**CAUTIONARY STATEMENT
REGARDING FORWARD-LOOKING STATEMENTS**

Any statements made in this annual report that are not statements of historical fact, including statements about our beliefs and expectations, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act, and should be evaluated as such. Forward-looking statements include information concerning any possible or assumed future financial condition and results of operations, including statements that may relate to our plans, objectives, strategies, goals, future events, future revenues or performance, future penetration rates, planned market launches, capital expenditures, financing needs, outcomes of litigation and other information that is not historical information. Forward-looking statements often include words such as anticipate, expect, suggests, plan, believe, intend, estimates, targets, projects, would, could, should, may, will, continue, forecast, expressions. Forward-looking statements are contained throughout this annual report, including the Business, Regulation, Risk Factors, and Management's Discussion and Analysis of Financial Condition and Results of Operations.

We base the forward-looking statements or projections made in this report on our current expectations, plans and assumptions that we have made in light of our experience in the industry, as well as our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances and at such times. As you read and consider this annual report, you should understand that these forward-looking statements or projections are not guarantees of future performance or results. Although we believe that these forward-looking statements and projections are based on reasonable assumptions at the time they are made, you should be aware that many of these factors are beyond our control and that many factors could affect our actual financial results, performance or results of operations and could cause actual results to differ materially from those expressed in the forward-looking statements and projections. Factors that may materially affect such forward-looking statements and projections include:

the highly competitive nature of our industry;

the rapid technological changes in our industry;

an economic slowdown or recession in the United States;

the state of the capital markets and the United States economy;

our exposure to counterparty risk in our financial agreements;

our ability to maintain adequate customer care and manage our churn rate;

our ability to sustain the growth rates we have experienced to date;

our ability to manage our rapid growth, train additional personnel and improve our financial and disclosure controls and procedures;

our ability to secure the necessary spectrum and network infrastructure equipment;

our ability to adequately enforce or protect our intellectual property rights or defend against suits filed by others;

governmental regulation of our services and the costs of compliance and our failure to comply with such regulations;

our capital structure, including our indebtedness amounts;

changes in consumer preferences or demand for our products;

our inability to attract and retain key members of management; and

other factors described in this annual report under Risk Factors.

3

Table of Contents

These forward-looking statements and projections speak only as to the date made and are subject to and involve risks, uncertainties and assumptions, many of which are beyond our control or ability to predict and you should not place undue reliance on these forward-looking statements and projections. The results presented for any period, including the year ended December 31, 2008, may not be reflective of results for any subsequent period. All future written and oral forward-looking statements and projections attributable to us or persons acting on our behalf are expressly qualified in their entirety by our cautionary statements. We do not intend to, and do not undertake a duty to, update any forward-looking statement or projection in the future to reflect the occurrence of events or circumstances, except as required by law.

MARKET AND OTHER DATA

Market data and other statistical information used throughout this report are based on independent industry publications, government publications, reports by market research firms and other published independent sources. Some data is also based on our good faith estimates, which we derive from our review of internal surveys and independent sources, including information provided to us by the U.S. Census Bureau. Although we believe these sources are reliable, we have not independently verified the information. By including such market data and information, we do not guarantee its accuracy or undertake a duty to provide such data in the future or to update such data when such data is updated.

This report contains trademarks, service marks and trade names of companies and organizations other than us. MetroPCS® and other trademarks are registered trademarks of MetroPCS Wireless, Inc., a wholly-owned subsidiary, and certain of our other subsidiaries.

In this annual report on Form 10-K, unless the context indicates otherwise, references to MetroPCS, MetroPCS Communications, our Company, the Company, we, our, ours and us refer to MetroPCS Communications, Inc., a Delaware corporation, and its wholly-owned subsidiaries.

PART I

Item 1. Business

General

We are a wireless communications provider that offers wireless broadband mobile services under the MetroPCS® brand in selected major metropolitan areas in the United States over our own licensed networks or networks of entities in which we hold a substantial non-controlling ownership interest. We provide a wide array of wireless communications services to our subscribers on a no long-term contract, paid-in-advance, flat-rate, unlimited usage basis. As of December 31, 2008, we had approximately 5.4 million subscribers in eight states. We are the sixth largest facilities-based provider of wireless services in the United States measured by the number of subscribers served.

MetroPCS Communications, Inc., or MetroPCS, was incorporated in 2004 by MetroPCS, Inc. in the state of Delaware and MetroPCS maintains its corporate headquarters in Richardson, Texas. In July 2004, as a result of a merger between a wholly-owned subsidiary of MetroPCS and MetroPCS, Inc., with MetroPCS, Inc. being the surviving corporation, MetroPCS, Inc. and all of its subsidiaries became wholly-owned subsidiaries of MetroPCS. In April 2007, MetroPCS consummated an initial public offering of its common stock, par value \$0.001 per share, and became listed for trading on The New York Stock Exchange under the symbol PCS.

Our web site address is www.metropcs.com. Information contained on or accessible from our web site is not incorporated by reference into this annual report on Form 10-K and should not be considered part of

this report or any other filing we make with the Securities and Exchange Commission, or the SEC. We file with, or furnish to, the SEC, all our periodic filings and reports, including an annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and any amendments thereto, as well as other information. All of our filings with the SEC are available free of charge through the Investor Relations page of our web site as soon as practicable after providing such information to the SEC. Copies of any of our filings may also be requested, without charge, by sending a written request to Investor Relations, MetroPCS Communications, Inc., 2250 Lakeside Blvd., Richardson, Texas 75082.

Business Overview

We currently provide our wide array of wireless broadband mobile services primarily in selected major metropolitan areas in the United States, including the Atlanta, Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, Miami, New York, Orlando/Jacksonville, Philadelphia, Sacramento, San Francisco, and Tampa/Sarasota metropolitan areas. As of December 31, 2008, we hold, or have access to, wireless spectrum covering a total population of approximately 150 million people and 9 of the top 12 and 14 of the top 25 most populous metropolitan areas in the United States. We provide our services using code division multiple access, or CDMA, networks, using 1xRTT technology.

In September 2008, we entered into a national roaming agreement and an agreement to exchange wireless spectrum with Leap Wireless International, Inc., or Leap, and at the same time we settled all outstanding litigation between the parties. The nationwide roaming agreement, which has an initial term of 10 years, covers our, Royal Street Communications, LLC, or Royal Street Communications, and Leap's existing and future markets. Additionally, we and Leap entered into a spectrum exchange agreement covering licenses in certain markets, with Leap acquiring from us 10 MHz of spectrum in San Diego, Fresno, Seattle and certain other Washington and Oregon markets, and our acquiring from Leap an additional 10 MHz of spectrum in Dallas-Ft. Worth, Shreveport-Bossier City, Lakeland-Winter Haven, Florida and certain other North Texas markets, with consummation subject to customary closing conditions.

Competitive Strengths

We believe our business model has the following competitive strengths that distinguish us from our principal wireless competitors:

Our Fixed Price Unlimited Service Plans. We offer our services on a no long-term contract, paid-in-advance, flat-rate, unlimited usage basis. We believe we offer a compelling value proposition to our customers through our service offerings that provide unlimited usage from within a local calling area for a lower fixed price than any of our primary competitors, which differentiates our offerings from those of the national wireless broadband mobile carriers. Our average per minute costs to our customers for our service plans are significantly lower than the average per minute costs of other traditional wireless broadband mobile carriers. We believe our low average cost per minute positions us very well for the growing trend of wireline displacement.

Our Densely Populated Markets. The aggregate population density of the metropolitan areas we currently serve and plan to serve is substantially higher than the national average. We believe the high relative population density of the metropolitan areas we serve or plan to serve results in increased efficiencies in network deployment, operations and product distribution.

Our Cost Leadership Position. We believe we have the lowest costs of any of the providers of wireless broadband mobile services in the United States, which allows us to offer our services

Table of Contents

on a flat-rate basis at affordable prices while maintaining cash profits per subscriber as a percentage of revenues per subscriber that we believe are among the highest in the wireless broadband mobile services industry.

Our Spectrum Portfolio. As of December 31, 2008, we hold or have access to wireless spectrum covering a population of approximately 150 million in the United States and covering 9 of the top 12 and 14 of the top 25 most populous metropolitan areas in the United States.

Our Advanced CDMA Network. We deploy a CDMA network that is designed to provide the capacity necessary to satisfy the usage requirements of our customers. We believe CDMA technology provides us with substantially more voice and data capacity per MHz of spectrum than other commonly deployed wireless broadband mobile technologies.

Business Strategy

We believe the following components of our business strategy provide a foundation for our continued growth:

Target Underserved Customer Segments in our Markets. We target a mass market which we believe is largely underserved by traditional wireless broadband mobile carriers. Our recent customer surveys indicate that over 85% of our customers use our service as their primary phone service and that over 50% of our customers no longer have traditional landline phone service, which we believe is evidence that our services are gaining acceptance as a substitute for landline service.

Offer Affordable, Paid-In-Advance, Fixed Price, Unlimited Service Plans With No Long-Term Service Contract Requirement. We plan to continue to focus on increasing the value provided to our subscribers by offering affordable, paid-in-advance, fixed price, unlimited service plans with no long-term service contract and plan to continue to focus on increasing the value provided to our subscribers.

Remain One of the Lowest Cost Wireless Service Providers in the United States. We plan to continue to focus on controlling our costs allowing us to remain one of the lowest cost providers of wireless broadband services in the United States.

Expand into Attractive Markets. We plan to continue to focus on acquiring or gaining access to spectrum in metropolitan areas which have high relative population density and customer characteristics similar to our existing metropolitan areas. We may in the future pursue means, other than purchasing spectrum, to acquire or gain access to new metropolitan areas. See Competition.

Effectively Compete in our Markets. We continue to make significant capital improvements to our network to be able to offer our subscribers competitive and technologically advanced services, including enhanced data services, location based services and digital technology as it becomes increasingly available.

Table of Contents

Products and Services

Our service, branded under the MetroPCS name, allows customers to place unlimited local calls from within our service area, and to receive unlimited calls from any area while in our local service areas, under simple and affordable flat monthly rate service plans starting at \$30 per month. For an additional \$5 to \$20 per month, our customers may select alternative service plans that offer additional features on an unlimited basis, such as unlimited long distance calls from within our local service calling area to any telephone number in the continental United States and roaming while in the service area of certain other wireless broadband mobile carriers. For additional usage fees we also provide certain other value-added services, such as international long distance and international text messaging. All our service plans are paid-in-advance and do not require a long-term service contract. We provide the following products and services:

Voice Services. Our voice services allow customers to place voice calls to, and receive calls from, any telephone in the world, including local, domestic long distance, and international calls. Our services also allow customers to receive and make calls while they are located in geographic areas served by certain other wireless broadband mobile carriers through roaming arrangements with such carriers.

Data Services. Our data services include services provided through the Binary Runtime Environment for Wireless, or BREW, platform, such as ringtones, ring back tones, games and content applications; text messaging services (domestic and international); multimedia messaging services; mobile Internet browsing; mobile instant messaging; location based services; social networking services; and push e-mail.

Custom Calling Features. We offer custom calling features, including caller ID, call waiting, three-way calling and voicemail.

Advanced Handsets. We sell a variety of handsets manufactured by nationally recognized handset manufacturers for use on our network, including models that have cameras, can browse the Internet, play music and have other features facilitating digital data.

Service Areas

Our strategy has been to offer our services in major metropolitan markets and surrounding areas. We commenced providing commercial service in the first quarter of 2002. We launched service in our current major metropolitan areas as follows:

Miami, Atlanta and Sacramento in the first quarter of 2002

San Francisco in September 2002

Tampa/Sarasota in October 2005

Dallas/Ft. Worth in March 2006

Detroit in April 2006

Orlando and portions of northern Florida in November 2006

Los Angeles in September 2007

Las Vegas in March 2008

Philadelphia in July 2008

New York and Boston in February 2009

We provide service in Los Angeles, California and certain portions of Northern Florida, including Orlando, through a wholesale arrangement with Royal Street Communications, a company in which we hold an 85% non-controlling interest. For a discussion of Royal Street Communications, and its wholly owned subsidiaries, or collectively with Royal Street Communications, Royal Street, please see Royal Street.

7

Table of Contents

The table below provides an overview of our currently licensed metropolitan areas including the Federal Communications Commission, or FCC, licensed geographic area, the amount of broadband wireless spectrum held, and whether we hold the FCC license ourselves or provide or will provide our services in that metropolitan area through our agreements with Royal Street, which holds the license.

Table of Contents

- (1) License held by a wholly-owned subsidiary of Royal Street Communications.
- (2) 10 MHz license held by a wholly-owned subsidiary of Royal Street Communications and 10 MHz license held by MetroPCS.
- (3) Comprised of Grayson and Fannin counties only.
- (4) Spectrum licensed as part of West REA 6.
- (5) Includes 10 MHz of spectrum from West REA 6.
- (6) Spectrum licensed as part of Northeast REA 1.
- (7) Includes 10 MHz of spectrum from Northeast REA 1.
- (8) Portions listed in connection with other metropolitan areas.
- (9) Counties of Clay, Wichita, Archer, Baylor, Wilbarger, Ford, and Hardeman, TX leased to Flat Wireless, LLC.
- (10) In July 2008, we entered into an agreement to acquire 10 MHz of PCS spectrum in certain markets in Connecticut, Massachusetts and New York and to assign 10 MHz of AWS spectrum in Hartford, Middlesex, Toland, Litchfield, and New Haven, CT, Berkshire,

Franklin, Hampden, and Hampshire, MA, and Duchess and Ulster, NY to, Tuscarora Communications, LLC. See Note 7 to the consolidated financial statements included elsewhere in this report.

- (11) In December 2008, we entered into an agreement to acquire AWS spectrum in certain markets from AWS Wireless, Inc. See Note 7 to the consolidated financial statements included elsewhere in this report.
- (12) In November 2008, we entered into an agreement to acquire AWS spectrum in certain markets from Cavalier Wireless, L.L.C. See Note 7 to the consolidated financial statements included elsewhere in this report.
- (13) In September 2008, we entered into an agreement to acquire this spectrum from Cricket Licensee (Reauction), Inc. and Cricket Licensee I, Inc., both subsidiaries of Leap and to assign 10 MHz of AWS spectrum in the Fresno, CA (BEA162), San Diego, CA (BEA161), Seattle-Everett, WA (CMA020), Pendleton, OR-WA (BEA168), and Richland-Kennewick-Pasco, WA (BEA169) to Leap. See Note 7 to the consolidated financial statements included elsewhere in this report.
- (14) In February 2009, we consummated an agreement to acquire this spectrum from Cincinnati Bell

Wireless, LLC. See Note 7
to the consolidated financial
statement included
elsewhere in this report.

The map below illustrates the geographic coverage of our licensed spectrum as of December 31, 2008:

9

Table of Contents**Royal Street**

In November 2004, we entered into a cooperative arrangement with C9 Wireless, LLC, or C9, an unaffiliated very small business entrepreneur and, as part of that arrangement, acquired an 85% non-controlling interest in Royal Street Communications, an entity controlled by C9. Royal Street Communications participated in FCC Auction 58, was the high bidder on, and was granted 10 MHz of spectrum in the Los Angeles basic trading area, or BTA, and 10 MHz of spectrum in certain other BTAs in Northern Florida, including Orlando. Auction 58, like other major auctions conducted by the FCC, was designed to allow small businesses, very small businesses and other so-called designated entities, or DEs, to acquire spectrum and construct wireless networks to promote competition with existing carriers. To that end, the FCC designated certain blocks of wireless broadband PCS spectrum, or closed licenses, for which only qualified DEs could apply. In addition, DEs were permitted to apply for and bid on open licenses in competition with non-DEs, but very small business DEs could receive a bidding credit of up to 25% of the gross bid price. Royal Street Communications qualified as a very small business DE and was granted in December 2005 certain closed broadband PCS licenses and certain open broadband PCS licenses on which it received a 25% bidding credit. Subsequently, these licenses were assigned with the consent of the FCC to a series of wholly-owned subsidiaries of Royal Street Communications.

We do not own or control the Royal Street licenses. We own a non-controlling 85% limited liability company member interest in Royal Street Communications, and we may elect only two of the five members to Royal Street Communications management committee, which has the full power to direct the management of Royal Street Communications. C9 has control over the operations of Royal Street, because it has the right to elect three of the five members of Royal Street Communications management committee. C9 also has the right to put, or require us to purchase, all or part of its ownership interest in Royal Street Communications, but due to regulatory restrictions, we have no corresponding right to call, or require C9 to sell to us, C9's ownership interest in Royal Street Communications. The put right has been structured so that its exercise will not adversely affect Royal Street Communications continued eligibility as a very small business DE during periods where such eligibility is required. If C9 exercises its put right, we will be required to pay a fixed return on C9's invested capital in Royal Street Communications, which fixed return diminishes annually beginning in the sixth year following the grant of Royal Street's FCC licenses. These put rights expire in June 2012.

Royal Street Communications holds all of its licenses through its wholly-owned subsidiaries and has entered into certain cooperative agreements with us relating to the financing, design, construction and operation of its networks. The Royal Street agreements are based on a wholesale model in which Royal Street sells up to 85% of its engineered service capacity to us on a wholesale basis, which we in turn market on a retail basis under the MetroPCS brand to our customers. The remaining 15% of the engineered service capacity of Royal Street's network is reserved by Royal Street and may be sold to other parties. In addition, the Royal Street agreements provide that MetroPCS, at Royal Street's request and at all times subject to Royal Street's direction and control, will assist Royal Street in building out its networks, provide information to Royal Street relating to the budgets and business plans as well as arrange for administrative, clerical, accounting, credit, collection, operational, engineering, maintenance, repair, and technical services.

Additionally, we have provided and will provide financing to Royal Street, at Royal Street's request, under a loan agreement the proceeds of which are to be used for the acquisition of licenses, build out of its licensed areas, operation of the Royal Street network infrastructure, and to make payments under the loan until Royal Street has positive free cash flow. As of December 31, 2008, the maximum amount that Royal Street could borrow from us under the loan agreement was approximately \$1.0 billion of which Royal Street had net outstanding borrowings of \$905.0 million from us, approximately \$227.7 million of which was incurred in 2008. On February 17, 2009, we executed an amendment to the loan agreement which increased the amount available to Royal Street under the loan agreement by an additional \$550.0 million. Royal Street has incurred an additional \$14.2 million in net borrowings through February 23, 2009. Interest accrues under the loan agreement at a rate equal to 11% per annum. As of December 31, 2008, Royal Street has commenced repayment of that portion of the loan related to the Orlando, Lakeland-Winter Haven, Melbourne-Titusville and Los Angeles metropolitan areas.

License Term

The broadband personal communications services, or PCS, licenses held by us and by Royal Street have an initial term of ten years. The initial license term is fifteen years for our advanced wireless services, or AWS, licenses which runs from the initial grant date (which varies by license), and ten years from June 12, 2009 for our 700 MHz license. Subject to applicable conditions, all of our and Royal Street's licenses may be renewed at the end of their

Table of Contents

terms. For example, the initial broadband PCS licenses for San Francisco, Sacramento, Miami and Atlanta were granted in 1997, were renewed in 2007 and are subject to renewal in January 2017; the AWS licenses were granted in November 2007 and are subject to renewal in November 2022; and the 700 MHz license was granted in June 2008 and is subject to renewal in June 2019. Each FCC license is essential to our and Royal Street's ability to operate and conduct our and Royal Street's business in the area covered by that license. We also have other licenses, such as microwave licenses, which we use to provide service. We intend to file renewal applications for our licenses when the renewal filing windows open. The next wireless broadband PCS licenses that need to be renewed expire in 2009. For a discussion of general licensing requirements, please see Construction Obligations.

Distribution and Marketing

We offer our products and services to our customers under the MetroPCS brand both indirectly through independent retail outlets and directly through Company-operated retail stores. We also sell our services over the Internet using our own branded MetroPCS® website. Our indirect distribution outlets include a mixture of local, regional and national mass market dealers and retailers and specialty stores. Many of our dealers own and operate more than one location and may operate in more than one of our metropolitan areas. A substantial number of our retailers, dealers and corporate store locations also accept payment for our services and many also perform other services for us. A significant portion of our gross customer additions have been added through our indirect distribution outlets. For the twelve months ended December 31, 2008, approximately 89% of our gross customer additions were through indirect channels.

Our marketing strategy is to create and provide products, services and communications that drive growth while optimizing our marketing return on investment and minimizing the cost to acquire customers. Our marketing campaigns emphasize that MetroPCS offers unlimited services on a flat rate basis without long-term service contracts for an affordable price. MetroPCS builds consumer awareness and promotes the MetroPCS brand by strategic local advertising to develop our brand and support our indirect and direct distribution channels. We advertise primarily through local radio, cable, television, outdoor and local print media. In addition, we believe we have benefited from a significant number of word-of-mouth customer referrals.

Customer Care, Billing and Support Systems

We outsource some or all of our customer care, billing, payment processing and logistics to nationally recognized third-party providers. We also are in the process of transitioning our billing services to another nationally recognized third party vendor. See Risk Factors *We currently are migrating our billing services to a new vendor.*

Our outsourced call centers are staffed with professional and bilingual customer service personnel, who are available to assist our customers 24 hours a day, 365 days a year. Some of these outsourced call centers are located outside the United States, in Mexico, Panama, and the Philippines, which facilitates the efficient provision of customer support to our large and growing subscriber base, including Spanish speaking customers. We also provide automated voice response service to assist our customers with routine information requests. MetroPCS ranked Highest in Customer Satisfaction with Wireless Prepaid Service in the J.D. Power and Associates third annual Prepaid Customer Satisfaction Study in July of 2008.

Network Operations

We and Royal Street operate 1xRTT CDMA networks in all of the metropolitan areas where we have launched service. A network includes a switching center (which may be shared between metropolitan areas) which serves several purposes, including routing calls, managing call handoffs, managing access to the public switched telephone network and providing access to voicemail and other value-added services, cell sites or distributed antenna system, or DAS, nodes, and backhaul facilities, which carry traffic to and from our cell sites and our switching facilities. Currently, almost all cell sites in the network are co-located, meaning our and Royal Street's equipment is located on leased facilities that are owned by third parties who retain the right to lease the facilities to additional carriers. The switching centers and national operations center provide around-the-clock monitoring of our network.

Our switches connect to the public switched telephone network through fiber rings leased from third-parties, which transmit originating and terminating traffic between our equipment and local exchange and long distance carriers. We also have negotiated interconnection agreements with relevant local exchange carriers in our service areas.

We use third-party providers for long distance services and the majority of our backhaul services.

Table of Contents**Network Technology**

Communications between the subscriber wireless device and our network is accomplished by a frequency management technology, or air interface protocol. The FCC has not mandated a universal air interface protocol for wireless broadband systems. We and Royal Street have deployed 1xRTT CDMA technology, which is one of the dominant air interface protocols. Our and Royal Street's decision to use CDMA is based on what we believe are several key advantages that CDMA has over other air interface protocols, including higher network capacity, longer handset battery life, fewer dropped calls, simplified frequency planning, efficient migration path as our CDMA technology can be easily upgraded to fourth generation air interface protocols in a cost effective manner, and increased privacy and security. CDMA is incompatible with certain other air interface protocols. Customers and former customers of other carriers may not be able to use their wireless devices on our or Royal Street's networks because either their wireless device uses a different air interface protocol or the other CDMA carriers may have restricted the customers from changing the programming of their wireless device to allow it to be used on networks other than the original CDMA carrier's network.

We also purchase EVRC-B, or 4G vocoder, handsets which will allow for greater capacity in our network and we are considering other network technology such as long term evolution, or LTE, which we believe would provide significant increases in network capacity and data rates. This technology may replace or supplement our and Royal Street's 1xRTT CDMA network.

Competition

The market for our wireless services is highly competitive. We compete directly in each of our metropolitan areas with other wireless broadband mobile service providers, wireline, Internet, cable, satellite and other communications service providers by providing a wireless alternative to traditional wireline service. We believe that competition for subscribers among wireless broadband mobile providers is based mostly on price, service area, services and features, call quality and customer service.

The current wireless broadband mobile industry is dominated by four national carriers—AT&T, Verizon Wireless, Sprint Nextel and T-Mobile—and their prepaid affiliates or brands. National carriers typically offer post-paid plans that subsidize wireless devices, but require long-term service contracts and credit checks or deposits. The national carriers also have introduced, either directly or through their affiliates, unlimited fixed-rate services plans in areas in which we offer or plan to offer service. These unlimited fixed-rate service plans may cause other competitors to introduce similar unlimited fixed-rate plans. In addition, some regional companies, such as Leap, have unlimited fixed-rate service plans similar to ours and compete, or have announced plans to compete, in certain of our markets.

Over the past few years, the wireless industry also has seen an emergence of several new competitors that provide either pay-as-you-go or prepaid wireless services. Some of these competitors, such as Virgin Mobile USA, and Tracfone, are non-facility based mobile virtual network operators, or MVNOs, that contract with wireless network operators to provide a separately branded wireless service. These MVNOs typically also charge by the minute rather than offering flat-rate unlimited service plans.

The wireline industry is dominated by large incumbent carriers, such as AT&T and Verizon, and also includes competitive local exchange or voice over Internet protocol, or VoIP, service providers. The cable industry also is dominated by large carriers such as Time Warner Cable, Comcast and Cox Communications. These cable companies, along with cable company Advance/Newhouse, formed a joint venture called SpectrumCo LLC, or SpectrumCo, which bid on and acquired 20 MHz of AWS spectrum in a number of major metropolitan areas throughout the United States, including all of the major metropolitan areas which comprise our Core and Expansion Markets. Certain large national cable companies, Sprint, Intel, Clearwire and others also have formed a joint venture to construct a national network to provide wireless data and telecommunications services.

In the future, we may face competition from mobile satellite service, or MSS, providers, and from resellers of these services. The FCC has granted some MSS providers, and may grant others, the flexibility to deploy an ancillary terrestrial component to their satellite services. This added flexibility may enhance MSS providers' ability to offer more competitive mobile services. In addition, several large satellite companies, computer companies, and Internet search and portal companies have indicated an interest in establishing next generation wireless networks, and certain VoIP providers have indicated that in the future they may acquire FCC licenses or use unlicensed

Table of Contents

spectrum to offer wireless services to compete directly with us. The FCC also has adopted an order that allows companies to provide wireless services on an unlicensed basis in certain unused portions of the television spectrum. Further, we also may face competition from providers of WiMax, which is the name given to a family of digital technologies that are capable of supporting high-speed, long-range wireless services suitable for mobility applications, using exclusively licensed or unlicensed spectrum. Additionally, we may compete in the future with companies that offer new technologies and market other services we do not offer or may not be available with our network technology, from our vendors or within our spectrum. Some of our competitors do or may bundle these other services together with their wireless communications service, which customers may find more attractive. Energy companies, utility companies and satellite companies also are expanding their services to offer telecommunications services.

There continues to be substantial merger and acquisition activity in the wireless industry. We have in the past acquired and may in the future acquire spectrum to enter new metropolitan areas. We also may in the future consider acquisitions of or other business combinations with companies in addition to acquisitions of spectrum. For example, we have in the past made a public offer to acquire Leap which we subsequently withdrew. In the future, there could be discussions between us and Leap or others regarding potential transactions between the companies.

Many of our wireless, wireline, cable and other competitors' resources are substantially greater, and their market shares are larger, than ours. Additionally, many of our wireless competitors offer larger coverage areas and nationwide calling plans that do not give rise to additional roaming charges for their customers. The competitive pressures of the wireless broadband mobile services industry have caused certain competitors to offer service plans with growing bundles of minutes of use at lower per minute prices or price plans with unlimited nights and weekends and could lead them, and have led some of our competitors, to offer unlimited service plans similar to ours. Our competitors' plans could adversely affect our ability to maintain our pricing, market penetration, growth and customer retention. In addition, large national wireless broadband mobile services carriers have been reluctant to enter into roaming agreements at attractive rates with smaller and regional carriers like us, which limits our ability to serve certain market segments and recent FCC actions to promote automatic roaming do not resolve these difficulties. Moreover, the policies of the United States government have made, and may continue to make, additional spectrum for wireless services available in each of our markets, which may increase the number of our competitors and enhance our competitors' ability to offer additional plans and services. Further, since many of our competitors are large companies, they have on occasion been able to convince handset manufacturers to provide the newest handsets exclusively to them. Our competitors also can afford to heavily subsidize the price of the subscriber's handset because they have greater resources than us and may require their customers to enter into long term contracts. The FCC has indicated it may examine, and Congress is considering legislation that may limit, early termination fees for the long term contracts used by national wireless broadband mobile services carriers which could prompt them to reduce the subsidization of handsets and limit their long term contracts.

All of these factors may detract from our ability to attract customers from certain market segments.

As competition develops, we may add additional features or services to our existing service plans, or make other changes to our service plans.

Seasonality

Our customer activity is influenced by seasonal effects related to traditional retail selling periods and other factors that arise from our target customer base. Net customer additions are typically strongest in the first and fourth calendar quarters of the year. Softening of sales and increased customer turnover, or churn, in the second and third calendar quarters of the year usually combine to result in fewer net customer additions during the second and third calendar quarters. However, sales activity and churn can be strongly affected by the launch of new and surrounding metropolitan areas and promotional activity, which could reduce or outweigh certain seasonal effects. For a more detailed discussion of seasonality in our business, please read Management's Discussion and Analysis of Financial Condition and Results of Operations' Seasonality.

Inflation

We do not believe that inflation has had a material effect on our operations.

Table of Contents

Employees

As of December 31, 2008, we have approximately 3,200 employees. We believe our relationship with our employees is good. None of our employees are covered by a collective bargaining agreement or represented by an employee union.

Regulation

The wireless telecommunications industry is regulated extensively by the federal government and, to varying degrees, by state and local governments. Congress, state legislatures, municipalities, federal, state and local regulators, and the courts have passed legislation, ordinances, codes, rules, regulations, instituted administrative rulemakings, and issued judicial decisions, affecting the telecommunications industry. Due to the recent changes in the party affiliation of the President of the United States and changes in the composition of Federal and state legislatures, the political environment, and financial conditions, the regulation of the communications industry has been, and is expected to remain in the future, in a state of constant flux. Many of these legislative actions, rulemakings, and judicial decisions have had, and possible future regulations may have, a significant material effect on us, our business, our financial condition, and our operating results.

Federal regulation

Our business is subject to extensive federal regulation under the Communications Act of 1934, as amended, or the Communications Act, the implementing regulations adopted thereunder by the FCC, judicial and regulatory decisions interpreting and implementing the Communications Act, and other federal statutes as discussed below. These statutes, regulations and associated policies govern, among other things, the allocation and licensing of radio spectrum; the ownership, lease, transfer of control and assignment of wireless licenses; the ongoing technical, operational and service requirements under which we must operate; the timing, nature and scope of network construction; the rates, terms and conditions of service; the protection and use of customer information; roaming policies; the provision of certain services, such as E-911; the interconnection of communications networks; the provision of subscriber equipment; the location of network assets; and the use of rights of way.

Broadband spectrum allocations

We utilize paired radio spectrum licensed by the FCC. The principal spectrum bands used to provide terrestrial broadband wireless mobile services in the United States are as follows, all of which can be used to provide services competitive with the spectrum held by us:

Cellular Spectrum. Starting in the 1980 s, the FCC awarded two cellular licenses with 25 MHz of spectrum each in the 800 MHz band on a metropolitan statistical area, or MSA, and rural service area, or RSA, basis. There are 306 MSAs and 428 RSAs in the United States. MSAs and RSAs are defined by the Office of Management and Budget and the FCC, respectively.

PCS Spectrum. In the 1990 s, the FCC assigned licenses to use 120 MHz of radio spectrum in the 1.9 GHz band for broadband PCS. The FCC divided the 120 MHz of spectrum into two 30 MHz blocks licensed on a Major Trading Area, or MTA, basis, and one 30 MHz block and three 10 MHz blocks licensed on a Basic Trading Area, or BTA, basis. Under the broadband PCS licensing plan, the United States and its possessions and territories are divided into 493 BTAs, all of which are included within 51 MTAs. Both MTAs and BTAs are defined by Rand McNally & Company, as supplemented by the FCC. Many of our competitors utilize a combination of cellular and broadband PCS spectrum to provide their services. In addition, the FCC granted a nationwide 10 MHz paired PCS license to Nextel Communications (now Sprint Nextel) in conjunction with its relocation and rebanding of ESMR spectrum.

SMR Spectrum. The FCC first established specialized mobile radio, or SMR, in 1979 to provide for land mobile communications on a commercial basis. The FCC initially licensed spectrum in the 800 and 900 MHz bands for this service, in non-contiguous bands, on a site-by-site basis. Since then, the FCC has established geographic area licenses for such spectrum. In total, the FCC has licensed 19 megahertz of SMR spectrum, plus an additional 7.5 megahertz of spectrum that is available for SMR as well as other services. FCC policy permits flexible use of this spectrum, including the provision of mobile wireless services, and such spectrum is taken into consideration when the FCC is assessing the competitive impact of broadband wireless merger and acquisition transactions.

Table of Contents

AWS-1 Spectrum. In 2006, the FCC assigned 90 MHz of spectrum to be used for advanced wireless services, or AWS. The FCC divided the 90 MHz of spectrum into two 10 MHz and one 20 MHz paired blocks assigned on a regional economic area grouping, or REAG, basis; one 10 MHz and one 20 MHz paired blocks each assigned on an economic area, or EA, basis; and a 20 MHz paired block assigned on a Cellular Marketing Area, or CMA, basis. The CMAs generally correspond to MSAs and RSAs. Under the AWS band plan, the United States is divided into 176 EAs, 12 REAGs, and 734 CMAs. The EAs are geographic areas defined by the Regional Economic Analysis Division of the Bureau of Economic Analysis, U.S. Department of Commerce, as supplemented by the FCC. REAGs are collections of EAs.

700 MHz Spectrum. In 2008, the FCC assigned 62 MHz of spectrum in the 700 MHz band. The FCC divided the 62 MHz of spectrum into two 12 MHz paired blocks and one 6 MHz unpaired block licensed on a CMA or EA basis; one 22 MHz paired block licensed on a REAG basis, and one 10 MHz paired block, or D Block, assigned on a nationwide basis to be used as part of a private/public safety partnership. The holders of the 22 MHz licenses, most of which are held by Verizon Wireless, must provide a network platform that is generally open to third-party wireless devices and applications, or an Open Network Platform, by allowing consumers to use the handset of their choice and to download and use the applications of their choice, subject to certain network management conditions that are intended to allow the licensee to protect the network from harm. As originally allocated, the D Block licensee was required to fund the construction of a nationwide interoperable broadband network for public safety on a nationwide public safety license and to provide public safety with priority access during emergencies to the D Block owned by the licensee. The D Block remained unpurchased at auction, and the FCC currently is considering revisions to the auction and service rules that will apply to this license.

BRS Spectrum. In 2004, the FCC ordered that the 2496-2690 MHz band, or the 2.5 GHz band, be reconfigured over a period of time into upper and lower-band segments for low-power operations, with a mid-band segment for high-power operations. This spectrum is allocated and licensed in the United States and its possessions and territories in 493 BTAs. The Commission concluded in 2008 that 55.5 MHz of the broadband radio service, or BRS, spectrum holdings in the 2.5 GHz band will be included in the Commission's product market for mobile telephony/broadband services, and taken into consideration when the Commission is assessing the competitive impact of broadband wireless merger and acquisition transactions.

Future Allocations. The FCC also has other broadband wireless spectrum allocation proceedings in process. For example, the FCC is considering service rules for an additional 20 MHz of paired AWS spectrum, or AWS-2, in the 1915-1920 MHz, 1995-2000 MHz, 2020-2025 MHz and 2175-2180 MHz bands, as well as 20 MHz of unpaired AWS spectrum, or AWS-3, in the 2155-2175 MHz band. Both AWS-2 and AWS-3 have been allocated for advanced fixed and mobile services, including AWS. As noted above, the FCC also is seeking further comment on service rules for the 700 MHz D Block. The FCC and interested parties have proposed that these blocks of spectrum be subject to various conditions, configurations and terms and conditions. We cannot predict with any certainty the likely configuration, conditions or timing of these proposed allocations, or the usability of any of this spectrum for wireless services competitive with our services or by us. Congress, the federal government, and the FCC also may pass legislation or undertake actions or proceedings in the future to allocate additional spectrum for wireless services or to change the rules relating to already licensed spectrum which may allow new or existing licensees to provide services comparable to the services we provide.

Construction obligations

The FCC has established various construction obligations for wireless licenses with different requirements often applying to spectrum licensed at different points in time. For example, broadband PCS licensees holding licenses originally granted as 30 MHz licenses must construct facilities to provide service covering one-third of the population of the licensed area within five years, and two-thirds of the population of the licensed area within ten years, or otherwise provide substantial service to the licensed area within the appropriate five- and ten-year benchmarks, of their initial license grant date. Broadband PCS licensees holding 10 MHz and 15 MHz licenses generally must construct facilities to provide service to 25% of the licensed area within five years of their initial license grant date, or otherwise make a showing of substantial service. The FCC defines substantial service as service which is sound, favorable and substantially above a mediocre service level only minimally warranting renewal. Either we or the

previous licensee satisfied the applicable five-year coverage requirement for each of our broadband PCS licenses and the ten-year requirement for those PCS licenses that have already been renewed. All AWS licensees will be required to construct facilities to provide substantial service by the end of the initial 15-year license term. The initial 15-year license term for our AWS licenses does not expire until November 2021.

Table of Contents

The 700 MHz licenses are subject to more stringent performance requirements which are measured from June 13, 2009. Licensees of the CMA and EA license blocks are required to build systems that provide wireless coverage to 35% of the licensed geographic area in four years and 70% of the licensed geographic area by the end of the license term. Licensees of the REAG license blocks are required to cover at least 40% of the population of the licensed area in four years and 75% of the population of the licensed area by the end of the license term. Under the current rules, the licensees of the D Block are required to cover at least 75% of the population in four years, 95% of the population of the nationwide license area within seven years and 99.3% of the population of the nationwide license area within ten years. The build-out requirements for the D Block currently are subject to further comment and may change when the final rules are issued for assigning this license. While the FCC occasionally has granted brief extensions to, and limited waivers of, license construction requirements, any licensee failing to meet these coverage requirements risks forfeiting their license or, in some cases, being subject to fines or monetary forfeitures.

License term

The FCC grants broadband PCS licenses for ten-year terms that are renewable upon application to the FCC. Our broadband PCS license terms began expiring in 2007. We filed renewal applications and have been granted additional ten-year terms for all of our PCS licenses expiring before December 31, 2008. Certain of our broadband PCS licenses will need to be renewed in 2009. AWS licenses are granted for an initial 15-year term that is renewable for successive ten-year terms upon application to the FCC. Our initial AWS license terms end in November 2021. The 700 MHz license we hold has an initial term extending up to June 2019, and is renewable for additional 10 year terms. However, if we fail to meet an initial construction benchmark in June of 2013 for our 700 MHz license, the license term will be shortened to June of 2017, in addition to possibly being subject to fines and forfeitures and/or having our licensed service area reduced. However, if we fail to meet the build out requirements by the end of the license term for our 700 MHz license, we will lose our authority to serve any unserved area and could be subject to fines and forfeitures, including a revocation of our license. At present, our 700 MHz license term in Boston ends in June 2019, but this date could change in the event that Congress or the FCC decides to further extend the digital television transition date.

The FCC may deny license renewal applications for cause after appropriate notice and hearing. The FCC will award a renewal expectancy to broadband commercial mobile radio service, or CMRS, licensees if the licensee meets specific performance standards. To receive a renewal expectancy, we must show that we have provided substantial service during our past license term, and have substantially complied with applicable FCC rules and policies and the Communications Act. If we receive a renewal expectancy, it is very likely that the FCC will renew our existing licenses. If we do not receive a renewal expectancy, the FCC may accept competing applications for the license renewal period, subject to a comparative hearing, and may award the license for the next term to another entity.

Revocation of licenses

The FCC may deny applications for FCC licenses and in extreme cases revoke FCC licenses, if it finds that a licensee lacks the requisite qualifications to be a licensee. For example, the FCC may revoke a license or deny an application of an entity found in a judicial or administrative proceeding to have knowingly or repeatedly engaged in conduct involving felonies, possession or sale of illegal drugs, fraud, antitrust violations or unfair competition, employment discrimination, misrepresentations to the FCC or other government agencies, or serious violations of the Communications Act or FCC regulations.

Transfer and Assignment of FCC licenses

The Communications Act requires prior FCC approval for assignments or transfers of control of any license or construction permit, with limited exceptions. In granting FCC approval for assignments or transfers of control, the FCC may prohibit or impose conditions on such assignments or transfers of control. We have managed to secure the requisite approval of the FCC to a variety of assignment and transfer of control applications without undue delay or the imposition of conditions outside of the ordinary course. We cannot assure you that the FCC will approve or act in a timely fashion on any of our future requests to approve assignment or transfer of control applications. Further, if we are acquired in the future, the FCC may disapprove the transfer of control or assignment, impose conditions, or otherwise require divestitures of some or all of our spectrum, licenses, or other assets.

Table of Contents**Disaggregation, Partitioning and Spectrum Leasing**

The FCC allows spectrum and service areas to be subdivided, partitioned, or disaggregated, geographically or by bandwidth, with each resulting license covering a smaller service area and/or including less spectrum. Any such partition or disaggregation is subject to FCC approval, which generally is received, but cannot be guaranteed. The FCC also has adopted policies to facilitate development of a secondary market for unused or underused wireless spectrum by permitting the leasing of spectrum to third parties. These policies provide us, new entrants, and our competitors with alternative means to obtain additional spectrum and allow us to dispose of excess spectrum, subject to FCC approval and applicable FCC conditions.

Spectrum and Market Concentration Limits

The FCC has certain policies intended to prevent undue concentration of the terrestrial wireless broadband mobile services market. For example, the FCC conducts a case-by-case review of all transactions where wireless spectrum is being assigned or a transfer of control is occurring where both parties to the transaction hold CMRS spectrum in the same or in an overlapping area. Previously, the FCC would screen a transaction for competitive concerns if, upon consummation, 95 MHz or more of cellular, broadband PCS, enhanced SMR, and 700 MHz spectrum in a single market was attributable to a party or affiliated group, or if there was a material change in the post-transaction market share concentrations as measured by the Herfindahl-Hirschman Index. In 2008, the FCC revised this screen to include situations where AWS-1 or certain BRS spectrum is available, on a geographic area basis as follows:

For geographic areas in which AWS-1 and certain BRS spectrum is available, the Commission's initial spectrum screen is 145 MHz.

For geographic areas in which AWS-1 is available but certain BRS is not available, the Commission's initial spectrum screen is 125 MHz.

For geographic areas in which certain BRS spectrum is available but AWS-1 is not available, the Commission's initial spectrum screen is 115 MHz.

For geographic areas in which neither BRS spectrum or AWS-1 is available, the Commission's initial spectrum screen is 95 MHz.

The FCC also stated that it now will apply this revised screen to spectrum acquired via auction. These benchmarks are subject to pending reconsideration proceedings at the FCC. The FCC also is considering whether to initiate a proceeding to eliminate case-by-case application of a spectrum screen entirely in favor of a bright-line spectrum cap.

We are well below the spectrum aggregation screen in the geographic areas in which we hold or have access to licenses which means we may be able to acquire additional spectrum either by auction or in private transactions and we may be able to be acquired by certain other carriers. However, the FCC's retention of a case-by-case approach to spectrum acquisition and the continuing revision upward of the spectrum screen may allow our competitors to make additional acquisitions of spectrum and further consolidate the industry.

Foreign Ownership Restrictions

The Communications Act authorizes the FCC to restrict the ownership levels held by foreign nationals or their representatives, a foreign government or its representative or any corporation organized under the laws of a foreign country. Generally, the law prohibits indirect foreign ownership of over 25% of our common stock. Our stock is freely tradable on the NYSE and as such foreign ownership of our common stock could exceed this 25% threshold without our knowledge. The FCC may revoke licenses, or require us to restructure our ownership, if ownership of our common stock by non-United States citizens or entities exceeds the statutory 25% benchmark. However, the FCC may waive the foreign ownership limits for CMRS licensees, such as us, and generally permits additional indirect foreign ownership in excess of the statutory 25% benchmark particularly if that interest is held by an entity or entities that are citizens of, representatives of or organized under the laws of countries that are members of the World Trade Organization, or WTO. For investors from countries that are not members of the WTO, the FCC will determine if the home country extends reciprocal treatment, called effective competitive opportunities, to United States entities. If these opportunities do not exist, the FCC may not permit such foreign investment beyond the 25% benchmark. We have established internal procedures to ascertain the nature and extent of our foreign ownership, and

Table of Contents

we believe that the indirect ownership of our equity by foreign entities is below the benchmarks established by the Communications Act. If we were to have foreign ownership in excess of the limits, we have the right to acquire that portion of the foreign investment which places us over the foreign ownership restriction.

Designated Entity Requirements

The FCC has established rules that are designed to promote the granting of spectrum licenses to small and very small businesses, entrepreneurs and other DEs. Some licenses, called closed licenses, have been set aside solely for DEs to acquire at auction. DEs also can qualify for bidding discounts of varying amounts (e.g., 15% or 25%) when acquiring licenses available to all parties, called open licenses, at auction. We are an investor in Royal Street Communications, which is a very small business DE that must meet and continue to abide by the FCC's DE requirements until at least December 2010.

Among other requirements, the FCC DE rules create a control test that obligates the eligible small or very small business members of a DE licensee to maintain de facto (actual) and de jure (legal) control of the business and license. The FCC rules provide that if a license is transferred to a non-eligible entity, an entity which qualifies for a lesser credit on open licenses, or if the existing licensee ceases to be qualified as a DE, the licensee may lose all closed licenses which are not constructed, and may be required to refund to the FCC some or all of the bidding credit received for all open licenses, based on a five-year straight-line discount repayment schedule commencing from the grant date. For example, in Auction 58, Royal Street Communications received a bidding credit equal to approximately \$94 million relating to open licenses it acquired as result of that auction. If Royal Street were found to no longer qualify as a DE during the initial five-year term of its licenses, it would be required to repay a portion of the bidding credit using the five-year straight-line repayment schedule from December 2005. Moreover, any closed licenses which are transferred by Royal Street, or if Royal Street is found to no longer qualify as a DE, prior to the five-year anniversary of their initial grant, or December 2010, also may be subject to an unjust enrichment payment. Revocation also could occur if any license is not constructed on a timely basis or not constructed prior to Royal Street no longer qualifying as a DE. All of Royal Street's licenses are closed licenses except for its Los Angeles and Gainesville basic trading area licenses. Royal Street already has constructed the systems authorized by its open license for Los Angeles license and its closed licenses in the Orlando, Lakeland-Winter Haven, and Melbourne-Titusville basic trading areas.

In 2006, the FCC adopted new DE requirements that apply to all licenses initially granted after April 25, 2006, or New DE Requirements. First, the FCC found that an entity that enters into an impermissible material relationship, which includes any arrangement whereby a DE leases or resells more than fifty percent of the capacity of its spectrum or network to third parties, will be ineligible for an award of DE benefits and subject to unjust enrichment payments on a license-by-license basis. Second, the FCC found that any entity which has a spectrum leasing or resale arrangement (including wholesale arrangements) with an applicant or licensee for more than 25% of the applicant's total spectrum capacity on a license-by-license basis will be considered to have an attributable interest in the applicant or licensee. Royal Street's existing relationships with us are grandfathered and Royal Street is not subject to the New DE Requirements with respect to its existing licenses which were granted before April 25, 2006. However, the New DE Requirements will not permit Royal Street to enter into the same relationship it currently has with us for any future FCC auctions and receive DE benefits, including bidding credits. In addition, Royal Street will not be able to acquire any additional DE licenses in the future, resell services to us on those licenses on the same basis as the existing arrangements, or materially change its existing arrangements with us, without making itself ineligible for DE benefits.

Further, the FCC has adopted rules requiring a DE to seek approval for any change in circumstances that may affect its ongoing eligibility, such as entry into an impermissible material relationship, even if the event would not have triggered a reporting requirement under the FCC's existing rules. In connection with this rule change, the FCC now requires DEs to file annual reports with the FCC listing and summarizing all agreements and arrangements that relate to eligibility for DE benefits. Royal Street has filed all of its required annual reports with the FCC. The FCC also indicated that it will step up its audit program of DEs.

Several interested parties have filed appeals of the New DE Requirements. These appeals are ongoing. The relief sought by the petitioners in their underlying appeals includes overturning the results of Auctions 66 (AWS-1) and 73

(700 MHz). If the petitioners are ultimately successful in obtaining this relief, any licenses granted to us as a result of Auction 66 and/or 73 may be revoked. Our payments to the FCC for the revoked licenses would be refunded, but without interest. If our licenses are revoked we will have been required to pay interest to our lenders on the money paid to the FCC for the AWS-1 and 700 MHz licenses and we will have incurred clearing, construction, and other

Table of Contents

expenses with respect to the AWS-1 licenses, but would not receive interest or any compensation for our clearing, construction, and other activities on the spectrum. We have constructed our Las Vegas, Philadelphia and New York metropolitan networks on AWS-1 spectrum and we only have AWS-1 spectrum in these markets. If we lost our AWS-1 licenses, we would cease being able to provide service in those metropolitan areas where we have already launched service and would not be able to launch service in those markets where we have not yet launched service. We are unable at this time to predict the likely outcome of the challenges to the New DE Requirements or any further appeal and unable to predict the impact on the licenses granted in Auction 66 and Auction 73. We also are unable to predict whether the litigation will result in any changes to the New DE Requirements or to the DE program generally, and, if there are changes, whether or not any such changes will be beneficial or detrimental to our interests.

In connection with the changes to the DE rules, the FCC also is considering whether additional restrictions should be adopted in its DE program. We do not know what additional changes, if any, will be made to the DE program as a result of this further rulemaking. Based on the FCC's prior rulings, we do not expect any further changes in the DE rules to be applied retroactively to Royal Street, but we cannot give any assurance that the FCC will not give any new rules retroactive effect.

General Regulatory Obligations

The Communications Act and the FCC's rules impose a number of requirements on wireless broadband mobile services licensees, which affect our cost of doing business and that could have a material effect on our business, operations, and financial results. Further, a failure to meet or maintain compliance with the Communications Act and the FCC's rules could subject us to fines, forfeitures, penalties, license revocations, or other sanctions, including the imposition of mandatory reporting requirements, limitation on our ability to participate in future FCC auctions or acquisitions of spectrum, and compliance programs and corporate monitors.

CMRS Classification. Our wireless broadband mobile services are classified at the federal level as CMRS. The FCC regulates providers of CMRS services as common carriers, which subjects us to many requirements under the Communications Act and FCC rules and regulations. The FCC, however, has exempted CMRS services from some typical common carrier regulations, such as tariff and interstate certification filings, which allows us to respond more quickly to competition in the marketplace. The FCC also is required by federal law to reduce unreasonable disparities in the regulatory treatment of similar wireless broadband mobile services, such as cellular, broadband PCS, AWS, 700 MHz, and Enhanced Specialized Mobile Radio, or ESMR, services, and federal law preempts state rate and entry regulation of CMRS providers.

The FCC permits wireless broadband mobile services licensees to offer fixed services on a co-primary basis along with mobile services. This facilitates the provision of wireless local loop service by CMRS licensees using wireless links to provide local telephone service. The extent of lawful state regulation of such wireless local loop service is undetermined. While we do not presently offer a fixed service, our network can accommodate such an offering. We continue to evaluate our service offerings, and may offer a fixed service at some point in the future.

Spectrum Clearing. Spectrum allocated for AWS currently is utilized by a variety of categories of commercial and governmental users. To foster the orderly clearing of the spectrum, the FCC adopted a transition and cost sharing plan pursuant to which incumbent non-governmental users could be reimbursed for relocating out of the band and the costs of relocation would be shared by AWS-1 licensees benefiting from the relocation. The FCC has established a plan where the AWS-1 licensee and the incumbent non-governmental user are to negotiate voluntarily for three years and then, if no agreement has been reached, the incumbent licensee is subject to mandatory relocation procedures in which the AWS-1 licensee can relocate the incumbent non-governmental licensee at the AWS-1 licensee's expense. The spectrum allocated for AWS-1 also currently is utilized by certain governmental users, many of whom are required over time to relocate from the AWS-1 spectrum. However, in some cases, not all governmental users are obligated to relocate and in other cases incumbent users are not obligated to relocate for some period of time, with varying time frames for relocation.

Spectrum allocated for 700 MHz currently is occupied by existing analog television broadcast licensees and certain wireless microphone users. Licensees granted 700 MHz licenses are not obligated to pay for the relocation of existing analog television broadcast licensees. By federal law, all existing analog television broadcast licenses are obligated to vacate the 700 MHz spectrum by the digital television transition date, currently scheduled for June 12, 2009. We

cannot be certain that Congress will not alter the present digital television transition date to a later date to

Table of Contents

alleviate certain problems with the analog to digital TV conversion. In addition, the FCC has not yet established final procedures and deadlines, including cost obligations for, wireless microphones users to vacate the band.

E-911 Service. The FCC requires CMRS providers to implement basic 911 and enhanced, or E-911, emergency services. Our obligation to implement these services is incurred in stages on a market-by-market basis as local emergency service providers become equipped to handle E-911 calls. E-911 services allow state and local emergency service providers to better identify and locate wireless callers, including callers using special devices for the hearing impaired. The network equipment and handsets we utilize are capable of meeting the FCC's E-911 requirements and we have constructed facilities to implement these capabilities in markets where we have had requests from local public safety emergency service providers and are in the process of constructing E-911 facilities in the markets we launched recently. Because we employ a handset-based location technology, the FCC also has rules that require us to ensure that specified percentages of the handsets in service on our systems are location capable and meet certain location accuracy standards. The FCC actively monitors the compliance by CMRS carriers with E-911 requirements. For example, MetroPCS was notified on October 10, 2008, by the FCC that it is investigating the compliance by MetroPCS with its E-911 obligations. In response, MetroPCS has provided the FCC with information which we believe shows our compliance with our E-911 obligations; however, the matter is still pending at this time. The FCC has in the past and may in the future, impose substantial fines and forfeitures on wireless broadband mobile carriers for their failure to comply with the FCC's E-911 rules and could impose other sanctions, including revocation of licenses or the imposition of mandatory reporting requirements, license conditions, and compliance programs. The FCC also has rules under which wireless broadband mobile carriers may be required to offer priority E-911 services to the public safety agencies under certain circumstances. States in which we do business may limit or eliminate our ability to recover our E-911 costs. However, federal legislation also may limit our liability for uncompleted 911 calls to a similar level to wireline carriers in our markets.

The FCC is considering various alternative proposals for wireless E-911 Phase II location accuracy and reliability and an FCC order currently is circulating at the FCC. We are unable at this time to predict the likely outcome of this proceeding. These E-911 requirements may require us to expend additional capital and resources. The FCC also has left open the possibility of further requirements.

Communications Assistance for Law Enforcement Act (CALEA). Federal law requires CMRS carriers to assist law enforcement agencies with lawful wiretaps, and imposes wiretap-related record-keeping and personnel-related obligations. Historically, our customer base may have been, and may continue to be, subject to a greater percentage of law enforcement requests than those of other carriers and, as a result, our compliance expenses may be proportionately greater.

Number Administration. Because demand is increasing for a finite pool of telephone numbers, the FCC has adopted number pooling rules that govern how telephone numbers are allocated. Number pooling is mandatory inside the wireline rate centers that are located in counties included in the top 100 MSAs. We have implemented number pooling procedures and support pooled number roaming in all of our metropolitan areas which are in the top 100 MSAs. The FCC also has authorized states to supplement federal numbering requirements in certain respects and some of the states where we provide service have been authorized by the FCC to engage in limited numbering administration. Our ability to access telephone numbers on a timely basis is important for our ability to continue to grow our business.

Number Portability. The FCC has ordered all telecommunications carriers, including CMRS carriers, to support telephone number portability which enables subscribers to keep their telephone numbers when they change telecommunications carriers, whether wireless to wireless or, in some instances, wireline to wireless, and vice versa. Under these local number portability rules, a CMRS carrier located in one of the top 100 MSAs must have the technology in place to allow its customers to keep their telephone numbers when they switch to a new carrier. Outside of the top 100 MSAs, CMRS carriers receiving a request to allow end users to keep their telephone numbers must be capable of doing so within six months of the request. All CMRS carriers are required to support nationwide roaming for customers retaining their numbers.

Interconnection. FCC rules provide that all telecommunications carriers are obligated upon reasonable request to interconnect directly or indirectly with the facilities and networks of other telecommunications carriers. All local exchange carriers also must, upon request, enter into mutual or reciprocal compensation arrangements with CMRS

carriers for the exchange of intra-MTA traffic, under which each carrier compensates the other for terminated intra-MTA traffic originating on the compensating carrier's network. Further, at a CMRS carrier's request, incumbent local exchange carriers must exchange intra-MTA traffic with CMRS carriers at rates based on the FCC's costing

Table of Contents

rules or rates set by state public utility commissions applying the FCC's rules. CMRS carriers also have an obligation to engage in voluntary negotiation and may be subject to arbitration with incumbent local exchange carriers similar to those imposed on the incumbent local exchange carriers pursuant to Section 252 of the Communications Act. Once an incumbent local exchange carrier requests negotiation of an interconnection arrangement, both carriers are obligated to begin paying the FCC's default rates for all intra-MTA traffic exchanged after the request for negotiation.

CMRS carriers generally are obligated to pay reasonable compensation to a local exchange carrier in connection with intra-MTA traffic originated by the CMRS carrier and terminated by the LEC. While these rules provide that local exchange carriers may not charge CMRS carriers for facilities used by CMRS carriers to terminate local exchange carriers' traffic, local exchange carriers may charge CMRS carriers for facilities used to transport and terminate CMRS traffic and for facilities used for transit purposes to carry CMRS carrier traffic to a third carrier. Since 2005, no local exchange carrier has been permitted to impose on a going-forward basis rates by state tariff for the termination of a CMRS carrier's intra-MTA traffic. We generally have been successful in negotiating arrangements with carriers with whom we exchange intra-MTA traffic; however, our business could be adversely affected if the rates some carriers charge us for terminating our customers' intra-MTA traffic ultimately prove to be higher than anticipated. Further, the rules governing interconnection are under review by the FCC in a rulemaking proceeding, and we cannot be certain whether or not there will be material changes in the applicable rules, and if there are changes, when they might take effect and whether they will be beneficial or detrimental to us.

Access. In order to offer long distance services to our customers, we resell the long distance services provided by third parties. Those third parties are obligated to pay compensation to the telecommunications carriers who terminate our subscribers' long distance calls. Historically, CMRS carriers generally have not been entitled to receive direct access payments for the long distance calls they terminate, but must pay access charges to other telecommunications carriers for calls they terminate. In October 2007, the FCC initiated a proceeding to determine whether the FCC's current rules ensure that the rates for switched access services charged by local exchange carriers are just and reasonable. In the proceeding, the FCC is investigating certain traffic stimulation activities of local exchange carriers which are alleged to generate excessive fees for switched access traffic. The FCC also seeks comment on whether sharing of access revenues is appropriate. The FCC also asked parties to address whether carriers are adopting traffic stimulation strategies with respect to other forms of intercarrier compensation, which would include compensation for intra-MTA traffic delivered by CMRS carriers to local exchange carriers. We and others have asked the FCC to cap the amount of compensation paid to local exchange carriers for traffic that is grossly imbalanced. If the FCC adopts such proposed limitations, it could reduce the amount of compensation we are obligated to pay local exchange carriers, may affect the amount of access sharing revenue we receive. The rules governing access generally are under review by the FCC in a rulemaking proceeding and we cannot be certain whether or not there will be material changes to the applicable rules and, if there are changes, when they may take effect and whether they will be beneficial or detrimental to us.

Universal Service Fund (USF). The FCC has adopted rules requiring interstate communications carriers, including CMRS carriers, to make an equitable and non-discriminatory contribution to a Universal Service Fund, or USF, that reimburses communications carriers who are providing subsidized basic communications services to underserved areas and users. The FCC requires carriers providing both intrastate and interstate services to determine their percentage of traffic which is interstate and the FCC has also adopted a safe-harbor percentage of interstate traffic for CMRS carriers. We have made these FCC-required payments using the safe-harbor. The FCC prohibits carriers from recovering administrative costs related to administering the required universal service fund assessments. The FCC's rules require that carriers' USF recovery charges to customers not exceed the assessment rate the carrier pays times the proportion of interstate telecommunications revenue on the bill. The FCC has rulemaking proceedings pending in which it is considering a comprehensive reform of the manner in which it assesses carrier USF contributions, how carriers may recover their costs from customers and how USF funds will be distributed among and between states, carriers and services. Some of these proposals may cause the amount of USF contributions required from us and our customer to increase.

Eligible Telecommunications Carriers. Wireless broadband mobile carriers may be designated as Eligible Telecommunications Carriers, or ETCs, and may receive universal service support for providing service to customers

using wireless service in high cost areas. Certain competing wireless broadband mobile carriers operating in states where we operate have obtained or applied for ETC status. Their receipt of universal service support funds may affect our competitive status in a particular market by allowing our competitors to offer service at a lower rate that is subsidized by the universal service fund. The FCC is considering altering, reducing, or capping the amount of universal support received by CMRS ETC providers. In May 2008, the FCC adopted an interim cap on payments to

Table of Contents

ETCs under the USF, pending comprehensive reform that is now under consideration by the agency. We may decide in the future to apply for an ETC designation in certain qualifying high cost areas where we provide wireless services, though our ability to qualify may be affected by ongoing changes and possible future limitations in the program. If we are approved, these payments would be an additional revenue source that we could use to support the services we provide in high cost areas.

Regulatory Fees. We are obligated to pay certain annual regulatory fees and assessments to support FCC wireless industry regulation, as well as fees supporting federal universal service programs, number portability, regional database costs, centralized telephone numbering administration, telecommunications relay service for the hearing-impaired and application filing fees. These fees are subject to change periodically by the FCC.

Equal Access. CMRS carriers are exempt from the obligation to provide equal access to interstate long distance carriers. However, the FCC has the authority to impose rules requiring unblocked access through carrier identification codes or 800/888 numbers to long distance carriers so CMRS customers are not denied access to their chosen long distance carrier, if the FCC determines the public interest so requires. Our customers have access to alternative long distance carriers using toll-free numbers.

Customer Proprietary Network Information (CPNI). FCC rules impose restrictions on a telecommunications carrier's use of customer proprietary network information, or CPNI, without prior customer approval, including restrictions on the use of information related to a customer's location. The FCC has imposed substantial fines on certain wireless carriers for their failure to comply with the FCC's CPNI rules. The FCC previously conducted a broadscale investigation into whether CMRS carriers are properly protecting the CPNI of their customers against unauthorized disclosure to third parties. In February 2006, the FCC requested that all CMRS carriers provide a certificate from an officer based on personal knowledge that the CMRS carrier was in compliance with all CPNI rules and the filing of such a certificate has now become an annual requirement. We provided the certificate in February 2006 and have provided the required annual certificates since then.

Revised CPNI rules became effective in December 2007 that required us to make certain changes to our business practices or processes. Among other things, CMRS carriers now must take reasonable measures to discover and protect against pretexting and, in enforcement proceedings, the FCC will infer from evidence of unauthorized disclosures of CPNI that reasonable protections were not taken. The FCC also is seeking comment on additional CPNI regulations.

Congress and state legislators also may pass legislation governing the use and protection of CPNI and other personal information. For example, Congress enacted the Telephone Records and Privacy Protection Act of 2006, which imposes criminal penalties upon persons who purchase without a customer's consent, or use fraud to gain unauthorized access to, telephone records. In addition, certain states have enacted, and other states in the future may enact, legislature relating to customer personal information. The recent and pending legislation (if enacted) may require us to change how we protect our customer's CPNI and other personal information.

Services to Persons With Disabilities. Telecommunications carriers are required to make their services accessible to persons with disabilities. These FCC rules generally require service providers to offer equipment and services accessible to and usable by persons with disabilities, if readily achievable, and to comply with FCC-mandated complaint/grievance procedures. These rules are largely untested and are subject to interpretation through the FCC's complaint process. While these rules principally focus on requirements that must be met by the manufacturers of wireless equipment, we are required to have a certain percentage of our handsets be hearing aid compatible and we have annual reporting requirements. Because of the ongoing consolidation in the digital wireless handset manufacturers industry and in the wireless industry, we may have difficulty securing the necessary handsets in order to meet any additional FCC requirements. In addition, since we are required to offer these hearing aid-compatible wireless phones for each air interface we provide, this requirement may limit our ability to offer services using new air interfaces other than CDMA 1XRTT, may limit the number of handsets we can offer, or may increase the costs of handsets for those new air interfaces. Further, to the extent that the costs of such handsets are more than non-hearing aid-compatible digital wireless handsets, demand for our services may decrease, the number of wireless phones we can offer to our customers may decline, or our selling costs may increase if we choose to subsidize the cost of the hearing aid-compatible handsets.

Backup Power Requirements. In October 2007, the FCC adopted rules which, if they had taken effect, would have required us to maintain emergency backup power for a minimum of twenty-four hours for certain of our equipment that is normally powered from local commercial power located inside mobile switching offices, and eight hours for

Table of Contents

certain of our equipment that are normally powered from local commercial power and at other locations, including cell sites and DAS nodes. Various aspects of the rules were challenged in court and before the Office of Management and Budget, or OMB. As a result, the rules have not taken effect and are not being enforced, and the FCC has indicated that it plans to seek comment on revised backup power rules applicable to wireless providers. We are unable to predict with any certainty the likely outcome of any proceeding regarding backup power rules. In addition, if we are required to secure additional state or local permits or authorization, it could delay the construction of any new cell sites or distributed antenna systems, or DAS systems, and launch of services in new metropolitan areas.

Siting Issues. The location and construction of wireless antennas, DAS systems and nodes, base stations and towers are subject to FCC and Federal Aviation Administration, or FAA, regulations, federal environmental regulation, and other federal, state, and local regulations. With respect to AWS-1 sites, we must notify the FAA when we add AWS-1 frequencies to existing sites that already have been determined not to be a hazard to air navigation by the FAA. Antenna structures used by us and other wireless providers also are subject to FCC rules implementing the National Environmental Policy Act and the National Historic Preservation Act. Under these rules, construction cannot begin on any structure that may significantly affect the human environment, or that may affect historic properties, until the wireless provider has filed an environmental assessment with and obtained approval from the FCC or a local agency. Processing of environmental assessments can delay construction of antenna facilities, particularly if the FCC or local agency determines that additional information is required or if community opposition arises. In addition, several environmental groups have requested various changes to the FCC's environmental processing rules, challenged specific environmental assessments as failing statutory requirements and sought to have the FCC conduct a comprehensive assessment of antenna tower construction environmental effects. The FCC also has been ordered by the Court of Appeals for the DC Circuit to further consider the impact that communications facilities, including wireless towers and antennas, may have on migratory birds, and the FCC has initiated a proceeding to do so. In the meantime, there are a variety of federal and state court actions in which citizen and environmental groups have sought to deny individual tower approvals based upon potential adverse impacts to migratory birds. Although we almost exclusively use antenna structures that are owned and maintained by third parties, the results of these FCC and court proceedings could have an impact on our efforts to secure access to particular towers, or on our costs of such access.

Tower Lighting and Painting. The FCC has established rules requiring certain towers and other structures to be painted and lighted to minimize the hazard to air navigation. In addition, we are obligated to notify the FAA if the lighting at a tower which is required to be lighted is no longer lighted. A failure to abide by these requirements could result in the imposition of fines and forfeitures or other liability if an accident occurs. We generally collocate on existing towers and structures and do not have the right to paint or control the lighting at the site but still could be held accountable if the lighting and painting requirements are not met.

Radio Frequency Limits. The FCC sets limits on radio frequency, or RF, emissions from cell sites and has rules that establish procedures intended to protect persons from RF hazards. We have policies in place to ensure compliance with these applicable limits at cell sites where we have operations, but we cannot guarantee that we are in compliance at each cell site. Any noncompliance could have an impact on our operations at a particular cell site.

Emergency Warning. The FCC has adopted technical standards, protocols, procedures, and other requirements under the Warning, Alert, and Response Network Act, or WARN Act, to govern emergency alerting standards for CMRS providers which voluntarily elect to participate. We have elected to participate in the voluntary emergency alert program. This election may cause us to incur costs and expenses and our customers may be required to purchase new handsets. Under the adopted rules, if a CMRS carrier elects to participate, the carrier must notify customers of the availability of emergency alerts but may not charge separately for the alerting capability and the CMRS carrier's liability related to, or any harm resulting from, the transmission of, or failure to transmit, an emergency alert is limited. If we decide to withdraw from participation at a later date, our customers may decide to terminate their service with us. The FCC also is considering the feasibility of requiring wireless providers to distribute emergency information and the FCC may change its requirements for the rules under the WARN Act, which additional requirements or changes would cause us to incur additional costs and expenses.

Roaming. The FCC long has required CMRS providers to permit customers of other carriers to roam manually on their networks, for example, by supplying a credit card number, provided that the roaming customer's handset is

technically capable of accessing the roamed-on network. More recently, the FCC has ruled that automatic roaming also is a common carrier obligation for CMRS carriers. This ruling requires CMRS carriers to provide automatic roaming services to other CMRS carriers upon reasonable request and on a just, reasonable, and non-discriminatory

Table of Contents

basis pursuant to Sections 201 and 202 of the Communications Act. This automatic roaming obligation extends to services such as ours that are real-time, two-way switched voice or data services that are interconnected with the public switched network and utilize an in-network switching facility that enables the provider to reuse frequencies and accomplish seamless hand-offs of subscriber calls. Automatic roaming rights are important to us because we provide service in a limited number of metropolitan areas in the United States and must rely on other carriers in order to offer roaming services outside our existing metropolitan areas. The FCC rules, however, do not require carriers to provide automatic roaming to areas where the roamer's home carrier holds licenses or otherwise has spectrum usage rights. This in-market limitation may preclude our customers from receiving automatic roaming in large portions of the United States where we recently acquired licenses but have not yet built networks or offer services and do not have existing long-term roaming agreements, such as the geographic areas included in our AWS-1 and 700 MHz licenses. The limitation of automatic roaming rights to areas in which we do not hold or lease spectrum could limit our ability to renew or extend our existing roaming agreements. We and other carriers have filed petitions for reconsideration of this limitation, but we are unable at this time to predict with any certainty the likely outcome of these reconsideration requests.

The FCC also has not extended the automatic roaming obligation to services that are classified as information services (such as high speed Internet services) or to services that are not CMRS but the FCC is seeking comment on whether the roaming obligation should be extended to such non-interconnected services or features. We cannot predict the likely outcome or timing of this proceeding. If the FCC does not adopt an automatic roaming requirement for non-interconnected services or features, such as information services, high speed broadband services, and broadband Internet access services, we could have difficulty attracting and retaining certain groups of customers.

In its recent approval of the Verizon Wireless purchase of Alltel Wireless, the FCC imposed conditions that allow carriers like us who have roaming agreements with both Verizon Wireless and Alltel Wireless to use either agreement to govern all traffic exchanged with the post-merger Verizon Wireless for at least four years after the date of the closing of the transaction. We have opted to elect the Alltel Wireless roaming agreement to govern all of our roaming traffic with the combined Verizon Wireless-Alltel, though Verizon Wireless may take the position that our right to elect the Alltel Wireless agreement only applies to the rate and not to other terms and conditions. We and others have asked the Commission to clarify these requirements, to extend the four-year commitment to seven years and to require post-merger Verizon Wireless to offer automatic roaming for data services and features on a non-discriminatory basis. We are unable at this time to predict with any certainty the likely outcome of these reconsideration requests.

Wireless Open Access. A provider of VoIP services has asked the FCC to issue a declaratory ruling that would give wireless broadband mobile customers the right to utilize any device of their choice to access a wireless broadband mobile network as long as the device did not cause interference or network degradation and the FCC has placed this request on public notice. The petition also seeks to enable customers to run applications of their choice on wireless broadband mobile networks. This so-called "Wireless Carterfone Rule" is opposed by many wireless broadband mobile companies, including us and CTIA. The proponent also requested that the FCC initiate proceedings to determine whether the current practices of wireless broadband mobile carriers comport with the Communications Act. We cannot be certain as to the likely outcome of this proceeding, but the imposition by the FCC of Open Network Platform requirements on a portion of the 700 MHz spectrum indicates some support at the agency for a Wireless Carterfone Rule, and such support may increase in the future. The adoption of such a rule for existing networks could permit third parties to run applications on our network that consume large amounts of airtime and/or bandwidth. Our fixed price, unlimited service is not well-suited to such applications and a mandate of this nature could substantially impede our business.

Network Management. In November 2007, a digital content company asked the FCC to prohibit broadband network operators from blocking, degrading or unreasonably discriminating against lawful Internet applications, context or technologies. In August 2008, the FCC ruled that Comcast Corporation violated the FCC's policy regarding reasonable broadband network management by discriminating against certain types of network traffic. This ruling currently is on appeal. At this point, we cannot predict the likely outcome of the appeal. We also are unable to predict this ruling's impact on us, or whether the FCC will initiate similar investigations against other broadband providers, including wireless providers.

White Spaces. In November 2008, the FCC adopted rules to allow unlicensed radio transmitters to operate in the unused broadcast digital television spectrum, or White Spaces. The FCC's rules provide for both fixed and personal/portable devices to operate in the White Spaces on an unlicensed basis, subject to various protections to existing users of the spectrum. It is possible that entities may offer services in the White Spaces that could compete

Table of Contents

with services offered by us. We are unable to predict the impact of allowing the use of White Spaces for wireless broadband mobile services on our business or the competitive effect of these new rules.

Regulatory Classifications. The FCC has found that wireless broadband Internet access service offered at speeds in excess of 200 kbps in at least one direction is an information service under the Communications Act, and thus essentially unregulated. In addition, the FCC has found that the transmission component of wireless broadband Internet access service meets the definition of telecommunications under the Communications Act and that the offering of a telecommunications transmission component as part of a functionally integrated Internet access service offering is not a regulated telecommunications service under the Communications Act. Further, the FCC has found that mobile wireless broadband Internet access service is not a commercial mobile service under Section 332 of the Communications Act. Carriers offering mobile wireless broadband Internet access services are not considered common carriers and have no common carrier obligations with respect to this service. Accordingly, as a result of such classification decisions, we and our competitors have greater flexibility in establishing the terms and conditions, including pricing, of this service.

In January 2008, the FCC solicited comments on whether text messages and short codes are common carrier services to which CMRS carriers must provide non-discriminatory access. We cannot predict the likely outcome of this proceeding, the likely timing of an FCC ruling, or the effect that such a requirement would have on us.

Outage Reporting. The FCC requires all telecommunications carriers to report outages to the FCC. These reporting requirements affect the way we track and gather data regarding system outages and repair outages, and potentially subject us to fines and forfeitures if we fail to make timely reports.

Other federal regulation

Copyright Protection. The Digital Millennium Copyright Act, or DMCA, prohibits the circumvention of technological measures employed to protect a copyrighted work, or access control. However, under the DMCA, the Copyright Office of the Library of Congress, or the Copyright Office, has the authority to exempt certain activities which otherwise might be prohibited by that section for a period of three years. In November 2006, the Copyright Office granted an exemption to the DMCA to allow circumvention of software locks and other firmware that enable wireless handsets to connect to a wireless telephone network when such circumvention is accomplished for the sole purpose of lawfully connecting the wireless handset to another wireless telephone network. This exemption is effective through October 27, 2009 unless extended by the Copyright Office. We and others have filed comments asking the Copyright Office to extend this, or a substantially similar exemption, for another three-year period. Other interested parties, including the principal wireless industry association, or CTIA, have opposed any extension of this exemption. We are unable to predict with any certainty the likely outcome of the Copyright Office's determination.

We have implemented a service called MetroFlash that enables new customers under certain circumstances to unlock their existing CDMA handsets, reprogram them to operate on our networks, and to connect them to our network. If a significant number of new customers are attracted to our service as a result of this service and we are unable to continue this service, either because of the failure of the Copyright Office to extend the exemption or because of complaints against us by other third parties, it could adversely affect our ability to continue to attract new customers to our service.

Economic Stimulus. Congress recently enacted the American Recovery and Reinvestment Act of 2009, or the Recovery Act, which provides, among other things, for an aggregate appropriation of \$7.2 billion to fund grants to provide access to broadband service to consumers residing in rural, unserved or underserved areas of the United States. The grants are available to, among others, wireless broadband mobile carriers. Grants of up to 80% of the total cost of the project may be used to fund broadband infrastructure projects in certain instances. A significant portion of these funds is expected to be made available in 2009 and 2010. We, our competitors, and new entrants may decide to apply for the Recovery Act funds. The details regarding the terms and conditions of any such grants are unsettled and the usefulness of these funds to us is uncertain. If our competitors or new entrants receive grants, this could allow them to provide service at lower rates, to have lower costs to provide service, or to provide service in areas that we could not serve economically without support from these grants. If we seek and receive these grants, we could use these funds to provide service in areas that we traditionally have not served, to reduce our costs to provide service in certain areas, and to lower our service prices.

Table of Contents

Other. Our operations also are subject to various other regulations, including those regulations promulgated by the Federal Trade Commission, the Federal Aviation Administration, the Environmental Protection Agency, the Occupational Safety and Health Administration and state and local regulatory agencies and legislative bodies.

State, local and other regulation

The Communications Act preempts state or local regulation of market entry or rates charged by any CMRS provider. As a result, we are free to establish rates and offer new products and services with minimum state regulation. However, states and local agencies may regulate other terms and conditions of wireless service, and certain states where we operate have adopted rules and regulations to which we are subject, primarily focusing upon consumer protection issues and resolution of customer complaints. In addition, several state authorities have initiated actions or investigations of various wireless carrier practices. The outcome of these proceedings is uncertain and could require us to change our marketing practices, ultimately increasing state regulatory authority over the wireless industry. To the extent that applicable rules differ from state to state, our costs of compliance may go up and our ability to have uniform policies and practices throughout our business may be impaired. State and local governments also may manage public rights of way and can require fair and reasonable compensation from telecommunications carriers, including CMRS providers, for the use of such rights of any, so long as the government publicly discloses such compensation.

Various decisions have been rendered by, and other proceedings are pending before, state public utility commissions and courts pertaining to the extent to which the FCC's preemptive rights over CMRS rates and entry prevent states from regulating aspects of wireless service, such as billing policies and other consumer issues. Depending upon the ultimate resolution of these proceedings, which we cannot predict at this time, our services may be subject to additional state regulation which could cause us to incur additional costs.

The location and construction of wireless antennas, DAS systems and nodes, base stations and towers are subject to state and local environmental regulations, zoning, permitting, land use and other regulation. Before we can put a DAS node or site into commercial operation, we, or the tower owner in the case of leased sites, must obtain all necessary zoning and building permit approvals. The time needed to obtain necessary zoning approvals, building permits and other state and local permits varies from market to market and state to state and, in some cases, may materially delay our ability to provide service. Variations also exist in local zoning processes. Further, certain cities and municipalities impose severe restrictions and limitations on the placement of wireless facilities which may impede our ability to provide service in some areas. In addition, in order to deploy DAS systems, our DAS provider may need to obtain authorization from a local municipality. In at least one instance, such authorization is subject to challenge. Actions of this nature could have an adverse effect on our ability to construct and launch service in new metropolitan areas or to expand service in existing markets. Further, we may be subject to environmental compliance regulations with respect to the operation of standby power generators, batteries and fuel storage for our telecommunications equipment. A failure or inability to obtain necessary zoning approvals or state permits, or to satisfy environmental rules, may make construction impossible or infeasible on a particular site, might adversely affect our network design, increase our network design costs, require us to use more costly alternative technologies, such as DAS systems, reduce the service provided to our customers, and affect our ability to attract and retain customers. Local zoning and building ordinances also may make it difficult for us to comply with certain federal requirements, such as the backup power requirements under consideration by the FCC.

We cannot assure you that any state or local regulatory requirements currently applicable to our systems will not be changed in the future or that regulatory requirements will not be adopted in those states and localities which currently have none.

Certain states and municipalities in which we provide service or plan to provide service have passed laws prohibiting the use of wireless phones while driving or requiring the use of wireless headsets, other states and municipalities may adopt similar restrictions in the future, and one national organization is advocating a total ban on the use of wireless phones while driving. If state and local governments in areas where we conduct business adopt regulations restricting the use of wireless handsets while driving, we could experience reduced demand for our services.

Certain states in which we provide service are in the process of reviewing proposed legislation that would require persons selling prepaid wireless services, such as ours, to verify a customer's identity using government identification. We currently do not require our subscribers to provide a government issued identification to initiate

Table of Contents

service with us. If such legislation is passed, it could have a material adverse affect on our business, financial condition or operating results.

Future Regulation

From time to time, federal, state or local government regulators enact new or revise existing legislation or regulations that could affect us, either beneficially or adversely. Ongoing changes in the political and financial climate may foster increased legislation or regulation. We cannot assure you that federal, state or local governments will not enact legislation or that the FCC or other federal, state or local regulators will not adopt regulations or take other actions that might adversely affect us.

Item 1A. Risk Factors

Risks Related to Our Business

Our business strategy may not succeed in the long term.

We offer unlimited wireless broadband mobile services on a paid-in-advance basis for flat monthly rates without requiring a long-term service contract or a credit check. This approach to marketing wireless broadband mobile services may not prove to be successful in the long term. Some companies that offered this type of service in the past were not successful. From time to time, we evaluate our products, service offerings and the demands of our target customers and may, as a result, amend, change, discontinue or adjust our products, service offerings or initiate or offer new permanent, trial or promotional product or service offerings. These new or changed product and service offerings may not be successful or prove to be profitable.

A failure to meet the demands of our customers, could adversely affect our business, financial condition and operating results.

Customer demand for our products and services could be impacted by numerous factors including the different types of products and services offered, service content, technology, handset options, service areas, network quality, customer perceptions, customer care levels and the prices and range of service plans and products. Managing these factors and customers' expectations of these factors is essential in attracting and retaining customers. We must continually incur costs in order to improve and enhance our products and services to remain competitive, which may include costs to expand the capacity and coverage of our network, costs to replace or migrate to new vendors or services, purchase additional spectrum, purchase necessary infrastructure equipment, handsets and related accessories to meet customer needs and secure the necessary governmental approvals and renewals for our operations. Delays or failure to purchase additional spectrum or to make these enhancements to our products, services or network, could limit our ability to meet customer expectations. Further, even if we continually upgrade and maintain our networks and enhance our products and services, there can be no assurance that our existing customers will not switch to another wireless provider. If we are unable to meet customer expectations as to these factors, we may have difficulty attracting and retaining customers, which could impair our financial performance and could have an adverse effect on our business, financial condition and operating results.

We may not be successful in continuing to grow our customer base.

Our business plan assumes continued growth in our customer base. Our ability to continue the growth of our customer base and achieve the customer penetration levels that we currently believe are possible with our business model in our markets is subject to a number of risks, including:

increased competition from existing competitors or new competitors;

higher than anticipated churn in our markets;

our inability to increase our network capacity in areas we currently serve to meet increasing customer demand and our inability due to limitations in customer service, billing and other systems to meet customer expectations and demands;

our inability to continue to offer products or services which our current or prospective customers want;

Table of Contents

our inability to launch service in new metropolitan areas;

our inability to attract and retain indirect agents and dealers for our products and services;

our inability to increase the relevant coverage areas in our existing markets to expand our roaming arrangements to areas that are important to us, or to allow us to offer services at rates which are attractive to, our current and prospective customers;

unfavorable United States economic conditions, which may have a disproportionate negative impact on portions of our customer base;

changes in the demographics of our markets; and

adverse changes in the legislative and regulatory environment that may limit our ability to grow our customer base.

If we are unable to achieve the aggregate levels of customer penetration that we currently believe are possible with our business model, our ability to continue to increase our customer base and revenues at the rates we currently expect may be limited and we may fail to achieve additional economies of scale. Any failure to achieve the penetration levels we currently believe are possible and to successfully increase our customer base may have a material adverse impact on our business, financial condition and operating results.

Our business is seasonal and our operating results for future periods will be affected negatively if we fail to have strong customer growth in the first and fourth quarters.

Our business is seasonal, with our largest number of subscribers typically being added in the first and fourth quarters. If we fail to meet our expectations for customer additions in the first or fourth quarter, it could have a negative impact on our business, financial condition and operating results.

Failing to manage our churn rate or experiencing a higher rate of customer turnover than we have forecasted could adversely affect our business, financial condition and operating results.

Our customers do not have long-term contracts and can discontinue their service at any time without penalty. We expect our churn rate to be higher than postpay wireless carriers. If we experience an even higher rate of churn than we expect, we could experience reduced revenues and increased marketing costs to attract replacement customers required to sustain our business plan, which could reduce our profit margin and could reduce the cash available to construct and operate new markets. In addition, we may not be able to profitably replace customers who leave our service or replace them at all. Our rate of customer churn can be affected by a number of factors, including the following:

network issues, including network coverage, network reliability, dropped and blocked calls, and network availability;

lack of competitive regional and nationwide roaming and the inability of our customers to cost-effectively roam onto other wireless networks;

affordability and general economic conditions;

supplier or vendor failures;

customer care concerns;

handset issues, including lack of early access to the newest handsets, handset prices and handset problems;

wireless number portability requirements that allow customers to keep their wireless phone numbers when switching between service providers;

our inability to offer bundled services or new services offered by our competitors; and

Table of Contents

competitive offers by other producers.

We cannot assure you that our strategies to address customer churn will be successful. If we experience a rate of customer churn higher than we expect or fail to replace lost customers, our revenues could decline and our costs could increase which could have a material adverse effect on our business, financial condition and operating results.

Our operations require continued capital expenditures and a failure to have access to capital could materially adversely affect our business, financial condition and operating results.

Our business strategy involves expanding into and competing in major metropolitan areas, all of which have significant established competition from other providers. To compete effectively, we must continue to upgrade and enhance our network and services. As a result, we have invested and expect to continue to invest a significant amount of capital in the future to construct, maintain, upgrade and operate our network, billing, customer care and information systems, to implement our business plans, including our fourth generation network, and to support future growth of our wireless business.

Historically, we have been able to fund capital expenditures and service our debt from cash generated from our operations and various debt and equity offerings. We may require additional capital to fund our long-term business plan, including operating losses, network expansion, servicing of our debt and possible spectrum acquisitions. Our success and viability will depend on our ability to maintain and increase revenues and to raise additional capital, when and if needed, on reasonable terms. We may not be able to arrange additional financing, whether debt, equity or otherwise, to fund our future needs on terms acceptable to us or at all. Our ability to arrange additional financing will depend on, among other factors, our credit ratings, financial and operating performance, general economic, financial, competitive, legislative and regulatory conditions and prevailing capital market conditions. Many of these factors are beyond our control. Failure to obtain suitable financing when needed could, among other things, result in our inability to continue to expand our businesses as planned or to meet competitive challenges; forego strategic opportunities; delay and/or reduce network deployments and capital expenditures, operations, spectrum acquisitions and investments; and restructure or refinance our indebtedness prior to maturity or sell additional equity or seek additional debt financing. We cannot assure you that our business will generate sufficient cash flow from operations, or that future borrowings, including borrowings under our senior secured credit facility, will be available to us in an amount sufficient to enable us to pay our indebtedness or to fund our working capital and other liquidity needs, or at all. Further, as our operations grow, it may be more difficult to adapt and modify our business plan based on the availability of funding. If we incur significant additional indebtedness, or if we do not continue to generate sufficient cash from our operations, our credit ratings could be adversely affected, which would likely increase our future borrowing costs and could affect our ability to access capital.

We face intense competition from other telecommunications providers and new entrants in the marketplace.

We compete directly in each of our markets with wireless, wireline, cable, satellite, Internet and other communications providers. Many of our current and prospective competitors are, or are affiliated with, major companies that have substantially greater financial, technical, personnel and marketing resources than we have (including spectrum holdings, brands and intellectual property) and a larger market share than we have, which may affect our ability to compete successfully. These competitors often have established relationships with a larger base of current and potential customers. These advantages may allow our competitors to offer service for lower prices, market to broader customer segments, and offer service over larger geographic areas which may have a material adverse effect on our business, financial condition and operating results. Some of our competitors may have, or may in the future, take advantage of governmental programs which may allow them to offer services for lower prices, have lower costs, or provide service in areas which may be diseconomic for us to serve without taking advantage of such programs. If we choose not to or are unable to participate in such governmental programs and our competitors participate, our competitors could offer services for lower prices, have lower costs, or provide service in areas which are diseconomic for us to serve without taking advantage of such programs, which could have a material adverse effect on our business, financial condition, or operating results.

Some of our competitors in the telecommunications and related industries have undertaken joint ventures, mergers and strategic alliances that have provided them with greater access to capital, access to wider geographic territory, access to greater spectrum, access to technical, marketing, sales, purchasing and distribution resources and more

attractive bundles of services. Recent joint ventures, mergers and strategic alliances in the wireless industry have resulted in, and if the trend continues, will continue to foster larger competitors over time and our operating results could be adversely affected and our ability to grow may be hindered. Many of our competitors with greater access

Table of Contents

to capital and production and distribution resources have also entered into exclusive deals with vendors, including handset vendors. As handset selection and pricing are increasingly important to customers, the lack of availability to us of the latest and most popular handsets as a result of these exclusive dealings could put us at a significant competitive disadvantage and could make it more difficult for us to attract and retain our customers. Similarly, we believe we pay more, on average, than other national carriers for our handsets and if this continues we could be forced to subsidize the price of our handsets which could adversely affect our financial condition and operating results. Many of our competitors also use third party dealers to market and sell their products and services. Competition for dealers is intense. We may have difficulty attracting and retaining dealers and any inability to do so could have an adverse effect on our ability to attract and retain customers which could have material adverse effect on our business, financial condition and operating results.

Additionally, the FCC in the past has taken, and may in the future take, steps to make additional spectrum available for wireless services in each of our metropolitan areas. Any auction and licensing of new spectrum may result in new competitors and/or allow existing competitors to acquire additional spectrum, which could allow them to offer services that we may not be able to offer with the licenses we hold or to which we have access due to technological or economic constraints. Also, the FCC has taken, and in the future may take, regulatory actions designed to provide greater capacity and flexibility to other licensees, including our competitors. In addition, some companies in non-telecommunications businesses, including energy companies and utility companies are also expanding their services to offer communications and broadband services. We cannot control most of these factors and the continuing consolidation and resulting economies of scale and access to greater resources and additional competition could result in greater product, service, pricing and cost disadvantages to us which could have a material adverse affect on our business, financial condition and operating results.

We may face increasing competitive pricing and service bundling.

The competitive pressures of the wireless telecommunications industry have caused, and may continue to cause, other carriers to offer unlimited service plans or service plans with increasingly large bundles of minutes of use at increasingly lower prices or fixed monthly prices. All of our national wireless broadband mobile competitors and certain of our regional competitors currently are offering unlimited fixed-rate service plans in the markets where we operate and plan to operate and this may cause other wireless competitors to also offer unlimited fixed-rate service plans. Since we primarily serve major metropolitan areas where the national wireless broadband mobile carriers are also offering services, we may be subject to more competition than the wireless broadband mobile industry generally and subject to greater commercial disadvantage. Further, market prices for wireless broadband mobile services have declined over time and may continue to decline with increased competition. Moreover, certain carriers we compete against, or may compete against in the future, offer additional services, such as wireline phone service, cable or satellite television, media and Internet, and are capable of bundling their wireless services with these other services in a package of services that we may not be able to duplicate at competitive prices. In response to all the competitive offerings in the marketplace and falling market prices, we have added, and in the future may be required to add, additional select features to our existing service plans in our metropolitan areas, and we may consider additional targeted promotional activities and reduced pricing as well as subsidizing the cost of handsets or increasing payments to our indirect dealers as we evaluate and respond to the competitive environment going forward. As a result, we expect that increased competition may result in more competitive pricing, slower growth, higher costs and increased churn of our customer base, as well as the possibility of having to change our service plans, increase our handset subsidies, and increase our dealer payments in response to competition, which may adversely affect our business, financial condition and operating results.

The wireless industry is experiencing rapid technological change.

The wireless telecommunications industry has been, and we believe will continue to be, characterized by significant technological change, including the rapid development and introduction of new technologies, products, and services, such as voice-over Internet protocol, or VoIP, push-to-talk services, location based services, such as global positioning satellite, or GPS, mapping technology, social networking services, and high speed data services, including streaming audio, streaming video, mobile gaming, advertisement paid services, video conferencing and other applications. These technological advances, evolving industry standards, ongoing improvements in the capacity and

the quality of digital technology, such as the implementation and development of third generation, or 3G technology, wideband technologies such as WiFi or WiMax which do not rely on FCC-licensed spectrum, or the development of fourth generation, or 4G technology, such as long term evolution, or LTE, and the development of data and broadband capabilities, could cause the technology used by us on our wireless broadband mobile network to become less competitive or obsolete. Additionally, VoIP is an emerging technological trend that could result in a

Table of Contents

decrease in demand for switched telephone services, such as those we currently provide. The resulting technological development of WiFi or WiMax enabled handsets permitting customers to communicate using voice and data services with their handset using this VoIP technology in any area equipped with a wireless Internet connection, or hot spot, would potentially allow more carriers to offer larger bundles of minutes while retaining low prices and the ability to offer attractive roaming rates. The number of hot spots in the U.S. is growing rapidly, with some major cities and urban areas approaching universal coverage. Further, the development of new equipment, such as femtocells, could allow our competitors to offer increased usage without increased cost thus reducing our cost advantage.

Thus, our continued success will depend, in part, on our ability to anticipate or adapt to these and future technological changes and to offer, on a timely basis, services that meet customer demands. For us to keep pace with these technological changes and remain competitive, we must continue to make significant capital expenditures to our networks and/or acquire additional spectrum. Customer acceptance of the services that we offer will continually be affected by technology-based differences in our product and service offerings and those offered by our competitors. We cannot assure you that we will obtain access to new technology, such as LTE, on a timely basis, on satisfactory terms, or that we will have adequate spectrum, or be able to acquire additional spectrum, to offer new services or implement new technologies. If we do not offer these services, we may have difficulty attracting and retaining customers. Further, we cannot predict the effect of technological changes on our business. We also cannot be certain that the choices we make regarding technology and new service offerings will prove to be successful in the market place or will achieve their intended results. All of these factors could have a material adverse effect on our business, financial condition and operating results.

We are dependent on certain network technology improvements which may not occur, or may be materially delayed.

Most national wireless broadband mobile carriers have greater spectrum capacity than we do that can be used to support 3G and 4G services. These national wireless broadband mobile carriers are currently investing substantial capital to deploy the necessary equipment to deliver 3G enhanced services and have invested in additional spectrum to deliver 4G services. Two of our national wireless broadband mobile competitors acquired a significant portion of the 700 MHz spectrum recently auctioned by the FCC. This 700 MHz spectrum is considered by some industry experts to be particularly desirable due to its propagation characteristics. The national wireless broadband mobile carriers in many instances on average have more spectrum in each of the metropolitan areas in which we operate, or plan to operate, than we or Royal Street do. Our limited spectrum may require us to secure more cell sites to provide equivalent service (including data services based on EV-DO or LTE technology), spend greater capital compared to our competitors, deploy more expensive network equipment, such as six-sector antennas, EV-DO Revision A with VoIP or LTE, deploy equipment sooner than our competitors, require us to use DAS systems or make us more dependent on improvements in handsets, such as EVRC-B or 4G capable handsets. There can be no assurance that the additional technology improvements will be developed by our existing infrastructure provider, such improvements will be delivered when needed at cost-effective prices, that such technology improvements will deliver our projected network efficiency improvements, or that we can secure adequate tower sites or additional spectrum or have access to DAS systems.

If projected or anticipated technology improvements are not achieved, or are not achieved in the timeframes in which we need such improvements, or at the costs we anticipate or can afford, or are not developed by our existing suppliers, we may not have adequate spectrum in certain metropolitan areas, which may limit our ability to increase our customer base, may inhibit our ability to achieve additional economies of scale, may limit our ability to offer new services offered by our competitors, may require us to spend considerably more capital and incur more operating expenses than our competitors with more spectrum, and may force us to purchase additional spectrum at a potentially material cost. If our network infrastructure vendor does not supply such improvements, or materially delays the delivery of such improvements, and other network equipment manufacturers are able to develop such technology, we may be at a material competitive disadvantage to our competitors and we may be required to change network infrastructure vendors, which could have a material adverse effect on our business, financial condition and operating results.

Table of Contents***We may be unable to acquire additional spectrum in the future at a reasonable cost.***

Because we offer unlimited calling services for a fixed rate, our customers tend, on average, to use our services more than the customers of other wireless broadband mobile carriers. We believe that the average minutes of use of our customers may continue to rise. We intend to meet this demand by utilizing spectrum-efficient state-of-the-art technologies, such as six-sector cell site technology, EV-DO Revision A with VoIP, LTE, EVRC-B or 4G handsets and intelligent antennas. Nevertheless, in the future we may need to acquire additional spectrum in order to maintain our quality of service, to meet increasing customer demands or to allow the deployment of these technologies. However, we cannot assure you that additional spectrum will be made available by the FCC on a timely basis on terms and conditions or under service rules that we consider to be suitable for our commercial uses or that we will be able to acquire additional spectrum at a reasonable cost. In addition, the FCC may impose conditions on the use of new wireless broadband mobile spectrum, such as heightened build-out requirements or open access requirements that may make it less attractive to, or less economical for, us. If additional spectrum is unavailable on reasonable terms and conditions when needed, unavailable at a reasonable cost, or unavailable without conditions that impose significant costs on us, we may not be able to continue to increase our customer base, meet the requirements of our customers usage of our services or to offer new services and as a result we could lose customers or revenues, which could materially adversely affect our business, financial condition, or operating results.

We may be unable to successfully develop and incorporate additional wireless data services into our service offerings in the future.

Wireless broadband mobile data services are increasingly becoming a meaningful component of many wireless broadband mobile carriers' strategies and financial results. The national wireless broadband mobile carriers have invested (and we expect will continue to invest) significant resources to develop and deliver these on new data services to their customers. As market prices for wireless voice services continue to decline, if we are unable to offer such new data services we may not have additional revenue to offset the decline in wireless voice revenues. Similarly, as customers increasingly demand wireless broadband mobile data services as part of the core feature set of their wireless services, the failure to offer such services could reduce sales and increase churn. Currently, we offer limited wireless data offerings which are not as robust as those offered by some of our competitors and may never be. In addition, we have not and may not gain access to certain of the proprietary data content available to national wireless broadband mobile operators. If we are unable in the future to successfully incorporate the most advanced wireless data services, including certain 3G and 4G technologies, into our service offerings or gain access to popular content, our customer additions and ARPU could decrease and our churn could increase. In addition, there can be no assurance that we can provide wireless broadband mobile data services on a profitable basis or that vendors will develop and make available to companies of our size popular applications and handsets with features, functionality and pricing desired by customers. Furthermore, we rely on third parties to provide us access to most data, music and video services and access to new handsets to deliver these advanced services. If we are unable to obtain access to such services, incorporate such services into our service offerings, or purchase handsets at a reasonable cost and on a timely basis in the future, it could have a material adverse effect on our business, financial condition and operating results.

We may undertake mergers, acquisitions or strategic transactions that could result in operating difficulties, dilution and distraction from our business.

Historically we have expanded our markets through the purchase of spectrum. In the future, we may expand the markets in which we operate through the acquisition of selected spectrum or operating markets from other telecommunication service providers, the acquisition of additional spectrum from FCC auctions, and the acquisition of other telecommunication service providers; through direct investments; or through strategic transactions. Any such transactions can be very risky, may require a disproportionate amount of our management and financial resources, may divert management's attention, and may create various operating difficulties and expenditures, among which may include:

- uncertain revenues and expenses, with the result that we may not realize the growth in revenues, anticipated cost structure, profitability, or return on investment that we expect;

difficulty integrating the acquired technologies, services, spectrum, products, operations and personnel of the acquired businesses while maintaining uniform standards, controls, policies and procedures;

disruption of ongoing business;

Table of Contents

impact on our cash and available credit lines for use in financing future growth and working capital needs;

obligations imposed on us by counterparties in such transactions that limit our ability to obtain additional financing, our ability to compete in geographic areas or specific lines of business, or other aspects of our operational flexibility;

increasing cost and complexity of assuring the implementation and maintenance of adequate internal control and disclosure controls and procedures, and of obtaining the reports and attestations required under the Exchange Act;

inability to attract and retain key personnel;

impairment of relationships with employees, customers or vendors;

difficulties in consolidating and preparing our financial statements due to poor accounting records, weak financial controls and, in some cases, procedures at acquired entities not based on U.S. GAAP particularly those entities in which we lack control; and

inability to predict or anticipate market developments and capital commitments relating to the acquired company, business or technology.

The anticipated benefit to us of any strategic transaction, acquisition or merger may never materialize. Future investments, acquisitions or dispositions, or similar arrangements could result in dilutive issuances of our equity securities, the incurrence of debt, contingent liabilities or amortization expenses, or write-offs of goodwill, any of which could have an adverse effect on our business, financial condition and operating results. Any such transactions may require us to obtain additional equity or debt financing, which may not be available on acceptable terms, or at all. ***Business, political, regulatory and economic factors may significantly affect our operations, the manner in which we conduct our business and slow our rate of growth.***

The United States economy has deteriorated significantly and may be depressed for the foreseeable future. Our business could be affected by the economic conditions as well as consumer spending in the areas in which we operate. These factors are outside of our control. As economic conditions deteriorate, our services may be disproportionately and adversely affected due to the generally lower per capita income of our customer base (versus the national facility-based wireless broadband mobile carriers) that may be disproportionately affected by any disruption in the United States economy, including an economic downturn or recession. In addition, a number of our customers work in industries which may be disproportionately affected by an economic slowdown or recession. More generally, adverse changes in the economy are likely to negatively affect our customers' ability to pay for existing services and to decrease their interest in purchasing new services. The resulting impact of such economic conditions on consumer spending could have a material adverse effect on demand for our services and on our business, financial condition and operating results.

Additionally, due to changes in the political climate as a result of the outcome of recent state elections and the Presidential election in the United States, we cannot predict with any certainty the nature and extent of the changes in federal, state and local laws, regulations and policy we will face, or the effect of such elections on any pending legislation, such as the immigration laws and policy. Any increased regulation, new policy initiatives, increased taxes or any other changes in federal law may have an adverse effect on our business, financial condition and operating results.

Recent disruptions in the financial markets could adversely affect our ability to obtain debt or equity on reasonable terms or at all.

The wireless industry is a capital intensive business. To date, we have used internally generated funds and the funds from the sale of debt and equity to finance our growth and build out of our existing and planned metropolitan areas. If our current cash and excess internally generated cash flows are insufficient to fund our business plan, improve and expand our network infrastructure and services, participate in new opportunities, engage in acquisitions

of additional spectrum or businesses or participate in future FCC auctions, or service our debt, we may be forced to

Table of Contents

sell additional equity, seek additional debt financing, borrow additional amounts under our existing senior secured credit facility, refinance our existing indebtedness, or delay certain of our planned expansion or other initiatives, additions of capacity, and technological advances. Additionally, our senior secured credit facility includes a revolving line of credit that is to be funded by a number of commercial and investment banks. The deteriorating worldwide economic conditions, the banking crisis, and tightening capital markets may affect whether our lenders are able to honor their commitments to fund our revolving line of credit should we need to draw on such line of credit to pursue new opportunities, engage in acquisitions, or purchase additional spectrum. Should we need to access the market for additional funds the competitiveness of the wireless telecommunications industry, the volatility and demand of the capital markets, and the continued uncertainty in the credit and capital markets may make it more difficult and costly for us to raise capital through the issuance of any equity securities or incur any additional debt or refinance existing debt on terms acceptable to us or at all and there can be no assurance that sufficient funds will be available to us under our existing indebtedness or otherwise. Further, should we need to raise additional capital, the foreign ownership restrictions mandated by the FCC, and applicable to us, could limit our ability to attract additional equity financing outside the United States. If we were able to obtain funds, it may not be on terms and conditions acceptable to us, which could limit or preclude our ability to pursue new opportunities, engage in acquisitions, or purchase additional spectrum, thus limiting our ability to expand our business which could have a material adverse effect on our business, financial condition and operating results.

We are exposed to counterparty risk in our senior secured credit facility and related interest rate protection agreements.

We have entered into interest rate protection agreements to manage the Company's interest rate risk exposure by fixing a portion of the interest expense we pay on our long-term debt under our senior secured credit facility. There is considerable turmoil in the world economy and banking markets which could affect whether the counterparties to such interest rate protection agreements are able to honor their agreements. If the counterparties fail to honor their commitments, we could experience higher interest rates, which could have a material adverse effect on our business, financial condition and operating results. In addition, if the counterparties fail to honor their commitments, we also may be required to replace such interest rate protection agreements with new interest rate protection agreements in an amount equal to that portion of our long-term debt under our senior secured credit facility and indentures governing our senior notes, which is not fixed and which is less than 50% of our total long-term debt under our senior secured credit facility and indentures governing our senior notes, and such replacement interest rate protection agreements may be at higher rates than our current interest rate protection agreements. Further, if we are unable to enter into new interest rate protection agreements, the lenders may claim we are in default under the terms of our senior secured credit facility, which could have a material adverse effect on our business, financial condition and operating results.

The investment of our substantial cash balances are subject to risk.

We can and have historically invested our substantial cash balances in, among other things, securities issued and fully guaranteed by the United States or any state, highly rated commercial paper and auction rate securities, money market funds meeting certain criteria, and demand deposits. These investments are subject to credit, liquidity, market and interest rate risk. Such risks may result in a loss of liquidity, substantial impairment to our investments, realization of substantial future losses, or a complete loss of the investment in the long-term which may have a material adverse effect on our business, financial condition, operating results and liquidity.

We currently are migrating our billing services to a new vendor.

We recently entered into an agreement with a new billing services provider, Amdocs Software Systems Limited and Amdocs, Inc., or Amdocs, under which, subject to certain exclusions, Amdocs will be our exclusive supplier of billing services in North America. Amdocs is in the process of implementing the new billing services and migrating our customers from our existing billing platform to the Amdocs platform. If Amdocs does not perform its obligations under the agreement, ceases to continue to develop, or substantially delays development of, new features or billing services or ceases to support its existing billing systems, we may be unable to secure alternative billing services from another provider or providers in a timely manner, for a reasonable cost or otherwise, which could have a material adverse effect on our business, financial condition, and operating results. Our prior billing services vendor, Verisign, also has sold its billing services business to another third party billing services vendor and we have amended our

contract with this new third party billing services vendor to include certain transition services. If this third party billing services vendor fails to continue to provide the services that Verisign previously provided prior to our transition to Amdocs, if the third party billing services vendor fails to provide the agreed upon transition services, or if we are unable to transition our billing services to Amdocs in a timely manner, we may not be able to bill our customers, provide customer care, grow our business, report financial results, or manage our business and we may have increased churn, all of which could have a material and adverse effect on our business, financial condition and operating results.

Table of Contents***We and our suppliers may be subject to claims of infringement.***

The technologies used in the telecommunications industry are protected by a wide array of patents and other intellectual property rights. As a result, third parties may assert infringement claims against us or our suppliers from time to time based on our or their general business operations, the equipment, software or services we or they use or provide, or the specific operation of our wireless networks or service. Our suppliers may be subject to infringement claims that if proven could preclude the supplier from supplying us with the products and services we require to run our business or offer our services, require the supplier to change the products and services they provide to us in a way which could have a material adverse effect on us, or cause the supplier to increase the charges for their products and services to us. We cannot guarantee that we will be fully protected against all losses associated with an infringement claim involving our manufacturers, licensors and suppliers who provide us with the equipment, software and technology that we use in our business. In addition, our suppliers may be unable to pay any damages or honor their indemnification obligations to us, which may result in us having to bear such losses. We may also have to buy equipment and services from other third party suppliers or pay royalties to the holders of intellectual property rights.

Moreover, we may be subject to claims that products, software and services provided by different vendors which we combine with products or with services provided by other vendors or with our own services in order to offer services to our customers are infringing on the rights of others, and we may not have any indemnification protection from our vendors for these claims. Further, we have been, and in the future may be, subject to claims that certain business processes we use, services we provide, or products we create may infringe on the rights of third parties, and we may have no indemnification rights from any of our vendors or suppliers. Whether or not an infringement claim is valid or successful, it could adversely affect our business by diverting management's attention, involving us in costly and time-consuming litigation, requiring us to enter into royalty or licensing agreements (which may not be available on acceptable terms, or at all), requiring us to pay royalties for prior periods, requiring us or our suppliers to redesign our or their business operation, processes, systems, services or products to avoid claims of infringement, or requiring us to purchase products and services from different vendors or not sell certain products or services. If a claim is found to be valid or if we or our suppliers cannot successfully negotiate a required royalty or license agreement, we could be forced to pay substantial damages, including potentially treble damages, we could be subject to an injunction that could disrupt our business, prevent us from offering some or all of our products or services and cause us to incur losses of customers or revenues, any or all of which could be material and could adversely affect our business, financial condition and operating results.

Substantially all of our network infrastructure equipment is manufactured or provided by a single infrastructure vendor.

Substantially all of our PCS and AWS network infrastructure equipment is manufactured or provided by Alcatel Lucent, formerly known as Lucent Technologies, Inc. We have entered into an agreement with Alcatel Lucent to provide us with PCS and AWS CDMA system products and services, including without limitation, wireless base stations, switches, power, cable and transmission equipment and services. The agreement does not cover any other non-AWS or non-PCS spectrum we may acquire in the future, including our spectrum in the 700 MHz band or other technologies, such as LTE. A substantial portion of the equipment manufactured or provided by Alcatel Lucent is proprietary, which means that equipment and software from other manufacturers may not work with Alcatel Lucent's equipment and software, or may require the expenditure of additional capital, which may be material. The communications equipment market has been subject to recent economic turmoil. If Alcatel Lucent ceases to develop, or substantially delays development of, new products or ceases to support existing equipment and software, or experiences problems which prevent Alcatel Lucent from performing its obligations under the agreement, we may be required to spend significant amounts of money to replace such equipment and software, may not be able to offer new products or services, and may not be able to compete effectively in our markets. If we fail to continue purchasing our PCS and AWS CDMA products exclusively from Alcatel Lucent, we may have to pay certain liquidated damages based on the difference in prices between exclusive and non-exclusive prices, which would have a material adverse effect on our business, financial condition and operating results.

Table of Contents***We rely on third-parties to provide products, software and services that are integral to our business.***

Sophisticated financial, management, information network management and billing systems are vital to our business. We currently rely on internal systems and third-party vendors to develop and to provide all of these systems. We have entered into agreements with third-party suppliers to provide products, software and services that are integral to our business, such as customer care, financial reporting, network management, billing and payment processing. We purchase a substantial portion of the products, software and services from only a few major suppliers and we generally rely on one key vendor in each area. Some of these agreements may be terminated upon relatively short notice. In addition, our plans for developing and implementing our financial information and billing systems rely to some extent on the design, development and delivery of products, software and services by third-party vendors. Our right to use these systems is dependent on agreements with third-party vendors and these systems may not perform as anticipated. Our base stations are installed on leased cell site facilities or on leased DAS nodes in connection with DAS systems. A significant portion of these cell sites and all DAS systems are leased from a small number of cell site and DAS system providers generally under master agreements.

If our suppliers terminate their agreements with us, experience interruptions or other problems delivering products, software or services to us on a timely basis or at all, it may cause us to have difficulty providing services to or billing our customers, developing, delivering, and deploying new products and services and/or upgrading, maintaining, improving our networks, or generating accurate or timely financial reports and information. If alternative suppliers and vendors become necessary, we may not be able to obtain satisfactory and timely replacement services on economically attractive terms, or at all. The loss, termination or expiration of these agreements or our inability to renew them at all or on favorable terms or negotiate agreements with other providers at comparable rates could harm our business. Our reliance on others to provide essential products, software, and services on our behalf also gives us less control over the efficiency, timeliness and quality of these products, software and services. If our master agreement with one of our cell site or DAS providers were to terminate, or if the cell site or DAS system providers were to experience severe financial difficulties or file for bankruptcy, or if one of these cell site or DAS system providers were unable to support our use of its cell sites or DAS systems, we would have to find new sites or rebuild the affected portion of our network. In addition, the concentration of our cell site leases and DAS systems with a limited number of cell site and DAS system providers could adversely affect our business, financial condition and operating results if we are unable to renew our expiring leases or DAS system agreements with these companies either on terms comparable to those we have today or at all. In addition, the tower industry has continued to consolidate. If any of the companies from which we lease towers or DAS systems were to consolidate with other cell site or DAS systems companies, they may be unable to honor obligations to us or have the ability to raise prices which could materially affect our profitability. If a material number of cell sites or DAS systems were no longer available for our use, it could have a material adverse effect on our business, financial condition and operating results.

Additionally, our business model utilizes and relies upon indirect distribution outlets including a range of local, regional and national mass market dealers and retailers allowing us to reach the largest number of potential customers in our metropolitan areas at a relatively low cost. Many of our dealers own and operate more than one location and may operate in more than one of our metropolitan areas. Because these third party dealers are the primary contact between us and our customers in many instances, including in connection with accepting payment for our services on our behalf, they play an important role in our ability to grow our business and in customer retention. With the recent deterioration of the United States economy and the credit markets, which may continue for the foreseeable future, some of our dealers and vendors may be unable to continue their operations or secure funds for their continued operations. Further, due to the present economic conditions, we may be unable to find participants in our local markets that would qualify or be able to open a dealer location to replace closed operations. Since we rely on such third parties to provide some of our services, any bankruptcy, termination, switch or disruption in service by such third parties or diminution in the number of such third parties could be costly and affect operating efficiencies and our ability to attract and retain customers which could have a material adverse effect on our business, financial condition and operating results.

We utilize a limited number of DAS providers.

We currently use, and plan to continue to use, DAS systems in lieu of traditional cell sites to provide service to certain critical portions of new metropolitan areas in which we plan to build and in supplementing or adding capacity to existing systems. The use of DAS systems will result in an acceleration of capital expenditures compared to our traditional metropolitan builds without DAS systems. In order to construct DAS systems, the DAS provider will be required to obtain necessary authority from the relevant state and local regulatory authorities and to secure certain agreements, such as right of way agreements, in order to construct or operate the DAS systems. In addition, the DAS system provider may be required to construct a transport network as part of their construction of the DAS systems. These DAS systems may be leased and/or licensed from third party suppliers. We utilize a

Table of Contents

limited number of DAS system providers. Some of the DAS system providers we are using have not previously constructed or been authorized to construct DAS systems in certain of our new metropolitan areas so there may be unforeseen obstacles and delays in constructing the DAS systems in those metropolitan areas. In addition, the authorization of the DAS provider to construct DAS systems may be subject to challenge and injunctive relief, resulting in delay and material costs in providing alternative coverage in the affected metropolitan areas. In addition, DAS systems also pose particular compliance challenges with regard to any backup power requirements that may be adopted by the FCC, which, if adopted could have a material adverse effect on our ability to comply with applicable laws, could require us to spend significant amounts of additional capital, and could have a material adverse effect on our business, financial condition and operating results.

We may be unable to obtain the roaming and other services we need from other carriers at rates that allow us to remain competitive or at all.

Many of our competitors have more extensive regional or national networks which enable them to offer automatic roaming and long distance telephone services to their subscribers at a lower cost than we can offer and allow them to offer unlimited fixed-rate local, regional, and nationwide roaming plans on their existing networks over a larger area than we can offer. We do not have as extensive a network as the national wireless broadband mobile carriers, and we must pay fees to other carriers who provide roaming services and who carry long distance calls made by our subscribers. We currently have roaming agreements with several other carriers which allow our customers to roam on those carriers' network. The roaming agreements, however, do not cover all geographic areas where our customers may seek service when they travel, they generally cover voice but not data services, and some of these agreements may be terminated on relatively short notice. As the wireless industry has consolidated, and may continue to consolidate in the future, we may have increased difficulty entering into new roaming agreements with other technically compatible carriers or replacing our existing roaming agreements. In addition, we believe the rates we are charged by certain carriers in some instances are higher than the rates they charge to other roaming partners. Further, many of the wireless carriers against whom we compete have service area footprints substantially larger than our footprint.

Our ability to replicate these roaming service offerings at rates which will make us, or allow us to be, competitive is uncertain at this time. The FCC recently clarified that CMRS providers must offer automatic roaming services on just, reasonable and non-discriminatory terms, but found that a CMRS provider is not required to offer roaming services in any geographic area for which a requesting carrier holds a license or other spectrum usage rights, even if the requesting carrier has not yet built its system. The FCC also has not extended full roaming rights to roaming services that are classified as information services (such as high speed wireless Internet access services), or for roaming services that are not classified as CMRS (such as non-interconnected services). If we are unable to enter into or maintain roaming agreements for roaming services that our customers want at reasonable rates, including in areas where we have licenses or lease spectrum but have not constructed facilities, we may be unable to compete effectively and attract and retain customers, and we may lose revenues. We also may be unable to continue to receive roaming services in areas in which we hold licenses or lease spectrum after the expiration or termination of our existing roaming agreements. We also may be obligated to allow customers of other technically compatible carriers to roam automatically on our systems, which may enhance their ability to compete with us. If these risks occur, it may have a material adverse effect on our business, financial condition and operating results.

We may incur higher than anticipated intercarrier compensation costs.

When our customers use our service to call customers of other carriers, in certain circumstances we are required to pay the carrier that serves the called party, and any intermediary or transit carrier, for the use of their networks. An ongoing FCC rulemaking proceeding is examining whether a unified intercarrier compensation regime should be established for all traffic exchanged between all carriers, including CMRS carriers such as us. New intercarrier compensation rules, if adopted, may result in increases in the charges we are required to pay other carriers for terminating calls on their networks, increase the costs of or difficulty in negotiating new agreements with carriers, and decrease the amount of revenue we receive for terminating calls from other carriers on our network. Any such changes may have a materially adverse effect on our business, financial condition and operating results.

Some carriers who terminate calls originated by our customers have sought, and others may seek, to impose termination charges on us that we consider to be unreasonably high and have threatened to pursue, or have initiated or may initiate, claims against us to recover these charges. The outcome of these claims is uncertain. A determination that we are liable for additional terminating compensation payments could subject us to additional claims by other carriers. Further, legal and business considerations may inhibit our ability or willingness to block

Table of Contents

traffic to telecommunication carriers who demand unreasonable payments. In addition, certain transit carriers have taken the position that they can charge market rates for transit services, which rates may in some instances be significantly higher than our current rates or the rates we are willing to pay. We may be obligated to pay these higher rates and/or purchase services from others or engage in direct connection, which may result in higher costs which could materially affect our business, financial condition, and operating results.

A significant portion of our revenue is derived from geographic areas susceptible to natural and other disasters.

Our markets in California, Texas and Florida represent a substantial portion of our business. These same states, however, have a history of natural disasters which may adversely affect our operations in those states. In addition, the major metropolitan areas in which we operate, or plan to operate, could be the target of terrorist attacks. These events may cause our networks to cease operating for a substantial period of time while we reconstruct them and our competitors may be less affected by such natural disasters or terrorist attacks. We cannot provide any assurance that the business interruption insurance we have will cover all losses we may experience as a result of a natural disaster or terrorist attack, that the insurance carrier will be solvent or that the insurance carrier will pay all claims made by us. If our networks cease operating for any substantial period of time and any business interruption insurance we have does not pay, we may lose revenue and customers, and may have difficulty attracting new customers in the future, which could materially adversely affect our business, financial condition and operating results.

Our success depends on our ability to attract and retain qualified management and other personnel.

Our business is managed by a small number of key executive officers, including our chief executive officer, Roger Linquist. None of our managing key executives has an employment contract, so any such executive officers may leave at any time subject to forfeiture of any unpaid performance awards and any unvested options. We believe that our future success depends in substantial part on our continued ability to attract and retain highly knowledgeable, qualified executive, technical and management personnel. We believe that competition for highly qualified management, technical and sales personnel is intense, and there can be no assurance that we will retain our key management, technical and sales employees, that we will be successful in attracting, assimilating or retaining other highly qualified management, technical and sales personnel in the future sufficient to support our continued growth, or that we will be successful in replacing any of our key management, technical and sales personnel that may retire or cease to be employed by us. We have experienced occasional difficulties in recruiting qualified personnel and there can be no assurance that we will not experience such difficulties in the future. The departure or retirement of, or our inability to attract or retain, highly qualified executive, technical and management personnel, including the chief executive officer, could materially and adversely affect our business, financial condition and operating results.

Recent political changes could have an adverse effect on our relationship with our workforce.

None of our employees is covered by a collective bargaining agreement or represented by an employee union. With the recent changes in the party affiliation of the President of the United States and the changes in composition of Federal and state legislatures, legislation may be enacted which could impose additional requirements on us or make it easier for union organizing activities. If our employees become represented by an employee union, it may make it more difficult for us to manage our business and to attract and retain new employees and may increase our cost of doing business. Having our employees become represented by an employee union or having additional requirements related to our employees imposed on us could have a material adverse effect on our business, financial condition and operating results.

We are subject to numerous surcharges and fees from federal, state and local governments, and the applicability and the amount of these fees is subject to great uncertainty.

Telecommunications providers pay a variety of surcharges and fees on their gross revenues from interstate and intrastate services, including federal Universal Service Fund, or USF, fees and common carrier regulatory fees. The division of our services between interstate services and intrastate services, including the divisions associated with the federal USF fees, is a matter of interpretation and may in the future be contested by the FCC or state authorities. The FCC also may change in the future the basis on which federal USF fees are charged. The Federal government and many states also apply transaction-based taxes to sales of our products and services and to our purchases of telecommunications services from various carriers. In addition, state regulators and local governments have imposed and may continue to impose various surcharges, taxes and fees on our services. The applicability of these surcharges

and fees to our services is uncertain in many cases and jurisdictions may contest whether we have

Table of Contents

assessed and remitted those monies correctly. Periodically state and federal regulators may increase or change the surcharges and fees we currently pay. In some instances we pass through these charges to our customers. However, Congress, the FCC, state regulatory agencies or state legislatures may limit our ability to pass through to our customers transaction based tax liabilities, regulatory surcharges and regulatory fees imposed on us. We may or may not be able to recover some or all of those taxes from our customers and the amount of taxes may deter demand for our services or increase our cost to provide service which could have a material adverse effect on our business, financial condition or operating results.

Concerns about whether wireless telephones pose health and safety risks may lead to the adoption of new regulations or lawsuits which could decrease demand for our services.

Media reports and some studies have suggested that radio frequency emissions from wireless handsets may be linked to various health concerns, including cancer, or interfere with various electronic medical devices, including hearing aids and pacemakers. Additional studies have been undertaken to determine whether the suggestions from those reports and studies are accurate. In addition, lawsuits have been filed against various participants in the wireless industry alleging various adverse health consequences as a result of wireless phone usage. While many of these lawsuits have been dismissed on various grounds, including a lack of scientific evidence linking wireless handsets with such adverse health consequences, future lawsuits could be filed based on new evidence or in different jurisdictions. If any such suits do succeed, or if plaintiffs are successful in negotiating settlements, it is likely additional suits would follow. In addition to health concerns, safety concerns have been raised with respect to the use of wireless handsets while driving. Certain states and municipalities in which we provide service or plan to provide service have passed laws prohibiting the use of wireless phones while driving, or requiring the use of wireless headsets, and other states and municipalities may do so in the future.

If consumers health concerns over radio frequency emissions increase, consumers may be discouraged from using wireless handsets or services, regulators may impose restrictions or increased requirements on the location and operation of cell sites, the use or design of wireless telephones may restrict the use of wireless handsets while driving, or may require that all wireless telephones include an earpiece that would enable the use of wireless telephones without holding them against the user s head. Such legislation or regulation could increase the cost of our wireless handsets, reduce demand for our products and services, and increase other operating expenses, or could expose wireless providers to further litigation, which, even if not successful, may be costly to defend and could divert management s attention from our business. In addition, compliance with such new requirements, and the associated costs, could adversely affect our business. The actual or perceived risk of radio frequency emissions could adversely affect us through a reduction in customers or a reduction in the availability of financing in the future. If any of these risks occur, it could have a material adverse effect on our business, financial condition and operating results.

System failures, security breaches and the unauthorized use of or interference with our network could cause delays or interruptions of service, increase our cost of operations, and result in harm to our business reputation which could cause us to lose customers.

To be successful, we must provide our customers reliable, trustworthy service. We rely upon our networks and the networks of other providers to support all of our services. Some of the risks to our networks and infrastructure which may prevent us from providing reliable service include:

physical damage to outside plant facilities;

power surges or outages;

equipment failure;

vendor or supplier failures or delays;

software defects;

viruses and other attacks by hackers;

unauthorized use of our or our provider's networks;

39

Table of Contents

human error;

disruptions beyond our control, including disruptions caused by terrorist activities, theft, or natural disasters;
and

failures in operational support systems.

Network disruptions may cause interruptions in service or reduced capacity for customers, either of which could cause us to lose customers and incur expenses. Further, our administrative and capital costs associated with detecting, monitoring and reducing the incidence of fraud, or the costs to replace or repair the network, may be substantial, thus causing our costs to provide service to increase. Fraudulent use of our network may also impact interconnection and long distance costs, capacity costs, administrative costs, fraud prevention costs and payments to other carriers for fraudulent roaming. Such increased costs could have a material adverse impact on our financial results and impair our service resulting in higher churn as our competitors systems may not experience similar problems.

Additionally, our physical facilities and information systems may be vulnerable to physical break-ins, computer viruses, theft, attacks by hackers, or similar disruptive problems. If hackers gain improper access to our databases, they may be able to steal, publish, delete, misappropriate or modify confidential personal information concerning our subscribers. In addition, misuse of our customer information could result in harm to our customers and legal actions against us and to additional harm perpetrated by third-parties who are given access to the consumer data. This could damage our reputation which could have a material adverse effect on our business, financial condition and operating results.

Risks Related to Legal and Regulatory Matters

Our ability to provide service to our customers and generate revenues could be harmed by adverse regulatory action.

Our FCC licenses are major assets that we use to provide our services. Our FCC licenses are subject to revocation and we may be subject to fines, forfeitures, penalties or other sanctions, including the imposition of mandatory reporting requirements, license conditions, the imposition of corporate monitors, and limitations on our ability to participate in future FCC auctions, if the FCC were to find that we are not in compliance with its rules or the requirements of the Communications Act. We must renew our FCC licenses periodically. Renewal applications are subject to FCC review and public comment to ensure that licensees meet their licensing requirements and comply with other applicable FCC requirements, rules and regulations. If we fail to file for renewal of any particular license at the appropriate time, or fail to meet any regulatory requirements for renewal, including construction and substantial service requirements, we could be denied a license renewal. In addition, many of our licenses are subject to interim or final construction requirements and there is no guarantee that the FCC will find our construction, or the construction of prior licensees, sufficient to meet the applicable construction requirement. If the FCC finds that our construction, or the construction of prior licensees, is insufficient, the FCC could terminate our license. For all PCS, AWS and 700 MHz licenses, the FCC also requires that a licensee provide substantial service in order to receive a renewal expectancy. There is no guarantee that the FCC will find the completed system construction sufficient to meet the build out or renewal requirement. Additionally, while incumbent licensees enjoy a certain renewal expectancy if they provide substantial service, the substantial service standard is not well articulated and there is no guarantee that the FCC will conclude that we are providing substantial service, that we are entitled to a renewal expectancy, or will renew all or any of our licenses, without the imposition of adverse conditions. In addition, a failure to comply with applicable license conditions or regulatory requirements could result in revocation or termination of our licenses, in the loss of rights to serve unbuilt areas and/or fines and forfeitures. The FCC may also impose additional regulatory requirements or conditions on our licenses or our business. Such additional regulatory requirements or conditions could increase the cost of doing business, could cause disruption to existing networks, and could require us to make substantial investments. Any loss or impairment of any of these licenses, failure to renew, fines and forfeitures, or the imposition of conditions could have a material adverse effect on our business, financial condition and operating results.

Table of Contents***We may be unable to obtain necessary governmental authorizations and permits on reasonable terms and conditions.***

Our ability to operate our business is dependent on, among other things, our ability to obtain governmental authorizations and permits in the planning, construction and operation of our networks. Obtaining governmental authorizations and permits can be very time sensitive and require compliance with administrative and procedural rules. To remain competitive, we must obtain such authorizations and permits on a timely basis, at a reasonable cost and on acceptable terms and conditions. If we cannot obtain the necessary governmental authorizations and permits at all or on reasonable terms and conditions, we may incur substantial costs associated with finding an alternate, viable resolution, relocating sites and infrastructure, writing off cost and expenses associated with sites we are unable to use, and we may experience a delay or impairment in the provisioning of our services which could have a material adverse effect on our business, financial condition and operating results.

We are subject to significant federal and state regulation.

The FCC regulates the licensing, construction, modification, operation, ownership, sale and interconnection of wireless communications systems, as do some state and local regulatory agencies. We cannot assure you that the FCC or any state or local agencies having jurisdiction over our business will not impose new or revised regulatory requirements, new or increased costs or require changes in our current or planned operations. State regulatory agencies also are increasingly focused on the quality of service and support that wireless carriers provide to their customers and several agencies have proposed or enacted new and potentially burdensome regulations in this area. We also cannot assure you that the Communications Act, from which the FCC obtains its authority, will not in its current state result in the imposition of additional costs for compliance or be further amended in a manner that could be adverse to us. For instance, the FCC restricts the ownership levels held by foreign nationals or their representatives, a foreign government or its representative or any corporation organized under the laws of a foreign country, and as a public company, the costs and results of compliance with such restrictions may have a material adverse effect on our business, financial condition or operating results. Further, with the recent change in party affiliation of the President of the United States and changes in the composition of Federal and state legislatures there may be additional legislative or regulatory changes that affect our business. The FCC also may change its rules, which could result in adverse consequences to our business, including harmful interference to our existing networks and spectrum. For example, the FCC recently proposed to allocate 20 or 25 MHz of spectrum for a nationwide broadband network operating in spectrum adjacent or proximate to the existing allocated and licensed AWS spectrum, including spectrum for which we are licensed. The FCC also has proposed service rules for 10 MHz of spectrum for AWS services operating in spectrum adjacent to the existing PCS spectrum. The technical rules proposed by the FCC for these blocks of spectrum may result in interference to our existing and planned PCS and AWS networks which could cause our customers to experience dropped calls and degraded call quality while using our system. With the exception of the Boston-Worcester, Massachusetts/New Hampshire/Rhode Island/Vermont Economic Area, we are licensed for or have access to only AWS and PCS spectrum in our metropolitan areas and therefore we would be unable to use other frequency bands to avoid any such interference. If, as a result of interference, our customers experience a significant increase in dropped calls or significantly degraded service, we could experience higher churn and we may have difficulty adding additional customers, which could have an adverse effect on our business, our financial condition and operating results. In addition, the interference may cause our networks to have reduced capacity which may require us to incur additional costs of adding cell sites or DAS nodes and to spend additional capital.

Our operations also are subject to various other regulations, including certain regulations promulgated by the Federal Trade Commission, the Federal Aviation Administration, the Environmental Protection Agency, the Occupational Safety and Health Administration and state and local regulatory agencies and legislative bodies. Adverse decisions or regulations of these regulatory bodies could negatively impact our operations and costs of doing business. Because of our smaller size, governmental regulations and orders can disproportionately increase our costs and affect our competitive position compared to other larger telecommunications providers. We are unable to predict the scope, pace or financial impact of regulations and other policy changes that could be adopted by the various governmental entities that oversee portions of our business. As previously noted herein, a variety of changes in regulatory policies are under consideration and depending upon the outcomes, the changes could materially adversely effect our business,

financial condition, or operating results.

Table of Contents

Compliance with current or future federal, state, or local laws, regulations, rules, and ordinances could have a material adverse effect on our business, financial condition, or operating results, including but not limited to, increasing our operating expenses or costs, requiring us to obtain new or additional authorizations or permits, requiring us to change our business and customer service processes, limiting our ability to attract and retain certain customer segments, increasing the costs of our services to our customers, requiring system and network upgrades, requiring us to hire additional employees, and requiring us to spend significant additional capital. A failure to meet or maintain compliance with federal, state or local regulations, laws, rules or ordinances also could have a material adverse effect on our business, financial condition, or operating results, including, but not limited to, subjecting us to fines, forfeitures, penalties, license revocations, or other sanctions, including the imposition of mandatory reporting requirements, limitation on our ability to participate in future FCC auctions or acquisitions of spectrum, and compliance programs and corporate monitors. In addition, a material failure to comply with regulations or statutory requirements may limit our ability to draw certain amounts under our senior secured credit facility or could result in a default under our indebtedness.

The structure of the transaction with Royal Street Communications creates risks because Royal Street Communications may be required to pay back credits received in the grant of its open licenses or to forfeit closed licenses.

Royal Street Communications acquired its PCS licenses as a DE. As a result, Royal Street Communications received a bidding credit equal to approximately \$94 million for its open PCS licenses and was granted certain closed licenses in Florida for which DEs were the only qualified applicants. Subject to certain non-controlling investor protections in Royal Street Communications limited liability company agreement, C9 has control over the operations of Royal Street because it has the right to elect three of the five members of Royal Street Communications management committee, which have the full power to direct the management of Royal Street Communications. However, the Royal Street Communications business plan may become so closely aligned with our business plan that there is a risk the FCC may find Royal Street Communications to have relinquished control over its licenses to us in violation of FCC requirements. In 2006 the FCC made changes to the DE rules which preclude the wholesale arrangements we have with Royal Street Communications on a prospective basis, but the FCC grandfathered our existing wholesale relationship. Further, the FCC has an ongoing proceeding seeking to determine what additional changes, if any, may be required or appropriate to its DE program and aspects of the DE program remain subject to challenge in federal courts of appeal. While the FCC has grandfathered the existing arrangements between Royal Street Communications and us, there can be no assurance that any changes that may be required with respect to those arrangements in the future will not cause the FCC to determine that the changes would trigger the loss of DE eligibility for Royal Street. If the FCC were to determine that Royal Street has failed to exercise the requisite control over its licenses and thus lost its status as a DE, Royal Street would be required to repay the FCC the amount of the bidding credit on a five-year straight-line basis beginning on the grant date of the license, which was December 2005, and it could lose some or all of the licenses only available to DEs which have not yet been constructed, which includes several of its licenses in Florida. If Royal Street lost those licenses or was required to repay the bidding credits it received, it could have a material and adverse effect on our business, financial condition and operating results.

Royal Street owns certain licenses that we do not control and that may never be sold to us.

Our agreements with Royal Street Communications allow us in accordance with applicable laws and regulations to actively participate in the development of the Royal Street licenses and networks, and we have the right to purchase, on a wholesale basis, 85% of the engineered capacity provided by the Royal Street systems and to resell those services on a retail basis under our brand. We, however, do not control Royal Street or the Royal Street licenses. C9, an unaffiliated third party, has the ability through June 2012 to require us to purchase, or put, all or part of its ownership interest in Royal Street Communications, but we have no corresponding right to require C9 to sell to us, or call, its ownership interest in Royal Street Communications to us. C9 might not exercise its put rights or, if it does, we do not know when such exercise may occur. Further, the FCC's rules restrict our ability to acquire or control Royal Street during the period that Royal Street must maintain its eligibility as a DE, which is currently through December 2010. Thus, we cannot be certain that the Royal Street licenses will be developed in a manner fully consistent with our business plan or that C9 will act in ways that benefit us.

Table of Contents***Spectrum for which we have been granted licenses as a result of AWS Auction 66 and Auction 73 is subject to certain legal challenges, which may ultimately result in the FCC revoking our licenses.***

We were required by the applicable FCC rules to pay the full purchase price of approximately \$1.4 billion and \$313.3 million to the FCC for the licenses we were granted as a result of Auction 66 and Auction 73, respectively, even though there are ongoing challenges to some aspects of the final auction rules as they relate to DE participation in the auctions. Several interested parties are appealing these rules in the U.S. Courts and are seeking, among other relief, to overturn the results of Auction 66 and Auction 73. We are unable at this time to predict with certainty the likely outcome of these challenges. If the courts invalidate either auction, we could lose the licenses granted to us as a result of the auctions and would have no assurance of being able to reacquire the licenses in a subsequent re-auction. While we would likely receive a refund of the payments made to the FCC for the spectrum should either auction be overturned, we would not be reimbursed for time, money and efforts spent to clear the spectrum, expenses incurred to build systems operating on the spectrum, the interest expenses incurred by us prior to the refund, the losses associated with launching the markets on this spectrum, or the loss of revenue and profits associated with these markets. In addition, there could be a delay in us receiving a refund of our payments until the appeal is final. If the results of either auction were overturned and we receive a refund, the delay in the return of our money, the interest we would have incurred without reimbursement, the loss of any amounts spent to develop the licenses in the interim, which could be substantial, and the loss of the ability to provide service in the metropolitan areas covered by such licenses, may materially and adversely affect our business, financial condition and operating results.

Legal actions by the Copyright Office of the Library of Congress and by third parties may have an adverse effect on our distribution strategy.

Many carriers, including us, routinely place software locks on wireless handsets, which prevent a customer from using a wireless handset sold by one carrier on another carrier's system. The Copyright Office of the Library of Congress, or Copyright Office, has adopted an exemption that allows a person to circumvent such software locks and other firmware that enable wireless handsets to connect to a wireless telephone network when such circumvention is accomplished for the sole purpose of lawfully connecting the wireless handset to another wireless telephone network. Based in part on this exemption, we have implemented a flashing service which allows new customers to unlock their existing handsets and connect them to our network. The anti-circumvention exemption is due to expire in October 2009, is subject to review in pending proceedings before the Library of Congress, and may not be extended. In addition, one carrier has alleged that our flashing program infringes and dilutes their trademarks and service marks and that we are inducing the breach of their agreements with their customers. If a significant number of new customers are attracted to our service as a result of our flashing service and we are unable to continue such service, it could adversely affect our ability to continue to attract new customers to our service and could impose additional costs on us, which could have a material adverse effect on our business, financial condition and operating results. The unlocking rules also may allow customers who are dissatisfied with their current service to utilize the services of our competitors or us without having to purchase a new handset. The ability of our customers to leave our service and use their wireless handsets on other carriers' networks may have an adverse material impact on our business. In addition, since we provide a subsidy for handsets to our distribution partners that are incurred in advance, we may experience higher distribution costs resulting from wireless handsets not being activated or maintained on our network, which costs may be material, and which could have a material adverse effect on our business, financial condition and operating results.

General Matters***Our stock price has historically been and may continue to be volatile and you may lose all or some of your investment.***

The trading prices of the securities of telecommunications companies have been highly volatile. Accordingly, the trading price of our common stock has been, and is likely to be, subject to wide fluctuations. Our stock price may fluctuate in reaction to a number of events and factors that may include, among other things:

actual or anticipated fluctuations in our or our competitors' operating and financial results;

changes in, or our failure to meet, securities analysts' expectations;

entry of new competitors into our markets;

43

Table of Contents

introduction of new products and services by us or our competitors or changes in service plans or pricing by us or our competitors, including the introduction of unlimited fixed-rate plans by our competitors;

challenges to our intellectual property rights or claims that we infringe the intellectual property rights of others;

conditions and trends in the communications and high technology markets;

mergers, acquisitions, strategic alliances or significant agreements by us or by our competitors;

sales of our common stock by our directors, executive officers or affiliates or significant stockholders;

volatility in stock market prices and volumes, which is particularly common among securities of telecommunications companies;

the general state of the U.S. and world economies;

the announcement, commencement, bidding and closing of auctions for new spectrum or acquisitions of other businesses; and

recruitment or departure of key personnel.

In addition, in recent months, the stock market has experienced significant price and volume fluctuations. This volatility has had a significant impact on the trading price of securities issued by many companies, including companies in the telecommunications industry. The changes frequently occur irrespective of the operating performance of the affected companies. Hence, the trading price of our common stock could fluctuate based upon factors that have little or nothing to do with our business, financial condition and operating results.

Your ownership interest could be diluted by future issuances of shares that our Board has the authority to issue, and such future issuances or sales of such shares may adversely affect the market price of MetroPCS common stock.

We have registered all shares of common stock that we may issue under our stock option and performance award plans; thus, when we issue shares under these plans, the shares can be freely sold in the public market subject to any requirements under the Securities Act. We also have granted certain of our stockholders the right to require us to register their shares of our common stock. If we propose to register any additional securities under the Securities Act, either for our own account or for the account of security holders exercising registration rights, the number of shares subject to registration could increase and your interest could be significantly diluted and the sale of these shares may have a negative impact on the market price for our common stock. Further, the sale of a substantial amount of our common stock, or the possibility of such a sale, including sales by significant stockholders or executives of the Company, may reduce the market price of our common stock and could impede our ability to raise future capital through the issuance of equity securities at a time and at a price we deem appropriate.

If we fail to manage our planned growth effectively and maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud.

We have experienced rapid growth and development in a relatively short period of time and expect to continue to experience substantial growth in the future. Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. Because of inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies and procedures may deteriorate. Previously, we failed to adequately implement financial controls and management systems. We publicly acknowledged deficiencies in our financial reporting as early as August 2004, and have made changes in our controls and systems that are designed to address these deficiencies. Our expected growth will also require stringent control of costs, diligent management of our network infrastructure and our growth, increased capital requirements, increased costs associated with marketing activities, the ability to attract and retain

qualified management, technical and sales personnel and the training and management of new personnel, and the design and implementation of financial and management controls. Our

Table of Contents

growth will challenge the capacity and abilities of existing employees and future employees at all levels of our business and the controls and systems we have implemented. Failure to successfully manage our expected growth and development could have a material adverse effect on our business, increase our costs and adversely affect our level of service and inadequate internal controls could also cause investors to lose confidence in our reported financial information which could have a negative effect on the trading price of our stock.

The value of our FCC licenses may drop in the future as a result of volatility in the marketplace and the sale of additional spectrum by the FCC.

The market value of FCC licenses has been subject to significant volatility in the past and the value of our licenses may continue to fluctuate as the FCC continues to auction, and make available through regulatory flexibility, additional substantial amounts of spectrum. The impact of these future actions and auctions on license values is uncertain. There can be no assurance of the market value of our FCC licenses or that the market value of our FCC licenses will not be volatile in the future. If the value of our licenses was to decline significantly, we could be forced to record non-cash impairment charges which could impact our ability to borrow additional funds. A significant impairment loss could have a material adverse effect on our operating income and on the carrying value of our licenses on our balance sheet.

Declines in our operating performance could ultimately result in an impairment of our indefinite-lived assets, including FCC licenses, or our long-lived assets, including property and equipment.

We assess potential impairments to our long-lived assets, including property and equipment and certain intangible assets, when there is evidence that events or changes in circumstances indicate that the carrying value may not be recoverable. We assess potential impairments to indefinite-lived intangible assets, including FCC licenses, annually and when there is evidence that events or changes in circumstances indicate that an impairment condition may exist. If we do not achieve our planned operating results, this may ultimately result in a non-cash impairment charge related to our long-lived and/or our indefinite-lived intangible assets. A significant impairment loss could have a material adverse effect on our operating results and on the carrying value of our FCC licenses and/or our long-lived assets on our balance sheet.

We may be unable to service our debt and to refinance our indebtedness before maturity.

Our ability to meet our existing or future debt obligations and to reduce our indebtedness will depend on our future performance and the other cash requirements of our business. Our performance, to a certain extent, is subject to general economic conditions, financial, competitive, business, political, regulatory and other factors that are beyond our control. In addition, our ability to borrow funds in the future to make payment on our debt will depend on the satisfaction of covenants in our senior secured credit facility, the indentures governing our senior notes, other debt agreements and other agreements we may enter into in the future. Specifically, we will need to maintain certain financial ratios and satisfy financial condition tests. We cannot assure you that we will continue to generate sufficient cash flow from operations at or above current levels or that future borrowings will be available to us under our senior secured credit facility or from other sources in an amount sufficient to enable us to repay all of our indebtedness timely. As a result, we believe we may need to refinance all or a portion of our remaining existing indebtedness prior to its maturity. Disruptions in the financial markets could make it more difficult to obtain debt or equity financing on reasonable terms or at all. We cannot assure you that we will be able to service our debt or refinance any or all of our indebtedness on favorable or commercially reasonable terms, or at all.

Our senior secured credit facility and the indentures governing our senior notes include restrictive covenants that limit our operating flexibility.

Our senior secured credit facility and indentures governing our senior notes impose material operating and financial restrictions on us. These restrictions, subject in certain cases to ordinary course of business and other exceptions, may limit our ability to engage in some transactions, including the following:

incurring additional debt;

paying dividends, redeeming capital stock or making other restricted payments or investments;

selling or buying assets, properties or licenses;

developing assets, properties or licenses which we have or in the future may procure;

45

Table of Contents

creating liens on assets;

participating in future FCC auctions of spectrum or private sales of spectrum or purchasing businesses;

merging, consolidating or disposing of assets;

entering into transactions with affiliates; and

placing restrictions on the ability of subsidiaries (other than Royal Street and its subsidiaries) to pay dividends or make other payments.

Under the senior secured credit facility, we are also subject to financial maintenance covenants with respect to our senior secured leverage and in certain circumstances total maximum consolidated leverage and certain minimum fixed charge coverage ratios. These restrictions could limit our ability to obtain debt financing, repurchase stock, refinance or pay principal on our outstanding debt, complete acquisitions for cash or debt or react to changes in our operating environment or the economy. Any future debt that we incur may contain similar or more restrictive covenants.

Any failure to comply with the restrictions of the senior secured credit facility or the indentures governing our senior notes, or certain current and any subsequent financing agreements may result in an event of default under these agreements, which in turn may result in defaults or acceleration of obligations under these agreements and other agreements, giving our lenders the right to terminate any commitments they had made to provide us with further funds and to require us to repay all amounts then outstanding.

Our substantial indebtedness could adversely affect our business, financial condition and operating results and our senior creditors would have a prior secured claim to any collateral securing the debt owed to them.

Our ability to make payments on our debt and to fund operations and significant planned capital expenditures will depend on our ability to generate cash in the future. Our substantial debt service obligations could have important material consequences to you, including the following:

limiting our ability to borrow money or sell stock to fund working capital, capital expenditures, debt service requirements, acquisitions, technological initiatives and other general corporate purposes;

making it more difficult for us to make payments on our indebtedness;

increasing our vulnerability to general economic and industry conditions;

limiting our flexibility in planning for, or reacting to, changes in our business or the telecommunications industry;

limiting our ability to increase our capital expenditures to roll out new services;

limiting our ability to purchase additional spectrum or develop new metropolitan areas in the future;

reducing the amount of cash available for working capital needs, capital expenditures for existing and new markets and other corporate purposes by requiring us to dedicate a substantial portion of our cash flow from operations to the payment of principal of, and interest on, our indebtedness; and

placing us at a competitive disadvantage to our competitors who are less leveraged than we are.

Any of these risks could impair our ability to fund our operations or limit our ability to expand our business as planned, which could have a material adverse effect on our business, financial condition, and operating results.

Further, although we have substantial indebtedness, we may still be able to incur significantly more debt as market conditions permit, which could further reduce the cash we have available to invest in our operations, as a result of our increased debt service obligations. The terms of the agreements governing our long-term indebtedness, subject to specified limitations, allow for the incurrence of additional indebtedness by us and our subsidiaries. In

Table of Contents

addition, funding remains available under the revolving credit facility portion of the senior secured credit facility. The more leveraged we become, the more we, and in turn the holders of our securities, become exposed to the risks described above. Additionally, the secured creditors received a pledge of all of the equity of MetroPCS Wireless, Inc., or Wireless, and of its existing and future direct and indirect subsidiaries, where most of our assets and all of our operations and business results are generated and generally have a lien on all of the assets of Wireless and these subsidiaries.

Settlements, judgments, restraints on our current or future manner of doing business or legal costs resulting from pending or future litigation could have an adverse effect on our business, financial condition, and operating results.

We are regularly involved in a number of legal proceedings before various state and federal courts and the FCC. Such legal proceedings can be complex, costly, protracted and highly disruptive to business operations by diverting the attention and energies of management and other key personnel. Also, changes in the law or legal interpretations can affect the outcome of existing rules. The assessment of the outcome of legal proceedings, including our potential liability, if any, is a highly subjective process that requires judgments about future events which are not within our control. The outcome of litigation, including amounts ultimately received or paid upon settlement or other resolution of litigation and other contingencies may differ materially from amounts accrued in the financial statements. In addition, litigation or similar proceedings could impose restraints on our current or future manner of doing business. Such potential outcomes could have a material adverse effect on our business financial condition, of operating results, or ability to do business.

We are currently controlled by a limited number of stockholders, and their interests may be different from yours.

A certain portion of the voting power of our capital stock is concentrated in the hands of a few shareholders some of which are members of our board of directors. As a result, if such persons act together, they may have the ability to significantly influence whether required consents can be obtained and may have substantial control over all matters submitted to our stockholders for approval, including the election and removal of directors, changes in our capital structure, governance, shareholder approvals and the approval of any merger, consolidation or sales of all or substantially all of our assets. These stockholders may have different interests than the other holders of our common stock and may make decisions that are adverse to your interests.

Our stockholder rights plan could prevent a change in control of our Company in instances in which some stockholders may believe a change in control is in their best interests.

We have a stockholder rights plan, or Rights Plan. Pursuant to the Rights Plan, we have issued to our stockholders one preferred stock purchase right for each outstanding share of our common stock as of March 27, 2007. Each right, when exercisable, will entitle its holder to purchase from us a unit consisting of one one-thousandth of a share of series A junior participating preferred stock at \$66.67 per share. Our Rights Plan is intended to protect stockholders in the event of an unfair or coercive offer to acquire our Company and to provide our board of directors with adequate time to evaluate unsolicited offers. The Rights Plan may prevent or make takeovers or unsolicited corporate transactions more difficult. The Rights Plan will cause substantial dilution to a person or group that attempts to acquire us on terms that our board of directors does not believe are in our best interests and those of our stockholders and may discourage, delay or prevent a merger or acquisition that stockholders may consider favorable, including transactions in which stockholders might otherwise receive a premium for their shares.

Conflicts of interest may arise because some of our directors are principals of our stockholders, and we have waived our rights to certain corporate opportunities.

Our board of directors includes representatives of certain of our significant stockholders. Those stockholders and their respective affiliates may invest in entities that directly or indirectly compete with us, companies in which they are currently invested may already compete with us, or companies in which we transact business. As a result of these relationships, when conflicts between the interests of those stockholders or their respective affiliates and the interests of our other stockholders arise, these directors may not be disinterested. Under Delaware law, transactions that we enter into in which a director or officer has a conflict of interest are generally permissible so long as (1) the material facts relating to the director's or officer's relationship or interest as to the transaction are disclosed to our board of directors and a majority of our disinterested directors approves the transaction, (2) the material facts relating to the

director's or officer's relationship or interest as to the transaction are disclosed to our stockholders

Table of Contents

and a majority of our disinterested stockholders approves the transaction, or (3) the transaction is otherwise fair to us. Also, pursuant to the terms of our certificate of incorporation, our non-employee directors are not required to offer us any corporate opportunity of which they become aware and could take any such opportunity for themselves or offer it to other companies in which they have an investment, unless such opportunity is expressly offered to them in their capacity as a director of our Company.

Our certificate of incorporation, bylaws and Delaware corporate law contain provisions which could delay or prevent a change in control even if the change in control would be beneficial to our stockholders.

Delaware law, as well as our certificate of incorporation and bylaws, contains provisions that could delay or prevent a change in control of our Company, even if it were beneficial to our stockholders to do so. These provisions also could limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions:

authorize the issuance of preferred stock that can be created and issued by the board of directors without prior stockholder approval to increase the number of outstanding shares and deter or prevent a takeover attempt;

prohibit stockholder action by written consent, requiring all stockholder actions to be taken at a meeting of our stockholders;

require stockholder meetings to be called only by the President or at the written request of a majority of the directors then in office and not the stockholders;

prohibit cumulative voting in the election of directors, which would otherwise allow less than a majority of stockholders to elect director candidates;

provide that our board of directors is divided into three classes, each serving three-year terms; and

establish advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon by stockholders at stockholder meetings.

In addition, Section 203 of the Delaware General Corporation Law imposes restrictions on business combinations such as mergers between us and a holder of 15% or more of our voting stock. See Description of Capital Stock Anti-Takeover Effects of Delaware Law and Our Restated Certificate of Incorporation and Restated Bylaws.

Any of the foregoing events or other events could cause revenues, customer additions, operating income, capital expenditures and other financial or statistical information to vary from our forward-looking estimates by a material amount.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We currently maintain our executive offices in Richardson, Texas, and regional offices in Alameda, California; Folsom, California; Irvine, California; Norcross, Georgia; Plano, Texas; Livonia, Michigan; Sunrise, Florida; Tampa, Florida; Orlando, Florida; Las Vegas, Nevada; Chelmsford, Massachusetts; Hawthorne, New York; and Ft. Washington, Pennsylvania. As of December 31, 2008, we also operated 127 retail stores throughout our metropolitan areas. Our executive offices, all of our regional offices, switch sites, retail stores and virtually all of our cell sites are leased from unaffiliated third parties. We believe these properties, which are being used for their intended purposes, are adequate and well-maintained.

Table of Contents**Item 3. Legal Proceedings**

We are involved in litigation from time to time, including litigation regarding intellectual property claims that we consider to be in the normal course of business. We are not currently party to any pending legal proceedings that we believe would, individually or in the aggregate, have a material adverse effect on our financial condition, cash flows or results of operations.

Item 4. Submission of Matters to a Vote of Security Holders

None.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market Information**

Our common stock began trading on April 19, 2007 on the New York Stock Exchange under the symbol PCS. Prior to April 19, 2007, there was no established public trading market for our common stock. The following table sets forth for the periods indicated the high and low composite per share prices as reported by the New York Stock Exchange.

	High	Low
Fiscal year ended December 31, 2007		
Second quarter	\$36.68	\$27.40
Third quarter	40.33	24.15
Fourth quarter	27.85	15.10
Fiscal year ended December 31, 2008		
First quarter	\$18.72	\$14.50
Second quarter	21.83	17.08
Third quarter	17.92	12.98
Fourth quarter	15.98	10.71

Holders

As of January 30, 2009, the closing price of our common stock was \$13.59 per share, there were 350,999,607 shares of our common stock outstanding, and there were over 18,000 holders of record of our common stock.

Dividends

We have never paid or declared any regular cash dividends on our common stock and do not intend to declare or pay regular cash dividends on our common stock in the foreseeable future. The terms of our senior secured credit facility and the indentures related to our 9¹/₄% senior notes restrict our ability to declare or pay dividends. We currently intend to retain future earnings, if any, to invest in our business. Subject to Delaware law, our board of directors will determine the payment of future dividends on our common stock, if any, and the amount of any dividends in light of:

any applicable contractual restrictions limiting our ability to pay dividends;

our earnings and cash flows;

our capital requirements;

our future needs for cash;

our financial condition; and

other factors our board of directors deems relevant.

Table of Contents**Equity Compensation Plan Information**

The following table provides information as of December 31, 2008 with respect to shares of MetroPCS Communications common stock issuable under our equity compensation plans.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans
Equity Compensation Plans Approved by Stockholders (1)	30,677,588	\$ 13.21	13,552,419
Equity Compensation Plans Not Approved by Stockholders			
Total	30,677,588	\$ 13.21	13,552,419

(1) Consists of the Second Amended and Restated 1995 Stock Option Plan of MetroPCS, Inc., as amended, and the Amended and Restated MetroPCS Communications, Inc. 2004 Equity Incentive Compensation Plan.

Non-Employee Director Remuneration Plan

Non-employee members of our board of directors are eligible to participate in our non-employee director remuneration plan under which such directors receive compensation for serving on the board of directors. In 2008, the Compensation Committee of the Board of Directors amended and restated the Remuneration Plan (the 2008 Remuneration Plan) to be more competitive with the market and to be more reflective of the Company's status as a public company. As of December 31, 2008, compensation to be paid pursuant to the 2008 Remuneration Plan to non-employee directors of our Company included annual retainers, stock options, board meeting fees, and committee paid event fees.

Recent Sales of Unregistered Securities

None.

Issuer Purchases of Equity Securities

We did not repurchase any equity securities during the period covered by this report.

Table of Contents**Item 6. Selected Financial Data**

The following tables set forth selected consolidated financial data. We derived our selected consolidated financial data as of and for the years ended December 31, 2004, 2005, 2006, 2007 and 2008 from our consolidated financial statements. The historical selected financial data may not be indicative of future performance and should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and Risk Factors in this report.

(1) See Note 19 to the consolidated financial statements included elsewhere in this report for an explanation of the calculation of basic and diluted net income per common share. The calculation of basic and diluted net income per common share for the years ended December 31, 2004 and 2005 is not included in Note 19 to the consolidated financial statements.

Table of Contents**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations****Company Overview**

Except as expressly stated, the financial condition and results of operations discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations are those of MetroPCS Communications, Inc. and its consolidated subsidiaries, including MetroPCS Wireless, Inc. and Royal Street Communications, LLC. References to MetroPCS, MetroPCS Communications, our Company, the Company, we, our, ours and us refer to MetroPCS Communications, Inc., a Delaware corporation, and its wholly-owned subsidiaries. Unless otherwise indicated, all share numbers and per share prices give effect to a 3 for 1 stock split effected by means of a stock dividend of two shares of common stock for each share of common stock issued and outstanding at the close of business on March 14, 2007. On April 18, 2007, the registration statement for our initial public offering became effective and our common stock began trading on the New York Stock Exchange under the symbol PCS on April 19, 2007. We consummated our initial public offering of our common stock on April 24, 2007.

We are a wireless telecommunications carrier that currently offers wireless services primarily in the greater Atlanta, Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, Miami, New York, Orlando/Jacksonville, Philadelphia, San Francisco, Sacramento and Tampa/Sarasota metropolitan areas. We launched service in the greater Atlanta, Miami and Sacramento metropolitan areas in the first quarter of 2002; in San Francisco in September 2002; in Tampa/Sarasota in October 2005; in Dallas/Ft. Worth in March 2006; in Detroit in April 2006; in Orlando in November 2006; in Los Angeles in September 2007; in Las Vegas in March 2008; in Jacksonville in April 2008; in Philadelphia in July 2008; and in New York and Boston in February 2009. In 2005, Royal Street Communications, LLC, or Royal Street Communications, and with its wholly-owned subsidiaries, or collectively, Royal Street, was granted licenses by the Federal Communications Commission, or FCC, in Los Angeles and various metropolitan areas throughout northern Florida. We own 85% of the limited liability company member interests in Royal Street Communications, but may only elect two of the five members of Royal Street Communications' management committee. We have a wholesale arrangement with Royal Street under which we purchase up to 85% of the engineered capacity of Royal Street's systems allowing us to sell our standard products and services under the MetroPCS brand to the public. Royal Street has constructed, or is in the process of constructing, its network infrastructure in its licensed metropolitan areas. We commenced commercial services in Orlando and certain portions of northern Florida in November 2006 and in Los Angeles in September 2007 through our arrangements with Royal Street. Additionally, upon Royal Street's request, we have provided and will provide financing to Royal Street under a loan agreement. As of December 31, 2008, the maximum amount that Royal Street could borrow from us under the loan agreement was approximately \$1.0 billion of which Royal Street had net outstanding borrowings of \$905.0 million through December 31, 2008. On February 17, 2009, we executed an amendment to the loan agreement which increased the amount available to Royal Street under the loan agreement by an additional \$550.0 million. Royal Street has incurred an additional \$14.2 million in net borrowings through February 23, 2009.

As a result of the significant growth we have experienced since we launched operations, our results of operations to date are not necessarily indicative of the results that can be expected in future periods. Moreover, we expect that our number of customers will continue to increase, which will continue to contribute to increases in our revenues and operating expenses. We currently plan to focus on building out networks to cover approximately 40 million of total population during 2009-2010 including the launch of the Boston and New York metropolitan areas in February 2009.

We sell products and services to customers through our Company-owned retail stores as well as indirectly through relationships with independent retailers. We offer service which allows our customers to place unlimited local calls from within our local service area and to receive unlimited calls from any area while in our local service area, under simple and affordable flat monthly rate service plans starting at \$30 per month. For an additional \$5 to \$20 per month, our customers may select a service plan that offers additional services, such as unlimited voicemail, caller ID, call waiting, enhanced directory assistance, unlimited text messaging, mobile Internet browsing, push e-mail, social networking services, location based services, mobile instant messaging, picture and multimedia messaging and the ability to place unlimited long distance calls from within our local service calling area to any number in the continental United States. We offer flat-rate monthly plans at \$30, \$35, \$40, \$45 and \$50, as well as Family Plans which offer discounts to our monthly plans for multiple lines. All of these plans require payment in advance for one

month of service. If no payment is made in advance for the following month of service, service is suspended at the end of the month that was paid for by the customer and terminated if the customer does not pay within thirty days. For additional fees, we also provide international long distance and international text messaging,

Table of Contents

ringtones, ring back tones, downloads, games and content applications, unlimited directory assistance, location services and other value-added services. As of December 31, 2008, approximately 80% of our customers have selected a \$40 or higher rate plan. Our flat-rate plans differentiate our service from the more complex plans and long-term contract requirements of traditional wireless carriers. In addition, the above products and services are offered by us in the Royal Street markets under the MetroPCS brand.

Critical Accounting Policies and Estimates

On January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards, or SFAS, No. 157, *Fair Value Measurements*, or SFAS No. 157, for financial assets and liabilities. SFAS No. 157 defines fair value, thereby eliminating inconsistencies in guidance found in various prior accounting pronouncements, and increases disclosures surrounding fair value calculations. SFAS No. 157 establishes a three-tiered fair value hierarchy that prioritizes inputs to valuation techniques used in fair value calculations. SFAS No. 157 requires us to maximize the use of observable inputs and minimize the use of unobservable inputs. If a financial instrument uses inputs that fall in different levels of the hierarchy, the instrument will be categorized based upon the lowest level of input that is significant to the fair value calculation.

The following discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP. You should read this discussion and analysis in conjunction with our consolidated financial statements and the related notes thereto contained elsewhere in this report. The preparation of financial statements in conformity with GAAP requires us to make estimates and assumptions that affect the reported amounts of certain assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of the financial statements. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

Revenue Recognition

Our wireless services are provided on a month-to-month basis and are paid in advance. We recognize revenues from wireless services as they are rendered. Amounts received in advance are recorded as deferred revenue. Suspending service for non-payment is known as hotlining. We do not recognize revenue on hotlined customers.

Revenues and related costs from the sale of accessories are recognized at the point of sale. The cost of handsets sold to indirect retailers are included in deferred charges until they are sold to and activated by customers. Amounts billed to indirect retailers for handsets are recorded as accounts receivable and deferred revenue upon shipment by us and are recognized as equipment revenues when service is activated by customers.

Our customers have the right to return handsets within a specified time or within a certain amount of use, whichever occurs first. We record an estimate for returns as contra-revenue at the time of recognizing revenue. Our assessment of estimated returns is based on historical return rates. If our customers' actual returns are not consistent with our estimates of their returns, revenues may be different than initially recorded.

We follow the provisions of Emerging Issues Task Force or EITF, No. 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables*, or EITF No. 00-21. EITF No. 00-21, addresses the accounting for arrangements that involve the delivery or performance of multiple products, services and/or rights to use assets. Revenue arrangements with multiple deliverables are divided into separate units of accounting and the consideration received is allocated among the separate units of accounting using the residual method of accounting.

We determined that the sale of wireless services through our direct and indirect sales channels with an accompanying handset constitutes revenue arrangements with multiple deliverables. In accordance with EITF No. 00-21, we divide these arrangements into separate units of accounting and allocate the consideration between the handset and the wireless service using the residual method of accounting. Consideration received for the wireless service is recognized at fair value as service revenue when earned, and any remaining consideration received is recognized as equipment revenue when the handset is delivered and accepted by the customer.

Table of Contents***Allowance for Uncollectible Accounts Receivable***

We maintain allowances for uncollectible accounts for estimated losses resulting from the inability of our independent retailers to pay for equipment purchases and for amounts estimated to be uncollectible for intercarrier compensation. We estimate allowances for uncollectible accounts from independent retailers based on the length of time the receivables are past due, the current business environment and our historical experience. If the financial condition of a material portion of our independent retailers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. In circumstances where we are aware of a specific carrier's inability to meet its financial obligations to us, we record a specific allowance for intercarrier compensation against amounts due; to reduce the net recognized receivable to the amount we reasonably believe will be collected. Total allowance for uncollectible accounts receivable as of December 31, 2008 was approximately 12% of the total amount of gross accounts receivable.

Inventories

We write down our inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value or replacement cost based upon assumptions about future demand and market conditions. Total inventory reserves for obsolescent and unmarketable inventory were not significant as of December 31, 2008. If actual market conditions are less favorable than those projected, additional inventory write-downs may be required.

Deferred Income Tax Asset and Other Tax Reserves

We assess our deferred tax asset and record a valuation allowance, when necessary, to reduce our deferred tax asset to the amount that is more likely than not to be realized. We have considered future taxable income, taxable temporary differences and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. Should we determine that we would not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset would be charged to earnings in the period we made that determination.

We establish reserves when, despite our belief that our tax returns are fully supportable, we believe that certain positions may be challenged and ultimately modified. We adjust the reserves in light of changing facts and circumstances. Our effective tax rate includes the impact of income tax related reserve positions and changes to income tax reserves that we consider appropriate. A number of years may elapse before a particular matter for which we have established a reserve is finally resolved. Unfavorable settlement of any particular issue may require the use of cash or a reduction in our net operating loss carryforwards. Favorable resolution would be recognized as a reduction to the effective rate in the year of resolution. Tax reserves as of December 31, 2008 were \$37.6 million of which \$5.2 million and \$32.4 million are presented on the consolidated balance sheet in accounts payable and accrued expenses and other long-term liabilities, respectively.

On January 1, 2007, we adopted FASB Interpretation No. 48 *Accounting for Uncertainty in Income Taxes*, or FIN 48. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with SFAS No. 109. FIN 48 provides guidance on the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition. FIN 48 requires significant judgment in determining what constitutes an individual tax position as well as assessing the outcome of each tax position. Changes in judgment as to recognition or measurement of tax positions can materially affect the estimate of the effective tax rate and consequently, affect our operating results.

Property and Equipment

Depreciation on property and equipment is applied using the straight-line method over the estimated useful lives of the assets once the assets are placed in service, which are seven to ten years for network infrastructure assets, three to ten years for capitalized interest, three to seven years for office equipment, which includes computer equipment, three to seven years for furniture and fixtures and five years for vehicles. Leasehold improvements are amortized over the shorter of the remaining term of the lease and any renewal periods reasonably assured or the estimated useful life of the improvement, whichever is shorter. The estimated life of property and equipment is based on historical experience with similar assets, as well as taking into account anticipated technological or other changes. If technological changes were to occur more rapidly than anticipated or in a different form than anticipated, the useful lives assigned to these

assets may need to be shortened, resulting in the recognition of increased

Table of Contents

depreciation expense in future periods. Likewise, if the anticipated technological or other changes occur more slowly than anticipated, the life of the assets could be extended based on the life assigned to new assets added to property and equipment. This could result in a reduction of depreciation expense in future periods.

We assess the impairment of long-lived assets whenever events or changes in circumstances indicate the carrying value may not be recoverable. Factors we consider important that could trigger an impairment review include significant underperformance relative to historical or projected future operating results or significant changes in the manner of use of the assets or in the strategy for our overall business. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. When we determine that the carrying value of a long-lived asset is not recoverable, we measure any impairment based upon a projected discounted cash flow method using a discount rate we determine to be commensurate with the risk involved and would be recorded as a reduction in the carrying value of the related asset and charged to results of operations. If actual results are not consistent with our assumptions and estimates, we may be exposed to an additional impairment charge associated with long-lived assets. The carrying value of property and equipment was approximately \$2.8 billion as of December 31, 2008.

Long-Term Investments

We account for our investment securities in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. At December 31, 2008, all of the Company's long-term investment securities were reported at fair value. Due to the lack of availability of observable market quotes on our investment portfolio of auction rate securities, the fair value was estimated based on valuation models that rely exclusively on unobservable inputs including those that are based on expected cash flow streams and collateral values, including assessments of counterparty credit quality, default risk underlying the security, discount rates and overall capital market liquidity. See Note 10 to the consolidated financial statements included elsewhere in this report.

Declines in fair value that are considered other-than-temporary are charged to earnings and those that are considered temporary are reported as a component of other comprehensive income in stockholders' equity. The Company has recorded an impairment charge of \$30.9 million during the year ended December 31, 2008, reflecting the portion of the auction rate security holdings that the Company has concluded have an other-than-temporary decline in value.

The valuation of the Company's investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact the Company's valuation include changes to credit ratings of the securities as well as the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral values, discount rates, counterparty risk and ongoing strength and quality of market credit and liquidity. The estimated market value of the Company's auction rate security holdings at December 31, 2008 was approximately \$6.0 million.

With the continuing liquidity issues experienced in the global credit and capital markets, the auction rate securities held by the Company at December 31, 2008 continued to experience failed auctions as the amount of securities submitted for sale in the auctions exceeded the amount of purchase orders. In addition, all of the auction rate securities held by the Company have been downgraded or placed on credit watch. The Company may incur additional impairments to its auction rate securities which may be up to the full remaining value of such auction rate securities.

FCC Licenses and Microwave Relocation Costs

We operate wireless broadband mobile networks under licenses granted by the FCC for a particular geographic area on spectrum allocated by the FCC for terrestrial wireless broadband mobile services. In November 2006, we acquired a number of AWS licenses which can be used to provide wireless broadband mobile services comparable to the PCS services provided by us, as well as other advanced wireless services. In June 2008, we acquired a 700 MHz license that also can be used to provide similar services. The PCS licenses previously included, and the AWS licenses currently include, the obligation to relocate existing fixed microwave users of our licensed spectrum if the use of our spectrum interfered with their systems and/or reimburse other carriers (according to FCC rules) that relocated prior users if the relocation benefits our system. Additionally, we incurred costs related to microwave relocation in constructing our PCS and AWS networks. The PCS, AWS and 700 MHz licenses and microwave relocation costs are recorded at cost. Although FCC licenses are issued with a stated term, ten years in the case of PCS licenses, fifteen years in the case of AWS licenses and approximately 10.5 years for 700 MHz licenses, the

Table of Contents

renewal of PCS, AWS and 700 MHz licenses is generally a routine matter without substantial cost and we have determined that no legal, regulatory, contractual, competitive, economic, or other factors currently exist that limit the useful life of our PCS, AWS and 700 MHz licenses. The carrying value of FCC licenses and microwave relocation costs was approximately \$2.4 billion as of December 31, 2008.

Our primary indefinite-lived intangible assets are our FCC licenses. Based on the requirements of SFAS No. 142, *Goodwill and other Intangible Assets*, or SFAS No. 142, we test investments in our FCC licenses for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value of our FCC licenses might be impaired. We perform our annual FCC license impairment test as of each September 30th. The impairment test consists of a comparison of the estimated fair value with the carrying value. We estimate the fair value of our FCC licenses using a discounted cash flow model. Cash flow projections and assumptions, although subject to a degree of uncertainty, are based on a combination of our historical performance and trends, our business plans and management's estimate of future performance, giving consideration to existing and anticipated competitive economic conditions. Other assumptions include our weighted average cost of capital and long-term rate of growth for our business. We believe that our estimates are consistent with assumptions that marketplace participants would use to estimate fair value. We corroborate our determination of fair value of the FCC licenses, using the discounted cash flow approach described above, with other market-based valuation metrics. Furthermore, we segregate our FCC licenses by regional clusters for the purpose of performing the impairment test because each geographical region is unique. An impairment loss would be recorded as a reduction in the carrying value of the related indefinite-lived intangible asset and charged to results of operations. Historically, we have not experienced significant negative variations between our assumptions and estimates when compared to actual results. However, if actual results are not consistent with our assumptions and estimates, we may be required to record an impairment charge associated with indefinite-lived intangible assets. Although we do not expect our estimates or assumptions to change significantly in the future, the use of different estimates or assumptions within our discounted cash flow model when determining the fair value of our FCC licenses or using a methodology other than a discounted cash flow model could result in different values for our FCC licenses and may affect any related impairment charge. The most significant assumptions within our discounted cash flow model are the discount rate, our projected growth rate and management's future business plans. A change in management's future business plans or disposition of one or more FCC licenses could result in the requirement to test certain other FCC licenses. If any legal, regulatory, contractual, competitive, economic or other factors were to limit the useful lives of our indefinite-lived FCC licenses, we would be required to test these intangible assets for impairment in accordance with SFAS No. 142 and amortize the intangible asset over its remaining useful life.

For the license impairment test performed as of September 30, 2008, the fair value of the FCC licenses was in excess of their carrying value. There have been no indicators of impairment and no impairment has been recognized through December 31, 2008.

Share-Based Payments

We account for share-based awards exchanged for employee services in accordance with SFAS No. 123(R), *Share-Based Payment*, or SFAS No. 123(R). Under SFAS No. 123(R), share-based compensation cost is measured at the grant date, based on the estimated fair value of the award, and is recognized as expense over the employee's requisite service period.

We have granted nonqualified stock options. Most of our stock option awards include a service condition that relates only to vesting. The stock option awards generally vest in one to four years from the grant date. Compensation expense is amortized on a straight-line basis over the requisite service period for the entire award, which is generally the maximum vesting period of the award.

The determination of the fair value of stock options using an option-pricing model is affected by our common stock valuation as well as assumptions regarding a number of complex and subjective variables. Prior to our initial public offering, factors that our Board of Directors considered in determining the fair market value of our common stock, included the recommendation of our finance and planning committee and of management based on certain data, including discounted cash flow analysis, comparable company analysis and comparable transaction analysis, as well as contemporaneous valuation reports. After our initial public offering, the Board of Directors uses the closing price of

our common stock on the date of grant as the fair market value for our common stock. The volatility assumption is based on a combination of the historical volatility of our common stock and the volatilities of similar companies over a period of time equal to the expected term of the stock options. The volatilities of similar companies are used in conjunction with our historical volatility because of the lack of sufficient relevant history equal to the expected term. The expected term of employee stock options represents the weighted-average period the

Table of Contents

stock options are expected to remain outstanding. The expected term assumption is estimated based primarily on the stock options vesting terms and remaining contractual life and employees expected exercise and post-vesting employment termination behavior. The risk-free interest rate assumption is based upon observed interest rates on the grant date appropriate for the term of the employee stock options. The dividend yield assumption is based on the expectation of no future dividend payouts by us.

As share-based compensation expense under SFAS No. 123(R) is based on awards ultimately expected to vest, it is reduced for estimated forfeitures. SFAS No. 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. We recognized stock-based compensation expense of approximately \$41.1 million, \$28.0 million and \$14.5 million for the years ended December 31, 2008, 2007 and 2006, respectively.

The value of the options is determined by using a Black-Scholes pricing model that includes the following variables: 1) exercise price of the instrument, 2) fair market value of the underlying stock on date of grant, 3) expected life, 4) estimated volatility and 5) the risk-free interest rate. We utilized the following weighted-average assumptions in estimating the fair value of the options grants for the years ended December 31, 2008 and 2007:

	December 31, 2008	December 31, 2007
Expected dividends	0.00%	0.00%
Expected volatility	45.20%	42.69%
Risk-free interest rate	2.49%	4.54%
Expected lives in years	5.00	5.00
Weighted-average fair value of options:		
Granted at below fair value	\$	\$
Granted at fair value	\$ 6.95	\$ 9.89
Weighted-average exercise price of options:		
Granted at below fair value	\$	\$
Granted at fair value	\$ 16.36	\$ 22.41

The Black-Scholes model requires the use of subjective assumptions including expectations of future dividends and stock price volatility. Such assumptions are only used for making the required fair value estimate and should not be considered as indicators of future dividend policy or stock price appreciation. Because changes in the subjective assumptions can materially affect the fair value estimate, and because employee stock options have characteristics significantly different from those of traded options, the use of the Black-Scholes option pricing model may not provide a reliable estimate of the fair value of employee stock options.

Compensation expense is recognized over the requisite service period for the entire award, which is generally the maximum vesting period of the award.

Customer Recognition and Disconnect Policies

When a new customer subscribes to our service, the first month of service is included with the handset purchase. Under GAAP, we are required to allocate the purchase price to the handset and to the wireless service revenue. Generally, the amount allocated to the handset will be less than our cost, and this difference is included in Cost Per Gross Addition, or CPGA. We recognize new customers as gross customer additions upon activation of service. We offer our customers the Metro Promise, which allows a customer to return a newly purchased handset for a full refund prior to the earlier of 30 days or 60 minutes of use. Customers who return their phones under the Metro Promise are reflected as a reduction to gross customer additions. Customers monthly service payments are due in advance every month. Our customers must pay their monthly service amount by the payment date or their service will be suspended, or hotlined, and the customer will not be able to make or receive calls on our network. However, a hotlined customer is still able to make E-911 calls in the event of an emergency. There is no service grace period. Any call attempted by a hotlined customer is routed directly to our interactive voice response system and customer service center in order to arrange payment. If the customer pays the amount due within 30 days of the original payment date then the customer

service is restored. If a hotlined customer does not pay the amount due within 30 days of the payment date the account is disconnected and counted as churn. Once an account is disconnected we charge a \$15 reconnect fee upon reactivation to reestablish service and the revenue associated with this fee is deferred and recognized over the estimated life of the customer.

Table of Contents

Revenues

We derive our revenues from the following sources:

Service. We sell wireless broadband mobile services. The various types of service revenues associated with wireless broadband mobile for our customers include monthly recurring charges for airtime, monthly recurring charges for optional features (including nationwide long distance, unlimited text messaging, international text messaging, voicemail, downloads, ringtones, games and content applications, unlimited directory assistance, enhanced directory assistance, ring back tones, mobile Internet browsing, mobile instant messaging, push e-mail and nationwide roaming) and charges for long distance service. Service revenues also include intercarrier compensation and nonrecurring reactivation service charges to customers.

Equipment. We sell wireless broadband mobile handsets and accessories that are used by our customers in connection with our wireless services. This equipment is also sold to our independent retailers to facilitate distribution to our customers.

Costs and Expenses

Our costs and expenses include:

Cost of Service. The major components of our cost of service are:

Cell Site Costs. We incur expenses for the rent of cell sites, network facilities, engineering operations, field technicians and related utility and maintenance charges.

Inter-carrier Compensation. We pay charges to other telecommunications companies for their transport and termination of calls originated by our customers and destined for customers of other networks. These variable charges are based on our customers' usage and generally applied at pre-negotiated rates with other carriers, although some carriers have sought to impose such charges unilaterally.

Variable Long Distance. We pay charges to other telecommunications companies for long distance service provided to our customers. These variable charges are based on our customers' usage, applied at pre-negotiated rates with the long distance carriers.

Cost of Equipment. Cost of equipment primarily includes the cost of handsets and accessories purchased from third-party vendors to resell to our customers and independent retailers in connection with our services. We do not manufacture any of this equipment.

Selling, General and Administrative Expenses. Our selling expenses include advertising and promotional costs associated with marketing and selling to new customers and fixed charges such as retail store rent and retail associates salaries. General and administrative expenses include support functions including, technical operations, finance, accounting, human resources, information technology and legal services. We record stock-based compensation expense in cost of service and in selling, general and administrative expenses for expense associated with employee stock options, which is measured at the date of grant, based on the estimated fair value of the award.

Depreciation and Amortization. Depreciation is applied using the straight-line method over the estimated useful lives of the assets once the assets are placed in service, which are seven to ten years for network infrastructure assets, three to ten years for capitalized interest, three to seven years for office equipment, which includes computer equipment, three to seven years for furniture and fixtures and five years for vehicles. Leasehold improvements are amortized over the term of the respective leases, which includes renewal periods that are reasonably assured, or the estimated useful life of the improvement, whichever is shorter.

Interest Expense and Interest Income. Interest expense includes interest incurred on our borrowings, amortization of debt issuance costs and amortization of discounts and premiums on long-term debt. Interest income is earned primarily on our cash and cash equivalents.

Table of Contents

Income Taxes. For the year ended December 31, 2008, we paid no federal income taxes, whereas for the years ended December 31, 2007 and 2006, we paid approximately \$0.3 million and \$2.7 million, respectively, in federal income taxes. In addition, we have paid \$2.7 million, \$1.1 million and an immaterial amount of state income tax during the years ended December 31, 2008, 2007 and 2006, respectively.

Seasonality

Our customer activity is influenced by seasonal effects related to traditional retail selling periods and other factors that arise from our target customer base. Based on historical results, we generally expect net customer additions to be strongest in the first and fourth quarters. Softening of sales and increased customer turnover, or churn, in the second and third quarters of the year usually combine to result in fewer net customer additions. However, sales activity and churn can be strongly affected by the launch of new and surrounding metropolitan areas and promotional activity, which could reduce or outweigh certain seasonal effects.

Operating Segments

Operating segments are defined by SFAS No. 131 *Disclosure About Segments of an Enterprise and Related Information*, (SFAS No. 131), as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Our chief operating decision maker is the President, Chief Executive Officer and Chairman of the Board.

As of December 31, 2008, we had thirteen operating segments based on geographic region within the United States: Atlanta, Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, Miami, New York, Orlando/Jacksonville, Philadelphia, Sacramento, San Francisco, and Tampa/Sarasota. Each of these operating segments provide wireless broadband mobile voice and data services and products to customers in its service areas or is currently constructing a network in order to provide these services. These services include unlimited local and long distance calling, voicemail, caller ID, call waiting, enhanced directory assistance, text messaging, picture and multimedia messaging, domestic and international long distance, international text messaging, ringtones, games and content applications, unlimited directory assistance, ring back tones, nationwide roaming, mobile Internet browsing, mobile instant messaging, push e-mail, location based services, social networking services and other value-added services.

We aggregate our operating segments into two reportable segments: Core Markets and Expansion Markets.

Core Markets, which include Atlanta, Miami, Sacramento and San Francisco, are aggregated because they are reviewed on an aggregate basis by the chief operating decision maker, they are similar in respect to their

products and services, production processes, class of customer, method of distribution, and regulatory environment and currently exhibit similar financial performance and economic characteristics.

Expansion Markets, which include Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, New York, Orlando/Jacksonville, Philadelphia, and Tampa/Sarasota are aggregated because they are reviewed on an aggregate basis by the chief operating decision maker, they are similar in respect to their products and services, production processes, class of customer, method of distribution, and regulatory environment and have similar expected long-term financial performance and economic characteristics.

Table of Contents

General corporate overhead, which includes expenses such as corporate employee labor costs, rent and utilities, legal, accounting and auditing expenses, is allocated equally across all operating segments. Corporate marketing and advertising expenses are allocated equally to the operating segments, beginning in the period during which we launch service in that operating segment. Expenses associated with our national data center and national operations center are allocated based on the average number of customers in each operating segment. There are no transactions between reportable segments.

Interest and certain other expenses, interest income and income taxes are not allocated to the segments in the computation of segment operating profit for internal evaluation purposes.

Table of Contents

Service Revenues. Service revenues increased \$518.1 million, or approximately 27%, to \$2.4 billion for the year ended December 31, 2008 from \$1.9 billion for the year ended December 31, 2007. The increase is due to increases in Core Markets and Expansion Markets service revenues as follows:

Core Markets. Core Markets service revenues increased \$90.0 million, or 6%, to \$1.5 billion for the year ended December 31, 2008 from \$1.4 billion for the year ended December 31, 2007. The increase in service revenues is primarily attributable to net customer additions of approximately 328,000 customers for the year ended December 31, 2008, which accounted for approximately \$157.3 million of the Core Markets increase. This increase was partially offset by the higher participation in our Family Plans as well as reduced revenue from certain features included in our service plans that were previously provided a la carte, accounting for an approximately \$56.2 million decrease. In addition, consolidated pass through charges revenue increased \$40.9 million during the year ended December 31, 2008 compared to the same period in 2007. This increase is primarily attributable to a 35% increase in our consolidated customer base since December 31, 2007 and higher federal universal service fund, or FUSF, rates. Beginning on January 1, 2008, a portion of these revenues were allocated to the Expansion Markets in the amount of \$52.2 million resulting in a net decrease of \$11.3 million in the Core Markets for the year ended December 31, 2008 compared to the same period in 2007.

Expansion Markets. Expansion Markets service revenues increased \$428.1 million, or approximately 85%, to \$932.4 million for the year ended December 31, 2008 from \$504.3 million for the year ended December 31, 2007. The increase in service revenues is primarily attributable to net customer additions of approximately 1.1 million customers for the year ended December 31, 2008, which accounted for approximately \$417.4 million of the Expansion Markets increase. This increase was partially offset by the higher participation in our Family Plans as well as reduced revenue from certain features included in our service plans that were previously provided a la carte, accounting for an approximately \$46.3 million decrease. In addition, pass through charges revenue increased \$52.2 million during the year ended December 31, 2008 compared to the same period in 2007 due to the allocation of a portion of these revenues to the Expansion Markets beginning on January 1, 2008.

Equipment Revenues. Equipment revenues decreased \$2.3 million, or approximately 1%, to \$314.3 million for the year ended December 31, 2008 from \$316.6 million for the year ended December 31, 2007. The decrease is due primarily to a decrease in Core Markets equipment revenues, partially offset by an increase in Expansion Markets equipment revenues as follows:

Core Markets. Core Markets equipment revenues decreased \$34.1 million, or 15%, to \$186.3 million for the year ended December 31, 2008 from \$220.4 million for the year ended December 31, 2007. The decrease in equipment revenues is primarily attributable to a lower average price of handsets activated reducing equipment revenues by \$36.4 million, partially offset by an increase in upgrade handset sales to existing customers accounting for a \$1.7 million increase in equipment revenues.

Expansion Markets. Expansion Markets equipment revenues increased \$31.8 million, or 33%, to \$128.0 million for the year ended December 31, 2008 from \$96.2 million for the year ended December 31, 2007. The increase in equipment revenues is primarily attributable to an increase in gross customer additions which accounted for \$31.1 million of the Expansion Markets increase, coupled with an increase in upgrade handset sales to existing customers accounting for a \$26.0 million increase. These increases in equipment revenues were partially offset by a lower average price of handsets activated which accounted for a \$28.2 million decrease.

Cost of Service. Cost of service increased \$209.8 million, or approximately 32%, to \$857.3 million for the year ended December 31, 2008 from \$647.5 million for the year ended December 31, 2007. The increase is due primarily to an increase in Expansion Markets cost of service, partially offset by a decrease in Core Markets cost of service as follows:

Core Markets. Core Markets cost of service decreased \$1.4 million to \$437.8 million for the year ended December 31, 2008 from \$439.2 million for the year ended December 31, 2007. Core Markets cost of service

(excluding pass through charges) increased \$13.6 million, or 4%, to \$353.0 million for the year ended December 31, 2008 from \$339.4 million for the year ended December 31, 2007. The increase was primarily attributable to the 12% growth in our Core Markets customer base and the deployment of additional network infrastructure during the twelve months ended December 31, 2008. In addition, consolidated pass through

Table of Contents

charges increased \$37.1 million during the year ended December 31, 2008 compared to the same period in 2007. This increase is primarily attributable to a 35% increase in our consolidated customer base since December 31, 2007 and higher FUSF rates. On January 1, 2008, we began allocating a portion of these expenses to the Expansion Markets. The portion of the pass through charges that were allocated to the Expansion Markets during the year ended December 31, 2008 was \$52.1 million, resulting in a net decrease of \$15.0 million in the Core Markets for the year ended December 31, 2008 when compared to the same period in 2007.

Expansion Markets. Expansion Markets cost of service increased \$211.2 million, or 101%, to \$419.5 million for the year ended December 31, 2008 from \$208.3 million for the year ended December 31, 2007. Expansion Markets cost of service (excluding pass through charges) increased \$159.1 million, or approximately 77%, to \$364.8 million for the year ended December 31, 2008 from \$205.7 million for the year ended December 31, 2007. This increase was primarily attributable to the approximately 83% growth in our Expansion Markets customer base, coupled with expenses associated with the launch of service in new markets well as the build-out expenses related to the New York and Boston metropolitan areas. In addition, pass through charges increased approximately \$52.1 million during the year ended December 31, 2008 compared to the same period in 2007 due to the allocation of a portion of these expenses to the Expansion Markets beginning on January 1, 2008.

Cost of Equipment. Cost of equipment increased \$107.4 million, or 18%, to \$704.6 million for the year ended December 31, 2008 from \$597.2 million for the year ended December 31, 2007. The increase is due primarily to an increase in Expansion Markets cost of equipment, partially offset by a decrease in Core Markets cost of equipment as follows:

Core Markets. Core Markets cost of equipment decreased \$10.3 million, or approximately 3%, to \$374.8 million for the year ended December 31, 2008 from \$385.1 million for the year ended December 31, 2007. The decrease in Core Markets cost of equipment is primarily attributable to a lower average cost of handsets activated reducing cost of equipment by \$15.3 million, partially offset by an increase in upgrade handset sales to existing customer accounting for a \$2.1 million increase.

Expansion Markets. Expansion Markets cost of equipment increased \$117.7 million, or approximately 56%, to \$329.8 million for the year ended December 31, 2008 from \$212.1 million for the year ended December 31, 2007. The increase in Expansion Markets cost of equipment is primarily attributable to an increase in gross customer additions which accounted for \$87.4 million, coupled with an increase in upgrade handset sales to existing customers accounting for \$37.0 million. These increases were partially offset by a lower average cost of handsets sales reducing cost of equipment by \$12.5 million.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$95.6 million, or 27%, to \$447.6 million for the year ended December 31, 2008 from \$352.0 million for the year ended December 31, 2007. The increase is due to increases in Core Markets and Expansion Markets selling, general and administrative expenses as follows:

Core Markets. Core Markets selling, general and administrative expenses increased \$4.3 million, or approximately 3%, to \$171.8 million for the year ended December 31, 2008 from \$167.5 million for the year ended December 31, 2007. Selling expenses increased by \$5.2 million, or approximately 7%, for the year ended December 31, 2008 compared to the year ended December 31, 2007. The increase in selling expenses is primarily attributable to a \$2.9 million increase in marketing and advertising expenses as well as higher employee related costs of \$3.3 million incurred to support the growth in the Core Markets. General and administrative expenses decreased by \$3.4 million, or 4% for the year ended December 31, 2008 as compared to the year ended December 31, 2007. This was due primarily to a decrease in various administrative expenses incurred as a result of cost benefits achieved due to the increasing scale of our business in the Core Markets. In addition, stock-based compensation expense increased \$2.9 million for the year ended December 31, 2008 as compared to the same period in 2007. See [Stock-Based Compensation Expense](#).

Table of Contents

Expansion Markets. Expansion Markets selling, general and administrative expenses increased \$91.3 million, or approximately 50%, to \$275.8 million for the year ended December 31, 2008 from \$184.5 million for the year ended December 31, 2007. Selling expenses increased by \$54.0 million, or 72%, for the year ended December 31, 2008 compared to the year ended December 31, 2007. This increase is primarily due to a \$16.6 million increase in marketing and advertising expenses incurred to support the growth in the Expansion Markets as well as higher employee related costs of \$17.6 million to support the growth and buildout of the Expansion Markets. General and administrative expenses increased by \$27.7 million, or approximately 30%, for the year ended December 31, 2008 compared to the same period in 2007 primarily due to the approximately 83% growth in our Expansion Markets customer base, including the launch of service in new markets, as well as the build-out expenses related to the New York and Boston metropolitan areas. In addition, an increase of \$10.2 million in stock-based compensation expense contributed to the increase in the Expansion Markets. See Stock-Based Compensation Expense.

Depreciation and Amortization. Depreciation and amortization expense increased \$77.1 million, or 43%, to \$255.3 million for the year ended December 31, 2008 from \$178.2 million for the year ended December 31, 2007. The increase is primarily due to increases in Core Markets and Expansion Markets depreciation expense as follows:

Core Markets. Core Markets depreciation and amortization expense increased \$13.4 million, or 11%, to \$130.7 million for the year ended December 31, 2008 from \$117.3 million for the year ended December 31, 2007. The increase related primarily to an increase in network infrastructure assets placed into service during the year ended December 31, 2008 to support the continued growth in the Core Markets.

Expansion Markets. Expansion Markets depreciation and amortization expense increased \$52.5 million, or approximately 98%, to \$106.4 million for the year ended December 31, 2008 from \$53.9 million for the year ended December 31, 2007. The increase related primarily to an increase in network infrastructure assets placed into service during the year ended December 31, 2008 driven primarily by the launch of service in new markets.

Stock-Based Compensation Expense. Stock-based compensation expense increased \$13.1 million, or approximately 47%, to \$41.1 million for the year ended December 31, 2008 from \$28.0 million for the year ended December 31, 2007. The increase is due primarily to increases in Core Markets and Expansion Markets stock-based compensation expense as follows:

Core Markets. Core Markets stock-based compensation expense increased \$2.9 million, or approximately 28%, to \$13.5 million for the year ended December 31, 2008 from \$10.6 million for the year ended December 31, 2007. The increase is primarily related to additional stock options granted to employees in these markets throughout the year ended December 31, 2008.

Expansion Markets. Expansion Markets stock-based compensation expense increased \$10.2 million, or approximately 59%, to \$27.6 million for the year ended December 31, 2008 from \$17.4 million for the year ended December 31, 2007. The increase is primarily related to additional stock options granted to employees in these markets throughout the year ended December 31, 2008.

Consolidated Data	2008	2007	Change
	(in thousands)		
Loss on disposal of assets	\$ 18,905	\$ 655	**
Interest expense	179,398	201,746	(11)%
Interest and other income	(23,170)	(63,936)	(64)%
Impairment loss on investment securities	30,857	97,800	(68)%
Provision for income taxes	129,986	123,098	6%
Net income	149,438	100,403	49%

** Not meaningful.

Loss on Disposal of Assets. Loss on disposal of assets increased \$18.3 million to \$18.9 million for the year ended December 31, 2008 from \$0.6 million for the year ended December 31, 2007. During the year ended December 31, 2008, we recorded a loss on disposal of assets related to certain network equipment and construction costs that were retired. The majority of the loss was related to the transfer of network switching equipment to a new location which resulted in the write-off of the associated construction and installation costs and certain other network equipment that had no future value to the new location.

Table of Contents

Interest Expense. Interest expense decreased \$22.3 million, or 11%, to \$179.4 million for the year ended December 31, 2008 from \$201.7 million for the year ended December 31, 2007. The decrease in interest expense was primarily due to the capitalization of \$64.2 million of interest during the twelve months ended December 31, 2008, compared to \$34.9 million of interest capitalized during the same period in 2007. We capitalize interest costs associated with our FCC licenses and property and equipment during the construction of a new market. The amount of such capitalized interest depends on the carrying values of the FCC licenses and construction in progress involved in those markets and the duration of the construction process. We expect capitalized interest to be significant during the construction of new markets. In addition, our weighted average interest rate decreased to 7.78% for the twelve months ended December 31, 2008 compared to 8.15% for the twelve months ended December 31, 2007 as a result of a decrease in the borrowing rates under the senior secured credit facility. Average debt outstanding for the twelve months ended December 31, 2008 and 2007 was \$3.0 and \$2.8 billion, respectively. The increase in average debt outstanding was due to the issuance of an additional \$400.0 million principal amount of our 9¹/₄% senior notes in June 2007.

Interest and Other Income. Interest and other income decreased \$40.7 million, or approximately 64%, to \$23.2 million for the year ended December 31, 2008 from \$63.9 million for the year ended December 31, 2007. The decrease in interest and other income was primarily due to the Company investing substantially all of its cash and cash equivalents in money market funds consisting of U.S. treasury securities rather than in short-term investments as the Company has done historically. In addition, interest income decreased due to lower cash balances when compared to 2007 as well as a decrease on the return on our cash balances as a result of a decrease in interest rates.

Impairment Loss on Investment Securities. We can and have historically invested our substantial cash balances in, among other things, securities issued and fully guaranteed by the United States or the states, highly rated commercial paper and auction rate securities, money market funds meeting certain criteria, and demand deposits. These investments are subject to credit, liquidity, market and interest rate risk. During the year ended December 31, 2007, we made an original investment of \$133.9 million in principal in certain auction rate securities that were rated AAA/Aaa at the time of purchase, substantially all of which are secured by collateralized debt obligations with a portion of the underlying collateral being mortgage securities or related to mortgage securities. With the continued liquidity issues experienced in global credit and capital markets, the auction rate securities held by us at December 31, 2008 continue to experience failed auctions as the amount of securities submitted for sale in the auctions exceeds the amount of purchase orders. We recognized an additional other-than-temporary impairment loss on investment securities in the amount of \$30.9 million during the year ended December 31, 2008.

Provision for Income Taxes. Income tax expense was \$130.0 million and \$123.1 million for the years ended December 31, 2008 and 2007, respectively. The effective tax rate was 46.5% and 54.4% for the years ended December 31, 2008 and 2007, respectively. Our effective rates differ from the statutory federal rate of 35.0% due to state and local taxes, non-deductible expenses and an increase in the valuation allowance related to the impairment loss recognized on investment securities.

Net Income. Net income increased \$49.0 million, or approximately 49%, to \$149.4 million for the year ended December 31, 2008 compared to \$100.4 million for the year ended December 31, 2007. The increase in net income was primarily attributable to an increase in income from operations, a decrease in interest expense and a decrease in the impairment loss on investment securities. These items were partially offset by lower interest and other income for the year ended December 31, 2008.

For the year ended December 31, 2006, cost of service includes \$1.3 million and selling, general and administrative expenses includes \$13.2 million of stock-based compensation

expense.

- (2) Core and Expansion Markets Adjusted EBITDA (Deficit) is presented in accordance with SFAS No. 131 as it is the primary financial measure utilized by management to facilitate evaluation of our ability to meet future debt service, capital expenditures and working capital requirements and to fund future growth.

Table of Contents

Service Revenues. Service revenues increased \$628.3 million, or 49%, to \$1.9 billion for the year ended December 31, 2007 from \$1.3 billion for the year ended December 31, 2006. The increase is due to increases in Core Markets and Expansion Markets service revenues as follows:

Core Markets. Core Markets service revenues increased \$276.9 million, or 24%, to \$1.4 billion for the year ended December 31, 2007 from \$1.1 billion for the year ended December 31, 2006. The increase in service revenues is primarily attributable to net additions of approximately 358,000 customers for the year ended December 31, 2007, which accounted for \$213.2 million of the Core Markets increase, coupled with the migration of existing customers to higher priced rate plans accounting for \$10.0 million of the Core Markets increase. In addition, pass through charges revenue increased approximately \$53.7 million during the year ended December 31, 2007 compared to the same period in 2006 primarily as a result of the increase in customers during the year ended December 31, 2007 and higher FUSF rates.

Expansion Markets. Expansion Markets service revenues increased \$351.4 million, or 230%, to \$504.3 million for the year ended December 31, 2007 from \$152.9 million for the year ended December 31, 2006. The increase in service revenues is primarily attributable to net additions of approximately 664,000 customers for the year ended December 31, 2007, which accounted for \$361.1 million of the Expansion Markets increase, partially offset by the migration of existing customers to lower priced rate plans accounting for a decrease of \$9.7 million.

Equipment Revenues. Equipment revenues increased \$60.6 million, or 24%, to \$316.5 million for the year ended December 31, 2007 from \$255.9 million for the year ended December 31, 2006. The increase is due to increases in Core Markets and Expansion Markets equipment revenues as follows:

Core Markets. Core Markets equipment revenues increased \$12.0 million, or 6%, to \$220.3 million for the year ended December 31, 2007 from \$208.3 million for the year ended December 31, 2006. The increase in Core Markets equipment revenues is attributable to an increase in gross additions of approximately 130,000 customers for the year ended December 31, 2007 offset by the sale of lower priced handsets, which accounted for \$1.9 million of the Core Markets increase, as well as an increase in handset sales to existing customers accounting for \$7.1 million of the Core Markets increase.

Expansion Markets. Expansion Markets equipment revenues increased \$48.6 million, or 102%, to \$96.2 million for the year ended December 31, 2007 from \$47.6 million for the year ended December 31, 2006. The increase in Expansion Markets equipment revenues is attributable to an increase in gross additions of approximately 529,000 customers for the year ended December 31, 2007 offset by the sale of lower priced handsets, which accounted for \$24.8 million of the Expansion Markets increase, as well as an increase in handset sales to existing customers accounting for \$21.3 million of the Expansion Markets increase.

Cost of Service. Cost of service increased \$202.2 million, or 45%, to \$647.5 million for the year ended December 31, 2007 from \$445.3 million for the year ended December 31, 2006. The increase is due to increases in Core Markets and Expansion Markets cost of service as follows:

Core Markets. Core Markets cost of service increased \$100.2 million, or 30%, to \$439.1 million for the year ended December 31, 2007 from \$338.9 million for the year ended December 31, 2006. Core Markets cost of service (excluding pass through charges) increased \$46.3 million, or 16%, to \$338.5 million for the year ended December 31, 2007 from \$292.2 million for the year ended December 31, 2006. The increase is primarily attributable to the 16% growth in our Core Markets customer base and the deployment of additional network infrastructure during the twelve months ended December 31, 2007. In addition, pass through charges increased approximately \$53.9 million during the year ended December 31, 2007 compared to the same period in 2006 primarily as a result of the increase in customers during the year ended December 31, 2007 and higher FUSF rates.

Expansion Markets. Expansion Markets cost of service increased \$102.0 million, or 96%, to \$208.4 million for the year ended December 31, 2007 from \$106.4 million for the year ended December 31, 2006. The increase

was attributable to the launch of service in the Los Angeles metropolitan area in September 2007 as well as net additions in the Expansion Markets of approximately 664,000 customers during the year ended December 31, 2007.

Table of Contents

Cost of Equipment. Cost of equipment increased \$120.3 million, or 25%, to \$597.2 million for the year ended December 31, 2007 from \$476.9 million for the year ended December 31, 2006. The increase is due to increases in Core Markets and Expansion Markets cost of equipment as follows:

Core Markets. Core Markets cost of equipment increased \$20.8 million, or 6%, to \$385.1 million for the year ended December 31, 2007 from \$364.3 million for the year ended December 31, 2006. The increase in Core Markets equipment costs is attributable to the increase in gross customer additions during the year ended December 31, 2007 of approximately 130,000 customers as compared to the same period in 2006, which accounted for \$14.4 million of the increase. In addition, cost of equipment sales to existing customers increased \$4.5 million for the year ended December 31, 2007.

Expansion Markets. Expansion Markets cost of equipment increased \$99.5 million, or 88%, to \$212.1 million for the year ended December 31, 2007 from \$112.6 million for the year ended December 31, 2006. The increase in Expansion Markets equipment costs is attributable to the increase in gross customer additions during the year ended December 31, 2007 of approximately 529,000 customers as compared to the same period in 2006, which accounted for \$66.7 million of the increase. In addition, cost of equipment sales to existing customers increased \$31.7 million for the year ended December 31, 2007.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased \$108.4 million, or 44%, to \$352.0 million for the year ended December 31, 2007 from \$243.6 million for the year ended December 31, 2006. The increase is due to increases in Core Markets and Expansion Markets selling, general and administrative expenses as follows:

Core Markets. Core Markets selling, general and administrative expenses increased \$9.4 million, or 6%, to \$167.5 million for the year ended December 31, 2007 from \$158.1 million for the year ended December 31, 2006. Selling expenses increased by \$8.8 million, or approximately 13%, for the year ended December 31, 2007 compared to the year ended December 31, 2006. The increase in selling expenses is primarily due to a \$4.0 million increase in marketing and advertising expenses as well as higher labor costs of \$2.8 million incurred to support the growth in the Core Markets. General and administrative expenses remained relatively flat for the year ended December 31, 2007 compared to the same period in 2006.

Expansion Markets. Expansion Markets selling, general and administrative expenses increased \$99.0 million, or 116%, to \$184.5 million for the year ended December 31, 2007 from \$85.5 million for the year ended December 31, 2006. Selling expenses increased by \$39.7 million, or approximately 113%, for the year ended December 31, 2007 compared to the year ended December 31, 2006. This increase is primarily due to a \$22.6 million increase in marketing and advertising expenses related to the growth in the Expansion Markets as well as higher labor costs of \$11.4 million. General and administrative expenses increased by \$59.3 million, or approximately 118% for the year ended December 31, 2007 compared to the same period in 2006 primarily due to an increase in various administrative expenses incurred in relation to the growth in the Expansion Markets, including the launch of service in the Los Angeles metropolitan area and build-out expenses related to the New York, Philadelphia, Boston and Las Vegas metropolitan areas. In addition, stock-based compensation expense increased \$10.1 million. See Stock-Based Compensation Expense.

Depreciation and Amortization. Depreciation and amortization expense increased \$43.2 million, or 32%, to \$178.2 million for the year ended December 31, 2007 from \$135.0 million for the year ended December 31, 2006. The increase is primarily due to increases in Core Markets and Expansion Markets depreciation expense as follows:

Core Markets. Core Markets depreciation and amortization expense increased \$7.7 million, or 7%, to \$117.3 million for the year ended December 31, 2007 from \$109.6 million for the year ended December 31, 2006. The increase related primarily to an increase in network infrastructure assets placed into service during the year ended December 31, 2007.

Expansion Markets. Expansion Markets depreciation and amortization expense increased \$31.9 million, or 145%, to \$53.8 million for the year ended December 31, 2007 from \$21.9 million for the year ended December 31, 2006. The increase related primarily to an increase in network infrastructure assets placed into

service during the year ended December 31, 2007 which was significantly impacted by the launch of service in the Los Angeles metropolitan area in September 2007.

68

Table of Contents

Stock-Based Compensation Expense. Stock-based compensation expense increased \$13.5 million, or 94%, to \$28.0 million for the year ended December 31, 2007 from \$14.5 million for the year ended December 31, 2006. The increase is due primarily to increases in Core Markets and Expansion Markets stock-based compensation expense as follows:

Core Markets. Core Markets stock-based compensation expense increased \$2.9 million, or 38%, to \$10.6 million for the year ended December 31, 2007 from \$7.7 million for the year ended December 31, 2006. The increase is primarily related to an increase in stock options granted to employees in these markets throughout the year ended December 31, 2007.

Expansion Markets. Expansion Markets stock-based compensation expense increased \$10.6 million, or 158%, to \$17.4 million for the year ended December 31, 2007 from \$6.8 million for the year ended December 31, 2006. The increase is primarily related to an increase in stock options granted to employees in these markets throughout the year ended December 31, 2007.

Consolidated Data	2007	2006	Change
	(in thousands)		
Loss on disposal of assets	\$ 655	\$ 8,806	(93)%
Interest expense	201,746	115,985	74%
Loss on extinguishment of debt		51,518	100%
Impairment loss on investment securities	97,800		100%
Provision for income taxes	123,098	36,717	235%
Net income	100,403	53,806	87%

Loss on Disposal of Assets. Loss on disposal of assets decreased \$8.1 million, or approximately 93%, to \$0.7 million for the year ended December 31, 2007 from \$8.8 million for the year ended December 31, 2006 primarily as a result of a gain on disposal of assets from the sale of certain network infrastructure assets related to a change in network technology related to our cell sites in certain markets. The gain was offset by a \$3.0 million loss on the termination of a lease agreement during the year ended December 31, 2007. During the year ended December 31, 2006, certain network technology related to our cell sites in certain markets was retired and replaced with new technology, resulting in a loss on disposal of assets.

Interest Expense. Interest expense increased \$85.7 million, or 74%, to \$201.7 million for the twelve months ended December 31, 2007 from \$116.0 million for the twelve months ended December 31, 2006. The increase in interest expense was primarily due to an increased average principal balance outstanding as a result of borrowings of \$1.6 billion under our senior secured credit facility and the issuance of \$1.0 billion of 9¹/₄% senior notes due 2014, or initial notes, during the fourth quarter of 2006. The Company also issued an additional \$400.0 million of 9¹/₄% senior notes, or additional notes, during the second quarter of 2007. The Company had average debt outstanding for the twelve months ended December 31, 2007 of \$2.8 billion. The average debt outstanding for the twelve months ending December 31, 2006 was \$1.3 billion. The weighted average interest rate decreased to 8.15% for the twelve months ended December 31, 2007 compared to 10.30% for the twelve months ended December 31, 2006 as a result of a decrease in the borrowing rates under the senior secured credit facility, issuance of the initial notes and the additional notes, collectively referred to as the 9¹/₄% senior notes, and the impact of the interest rate hedge. The increase in interest expense was partially offset by the capitalization of \$34.9 million of interest during the twelve months ended December 31, 2007, compared to \$17.5 million of interest capitalized during the same period in 2006. We capitalize interest costs associated with our FCC licenses and property and equipment during the construction of a new market. The amount of such capitalized interest depends on the carrying values of the FCC licenses and construction in progress involved in those markets and the duration of the construction process. We expect capitalized interest to continue to be significant during the construction of the markets associated with the AWS licenses we were granted in November 2006 as a result of Auction 66.

Loss on Extinguishment of Debt. In November 2006, we repaid all amounts outstanding under our first and second lien credit agreements and the exchangeable secured and unsecured bridge credit agreements. As a result, we recorded a loss on extinguishment of debt in the amount of approximately \$42.7 million of the first and second lien credit

agreements and an approximately \$9.4 million loss on the extinguishment of the exchangeable secured and unsecured bridge credit agreements.

Impairment Loss on Investment Securities. We can and have historically invested our substantial cash balances in, among other things, securities issued and fully guaranteed by the United States or any state, highly rated commercial paper and auction rate securities, money market funds meeting certain criteria, and demand deposits.

Table of Contents

These investments are subject to credit, liquidity, market and interest rate risk. We made investments of \$133.9 million in certain AAA rated auction rate securities some of which are secured by collateralized debt obligations with a portion of the underlying collateral being mortgage securities or related to mortgage securities. With the liquidity issues experienced in global credit and capital markets, the auction rate securities held by us at December 31, 2007 have experienced multiple failed auctions as the amount of securities submitted for sale in the auctions has exceeded the amount of purchase orders. As a result, we recognized an other-than-temporary impairment loss on investment securities in the amount of \$97.8 million during the year ended December 31, 2007.

Provision for Income Taxes. Income tax expense for the year ended December 31, 2007 increased to \$123.1 million, which is approximately 55% of our income before provision for income taxes. The provision for income taxes for the year ended December 31, 2007 includes a tax valuation allowance on the impairment loss on investment securities equal to 15% of our income before provision in income taxes. For the year ended December 31, 2006 the provision for income taxes was \$36.7 million, or approximately 41% of income before provision for income taxes.

Net Income. Net income increased \$46.6 million, or 87%, to \$100.4 million for the year ended December 31, 2007 compared to \$53.8 million for the year ended December 31, 2006. The increase is primarily attributable to a 35% growth in customers during the year ended December 31, 2007 as well as cost benefits achieved due to the increasing scale of our business in the Core and Expansion Markets. In addition, the increase in net income is due to a 197% increase in interest income as a result of the significant increase in our cash balances due to proceeds from our initial public offering and additional funding under our 9¹/₄% senior notes. However, these benefits were partially offset by an increase in interest expense due to an increase in the Company's average debt outstanding for the year ended December 31, 2007 compared to the same period in 2006 as well as the \$97.8 million impairment loss on investment securities.

Performance Measures

In managing our business and assessing our financial performance, we supplement the information provided by financial statement measures with several customer-focused performance metrics that are widely used in the wireless industry. These metrics include average revenue per user per month, or ARPU, which measures service revenue per customer; cost per gross customer addition, or CPGA, which measures the average cost of acquiring a new customer; cost per user per month, or CPU, which measures the non-selling cash cost of operating our business on a per customer basis; and churn, which measures turnover in our customer base. Effective December 31, 2008, we revised our definition of ARPU to include activation revenues. Activation revenues are related to the reactivation of accounts that have previously disconnected and we believe that these revenues are more appropriately presented as a component of ARPU rather than a reduction to CPGA. Prior year measures have been restated to reflect this revision. For a reconciliation of Non-GAAP performance measures and a further discussion of the measures, please read Reconciliation of Non-GAAP Financial Measures below.

The following table shows annual metric information for 2006, 2007 and 2008.

	Year Ended December 31,		
	2006	2007	2008
Customers:			
End of period	2,940,986	3,962,786	5,366,833
Net additions	1,016,365	1,021,800	1,404,047
Churn:			
Average monthly rate	4.6%	4.7%	4.7%
ARPU	\$ 43.26	\$ 43.31	\$ 41.39
CPGA	\$ 121.12	\$ 127.97	\$ 127.21
CPU	\$ 19.65	\$ 18.33	\$ 18.17

Customers. Net customer additions were 1,404,047 for the year ended December 31, 2008, compared to 1,021,800 for the year ended December 31, 2007. Total customers were 5,366,833 as of December 31, 2008, an increase of 35% over the customer total as of December 31, 2007. The increase in total customers is primarily attributable to the

continued demand for our service offerings and the launch of our services in new markets. Net customer additions were 1,021,800 for the year ended December 31, 2007, compared to 1,016,365 for the year ended December 31, 2006. Total customers were 3,962,786 as of December 31, 2007, an increase of 35% over the customer total as of December 31, 2006. The increase in total customers in 2007 was largely attributable to the continued demand for our service offerings and the launch of our services in new markets.

Table of Contents

Churn. As we do not require a long-term service contract, our churn percentage is expected to be higher than traditional wireless carriers that require customers to sign a one- to two-year contract with significant early termination fees. Average monthly churn represents (a) the number of customers who have been disconnected from our system during the measurement period less the number of customers who have reactivated service, divided by (b) the sum of the average monthly number of customers during such period. We classify delinquent customers as churn after they have been delinquent for 30 days. In addition, when an existing customer establishes a new account in connection with the purchase of an upgraded or replacement phone and does not identify themselves as an existing customer, we count the phone leaving service as a churn and the new phone entering service as a gross customer addition. Churn remained flat for the year ended December 31, 2008 at 4.7%. Churn for the year ended December 31, 2007 was 4.7% compared to 4.6% for the year ended December 31, 2006. The 0.1% increase in churn was due to normal historical trends related to the maturity of our markets coupled with continued disconnects from the significant increase in gross additions in the first quarter of 2007 compared to the first quarter of 2006. Our customer activity is influenced by seasonal effects related to traditional retail selling periods and other factors that arise from our target customer base. Based on historical results, we generally expect net customer additions to be strongest in the first and fourth quarters. Softening of sales and increased churn in the second and third quarters of the year usually combine to result in fewer net customer additions during these quarters. See *Seasonality*.

Average Revenue Per User. ARPU represents (a) service revenues less pass through charges for the measurement period, divided by (b) the sum of the average monthly number of customers during such period. ARPU was \$41.39 and \$43.31 for the years ended December 31, 2008 and 2007, respectively. The \$1.92 decrease in ARPU was primarily attributable to higher participation in our Family Plans as well as reduced revenue from certain features included in our service plans that were previously provided a la carte. ARPU increased \$0.05 during 2007 from \$43.26 for the year ended December 31, 2006. At December 31, 2008, approximately 80% of our customers were on the \$40 or higher rate plan.

Cost Per Gross Addition. CPGA is determined by dividing (a) selling expenses plus the total cost of equipment associated with transactions with new customers less equipment revenues associated with transactions with new customers during the measurement period by (b) gross customer additions during such period. Retail customer service expenses and equipment margin on handsets sold to existing customers when they are identified, including handset upgrade transactions, are excluded, as these costs are incurred specifically for existing customers. CPGA has decreased to \$127.21 for the year ended December 31, 2008 from \$127.97 for the year ended December 31, 2007, which was primarily driven by a 33% increase in gross additions, partially offset by an increase in selling expenses associated with the continued customer growth in our Expansion Markets and the launch of service in new markets. CPGA increased to \$127.97 for the year ended December 31, 2007 from \$121.12 for the year ended December 31, 2006, which was primarily driven by the selling expenses and equipment subsidy associated with the customer growth in our Expansion Markets as well as selling expenses associated with the launch of service in new markets.

Cost Per User. CPU is cost of service and general and administrative costs (excluding applicable non-cash stock-based compensation expense included in cost of service and general and administrative expense) plus net loss on handset equipment transactions unrelated to initial customer acquisition, divided by the sum of the average monthly number of customers during such period. CPU for the years ended December 31, 2008 and 2007 was \$18.17 and \$18.33, respectively. CPU for the year ended December 31, 2006 was \$19.65. We continue to achieve cost benefits due to the increasing scale of our business. However, these benefits have been partially offset by a combination of the construction and launch expenses associated with our Expansion Markets, which contributed approximately \$3.91, \$3.36 and \$3.42 of additional CPU for the years ended December 31, 2008, 2007 and 2006, respectively.

The following table shows consolidated quarterly metric information for the years ended December 31, 2007 and 2008.

Table of Contents**Core Markets Performance Measures**

Set forth below is a summary of certain key performance measures for the periods indicated for our Core Markets:

	Year Ended December 31,		
	2006	2007	2008
	(Dollars in thousands)		
Core Markets Customers:			
End of period	2,300,958	2,658,905	2,986,876
Net additions	429,293	357,947	327,971
Core Markets Adjusted EBITDA	\$ 492,773	\$ 654,112	\$ 720,334
Core Markets Adjusted EBITDA as a Percent of Service Revenues	43.3%	46.2%	47.9%

Our Core Markets have a licensed population of approximately 28 million. As of December 31, 2008, our networks in our Core Markets cover a population of approximately 23 million.

Customers. Net customer additions in our Core Markets were 327,971 for the year ended December 31, 2008, compared to 357,947 for the year ended December 31, 2007. Total customers were 2,986,876 as of December 31, 2008, an increase of 12% over the customer total as of December 31, 2007. Net customer additions in our Core Markets were 357,947 for the year ended December 31, 2007, bringing our total customers to approximately 2.7 million as of December 31, 2007, an increase of 16% over the total customers as of December 31, 2006. The increase in total customers is primarily attributable to the continued demand for our service offerings.

Adjusted EBITDA. Adjusted EBITDA is presented in accordance with SFAS No. 131 as it is the primary performance metric for which our reportable segments are evaluated and it is utilized by management to facilitate evaluation of our ability to meet future debt service, capital expenditures and working capital requirements and to fund future growth. For the year ended December 31, 2008, Core Markets Adjusted EBITDA was \$720.3 million compared to \$654.1 million for the year ended December 31, 2007. For the year ended December 31, 2006, Core Markets Adjusted EBITDA was \$492.8 million. We continue to experience increases in Core Markets Adjusted EBITDA as a result of continued customer growth and cost benefits due to the increasing scale of our business in the Core Markets.

Adjusted EBITDA as a Percent of Service Revenues. Adjusted EBITDA as a percent of service revenues is calculated by dividing Adjusted EBITDA by total service revenues. Core Markets Adjusted EBITDA as a percent of service revenues for the year ended December 31, 2008 and 2007 was 47.9% and 46.2%, respectively. Core Markets Adjusted EBITDA as a percent of service revenues for the year ended December 31, 2006 was 43.0%. Consistent with the increase in Core Markets Adjusted EBITDA, we continue to experience corresponding increases in Core Markets Adjusted EBITDA as a percent of service revenues due to the growth in service revenues as well as cost benefits due to the increasing scale of our business in the Core Markets.

The following table shows a summary of certain quarterly key performance measures for the periods indicated for our Core Markets.

	Three Months Ended							
	March 31,	June 30,	September	December	March 31,	June 30,	September	December

Expansion Markets Adjusted EBITDA (Deficit)	\$ (97,214)	\$ 12,883	\$ 62,799
Expansion Markets Adjusted EBITDA as a Percent of Service Revenues	n/m	2.6%	6.7%

Our Expansion Markets have a licensed population of approximately 122 million. As of December 31, 2008, our networks in our Expansion Markets cover a population of approximately 41 million.

Customers. Net customer additions in our Expansion Markets were 1,076,076 for the year ended December 31, 2008, compared to 663,853 for the year ended December 31, 2007, an increase of 62%. Total customers were 2,379,957 as of December 31, 2008, an increase of approximately 83% over total customers as of December 31, 2007. The increase in total customers in the Expansion Markets is primarily attributable to the continued demand for our service offerings as well as the continued expansion of our service coverage area existing Expansion Markets and our recent launches of service in new markets. Net customer additions increased to 663,853 for the year ended December 31, 2007 from 587,072 for the year ended December 31, 2006 due to the continued demand for our service offerings and the launch of our services in new markets.

Adjusted EBITDA (Deficit). Adjusted EBITDA (Deficit) is presented in accordance with SFAS No. 131 as it is the primary performance metric for which our reportable segments are evaluated and it is utilized by management to facilitate evaluation of our ability to meet future debt service, capital expenditures and working capital requirements and to fund future growth. For the year ended December 31, 2008, Expansion Markets Adjusted EBITDA was \$62.8 million compared to an Adjusted EBITDA of \$12.9 million for the year ended December 31, 2007. The increase in Adjusted EBITDA, when compared to the previous year, was attributable to cost benefits achieved due to the increasing scale of our business, partially offset by construction and launch expenses associated primarily with the launch of service in new markets and expenses related to the build out of the New York and Boston metropolitan areas. Adjusted EBITDA deficit for the year ended December 31, 2006 was \$97.2 million. The increase in Adjusted EBITDA for the year ended December 31, 2007, when compared to the year ended December 31, 2006, was attributable to the growth in service revenues in our existing Expansion Markets as well as the achievement of cost benefits due to the increasing scale of our business in the Expansion Markets offset by significant expenses related to the buildout and launch of service new markets.

Adjusted EBITDA as a Percent of Service Revenues. Adjusted EBITDA as a percent of service revenues is calculated by dividing Adjusted EBITDA by total service revenues. Expansion Markets Adjusted EBITDA as percent of service revenues for the year ended December 31, 2008 and 2007 was 6.7% and 2.6%, respectively. Consistent with the increase in Expansion Markets Adjusted EBITDA, we continue to experience corresponding increases in Expansion Markets Adjusted EBITDA as a percent of service revenues due to the growth in service revenues as well as cost benefits due to the increasing scale of our business in the Expansion Markets, partially offset by construction and launch expenses associated with new markets.

The following table shows a summary of certain quarterly key performance measures for the periods indicated for our Expansion Markets.

Table of Contents**Reconciliation of Non-GAAP Financial Measures**

We utilize certain financial measures and key performance indicators that are not calculated in accordance with GAAP to assess our financial and operating performance. A non-GAAP financial measure is defined as a numerical measure of a company's financial performance that (i) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the comparable measure calculated and presented in accordance with GAAP in the statement of income or statement of cash flows; or (ii) includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the comparable measure so calculated and presented.

ARPU, CPGA, and CPU are non-GAAP financial measures utilized by our management to judge our ability to meet our liquidity requirements and to evaluate our operating performance. We believe these measures are important in understanding the performance of our operations from period to period, and although every company in the wireless industry does not define each of these measures in precisely the same way, we believe that these measures (which are common in the wireless industry) facilitate key liquidity and operating performance comparisons with other companies in the wireless industry. The following tables reconcile our non-GAAP financial measures with our financial statements presented in accordance with GAAP.

ARPU We utilize ARPU to evaluate our per-customer service revenue realization and to assist in forecasting our future service revenues. ARPU is calculated exclusive of pass through charges that we collect from our customers and remit to the appropriate government agencies.

Average number of customers for any measurement period is determined by dividing (a) the sum of the average monthly number of customers for the measurement period by (b) the number of months in such period. Average monthly number of customers for any month represents the sum of the number of customers on the first day of the month and the last day of the month divided by two. The following table shows the calculation of ARPU for the periods indicated.

	Year Ended December 31,

Table of Contents

CPGA We utilize CPGA to assess the efficiency of our distribution strategy, validate the initial capital invested in our customers and determine the number of months to recover our customer acquisition costs. This measure also allows us to compare our average acquisition costs per new customer to those of other wireless broadband mobile providers. Equipment revenues related to new customers are deducted from selling expenses in this calculation as they represent amounts paid by customers at the time their service is activated that reduce our acquisition cost of those customers. Additionally, equipment costs associated with existing customers, net of related revenues, are excluded as this measure is intended to reflect only the acquisition costs related to new customers. The following table reconciles total costs used in the calculation of CPGA to selling expenses, which we consider to be the most directly comparable GAAP financial measure to CPGA.

	Year Ended December 31,		
	2006	2007	2008
(In thousands, except gross customer additions and CPGA)			
Calculation of Cost Per Gross Addition (CPGA):

CPGA	\$ 125.00	\$ 140.82	\$ 128.21	\$ 119.82

CPU CPU is cost of service and general and administrative costs (excluding applicable non-cash stock-based compensation expense included in cost of service and general and administrative expenses) plus net loss on equipment transactions unrelated to initial customer acquisition exclusive of pass through charges, divided by the sum of the average monthly number of customers during such period. CPU does not include any depreciation and amortization expense. Management uses CPU as a tool to evaluate the non-selling cash expenses associated with ongoing business operations on a per customer basis, to track changes in these non-selling cash costs over time, and to help evaluate how changes in our business operations affect non-selling cash costs per customer. In addition, CPU provides management with a useful measure to compare our non-selling cash costs per customer with those of other wireless providers. We believe investors use CPU primarily as a tool to track changes in our non-selling cash costs over time and to compare our non-selling cash costs to those of other wireless providers, although other wireless carriers may calculate this measure differently. The following table reconciles total costs used in the calculation of CPU to cost of service, which we consider to be the most directly comparable GAAP financial measure to CPU.

Liquidity and Capital Resources

Our principal sources of liquidity are our existing cash and cash equivalents and cash generated from operations. At December 31, 2008, we had a total of approximately \$697.9 million in cash and cash equivalents. Over the last year, the capital and credit markets have become increasingly volatile as a result of adverse economic and financial conditions that have triggered the failure and near failure of a number of large financial services companies and a global recession. We believe that this increased volatility and global recession may make it difficult to obtain additional financing or sell additional equity or debt securities. We believe that, based on our current level of cash and cash equivalents and anticipated cash flows from operations, the current adverse economic and financial conditions in the credit and capital markets will not have a material adverse impact on our liquidity, cash flow, financial flexibility or our ability to fund our operations in the near-term.

We have historically invested our substantial cash balances in, among other things, securities issued and fully guaranteed by the United States or the states, highly rated commercial paper and auction rate securities, money market funds meeting certain criteria, and demand deposits. These investments are subject to credit, liquidity, market and interest rate risk. At December 31, 2008, we had invested substantially all of our cash and cash equivalents in money market funds consisting of U.S. treasury securities.

Table of Contents

During the year ended December 31, 2007, we made an original investment of \$133.9 million in principal in certain auction rate securities, substantially all of which are secured by collateralized debt obligations with a portion of the underlying collateral being mortgage securities or related to mortgage securities. Consistent with our investment policy guidelines, the auction rate securities investments held by us all had AAA/Aaa credit ratings at the time of purchase. With the continued liquidity issues experienced in global credit and capital markets, the auction rate securities held by us at December 31, 2008 continue to experience failed auctions as the amount of securities submitted for sale in the auctions exceeds the amount of purchase orders. In addition, all of the auction rate securities held by us have been downgraded or placed on credit watch.

The estimated market value of our auction rate security holdings at December 31, 2008 was approximately \$6.0 million, which reflects a \$127.9 million cumulative adjustment to the original principal value of \$133.9 million. The estimated market value at December 31, 2007 was approximately \$36.1 million, which reflected a \$97.8 million adjustment to the aggregate principal value at that date. Although the auction rate securities continue to pay interest according to their stated terms, based on valuation models that rely exclusively on unobservable inputs, we recorded an impairment charge of \$30.9 million and \$97.8 million during the years ended December 31, 2008 and 2007, respectively, reflecting an additional portion of our auction rate security holdings that we have concluded have an other-than-temporary decline in value. The offsetting increase in fair value of approximately \$0.8 million is reported in accumulated other comprehensive loss in the consolidated balance sheets.

Historically, given the liquidity created by auctions, our auction rate securities were presented as current assets under short-term investments on our balance sheet. Given the failed auctions, our auction rate securities are illiquid until there is a successful auction for them or we sell them. Accordingly, the entire amount of such remaining auction rate securities has been reclassified from current to non-current assets and is presented in long-term investments on our balance sheet as of December 31, 2008 and 2007. The \$6.0 million estimated market value at December 31, 2008 does not materially impact our liquidity and is not included in our approximately \$697.9 million in cash and cash equivalents as of December 31, 2008. We may incur additional impairments to our auction rate securities which may be up to the full remaining value of such auction rate securities. Management believes that any future additional impairment charges will not have a material effect on our liquidity.

On April 24, 2007, MetroPCS Communications consummated an initial public offering of its common stock. MetroPCS Communications sold 37,500,000 shares of common stock at a price per share of \$23.00 (less underwriting discounts and commissions), which resulted in net proceeds to MetroPCS Communications of approximately \$818.3 million. In addition, selling stockholders sold an aggregate of 20,000,000 shares of common stock, including 7,500,000 shares sold pursuant to the exercise by the underwriters of their over-allotment option. MetroPCS Communications did not receive any proceeds from the sale of shares of common stock by the selling stockholders; however, MetroPCS Communications did receive proceeds of approximately \$3.8 million from the exercise of options to acquire common stock which was sold in the initial public offering. Concurrent with the initial public offering by MetroPCS Communications, all outstanding shares of preferred stock of MetroPCS Communications, including accrued but unpaid dividends as of April 23, 2007, were converted into 150,962,644 shares of common stock. On June 6, 2007, MetroPCS Wireless, Inc., or Wireless, consummated the sale of the additional notes in the aggregate principal amount of \$400.0 million. The proceeds from the sale of the additional notes were approximately \$421.0 million. On January 20, 2009, Wireless consummated the sale of \$550.0 million of 9¹/₄% senior notes due 2014, or new notes. The net proceeds from the sale of the new notes was approximately \$480.5 million. The net proceeds will be used for general corporate purposes which could include working capital, capital expenditures, future liquidity needs, additional opportunistic spectrum acquisitions, corporate development opportunities and future technology initiatives.

Our strategy has been to offer our services in major metropolitan areas and their surrounding areas, which we refer to as clusters. We are seeking opportunities to enhance our current market clusters and to provide service in new geographic areas. From time to time, we may purchase spectrum and related assets from third parties or the FCC. As a result of the acquisition of spectrum licenses and the opportunities that these licenses provide for us to expand our operations into major metropolitan markets, we will require significant additional capital in the future to finance the construction and initial operating costs associated with such licenses. We generally do not intend to commence the

construction of any individual license area until we have sufficient funds available to provide for the related construction and operating costs associated with such license area. We currently plan to focus on building out networks to cover approximately 40 million of total population during 2009-2010 including the launch of the Boston and New York metropolitan areas in February 2009. Our initial launch dates will be accomplished in phases in the larger metropolitan areas. Our future builds will entail a more extensive use of distributed antenna systems, or DAS, systems than we have deployed in the past. This, along with other factors, could result in an increase in the

Table of Contents

total capital expenditures per covered population to initially launch operations. We believe that our existing cash, cash equivalents and our anticipated cash flows from operations will be sufficient to fully fund this planned expansion.

The construction of our network and the marketing and distribution of our wireless communications products and services have required, and will continue to require, substantial capital investment. Capital outlays have included license acquisition costs, capital expenditures for construction of our network infrastructure, costs associated with clearing and relocating non-governmental incumbent licenses, funding of operating cash flow losses incurred as we launch services in new metropolitan areas and other working capital costs, debt service and financing fees and expenses. Our capital expenditures for the years ended December 31, 2008, 2007 and 2006 were approximately \$954.6 million, \$767.7 million and \$550.7 million, respectively. These expenditures were primarily associated with the construction of the network infrastructure in our Expansion Markets and our efforts to increase the service area and capacity of our existing Core Markets network through the addition of cell sites and switches. We believe the increased service area and capacity in existing markets will improve our service offering, helping us to attract additional customers and increase revenues. In addition, we believe our new Expansion Markets have attractive demographics which will result in increased revenues.

As of December 31, 2008, we owed an aggregate of approximately \$3.0 billion under our senior secured credit facility and 9¹/₄% senior notes. As of December 31, 2008, we owed approximately \$91.3 million under our capital lease obligations.

Our senior secured credit facility calculates consolidated Adjusted EBITDA as: consolidated net income plus depreciation and amortization; gain (loss) on disposal of assets; non-cash expenses; gain (loss) on extinguishment of debt; provision for income taxes; interest expense; and certain expenses of MetroPCS Communications, Inc. minus interest and other income and non-cash items increasing consolidated net income.

We consider consolidated Adjusted EBITDA, as defined above, to be an important indicator to investors because it provides information related to our ability to provide cash flows to meet future debt service, capital expenditures and working capital requirements and fund future growth. We present consolidated Adjusted EBITDA because covenants in our senior secured credit facility contain ratios based on this measure. Other wireless carriers may calculate consolidated Adjusted EBITDA differently. If our consolidated Adjusted EBITDA were to decline below certain levels, covenants in our senior secured credit facility that are based on consolidated Adjusted EBITDA, including our maximum senior secured leverage ratio covenant, may be violated and could cause, among other things, an inability to incur further indebtedness and in certain circumstances a default or mandatory prepayment under our senior secured credit facility. Our maximum senior secured leverage ratio is required to be less than 4.5 to 1.0 based on consolidated Adjusted EBITDA plus the impact of certain new markets. The lenders under our senior secured credit facility use the senior secured leverage ratio to measure our ability to meet our obligations on our senior secured debt by comparing the total amount of such debt to our consolidated Adjusted EBITDA, which our lenders use to estimate our cash flow from operations. The senior secured leverage ratio is calculated as the ratio of senior secured indebtedness to consolidated Adjusted EBITDA, as defined by our senior secured credit facility. For the twelve months ended December 31, 2008, our senior secured leverage ratio was 1.95 to 1.0, which means for every \$1.00 of consolidated Adjusted EBITDA we had \$1.95 of senior secured indebtedness. In addition, consolidated Adjusted EBITDA is also utilized, among other measures, to determine management's compensation levels. Consolidated Adjusted EBITDA is not a measure calculated in accordance with GAAP, and should not be considered a substitute for, operating income (loss), net income (loss), or any other measure of financial performance reported in accordance with GAAP. In addition, consolidated Adjusted EBITDA should not be construed as an alternative to, or more meaningful than cash flows from operating activities, as determined in accordance with GAAP.

Table of Contents

The following table shows the calculation of our consolidated Adjusted EBITDA, as defined in our senior secured credit facility, for the years ended December 31, 2006, 2007 and 2008.

	Year Ended December 31,		
	2006	2007	2008
	(In Thousands)		
Calculation of Consolidated Adjusted EBITDA:			
Net income	\$ 53,806	\$ 100,403	\$ 149,438
Adjustments:			
Depreciation and amortization	135,028	178,202	255,319
Loss on disposal of assets	8,806	655	18,905
Stock-based compensation expense(1)	14,472	28,024	41,142
Interest expense	115,985	201,746	179,398
Accretion of put option in majority-owned subsidiary(1)	770	1,003	1,258
Interest and other income	(21,543)	(63,936)	(23,170)
Loss on extinguishment of debt	51,518		
Impairment loss on investment securities		97,800	30,857
Provision for income taxes	36,717	123,098	129,986
Consolidated Adjusted EBITDA	\$ 395,559	\$ 666,995	\$ 783,133

(1) Represents a non-cash expense, as defined by our senior secured credit facility.

In addition, for further information, the following table reconciles consolidated Adjusted EBITDA, as defined in our senior secured credit facility, to cash flows from operating activities for the years ended December 31, 2006, 2007 and 2008.

	Year Ended December 31,		
	2006	2007	2008
	(In Thousands)		
Reconciliation of Net Cash Provided by Operating Activities to Consolidated Adjusted EBITDA:			
Net cash provided by operating activities	\$ 364,761	\$ 589,306	\$ 447,490
Adjustments:			
Interest expense	115,985	201,746	179,398
Non-cash interest expense	(6,964)	(3,259)	(2,550)
Interest and other income	(21,543)	(63,936)	(23,170)
Provision for uncollectible accounts receivable	(31)	(129)	(8)
Deferred rent expense	(7,464)	(13,745)	(20,646)
Cost of abandoned cell sites	(3,783)	(6,704)	(8,592)
Accretion of asset retirement obligation	(769)	(1,439)	(3,542)
Gain on sale of investments	2,385	10,506	
Provision for income taxes	36,717	123,098	129,986
Deferred income taxes	(32,341)	(118,524)	(124,347)

Changes in working capital	(51,394)	(49,925)	209,114
Consolidated Adjusted EBITDA	\$ 395,559	\$ 666,995	\$ 783,133

Operating Activities

Cash provided by operating activities decreased \$141.8 million to \$447.5 million during the year ended December 31, 2008 from \$589.3 million for the year ended December 31, 2007. The decrease was primarily attributable to a decrease in working capital during the year ended December 31, 2008 compared to the same period in 2007, partially offset by an approximately 49% increase in net income as a result of the growth experienced over the last twelve months.

Cash provided by operating activities increased \$224.5 million to \$589.3 million during the year ended December 31, 2007 from \$364.8 million for the year ended December 31, 2006. The increase was primarily attributable to an 87% increase in net income as well as a 266% increase in deferred income taxes during the year ended December 31, 2007 compared to the same period in 2006.

Cash provided by operating activities increased \$81.6 million to \$364.8 million during the year ended December 31, 2006 from \$283.2 million for the year ended December 31, 2005. The increase was primarily attributable to the timing of payments on accounts payable and accrued expenses for the year ended December 31, 2006 as well as an increase in deferred revenues due to an approximately 53% increase in customers during the year ended December 31, 2006 compared to the same period in 2005.

Table of Contents***Investing Activities***

Cash used in investing activities was \$1.3 billion during the year ended December 31, 2008 compared to \$517.1 million during the year ended December 31, 2007. The increase was due primarily to \$328.5 million in purchases of FCC licenses, \$25.2 million in cash used for business acquisitions, a \$186.9 million increase in purchases of property and equipment which was primarily related to construction in the Expansion Markets, and \$267.2 million in net proceeds from the sale of investments during the year ended December 31, 2007 that did not recur during the year ended December 31, 2008.

Cash used in investing activities was \$517.1 million during the year ended December 31, 2007 compared to \$1.9 billion during the year ended December 31, 2006. The decrease was mainly due to \$1.4 billion in purchases of FCC licenses during the year ended December 31, 2006 that did not recur in 2007 as well as a \$264.7 million increase in net proceeds from the sale of investments, partially offset by a \$217.0 million increase in purchases of property and equipment.

Cash used in investing activities was \$1.9 billion during the year ended December 31, 2006 compared to \$905.2 million during the year ended December 31, 2005. The increase was due primarily to an \$887.7 million increase in purchases of FCC licenses and a \$284.3 million increase in purchases of property and equipment, partially offset by a \$355.5 million decrease in net purchases of investments.

Financing Activities

Cash provided by financing activities was \$74.5 million for the year ended December 31, 2008 compared to \$1.2 billion for year ended December 31, 2007. The decrease was due primarily to \$818.3 million in net proceeds from the Company's initial public offering that was completed in April 2007 and \$420.4 million in net proceeds from the issuance of the additional notes in June 2007 that occurred during the year ended December 31, 2007 compared to the year ended December 31, 2008.

Cash provided by financing activities was \$1.2 billion for the year ended December 31, 2007 compared to \$1.6 billion for the year ended December 31, 2006. The decrease was due primarily to a decrease in proceeds from various financing activities during the year ended December 31, 2007 compared to the year ended December 31, 2006. Financing activities during the year ended December 31, 2007 included \$818.3 million in net proceeds from the company's initial public offering that was completed in April 2007 and \$421.0 million in net proceeds from the sale of additional notes in June 2007.

Cash provided by financing activities was \$1.6 billion for the year ended December 31, 2006 compared to \$712.2 million for the year ended December 31, 2005. The increase was due primarily to net proceeds from the senior secured credit facility and the issuance of the 9¹/₄% senior notes in the aggregate principal amount of \$1.0 billion.

First and Second Lien Credit Agreements

On November 3, 2006, we paid the lenders under the first and second lien credit agreements \$931.5 million plus accrued interest of \$8.6 million to extinguish the aggregate outstanding principal balance under the first and second lien credit agreements. As a result, we recorded a loss on extinguishment of debt in the amount of approximately \$42.7 million.

On November 21, 2006, we terminated the interest rate cap agreement that was required by our first and second lien credit agreements. We received approximately \$4.3 million upon termination of the agreement. The proceeds from the termination of the agreement approximated its carrying value.

Bridge Credit Facilities

In July 2006, MetroPCS II, Inc., or MetroPCS II, an indirect wholly-owned subsidiary of MetroPCS Communications, Inc. (which has since merged into Wireless), entered into an Exchangeable Senior Secured Credit Agreement and Guaranty Agreement, dated as of July 13, 2006, or the secured bridge credit facility. The aggregate credit commitments available under the secured bridge credit facility were \$1.25 billion and were fully funded.

Table of Contents

On November 3, 2006, MetroPCS II repaid the aggregate outstanding principal balance under the secured bridge credit facility of \$1.25 billion and accrued interest of \$5.9 million. As a result, MetroPCS II recorded a loss on extinguishment of debt of approximately \$7.0 million.

In October 2006, MetroPCS IV, Inc., an indirect wholly-owned subsidiary of MetroPCS Communications, Inc. (which has since merged into Wireless), entered into an additional Exchangeable Senior Unsecured Bridge Credit Facility, or the unsecured bridge credit facility. The aggregate credit commitments available under the unsecured bridge credit facility were \$250.0 million and were fully funded.

On November 3, 2006, MetroPCS IV, Inc. repaid the aggregate outstanding principal balance under the unsecured bridge credit facility of \$250.0 million and accrued interest of \$1.2 million. As a result, MetroPCS IV, Inc. recorded a loss on extinguishment of debt of approximately \$2.4 million.

Senior Secured Credit Facility

Wireless, an indirect wholly-owned subsidiary of MetroPCS Communications, Inc., entered into the Senior Secured Credit Facility on November 3, 2006, or senior secured credit facility. The senior secured credit facility consists of a \$1.6 billion term loan facility and a \$100 million revolving credit facility. The term loan facility is repayable in quarterly installments in annual aggregate amounts equal to 1% of the initial aggregate principal amount of \$1.6 billion. The term loan facility will mature in November 2013. The revolving credit facility will mature in November 2011.

The facilities under the senior secured credit agreement are guaranteed by MetroPCS Communications, Inc., MetroPCS, Inc. and each of Wireless' direct and indirect present and future wholly-owned domestic subsidiaries. The facilities are not guaranteed by Royal Street, but Wireless has pledged the promissory note given by Royal Street in connection with amounts borrowed by Royal Street from Wireless and we pledged the limited liability company member interests we hold in Royal Street. The senior secured credit facility contains customary events of default, including cross defaults. The obligations are also secured by the capital stock of Wireless as well as substantially all of the present and future assets of Wireless and each of its direct and indirect present and future wholly-owned subsidiaries (except as prohibited by law and certain permitted exceptions).

Under the senior secured credit agreement, Wireless will be subject to certain limitations, including limitations on its ability to incur additional debt, make certain restricted payments, sell assets, make certain investments or acquisitions, grant liens and pay dividends. Wireless is also subject to certain financial covenants, including maintaining a maximum senior secured consolidated leverage ratio and, under certain circumstances, maximum consolidated leverage and minimum fixed charge coverage ratios. There is no prohibition on our ability to make investments in or loan money to Royal Street.

Amounts outstanding under our senior secured credit facility bear interest at a LIBOR rate plus a margin as set forth in the facility and the terms of the senior secured credit facility require us to enter into interest rate hedging agreements that fix the interest rate in an amount equal to at least 50% of our outstanding indebtedness, including the notes.

On November 21, 2006, Wireless entered into a three-year interest rate protection agreement to manage its interest rate risk exposure and fulfill a requirement of its senior secured credit facility. The agreement covers a notional amount of \$1.0 billion and effectively converts this portion of Wireless' variable rate debt to fixed-rate debt at an annual rate of 7.169%. The quarterly interest settlement periods began on February 1, 2007. The interest rate protection agreement expires on February 1, 2010.

On February 20, 2007, Wireless entered into an amendment to the senior secured credit facility. Under the amendment, the margin used to determine the senior secured credit facility interest rate was reduced to 2.25% from 2.50%.

On April 30, 2008, Wireless entered into an additional two-year interest rate protection agreement to manage its interest rate risk exposure. The agreement was effective on June 30, 2008 and covers a notional amount of \$500.0 million and effectively converts this portion of Wireless' variable rate debt to fixed rate debt at an annual rate of 5.464%. The monthly interest settlement periods began on June 30, 2008. The interest rate protection agreement expires on June 30, 2010.

Table of Contents***9¹/₄% Senior Notes Due 2014***

On November 3, 2006, Wireless consummated the sale of \$1.0 billion principal amount of its initial senior notes. On June 6, 2007, Wireless consummated the sale of an additional \$400.0 million principal amount of additional notes. The initial senior notes and the additional notes are referred to together as the 9¹/₄% senior notes. The 9¹/₄% senior notes are unsecured obligations and are guaranteed by MetroPCS Communications, Inc., MetroPCS, Inc., and all of Wireless direct and indirect wholly-owned domestic restricted subsidiaries, but are not guaranteed by Royal Street. Interest is payable on the initial senior notes on May 1 and November 1 of each year, beginning with May 1, 2007, with respect to the initial senior notes, and beginning on November 1, 2007 with respect to the additional notes. Wireless may, at its option, redeem some or all of the 9¹/₄% senior notes at any time on or after November 1, 2010 for the redemption prices set forth in the indenture governing the 9¹/₄% senior notes. In addition, Wireless may also redeem up to 35% of the aggregate principal amount of the 9¹/₄% senior notes with the net cash proceeds of certain sales of equity securities, including the sale of common stock.

On January 14, 2009, Wireless completed the sale of the new notes at a price equal to 89.50% of the principal amount of such new notes. On January 20, 2009, Wireless consummated the sale of the new notes resulting in net proceeds of \$480.5 million. The net proceeds from the sale of the new notes will be used for general corporate purposes which could include working capital, capital expenditures, future liquidity needs, additional opportunistic spectrum acquisitions, corporate development opportunities and future technology initiatives. The new notes are unsecured obligations and are guaranteed by MetroPCS, MetroPCS, Inc., and all of Wireless direct and indirect wholly-owned subsidiaries, but are not guaranteed by Royal Street. Interest is payable on the new notes on May 1 and November 1 of each year, beginning on May 1, 2009.

Capital Lease Obligations

We have entered into various non-cancelable DAS capital lease agreements, with expirations through 2024, covering dedicated optical fiber. Assets and future obligations related to capital leases are included in the accompanying consolidated balance sheet in property and equipment and long-term debt, respectively. Depreciation of assets held under capital lease obligations is included in depreciation and amortization expense.

Capital Expenditures and Other Asset Acquisitions and Dispositions

Capital Expenditures. We and Royal Street currently expect to incur capital expenditures in the range of \$0.7 billion to \$0.9 billion on a consolidated basis for the year ending December 31, 2009. We plan to focus on building out networks to cover approximately 40 million of total population during 2009-2010, including the launch of the Boston and New York metropolitan areas in February 2009.

During the year ended December 31, 2008, we and Royal Street incurred \$954.6 million in capital expenditures. These capital expenditures were primarily for the expansion and improvement of our existing network infrastructure and costs associated with the construction of new markets.

During the year ended December 31, 2007, we and Royal Street incurred \$767.7 million in capital expenditures. These capital expenditures were primarily for the expansion and improvement of our existing network infrastructure and costs associated with the construction of new markets.

During the year ended December 31, 2006, we had \$550.7 million in capital expenditures. These capital expenditures were primarily for the expansion and improvement of our existing network infrastructure and costs associated with the construction of new markets.

Other Acquisitions and Dispositions. On November 29, 2006, we were granted AWS licenses as a result of FCC Auction 66, for a total aggregate purchase price of approximately \$1.4 billion.

On December 21, 2007, we executed an agreement with PTA Communications, Inc., or PTA, to purchase 10 MHz of PCS spectrum from PTA for the basic trading area of Jacksonville, Florida. We also entered into agreements with NTCH, Inc. (dba Cleartalk PCS) and PTA-FLA, Inc. for the purchase of certain of their assets used in providing PCS wireless telecommunications services in the Jacksonville market. On January 17, 2008, we closed on the acquisition of the assets and paid a total of \$18.6 million in cash for these assets, exclusive of transaction costs. On May 13, 2008, we closed on the purchase of the 10 MHz of spectrum from PTA for the basic trading area of Jacksonville, Florida for consideration of \$6.5 million in cash.

Table of Contents

We participated as a bidder in Auction 73 and on June 26, 2008, we were granted one 12 MHz 700 MHz license for an aggregate purchase price of approximately \$313.3 million. The 700 MHz License supplements the 10 MHz of advanced wireless spectrum previously granted to us in the Boston-Worcester, Massachusetts/New Hampshire/Rhode Island/Vermont Economic Area as a result of Auction 66.

On various dates in 2008, we consummated agreements for spectrum acquisitions from third-parties in the aggregate amount of approximately \$15.3 million.

On September 26, 2008, we entered into a spectrum exchange agreement covering licenses in certain markets with Leap Wireless International, Inc. (Leap Wireless) with Leap Wireless acquiring an additional 10 MHz of spectrum in San Diego and Fresno, California; Seattle, Washington and certain other Washington and Oregon markets, and we will acquire an additional 10 MHz of spectrum in Shreveport-Bossier City, Louisiana; Lakeland-Winter Haven, Florida; and Dallas-Ft. Worth, Texas and certain other North Texas markets, with consummation subject to customary closing conditions.

On various dates in 2008, we entered into agreements for the acquisition of spectrum from third parties in the aggregate amount of approximately \$8.3 million. Consummation of these acquisitions is conditioned upon customary closing conditions, including approval by the FCC.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Contractual Obligations and Commercial Commitments

The following table provides aggregate information about our contractual obligations as of December 31, 2008. See Note 12 to our annual consolidated financial statements included elsewhere in this report.

	Total	Payments Due by Period			
		Less Than 1 Year	1 - 3 Years (In thousands)	3 - 5 Years	More Than 5 Years
Contractual Obligations:					
Long-term debt, including current portion	\$ 2,964,000	\$ 16,000	\$ 32,000	\$ 1,516,000	\$ 1,400,000
Interest expense on long-term debt(1)	1,232,843	230,269	457,444	437,213	107,917
Alcatel Lucent purchase commitment	21,600	21,600			
Contractual tax obligations (2)	2,773	2,773			
Capital lease obligations	186,499	10,213	21,357	22,658	132,271
Operating leases	1,753,010	204,296	419,156	398,231	731,327
Total cash contractual obligations	\$ 6,160,725	\$ 485,151	\$ 929,957	\$ 2,374,102	\$ 2,371,515

(1) Interest expense on long-term debt includes future interest payments on outstanding obligations under our senior

secured credit facility and 9 1/4% senior notes. The senior secured credit facility bears interest at a floating rate tied to a fixed spread to the London Inter Bank Offered Rate. The interest expense presented in this table is based on the rates at December 31, 2008 which was 6.443% for the senior secured credit facility.

- (2) Represents the liability reported in accordance with the Company's adoption of the provisions of FIN 48. Due to the high degree of uncertainty regarding the timing of potential future cash outflows associated with these liabilities, other than the items included in the table above, the Company was unable to make a reasonably reliable estimate of the amount and period in which these remaining

liabilities might
be paid.

Accordingly,
unrecognized
tax benefits of
\$16.6 million as
of December 31,
2008, have been
excluded from
the contractual
obligations table
above. For
further
information
related to
unrecognized
tax benefits, see
Note 18, Income
Taxes, to the
consolidated
financial
statements
included in this
Report.

Inflation

We believe that inflation has not materially affected our operations.

Table of Contents**Effect of New Accounting Standards**

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations*, (SFAS No. 141(R)), which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS No. 141(R) also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS No. 141(R) is effective for financial statements issued for fiscal years beginning after December 15, 2008 and early adoption is prohibited. The implementation of this standard will not have a material impact on our financial condition or results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, (SFAS No. 160), which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS No. 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for financial statements issued for fiscal years beginning after December 15, 2008 and early adoption is prohibited. The implementation of this standard will not have a material impact on our financial condition or results of operations.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, (SFAS No. 161). SFAS No. 161 requires enhanced disclosures about a company's derivative and hedging activities. These enhanced disclosures will discuss (a) how and why a company uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under FASB Statement No. 133 and its related interpretations and (c) how derivative instruments and related hedged items affect a company's financial position, results of operations and cash flows. SFAS No. 161 is effective for fiscal years beginning on or after November 15, 2008, with earlier adoption allowed. The implementation of this standard did not have a material impact on our financial condition or results of operations.

In April 2008, the FASB issued FSP SFAS No. 142-3, *Determination of the Useful Life of Intangible Assets*, (FSP SFAS No. 142-3). FSP SFAS No. 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets*. FSP SFAS No. 142-3 is effective for fiscal years beginning after December 15, 2008. The implementation of this standard did not have a material impact on our financial condition or results of operations.

In October 2008, the FASB issued FSP SFAS No. 157-3 *Determining Fair Value of a Financial Asset in a Market That Is Not Active*, (FSP SFAS No. 157-3). FSP SFAS No. 157-3 clarified the application of SFAS No. 157 in an inactive market. It demonstrates how the fair value of a financial asset is determined when the market for that financial asset is inactive. FSP SFAS No. 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The implementation of this standard did not have a material impact on our financial condition or results of operations.

In November 2008, the FASB issued EITF No. 08-6, *Equity Method Investment Accounting Considerations*, (EITF No. 08-6). EITF No. 08-6 clarifies the accounting treatment for certain transactions and impairment considerations involving equity method investments. EITF No. 08-6 is effective for fiscal years and interim periods beginning on or after December 15, 2008, consistent with the effective dates of SFAS No. 141(R) and SFAS No. 160. The implementation of this standard did not have a material impact on our financial condition or results of operations.

Table of Contents**Item 7A. *Quantitative and Qualitative Disclosures About Market Risk***

Market risk is the potential loss arising from adverse changes in market prices and rates, including interest rates. We do not routinely enter into derivatives or other financial instruments for trading, speculative or hedging purposes, unless it is hedging interest rate risk exposure or is required by our senior secured credit facility. We do not currently conduct business internationally, so we are generally not subject to foreign currency exchange rate risk.

As of December 31, 2008, we had approximately \$1.6 billion in outstanding indebtedness under our senior secured credit facility that bears interest at floating rates based on the London Inter Bank Offered Rate, or LIBOR, plus 2.25%. The interest rate on the outstanding debt under our senior secured credit facility as of December 31, 2008 was 6.443%. On November 21, 2006, to manage our interest rate risk exposure and fulfill a requirement of our senior secured credit facility, we entered into a three-year interest rate protection agreement. This agreement covers a notional amount of \$1.0 billion and effectively converts this portion of our variable rate debt to fixed-rate debt at an annual rate of 7.169%. The quarterly interest settlement periods began on February 1, 2007. The interest rate swap agreement expires in 2010. On April 30, 2008, to manage our interest rate risk exposure, we entered into a two-year interest rate protection agreement. The agreement was effective on June 30, 2008, covers a notional amount of \$500.0 million and effectively converts this portion of our variable rate debt to fixed rate debt at an annual rate of 5.464%. The monthly interest settlement periods began on June 30, 2008. The interest rate protection agreement expires on June 30, 2010. If market LIBOR rates increase 100 basis points over the rates in effect at December 31, 2008, annual interest expense on the approximately \$64.0 million in variable rate debt would increase approximately \$0.6 million.

Item 8. *Financial Statements and Supplementary Data*

The information required by this item is included in Part IV, Item 15(a)(1) and are presented beginning on Page F-1.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures***Evaluation of Disclosure Controls and Procedures**

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported as required by the SEC and that such information is accumulated and communicated to management, including our CEO and CFO, as appropriate, to allow for appropriate and timely decisions regarding required disclosure. Our management, with participation by our CEO and CFO, has designed the Company's disclosure controls and procedures to provide reasonable assurance of achieving these desired objectives. As required by SEC Rule 13a-15(b), we conducted an evaluation, with the participation of our CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2008, the end of the period covered by this report. In designing and evaluating the disclosure controls and procedures (as defined by SEC Rule 13a-15(e)), our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is necessarily required to apply judgment in evaluating the cost-benefit relationship of possible controls and objectives. Based upon that evaluation, our CEO and CFO have concluded that our disclosure controls and procedures are effective as of December 31, 2008.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal controls over financial reporting are designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree or compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including our CEO and CFO, we conducted an evaluation of the effectiveness of internal control over financial reporting as of December 31, 2008. In conducting this evaluation, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework*. Based on our evaluation and those criteria, our internal control over financial reporting was effective as of December 31, 2008.

The effectiveness of internal control over financial reporting as of December 31, 2008, has been audited by Deloitte & Touche LLP, the independent registered public accounting firm who also audited our consolidated financial statements. Deloitte & Touche's attestation report on the effectiveness of our internal control over financial reporting appears on page F-2.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's fiscal quarter ended December 31, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III**Item 10. Directors, Executive Officers and Corporate Governance**

The information required by this item is incorporated by reference to the definitive Proxy Statement for the 2009 Annual Meeting of our Stockholders, which will be filed with the Securities and Exchange Commission, or SEC, no later than 120 days after December 31, 2008.

Item 11. Executive Compensation

The information required by this item is incorporated by reference to the definitive Proxy Statement for the 2009 Annual Meeting of our Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2008.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this item is incorporated by reference to the definitive Proxy Statement for the 2009 Annual Meeting of our Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2008.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item is incorporated by reference to the definitive Proxy Statement for the 2009 Annual Meeting of our Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2008.

Item 14. Principal Accounting Fees and Services

The information required by this item is incorporated by reference to the definitive Proxy Statement for the 2009 Annual Meeting of our Stockholders, which will be filed with the SEC no later than 120 days after December 31, 2008.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
MetroPCS Communications, Inc.

Richardson, Texas

We have audited the accompanying consolidated balance sheets of MetroPCS Communications, Inc. and subsidiaries (the Company) as of December 31, 2008 and 2007, and the related consolidated statements of income and comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of MetroPCS Communications, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 10 to the consolidated financial statements, the Company changed its method of accounting for fair value measurements of financial assets and liabilities as of January 1, 2008 and as discussed in Note 2 for uncertainty in income taxes as of January 1, 2007.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2008, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 27, 2009 expressed an unqualified opinion on the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
MetroPCS Communications, Inc.

Richardson, Texas

We have audited the internal control over financial reporting of MetroPCS Communications, Inc. and subsidiaries (the Company) as of December 31, 2008, based on the criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on the criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2008, and the related consolidated statements of income and comprehensive income, stockholders' equity, and the cash flows for each of the three years in the period ended December 31, 2008, of the Company and our report dated February 27, 2009 expressed an unqualified opinion on those financial statements (which expresses an unqualified opinion and includes an explanatory paragraph relating to a change in the method of accounting for fair value measurements of financial assets and liabilities as of January 1, 2008 and for uncertainty in income taxes as of January 1, 2007).

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

1. Organization and Business Operations:

MetroPCS Communications, Inc. (MetroPCS), a Delaware corporation, together with its consolidated subsidiaries (the Company), is a wireless telecommunications carrier that offers wireless broadband mobile services. As of December 31, 2008, the Company offered services primarily in the metropolitan areas of Atlanta, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, Miami, Orlando/Jacksonville, Philadelphia, San Francisco, Sacramento and Tampa/Sarasota. In February 2009, the Company launched service in the Boston and New York metropolitan areas. The Company sells products and services to customers through Company-owned retail stores as well as through relationships with independent retailers.

On November 24, 2004, MetroPCS, through its wholly-owned subsidiaries, and C9 Wireless, LLC, an independent third-party, formed a limited liability company called Royal Street Communications, LLC (Royal Street Communications), to bid on spectrum auctioned by the FCC in Auction 58. The Company owns 85% of the limited liability company member interest of Royal Street Communications, but may only elect two of the five members of Royal Street Communications management committee (See Note 4). The consolidated financial statements include the balances and results of operations of MetroPCS and its wholly-owned subsidiaries as well as the balances and results of operations of Royal Street Communications and its wholly-owned subsidiaries (collectively, Royal Street). The Company consolidates its interest in Royal Street in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46-R, *Consolidation of Variable Interest Entities*, (FIN 46(R)). Royal Street qualifies as a variable interest entity under FIN 46(R) because the Company is the primary beneficiary of Royal Street and will absorb all of Royal Street s expected losses. The redeemable minority interest in Royal Street is included in long-term liabilities. All intercompany accounts and transactions between the Company and Royal Street have been eliminated in the consolidated financial statements.

On March 14, 2007, the Company s Board of Directors approved a 3 for 1 stock split of the Company s common stock effected by means of a stock dividend of two shares of common stock for each share of common stock issued and outstanding on that date. All share, per share and conversion amounts relating to common stock and stock options included in the accompanying consolidated financial statements have been retroactively adjusted to reflect the stock split.

On April 24, 2007, MetroPCS consummated its initial public offering (the Offering) of 57,500,000 shares of common stock priced at \$23.00 per share (less underwriting discounts and commissions). MetroPCS offered 37,500,000 shares of common stock and certain of MetroPCS existing stockholders offered 20,000,000 shares of common stock in the Offering, which included 7,500,000 shares sold by MetroPCS existing stockholders pursuant to the underwriters exercise of their over-allotment option. Concurrent with the Offering, all outstanding shares of preferred stock, including accrued but unpaid dividends, were converted into 150,962,644 shares of common stock. The shares began trading on April 19, 2007 on the New York Stock Exchange under the symbol PCS.

2. Summary of Significant Accounting Policies:***Consolidation***

The accompanying consolidated financial statements include the balances and results of operations of MetroPCS and its wholly- and majority-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

Operating Segments

SFAS No. 131 *Disclosure About Segments of an Enterprise and Related Information*, (SFAS No. 131), establishes standards for the way that public business enterprises report information about operating segments in annual financial statements. At December 31, 2008, the Company had thirteen operating segments based on geographic regions within the United States: Atlanta, Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, Miami, New York, Orlando/Jacksonville, Philadelphia, San Francisco, Sacramento and Tampa/Sarasota. The Company aggregates its operating segments into two reportable segments: Core Markets and Expansion Markets (See Note 20).

Use of Estimates in Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect the reported amounts of certain assets and liabilities and disclosure of contingent liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. Actual results could differ from those estimates. The most significant of such estimates used by the Company include:

allowance for uncollectible accounts receivable;

valuation of inventories;

valuation of investment securities;

estimated useful life of assets;

accrued property, plant and equipment for the percentage of construction services received;

impairment of long-lived assets and indefinite-lived assets;

likelihood of realizing benefits associated with temporary differences giving rise to deferred tax assets;

reserves for uncertain tax positions;

estimated customer life in terms of amortization of certain deferred revenue;

valuation of common stock prior to the Offering; and

stock-based compensation expense.

Derivative Instruments and Hedging Activities

The Company accounts for its hedging activities under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (SFAS No. 133). The standard requires the Company to recognize all derivatives on the consolidated balance sheet at fair value. Changes in the fair value of derivatives are to be recorded each period in earnings or on the accompanying consolidated balance sheets in accumulated other comprehensive income (loss) depending on the type of hedged transaction and whether the derivative is designated and effective as part of a hedged transaction. Gains or losses on derivative instruments reported in accumulated other comprehensive income (loss) must be reclassified to earnings in the period in which earnings are affected by the underlying hedged transaction and the ineffective portion of all hedges must be recognized in earnings in the current period. The Company's use of derivative financial instruments is discussed in Note 6.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

Cash and Cash Equivalents

The Company includes as cash and cash equivalents (i) cash on hand, (ii) cash in bank accounts, (iii) investments in money market funds, and (iv) treasury securities with an original maturity of 90 days or less.

Inventories

Substantially all of the Company's inventories are stated at the lower of average cost or market. Inventories consist mainly of handsets that are available for sale to customers and independent retailers.

Allowance for Uncollectible Accounts Receivable

The Company maintains allowances for uncollectible accounts for estimated losses resulting from the inability of independent retailers to pay for equipment purchases and for amounts estimated to be uncollectible from other carriers. The following table summarizes the changes in the Company's allowance for uncollectible accounts (in thousands):

	2008	2007	2006
Balance at beginning of period	\$ 2,908	\$ 1,950	\$ 2,383
Additions:			
Charged to expense	8	129	31
Direct reduction to revenue and other accounts	1,337	1,037	929
Deductions	(147)	(208)	(1,393)
Balance at end of period	\$ 4,106	\$ 2,908	\$ 1,950

Prepaid Charges

Prepaid charges consisted of the following (in thousands):

	2008	2007
Prepaid vendor purchases	\$ 17,829	\$ 37,054
Prepaid rent	23,689	13,996
Prepaid maintenance and support contracts	4,482	3,961
Prepaid insurance	2,165	2,162
Prepaid advertising	2,331	264
Other	5,851	3,032
Prepaid charges	\$ 56,347	\$ 60,469

Property and Equipment

Property and equipment, net, consisted of the following (in thousands):

	2008	2007
Construction-in-progress	\$ 898,454	\$ 393,282
Network infrastructure	2,522,206	1,901,119
Office equipment	63,848	44,059
Leasehold improvements	47,784	33,410
Furniture and fixtures	10,273	7,833
Vehicles	311	207
	3,542,876	2,379,910

Accumulated depreciation and amortization	(695,125)	(488,499)
Property and equipment, net	\$ 2,847,751	\$ 1,891,411

Property and equipment are stated at cost. Additions and improvements are capitalized, while expenditures that do not enhance or extend the asset's useful life are charged to operating expenses as incurred. When the Company sells, disposes of or retires property and equipment, the related gains or losses are included in operating results.

Depreciation is applied using the straight-line method over the estimated useful lives of the assets once the assets are placed in service, which are seven to ten years for network infrastructure assets, three to ten years for capitalized

F-10

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

interest, up to fifteen years for capital lease assets, three to seven years for office equipment, which includes computer equipment, three to seven years for furniture and fixtures and five years for vehicles. Leasehold improvements are amortized over the shorter of the remaining term of the lease and any renewal periods reasonably assured or the estimated useful life of the improvement. Maintenance and repair costs are charged to expense as incurred. The Company follows the provisions of SFAS No. 34, *Capitalization of Interest Cost*, with respect to its FCC licenses and the related construction of its network infrastructure assets. Capitalization commences with pre-construction period administrative and technical activities, which includes obtaining leases, zoning approvals and building permits, and ceases at the point in which the asset is ready for its intended use, which generally coincides with the market launch date. For the years ended December 31, 2008, 2007 and 2006, the Company capitalized interest in the amount of \$64.2 million, \$34.9 million and \$17.5 million, respectively.

Impairment of Long-Lived Assets

The Company assesses potential impairments to its long-lived assets, including property and equipment, when there is evidence that events or changes in circumstances indicate that the carrying value may not be recoverable. An impairment loss may be required to be recognized when the undiscounted cash flows expected to be generated by a long-lived asset (or group of such assets) is less than its carrying value. Any required impairment loss would be measured as the amount by which the asset's carrying value exceeds its fair value and would be recorded as a reduction in the carrying value of the related asset and charged to results of operations.

Restricted Cash and Investments

Restricted cash and investments consist of cash deposited in escrow accounts, money market instruments and short-term investments. In general, these investments are pledged as collateral against letters of credit used as security for payment obligations and are presented as current or non-current assets based on the terms of the underlying letters of credit.

Long-Term Investments

The Company accounts for its investment securities in accordance with SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. At December 31, 2008, all of the Company's long-term investment securities were reported at fair value. Due to the lack of availability of observable market quotes on the Company's investment portfolio of auction rate securities, the fair value was estimated based on valuation models that rely exclusively on unobservable inputs including those that are based on expected cash flow streams and collateral values, including assessments of counterparty credit quality, default risk underlying the security, discount rates and overall capital market liquidity.

Declines in fair value that are considered other-than-temporary are charged to earnings.

The valuation of the Company's investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact the Company's valuation include changes to credit ratings of the securities as well as the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral values, discount rates, counterparty risk and ongoing strength and quality of market credit and liquidity (See Note 5).

Revenues and Cost of Service

The Company's wireless services are provided on a month-to-month basis and are paid in advance. Revenues from wireless services are recognized as services are rendered. Amounts received in advance are recorded as deferred revenue. Long-term deferred revenue is included in other long-term liabilities. Cost of service generally includes the direct costs of operating the Company's networks.

The Company follows the provisions of Emerging Issues Task Force (EITF) No. 00-21, *Accounting for Revenue Arrangements with Multiple Deliverables*, (EITF No. 00-21). Under the provisions of EITF No. 00-21, arrangements that involve the delivery or performance of multiple products, services and/or rights to use assets constitutes a multiple element arrangement that should be divided into separate units of accounting with the consideration received allocated among the separate units of accounting using the residual method of accounting.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

The Company has determined that the sale of wireless services through its direct and indirect sales channels with an accompanying handset constitutes a revenue arrangement with multiple deliverables. In accordance with EITF No. 00-21, the Company divides these arrangements into separate units of accounting, and allocates the consideration between the handset and the wireless service using the residual method of accounting. Consideration received for the wireless service is recognized at fair value as service revenue when earned, and any remaining consideration received is recognized as equipment revenue when the handset is delivered and accepted by the customer.

Equipment revenues arise from the sale of handsets and accessories. Revenues and related costs from the sale of handsets in the Company's retail locations are recognized at the point of sale. Handsets shipped to independent retailers are recorded as deferred revenue and deferred charges upon shipment by the Company and are recognized as equipment revenues and related costs when service is activated by its customers. Revenues and related costs from the sale of accessories are recognized at the point of sale. The costs of handsets and accessories sold are recorded in cost of equipment.

Sales incentives offered without charge to customers related to the sale of handsets are recognized as a reduction of revenue when the related equipment revenue is recognized. Customers have the right to return handsets within 30 days or 60 minutes of usage, whichever occurs first.

Federal Universal Service Fund (FUSF), E-911 and various other fees are assessed by various governmental authorities in connection with the services that the Company provides to its customers. The Company reports these fees on a gross basis in service revenues and cost of service on the accompanying statements of income and comprehensive income. For the years ended December 31, 2008, 2007 and 2006, the Company recorded approximately \$135.6 million, \$94.0 million and \$44.3 million, respectively, of FUSF, E-911, and other fees. Sales, use and excise taxes are reported on a net basis in selling, general and administrative expenses on the accompanying statements of income and comprehensive income.

Software Costs

In accordance with Statement of Position (SOP) 98-1, *Accounting for Costs of Computer Software Developed or Obtained for Internal Use*, (SOP 98-1), certain costs related to the purchase of internal use software are capitalized and amortized over the estimated useful life of the software. For the years ended December 31, 2008, 2007 and 2006, approximately \$14.6 million, \$9.2 million and \$8.8 million, respectively, of purchased software costs under SOP 98-1 were placed in service. The Company amortizes software costs over a three-year life and for the years ended December 31, 2008, 2007 and 2006, the Company recognized amortization expense of approximately \$10.7 million, \$5.5 million and \$2.8 million, respectively. Capitalized software costs are classified as office equipment.

FCC Licenses and Microwave Relocation Costs

The Company operates wireless broadband mobile networks under licenses granted by the FCC for a particular geographic area on spectrum allocated by the FCC for wireless broadband services. In addition, in November 2006, the Company acquired a number of advanced wireless services (AWS) licenses which can be used to provide services comparable to the services provided by the Company, and other advanced wireless services. In June 2008, the Company acquired a 700 MHz license that also can be used to provide similar services. The personal communications services (PCS) licenses previously included, and the AWS licenses currently include, the obligation and resulting costs to relocate existing fixed microwave users of the Company's licensed spectrum if the Company's spectrum interfered with their systems and/or reimburse other carriers (according to FCC rules) that relocated prior users if the relocation benefits the Company's system. Accordingly, the Company incurred costs related to microwave relocation in constructing its PCS and AWS networks. The PCS, AWS, and 700 MHz licenses and microwave relocation costs are recorded at cost. Although PCS, AWS and 700 MHz licenses are issued with a stated term, ten years in the case of the PCS licenses, fifteen years in the case of the AWS licenses and 10 years from the date of the digital television transition for 700 MHz licenses, the renewal of PCS, AWS and 700 MHz licenses is generally a routine matter without substantial cost and the Company has determined that no legal,

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

regulatory, contractual, competitive, economic, or other factors currently exist that limit the useful life of its PCS, AWS and 700 MHz licenses. As such, under the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets*, the Company does not amortize PCS, AWS and 700 MHz licenses and microwave relocation costs as they are considered to have indefinite lives and together represent the cost of the Company's spectrum. The Company is required to test indefinite-lived intangible assets, consisting of PCS, AWS, and 700 MHz licenses and microwave relocation costs, for impairment on an annual basis based upon a fair value approach. Indefinite-lived intangible assets must be tested between annual tests if events or changes in circumstances indicate that the asset might be impaired. These events or circumstances could include a significant change in the business climate, including a significant sustained decline in an entity's market value, legal factors, operating performance indicators, competition, sale or disposition of a significant portion of the business, or other factors. The Company completed its impairment tests during the third quarter of 2008. There have been no indicators of impairment and no impairment has been recognized through December 31, 2008.

Advertising and Promotion Costs

Advertising and promotion costs are expensed as incurred. Advertising costs totaled \$99.0 million, \$73.2 million and \$46.4 million during the years ended December 31, 2008, 2007 and 2006, respectively.

Income Taxes

The Company records income taxes pursuant to SFAS No. 109, *Accounting for Income Taxes*, (SFAS No. 109). SFAS No. 109 uses an asset and liability approach to account for income taxes, wherein deferred taxes are provided for book and tax basis differences for assets and liabilities. In the event differences between the financial reporting basis and the tax basis of the Company's assets and liabilities result in deferred tax assets, a valuation allowance is provided for a portion or all of the deferred tax assets when there is sufficient uncertainty regarding the Company's ability to recognize the benefits of the assets in future years.

On January 1, 2007, the Company adopted FASB Interpretation No. 48 *Accounting for Uncertainty in Income Taxes*, (FIN 48), which clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with SFAS No. 109. FIN 48 provides guidance on the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition issues. The adoption of FIN 48 did not have a significant impact on the Company's financial statements. There was no cumulative effect adjustment related to adopting FIN 48.

Other Comprehensive Income (Loss)

Unrealized gains on available-for-sale securities and cash flow hedging derivatives are reported in accumulated other comprehensive loss as a separate component of stockholders' equity until realized. Realized gains and losses on available-for-sale securities are included in interest and other income. Gains or losses on cash flow hedging derivatives reported in accumulated other comprehensive loss are reclassified to earnings in the period in which earnings are affected by the underlying hedged transaction.

Stock-Based Compensation

The Company accounts for share-based awards exchanged for employee services in accordance with SFAS No. 123(R), *Share-Based Payment*, (SFAS No. 123(R)) under the modified prospective method of adoption. Under SFAS No. 123(R), share-based compensation cost is measured at the grant date, based on the estimated fair value of the award, and is recognized as expense over the employee's requisite service period.

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

Asset Retirement Obligations

The Company accounts for asset retirement obligations as determined by SFAS No. 143, *Accounting for Asset Retirement Obligations*, (SFAS No. 143) and FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations, an interpretation of FASB Statement No. 143*, (FIN No. 47). SFAS No. 143 and FIN No. 47 address financial accounting and reporting for legal obligations associated with the retirement of tangible long-lived assets and the related asset retirement costs. SFAS No. 143 requires that companies recognize the fair value of a liability for an asset retirement obligation in the period in which it is incurred. When the liability is initially recorded, the entity capitalizes a cost by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period, and the capitalized cost is depreciated over the estimated useful life of the related asset. Upon settlement of the liability, an entity either settles the obligation for its recorded amount or incurs a gain or loss upon settlement.

The Company is subject to asset retirement obligations associated with its cell site operating leases, which are subject to the provisions of SFAS No. 143 and FIN No. 47. Cell site lease agreements may contain clauses requiring restoration of the leased site at the end of the lease term to its original condition, creating an asset retirement obligation. This liability is classified under other long-term liabilities. Landlords may choose not to exercise these rights as cell sites are considered useful improvements. In addition to cell site operating leases, the Company has leases related to switch site, retail, and administrative locations subject to the provisions of SFAS No. 143 and FIN No. 47.

The following table summarizes the Company's asset retirement obligation transactions (in thousands):

	2008	2007
Beginning asset retirement obligations	\$ 14,298	\$ 6,685
Liabilities incurred	28,816	6,929
Reductions	(138)	(755)
Accretion expense	3,542	1,439
Ending asset retirement obligations	\$ 46,518	\$ 14,298

Earnings Per Share

Basic earnings per share (EPS) are based upon the weighted average number of common shares outstanding for the period. Diluted EPS is computed in the same manner as EPS after assuming issuance of common stock for all potentially dilutive equivalent shares, whether exercisable or not.

The Series D Preferred Stock and Series E Preferred Stock (collectively, the preferred stock) that was outstanding during the years ended December 31, 2007 and 2006 are participating securities, such that in the event a dividend is declared or paid on the common stock, the Company must simultaneously declare and pay a dividend on the preferred stock as if they had been converted into common stock. In accordance with EITF Issue 03-6, *Participating Securities and the Two-Class Method under FASB Statement No. 128*, (EITF 03-6), the preferred stock was considered a participating security for purposes of computing earnings or loss per common share and, therefore, the preferred stock was included in the computation of basic and diluted earnings per common share using the two-class method, except during periods of net losses. When determining basic earnings per common share under EITF 03-6, undistributed earnings for a period were allocated to a participating security based on the contractual participation rights of the security to share in those earnings as if all of the earnings for the period had been distributed (See Note 19).

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations*, (SFAS No. 141(R)), which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS No. 141(R) also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. SFAS No. 141(R) is effective for financial statements issued for fiscal years beginning after December 15, 2008 and early adoption is prohibited. The implementation of this standard did not have a material impact on the Company's financial condition or results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, (SFAS No. 160), which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS No. 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS No. 160 is effective for financial statements issued for fiscal years beginning after December 15, 2008 and early adoption is prohibited. The implementation of this standard did not have a material impact on the Company's financial condition or results of operations.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133*, (SFAS No. 161). SFAS No. 161 requires enhanced disclosures about a company's derivative and hedging activities. These enhanced disclosures will discuss (a) how and why a company uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under FASB Statement No. 133 and its related interpretations and (c) how derivative instruments and related hedged items affect a company's financial position, results of operations and cash flows. SFAS No. 161 is effective for fiscal years beginning on or after November 15, 2008, with earlier adoption allowed. The implementation of this standard did not have a material impact on the Company's financial condition or results of operations.

In April 2008, the FASB issued FSP SFAS No. 142-3, *Determination of the Useful Life of Intangible Assets*, (FSP SFAS No. 142-3). FSP SFAS No. 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, *Goodwill and Other Intangible Assets*. FSP SFAS No. 142-3 is effective for fiscal years beginning after December 15, 2008. The implementation of this standard did not have a material impact on the Company's financial condition or results of operations.

In October 2008, the FASB issued FSP SFAS No. 157-3 *Determining Fair Value of a Financial Asset in a Market That Is Not Active*, (FSP SFAS No. 157-3). FSP SFAS No. 157-3 clarified the application of SFAS No. 157 in an inactive market. It demonstrates how the fair value of a financial asset is determined when the market for that financial asset is inactive. FSP SFAS No. 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The implementation of this standard did not have a material impact on the Company's financial condition or results of operations.

In November 2008, the FASB issued EITF No. 08-6, *Equity Method Investment Accounting Considerations*, (EITF No. 08-6). EITF 08-6 clarifies the accounting treatment for certain transactions and impairment considerations involving equity method investments. EITF No. 08-6 is effective for fiscal years and interim periods beginning on or after December 15, 2008, consistent with the effective dates of SFAS No. 141(R) and SFAS No. 160. The implementation of this standard did not have a material impact on the Company's financial condition or results of operations.

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

3. Acquisitions:

On December 21, 2007, the Company executed an agreement with PTA Communications, Inc. (PTA) to purchase 10 MHz of PCS spectrum from PTA for the basic trading area of Jacksonville, Florida. The Company also entered into agreements with NTCH, Inc. (dba Cleartalk PCS) and PTA-FLA, Inc. for the purchase of certain of their assets used in providing PCS wireless telecommunications services in the Jacksonville market. On January 17, 2008, the Company closed on the acquisition of the assets and paid a total of \$18.6 million in cash for these assets, exclusive of transaction costs. On May 13, 2008, the Company closed on the purchase of the 10 MHz of spectrum from PTA for the basic trading area of Jacksonville, Florida for consideration of \$6.5 million in cash.

4. Majority-Owned Subsidiary:

On November 24, 2004, MetroPCS, through its wholly-owned subsidiaries, together with C9 Wireless, LLC, an independent, unaffiliated third-party, formed a limited liability company, Royal Street Communications, that qualified to bid for closed licenses and to receive bidding credits as a very small business DE on open licenses in FCC Auction 58. MetroPCS indirectly owns 85% of the limited liability company member interest of Royal Street Communications, but may elect only two of five members of the Royal Street Communications management committee, which has the full power to direct the management of Royal Street. Royal Street Communications has formed limited liability company subsidiaries which hold all licenses won in Auction 58. At Royal Street's request and subject to Royal Street's control and direction, MetroPCS assisted or is assisting in the construction of Royal Street's networks and has agreed to purchase, via a resale arrangement, as much as 85% of the engineered service capacity of Royal Street's networks. The Company's consolidated financial statements include the balances and results of operations of MetroPCS and its wholly-owned subsidiaries as well as the balances and results of operations of Royal Street. The Company consolidates its interest in Royal Street in accordance with FIN 46(R). Royal Street qualifies as a variable interest entity under FIN 46(R) because the Company is the primary beneficiary of Royal Street and will absorb all of Royal Street's expected losses. Royal Street does not guarantee MetroPCS Wireless, Inc.'s (Wireless) obligations under its senior secured credit facility, pursuant to which Wireless may borrow up to \$1.7 billion, as amended, (the Senior Secured Credit Facility) and its \$1.4 billion of 94% Senior Notes due 2014 (the 94% Senior Notes). See the non-guarantor subsidiaries information in Note 21 for the financial position and results of operations of Royal Street. C9 Wireless, LLC, a beneficial interest holder in Royal Street, has no recourse to the general credit of MetroPCS. All intercompany accounts and transactions between the Company and Royal Street have been eliminated in the consolidated financial statements.

C9 Wireless, LLC has a right to sell, or put, its limited liability company interests in Royal Street Communications to the Company at specific future dates based on a contractually determined amount (the Put Right). The Put Right represents an unconditional obligation of MetroPCS and its wholly-owned subsidiaries to purchase from C9 Wireless, LLC its limited liability company interests in Royal Street Communications. In accordance with SFAS No. 150,

Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity, this obligation is recorded as a liability and is measured at each reporting date at the amount of cash that would be required to settle the obligation under the contract terms if settlement occurred at the reporting date.

5. Investments:

The Company has historically invested its substantial cash balances in, among other things, securities issued and fully guaranteed by the United States or any state, highly rated commercial paper and auction rate securities, money market funds meeting certain criteria, and demand deposits. These investments are subject to credit, liquidity, market and interest rate risk. At December 31, 2008, the Company had invested substantially all of its cash and cash equivalents in money market funds consisting of treasury securities.

During the year ended December 31, 2007, the Company made an original investment of \$133.9 million in principal in certain auction rate securities, substantially all of which are secured by collateralized debt obligations with a portion of the underlying collateral being mortgage securities or related to mortgage securities. Consistent with the Company's investment policy guidelines, the auction rate securities investments held by the Company all had

AAA/Aaa credit ratings at the time of purchase. With the continuing liquidity issues experienced in the global
F-16

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

credit and capital markets, the auction rate securities held by the Company at December 31, 2008 continued to experience failed auctions as the amount of securities submitted for sale in the auctions exceeded the amount of purchase orders. In addition, all of the auction rate securities held by the Company have been downgraded or placed on credit watch.

The estimated market value of the Company's auction rate security holdings at December 31, 2008 was approximately \$6.0 million, which reflects a \$127.9 million cumulative adjustment to the original principal value of \$133.9 million. The estimated market value at December 31, 2007 was approximately \$36.1 million, which reflected a \$97.8 million adjustment to the aggregate principal value at that date. Although the auction rate securities continue to pay interest according to their stated terms, based on valuation models that rely exclusively on unobservable inputs, the Company recorded an impairment charge of \$30.9 million during the year ended December 31, 2008, reflecting an additional portion of the auction rate security holdings that the Company has concluded have an other-than-temporary decline in value. The offsetting increase in fair value of approximately \$0.8 million is reported in accumulated other comprehensive loss in the consolidated balance sheets.

Historically, given the liquidity created by auctions, the Company's auction rate securities were presented as current assets under short-term investments on the Company's balance sheet. Given the failed auctions, the Company's auction rate securities are illiquid until there is a successful auction for them or the Company sells them. Accordingly, the entire amount of such remaining auction rate securities has been reclassified from current to non-current assets and is presented in long-term investments on the accompanying balance sheets as of December 31, 2008 and 2007. The Company may incur additional impairments to its auction rate securities.

6. Derivative Instruments and Hedging Activities:

On November 21, 2006, Wireless entered into a three-year interest rate protection agreement to manage the Company's interest rate risk exposure and fulfill a requirement of Wireless' Senior Secured Credit Facility. The agreement covers a notional amount of \$1.0 billion and effectively converts this portion of Wireless' variable rate debt to fixed-rate debt at an annual rate of 7.169%. The quarterly interest settlement periods began on February 1, 2007. The interest rate protection agreement expires on February 1, 2010. This financial instrument is reported in other long-term liabilities at fair market value of approximately \$38.8 million as of December 31, 2008. The net change in fair value of \$15.3 million is reported in accumulated other comprehensive loss in the consolidated balance sheets, net of income taxes in the amount of approximately \$5.9 million. As of December 31, 2007, this financial instrument was reported in other long-term liabilities at fair market value of approximately \$23.5 million. The net change in fair value of \$13.6 million was reported in accumulated other comprehensive loss in the consolidated balance sheets, net of income taxes in the amount of approximately \$9.9 million.

On April 30, 2008, Wireless entered into an additional two-year interest rate protection agreement to manage the Company's interest rate risk exposure. The agreement was effective on June 30, 2008 and covers a notional amount of \$500.0 million and effectively converts this portion of Wireless' variable rate debt to fixed rate debt at an annual rate of 5.464%. The monthly interest settlement periods began on June 30, 2008. This agreement expires on June 30, 2010. This financial instrument is reported in other long-term liabilities at fair market value of approximately \$16.2 million as of December 31, 2008. The net change in fair value of \$16.2 million is reported in accumulated other comprehensive loss in the accompanying consolidated balance sheet, net of income taxes in the amount of approximately \$6.5 million.

The interest rate protection agreements have been designated as cash flow hedges. If a derivative is designated as a cash flow hedge and the hedging relationship qualifies for hedge accounting under the provisions of SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (SFAS No. 133), the effective portion of the change in fair value of the derivative is recorded in accumulated other comprehensive income (loss) and reclassified to interest expense in the period in which the hedged transaction affects earnings. The ineffective portion of the change in fair value of a derivative qualifying for hedge accounting is recognized in earnings in the period of the change. For the year ended December 31, 2008, the change in fair value did not result in ineffectiveness.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

At the inception of the cash flow hedges and quarterly thereafter, the Company performs an assessment to determine whether changes in the fair values or cash flows of the derivatives are deemed highly effective in offsetting changes in the fair values or cash flows of the hedged transaction. If at any time subsequent to the inception of the cash flow hedges, the assessment indicates that the derivative is no longer highly effective as a hedge, the Company will discontinue hedge accounting and recognize all subsequent derivative gains and losses in results of operations. The Company estimates that approximately \$44.5 million of net losses that are reported in accumulated other comprehensive loss at December 31, 2008 is expected to be reclassified into earnings within the next 12 months.

7. Intangible Assets:

The changes in the carrying value of intangible assets during the years ended December 31, 2008 and 2007 are as follows (in thousands):

	FCC Licenses	Microwave Relocation Costs
Balance at December 31, 2006	\$ 2,072,885	\$ 9,187
Additions	10	918
Balance at December 31, 2007	\$ 2,072,895	\$ 10,105
Additions	333,701	6,373
Balance at December 31, 2008	\$ 2,406,596	\$ 16,478

FCC licenses represent the 14 C-Block PCS licenses acquired by the Company in the FCC auction in May 1996, the AWS licenses acquired in FCC Auction 66, the 700 MHz license acquired in FCC Auction 73 and FCC licenses acquired from other carriers. FCC licenses also represent licenses acquired in 2005 by Royal Street Communications in Auction 58.

The grant of the licenses by the FCC subjects the Company to certain FCC ongoing ownership restrictions. Should the Company cease to continue to qualify under such ownership restrictions, the PCS, AWS and 700 MHz licenses may be subject to revocation or require the payment of fines or forfeitures. Although PCS, AWS, and 700 MHz licenses are issued with a stated term, 10 years in the case of the PCS licenses, 15 years in the case of the AWS licenses, and approximately 10 years from the date of the digital television transition for 700 MHz licenses, the renewal of PCS, AWS, and 700 MHz licenses is generally a routine matter without substantial cost.

On November 29, 2006, the Company was granted AWS licenses as a result of FCC Auction 66, for a total aggregate purchase price of approximately \$1.4 billion. These licenses cover six of the 25 largest metropolitan areas in the United States. The east coast expansion opportunities include, but are not limited to, the entire east coast corridor from Philadelphia to Boston, including New York, as well as the entire states of New York, New Jersey, Connecticut and Massachusetts. In the western United States, the new expansion opportunities include the San Diego, Portland, Seattle and Las Vegas metropolitan areas. The balance supplements or expands the geographic boundaries of the Company's existing operations in Dallas/Ft. Worth, Detroit, Los Angeles, San Francisco and Sacramento.

On February 21, 2007, the FCC granted the Company's applications for the renewal of its 14 C-Block PCS licenses acquired in the FCC auction in May 1996, as well as the applications for the renewal of certain other licenses subsequently acquired from other carriers.

On December 21, 2007, the Company executed an agreement with PTA Communications, Inc. (PTA) to purchase 10 MHz of PCS spectrum from PTA for the basic trading area of Jacksonville, Florida. On May 13, 2008, the Company closed on the purchase of the 10 MHz of spectrum from PTA for the basic trading area of Jacksonville, Florida for consideration of \$6.5 million in cash.

The Company participated as a bidder in FCC Auction 73, and on June 26, 2008, the Company was granted one 12 MHz 700 MHz license for a total aggregate purchase price of approximately \$313.3 million. This 700 MHz license supplements the 10 MHz of AWS spectrum previously granted to the Company in the Boston-Worcester, Massachusetts/New Hampshire/Rhode Island/Vermont Economic Area as a result of FCC Auction 66.

F-18

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

On various dates in 2008, the Company consummated agreements for spectrum acquisitions from third-parties in the aggregate amount of approximately \$15.3 million.

On September 26, 2008, the Company entered into a spectrum exchange agreement covering licenses in certain markets with Leap Wireless International, Inc. (Leap Wireless) with Leap Wireless acquiring an additional 10 MHz of spectrum in San Diego and Fresno, California; Seattle, Washington and certain other Washington and Oregon markets, and the Company acquiring an additional 10 MHz of spectrum in Shreveport-Bossier City, Louisiana; Lakeland-Winter Haven, Florida; and Dallas-Ft. Worth, Texas and certain other North Texas markets, with consummation subject to customary closing conditions.

During the year ended December 31, 2008, the Company entered into various agreements for the acquisition and exchange of spectrum in the aggregate amount of approximately \$8.3 million. Consummation of these acquisitions is conditioned upon customary closing conditions, including approval by the FCC.

8. Accounts Payable and Accrued Expenses:

Accounts payable and accrued expenses consisted of the following (in thousands):

	2008	2007
Accounts payable	\$ 148,309	\$ 131,177
Book overdraft	104,752	25,399
Accrued accounts payable	178,085	155,733
Accrued liabilities	15,803	16,285
Payroll and employee benefits	34,047	29,380
Accrued interest	33,521	33,892
Taxes, other than income	46,705	41,044
Income taxes	7,210	6,539
Accounts payable and accrued expenses	\$ 568,432	\$ 439,449

9. Long-Term Debt:

Long-term debt consisted of the following (in thousands):

	2008	2007
9 ¹ / ₄ % Senior Notes	\$ 1,400,000	\$ 1,400,000
Senior Secured Credit Facility	1,564,000	1,580,000
Capital lease obligations	91,343	
Total	3,055,343	2,980,000
Add: unamortized premium on debt	19,649	22,177
Total debt	3,074,992	3,002,177
Less: current maturities	(17,009)	(16,000)
Total long-term debt	\$ 3,057,983	\$ 2,986,177

Maturities of the principal amount of long-term debt, excluding capital lease obligations, at face value are as follows (in thousands):

For the Year Ending December 31,

Edgar Filing: METROPCS COMMUNICATIONS INC - Form 10-K

2009	\$ 16,000
2010	16,000
2011	16,000
2012	16,000
2013	1,500,000
Thereafter	1,400,000
Total	\$ 2,964,000

Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

\$1.4 Billion 9¹/₄% Senior Notes

On November 3, 2006, Wireless completed the sale of \$1.0 billion of principal amount of 9¹/₄% Senior Notes due 2014, (the Initial Notes). The net proceeds of the sale of the Initial Notes were approximately \$978.0 million after underwriter fees and other debt issuance costs of \$22.0 million. The net proceeds from the sale of the Initial Notes, together with the borrowings under the Senior Secured Credit Facility, were used to repay amounts owed under various credit agreements, credit facilities, and to pay related premiums, fees and expenses, as well as for general corporate purposes.

On June 6, 2007, Wireless completed the sale of an additional \$400.0 million of 9¹/₄% Senior Notes due 2014 (the Additional Notes) and together with the Initial Notes, the 9¹/₄% Senior Notes) under the existing indenture at a price equal to 105.875% of the principal amount of such Additional Notes.

The 9¹/₄% Senior Notes are unsecured obligations and are guaranteed by MetroPCS, MetroPCS, Inc., and all of Wireless' direct and indirect wholly-owned subsidiaries, but are not guaranteed by Royal Street. Interest is payable on the 9¹/₄% Senior Notes on May 1 and November 1 of each year, beginning on May 1, 2007 for the Initial Notes and November 1, 2007 for the Additional Notes. Wireless may, at its option, redeem some or all of the 9¹/₄% Senior Notes at any time on or after November 1, 2010 for the redemption prices set forth in the indenture governing the 9¹/₄% Senior Notes. In addition, Wireless may also redeem up to 35% of the aggregate principal amount of the 9¹/₄% Senior Notes with the net cash proceeds of certain sales of equity securities.

Senior Secured Credit Facility

On November 3, 2006, Wireless entered into the Senior Secured Credit Facility, pursuant to which Wireless may borrow up to \$1.7 billion. The Senior Secured Credit Facility consists of a \$1.6 billion term loan facility and a \$100.0 million revolving credit facility. On November 3, 2006, Wireless borrowed \$1.6 billion under the Senior Secured Credit Facility. The term loan facility will be repayable in quarterly installments in annual aggregate amounts equal to 1% of the initial aggregate principal amount of \$1.6 billion. The term loan facility will mature in November 2013 and the revolving credit facility will mature in November 2011. The net proceeds from the borrowings under the Senior Secured Credit Facility, together with the sale of the Initial Notes, were used to repay amounts owed under various credit agreements, credit facilities, and to pay related premiums, fees and expenses, as well as for general corporate purposes.

The facilities under the Senior Secured Credit Facility are guaranteed by MetroPCS, MetroPCS, Inc. and each of Wireless' direct and indirect present and future wholly-owned domestic subsidiaries. The facilities are not guaranteed by Royal Street, but Wireless pledged the promissory note that Royal Street has given it in connection with amounts borrowed by Royal Street from Wireless and the limited liability company member interest held in Royal Street Communications. The Senior Secured Credit Facility contains customary events of default, including cross defaults. The obligations are also secured by the capital stock of Wireless as well as substantially all of Wireless' present and future assets and the capital stock and substantially all of the assets of each of its direct and indirect present and future wholly-owned subsidiaries (except as prohibited by law and certain permitted exceptions), but excludes Royal Street.

The interest rate on the outstanding debt under the Senior Secured Credit Facility is variable. The rate as of December 31, 2008 was 6.443%. On November 21, 2006, Wireless entered into a three-year interest rate protection agreement to manage the Company's interest rate risk exposure and fulfill a requirement of the Senior Secured Credit Facility. The agreement covers a notional amount of \$1.0 billion and effectively converts this portion of Wireless' variable rate debt to fixed-rate debt at an annual rate of 7.169% (See Note 6). On February 20, 2007, Wireless entered into an amendment to the Senior Secured Credit Facility. Under the amendment, the margin on the base rate used to determine the Senior Secured Credit Facility interest rate was reduced to 2.25% from 2.50%. On April 30, 2008, Wireless entered into an additional two-year interest rate protection agreement to manage the Company's interest rate risk exposure. This agreement was effective on June 30, 2008, covers a notional amount of \$500.0 million and effectively converts this portion of Wireless' variable rate debt to fixed rate debt at an annual rate of 5.464%.

Capital Lease Obligations

The Company entered into various non-cancelable distributed antenna systems (DAS) capital lease agreements, with varying expiration terms through 2024, covering dedicated optical fiber. Assets and future obligations related to capital leases are included in the accompanying consolidated balance sheet in property and equipment and long-term debt, respectively. Depreciation of assets held under capital leases is included in depreciation and amortization expense. See Note 12.

10. Fair Value Measurements:

In the first quarter of 2008, the Company adopted the provisions of SFAS No. 157, *Fair Value Measurements*, (SFAS No. 157) for financial assets and liabilities. SFAS No. 157 became effective for financial assets and liabilities on January 1, 2008. SFAS No. 157 defines fair value, thereby eliminating inconsistencies in guidance found in various prior accounting pronouncements, and increases disclosures surrounding fair value calculations.

SFAS No. 157 establishes a three-tiered fair value hierarchy that prioritizes inputs to valuation techniques used in fair value calculations. The three levels of inputs are defined as follows:

Level 1 - Unadjusted quoted market prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 - Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; or valuations based on models where the significant inputs are observable (e.g., interest rates, yield curves, prepayment speeds, default rates, loss severities, etc.) or can be corroborated by observable market data.

Level 3 - Valuations based on models where significant inputs are not observable. The unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use.

SFAS No. 157 requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs. If a financial instrument uses inputs that fall in different levels of the hierarchy, the instrument will be categorized based upon the lowest level of input that is significant to the fair value calculation. The Company's financial assets and liabilities measured at fair value on a recurring basis include long-term investments securities and derivative financial instruments.

Included in the Company's long-term investments securities are certain auction rate securities some of which are secured by collateralized debt obligations with a portion of the underlying collateral being mortgage securities or related to mortgage securities. Due to the lack of availability of observable market quotes on the Company's investment portfolio of auction rate securities, the fair value was estimated based on valuation models that rely exclusively on unobservable Level 3 inputs including those that are based on expected cash flow streams and collateral values, including assessments of counterparty credit quality, default risk underlying the security, discount rates and overall capital market liquidity. The valuation of the Company's investment portfolio is subject to uncertainties that are difficult to predict. Factors that may impact the Company's valuation include changes to credit ratings of the securities as well as the underlying assets supporting those securities, rates of default of the underlying assets, underlying collateral values, discount rates, counterparty risk and ongoing strength and quality of market credit and liquidity. Significant inputs to the investments valuation are unobservable in the active markets and are classified as Level 3 in the hierarchy.

Included in the Company's derivative financial instruments are interest rate swaps. Derivative financial instruments are valued in the market using discounted cash flow techniques. These techniques incorporate Level 1 and Level 2 inputs such as interest rates. These market inputs are utilized in the discounted cash flow calculation considering the instrument's term, notional amount, discount rate and credit risk. Significant inputs to the derivative valuation for interest rate swaps are observable in the active markets and are classified as Level 2 in the hierarchy.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

The following table summarizes assets and liabilities measured at fair value on a recurring basis at December 31, 2008, as required by SFAS No. 157 (in thousands):

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Assets				
Cash equivalents	\$ 675,294	\$	\$	\$ 675,294
Long-term investments			5,986	5,986
Total assets at fair value	\$ 675,294	\$	\$ 5,986	\$ 681,280
Liabilities				
Derivative liabilities	\$	\$ 54,963	\$	\$ 54,963
Total liabilities at fair value	\$	\$ 54,963	\$	\$ 54,963

The following table summarizes the changes in fair value of the Company's Level 3 assets, as required by SFAS No. 157 (in thousands):

	Year Ended December 31, 2008
Fair Value Measurements of Assets Using Level 3 Inputs	
Beginning balance	\$ 36,050
Total losses (gains) (realized or unrealized):	
Included in earnings	30,857
Included in other comprehensive loss	(830)
Transfers in and/or out of Level 3	
Purchases, sales, issuances and settlements	37
Ending balance at December 31, 2008	\$ 5,986

	Year Ended December 31, 2008
Losses included in earnings that are attributable to the change in unrealized losses relating to those assets still held at the reporting date as reported in impairment loss on investment securities in the consolidated statements of income and comprehensive income	\$ 30,857

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Long-Term Debt

The fair value of the Company's long-term debt is estimated based on the quoted market prices for the same or similar issues or on the current rates offered to the Company for debt of the same remaining maturities.

The estimated fair values of the Company's financial instruments are as follows (in thousands):

2008**2007**

	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Senior Secured Credit Facility	\$1,564,000	\$1,251,200	\$1,580,000	\$1,607,734
9 ¹ / ₄ % Senior Notes	1,400,000	1,239,000	1,400,000	1,314,250
Cash flow hedging derivatives	54,963	54,963	23,502	23,502
Long-term investments	5,986	5,986	36,050	36,050

11. Concentrations:

The Company purchases a substantial portion of its wireless infrastructure equipment and handset equipment from only a few major suppliers. Further, the Company generally relies on one key vendor in each of the following areas: network infrastructure equipment, billing services, customer care, handset logistics and long distance services. Loss of any of these suppliers could adversely affect operations temporarily until a comparable substitute could be

F-22

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

found. Verisign, the Company's existing billing system provider, publicly announced that it plans to leave the telecommunications services business, including the billing services business. On September 15, 2008, the Company entered into a managed services agreement with Amdocs Software Systems Limited and Amdocs, Inc. (Amdocs). The Company is currently transitioning its billing systems to Amdocs.

Local and long distance telephone and other companies provide certain communication services to the Company. Disruption of these services could adversely affect operations in the short term until an alternative telecommunication provider was found.

Concentrations of credit risk with respect to trade accounts receivable are limited due to the diversity of the Company's indirect retailer base.

12. Commitments and Contingencies:***Operating and Capital Leases***

The Company has entered into non-cancelable operating lease agreements to lease facilities, certain equipment and sites for towers and antennas required for the operation of its wireless networks. Total rent expense for the years ended December 31, 2008, 2007 and 2006 was \$199.1 million, \$125.1 million and \$85.5 million, respectively.

The Company entered into various non-cancelable DAS capital lease agreements, with varying expiration terms through 2024, covering dedicated optical fiber.

Future annual minimum rental payments required for all non-cancelable operating and capital leases at December 31, 2008 are as follows (in thousands):

For the Year Ending December 31,	Operating Leases	Capital Leases
2009	\$ 204,296	\$ 10,213
2010	209,999	10,521
2011	209,157	10,836
2012	198,270	11,162
2013	199,961	11,496
Thereafter	731,327	132,271
 Total minimum future lease payments	 \$ 1,753,010	 186,499
 Amount representing interest		 (95,156)
 Present value of minimum lease payments		 91,343
Current portion		(1,009)
 Long-term capital lease obligations		 \$ 90,334

The Company has an agreement with Alcatel Lucent, to provide it with PCS and AWS CDMA system products and services, including without limitation, wireless base stations, switches, power, cable and transmission equipment and services with an initial term through the earlier to occur of (1) December 31, 2011, or (2) the date on which the Company has purchased or licensed products, services and licensed materials under the agreement equal to a sum which it currently expects to spend for products, services, or licensed material from Alcatel Lucent from June 6, 2005 through December 31, 2011. The agreement provides for both exclusive and non-exclusive pricing for PCS and AWS CDMA products and the agreement may be renewed at the Company's option on an annual basis for three additional years after its initial term expires. If the Company fails to continue purchasing its PCS and AWS CDMA products exclusively from Alcatel Lucent, it may have to pay certain liquidated damages based on the difference in prices

between exclusive and non-exclusive prices, which would be material to the Company. As of December 31, 2008, the Company had issued purchase orders in the amount of approximately \$21.6 million for products, materials and services that the Company expects to be delivered during the three months ended March 31, 2009.

AWS Licenses Acquired in Auction 66

Spectrum allocated for AWS currently is utilized by a variety of categories of commercial and governmental users. To foster the orderly clearing of the spectrum, the FCC adopted a transition and cost sharing plan pursuant to which incumbent non-governmental users could be reimbursed for relocating out of the band and the costs of relocation would be shared by AWS licensees benefiting from the relocation. The FCC has established a plan where the AWS licensee and the incumbent non-governmental user are to negotiate voluntarily for three years and then, if no agreement has been reached, the incumbent licensee is subject to mandatory relocation where the AWS licensee can force the incumbent non-governmental licensee to relocate at the AWS licensee's expense. The spectrum allocated for AWS currently is utilized also by governmental users. The FCC rules provide that a portion of the money raised in Auction 66 will be used to reimburse the relocation costs of governmental users from the AWS band. However, not all governmental users are obligated to relocate and some such users may delay relocation for some time. For the years ended December 31, 2008 and 2007, the Company incurred approximately \$6.4 million and \$0.9 million in microwave relocation costs, respectively.

FCC Katrina Order

In October 2007, the FCC adopted rules which, if they had taken effect, would have required the Company to maintain emergency backup power for a minimum of twenty-four hours for certain of the Company's equipment that is normally powered from local commercial power located inside mobile switching offices, and eight hours for certain of the Company's equipment that is normally powered from local commercial power and at other locations, including cell sites and DAS nodes. Various aspects of the rules were challenged in court and before the Office of Management and Budget, or OMB. As a result, the rules have not taken effect and are not being enforced, and the FCC has indicated that it plans to seek comment on revised backup power rules applicable to wireless providers. The Company is unable to predict with any certainty the likely outcome of any proceeding regarding backup power rules. Any new rules may require the Company to purchase additional equipment, spend additional capital, seek and receive additional state and local permits, authorizations and approvals, and incur additional operating expenses to comply with the new rules and such costs could be material. In addition, if the Company is required to secure additional state or local permits or authorizations, it could delay the construction of any new cell sites or DAS systems and launch of services in new metropolitan areas.

Litigation

The Company is involved in litigation from time to time, including litigation regarding intellectual property claims, that the Company considers to be in the normal course of business. The Company is not currently party to any pending legal proceedings that it believes would, individually or in the aggregate, have a material adverse effect on the Company's financial condition, results of operations or liquidity.

13. Series D Cumulative Convertible Redeemable Participating Preferred Stock:

In July 2000, MetroPCS, Inc. executed a Securities Purchase Agreement, which was subsequently amended (as amended, the "SPA"). Under the SPA, MetroPCS, Inc. issued shares of Series D Preferred Stock. In July 2004, each share of MetroPCS, Inc. Series D Preferred Stock was converted into a share of Series D Preferred Stock of MetroPCS. Dividends accrued at an annual rate of 6% of the liquidation value of \$100 per share on the Series D Preferred Stock. Dividends of \$6.5 million and \$21.0 million were accrued for the years ended December 31, 2007, and 2006, respectively, and were included in the Series D Preferred Stock balance.

Each share of Series D Preferred Stock was to automatically convert into common stock upon (i) completion of a Qualified Public Offering (as defined in the SPA), (ii) MetroPCS' common stock trading (or in the case of a merger or consolidation of MetroPCS with another company, other than a sale or change of control of MetroPCS, the shares received in such merger or consolidation having traded immediately prior to such merger and consolidation) on a national securities exchange for a period of 30 consecutive trading days above a price that implies a market valuation of the Series D Preferred Stock in excess of twice the initial purchase price of the Series D Preferred Stock, or (iii) the date specified by the holders of two-thirds of the outstanding Series D Preferred Stock. The Series D Preferred Stock

and the accrued but unpaid dividends thereon were convertible into common stock at

F-24

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

\$3.13 per share of common stock, which per share amount is subject to adjustment in accordance with the terms of MetroPCS Second Amended and Restated Articles of Incorporation. On April 24, 2007, MetroPCS consummated the Offering and all outstanding shares of Series D Preferred Stock, including accrued but unpaid dividends, were converted into 144,857,320 shares of common stock.

14. Series E Cumulative Convertible Redeemable Participating Preferred Stock:

MetroPCS entered into a stock purchase agreement, dated as of August 30, 2005, under which MetroPCS issued 500,000 shares of Series E Preferred Stock for \$50.0 million in cash. Total proceeds to MetroPCS were \$46.7 million, net of transaction costs of approximately \$3.3 million. The Series E Preferred Stock and the Series D Preferred Stock ranked equally with respect to dividends, conversion rights and liquidation preferences. Dividends on the Series E Preferred Stock accrued at an annual rate of 6% of the liquidation value of \$100 per share. Dividends of \$0.9 million and \$3.0 million were accrued for the years ended December 31, 2007 and 2006, respectively, and were included in the Series E Preferred Stock balance.

Each share of Series E Preferred Stock was to be converted into common stock of MetroPCS upon (i) the completion of a Qualifying Public Offering, (as defined in the Second Amended and Restated Stockholders Agreement), (ii) the common stock trading (or, in the case of a merger or consolidation of MetroPCS with another company, other than as a sale or change of control of MetroPCS, the shares received in such merger or consolidation having traded immediately prior to such merger or consolidation) on a national securities exchange for a period of 30 consecutive trading days above a price implying a market valuation of the Series D Preferred Stock over twice the Series D Preferred Stock initial purchase price, or (iii) the date specified by the holders of two-thirds of the Series E Preferred Stock. The Series E Preferred Stock was convertible into common stock at \$9.00 per share, which per share amount was subject to adjustment in accordance with the terms of the Second Amended and Restated Articles of Incorporation of MetroPCS. On April 24, 2007, MetroPCS consummated the Offering and all outstanding shares of Series E Preferred Stock, including accrued but unpaid dividends, were converted into 6,105,324 shares of common stock.

15. Capitalization:***Common Stock Issued to Directors***

Non-employee members of MetroPCS Board of Directors receive compensation for serving on the Board of Directors, as provided in MetroPCS Non-Employee Director Remuneration Plan (the Remuneration Plan). In 2008, the Compensation Committee of the Board of Directors amended and restated the Remuneration Plan (the 2008 Remuneration Plan) to be more competitive with the market and to be more reflective of the Company s status as a public company. The Remuneration Plan provided, among other things, that each non-employee director s annual retainer and meeting fees be paid, at the election of each non-employee director, in cash, common stock, or a combination of cash and common stock. The 2008 Remuneration Plan provides that each non-employee director s annual retainer and meeting fees will be paid in cash and each director will receive options to purchase common stock. In accordance with the 2008 Remuneration Plan, no shares of common stock were issued to non-employee members of the Board of Directors during the year ended December 31, 2008. During the years ended December 31, 2007 and 2006, non-employee members of the Board of Directors were issued 31,230 and 49,725 shares of common stock, respectively, as payment of their annual retainer.

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

Stockholder Rights Plan

On March 27, 2007, in connection with the Offering, the Company adopted a Stockholder Rights Plan. Under the Stockholder Rights Plan, each share of the Company's common stock includes one right to purchase one one-thousandth of a share of series A junior participating preferred stock. The rights will separate from the common stock and become exercisable (1) ten calendar days after public announcement that a person or group of affiliated or associated persons has acquired, or obtained the right to acquire, beneficial ownership of 15% of the Company's outstanding common stock or (2) ten business days following the start of a tender offer or exchange offer that would result in a person's acquiring beneficial ownership of 15% or more of the Company's outstanding common stock. A beneficial owner holding 15% or more of MetroPCS' common stock is referred to as an acquiring person under the Stockholder Rights Plan.

Initial Public Offering

On April 24, 2007, upon consummation of the Offering, the Company's Third Amended and Restated Certificate of Incorporation (the Restated Certificate), as filed with the Delaware Secretary of State, became effective. The Restated Certificate provides for two classes of capital stock to be designated, respectively, Common Stock and Preferred Stock. The total number of shares which the Company is authorized to issue is 1,100,000,000 shares. 1,000,000,000 shares are Common Stock, par value \$0.0001 per share, and 100,000,000 shares are Preferred Stock, par value \$0.0001 per share. The Restated Certificate does not distinguish classes of common stock or preferred stock.

16. Share-Based Payments:

Effective January 1, 2006, the Company adopted the fair value recognition provisions of SFAS No. 123(R) using the modified prospective transition method. Under that transition method, compensation expense recognized beginning on that date includes: (a) compensation expense for all share-based payments granted prior to, but not yet vested as of, January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS No. 123, and (b) compensation expense for all share-based payments granted on or after January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS No. 123(R). Although there was no material impact on the Company's financial position, results of operations or cash flows from the adoption of SFAS No. 123(R), the Company reclassified all deferred equity compensation on the consolidated balance sheet to additional paid-in capital upon its adoption.

MetroPCS has two stock option plans (the Option Plans) under which it grants options to purchase common stock of MetroPCS: the Second Amended and Restated 1995 Stock Option Plan, as amended (1995 Plan), and the Amended and Restated 2004 Equity Incentive Compensation Plan (2004 Plan). The 1995 Plan was terminated in November 2005 and no further awards can be made under the 1995 Plan, but all options previously granted will remain valid in accordance with their original terms. In February 2007, the 2004 Plan was amended to increase the number of shares of common stock reserved for issuance under the plan from 18,600,000 to a total of 40,500,000 shares. As of December 31, 2008, the maximum number of shares reserved for the 2004 Plan was 40,500,000 shares. Vesting periods and terms for stock option grants are determined by the plan administrator, which is MetroPCS' Board of Directors for the 1995 Plan and the Compensation Committee of the Board of Directors of MetroPCS for the 2004 Plan. No option granted under the 1995 Plan has a term in excess of fifteen years and no option granted under the 2004 Plan shall have a term in excess of ten years. Options granted during the years ended December 31, 2008, 2007 and 2006 have a vesting period of one to four years.

Options granted under the 1995 Plan are exercisable upon grant. Shares received upon exercising options prior to vesting are restricted from sale based on a vesting schedule. In the event an option holder's service with the Company is terminated, MetroPCS may repurchase unvested shares issued under the 1995 Plan at the option exercise price. Options granted under the 2004 Plan are only exercisable upon vesting. Upon exercise of options under the Option Plans, new shares of common stock are issued to the option holder.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

The value of the options is determined by using a Black-Scholes pricing model that includes the following variables: 1) exercise price of the instrument, 2) fair market value of the underlying stock on date of grant, 3) expected life, 4) estimated volatility and 5) the risk-free interest rate. The Company utilized the following weighted-average assumptions in estimating the fair value of the option grants in the years ended December 31, 2008, 2007 and 2006:

	2008	2007	2006
Expected dividends	0.00%	0.00%	0.00%
Expected volatility	45.20%	42.69%	35.04%
Risk-free interest rate	2.49%	4.54%	4.64%
Expected lives in years	5.00	5.00	5.00
Weighted-average fair value of options:			
Granted at below fair value	\$	\$	\$10.16
Granted at fair value	\$ 6.95	\$ 9.89	\$ 3.75
Weighted-average exercise price of options:			
Granted at below fair value	\$	\$	\$ 1.49
Granted at fair value	\$16.36	\$22.41	\$ 9.95

The Black-Scholes model requires the use of subjective assumptions including expectations of future dividends and stock price volatility. Such assumptions are only used for making the required fair value estimate and should not be considered as indicators of future dividend policy or stock price appreciation. Because changes in the subjective assumptions can materially affect the fair value estimate, and because employee stock options have characteristics significantly different from those of traded options, the use of the Black-Scholes option pricing model may not provide a reliable estimate of the fair value of employee stock options.

A summary of the status of the Company's Option Plans as of December 31, 2008, 2007 and 2006, and changes during the periods then ended, is presented in the table below:

	2008		2007		2006	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding, beginning of year	27,643,794	\$11.70	23,499,462	\$ 6.91	14,502,210	\$4.18
Granted	6,566,165	\$16.36	8,476,998	\$22.41	11,369,793	\$9.65
Exercised	(2,810,245)	\$ 4.48	(2,562,056)	\$ 3.79	(1,148,328)	\$2.39
Forfeited	(722,126)	\$18.09	(1,770,610)	\$10.81	(1,224,213)	\$4.22
Outstanding, end of year	30,677,588	\$13.21	27,643,794	\$11.70	23,499,462	\$6.91
Options vested or expected to vest at year-end	29,633,907	\$13.07	25,395,877	\$11.36	20,127,759	\$6.55
Options exercisable at year-end	15,920,318	\$10.04	12,524,250	\$ 5.86	10,750,692	\$3.78

Options vested at year-end	15,836,608	\$10.05	11,904,985	\$ 5.82	8,940,615	\$3.59
----------------------------	------------	---------	------------	---------	-----------	--------

Options outstanding under the Option Plans as of December 31, 2008 have a total aggregate intrinsic value of approximately \$122.6 million and a weighted average remaining contractual life of 7.54 years. Options outstanding under the Option Plans as of December 31, 2007 and 2006 have a weighted average remaining contractual life of 7.85 and 8.01 years, respectively. Options vested or expected to vest under the Option Plans as of December 31, 2008 have a total aggregate intrinsic value of approximately \$121.6 million and a weighted average remaining contractual life of 7.50 years. Options exercisable under the Option Plans as of December 31, 2008 have a total aggregate intrinsic value of approximately \$102.4 million and a weighted average remaining contractual life of 6.58 years.

In 2004, Congress passed the American Job Creation Act of 2004 which changed certain rules with respect to deferred compensation, including options to purchase MetroPCS common stock which were granted below the fair market value of the common stock as of the grant date. MetroPCS had previously granted certain options to purchase its common stock under the 1995 Plan at exercise prices which MetroPCS believes were below the fair market value of its common stock at the time of grant. In December 2005, MetroPCS offered to amend the stock option grants of all affected employees by increasing the exercise price of such affected stock option grants to the fair value of MetroPCS common stock as of the date of grant and granting additional stock options, which vested 50% on January 1, 2006 and 50% on January 1, 2007, at the fair market value of MetroPCS common stock as of the grant date provided that the employee remained employed by the Company on those dates. The total number of affected stock options was 2,617,140 and MetroPCS granted 407,274 additional stock options.

During the year ended December 31, 2008, 2,810,245 options granted under the Option Plans were exercised for 2,810,245 shares of common stock. The intrinsic value of these options was approximately \$38.6 million and total proceeds were approximately \$12.6 million for the year ended December 31, 2008. During the year ended December 31, 2007, 2,562,056 options granted under the Option Plans were exercised for 2,562,056 shares of common stock. The intrinsic value of these options was approximately \$47.7 million and total proceeds were approximately \$9.7 million for the year ended December 31, 2007. During the year ended December 31, 2006, 1,148,328 options granted under the Option Plans were exercised for 1,148,328 shares of common stock. The intrinsic value of these options was approximately \$9.0 million and total proceeds were approximately \$2.7 million for the year ended December 31, 2006.

The following table summarizes information about unvested stock option grants:

Stock Option Grants	Shares	Weighted Average Grant-Date Fair Value
Unvested balance, January 1, 2008	15,738,809	\$ 6.99
Grants	6,566,165	\$ 6.95
Vested shares	(6,824,591)	\$ 6.59
Forfeitures	(639,403)	\$ 8.12
Unvested balance, December 31, 2008	14,840,980	\$ 7.11

The Company determines fair value of stock option grants as the closing share price of the Company's common stock at grant-date. The weighted average grant-date fair value of the stock option grants for the year ended December 31, 2008, 2007 and 2006 is \$6.95, \$9.89 and \$3.98, respectively. The total fair value of stock options that vested during the year ended December 31, 2008 was \$45.0 million.

The Company has recognized \$41.1 million, \$28.0 million and \$14.5 million of non-cash stock-based compensation expense in the years ended December 31, 2008, 2007 and 2006, respectively, and an income tax benefit of \$17.2 million, \$11.0 million and \$5.8 million, respectively.

F-28

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

As of December 31, 2008, there was approximately \$98.1 million of unrecognized stock-based compensation cost related to unvested share-based compensation arrangements, which is expected to be recognized over a weighted average period of approximately 2.49 years. Such costs are scheduled to be recognized as follows: \$41.4 million in 2009, \$34.8 million in 2010, \$18.3 million in 2011 and \$3.6 million in 2012.

Compensation expense is recognized over the requisite service period for the entire award, which is generally the maximum vesting period of the award. The fair value of the common stock was determined contemporaneously with the option grants.

In December 2006, the Company amended stock option agreements of a former member of MetroPCS Board of Directors to extend the contractual life of 405,054 vested options to purchase common stock until December 31, 2006. This amendment resulted in the recognition of additional non-cash stock-based compensation expense of approximately \$4.1 million in the fourth quarter of 2006.

In December 2006, in recognition of efforts related to the Offering and to align executive ownership with the Company, the Company made a special stock option grant to its named executive officers and certain other eligible employees. The Company granted stock options to purchase an aggregate of 6,885,000 shares of the Company's common stock to its named executive officers and certain other officers and employees. The purpose of the grant was also to provide retention of employees following the Company's initial public offering as well as to motivate employees to return value to the Company's shareholders through future appreciation of the Company's common stock price. The exercise price for the option grants was \$11.33, which was the fair market value of the Company's common stock on the date of the grant as determined by the Company's board of directors. In determining the fair market value of the common stock, consideration was given to the recommendations of the Company's finance and planning committee and of management based on certain data, including discounted cash flow analysis, comparable company analysis, and comparable transaction analysis, as well as contemporaneous valuation. The stock options granted to the named executive officers other than the Company's CEO and senior vice president and chief technology officer generally vest on a four-year vesting schedule with 25% vesting on the first anniversary date of the award and the remainder pro-rata on a monthly basis thereafter. The stock options granted to the Company's CEO vest on a three-year vesting schedule with one-third vesting on the first anniversary date of the award and the remainder pro-rata on a monthly basis thereafter. The stock options granted to the Company's senior vice president and chief technology officer vest over a two-year vesting schedule with one-half vesting on the first anniversary of the award and the remainder pro-rata on a monthly basis thereafter.

In November 2006, the Company made an election to account for its APIC pool utilizing the short cut method provided under FSP FAS No. 123(R)-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payments*.

17. Employee Benefit Plan:

The Company sponsors a savings plan under Section 401(k) of the Internal Revenue Code for the majority of its employees. The plan allows employees to contribute a portion of their pretax income in accordance with specified guidelines. The Company did not match employee contributions as of December 31, 2008 but could make discretionary or profit-sharing contributions. The Company has made no contributions to the savings plan through December 31, 2008. On January 1, 2009, the Company adopted a limited matching contribution policy and will match certain employee contributions to the savings plan beginning in the first quarter of 2009.

18. Income Taxes:

The provision for taxes on income consisted of the following (in thousands):

	2008	2007	2006
Current:			
Federal	\$ 156	\$ 257	\$ 674
State	5,483	4,317	3,702
	5,639	4,574	4,376
Deferred:			
Federal	99,899	113,611	29,959
State	24,448	4,913	2,382
	124,347	118,524	32,341
Provision for income taxes	\$ 129,986	\$ 123,098	\$ 36,717

A reconciliation of income taxes computed at the United States federal statutory income tax rate (35%) to the provision for income taxes reflected in the consolidated statements of income and comprehensive income for the years ended December 31, 2008, 2007 and 2006 is as follows (in thousands):

	2008	2007	2006
U.S. federal income tax provision at statutory rate.	\$ 97,798	\$ 78,225	\$ 31,683
Increase (decrease) in income taxes resulting from:			
State income taxes, net of federal income tax impact	18,458	6,423	2,386
Change in valuation allowance	11,940	35,717	(194)
Provision for tax uncertainties	1,627	1,976	2,557
Permanent items	163	371	218
Other		386	67
Provision for income taxes	\$ 129,986	\$ 123,098	\$ 36,717

Deferred taxes are provided for those items reported in different periods for income tax and financial reporting purposes. The Company's net deferred tax liability consisted of the following deferred tax assets and liabilities (in thousands):

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

	2008	2007
Deferred tax assets:		
Net operating loss carry forward	\$ 141,965	\$ 70,888
Deferred revenue	15,917	12,384
Allowance for uncollectible accounts	1,645	1,223
Deferred rent	19,342	13,808
Deferred compensation	28,609	14,841
Asset retirement obligation	2,161	1,003
Credit carry forwards	2,583	2,619
Other comprehensive loss	21,464	8,897
Transaction taxes	3,884	2,087
Unrealized loss on investments	47,657	35,717
Other	19,933	7,782
Gross deferred tax assets	305,160	171,249
Valuation allowance	(47,657)	(35,717)
Total deferred tax assets, net	257,503	135,532
Deferred tax liabilities:		
Depreciation	(352,106)	(240,564)
Deferred cost of handset sales	(19,349)	(13,226)
FCC licenses	(199,422)	(136,832)
Partnership interest	(70,284)	(22,658)
Other	(4,019)	(7,460)
Deferred tax liabilities	(645,180)	(420,740)
Net deferred tax liability	\$ (387,677)	\$ (285,208)

Deferred tax assets and liabilities at December 31, 2008 and 2007 are as follows (in thousands):

	2008	2007
Current deferred tax asset	\$ 1,832	\$ 4,920
Non-current deferred tax liability	(389,509)	(290,128)
Net deferred tax liability	\$ (387,677)	\$ (285,208)

At December 31, 2008 the Company has approximately \$382.8 million and \$163.1 million of financial reporting net operating loss carry forwards for federal and state income tax purposes, respectively. The Company's net operating loss carry forwards for federal and state tax purposes were approximately \$82.3 million and \$58.3 million, respectively, greater than its net operating loss carry forwards for financial reporting purposes due to the Company's inability to realize excess tax benefits under SFAS 123(R) until such benefits reduce income taxes payable. The federal net operating loss will begin to expire in 2023. The state net operating losses will begin to expire in 2013. At December 31, 2008 the Company has approximately \$1.2 million and \$0.2 million of alternative minimum tax credit carry forwards for federal and state income tax purposes, respectively. These alternative minimum tax credits carry forward indefinitely.

Financial statement deferred tax assets must be reduced by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company believes that realization of the deferred tax assets is more likely than not based on the future reversal of existing temporary differences which give rise to the deferred tax liabilities, with the exception of the deferred tax asset related to the unrealized tax loss. During 2008 and 2007, an impairment of investments was recorded for financial statement purposes resulting in an unrealized loss. Recognition of this unrealized loss for tax purposes would result in a capital loss. The Company has not generated capital gains within the carry back period and does not anticipate generating sufficient capital gains within the carry forward period to realize this deferred tax asset. Therefore, the Company has recorded a valuation allowance of \$47.7 million and \$35.7 million as of December 31, 2008 and 2007, respectively.

December 31, 2008, 2007 and 2006

Audits and Uncertain Tax Benefits

The Company files income tax returns in the U.S. federal and certain state jurisdictions and is subject to examinations by the Internal Revenue Service (the IRS) and other taxing authorities. These audits can result in adjustments of taxes due or adjustments of the net operating losses which are available to offset future taxable income. The Company's estimate of the potential outcome of any uncertain tax issue prior to audit is subject to management's assessment of relevant risks, facts, and circumstances existing at that time. An unfavorable result under audit may reduce the amount of federal and state net operating losses the Company has available for carry forward to offset future taxable income, or may increase the amount of tax due for the period under audit, resulting in an increase to the effective rate in the year of resolution.

In 2008, MetroPCS concluded a state audit which did not result in a material impact to the financial statements.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits are as follows (in thousands):

Balance, January 1, 2008	\$ 19,328
Increases for tax provisions taken during a prior period	
Increases for tax provisions taken during the current period	
Decreases relating to settlements	
Decreases resulting from the expiration of the statute of limitations	
Balance, December 31, 2008	\$ 19,328

The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate is \$12.6 million and \$12.6 million as of December 31, 2008 and 2007, respectively. Additionally, the total interest and penalties which would affect the effective tax rate is \$13.6 million and \$12.0 million as of December 31, 2008 and 2007, respectively. The Company continues to recognize both interest and penalties related to unrecognized tax benefits as a component of income tax expense. The Company recognized gross interest and penalties of \$2.5 million during 2008, \$2.8 million during 2007 and \$3.4 million during 2006. Accrued gross interest and penalties were \$18.3 million and \$15.8 million as of December 31, 2008 and 2007, respectively. A state examination is currently ongoing and the Company believes it is reasonably possible that the amount of unrecognized tax benefits could significantly decrease within the next 12 month period. The Company does not anticipate that a proposed adjustment would result in a material change to the Company's financial position. The gross unrecognized tax benefits could change due to settlement with this state in an amount up to \$2.7 million. In another state jurisdiction, it is reasonably possible that the amount of unrecognized tax benefits could significantly decrease within the next 12 months due to the expiration of a statute. The gross unrecognized tax benefit for this tax position could decrease in an amount up to \$13.2 million.

The IRS is currently examining the 2005 and 2006 tax years of Royal Street Communications. Management does not believe the examination will have a significant effect on the Company's tax position.

In addition, there are several state income and franchise tax examinations that are currently in progress for the Company and/or certain of its subsidiaries for various tax years. Management does not believe these examinations will have a significant effect on the Company's tax position.

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

19. Net Income Per Common Share:

The following table sets forth the computation of basic and diluted net income per common share for the periods indicated (in thousands, except share and per share data):

	2008	2007	2006
Basic EPS Two Class Method:			
Net income	\$ 149,438	\$ 100,403	\$ 53,806
Accrued dividends and accretion:			
Series D Preferred Stock		(6,647)	(21,479)
Series E Preferred Stock		(1,035)	(3,339)
Net income applicable to common stock	\$ 149,438	\$ 92,721	\$ 28,988
Amount allocable to common shareholders	100.0%	88.8%	57.1%
Rights to undistributed earnings	\$ 149,438	\$ 82,330	\$ 16,539
Weighted average shares outstanding basic	349,395,285	287,692,280	155,820,381
Net income per common share basic	\$ 0.43	\$ 0.29	\$ 0.11
Diluted EPS:			
Rights to undistributed earnings	\$ 149,438	\$ 82,330	\$ 16,539
Weighted average shares outstanding basic	349,395,285	287,692,280	155,820,381
Effect of dilutive securities:			
Warrants			147,257
Stock options	5,984,826	8,645,444	3,728,970
Weighted average shares outstanding diluted	355,380,111	296,337,724	159,696,608
Net income per common share diluted	\$ 0.42	\$ 0.28	\$ 0.10

Net income per common share for the years ended December 31, 2007 and 2006 is computed in accordance with EITF 03-6. Under EITF 03-6, the preferred stock is considered a participating security for purposes of computing earnings or loss per common share and, therefore, the preferred stock is included in the computation of basic and diluted net income per common share using the two-class method, except during periods of net losses. Preferred stock was included in the computation of income per common share through April 24, 2007, the date of conversion to common stock as a result of the Offering. When determining basic earnings per common share under EITF 03-6, undistributed earnings for a period are allocated to a participating security based on the contractual participation rights of the security to share in those earnings as if all of the earnings for the period had been distributed.

For the years ended December 31, 2008, 2007 and 2006, 11.9 million, 4.4 million and 7.4 million, respectively, of stock options were excluded from the calculation of diluted net income per common share since the effect was anti-dilutive.

For the years ended December 31, 2007 and 2006, 44.2 million and 136.1 million, respectively, of convertible shares of Series D Preferred Stock were excluded from the calculation of diluted net income per common share since the effect was anti-dilutive.

For the years ended December 31, 2007 and 2006, 1.9 million and 5.7 million, respectively, of convertible shares of Series E Preferred Stock were excluded from the calculation of diluted net income per common share since the effect was anti-dilutive.

20. Segment Information:

Operating segments are defined by SFAS No. 131 as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Company's chief operating decision maker is the President, Chief Executive Officer and Chairman of the Board.

F-33

Table of Contents

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

As of December 31, 2008, the Company had thirteen operating segments based on geographic region within the United States: Atlanta, Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, Miami, New York, Orlando/Jacksonville, Philadelphia, Sacramento, San Francisco and Tampa/Sarasota. Each of these operating segments provides wireless voice and data services and products to customers in its service areas or is currently constructing a network in order to provide these services. These services include unlimited local and long distance calling, voicemail, caller ID, call waiting, enhanced directory assistance, text messaging, picture and multimedia messaging, domestic and international long distance, international text messaging, ringtones, games and content applications, unlimited directory assistance, ring back tones, nationwide roaming, mobile Internet browsing, mobile instant messaging, push e-mail, location based services, social networking services and other value-added services.

The Company aggregates its operating segments into two reportable segments: Core Markets and Expansion Markets.

Core Markets, which include Atlanta, Miami, Sacramento and San Francisco, are aggregated because they are reviewed on an aggregate basis by the chief operating decision maker, they are similar in respect to their products and services, production processes, class of customer, method of distribution, and regulatory environment and currently exhibit similar financial performance and economic characteristics.

Expansion Markets, which include Boston, Dallas/Ft. Worth, Detroit, Las Vegas, Los Angeles, New York, Orlando/Jacksonville, Philadelphia and Tampa/Sarasota, are aggregated because they are reviewed on an aggregate basis by the chief operating decision maker, they are similar in respect to their products and services, production processes, class of customer, method of distribution, and regulatory environment and have similar expected long-term financial performance and economic characteristics.

General corporate overhead, which includes expenses such as corporate employee labor costs, rent and utilities, legal, accounting and auditing expenses, is allocated equally across all operating segments. Corporate marketing and advertising expenses are allocated equally to the operating segments, beginning in the period during which the Company launches service in that operating segment. Expenses associated with the Company's national data center and national operations center are allocated based on the average number of customers in each operating segment. There are no transactions between reportable segments.

Interest and certain other expenses, interest income and income taxes are not allocated to the segments in the computation of segment operating results for internal evaluation purposes.

Year Ended December 31, 2008	Core Markets	Expansion Markets	Other	Total

Total assets(4)	945,699	1,064,243	2,143,180	4,153,122

(1)

Cost of service includes stock-based compensation expense disclosed separately. For the years ended December 31, 2008, 2007 and 2006, cost of service includes \$2.9 million, \$1.8 million and \$1.3 million, respectively, of stock-based compensation expense.

(2) Selling, general and administrative expenses include stock-based compensation expense disclosed separately. For the years ended December 31, 2008, 2007 and 2006, selling, general and administrative expenses include \$38.2 million, \$26.2 million and \$13.2 million, respectively, of stock-based compensation expense.

(3) Adjusted EBITDA (deficit) is presented in

accordance with SFAS No. 131 as it is the primary financial measure utilized by management to facilitate evaluation of each segments ability to meet future debt service, capital expenditures and working capital requirements and to fund future growth.

- (4) Total assets as of December 31, 2006 include the Auction 66 AWS licenses that the Company was granted on November 29, 2006 for a total aggregate purchase price of approximately \$1.4 billion. These AWS licenses are presented in the Other column as the Company had not allocated the Auction 66 licenses to its reportable segments as of December 31, 2006. As of December 31, 2008 and 2007, the Auction 66

AWS licenses
are included in
Expansion
Markets total
assets.

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

The following table reconciles segment Adjusted EBITDA (Deficit) for the years ended December 31, 2008, 2007 and 2006 to consolidated income before provision for income taxes:

	2008	2007	2006
Segment Adjusted EBITDA (Deficit):			
Core Markets Adjusted EBITDA	\$ 720,334	\$ 654,112	\$ 492,773
Expansion Markets Adjusted EBITDA (Deficit)	62,799	12,883	(97,214)
Total	783,133	666,995	395,559
Depreciation and amortization	(255,319)	(178,202)	(135,028)
Loss on disposal of assets	(18,905)	(655)	(8,806)
Stock-based compensation expense	(41,142)	(28,024)	(14,472)
Interest expense	(179,398)	(201,746)	(115,985)
Accretion of put option in majority-owned subsidiary	(1,258)	(1,003)	(770)
Interest and other income	23,170	63,936	21,543
Impairment loss on investment securities	(30,857)	(97,800)	
Loss on extinguishment of debt			(51,518)
Consolidated income before provision for income taxes	\$ 279,424	\$ 223,501	\$ 90,523

21. Guarantor Subsidiaries:

In connection with Wireless sale of the 9¼% Senior Notes and the entry into the Senior Secured Credit Facility, MetroPCS and all of MetroPCS subsidiaries, other than Wireless and Royal Street (the guarantor subsidiaries), provided guarantees on the 9¼% Senior Notes and Senior Secured Credit Facility. These guarantees are full and unconditional as well as joint and several. Certain provisions of the Senior Secured Credit Facility and the indenture relating to the 9¼% Senior Notes restrict the ability of Wireless to loan funds to MetroPCS. However, Wireless is allowed to make certain permitted payments to MetroPCS under the terms of the Senior Secured Credit Facility and the indenture relating to the 9¼% Senior Notes. Royal Street (the non-guarantor subsidiaries) is not a guarantor of the 9¼% Senior Notes or the Senior Secured Credit Facility.

The following information presents condensed consolidating balance sheets as of December 31, 2008 and 2007, condensed consolidating statements of income for the years ended December 31, 2008, 2007 and 2006, and condensed consolidating statements of cash flows for the years ended December 31, 2008, 2007 and 2006 of the parent company (MetroPCS), the issuer (Wireless), the guarantor subsidiaries and the non-guarantor subsidiaries (Royal Street). Investments in subsidiaries held by the parent company and the issuer have been presented using the equity method of accounting.

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

22. Related-Party Transactions:

One of the Company's current directors is a general partner of various investment funds affiliated with one of the Company's greater than 5% stockholders. These funds own in the aggregate an approximate 17% interest in a company that provides services to the Company's customers, including handset insurance programs and roadside assistance services. Pursuant to the Company's agreement with this related party, the Company bills its customers directly for these services and remits the fees collected from its customers for these services to the related party. Accruals for the fees that the Company collected from its customers are included in accounts payable and accrued expenses on the accompanying consolidated balance sheets. The Company had the following transactions with this related party (in millions):

	Year Ended December 31,		
	2008	2007	2006
Fees received by the Company as compensation for providing billing and collection services	\$ 7.1	\$ 5.7	\$ 2.7
Handsets sold to the related party	12.0	10.8	12.7
		2008	2007
Liability for fees collected from customers		\$3.7	\$3.3
Receivables from the related party which were included in:			
Accounts receivable		0.8	0.7

The Company paid approximately \$0.2 million, \$0.1 million and \$0.1 million for the years ended December 31, 2008, 2007 and 2006, respectively, to a law firm for professional services, a partner of which is related to a Company executive officer.

One of the Company's current directors is the chairman of an equity firm that holds various investment funds affiliated with one of the Company's greater than 5% stockholders. The equity firm is affiliated with a current director of a company that provides wireless caller id with name services to the Company. The Company paid approximately \$0.1 million to the company for these services during the year ended December 31, 2008.

One of the Company's current directors is a general partner of various investment funds affiliated with one of the Company's greater than 5% stockholders. These funds own in the aggregate an approximate 15.6% interest in a company that provides advertising services to the Company. The Company paid approximately \$4.4 million, \$3.5 million and \$1.3 million to the company for these services during the years ended December 31, 2008, 2007 and 2006, respectively.

23. Supplemental Cash Flow Information:

	Year Ended December 31,		
	2008	2007	2006
		(In thousands)	
Cash paid for interest	\$177,210	\$194,921	\$86,380
Cash paid for income taxes	2,617	423	3,375

Non-cash investing and financing activities:

The Company accrued dividends of \$6.5 million and \$21.0 million related to the Series D Preferred Stock for the years ended December 31, 2007 and 2006, respectively.

The Company accrued dividends of \$0.9 million and \$3.0 million related to the Series E Preferred Stock for the years ended December 31, 2007 and 2006, respectively.

Net changes in the Company's accrued purchases of property, plant and equipment were \$161.9 million, \$42.5 million and \$28.5 million for the years ended December 31, 2008, 2007 and 2006, respectively. Included within

the Company's accrued purchases are estimates by management for construction services received based on a percentage of completion.

MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006

Assets acquired under capital lease obligations were \$92.9 million for the year-ended December 31, 2008.

On April 24, 2007, concurrent with the closing of the Offering, all outstanding shares of preferred stock, including accrued but unpaid dividends, were converted into 150,962,644 shares of common stock.

See Note 2 for the non-cash increase in the Company's asset retirement obligations.

24. Quarterly Financial Data (Unaudited):

The following financial information reflects all normal recurring adjustments that are, in the opinion of management, necessary for a fair statement of the Company's results of operations for the interim periods. Summarized data for each interim period for the years ended December 31, 2008 and 2007 is as follows (in thousands, except per share data):

	Three Months Ended			
	March 31, 2008	June 30, 2008	September 30, 2008	December 31, 2008
Total revenues	\$662,354	\$678,807	\$686,721	\$723,634
Income from operations	112,028	135,644	120,653	99,442
Net income (1)	39,519	50,465	44,880	14,574

Net income per common share diluted	\$ 0.11	\$ 0.14	\$ 0.13	\$ 0.04

	Three Months Ended			
	March 31, 2007	June 30, 2007	September 30, 2007	December 31, 2007
Total revenues	\$536,686	\$551,176	\$556,738	\$591,134
Income from operations	102,676	132,062	133,138	92,238
Net income (loss)(2)	36,352	58,094	53,108	(47,150)
Net income (loss) per common share basic	\$ 0.11	\$ 0.17	\$ 0.15	\$ (0.14)
Net income (loss) per common share diluted	\$ 0.11	\$ 0.17	\$ 0.15	\$ (0.14)

(1) During the three months ended March 31, 2008, June 30, 2008, September 30, 2008, and December 31, 2008, the Company recognized an impairment loss on investment securities in the amount of

approximately
\$8.0 million,
\$9.1 million,
\$3.0 million,
and
\$10.8 million,
respectively.

- (2) During the three months ended September 30, 2007 and December 31, 2007, the Company recognized an impairment loss on investment securities in the amount of approximately \$15.0 million and \$82.8 million, respectively.

25. Subsequent Events:

On January 14, 2009, Wireless completed the sale of \$550.0 million of 9¹/₄% senior notes due 2014 (the New 9¹/₄% Senior Notes) at a price equal to 89.50% of the principal amount of such New 9¹/₄% Senior Notes. On January 20, 2009, Wireless consummated the sale of the New 9¹/₄% Senior Notes resulting in net proceeds of approximately \$480.5 million. The net proceeds from the sale of the New 9¹/₄% Senior Notes will be used for general corporate purposes which could include working capital, capital expenditures, future liquidity needs, additional opportunistic spectrum acquisitions, corporate development opportunities and future technology initiatives. On January 20, 2009, Wireless entered into a registration rights agreement in connection with the consummation of the sale of the New 9¹/₄% Senior Notes. Under the terms of the registration rights agreement, Wireless agrees to file a registration statement on or before the 270th day after the New 9¹/₄% Senior Notes issue date covering the New 9¹/₄% Senior Notes. Wireless also agreed to use commercially reasonable efforts to have such Registration Statement declared effective on or prior to the 300th day after the New 9¹/₄% Senior Notes issue date. Alternatively, if Wireless is unable to consummate the Exchange Offer (as defined in the Registration Rights Agreement) or if holders of the New 9¹/₄% Senior Notes cannot participate in the Exchange Offer for certain specified reasons, then Wireless and the Guarantors will use commercially reasonable efforts to file a shelf registration statement within the times specified in the Registration Rights Agreement to facilitate resale of the New 9¹/₄% Senior Notes. All registration expenses will be paid by Wireless and the Guarantors. Should Wireless fail to

F-46

Table of Contents

**MetroPCS Communications, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
December 31, 2008, 2007 and 2006**

file the registration statement, have such registration statement declared effective, consummate the Exchange Offer or, in the alternative, have the shelf registration statement declared effective, Wireless will be required to pay certain liquidated damages as provided in the Registration Rights Agreement.
