On August 16, 2006, we completed our acquisition of Predix Pharmaceuticals Holdings, Inc. (Predix) pursuant to the terms of that certain Agreement and Plan of Merger, dated as of April 3, 2006 as amended on July 10, 2006, by and among us, EPIX Delaware, Inc., our wholly-owned subsidiary, and Predix, as amended. Pursuant to the merger agreement, Predix merged with and into EPIX Delaware, Inc. and became a wholly-owned subsidiary of us. The merger with Predix was primarily a stock transaction valued at approximately \$125 million, including the assumption of net debt at closing. As part of the merger, we also assumed all outstanding options and warrants to purchase capital stock of Predix. The purchase price includes a \$35 million payment to the holders of Predix stock, options and warrants payable in cash, stock or a combination of both based on Predix having achieved a certain strategic milestone. Pursuant to the terms of the merger agreement, \$20 million of the milestone was paid in cash on October 29, 2006. The remaining \$15 million of the milestone payment will be paid in shares of EPIX common stock on October 29, 2007, except to the extent that such shares would exceed 49.99% of outstanding shares immediately after such milestone payment when combined with all shares of EPIX common stock issued in the merger and issuable upon exercise of all Predix options and warrants that we assumed in the merger. The portion of the remaining milestone payment that can not be paid in EPIX common stock will be paid in cash with interest accrued at a rate of 10%. In addition, in connection with the merger, we effected a 1-for-1.5 reverse stock split of our outstanding common stock.

Following the merger, EPIX is a biopharmaceutical company focused on discovering, developing and commercializing novel pharmaceutical products through the use of proprietary technologies to better diagnose, treat and manage patients. We have a blood-pool imaging agent (Vasovist) approved in the European Union, Canada, Iceland, Norway, Switzerland and Australia, and five internally-discovered therapeutic and imaging drug candidates currently in clinical trials. Vasovist is currently being marketed in Europe. These drug candidates are targeting conditions such as depression, Alzheimer's disease, cardiovascular disease and obesity. We also have collaborations with leading organizations, including Amgen, Cystic Fibrosis Foundation Therapeutics, and Schering AG (Germany).

The focus of our therapeutic drug discovery and development efforts is on the two classes of drug targets known as G-protein Coupled Receptors (GPCRs) and ion channels. GPCRs and ion channels are classes of proteins embedded

in the

surface membrane of all cells and are responsible for mediating much of the biological signaling at the cellular level. We believe that our proprietary drug discovery technology and approach addresses many of the inefficiencies associated with traditional GPCR and ion channel-targeted drug discovery. By integrating computer-based, or *in silico*, technology with in-house medicinal chemistry, we believe that we can rapidly identify and optimize highly selective drug candidates. We focus on GPCR and ion channel drug targets whose role in disease has already been demonstrated in clinical trials or in preclinical studies. In each of our four clinical-stage therapeutic programs, we used our drug discovery technology and approach to optimize a lead compound into a clinical drug candidate in less than ten months, synthesizing fewer than 80 compounds per program. We moved each of these drug candidates into clinical trials in less than 18 months from lead identification. We believe our drug discovery technology and approach enables us to efficiently and cost-effectively discover and develop GPCR and ion channel-targeted drugs.

In the merger, Predix stockholders received .826702 shares of our common stock for each share of Predix capital stock for an aggregate of approximately 13,621,452 shares of our common stock, or approximately 47% of the outstanding shares of our common stock, after giving effect to the merger and to our 1-for-1.5 reverse stock split. The shares of our common stock issued to the Predix stockholders were registered with the Securities and Exchange Commission on a Registration Statement on Form S-4 (Reg. No. 333-133513). Approximately 29,152,220 shares of our common stock were outstanding immediately after the merger and giving effect to the 1-for-1.5 reverse stock split. The impact of the 1-for-1.5 reverse stock split on our previously filed financial statements included in our Annual Report of Form 10-K for the year ended December 31, 2005, as incorporated by reference to this Prospectus, is as follows:
