Process Management	+10 to +15	+10	+15 to +20

Appliance and Tools	+0 to +5	+0 to +5	+0 to +5
Total Emerson	+5	+5 to +10	+5 to +10

December 2006 Order Comments:

Order growth was in the 5 percent to 10 percent range during the first quarter as end market conditions remained supportive of growth expectations. Favorable currency exchange rates contributed nearly 4 percentage points to the increase.

Process Management orders remained strong on a global basis with strength from the valve, systems and measurement businesses. Orders also benefited from the weaker dollar.

Order growth for Industrial Automation maintained a double-digit pace. Growth for this segment continued to be led by the power generating alternator and electronic drives businesses.

Network Power delivered strong order growth driven by the uninterruptible power supply (UPS), precision cooling and China power systems businesses.

Climate Technologies order trends remained negative due to tough comparisons for the North American residential air-conditioning business. Order growth in Europe and Asia was strong for this segment.

Appliance and Tools order growth remained in the 0 to 5 percent range. Moderate growth from the tools and storage businesses offset softness from the motors and appliance businesses.
