- (C) Reflects the income tax effects of adjustment (B).
- (D) Reflects the elimination of all revenues and expenses of the Fresh-cut segment for the fiscal period ended January 1, 2005.
- (E) Reconciliation of the numerator and denominator of basic and diluted earnings per share are presented below:

Options to purchase approximately 2.7 million shares that were outstanding at April 2, 2005 were excluded from the computation of diluted shares because of their anti-dilutive effect on EPS for the three months then ended. The exercise price of these options ranged from \$26.75 to \$41.15. Options to purchase approximately 2.8 million shares that were outstanding at January 1, 2005 were excluded from the computation of diluted shares because of their anti-dilutive effect on EPS for the year then ended. The exercise price of these options ranged from \$25.18 to \$41.15.

- (F) Represents historical consolidated EPS amounts. As the measurement date for discontinued operations presentation was February 23, 2005, the income statement for the year ended January 1, 2005 did not include a discontinued operations presentation.
