agreement, Equistar is required to purchase 100% of its VAM feedstock requirements for its LaPorte, Texas, Clinton, Illinois, and Morris, Illinois plants for the production of ethylene vinyl acetate products at those locations. The initial term of the contract expires December 31, 2000 and thereafter, renews annually. Either party may terminate on one year's notice of termination. The initial term will extend until December 31, 2002 if Millennium elects to increase the amount of ethylene purchased under the Ethylene Sales Agreement. Millennium did not elect to increase the amount of ethylene purchased under the Ethylene Sales Agreement. Therefore, the contract for VAM purchases expired December 31, 2000 and was subsequently renewed for one year under the automatic renewal provisions. During

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

the years ending December 31, 2000, 1999 and 1998, purchases from Millennium, primarily of vinyl acetate monomer, were \$16 million, \$12 million, and \$14 million, respectively.

Product Transactions with Oxy Vinyls, LP -- Occidental Chemical owns 76% of Oxy Vinyls, LP ('Oxy Vinyls'), a joint venture company formed with an unrelated third party effective May 1, 1999. Equistar sells ethylene to Oxy Vinyls for Oxy Vinyls' LaPorte, Texas facility at market-related prices pursuant to an agreement dated effective as of June 1998, which agreement was assigned to Oxy Vinyls by one of its owners. The initial term of the agreement expires on December 31, 2003. After the initial term, the agreement automatically renews for successive one-year periods and either party may

F-16

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

terminate the agreement on 24 months' notice. Ethylene sales to Oxy Vinyls totaled \$67 million for the year ended December 31, 2000 and \$93 million for the period from May 1, 1999 to December 31, 1999.

Transactions with LYONDELL-CITGO Refining LP -- Lyondell's rights and obligations under the terms of its product sales and feedstock purchase agreements with LYONDELL-CITGO Refining LP ('LCR'), a joint venture investment of Lyondell, were assigned to Equistar. Accordingly, certain olefins by-products are sold to LCR for processing into gasoline and certain refinery products are sold to Equistar as feedstocks. Sales of product to LCR were \$425 million, \$250 million and \$223 million and purchases from LCR were \$264 million, \$190 million and \$131 million for the years ended December 31, 2000, 1999 and 1998, respectively. Equistar also assumed certain processing arrangements as well as storage obligations between Lyondell and LCR and provides certain marketing and information processing services for LCR. Aggregate charges under these various service agreements of \$15 million, \$13 million and \$15 million were made to LCR by Equistar for the years ended December 31, 2000, 1999 and 1998, respectively. All of the agreements between LCR and Equistar are on terms generally representative of prevailing market prices.

Transactions with LMC -- Lyondell Methanol Company, L.P. ('LMC') sells all of its products to Equistar. For the years ending December 31, 2000, 1999 and 1998, purchases from LMC were \$165 million, \$95 million and \$103 million, respectively. Equistar sells natural gas to LMC at prices generally representative of its cost. Purchases by LMC of natural gas feedstock from Equistar totaled \$85 million, \$46 million and \$44 million for the years ended December 31, 2000, 1999 and 1998, respectively. Equistar provides operating and other services for LMC under the terms of existing agreements that were assumed by Equistar from Lyondell, including the lease to LMC by Equistar of the real property on which its methanol plant is located. Pursuant to the terms of those agreements, LMC pays Equistar a management fee and reimburses certain expenses of Equistar at cost. Management fees charged by Equistar to LMC totaled \$6 million during each of the years ending December 31, 2000, 1999 and 1998.

Shared Services Agreement with Lyondell -- During 1998 and 1999, Lyondell provided certain administrative services to Equistar, including legal, risk management, treasury, tax and employee benefit plan administrative services, while Equistar provided services to Lyondell in the areas of health, safety and environment, human resources, information technology and legal. In November 1999, Lyondell and Equistar announced an agreement to utilize shared services more broadly, consolidating such services among Lyondell and Equistar. These

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

services included information technology, human resources, materials management, raw material supply, customer supply chain, health, safety and environmental, engineering, research and development, facility services, legal, accounting, treasury, internal audit, and tax (the 'Shared Services Agreement'). Beginning January 1, 2000, employee-related and indirect costs were allocated between the two companies in the manner prescribed in the Shared Services Agreement, while direct third party costs, incurred exclusively for either Lyondell or Equistar, were charged directly to that entity. During the years ended December 31, 2000, 1999 and 1998, Lyondell charged Equistar \$133 million, \$9 million and \$3 million for these services. The increased charges to Equistar during 2000 resulted from the increase in services provided by Lyondell under the Shared Services Agreement. During the years ended December 31, 1999 and 1998, Equistar charged Lyondell approximately \$8 million and approximately \$1 million, respectively, for services. There were no billings from Equistar to Lyondell for the year ended December 31, 2000.

Shared Services and Shared-Site Agreements with Millennium -- Equistar and Millennium have entered into a variety of operating, manufacturing and technical service agreements related to the business of Equistar and the businesses retained by Millennium Petrochemicals. These agreements include the provision by Equistar to Millennium Petrochemicals of materials management, certain utilities, administrative office space, and health and safety services. During the years ended December 31, 2000, 1999 and 1998, Equistar charged Millennium Petrochemicals \$2 million, \$3 million and \$5 million for these services. These agreements also include the provision by Millennium Petrochemicals to Equistar of certain operational services, including barge dock access. During each of

F-17

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

the years ended December 31, 2000, 1999 and 1998, Millennium Petrochemicals charged Equistar less than \$1 million for these services.

Operating Agreement with Occidental Chemical -- On May 15, 1998, Occidental Chemical and Equistar entered into an Operating Agreement ('Operating Agreement') whereby Occidental Chemical agreed to operate and maintain the Occidental Contributed Business and to cause third-parties to continue to provide equipment, products and commodities to those businesses upon substantially the same terms and conditions as provided prior to the transfer. The Operating Agreement terminated on June 1, 1998. During the term of the Operating Agreement, Equistar paid Occidental Chemical an administrative fee of \$1 million.

Transition Services Agreement with Occidental Chemical -- On June 1, 1998, Occidental Chemical and Equistar entered into a Transition Services Agreement. Under the terms of the Transition Services Agreement, Occidental Chemical agreed to provide Equistar certain services in connection with the Occidental Contributed Business, including services related to accounting, payroll, office administration, marketing, transportation, purchasing and procurement, management, human resources, customer service, technical services and others. Predominantly all services under the Transition Services Agreement ceased in June 1999 in accordance with the terms of the agreement. Health, safety, and environmental services were extended until December 31, 1999 as permitted by the Transition Services Agreement. During the year ended December 31, 1999 and the period from June 1, 1998 to December 31, 1998, Equistar expensed \$2 million and \$6 million, respectively, in connection with services provided pursuant to the Transition Service Agreement.

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Loans to Millennium and Occidental -- In connection with Occidental's admission into Equistar in May 1998, Equistar executed promissory notes to Millennium and Occidental in the principal amounts of \$75 million and \$420 million, respectively. Each of the notes provided for the annual accrual of interest at a rate equal to LIBOR plus 0.6%. These notes were paid in full in June 1998. Interest expense incurred on these notes during 1998 was \$3 million.

Note Receivable from Lyondell LP -- Upon formation of the Partnership, Lyondell LP contributed capital to Equistar in the form of a \$345 million promissory note ('Lyondell Note'). The Lyondell Note bore interest at LIBOR plus a market spread. The note was repaid in full by Lyondell in July 1998. Interest income on the Lyondell Note totaled \$13 million during 1998.

### 5. SALE OF CONCENTRATES AND COMPOUNDS BUSINESS

Effective April 30, 1999, Equistar completed the sale of its concentrates and compounds business. The transaction included two manufacturing facilities, located in Heath, Ohio and Crockett, Texas, and related inventories. Equistar's proceeds from the sale were approximately \$75 million.

### 6. RESTRUCTURING AND OTHER UNUSUAL CHARGES

During the fourth quarter 1999, Equistar recorded a charge of \$96 million associated with decisions to shut down certain polymer reactors and to consolidate certain administrative functions between Lyondell and Equistar. The decision to shut down the reactors was based on their high production cost, market conditions in the polyethylene industry and the flexibility to utilize more efficient reactors to meet customer requirements. Accordingly, Equistar recorded a charge of \$72 million to adjust the asset carrying values. The remaining \$24 million of the total charge represents severance and other employee-related costs for approximately 500 employee positions that are being eliminated. The eliminated positions, primarily administrative functions, resulted from opportunities to share such services between Lyondell and Equistar and, to a lesser extent, positions associated with the shut down polymer reactors. Through December 31, 2000, approximately \$19 million of severance and other employee-related costs had been paid and charged against the accrued liability. As of December 31, 2000, substantially all of the employee terminations had been completed and the remaining liability was eliminated.

F-18

## EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

In 1998, Equistar recorded and paid, as incurred, an additional \$12 million in restructuring charges related to the initial merger and integration of Equistar. These costs included costs associated with the consolidation of operations and facilities of \$11 million and other miscellaneous charges of \$1 million.

### 7. ACCOUNTS RECEIVABLE

In December 1998, Equistar entered into a purchase agreement with an independent issuer of receivables-backed commercial paper. Under the terms of the agreement, Equistar agreed to sell on an ongoing basis and without recourse, designated accounts receivable. To maintain the balance of the accounts receivable sold, Equistar is obligated to sell new receivables as existing receivables are collected. The agreement continues until terminated upon notice

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

by either party.

At December 31, 1998, 1999 and 2000, Equistar's gross accounts receivable that had been sold to the purchasers aggregated \$130 million. Increases and decreases in the amount have been reported as operating cash flows in the Consolidated Statements of Cash Flows. Costs related to the sale are included in 'Selling, general and administrative expenses' in the Consolidated Statements of Income.

### 8. INVENTORIES

Inventories are stated at the lower of cost or market. Cost is determined on the last-in, first-out ('LIFO') basis except for materials and supplies, which are valued at average cost. Inventories at December 31, 2000 and 1999 consisted of the following:

	2000	1999
	----	----
	(MILLIONS OF DOLLARS)	
Finished goods.....	\$273	\$278
Work-in-process.....	16	10
Raw materials.....	123	137
Materials and supplies.....	94	95
	----	----
Total inventories.....	\$506	\$520
	----	----
	----	----

The excess of the current cost of inventories over book value was approximately \$165 million at December 31, 2000.

### 9. PROPERTY, PLANT AND EQUIPMENT, NET

The components of property, plant and equipment, at cost, and the related accumulated depreciation were as follows at December 31:

	2000	1999
	----	----
	(MILLIONS OF DOLLARS)	
Land.....	\$ 78	\$ 78
Manufacturing facilities and equipment.....	5,769	5,656
Construction in progress.....	134	134
	-----	-----
Total property, plant and equipment.....	5,981	5,868
Less accumulated depreciation.....	2,162	1,942
	-----	-----
Property, plant and equipment, net.....	\$3,819	\$3,926
	-----	-----
	-----	-----

No interest was capitalized during 2000, 1999 and 1998. Depreciation expense for the years ending December 31, 2000, 1999 and 1998 was \$229 million, \$221 million and \$200 million, respectively.

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

In July 1998, the depreciable lives of certain assets, primarily manufacturing facilities and equipment, were increased from a range of 5 to 25 years to a range of 5 to 30 years. The change was made to more accurately reflect the estimated periods during which such assets will remain in service, based upon Equistar's actual experience with those assets. This change was accounted for as a change in accounting estimate and resulted in a \$33 million decrease in depreciation expense for 1998.

F-19

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

#### 10. OTHER ACCRUED LIABILITIES

Other accrued liabilities at December 31, 2000 and 1999 were as follows:

	2000	1999
	----	----
	(MILLIONS OF DOLLARS)	
Accrued property taxes.....	\$ 73	\$ 68
Accrued payroll costs.....	38	68
Accrued interest.....	52	50
Other.....	3	47
	----	----
Total other accrued liabilities.....	\$166	\$233
	----	----
	----	----

#### 11. PENSION AND OTHER POSTRETIREMENT BENEFITS

All full-time regular employees of the Partnership are covered by defined benefit pension plans sponsored by Equistar. The plans became effective January 1, 1998, except for union represented employees formerly employed by Millennium, whose plans were contributed to Equistar on December 1, 1997, and union represented employees formerly employed by Occidental, whose plans were contributed to Equistar on May 15, 1998. In connection with the formation of Equistar, there were no pension assets or obligations contributed to Equistar, except for the union represented plans described above. Retirement benefits are based upon years of service and the employee's highest three consecutive years of compensation during the last ten years of service. Equistar accrues pension costs based upon an actuarial valuation and funds the plans through periodic contributions to pension trust funds as required by applicable law. Equistar also has unfunded supplemental nonqualified retirement plans, which provide pension benefits for certain employees in excess of the tax qualified plans' limits. In addition, Equistar sponsors unfunded postretirement benefit plans other than pensions for both salaried and nonsalaried employees, which provide medical and life insurance benefits. These postretirement health care plans are contributory while the life insurance plans are noncontributory.

F-20

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

The following table provides a reconciliation of benefit obligations, plan assets and the funded status of these plans:

	PENSION BENEFITS		OTHER POSTRETIREMENT BENEFITS	
	2000	1999	2000	1999
(MILLIONS OF DOLLARS)				
Change in benefit obligation:				
Benefit obligation, January 1.....	\$ 99	\$ 88	\$ 77	\$ 77
Service cost.....	17	22	2	2

F-21

EQUISTAR CHEMICALS, LP  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

For measurement purposes, the assumed annual rate of increase in the per capita cost of covered health care benefits as of December 31, 2000 was 7.0% for 2001 and 5.0% thereafter. The health care cost trend rate assumption does not have a significant effect on the amounts reported. To illustrate, increasing or decreasing the assumed health care cost trend rates by one percentage point in each year would change the accumulated postretirement benefit liability as of December 31, 2000 by less than \$1 million and would not have a material effect on the aggregate service and interest cost components of the net periodic postretirement benefit cost for the year then ended.

Equistar also maintains voluntary defined contribution savings plans for eligible employees. Contributions to the plans by Equistar were \$17 million, \$20 million and \$15 million for the years ended December 31, 2000, 1999 and 1998, respectively.

12. LONG-TERM DEBT AND FINANCING ARRANGEMENTS

In February 1999, Equistar and Equistar Funding Corporation ('Equistar Funding') co-issued \$900 million of debt securities. Equistar Funding, a wholly owned subsidiary of Equistar, is a Delaware corporation formed for the sole purpose of facilitating the financing activities of Equistar. Equistar is jointly and severally liable with Equistar Funding on the outstanding notes and new notes. The debt securities include \$300 million of 8.50% Notes, which will mature on February 15, 2004, and \$600 million of 8.75% Notes, which will mature on February 15, 2009. Equistar used the net proceeds from this offering (i) to repay the \$205 million outstanding under a capitalized lease obligation relating to Equistar's Corpus Christi facility, (ii) to repay the outstanding balance under the \$500 million credit agreement, after which the \$500 million credit agreement was terminated, (iii) to repay the outstanding \$150 million, 10.00%

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Notes due in June 1999, and (iv) to the extent of the remaining net proceeds, to reduce outstanding borrowing under the five-year credit facility and for Partnership working capital purposes.

Equistar has a five-year, \$1.25 billion credit facility with a group of banks expiring November 2002. Borrowing under the facility bears interest at either the Federal Funds rate plus 1/2 of 1%, LIBOR plus 1/2 of 1%, a fixed rate offered by one of the sponsoring banks or interest rates that are based on a competitive auction feature wherein the interest rate can be established by competitive bids submitted by the sponsoring banks, depending upon the type of borrowing made under the facility. Borrowing under the facility had a weighted average interest rate of 7.13% and 6.0% at December 31, 2000 and 1999, respectively. Millennium America Inc., a subsidiary of Millennium, provided limited guarantees with respect to the payment of principal and interest on a total of \$750 million principal amount of indebtedness under the \$1.25 billion revolving credit facility. However, the lenders may not proceed against Millennium America Inc. until they have exhausted their remedies against Equistar. The guarantee will remain in effect indefinitely, but at any time after December 31, 2004, Millennium America Inc. may elect to terminate the guarantee if certain conditions are met including financial ratios and covenants. In addition, Millennium America Inc. may elect to terminate the guarantee if Millennium Petrochemicals Inc. sells its interests in Millennium GP and Millennium LP or if those entities sell their interests in Equistar, provided certain conditions are met including financial ratios and covenants.

The credit facility is available for working capital and general Partnership purposes as needed and contains covenants that, subject to exceptions, restrict sale and leaseback transactions, lien incurrence, debt incurrence, sales of assets and mergers and consolidations, and require Equistar to maintain specified financial ratios, in all cases as provided in the credit facility. The breach of these covenants could permit the lenders to declare the loans immediately payable and to terminate future lending commitments.

Equistar was in compliance with all covenants under its credit facility as of December 31, 2000. However, given the poor current business environment, Equistar is seeking an amendment to its credit facility that would increase its financial and operating flexibility, primarily by making certain financial

F-22

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

ratio requirements less restrictive. Equistar anticipates that the amendment will become effective prior to March 31, 2001.

The terminated \$500 million credit agreement was entered into on June 12, 1998. Borrowing under the agreement bore interest at either the Federal Funds rate plus 1/2 of 1%, LIBOR plus 0.625%, a fixed rate offered by one of the sponsoring banks or interest rates that were based on a competitive auction feature.

Long-term debt at December 31 consisted of the following:

2000	1999
----	----
(MILLIONS OF DOLLARS)	

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Bank credit facilities:		
5-year term credit facility.....	\$ 820	\$ 800
Other debt obligations:		
Medium-term notes (due 2000-2005).....	121	163
9.125% Notes due 2002.....	100	100
8.50% Notes due 2004.....	300	300
6.50% Notes due 2006.....	150	150
8.75% Notes due 2009.....	598	598
7.55% Debentures due 2026.....	150	150
Other.....	9	--
	-----	-----
Total long-term debt.....	2,248	2,261
Less current maturities.....	90	92
	-----	-----
Total long-term debt, net.....	\$2,158	\$2,169
	-----	-----
	-----	-----

Aggregate maturities of long-term debt during the next five years are as follows: 2001-\$90 million; 2002-\$921 million; 2003-\$29 million; 2004-\$300 million; 2005-\$5 million and thereafter-\$903 million. The 8.75% Notes have a face amount of \$600 million and are shown net of unamortized discount. The medium-term notes mature at various dates from 2001 to 2005 and had a weighted average interest rate of 9.6% and 10.0% at December 31, 2000 and 1999, respectively.

The medium-term Notes, the 9.125% Notes, the 6.5% Notes and the 7.55% Debentures were assumed by Equistar from Lyondell when Equistar was formed in 1997. As between Equistar and Lyondell, Equistar is primarily liable for this debt. Lyondell remains a co-obligor for the medium-term notes and certain events involving only Lyondell could give rise to events of default under those notes, permitting the obligations to be accelerated. If such an event permitted more than \$50 million of the medium-term notes to be accelerated, the lenders under Equistar's \$1.25 billion revolving credit facility would have the right to accelerate all debt outstanding under the facility and to terminate future lending commitments. \$90 million aggregate principal amount of the medium-term notes will mature on August 1, 2001. Under certain limited circumstances, the holders of the medium-term notes have the right to require repurchase of the notes. Following amendments to the indentures for the 9.125% Notes and 6.5% Notes and the 7.55% Debentures in November 2000, Lyondell remains a guarantor of that debt but not a co-obligor. The consolidated financial statements of Lyondell are filed as an exhibit to Equistar's Annual Report on Form 10-K for the year ended December 31, 2000.

### 13. FINANCIAL INSTRUMENTS

Equistar does not buy, sell, hold or issue financial instruments for speculative trading purposes.

Beginning October 1999, Equistar entered into over-the-counter 'derivatives' and price collar agreements for crude oil with Occidental Energy Marketing, Inc., a subsidiary of Occidental, to help manage its exposure to commodity price risk with respect to crude-oil related raw material purchases. At December 31, 2000, 'derivatives' agreements covering 5.1 million barrels and maturing from January 2001 through July 2001 were outstanding. The carrying value and fair market value of these derivative instruments at December 31, 2000 represented a liability of \$13 million and was based on

# Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

## EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

quoted market prices. At December 31, 1999, 'derivatives' and collar agreements covering 2.4 million and 1.5 million barrels, respectively, and maturing in January 2000, were outstanding. Both the carrying value and fair market value of these derivative instruments at December 31, 1999 represented an asset of \$7 million and was based on quoted market prices. Unrealized gains and losses on 'derivatives' and price collars are deferred until realized at which time they are reflected in the cost of the purchased raw material. See Item 7a. Disclosure of Market and Regulatory Risk -- Commodity Price Risk.

The fair value of all nonderivative financial instruments included in current assets and current liabilities, including cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, approximated their carrying value due to their short maturity. Based on the borrowing rates currently available to Equistar for debt with terms and average maturities similar to Equistar's debt portfolio, the fair value of Equistar's long-term debt, including amounts due within one year, was approximately \$2.1 billion and \$2.2 billion at December 31, 2000 and 1999, respectively.

Equistar had issued letters of credit totaling \$1 million and \$6 million at December 31, 2000 and 1999, respectively.

### 14. COMMITMENTS AND CONTINGENCIES

Commitments -- Equistar has various purchase commitments for materials, supplies and services incident to the ordinary conduct of business. In the aggregate, such commitments are not at prices in excess of current market. See also Note 4, describing related party commitments.

Equistar is party to various unconditional purchase obligation contracts as a purchaser for product and services. At December 31, 2000, future minimum payments under these contracts with noncancelable contract terms in excess of one year were as follows:

	(MILLIONS OF DOLLARS)
2001.....	\$ 29
2002.....	27
2003.....	23
2004.....	22
2005.....	22
Thereafter.....	118
	----
Total minimum contract payments.....	\$241
	----
	----

Equistar's total purchases under these agreements were \$35 million, \$39 million and \$35 million for the years ending December 31, 2000, 1999 and 1998, respectively.

Indemnification Arrangements -- Lyondell, Millennium and Occidental have each agreed to provide certain indemnifications to Equistar with respect to the petrochemicals and polymers businesses contributed by the partners. In addition,

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Equistar agreed to assume third party claims that are related to certain pre-closing contingent liabilities that are asserted prior to December 1, 2004 for Lyondell and Millennium, and May 15, 2005 for Occidental, to the extent the aggregate thereof does not exceed \$7 million to each partner, subject to certain terms of the respective asset contribution agreements. As of December 31, 2000, Equistar had incurred a total of \$16 million for these uninsured claims and liabilities. Equistar also agreed to assume third party claims that are related to certain pre-closing contingent liabilities that are asserted for the first time after December 1, 2004 for Lyondell and Millennium, and for the first time after May 15, 2005 for Occidental.

Environmental -- Equistar's policy is to be in compliance with all applicable environmental laws. Equistar is subject to extensive environmental laws and regulations concerning emissions to the air, discharges to surface and subsurface waters and the generation, handling, storage, transportation, treatment and disposal of waste materials. Some of these laws and regulations are subject to varying and conflicting interpretations. In addition, Equistar cannot accurately predict future developments, such as increasingly strict requirements of environmental laws, inspection and enforcement policies and

F-24

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

compliance costs therefrom which might affect the handling, manufacture, use, emission or disposal of products, other materials or hazardous and non-hazardous waste. Equistar had no reserves for environmental matters as of December 31, 2000 and 1999.

The eight-county Houston/Galveston region has been designated a severe non-attainment area for ozone by the EPA. As a result, the Texas Natural Resource Conservation Commission ('TNRCC') has submitted a plan to the EPA to reach and demonstrate compliance with the ozone standard by the year 2007. These emission reduction controls must be installed during the next several years, well in advance of the 2007 deadline. This could result in increased capital investment, which could be between \$150 million and \$300 million before the 2007 deadline, as well as higher annual operating costs for Equistar. Equistar has been actively involved with a number of organizations to help solve the ozone problem in the most cost-effective manner and, in January 2001, Equistar and an organization composed of industry participants filed a lawsuit against the TNRCC to encourage adoption of their alternative plan to achieve the same air quality improvement with less negative economic impact on the region.

In the United States, the Clean Air Act Amendments of 1990 set minimum levels for oxygenates, such as MTBE, in gasoline sold in areas not meeting specified air quality standards. However, while studies by federal and state agencies and other organizations have shown that MTBE is safe for use in gasoline, is not carcinogenic and is effective in reducing automotive emissions, the presence of MTBE in some water supplies in California and other states due to gasoline leaking from underground storage tanks and in surface water from recreational water craft has led to public concern that MTBE may, in certain limited circumstances, affect the taste and odor of drinking water supplies, and thereby lead to possible environmental issues.

Certain federal and state governmental initiatives have sought either to rescind the oxygenate requirement for reformulated gasoline or to restrict or ban the use of MTBE. Such actions, to be effective, would require (i) a waiver of the state's oxygenate mandate, (ii) Congressional action in the form of an

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

amendment to the Clean Air Act or (iii) replacement of MTBE with another oxygenate such as ethanol, a more costly, untested, and less widely available additive. At the federal level, a blue ribbon panel appointed by the EPA issued its report on July 27, 1999. That report recommended, among other things, reducing the use of MTBE in gasoline. During 2000, the EPA announced its intent to seek legislative changes from Congress to give the EPA authority to ban MTBE over a three-year period. Such action would only be granted through amendments to the Clean Air Act. Additionally, the EPA is seeking a ban of MTBE utilizing rulemaking authority contained in the Toxic Substance Control Act. It would take at least three years for such a rule to issue. Recently, however, senior policy analysts at the U.S. Department of Energy presented a study stating that banning MTBE would create significant economic risk. The presentation did not identify any benefits from banning MTBE. The EPA initiatives mentioned above or other governmental actions could result in a significant reduction in Equistar's MTBE sales. Equistar has developed technologies to convert its process to produce alternate gasoline blending components should it be necessary to reduce MTBE production in the future.

General -- The Partnership is also subject to various lawsuits and proceedings. Subject to the uncertainty inherent in all litigation, management believes the resolution of these proceedings will not have a material adverse effect upon the financial statements or liquidity of Equistar.

In the opinion of management, any liability arising from the matters discussed in this Note is not expected to have a material adverse effect on the financial statements or liquidity of Equistar. However, the adverse resolution in any reporting period of one or more of these matters discussed in this Note could have a material impact on Equistar's results of operations for that period without giving effect to contribution or indemnification obligations of co-defendants or others, or to the effect of any insurance coverage that may be available to offset the effects of any such award.

### EQUISTAR CHEMICALS, LP NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

#### 15. LEASE COMMITMENTS

Equistar leases various facilities and equipment under noncancelable lease arrangements for varyious periods. At December 31, 2000, future minimum lease payments relating to noncancelable operating leases with lease terms in excess of one year were as follows:

	(MILLIONS OF DOLLARS)
2001.....	\$ 83
2002.....	66
2003.....	59
2004.....	54
2005.....	48
Thereafter.....	317
	----
Total minimum lease payments.....	\$627
	----
	----

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

Operating lease net rental expense was \$115 million, \$112 million and \$110 million for the years ending December 31, 2000, 1999 and 1998, respectively.

Equistar leases railcars for the distribution of products in its polymers business segment. The railcars are leased under two master leases entered into in 1999 and a third master lease entered into in 1996 by Millennium and assumed by Equistar upon its formation on December 1, 1997. The leases have five renewable one-year terms and mature after the fifth year. Equistar may, at its option, purchase the railcars during or at the end of the lease term for an amount generally equal to the lessor's unrecovered costs, as defined. If Equistar does not exercise the purchase option, the railcars will be sold and Equistar will pay the lessor to the extent the proceeds from the sale of the railcars are less than their guaranteed residual value, as defined by the agreements. The guaranteed residual value under these leases was approximately \$185 million at December 31, 2000.

### 16. SUPPLEMENTAL CASH FLOW INFORMATION

Supplemental cash flow information is summarized as follows for the periods presented:

	FOR THE YEAR ENDED DECEMBER 31,		
	2000	1999	1998
	(MILLIONS OF DOLLARS)		
Cash paid for interest.....	\$180	\$146	\$154
	----	----	----

### 17. SEGMENT INFORMATION AND RELATED INFORMATION

Using the guidelines set forth in SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, Equistar has identified two reportable segments in which it operates. The reportable segments are petrochemicals and polymers. The petrochemicals segment includes olefins, oxygenated products, aromatics and specialty products. Olefins include ethylene, propylene and butadiene, and the oxygenated products include ethylene oxide, ethylene glycol, ethanol and MTBE. Aromatics include benzene and toluene. The polymers segment consists of polyolefins, including high-density polyethylene, low-density polyethylene, linear low-density polyethylene, polypropylene, and performance polymers. The performance polymers include enhanced grades of polyethylene, including wire and cable insulating resins, and polymeric powders. The concentrates and compounds business, which was part of performance polymers, was sold effective April 30, 1999 (see Note 5).

No customer accounted for 10% or more of sales during the years ended December 31, 2000, 1999 or 1998.

F-26

## Edgar Filing: MILLENNIUM CHEMICALS INC - Form 10-K

The accounting policies of the segments are the same as those described in 'Summary of Significant Accounting Policies' (see Note 2).

Summarized financial information concerning Equistar's reportable segments is shown in the following table. Intersegment sales between the petrochemicals and polymers segments were made at prices based on current market values.

	PETROCHEMICALS	POLYMERS	UNALLOCATED	ELIMINATIONS	CONSOLIDATED

	\$1,355	\$1,514	\$1,477
	-----	-----	-----
	-----	-----	-----

18. SUBSEQUENT EVENT

Equistar discontinued production at its Port Arthur, Texas, polyethylene facility on February 28, 2001 and shut down the facility. Closed production units include a 240 million pounds per year HDPE reactor and an LDPE reactor with annual capacity of 160 million pounds. These units and a 300 million pounds per year HDPE reactor mothballed in 1999 have been shut down permanently. The asset values of these production units were previously adjusted as part of a \$96 million restructuring charge recognized in 1999. Equistar expects to incur approximately \$20 million of costs, including severance benefits for approximately 125 people at the Port Arthur facility as well as shutdown-related costs.
