

Item 7.01 Regulation FD Disclosure

In a press release issued on July 17, 2008, Nabors Industries Ltd. (the Company) announced that its subsidiary, Nabors Industries, Inc. (NII), has commenced an offering of an aggregate principal amount of up to approximately \$750 million of its 6.15% Senior Notes due 2018 (the Notes). A copy of the press release is attached hereto as Exhibit 99.1, is incorporated herein by reference, and is hereby filed.

In an offering memorandum for the Notes, NII disclosed that:

1. On July 7, 2008, NII redeemed the full \$82.8 million aggregate principal amount at maturity of its zero coupon convertible senior debentures due 2021. The total redemption price of these debentures was \$60.6 million, consisting of the original issue price of these debentures plus accrued original issue discount.
2. In May 2008, the Financial Accounting Standards Board issued Staff Position APB No. 14-1, Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement), referred to as the FSP. The FSP requires that convertible debt instruments be accounted for with a liability component based on the fair value of a similar nonconvertible debt instrument and an equity component based on the excess of the initial proceeds from the convertible debt instrument over the liability component. Such excess represents a debt discount which is then amortized as additional non-cash interest expense over the convertible debt instrument's expected life. The FSP will be effective for the Company's fiscal years and interim periods beginning after December 15, 2008, and will be applied retrospectively to all convertible debt instruments within its scope that are outstanding for any period presented in the financial statements. The Company intends to adopt the FSP on January 1, 2009 on a retrospective basis and apply it to the Company's applicable convertible debt instruments. The Company is currently evaluating the impact of the adoption of the FSP; however, the Company believes that once adopted in 2009, the retrospective application of the FSP will have a material effect in reducing reported net income and diluted earnings per share for the years ended December 31, 2007 and 2008, and is expected to have a material effect in future years.
