TO: BUSINESS EDITOR
[FOR IMMEDIATE RELEASE]

HUANENG POWER INTERNATIONAL, INC.
ENTERS INTO MEDIUM-TO-LONG-TERM COAL SUPPLY AGREEMENT WITH CCIEC

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

(Beijing, China, August 9, 2004) Huaneng Power International, Inc. (the "Company") [NYSE: HNP; HKEx: 902; SSE: 600011] has signed the "Year 2005-2009 Coal Supply Agreement" (the "Agreement") with China Coal Import & Export Company ("CCIEC") in Beijing today.

Pursuant to the Agreement, CCIEC will supply the Company with thermal coal amounting to 5 million tonnes, 6 million tonnes, 7 million tonnes, 8.5 million tonnes and 10 million tonnes, respectively for the following five years from 2005 to 2009. After amicable discussion under the principles, which secure the stability and equality, the annual coal price adjustment mechanism has been established.

CCIEC is a wholly-owned subsidiary of China National Coal Group Corporation, of which the annual coal yield is 80 million tonnes. Currently, it is one of the largest coal suppliers in the PRC. Throughout the years, CCIEC and the Company have been maintaining good relations regarding coal supplies as well as other business aspects. In view of the difficult market situations regarding coal supply, electricity demand and transportation, both parties have been working hard on the principles of integrity and mutual benefits with an aim to resolve the problem of power supply shortage during the peak summer season. The cooperation between the two parties provide the thrust for the operation of a medium-to-long term agreement on coal supply, effectively ensuring stable supply and demand for both parties. The signing of the Agreement is consistent with the State's objectives and policies on promoting market-oriented mechanisms in thermal coal supply.

Huaneng Power International, Inc. develops, constructs, operates and manages large thermal power plants in China nationwide, with a total generation capacity of 18,832MW on an equity basis. The Company wholly owns sixteen power plants, and has controlling interests in seven power plants and minority interests in four power companies. Today, it is one of the largest independent power producers in China.
