QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2007

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FROM THE TRANSITION PERIOD FROM TO

COMMISSION FILE NUMBER 1-7521

FRIEDMAN INDUSTRIES, INCORPORATED

(Exact name of registrant as specified in its charter)

TEXAS
(State or other jurisdiction of
incorporation or organization)

74-1504405
(I.R.S. Employer Identification
Number)

4001 HOMESTEAD ROAD, HOUSTON, TEXAS 77028-5585
(Address of principal executive office) (zip code)
Registrant's telephone number, including area code (713) 672-9433

Former name, former address and former fiscal year, if changed since last report

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer () Accelerated filer () Non-accelerated filer ()

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At June 30, 2007, the number of shares outstanding of the issuer's only class of stock was 6,712,108 shares of Common Stock.

	<u>\$58,367</u>	<u>\$65,872</u>

Corporate expenses reflect general and administrative expenses not directly associated with segment operations and consist primarily of corporate executive and accounting salaries, professional fees and services, bad debts, accrued profit sharing expense, corporate insurance expenses and office supplies. Corporate assets consist primarily of cash and cash equivalents and the cash value of officers' life insurance.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Three Months Ended June 30, 2007 Compared to Three Months Ended June 30, 2006

During the three months ended June 30, 2007, sales, costs of goods sold and gross profit decreased \$2,093,220, \$986,162 and \$1,107,058, respectively, from the comparable amounts recorded during the three months ended June 30, 2006. The decrease in sales was related primarily to a decrease in tons sold. The Company recorded tons sold of approximately 79,000 tons in the 2007 quarter compared to approximately 81,000 tons in the 2006 quarter. In addition, average per ton selling prices in the 2007 quarter declined approximately \$5 per ton from the level recorded in the 2006 quarter. While average per ton selling prices declined, the average per ton costs of goods increased approximately \$7 per ton and adversely impacted gross profit. Gross profit as a percentage of sales decreased from approximately 9.3% in the 2006 quarter to approximately 7.5% in the 2007 quarter. During the 2006 quarter, the Company experienced strong market conditions for its products and recorded one of the most profitable quarters in Company history. Somewhat softer market conditions were experienced in the 2007 quarter which resulted in reduced margins.

Coil product segment sales decreased approximately \$6,809,000 during the 2007 quarter. This decrease resulted primarily from a decrease in tons sold as coil tonnage shipped declined from approximately 41,000 tons in the 2006 quarter to approximately 31,000 tons in the 2007 quarter. The average per ton selling price was approximately the same for both quarters. Coil operating profit as a percentage of coil segment sales decreased from approximately 5.6% in the 2006 quarter to 4.4% in the 2007 quarter. The Company experienced strong market conditions for coil products during the 2006 quarter and softer market conditions during the 2007 quarter. As a result, the Company recorded a decrease in volume as well as reduced margins.

In the 2006 quarter, the Company's phased out the Lone Star coil facility (LSCF). The LSCF accounted for approximately 3% of total sales and generated a small profit in the 2006 quarter. Certain LSCF assets will be redeployed to the Company's new coil facility which will be located in Decatur, Alabama in close proximity to the Nucor Steel Company facility located there (NSC). The Company expects to have this new facility in operation in fiscal 2008.

The Company is primarily dependent on NSC for its supply of coil inventory. In the 2007 quarter, NSC continued to supply the Company with steel coils in amounts that were adequate for the Company's purposes. The Company does not currently anticipate any significant change in such supply from NSC.

Tubular product segment sales increased approximately \$4,716,000 during the 2007 quarter. This increase primarily resulted from an increase in tons sold which increased from approximately 40,000 tons in the 2006 quarter to approximately 47,000 tons sold in the 2007 quarter. The average per ton selling price of pipe products was approximately the same in both quarters. Tubular product segment operating profits as a percentage of segment sales were approximately 11.3% and 7.7% in the 2006 and 2007 quarters, respectively. The Company experienced strong market conditions for its pipe products in the 2006 quarter and softer market conditions in the 2007 quarter. These softer market conditions had the effect of reducing average margins.

During the 2007 quarter, Lone Star Steel Company (LSS), the Company's primary supplier of tubular products and coil material used in pipe manufacturing, continued to supply such products in amounts that were adequate for the Company's purposes. On June 14, 2007, United States Steel Corporation consummated its purchase of LSS. While the potential impact of this purchase on the Company's business is uncertain, the Company does not currently anticipate any significant change in such supply from LSS.

During the 2007 quarter, general, selling and administrative costs decreased \$154,964 from the amount recorded during the 2006 quarter. This decrease was related primarily to a decrease in bonuses associated with reduced earnings.

Interest expense in the 2007 quarter increased \$47,740. For two months in the 2007 quarter, the Company borrowed funds under its line of credit facility to support cash flow.

Income taxes decreased \$422,822 from the comparable amount recorded during the 2006 quarter. This decrease was primarily related to the decrease in earnings before taxes. Effective tax rates were 36.2% and 33.8% in the 2006 and 2007 quarters, respectively. In the 2007 quarter, the Company benefited from a reduction in state taxes due to changes in state law and from a federal deduction associated with domestic activities production.

Table of Contents

FINANCIAL POSITION, LIQUIDITY AND CAPITAL RESOURCES

The Company remained in a strong, liquid position at June 30, 2007. Current ratios were 3.0 and 2.2 at June 30, 2007 and March 31, 2007, respectively. Working capital was \$28,642,903 at June 30, 2007 and \$28,464,786 at March 31, 2007.

During the three months ended June 30, 2007, the Company maintained assets and liabilities at levels it believed were commensurate with operations. Changes in current assets and liabilities during the 2007 quarter were related primarily to the ordinary course of business of the Company. In March 2007, the Company planned substantial pipe production runs in March 2007 and April 2007 which required increased inventories and accounts payable. These runs were completed as planned and resulted in reduced inventories and accounts payable at June 30, 2007. The Company expects to continue to monitor, evaluate and manage balance sheet components depending on changes in market conditions and the Company's operations.

During the quarter ended June 30, 2007, the Company purchased approximately \$1,260,000 in fixed assets. These assets were related primarily to equipment associated with the new coil operation to be located in Decatur, Alabama. In connection with this planned new operation, the Company phased out its coil processing facility in Lone Star, Texas in the 2006 quarter and will redeploy certain of these assets to this new coil facility. At the Decatur site, the Company is constructing a coil processing facility to include a steel temper mill and a steel cut-to-length line including a leveling line. The Company expects to commence operations at the Decatur site in fiscal 2008. In addition to the funds used to purchase the real property in Alabama, the Company's Board of Directors authorized up to an additional \$16 million to be used for capital expenditures and operational cash requirements at this location. At June 30, 2007, the Company had invested approximately \$7,500,000 at this location and expects to spend approximately \$2,000,000 to complete this facility.

The Company has an arrangement with a bank which provides for a revolving line of credit facility (the revolving facility). Pursuant to the revolving facility, which expires April 1, 2010, the Company may borrow up to \$10 million at the bank's prime rate or 1.5% over LIBOR. The Company uses the revolving facility to support cash flow and will borrow and repay the note as working capital is required. At June 30, 2007 and March 31, 2007, the Company had no borrowings outstanding under the revolving facility.

The Company has in the past and may in the future borrow funds on a term basis to build or improve facilities. The Company currently has no plans to borrow any significant amount of funds on a term basis.

Notwithstanding the current market conditions, the Company believes its cash flows from operations and borrowing capability under its revolving facility are adequate to fund its expected cash requirements for the next twenty-four months.

CRITICAL ACCOUNTING POLICIES

The preparation of consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. One such accounting policy which requires significant estimates and judgments is the valuation of LIFO inventories in the Company's quarterly reporting. The quarterly valuation of inventory requires estimates of the year end quantities which is inherently difficult. Historically, these estimates have been materially correct. In addition, the Company maintains an allowance for doubtful accounts receivable by providing for specifically identified accounts where collectibility is doubtful. On an ongoing basis, the Company evaluates estimates and judgments. The Company bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances.

FORWARD-LOOKING STATEMENTS

From time to time, the Company may make certain statements that contain forward-looking information (as defined in the Private Securities Litigation Reform Act of 1996) and that involve risk and uncertainty. These forward-looking statements may include, but are not limited to, future results of operations, future production capacity, product quality and proposed expansion plans. Forward-looking statements may be made by management orally or in writing including, but not limited to, this Management's Discussion and Analysis of Financial Condition and Results of Operations and other sections of the Company's filings with the Securities and Exchange Commission under the Securities Act of 1933 and the Securities Exchange Act of 1934. Actual results and trends in the future may differ materially depending on a variety of factors including but not limited to changes in the demand and prices of the Company products, changes in the demand for steel and steel products in general and the Company's success in executing its internal operating plans, including any proposed expansion plans.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Edgar Filing: FRIEDMAN INDUSTRIES INC - Form 10-Q

In the normal course of business the Company is exposed to market risks primarily from changes in the cost of steel in inventory and in interest rates. The Company closely monitors exposure to market risks and develops appropriate strategies to manage risk. With respect to steel purchases, there is no recognized market to purchase derivative financial instruments to reduce the inventory exposure risk on changing commodity prices. The exposure to market risk associated with interest rates relates primarily to debt. Recent debt balances are minimal and, as a result, direct exposure to interest rates changes is not significant.

Item 4. Controls and Procedures

The Company's management, with the participation of the Company's principal executive officer (CEO) and principal financial officer (CFO), evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act)), as of the end of the fiscal quarter ended June 30, 2007. Based on this evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures were effective as of the end of the fiscal quarter ended June 30, 2007 to ensure that information that is required to be disclosed by the Company in the reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the fiscal quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
