

ALLIED CAPITAL CORP
Form N-2
March 17, 2006

As filed with the Securities and Exchange Commission on March 17, 2006

Registration No. 333-

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM N-2

REGISTRATION STATEMENT

**UNDER
THE SECURITIES ACT OF 1933**

- o Pre-Effective Amendment No. 1**
- o Post-Effective Amendment No.**

ALLIED CAPITAL CORPORATION

(Exact Name of Registrant as Specified in Charter)

1919 Pennsylvania Avenue, N.W.

**Washington, D.C. 20006-3434
(202) 721-6100**

(Address and Telephone Number, including Area Code, of Principal Executive Offices)

William L. Walton, Chairman and Chief Executive Officer

**Allied Capital Corporation
1919 Pennsylvania Avenue, N.W.
Washington, D.C. 20006-3434**
(Name and Address of Agent for Service)

Copies of information to:

**Steven B. Boehm, Esq.
Cynthia M. Krus, Esq.
Sutherland Asbill & Brennan LLP
1275 Pennsylvania Avenue, N.W.
Washington, D.C. 20004-2415**

Approximate Date of Proposed Public Offering:

From time to time after the effective date of the Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box. x

Edgar Filing: ALLIED CAPITAL CORP - Form N-2

CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered ⁽¹⁾	Proposed Maximum Offering Price Per Share ⁽²⁾	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee ⁽³⁾
Common Stock, \$0.0001 par value per share	23,000,000 shares	\$29.93	\$688,390,000	\$73,658

- (1) In reliance upon Rule 429 under the Securities Act of 1933, this amount is in addition to the securities previously registered by the Registrant under a registration statement on Form N-2 (File No. 333-123920). All securities unsold under such prior registration (a total of 17,000,000 shares of common stock) are carried forward into this Registration Statement.
- (2) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(c) under the Securities Act of 1933 on the basis of the average of the high and low sales prices of the common stock on March 15, 2006, as reported on the New York Stock Exchange.
- (3) In reliance upon Rule 429 under the Securities Act of 1933, all securities unsold under a registration statement on Form N-2 (File No. 333-123920) (a total of 17,000,000 shares of common stock) are carried forward into this Registration Statement. A registration fee of \$61,790 has been paid previously with respect to such securities. The registration fee of \$73,658 relates solely to the registration of 23,000,000 shares of common stock not previously registered.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until this registration statement shall become effective on such date as the Commission, acting pursuant to Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

**PROSPECTUS (SUBJECT TO COMPLETION)
ISSUED , 2006**

40,000,000 Shares

Common Stock

We may offer, from time to time, up to 40,000,000 shares of our common stock in one or more offerings.

The shares of common stock may be offered at prices and on terms to be described in one or more supplements to this prospectus. The offering price per share of our common stock less any underwriting commissions or discounts will not be less than the net asset value per share of our common stock at the time we make the offering.

We are an internally managed closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940.

Our investment objective is to achieve current income and capital gains. We seek to achieve our investment objective by investing in primarily private middle market companies in a variety of industries. No assurances can be given that we will continue to achieve our objective.

Please read this prospectus and the accompanying prospectus supplement, if any, before investing, and keep it for future reference. The prospectus and the accompanying prospectus supplement contain important information about us that a prospective investor should know before investing in our common stock. We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission. This information is available free of charge by contacting us at 1919 Pennsylvania Avenue, NW, Washington, DC, 20006 or by telephone at (202) 721-6100 or on our website at www.alliedcapital.com. The SEC also maintains a website at www.sec.gov that contains such information.

Our common stock is traded on the New York Stock Exchange under the symbol ALD. As of March , 2006, the last reported sale price on the New York Stock Exchange for the common stock was \$.

You should review the information, including the risk of leverage, set forth under Risk Factors on page 10 of this prospectus before investing in our common stock.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of shares of common stock unless accompanied by a prospectus supplement.

, 2006

We have not authorized any dealer, salesman or other person to give any information or to make any representation other than those contained in this prospectus or any accompanying supplement to this prospectus. You must not rely upon any information or representation not contained in this prospectus or the accompanying prospectus supplement as if we had authorized it. This prospectus and any prospectus supplement do not constitute an offer to sell or a solicitation of any offer to buy any security other than the registered securities to which they relate, nor do they constitute an offer to sell or a solicitation of an offer to buy any securities in any jurisdiction to any person to whom it is unlawful to make such an offer or solicitation in such jurisdiction. The information contained in this prospectus and any prospectus supplement is accurate as of the dates on their covers.

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that we have filed with the Securities and Exchange Commission using the shelf registration process. Under the shelf registration process, we may offer, from time to time, up to 40,000,000 shares of our common stock on the terms to be determined at the time of the offering. Shares of our common stock may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus provides you with a general description of the shares of our common stock that we may offer. Each time we use this prospectus to offer shares of our common stock, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any prospectus supplement together with the additional information described under "Where You Can Find Additional Information" in the "Prospectus Summary" and "Risk Factors" sections before you make an investment decision.

PROSPECTUS SUMMARY

The following summary contains basic information about this offering. It may not contain all the information that is important to an investor. For a more complete understanding of this offering, we encourage you to read this entire prospectus and the documents that are referred to in this prospectus.

In this prospectus or any accompanying prospectus supplement, unless otherwise indicated, Allied Capital, we, us or our refer to Allied Capital Corporation and its subsidiaries.

BUSINESS (Page 58)

We are a business development company and we are in the private equity business. We provide long-term debt and equity capital to primarily private middle market companies in a variety of industries. We have participated in the private equity business since we were founded in 1958 and have financed thousands of companies nationwide. Our investment objective is to achieve current income and capital gains.

We believe the private equity capital markets are important to the growth of small and middle market companies because such companies often have difficulty accessing the public debt and equity capital markets. We believe that we are well positioned to be a source of capital for such companies.

We primarily invest in the American entrepreneurial economy. Our private finance portfolio includes investments in over 100 companies with aggregate annual revenue of over \$10 billion and employ more than 85,000 people.

We generally target companies in less cyclical industries in the middle market with, among other things, high return on invested capital, management teams with meaningful equity ownership, well-constructed balance sheets, and the ability to generate free cash flow. As a private equity investor, we spend significant time and effort identifying, structuring, performing due diligence, monitoring, developing, valuing and ultimately exiting our investments.

Our investment activity is primarily focused on making long-term investments in the debt and equity of primarily private middle market companies. Debt investments may include senior loans, unitranche debt (a single debt investment that is a blend of senior and subordinated debt), or subordinated debt (with or without equity features). Equity investments may include a minority equity stake in connection with a debt investment or a substantial equity stake in connection with a buyout transaction. In a buyout transaction, we generally invest in senior debt, subordinated debt and equity (preferred and/or voting or non-voting common) where our equity ownership represents a significant portion of the equity, but may or may not represent a controlling interest.

Our investments in the debt and equity of primarily private middle market companies are generally long-term in nature and are privately negotiated, and no readily available market exists for them. This makes our investments highly illiquid and, as result, we cannot readily trade them. When we make an investment, we enter into a long-term arrangement where our ultimate exit from that investment may be three to ten years in the future.

The capital we provide is used by portfolio companies to fund buyouts, acquisitions, growth, recapitalizations, note purchases, or other types of financings.

Our investments are typically structured to provide recurring cash flow in the form of interest income to us as the investor. In addition to earning interest income, we may structure our investments to generate income from management, consulting, diligence, structuring, or other fees. We may also enhance our total return from capital gains through equity features, such as nominal cost warrants, or by investing in equity investments.

We provide managerial assistance to our portfolio companies, including management and consulting services related to corporate finance, marketing, human resources, personnel and board member recruiting, business operations, corporate governance, risk management and other general business matters.

We have elected to be taxed as a regulated investment company under the Internal Revenue Code of 1986, as amended, which we refer to as the Code. Our status as a regulated investment company generally eliminates a corporate-level income tax on taxable income we timely distribute to our stockholders as dividends, if certain requirements are met. See Tax Status. We determine our regular quarterly dividends considering our estimate of annual taxable income available for distribution. Since 1963, our portfolio has generally provided sufficient ordinary taxable income and net capital gains to sustain or grow our dividends over time.

We are a Maryland corporation and a closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, which we refer to as the 1940 Act.

As a business development company, we are required to meet certain regulatory tests, the most significant relating to our investments and borrowings. A business development company is required to invest at least 70% of its assets in eligible portfolio companies. A business development company must also maintain a coverage ratio of assets to senior securities of at least 200%. See Certain Government Regulations and Risk Factors.

Our executive offices are located at 1919 Pennsylvania Avenue, NW, Washington, DC, 20006 and our telephone number is (202) 721-6100. In addition, we have regional offices in New York, Chicago and Los Angeles.

Our Internet website address is www.alliedcapital.com. Information contained on our website is not incorporated by reference into this prospectus and you should not consider information contained on our website to be part of this prospectus.

Our common stock is traded on the New York Stock Exchange under the symbol ALD.

DETERMINATION OF

NET ASSET VALUE (Page 82)

Our portfolio investments are generally recorded at fair value as determined in good faith by our Board of Directors in the absence of readily available public market values.

Pursuant to the requirements of the 1940 Act, we value substantially all of our portfolio investments at fair value as determined in good faith by the Board of Directors on a quarterly basis. Since there is typically no readily available market value for the investments in our portfolio, our Board of Directors determines in good faith the fair value of these portfolio investments pursuant to our valuation policy and consistently applied valuation process.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses. Instead we are required to specifically value each individual investment and record unrealized depreciation for an investment that we believe has become impaired including where collection of a loan or realization of an equity security is doubtful or when the enterprise value of the company does not currently support the cost of our debt or equity investment. Enterprise value means the entire value of the company to a potential buyer including the sum of the values of all debt and equity securities used to capitalize the enterprise at a point in time. Conversely, we will record unrealized appreciation if we believe that the underlying portfolio company has appreciated in value and/or our equity security has appreciated in value. Without a readily available market value and because of the inherent uncertainty of valuation, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

We adjust the valuation of our portfolio quarterly to reflect the change in the value of each investment in our portfolio. Any changes in value are recorded in our statement of operations as net change in unrealized appreciation or depreciation.

PLAN OF DISTRIBUTION *(Page 127)*

We may offer, from time to time, up to 40,000,000 shares of our common stock, on terms to be determined at the time of the offering.

Shares of our common stock may be offered at prices and on terms described in one or more supplements to this prospectus. The offering price per share of our common stock less any underwriting commission or discount will not be less than the net asset value per share of our common stock at the time we make the offering.

Our shares of common stock may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our shares of common stock, and will set forth any applicable purchase price, fee and commission or discount arrangement or the basis upon which such amount may be calculated.

We may not sell shares of common stock pursuant to this prospectus without delivering a prospectus supplement describing the method and terms of the offering of such shares.

USE OF PROCEEDS *(Page 18)*

We intend to use the net proceeds from selling shares of common stock for general corporate purposes, which includes investing in debt or equity securities in primarily privately negotiated transactions, repayment of indebtedness, acquisitions and other general corporate purposes. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS *(Page 19)*

We intend to pay quarterly dividends to holders of our common stock. The amount of our quarterly dividends is determined by our Board of Directors on a quarterly basis.

DIVIDEND REINVESTMENT PLAN *(Page 120)*

We maintain an opt in dividend reinvestment plan for our common shareholders. As a result, if our Board of Directors declares a dividend, then our shareholders that have not opted in to our dividend reinvestment plan will receive cash dividends. New shareholders must notify our transfer agent in writing if they wish to enroll in the dividend reinvestment plan.

RISK FACTORS *(Page 10)*

Investment in shares of our common stock involves a number of significant risks relating to our business and our investment objective that you should consider before purchasing shares of our common stock.

Our portfolio of investments is generally illiquid. Our portfolio includes securities primarily issued by private companies. These investments may involve a high degree of business and financial risk; they are illiquid, and may not produce current returns or capital gains. If we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current value of such investments. We may be required to liquidate some or all of our portfolio investments to meet our debt service obligations or in the event we are required to fulfill our obligations under agreements pursuant to which we guarantee the repayment of indebtedness by third parties.

An economic slowdown may affect the ability of a portfolio company to engage in a liquidity event, which is a transaction that involves the sale or recapitalization of all or part of a portfolio company. These conditions could lead to financial losses in our portfolio and a decrease in our revenues, net income and assets. Numerous other factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan, a downturn in its industry or negative economic conditions.

Our total investment in companies may be significant individually or in the aggregate. As a result, if a significant investment in one or more companies fails to perform as expected, our financial results could be more negatively affected and the magnitude of the loss could be more significant than if we had made smaller investments in more companies.

We may not borrow money unless we maintain asset coverage for indebtedness of at least 200%, which may affect returns to shareholders. We borrow funds to make investments. As a result, we are exposed to the risks of leverage, which may be considered a speculative investment technique. Borrowings, also known as leverage, magnify the potential for gain and loss on amounts invested and therefore increase the risks associated with investing in our securities.

A large number of entities and individuals compete for the same kind of investment opportunities as we do. Increased competition would make it more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making otherwise attractive investments.

Our business of making private equity investments and positioning them for liquidity events also may be affected by current and future market conditions.

To maintain our status as a business development company, we must not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets.

We may not be able to pay dividends and failure to qualify as a regulated investment company for tax purposes could have a material adverse effect on our total return, if any.

Also, we are subject to certain risks associated with valuing our portfolio, changing interest rates, accessing additional capital, fluctuating financial results, and operating in a regulated environment.

Our common stock price may be volatile due to market factors that may be beyond our control.

CERTAIN ANTI-TAKEOVER

PROVISIONS *(Page 123)*

Our charter and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from making an acquisition proposal for Allied Capital. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price for our common stock.

FEES AND EXPENSES

This table describes the various costs and expenses that an investor in our shares of common stock will bear directly or indirectly.

Shareholder Transaction Expenses	
Sales load (as a percentage of offering price) ⁽¹⁾	%
Dividend reinvestment plan fees ⁽²⁾	None
Annual Expenses (as a percentage of consolidated net assets attributable to common stock)⁽³⁾	
Operating expenses ⁽⁴⁾	5.7%
Interest payments on borrowed funds ⁽⁵⁾	2.9%
Total annual expenses⁽⁶⁾⁽⁷⁾	8.6%

- (1) In the event that the shares of common stock to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load.
- (2) The expenses of our dividend reinvestment plan are included in Operating expenses. We do not have a stock purchase plan. The participants in the dividend reinvestment plan will bear a pro rata share of brokerage commissions incurred with respect to open market purchases or sales, if any. See Dividend Reinvestment Plan.
- (3) Consolidated net assets attributable to common stock equals net assets (*i.e.*, total consolidated assets less total consolidated liabilities), which at December 31, 2005, was \$2,620.5 million.
- (4) Operating expenses represent our operating expenses for the year ending December 31, 2005, excluding interest on indebtedness. See Management and Compensation of Executive Officers and Directors.
- (5) The Interest payments on borrowed funds represents our interest expense for the year ending December 31, 2005. We had outstanding borrowings of \$1,284.8 million at December 31, 2005. See Risk Factors.
- (6) Total annual expenses as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. We borrow money to leverage our net assets and increase our total assets. The SEC requires that Total annual expenses percentage be calculated as a percentage of *net* assets, rather than the total assets, including assets that have been funded with borrowed monies. If the Total annual expenses percentage were calculated instead as a percentage of consolidated total assets, our Total annual expenses would be 5.6% of consolidated total assets.
- (7) The holders of shares of our common stock (and not the holders of our debt securities or preferred stock, if any) indirectly bear the cost associated with our annual expenses.

Example

The following example, required by the SEC, demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in us. In calculating the following expense amounts, we assumed we would have no additional leverage and that our operating expenses would remain at the levels set forth in the table above. In the event that shares to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
You would pay the following expenses on a \$1,000 investment, assuming a 5.0% annual return	\$133	\$297	\$460	\$858

Edgar Filing: ALLIED CAPITAL CORP - Form N-2

Although the example assumes (as required by the SEC) a 5.0% annual return, our performance will vary and may result in a return of greater or less than 5.0%. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, participants in the dividend reinvestment plan may receive shares of common stock that we issue at or above net asset value or are purchased by the administrator of the dividend reinvestment plan, at the market price in effect at the time, which may be higher than, at, or below net asset value.

The example should not be considered a representation of future expenses, and the actual expenses

may be greater or less than those shown.

SELECTED CONDENSED CONSOLIDATED FINANCIAL DATA

You should read the condensed consolidated financial information below with the Consolidated Financial Statements and Notes thereto included herein. Financial information at and for the years ended December 31, 2005, 2004, 2003, and 2002, has been derived from our financial statements that were audited by KPMG LLP. Financial information at and for the year ended December 31, 2001, has been derived from our financial statements that were audited by Arthur Andersen LLP. For important information about Arthur Andersen LLP, see the section entitled Notice Regarding Arthur Andersen LLP. See **Management's Discussion and Analysis of Financial Condition and Results of Operations** below for more information.

(1) Dividends are based on taxable income, which differs from income for financial reporting purposes.

(2) See "Senior Securities" for more information regarding our level of indebtedness.

(3) We determine net asset value per common share as of the last day of the period presented. The net asset values shown are based on outstanding shares at the end of each period presented.

(4) Dividends declared per common share for the fourth quarter of 2004 included the regular quarterly dividend of \$0.57 per common share and an extra dividend of \$0.02 per common share. Dividends declared per common share for the fourth quarter of 2005 included the regular quarterly dividend of \$0.58 per common share and an extra dividend of \$0.03 per common share.

WHERE YOU CAN FIND

ADDITIONAL INFORMATION

We have filed with the SEC a registration statement on Form N-2 together with all amendments and related exhibits under the Securities Act of 1933. The registration statement contains additional information about us and the securities being offered by this prospectus.

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission under the Securities Exchange Act of 1934. You can inspect any materials we file with the Securities and Exchange Commission, without charge, at the Securities and Exchange Commission's Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. Please call the Securities and Exchange Commission at 1-800-SEC-0330 for further information on the Public Reference Room. The Securities and Exchange Commission maintains a web site that contains reports, proxy statements and other information regarding registrants, including us, that file such information electronically with the Securities and Exchange Commission. The address of the Securities and Exchange Commission's web site is www.sec.gov. Information contained on the Securities and Exchange Commission's web site about us is not incorporated into this prospectus and you should not consider information contained on the Securities and Exchange Commission's web site to be part of this prospectus.

RISK FACTORS

Investing in Allied Capital involves a number of significant risks relating to our business and investment objective. As a result, there can be no assurance that we will achieve our investment objective.

Our portfolio of investments is illiquid. We generally acquire our investments directly from the issuer in privately negotiated transactions. The majority of the investments in our portfolio are subject to certain restrictions on resale or otherwise have no established trading market. We typically exit our investments when the portfolio company has a liquidity event such as a sale, recapitalization, or initial public offering of the company. The illiquidity of our investments may adversely affect our ability to dispose of debt and equity securities at times when we may need to or when it may be otherwise advantageous for us to liquidate such investments. In addition, if we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current value of such investments.

Investing in private companies involves a high degree of risk. Our portfolio primarily consists of long-term loans to and investments in middle market private companies. Investments in private businesses involve a high degree of business and financial risk, which can result in substantial losses for us in those investments and accordingly should be considered speculative. There is generally no publicly available information about the companies in which we invest, and we rely significantly on the diligence of our employees and agents to obtain information in connection with our investment decisions. If we are unable to identify all material information about these companies, among other factors, we may fail to receive the expected return on our investment or lose some or all of the money invested in these companies. In addition, these businesses may have shorter operating histories, narrower product lines, smaller market shares and less experienced management than their competition and may be more vulnerable to customer preferences, market conditions, loss of key personnel, or economic downturns, which may adversely affect the return on, or the recovery of, our investment in such businesses. As an investor, we are subject to the risk that a portfolio company may make a business decision that does not serve our interest, which could decrease the value of our investment. Deterioration in a portfolio company's financial condition and prospects may be accompanied by deterioration in any collateral for the loan.

Substantially all of our portfolio investments are recorded at fair value as determined in good faith by our Board of Directors and, as a result, there is uncertainty regarding the value of our portfolio investments. At December 31, 2005, portfolio investments recorded at fair value were approximately 90% of our total assets. Pursuant to the requirements of the 1940 Act, we value substantially all of our investments at fair value as determined in good faith by our Board of Directors on a quarterly basis. Since there is typically no readily available market value for the investments in our portfolio, our Board of Directors determines in good faith the fair value of these investments pursuant to a valuation policy and a consistently applied valuation process.

There is no single standard for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses; we are instead required by the 1940 Act to specifically value each individual investment on a quarterly basis and record

unrealized depreciation for an investment that we believe has become impaired, including where collection of a loan or realization of an equity security is doubtful, or when the enterprise value of the portfolio company does not currently support the cost of our debt or equity investment. Enterprise value means the entire value of the company to a potential buyer, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. We will record unrealized appreciation if we believe that the underlying portfolio company has appreciated in value and/or our equity security has appreciated in value. Without a readily available market value and because of the inherent uncertainty of valuation, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material. Our net asset value could be affected if our determination of the fair value of our investments is materially different than the value that we ultimately realize.

We adjust quarterly the valuation of our portfolio to reflect the Board of Directors' determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our statement of operations as net change in unrealized appreciation or depreciation.

Economic recessions or downturns could impair our portfolio companies and harm our operating results. Many of the companies in which we have made or will make investments may be susceptible to economic slowdowns or recessions. An economic slowdown may affect the ability of a company to repay our loans or engage in a liquidity event such as a sale, recapitalization, or initial public offering. Our nonperforming assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions also may decrease the value of collateral securing some of our loans. These conditions could lead to financial losses in our portfolio and a decrease in our revenues, net income, and assets.

Our business of making private equity investments and positioning them for liquidity events also may be affected by current and future market conditions. The absence of an active senior lending environment or a slowdown in middle market merger and acquisition activity may slow the amount of private equity investment activity generally. As a result, the pace of our investment activity may slow. In addition, significant changes in the capital markets could have an effect on the valuations of private companies and on the potential for liquidity events involving such companies. This could affect the timing of exit events in our portfolio and could negatively affect the amount of gains or losses upon exit.

Our borrowers may default on their payments, which may have a negative effect on our financial performance. We primarily make long-term unsecured, subordinated loans and invest in equity securities, which may involve a higher degree of repayment risk. We primarily invest in companies that may have limited financial resources, may be highly leveraged and may be unable to obtain financing from traditional sources. Numerous factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan, a downturn in its industry, or negative economic conditions. A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans or foreclosure on its secured assets, which could trigger cross defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the loans or debt securities that we hold. In addition, our portfolio companies may have, or may be permitted to incur, other debt that ranks senior to or equally with our securities. This means that payments on such senior-ranking securities may have to be made before we receive any payments on

our loans or debt securities. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral and may have a negative effect on our financial results.

Our private finance investments may not produce current returns or capital gains. Our private finance investments are typically structured as unsecured debt securities with a relatively high fixed rate of interest and with equity features such as conversion rights, warrants, or options, or as buyouts of companies where we invest in debt and equity securities. As a result, our private finance investments are generally structured to generate interest income from the time they are made and may also produce a realized gain from an accompanying equity feature. We cannot be sure that our portfolio will generate a current return or capital gains.

Our financial results could be negatively affected if a significant portfolio investment fails to perform as expected. Our total investment in companies may be significant individually or in the aggregate. As a result, if a significant investment in one or more companies fails to perform as expected, our financial results could be more negatively affected and the magnitude of the loss could be more significant than if we had made smaller investments in more companies. At December 31, 2005, our largest investments at value were in Advantage Sales & Marketing, Inc. and Business Loan Express, LLC (BLX) and represented 16.4% and 8.9% of our total assets, respectively, and each individually represented 10.0% of our total interest and related portfolio income for the year ended December 31, 2005. BLX is a lender under the Small Business Administration 7(a) Guaranteed Loan Program. Our financial results could be negatively affected if government funding for, or regulations related to, this program change.

We borrow money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us. Borrowings, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. We borrow from and issue senior debt securities to banks, insurance companies, and other lenders. Lenders of these senior securities have fixed dollar claims on our consolidated assets that are superior to the claims of our common shareholders. If the value of our consolidated assets increases, then leveraging would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not leveraged. Conversely, if the value of our consolidated assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our consolidated income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our consolidated income would cause net income to decline more sharply than it would have had we not borrowed. Such a decline could negatively affect our ability to make common stock dividend payments. Leverage is generally considered a speculative investment technique. Our revolving line of credit, notes payable and debentures contain financial and operating covenants that could restrict our business activities, including our ability to declare dividends if we default under certain provisions.

At December 31, 2005, we had \$1.3 billion of outstanding indebtedness bearing a weighted average annual interest cost of 6.5%. In order for us to cover these annual interest payments on indebtedness, we must achieve annual returns on our assets of at least 2.1%.

Illustration. The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing below. The calculation assumes (i) \$4,025.9 million in total assets, (ii) an average cost of funds of 6.5%, (iii) \$1,284.8 million in debt outstanding and (iv) \$2,620.5 million of shareholders' equity.

	Assumed Return on Our Portfolio						
	(net of expenses)						
	-20%	-10%	-5%	0%	5%	10%	20%
Corresponding return to shareholder	-33.66%	-18.29%	-10.61%	-2.93%	4.75%	12.43%	27.79%

We may not borrow money unless we maintain asset coverage for indebtedness of at least 200%, which may affect returns to shareholders. We must maintain asset coverage for total borrowings of at least 200%. Our ability to achieve our investment objective may depend in part on our continued ability to maintain a leveraged capital structure by borrowing from banks, insurance companies or other lenders on favorable terms. There can be no assurance that we will be able to maintain such leverage. If asset coverage declines to less than 200%, we may be required to sell a portion of our investments when it is disadvantageous to do so. As of December 31, 2005, our asset coverage for senior indebtedness was 309%.

Changes in interest rates may affect our cost of capital and net investment income. Because we borrow money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase, which would reduce our net investment income. We use a combination of long-term and short-term borrowings and equity capital to finance our investing activities. We utilize our revolving line of credit as a means to bridge to long-term financing. Our long-term fixed-rate investments are financed primarily with long-term fixed-rate debt and equity. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act. We have analyzed the potential impact of changes in interest rates on interest income net of interest expense.

Assuming that the balance sheet as of December 31, 2005, were to remain constant and no actions were taken to alter the existing interest rate sensitivity, a hypothetical immediate 1% change in interest rates would have affected net income by less than 1% over a one year horizon. Although management believes that this measure is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in credit quality, size and composition of the assets on the balance sheet and other business developments that could affect net increase in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the potential outcome simulated by this estimate.

We will continue to need additional capital to grow because we must distribute our income. We will continue to need capital to fund growth in our investments. Historically,

we have borrowed from financial institutions and have issued equity securities to grow our portfolio. A reduction in the availability of new debt or equity capital could limit our ability to grow. We must distribute at least 90% of our taxable ordinary income, which excludes realized net long-term capital gains, to our shareholders to maintain our regulated investment company status. As a result, such earnings will not be available to fund investment originations. In addition, as a business development company, we are generally required to maintain a ratio of at least 200% of total assets to total borrowings, which may restrict our ability to borrow in certain circumstances. We expect to continue to borrow from financial institutions and issue additional debt and equity securities. If we fail to obtain funds from such sources or from other sources to fund our investments, it could limit our ability to grow, which could have a material adverse effect on the value of our common stock.

Loss of regulated investment company tax treatment would substantially reduce net assets and income available for dividends. We have operated so as to qualify as a regulated investment company under Subchapter M of the Code. If we meet source of income, asset diversification, and distribution requirements, we will not be subject to corporate-level income taxation on income we timely distribute to our stockholders as dividends. We would cease to qualify for such tax treatment if we were unable to comply with these requirements. In addition, we may have difficulty meeting the requirement to make distributions to our shareholders because in certain cases we may recognize income before or without receiving cash representing such income. If we fail to qualify as a regulated investment company, we will have to pay corporate-level taxes on all of our income whether or not we distribute it, which would substantially reduce the amount of income available for distribution to our stockholders. Even if we qualify as a regulated investment company, we generally will be subject to a corporate-level income tax on the income we do not distribute. If we do not distribute at least 98% of our annual taxable income in the year earned, we generally will be required to pay an excise tax on amounts carried over and distributed to shareholders in the next year equal to 4% of the amount by which 98% of our annual taxable income exceeds the distributions for the current year.

There is a risk that you may not receive dividends or distributions. We intend to make distributions on a quarterly basis to our stockholders. We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, due to the asset coverage test applicable to us as a business development company, we may be limited in our ability to make distributions. Also, our credit facilities limit our ability to declare dividends if we default under certain provisions. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of our status as a regulated investment company. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue discount. The increases in loan balances as a result of contractual payment-in-kind arrangements are included in income in advance of receiving cash payment and are separately included in the change in accrued or reinvested interest and dividends in our consolidated statement of cash flows. Since we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our investment company taxable income to maintain our status as a regulated investment company.

We operate in a competitive market for investment opportunities. We compete for investments with a large number of private equity funds and mezzanine funds, other business development companies, investment banks, other equity and non-equity based investment funds, and other sources of financing, including specialty finance companies and traditional financial services companies such as commercial banks. Some of our competitors may have greater resources than we do. Increased competition would make it more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making otherwise attractive investments.

Our business depends on our key personnel. We depend on the continued services of our executive officers and other key management personnel. If we were to lose any of these officers or other management personnel, such a loss could result in inefficiencies in our operations and lost business opportunities, which could have a negative effect on our business.

Changes in the law or regulations that govern us could have a material impact on us or our operations. We are regulated by the SEC and the Small Business Administration. In addition, changes in the laws or regulations that govern business development companies, regulated investment companies, real estate investment trusts, and small business investment companies may significantly affect our business. Any change in the law or regulations that govern our business could have a material impact on us or our operations. Laws and regulations may be changed from time to time, and the interpretations of the relevant laws and regulations also are subject to change, which may have a material effect on our operations.

Our ability to invest in private companies may be limited in certain circumstances. If we are to maintain our status as a business development company, we must not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. If we acquire debt or equity securities from an issuer that has outstanding marginable securities at the time we make an investment, these acquired assets cannot be treated as qualifying assets. This result is dictated by the definition of eligible portfolio company under the 1940 Act, which in part looks to whether a company has outstanding marginable securities.

Amendments promulgated in 1998 by the Federal Reserve expanded the definition of a marginable security under the Federal Reserve's margin rules to include any non-equity security. Thus, any debt securities issued by any entity are marginable securities under the Federal Reserve's current margin rules. As a result, the staff of the SEC has raised the question as to whether a private company that has outstanding debt securities would qualify as an eligible portfolio company under the 1940 Act.

Until the question raised by the staff of the SEC pertaining to the Federal Reserve's 1998 change to its margin rules has been addressed by legislative, administrative or judicial action, we intend to treat as qualifying assets only those debt and equity securities that are issued by a private company that has no marginable securities outstanding at the time we purchase such securities or those that otherwise qualify as an eligible portfolio company under the 1940 Act.

In November 2004, the SEC issued proposed rules to correct the unintended consequence of the Federal Reserve's 1998 margin rule amendments of apparently limiting the investment opportunities of business development companies. In general, the SEC's

proposed rules would define an eligible portfolio company as any company that does not have securities listed on a national securities exchange or association. We currently do not believe that these proposed rules will have a material adverse effect on our operations.

Results may fluctuate and may not be indicative of future performance. Our operating results may fluctuate and, therefore, you should not rely on current or historical period results to be indicative of our performance in future reporting periods. Factors that could cause operating results to fluctuate include, but are not limited to, variations in the investment origination volume and fee income earned, variation in timing of prepayments, variations in and the timing of the recognition of net realized gains or losses and changes in unrealized appreciation or depreciation, the level of our expenses, the degree to which we encounter competition in our markets, and general economic conditions.

Our common stock price may be volatile. The trading price of our common stock may fluctuate substantially. The price of the common stock may be higher or lower than the price you pay for your shares, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include, but are not limited to, the following:

price and volume fluctuations in the overall stock market from time to time;

significant volatility in the market price and trading volume of securities of business development companies or other financial services companies;

volatility resulting from trading in derivative securities related to our common stock including puts, calls, long-term equity anticipation securities, or LEAPs, or short trading positions;

changes in laws or regulatory policies or tax guidelines with respect to business development companies or regulated investment companies;

actual or anticipated changes in our earnings or fluctuations in our operating results or changes in the expectations of securities analysts;

general economic conditions and trends;

loss of a major funding source; or

departures of key personnel.

Disclosure Regarding Forward-Looking Statements

Information contained or incorporated by reference in this prospectus, and the accompanying prospectus supplement, if any, contains forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as may, will, expect, intend, anticipate, estimate or continue or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth above in the Risk Factors section. Other factors that could cause actual results to differ materially include:

changes in the economy;

risks associated with possible disruption in our operations due to terrorism;

future changes in laws or regulations and conditions in our operating areas; and

other risks and uncertainties as may be detailed from time to time in our public announcements and SEC filings.

The matters described in Risk Factors and certain other factors noted throughout this prospectus, and the accompanying prospectus supplement, if any, and in any exhibits to the registration statement of which this prospectus, and the accompanying prospectus supplement, if any, is a part, constitute cautionary statements identifying important factors with respect to any such forward-looking statements, including certain risks and uncertainties, that could cause actual results to differ materially from those in such forward-looking statements.

Although we believe that the assumptions on which these forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate, and as a result, the forward-looking statements based on those assumptions also could be incorrect. Important assumptions include our ability to originate new investments, maintain certain margins and levels of profitability, access the capital markets for debt and equity capital, the ability to meet regulatory requirements and the ability to maintain certain debt to asset ratios. In light of these and other uncertainties, the inclusion of a projection or forward-looking statement in this prospectus or any accompanying prospectus supplement should not be regarded as a representation by us that our plans and objectives will be achieved. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this prospectus or any accompanying supplement to this prospectus.

USE OF PROCEEDS

We intend to use the net proceeds from selling shares of our common stock for general corporate purposes, which may include investing in debt or equity securities in primarily privately negotiated transactions, repayment of indebtedness, acquisitions and other general corporate purposes. Because our primary business is to provide long-term debt and equity capital to primarily middle-market companies, we are continuously identifying, reviewing and, to the extent consistent with our investment objective, funding new investments. As a result, we typically raise equity capital as we deem appropriate to fund such new investments. The supplement to this prospectus relating to an offering will more fully identify the use of the proceeds from such offering.

We anticipate that substantially all of the net proceeds of any offering of shares of our common stock will be used, as described above, within six months, but in no event longer than two years. Pending investment, we intend to invest the net proceeds of any offering of shares of our common stock in time deposits, income-producing securities with maturities of three months or less that are issued or guaranteed by the federal government or an agency of the federal government, high quality debt securities maturing in one year or less from the time of investment or other qualifying investments. Our ability to achieve our investment objective may be limited to the extent that the net proceeds of any offering, pending full investment, are held in lower-yielding time deposits and other short-term instruments.

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock is traded on the New York Stock Exchange under the symbol ALD. The following table lists the high and low closing sales prices for our common stock, the closing sales price as a percentage of net asset value (NAV) and quarterly dividends per share. On March 1, 2006, the last reported closing sale price of our common stock was \$ 28.47 per share.

	NAV ⁽¹⁾	Closing Sales Price		Premium of High Sales Price to NAV ⁽²⁾	Premium of Low Sales Price to NAV ⁽²⁾	Declared Dividends
		High	Low			
Year ending December 31, 2004						
First Quarter	\$ 14.60	\$ 30.85	\$ 27.15	211%	186%	\$ 0.57
Second Quarter	\$ 14.77	\$ 30.25	\$ 23.06	205%	156%	\$ 0.57
Third Quarter	\$ 14.90	\$ 25.80	\$ 22.22	173%	149%	\$ 0.57
Fourth Quarter	\$ 14.87	\$ 28.47	\$ 24.46	191%	164%	\$ 0.57
Extra Dividend						\$ 0.02
Year ended December 31, 2005						
First Quarter	\$ 15.22	\$ 27.84	\$ 24.89	183%	164%	\$ 0.57
Second Quarter	\$ 17.01	\$ 29.29	\$ 25.83	172%	152%	\$ 0.57
Third Quarter	\$ 17.37	\$ 29.17	\$ 26.92	168%	155%	\$ 0.58
Fourth Quarter	\$ 19.17	\$ 30.80	\$ 26.11	161%	136%	\$ 0.58
Extra Dividend						\$ 0.03
Year ended December 31, 2006						
First Quarter (through March 1, 2006)	*	\$	\$	*	*	\$ 0.59

(1) Net asset value per share is determined as of the last day in the relevant quarter and therefore may not reflect the net asset value per share on the date of the high and low sales prices. The net asset values shown are based on outstanding shares at the end of each period.

(2) Calculated as the respective high or low closing sales price divided by NAV.

* Not determinable at the time of filing.

Our common stock continues to trade in excess of net asset value. There can be no assurance, however, that our shares will continue to trade at a premium to our net asset value.

We intend to pay quarterly dividends to shareholders of our common stock. The amount of our quarterly dividends is determined by our Board of Directors. Our Board of Directors has established a dividend policy to review the dividend rate quarterly, and may adjust the quarterly dividend rate throughout the year. See Management's Discussion and Analysis of Financial Condition and Results of Operations Debt and Equity Capital and Tax Status. There can be no assurance that we will achieve investment results or maintain a tax status that will permit any particular level of dividend payment. Our credit facilities limit our ability to declare dividends if we default under certain provisions.

We maintain an opt in dividend reinvestment plan for our common shareholders. As a result, if our Board of Directors declares a dividend, then our shareholders will receive cash dividends, unless they specifically opt in to the dividend reinvestment plan to reinvest their dividends and receive additional shares of common stock. See Dividend Reinvestment Plan.

MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information contained in this section should be read in conjunction with our Consolidated Financial Statements and the Notes thereto. In addition, this prospectus contains certain forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as may, will, expect, intend, anticipate, estimate, or continue or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth above in the Risk Factors section. Other factors that could cause actual results to differ materially include:

changes in the economy;

risks associated with possible disruption in our operations due to terrorism;

future changes in laws or regulations and conditions in our operating areas; and

other risks and uncertainties as may be detailed from time to time in our public announcements and SEC filings.

Financial or other information presented for private finance portfolio companies has been obtained from the portfolio companies, and this financial information presented may represent unaudited, projected or pro forma financial information, and therefore may not be indicative of actual results. In addition, the private equity industry uses financial measures such as EBITDA or EBITDAM (Earnings Before Interest, Taxes, Depreciation, Amortization and, in some instances, Management fees) in order to assess a portfolio company's financial performance and to value a portfolio company. EBITDA and EBITDAM are not intended to represent cash flow from operations as defined by U.S. generally accepted accounting principles and such information should not be considered as an alternative to net income, cash flow from operations or any other measure of performance prescribed by U.S. generally accepted accounting principles.

OVERVIEW

As a business development company, we are in the private equity business. Specifically, we provide long-term debt and equity investment capital to companies in a variety of industries. Our lending and investment activity has generally been focused on private finance and commercial real estate finance, which included primarily the investment in non-investment grade commercial mortgage-backed securities, which we refer to as CMBS, and collateralized debt obligation bonds and preferred shares, which we refer to as CDOs.

On May 3, 2005, we completed the sale of our portfolio of CMBS and real estate related CDO investments. Upon the completion of this transaction, our lending and investment activity has been focused primarily on private finance investments. Our private finance activity principally involves providing financing to middle market U.S. companies through privately negotiated long-term debt and equity investment capital. Our financing is generally used to fund growth, acquisitions, buyouts, recapitalizations, note purchases, bridge financings, and other types of financings. We generally invest in private companies though, from time to time, we may invest in companies that are public but lack access to additional public capital. Our investment objective is to achieve current income and capital gains.

Our portfolio composition at December 31, 2005, 2004, and 2003, was as follows:

	<u>2005</u>	<u>2004</u>	<u>2003</u>
Private finance	96%	76%	74%
Commercial real estate finance	4%	24%	26%

Our earnings depend primarily on the level of interest and dividend income, fee and other income, and net realized and unrealized gains or losses on our investment portfolio after deducting interest expense on borrowed capital, operating expenses and income taxes, including excise tax. Interest income results from the stated interest rate earned on a loan or debt security and the amortization of loan origination fees and discounts. The level of interest income is directly related to the balance of the interest-bearing investment portfolio outstanding during the year multiplied by the weighted average yield. Our ability to generate interest income is dependent on economic, regulatory, and competitive factors that influence new investment activity, interest rates on the types of loans we make, the level of repayments in the portfolio, the amount of loans and debt securities for which interest is not accruing and our ability to secure debt and equity capital for our investment activities.

Because we are a regulated investment company for tax purposes, we intend to distribute substantially all of our annual taxable income as dividends to our shareholders. See "Other Matters" below.

PORTFOLIO AND INVESTMENT ACTIVITY

The total portfolio at value, investment activity, and the yield on interest-bearing investments at and for the years ended December 31, 2005, 2004, and 2003, were as follows:

(\$ in millions)	At and for the Years Ended December 31,		
	2005	2004	2003
Portfolio at value	\$ 3,606.4	\$ 3,013.4	\$ 2,584.6
Investments funded	\$ 1,675.8	\$ 1,524.5	\$ 931.5
Change in accrued or reinvested interest and dividends	\$ 6.6	\$ 52.2	\$ 45.0
Principal collections related to investment repayments or sales	\$ 1,503.4	\$ 909.2	\$ 788.3
Yield on interest-bearing investments ⁽¹⁾	12.8%	14.0%	14.7%

- (1) The weighted average yield on interest-bearing investments is computed as the (a) annual stated interest plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing interest-bearing investments less the annual amortization of loan origination costs, divided by (b) total interest-bearing investments at value. The weighted average yield is computed as of the balance sheet date.

Private Finance

The private finance portfolio at value, investment activity, and the yield on loans and debt securities at and for the years ended December 31, 2005, 2004, and 2003, were as follows:

(\$ in millions)	At and for the Years Ended December 31,		
	2005	2004	2003
Portfolio at value:			
Loans and debt securities	\$ 2,094.9	\$ 1,602.9	\$ 1,214.9
Equity securities	1,384.4	699.2	687.8
Total portfolio	\$ 3,479.3	\$ 2,302.1	\$ 1,902.7
Investments funded ⁽¹⁾	\$ 1,462.3	\$ 1,140.8	\$ 498.0
Change in accrued or reinvested interest and dividends	\$ 24.6	\$ 45.6	\$ 41.8
Principal collections related to investment repayments or sales	\$ 703.9	\$ 551.9	\$ 318.6
Yield on interest-bearing investments ⁽²⁾	13.0%	13.9%	15.0%

- (1) Investments funded for the year ended December 31, 2004, included a \$47.5 million subordinated debt investment in The Hillman Companies, Inc. received in conjunction with the sale of Hillman as discussed below.
- (2) The weighted average yield on loans and debt securities is computed as the (a) annual stated interest plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total loans and debt securities at value. The weighted average yield is computed as of the balance sheet date.

Our investment activity is focused on making long-term investments in the debt and equity of primarily private middle market companies. Debt investments may include senior loans, unitranche debt (a single debt investment that is a blend of senior and subordinated debt), or subordinated debt (with or without equity features). The junior debt that we invest in that is lower in repayment priority than senior debt is also known as mezzanine

debt. Equity investments may include a minority equity stake in connection with a debt investment or a substantial equity stake in connection with a buyout transaction. In a buyout transaction, we generally invest in senior and/or subordinated debt and equity (preferred and/or voting or non-voting common) where our equity ownership represents a significant portion of the equity, but may or may not represent a controlling interest. In addition, we may fund most or all of the debt and equity capital upon the closing of certain buyout transactions, which may include investments in lower-yielding senior debt. Subsequent to the closing, the portfolio company may refinance all or a portion of the lower-yielding senior debt, which would reduce our investment. Repayments include repayments of senior debt funded by us that was subsequently refinanced or repaid by the portfolio companies.

We intend to take a balanced approach to private equity investing that emphasizes a complementary mix of debt investments and buyout investments. The combination of these two types of investments provides current interest and related portfolio income and the potential for future capital gains. Recently, we have seen junior debt financing opportunities in the market that we believe are unattractive from a risk/return perspective. We believe many of these transactions employ too much leverage and are priced too low relative to the risks inherent in junior debt instruments. To address the currently active merger and acquisition market for private companies, our strategy is to focus on buyout and recapitalization transactions where we can manage risk through the structure and terms of our debt and equity investments and where we can potentially realize more attractive total returns from both current interest and fee income and future capital gains. We are also focusing our debt investing on smaller middle market companies where we can provide both senior and subordinated debt or unitranche debt, where our current yield may be lower than traditional subordinated debt. We believe that providing both senior and subordinated debt or unitranche debt provides greater protection in the capital structures of our portfolio companies.

Investments Funded. Investments funded and the weighted average yield on investments funded for the years ended December 31, 2005, 2004, and 2003, consisted of the following:
