## CORE LABORATORIES N.V.

## NOTES TO THE UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

## 1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of Core Laboratories N.V. and its subsidiaries for which we have a controlling voting interest and/or a controlling financial interest. These financial statements have been prepared in accordance with United States ("U.S.") generally accepted accounting principles ("GAAP") for interim financial information using the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not include all of the information and footnote disclosures required by U.S. GAAP and should be read in conjunction with the financial statements and the summary of significant accounting policies and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2010.

Core Laboratories N.V. uses the equity method of accounting for investments in which it has less than a majority interest and over which it does not exercise control. Non-controlling interest has been recorded to reflect outside ownership attributable to consolidated subsidiaries that are less than 100% owned. In the opinion of management, all adjustments considered necessary for the periods presented have been included in these financial statements. Furthermore, the operating results presented for the three and six months ended June 30, 2011 may not necessarily be indicative of the results that may be expected for the year ended December 31, 2011.

Core Laboratories N.V.'s balance sheet information for the year ended December 31, 2010 was derived from the 2010 audited consolidated financial statements but does not include all disclosures in accordance with U.S. GAAP.

Certain reclassifications were made to prior period amounts in order to conform to the current period presentation. These reclassifications had no impact on the reported net income for the three and six month periods ended June 30, 2011.

References to "Core Lab", "we", "our" and similar phrases are used throughout this Quarterly Report on Form 10-Q and relate collectively to Core Laboratories N.V. and its consolidated subsidiaries.

## 2. INVENTORIES

Inventories consist of the following (in thousands):

	June 30, 2011 (Unaudited)	December 31, 2010
Finished goods	\$31,843	\$24,476
Parts and materials	8,716	6,727
Work in progress	1,949	2,776
Total inventories, net	\$42,508	\$33,979

We include freight costs incurred for shipping inventory to customers in the Cost of Sales line of the Consolidated Statements of Operations.

## 3. GOODWILL AND INTANGIBLES

We account for intangible assets with indefinite lives, including goodwill, in accordance with the applicable accounting guidance, which requires us to evaluate these assets for impairment annually, or more frequently if an

indication of impairment has occurred. Based upon our most recent evaluation, we determined that goodwill is not impaired. We amortize intangible assets with a defined term on a straight-line basis over their respective useful lives.

In 2010, we acquired fracture diagnostics assets for \$9.0 million in cash. The acquisition was recorded in the Production Enhancement business segment and resulted in an increase of \$5.6 million in goodwill and an increase of \$3.2 million in intangible assets. The intangible assets will be amortized over a period of 36 to 60 months.

## 4. DEBT

Debt is summarized in the following table (in thousands):

	June 30, 2011 (Unaudited)	December 31, 2010
Senior exchangeable notes	\$91,930	\$156,407
Discount on senior exchangeable notes	(2,183	) (8,864
Net senior exchangeable notes	\$89,747	\$147,543

In 2006, Core Laboratories LP, an entity 100% indirectly owned by Core Laboratories N.V., issued \$300.0 million aggregate principal amount of Senior Exchangeable Notes (the "Notes") which are fully and unconditionally guaranteed by Core Laboratories N.V. and mature on October 31, 2011. The Notes bear interest at a rate of 0.25% per year paid on a semi-annual basis.

With the additional amortization of the discount on the Notes, the effective interest rate is 7.48% for the three and six month period ended June 30, 2011, which resulted in additional non-cash interest expense of \$1.8 million and \$3.9 million for the three months ended June 30, 2011 and 2010, respectively, and \$4.0 million and \$7.7 million for the six months ended June 30, 2011 and 2010, respectively. Each Note carries a \$1,000 principal amount and is exchangeable into shares of Core Laboratories N.V. common stock under certain circumstances at an exchange price of \$45.51 per share, or 21.9738 shares per Note. Upon exchange, holders will receive cash for the principal amount plus any amount related to fractional shares, and any excess exchange value will be delivered in whole shares of Core Laboratories N.V. common stock at the completion of the valuation period as defined under our Notes agreement. At June 30, 2011, the Notes were trading at 243% of their face value which is equivalent to \$131.5 million of value in excess of the aggregate principal amount. At December 31, 2010, the Notes were trading at 197% of their face value which is equivalent to \$151.7 million of value in excess of the aggregate principal amount. There were 91,930 and 156,407 Notes outstanding at June 30, 2011 and December 31, 2010, respectively.

Under the terms of the Notes, defined criteria were met which allowed the Notes to be early exchanged during the second quarter of 2011, as it was during the first quarter of 2011, and as a result the equity component of the Notes at June 30, 2011 was classified as temporary equity. This balance combined with the debt amount reflects the amount that could result in cash settlement upon exchange. We received nine requests to exchange 17,909 Notes which were settled during the second quarter for \$17.9 million in cash and 213,936 shares of our common stock, all of which were treasury shares, resulting in a loss of \$0.2 million. We also received five requests during the second quarter to exchange 888 Notes which we will settle during the third quarter upon completion of the requisite holding period per the Note Indenture agreement.

On April 19, 2011, we entered into an agreement for an amended revolving credit facility (the "Credit Facility") that we maintain that allowed for an aggregate borrowing capacity of \$300.0 million at June 30, 2011. The Credit Facility also provided an option to increase the commitment under the Credit Facility to \$350.0 million, if certain conditions are met. The Credit Facility bears interest at variable rates from LIBOR plus 1.75% to a maximum of LIBOR plus 2.50%. Any outstanding balance under the Credit Facility is due in December 2015 when the Credit Facility matures. Interest payment terms are variable depending upon the specific type of borrowing under this facility. Our available capacity is reduced by outstanding letters of credit and performance guarantees and bonds totaling \$14.5 million at June 30, 2011 relating to certain projects in progress. Our available borrowing capacity under the Credit Facility at June 30, 2011 was \$285.5 million. As of June 30, 2011, we had \$17.9 million of outstanding letters of credit and performance guarantees and bonds in addition to those under the Credit Facility.

The terms of the Credit Facility require us to meet certain financial and operational covenants. We believe that we were in compliance with all such covenants at June 30, 2011. All of our material, wholly owned subsidiaries are guarantors or co-borrowers under the Credit Facility.

#### 5. PENSIONS AND OTHER POSTRETIREMENT BENEFITS

We provide a noncontributory defined benefit pension plan covering substantially all of our Dutch employees (the "Dutch Plan") who were hired prior to 2007 based on years of service and final pay or career average pay, depending on when the employee began participating. The benefits earned by the employees are immediately vested. We fund the future obligations of the Dutch Plan by purchasing investment contracts from a large multi-national insurance company. The investment contracts

6

[Return to Index](#)

---

are purchased annually and expire after five years at which time they are replaced with new contracts that are adjusted to include changes in the benefit obligation for the current year and redemption of the expired contracts. We determine the fair value of

these plan assets with the assistance of an actuary using observable inputs (Level 2). We make annual premium payments to the insurance company, based on each employee's age and current salary.

The following table summarizes the components of net periodic pension cost under this plan for the three and six months ended June 30, 2011 and 2010 (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011	2010	2011	2010
	(Unaudited)		(Unaudited)	
Service cost	\$352	\$304	\$687	\$627
Interest cost	454	352	886	728
Expected return on plan assets	(211)	(111)	(412)	(230)
Amortization of transition asset	(22)	(22)	(44)	(44)
Amortization of prior service cost	40	40	80	80
Amortization of net loss	84	95	168	189
Net periodic pension cost	\$697	\$658	\$1,365	\$1,350

During the six months ended June 30, 2011, we contributed approximately \$1.9 million, as determined by the insurance company, to fund the estimated 2011 premiums on investment contracts held by the Dutch Plan.

We have adopted a non-qualified deferred compensation plan that allows certain highly compensated employees to defer a portion of their salary, commission and bonus, as well as the amount of any reductions in their deferrals under the deferred compensation plan for employees in the United States (the "Deferred Compensation Plan"), due to certain limitations imposed by the U.S. Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"). The Deferred Compensation Plan also provides for employer contributions to be made on behalf of participants equal in amount to certain forfeitures of, and/or reductions in, employer contributions that participants could have received under the 401(k) Plan in the absence of certain limitations imposed by the Internal Revenue Code. Employer contributions to the Deferred Compensation Plan vest ratably over a period of five years. Contributions to the plan are invested in equity and other investment fund assets, and carried on the balance sheet at fair value. A participant's plan benefits include the participant's deferrals, the vested portion of the employer's contributions, and deemed investment gains and losses on such amounts. The benefits under these contracts are fully vested and payment of benefits generally commences as of the last day of the month following the termination of services except that the payment of benefits for select executives generally commences on the first working day following a six month waiting period following the date of termination.

On a recurring basis, we use the market approach to value certain assets and liabilities at fair value at quoted prices in an active market (Level 1) and certain assets and liabilities using significant other observable inputs (Level 2). We do not have any assets or liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3). Gains and losses related to the fair value changes in the deferred compensation assets and liabilities are recorded in General and Administrative Expenses in the Consolidated Statements of Operations. The following table summarizes the fair value balances (in thousands):

## 6. COMMITMENTS AND CONTINGENCIES

We have been and may from time to time be named as a defendant in legal actions that arise in the ordinary course of business. These include, but are not limited to, employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with the provision of our products and services.

Management does not currently believe that any of our pending contractual, employment-related, personal injury or property damage claims and disputes will have a material effect on our future results of operations, financial position or cash flow.

## 7. EQUITY

During the three months ended June 30, 2011, we repurchased 23,409 of our common shares for \$2.3 million. These shares were surrendered to us pursuant to the terms of a stock-based compensation plan in consideration of the participants' tax burdens that may result from the issuance of common shares under that plan. During the six months ended June 30, 2011, we repurchased 574,174 of our common shares for \$52.1 million. Included in this total were rights to 29,680 shares valued at \$2.9 million that were surrendered to us pursuant to the terms of a stock-based compensation plan in consideration of the participants' tax burdens that may result from the issuance of common shares under that plan. Such common shares, unless canceled, may be reissued for a variety of purposes such as future acquisitions, employee stock awards, exchange of the Notes, or settlement of outstanding warrants.

In February and May 2011, we paid a quarterly dividend of \$0.25 per share of common stock. In addition, on July 12, 2011, we declared a quarterly dividend of \$0.25 per share of common stock for shareholders of record on July 22, 2011 and payable on August 22, 2011.

In 2006, we sold warrants on our common shares, which have an exercise price of \$61.25 per share, and will settle in January 2012. The warrant agreement calls for the net value of these warrants to be settled with Core Laboratories N.V. common shares.

In May 2011, we reached an agreement with the holder of the warrants to accelerate the settlement of 25% of the warrants. This agreement called for the daily settlement of 82,402 warrants using an exercise price which was adjusted based on the daily volume weighted average price. During May and June 2011, we settled 1,648,040 of the outstanding warrants using a calculated exercise price which averaged \$59.57 during the period. These settlements resulted in the distribution of 630,744 shares of treasury stock. There was a second agreement entered into during the first week of June 2011 with the holder of the warrants to accelerate the settlement of an additional 25% of the original number of warrants during the months of June and July 2011. During June 2011, we settled 1,565,638 warrants using a calculated exercise price which averaged \$60.24 during the period. We had the option to settle this tranche of warrants with cash or shares. These settlements resulted in a distribution of \$57.8 million in cash during June 2011 with an additional \$8.0 million in cash and 37,692 shares distributed in July 2011.

The following table summarizes our changes in equity for the six months ended June 30, 2011 (in thousands):

Accumulated other comprehensive income (loss) consisted of the following (in thousands):

	June 30, 2011 (Unaudited)	December 31, 2010	
Prior service cost	\$ (793	) \$ (853	)
Transition asset	292	324	
Unrecognized net actuarial loss	(5,554	) (5,678	)
Total accumulated other comprehensive income (loss)	\$ (6,055	) \$ (6,207	)

## 8. EARNINGS PER SHARE

We compute basic earnings per common share by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common and potential common shares include additional shares in the weighted average share calculations associated with the incremental effect of dilutive employee stock options, restricted stock awards and contingently issuable shares, as determined using the treasury stock method. The following table summarizes the calculation of weighted average common shares outstanding used in the computation of diluted earnings per share (in thousands):

	Three Months Ended June 30, 2011 (Unaudited)		Six Months Ended June 30, 2011 (Unaudited)	
	2011	2010	2011	2010
Weighted average basic common shares outstanding	45,945	44,651	45,587	44,743
Effect of dilutive securities:				
Stock options	23	55	24	56
Contingent shares	68	44	63	37
Restricted stock and other	230	568	274	550
Senior exchangeable notes	1,097	1,823	1,176	1,586
Warrants	1,299	816	1,818	424
Weighted average diluted common and potential common shares outstanding	48,662	47,957	48,942	47,396

In 2006, we sold warrants on our common shares, which have an exercise price of \$61.25 per share, and will settle in January 2012. The warrant agreement calls for the net value of these warrants to be settled with Core Laboratories N.V. common shares.

Included in the table above are 1,299,000 and 816,000 shares which were added to the share count for the three months ended June 30, 2011 and 2010, respectively, and 1,818,000 and 424,000 shares which were added to the share count for the six months ended June 30, 2011 and 2010, respectively, because the average share price exceeded the strike price of the warrants. These shares were included in calculating the impact to our dilutive earnings per share for the three and six months ended June 30, 2011 and 2010.

## 9. OTHER (INCOME) EXPENSE, NET

The components of other (income) expense, net, were as follows (in thousands):

[Return to Index](#)

---

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011 (Unaudited)	2010	2011 (Unaudited)	2010
(Gain) loss on sale of assets	\$(75 )	\$39	\$(138 )	\$8
Foreign exchange (gain) loss	(9 )	1,712	(521 )	1,621
Interest income	(30 )	(130 )	(85 )	(142 )
Rents and royalties	(382 )	(218 )	(833 )	(700 )
Gain on insurance recovery	(69 )	—	(779 )	—
Legal entity realignment	711	711	711	—
Other, net	1	(115 )	(79 )	(297 )
Total other (income) expense, net	\$147	\$1,288	\$(1,724 )	\$490

During the third quarter of 2010, an office and laboratory facility was damaged by fire, resulting in the loss of the laboratory portion of the building, as well as some of the laboratory equipment. The final settlement was reached in the first quarter of 2011, which resulted in a gain of \$0.8 million.

Foreign exchange (gains) losses by currency are summarized in the following table (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2011 (Unaudited)	2010	2011 (Unaudited)	2010

Other currencies, net	18	(131 )	171	(227 )
Total (gain) loss	\$(9 )	\$1,712	\$(521 )	\$1,621

## 10. INCOME TAX EXPENSE

The effective tax rates for the three months ended June 30, 2011 and 2010 were 26.7% and 30.7%, respectively. The effective tax rates for year to date 2011 and 2010 were 20.5% and 31.3%, respectively. Included in income tax expense is the reversal in the six months ended June 30, 2011 of \$10.4 million in tax liabilities provided over the period of 2007-2010 as a result of recently concluded audits of prior year returns. The liability reversal reflects the impact of positions sustained in certain audits.

## 11. SEGMENT REPORTING

We operate our business in three reportable segments: (1) Reservoir Description, (2) Production Enhancement and (3) Reservoir Management. These business segments provide different services and utilize different technologies.

**Reservoir Description:** Encompasses the characterization of petroleum reservoir rock, fluid and gas samples. We provide analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry.

**Production Enhancement:** Includes products and services relating to reservoir well completions, perforations, stimulations and production. We provide integrated services to evaluate the effectiveness of well completions and to

develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

• **Reservoir Management:** Combines and integrates information from reservoir description and production enhancement services to increase production and improve recovery of oil and gas from our clients' reservoirs.

11

[Return to Index](#)

---

Results for these business segments are presented below. We use the same accounting policies to prepare our business segment results as are used to prepare our Consolidated Financial Statements. We evaluate performance based on income or loss before income tax, interest and other non-operating income (expense). All interest and other non-operating income (expense) is attributable to the Corporate & Other area and is not allocated to specific business segments. Summarized financial information concerning our segments is shown in the following table (in thousands):

(1) "Corporate & Other" represents those items that are not directly related to a particular segment and eliminations.

## 12. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

Core Laboratories N.V. has fully and unconditionally guaranteed all of the Notes issued by Core Laboratories LP in 2006. Core Laboratories LP is an entity 100% indirectly owned by Core Laboratories N.V.

The following condensed consolidating financial information is included so that separate financial statements of Core Laboratories LP are not required to be filed with the U.S. Securities and Exchange Commission (the "SEC"). The condensed consolidating financial statements present investments in both consolidated and unconsolidated affiliates using the equity method of accounting.

The following condensed consolidating financial information presents: balance sheets as of June 30, 2011 and December 31, 2010, statements of operations for each of the three and six months ended June 30, 2011 and 2010 and the statements of cash flows for each of the six months ended June 30, 2011 and 2010 of (a) Core Laboratories N.V., parent/guarantor, (b) Core Laboratories LP, issuer of public debt securities guaranteed by Core Laboratories N.V., (c) the non-guarantor subsidiaries, (d) consolidating adjustments

## 13. RECENT ACCOUNTING PRONOUNCEMENTS

In May 2011, the FASB issued ASU 2011-04) which relates to fair value measurement (FASB ASC Topic 820), which amends current guidance to achieve common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards. The amendments generally represent clarification of FASB ASC Topic 820, but also include instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. We will adopt this pronouncement for our fiscal year beginning January 1, 2012. We do not expect this pronouncement to have a material effect on our consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05 which provides new guidance on the presentation of comprehensive income (FASB ASC Topic 220) in financial statements. Entities are required to present total comprehensive income

either in a single, continuous statement of comprehensive income or in two separate, but consecutive, statements. Under the single-statement approach, entities must include the components of net income, a total for net income, the components of other comprehensive income and a total for comprehensive income. Under the two-statement approach, entities must report an income statement and, immediately following, a statement of other comprehensive income. Under either method, entities must display adjustments for items reclassified from other comprehensive income to net income in both net income and other comprehensive income. The provisions for this pronouncement are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, with early adoption permitted. We will adopt this pronouncement for our fiscal year beginning January 1, 2012.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion summarizes the financial position of Core Laboratories N.V. and its subsidiaries as of June 30, 2011 and should be read in conjunction with (i) the unaudited consolidated interim financial statements and notes thereto included elsewhere in this Quarterly Report on Form 10-Q and (ii) the consolidated financial statements and accompanying notes to our Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

### General

Core Laboratories N.V. is a Netherlands limited liability company. It was established in 1936 and is one of the world's leading providers of proprietary and patented reservoir description, production enhancement and reservoir management products and services to the oil and gas industry. These products and services can enable our clients to improve reservoir performance and increase oil and gas recovery from their producing fields. Core Laboratories N.V. has over 70 offices in more than 50 countries and employs approximately 5,000 people worldwide.

References to "Core Lab", "we", "our" and similar phrases are used throughout this Quarterly Report on Form 10-Q and relate collectively to Core Laboratories N.V. and its consolidated affiliates.

Our business units have been aggregated into three complementary segments, which provide products and services for improving reservoir performance and increasing oil and gas recovery from new and existing fields.

**Reservoir Description:** Encompasses the characterization of petroleum reservoir rock, fluid and gas samples. We provide analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry.

**Production Enhancement:** Includes products and services relating to reservoir well completions, perforations, stimulations and production. We provide integrated services to evaluate the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

**Reservoir Management:** Combines and integrates information from reservoir description and production enhancement services to increase production and improve recovery of oil and gas from our clients' reservoirs.

### Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Certain statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations section, including those under the headings "Outlook" and "Liquidity and Capital Resources", and in other parts of this Form 10-Q, are forward-looking. In addition, from time to time, we may publish forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. Forward-looking statements can be identified by the use of forward-looking terminology such as "may", "will", "believe", "expect", "anticipate", "estimate", "continue", or other similar words, including statements as to the intent, belief, or current expectations of our directors, officers, and management with respect to our future operations, performance, or positions or which contain other forward-looking information. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, no assurances can be given that the future results indicated, whether expressed or implied, will be achieved. While we believe that these statements are and will be accurate, our actual results and experience may differ materially from the anticipated results or other expectations expressed in our statements due to a variety of risks and uncertainties.

The oil and gas industry is highly cyclical and demand for the majority of our oilfield products and services is substantially dependent on the level of expenditures by the oil and gas industry for the exploration, development and production of crude oil and natural gas reserves, which are sensitive to oil and natural gas prices and generally dependent on the industry's view of future oil and gas prices. There are numerous factors affecting the supply of and demand for our products and services, which are summarized as:

- general and economic business conditions;
- market prices of oil and gas and expectations about future prices;

22

[Return to Index](#)

---

- cost of producing oil and natural gas;
- the level of drilling and production activity;
- mergers, consolidations and downsizing among our clients;
- coordination by OPEC;
- the impact of commodity prices on the expenditure levels of our clients;
- financial condition of our client base and their ability to fund capital expenditures;
- the physical effects of climatic change, including adverse weather or geologic/geophysical conditions;
- the adoption of legal requirements or taxation relating to climate change that lower the demand for petroleum-based fuels;
- civil unrest or political uncertainty in oil producing or consuming countries;
- level of consumption of oil, gas and petrochemicals by consumers;
- changes in existing laws, regulations, or other governmental actions;
- the business opportunities (or lack thereof) that may be presented to and pursued by us;
- availability of services and materials for our clients to grow their capital expenditures; and
- availability of materials and equipment from key suppliers.

Should one or more of these risks or uncertainties materialize, or should any of our assumptions prove incorrect, actual results may vary in material respects from those projected in the forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. For a more detailed discussion of some of the foregoing risks and uncertainties, see "Item 1A - Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, as well as the other reports filed by us with the Securities and Exchange Commission ("SEC").

## Outlook

We continue our efforts to expand our market presence by opening or expanding facilities in strategic areas and realizing synergies within our business lines. We believe our market presence provides us a unique opportunity to service clients who have global operations in addition to the national oil companies.

We have established internal earnings targets that are based on market conditions existing at the time our targets were established. Based on recent activity levels, we believe that the current level of activities, workflows, and operating margins both outside North America and within North America will grow moderately during the remainder of 2011. Because of high demand and a fire at a raw materials supplier, shortages of some high performance specialty steel tubulars used with the Company's perforating systems may occur in the third quarter of 2011. The Company has added additional suppliers but lead times required for the specialty steel production could delay receipt of the supplies needed to meet third quarter demand. Therefore, third quarter 2011 revenue and operating income for our Production Enhancement operations may be negatively affected.

Operating Results for the Three and Six Months Ended June 30, 2011 Compared to the Three and Six Months Ended June 30, 2010 (unaudited)

Service Revenue

Service revenue increased to \$169.8 million for the second quarter of 2011, up 11% when compared to \$153.0 million for the second quarter of 2010. For the six months ended June 30, 2011, service revenue increased 9% to \$322.9 million compared to \$296.5 million for the respective period in 2010. The increase in service revenue was due to the increases in reservoir rock and reservoir fluids phase-behavior studies of 14% and 12% and in crude oil testing, inspection, distillation, assay, fractionation and characterization projects worldwide of 16% and 10% for the comparable three and six months ended June 30, 2011 and 2010, respectively. Our large scale core analyses and reservoir fluid projects combined with our fluid and derived products inspection, calibration and assay work continue to provide meaningful revenue streams in the Middle East, Asia-Pacific and off the coasts of Africa showing increases of 19%, 21% and 13%, respectively, for the second quarter 2011 compared to the same period in 2010, and 13%, 21% and 7%, respectively, for the six months ended June 30, 2011 compared to 2010.

Product Sales Revenue

Revenue associated with product sales increased to \$56.0 million for the second quarter of 2011, up 22% from \$45.9 million for the second quarter of 2010. For the six months ended June 30, 2011, product sale revenues increased 21% to \$109.6 million compared to \$90.8 million for the same period in 2010. The increase in revenue was driven by the acceptance of and demand for our specialized completion products in North American natural gas and oil shale reservoirs demonstrated by an increase of 34% and 27% for the comparable three and six months ended June 30, 2011 and 2010, respectively. These specialized optimizing technologies are focused on high-end well completion and stimulation programs mainly in the Haynesville, Marcellus, Montney and Eagle Ford shale plays and in multi-stage completions in the Bakken, Niobrara and Eagle Ford oil-shale plays. We are also providing completion and recompletion technologies and services to be used in reworking major, giant, and super-giant fields in southern Iraq.

Cost of Services

Cost of services expressed as a percentage of service revenue was 66% for the quarter ended June 30, 2011, up from 63% in the same period in 2010 due to a charge taken during the second quarter of 2011 for one-time severance and other personnel costs. For the six months ended June 30, 2011, cost of services expressed as a percentage of service revenue was 66% as compared to 65% for the same period in 2010.

Cost of Product Sales

Cost of sales expressed as a percentage of product sales revenue was 72% for the quarter ended June 30, 2011, up slightly from 71% during the same period in 2010. For the six months ended June 30, 2011, cost of product sales expressed as a percentage of sales revenue was 70%, up from 69% for the same period in 2010.

General and Administrative Expenses

General and administrative expenses totaled \$9.8 million for the second quarter of 2011, up from the \$9.2 million incurred in the second quarter of 2010. The increase in general and administrative expenses was primarily due to charges incurred for compensation related expenses. For the six months ended June 30, 2011, general and administrative expenses were 4% of revenue at \$19.3 million compared to \$15.6 million, also 4% of revenue, for the same period in 2010.

## Depreciation and Amortization Expense

Depreciation and amortization expense was \$5.8 million for the second quarter of 2011, unchanged from the second quarter of 2010. For the six months ended June 30, 2011, depreciation and amortization expense was \$11.6 million, an increase of \$0.1 million from the six months ended June 30, 2010.

## Other (Income) Expense, Net

Other (income) expense, net consisted of the following for the quarter and six months ended June 30, 2011 and 2010 (in thousands):

25

[Return to Index](#)

Other, net	1	(115	) (79	) (297
Total other (income) expense, net	\$147	\$1,288	\$(1,724	) \$490

During the third quarter of 2010, an office and laboratory facility was damaged by fire, resulting in the loss of the laboratory portion of the building, as well as some of the laboratory equipment. The final settlement was reached in the first quarter of 2011, which resulted in a gain of \$0.8 million.

Foreign exchange (gains) losses by currency are summarized in the following table (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	June 30, 2011	June 30, 2010	June 30, 2011	June 30, 2010

Total (gain) loss	(9	) 1,712	(521	) 1,621

#### Loss on Exchange of Senior Exchangeable Notes

Under the terms of the Notes, defined criteria were met which allowed the Notes to be early exchanged during the second quarter of 2011, as it was during the first quarter of 2011, and as a result the equity component of the Notes at June 30, 2011 was classified as temporary equity. This balance combined with the debt amount reflects the amount that could result in cash settlement upon exchange. We received nine requests to exchange 17,909 Notes which were settled during the second quarter of 2011 for \$17.9 million in cash and 213,936 shares of our common stock, all of which were treasury shares, resulting in a loss of \$0.2 million. We also received five requests during the second quarter of 2011 to exchange 888 Notes which we will settle during the third quarter upon completion of the requisite holding period per the Note Indenture agreement.

#### Interest Expense

Interest expense for the three months ended June 30, 2011 and 2010 was \$2.5 million and \$4.1 million, respectively, which included \$1.8 million and \$3.9 million, respectively, of non-cash interest expense due to the amortization of the discount on the Notes. Interest expense for the six months ended June 30, 2011 and 2010 was \$4.9 million and \$8.2 million, respectively, which included \$4.0 million and \$7.7 million, respectively, of non-cash interest expense due to the amortization of the discount on the Notes. As 146,728 of our \$1,000 principal amount Notes were exchanged between June 30, 2010 and June 30, 2011, the associated discount was moved to equity resulting in a lower amount of amortization to interest expense.

## Income Tax Expense

The effective tax rates for the three months ended June 30, 2011 and 2010 were 26.7% and 30.7%, respectively, due to a mix of earnings in various tax jurisdictions. The effective tax rates for year to date 2011 and 2010 were 20.5% and 31.3%, respectively. Included in income tax expense is the reversal in the six months ended June 30, 2011 of \$10.4 million in tax liabilities provided over the period 2007-2010 as a result of recently concluded audits of prior year returns. The liability

26

[Return to Index](#)

---

reversal reflects the impact of positions sustained in certain audits.

### Segment Analysis

Our operations are managed primarily in three complementary segments - Reservoir Description, Production Enhancement and Reservoir Management. The following tables summarize our results by operating segment for the three and six months ended June 30, 2011 and 2010 (in thousands):

	Three Months Ended June 30,		% Change	
	2011	2010	2011/2010	
Revenues:	(Unaudited)			
Reservoir Description	\$118,758	\$106,528	11	%
Production Enhancement	88,787	79,717	11	%
Reservoir Management	18,240	12,657	44	%
Consolidated	\$225,785	\$198,902	14	%
Operating income (loss):				
Reservoir Description	\$26,629	\$25,074	6	%
Production Enhancement	24,500	26,152	(6)	)%
Reservoir Management	7,307	3,672	99	%
Corporate and Other <sup>1</sup>	(633)	(1,178)	NM	
Consolidated	\$57,803	\$53,720	8	%

(1) "Corporate and Other" represents those items that are not directly related to a particular segment

"NM" means not meaningful

	Six Months Ended June 30,		% Change	
	2011	2010	2011/2010	
Revenues:	(Unaudited)			
Reservoir Description	\$226,379	\$210,621	7	%
Production Enhancement	170,885	148,561	15	%
Reservoir Management	35,254	28,057	26	%
Consolidated	\$432,518	\$387,239	12	%
Operating income (loss):				
Reservoir Description	\$53,067	\$50,215	6	%
Production Enhancement	47,762	47,095	1	%
Reservoir Management	13,971	9,292	50	%
Corporate and Other <sup>1</sup>	(498)	(1,469)	NM	
Consolidated	\$114,302	\$105,133	9	%

(1) "Corporate and Other" represents those items that are not directly related to a particular segment

"NM" means not meaningful

### Reservoir Description

Revenue from the Reservoir Description segment increased 11%, or \$12.2 million, to \$118.8 million in the second quarter of 2011, compared to \$106.5 million in the second quarter of 2010. For the six months ended June 30, 2011, revenues increased 7%, or \$15.8 million, to \$226.4 million from \$210.6 million for the six months ended June 30, 2010. This segment's operations, which are more focused on international crude-oil related products, continue to focus on large-scale core analyses and reservoir fluids characterization studies from Asia-Pacific areas, offshore West and

East Africa, the Eastern Mediterranean region and the Middle East, including Iraq, Kuwait, and the United Arab Emirates. This segment continued to realize increased

27

[Return to Index](#)

---

demand of 12% for reservoir fluids phase-behavior studies, and of 6% for crude oil testing, inspection, distillation, assay, fractionation and characterization projects worldwide.

Operating income in the second quarter of 2011 increased by 6%, or \$1.6 million, to \$26.6 million compared to \$25.1 million for the second quarter of 2010. Operating income for the six months ended June 30, 2011 increased by 6%, or \$2.9 million, to \$53.1 million. Operating margin for the quarter ended June 30, 2011 was 22%, compared to 24% for the same period in 2010 due to a charge taken during the second quarter of 2011 for one-time severance and other personnel costs. This segment emphasizes technologically demanding services on internationally-based development and production-related crude oil projects over the more cyclical exploration-related projects.

#### Production Enhancement

Revenue from the Production Enhancement segment increased by 11%, or \$9.1 million, to \$88.8 million in the second quarter of 2011 compared to \$79.7 million in the second quarter of 2010. Revenues increased by 15%, or \$22.3 million, to \$170.9 million for the six months ended June 30, 2011 compared to \$148.6 million for the same period in 2010. The revenue increase was due to increased sales of our completion products and gun systems particularly in markets relating to horizontal well developments of gas-shale and oil-shale reservoirs of 33% and 30% for the three and six months ended June 30, 2011, respectively, when compared to the same periods in 2010. The average number of horizontal rigs operating per month in North America, as reported by Baker Hughes Incorporated, increased to 1,040 during the second quarter of 2011 from 780 in the second quarter of 2010 and increased to 1,000 for the six months ended June 30, 2011 from 720 during the same period in 2010. Demand for our Horizontal Time-Delayed Ballistics Actuated Sequential Transfer (HTD-Blast™) technology in the Eagle Ford, Niobrara, and Granite Wash formations and for horizontal unconventional crude-oil plays in West Texas increased 51% and 91% for the three and six months ended June 30, 2011, respectively, over the same periods in 2010. In addition, we have increased our investment in inventory by 25% during the six months ended June 30, 2011. Because of high demand and a fire at a raw materials supplier, additional suppliers for high performance specialty steel tubulars have been added for delivery in the third quarter of 2011.

Operating income in the second quarter of 2011 decreased by 6%, or \$1.7 million, to \$24.5 million from \$26.2 million for the second quarter of 2010. Operating margins decreased to 28% in the second quarter of 2011 compared to 33% for the same period in 2010. Operating margins were adversely affected during the second quarter of 2011 by a number of transitory issues including weather-related project delays in the Bakken shale region and delays of specific international field-flood diagnostic projects. For the six months ended June 30, 2011, operating income increased to \$47.8 million, an increase of 1% over the same period in 2010. The increase in operating income from 2010 to 2011 was primarily driven by increased revenue from services related to our proprietary and patented diagnostic technologies, such as SpectraChem® Plus+, SpectraScan®, ZeroWash®, our HERO™ line of perforating charges and gun systems and our HTD-Blast™ perforating system which is used for the perforation of extended-reach horizontal completions.

#### Reservoir Management

Revenue from the Reservoir Management segment increased by 44%, to \$18.2 million, in the second quarter of 2011 compared to \$12.7 million for the second quarter of 2010. Revenues for the six months ended June 30, 2011 were \$35.3 million, an increase of 26% from \$28.1 million for the same period in 2010. The increase in revenue was due to ongoing interest in several of our existing multi-client reservoir studies as revenues from the North American Gas Shale Study increased 74%, the Marcellus Shale Evaluation study increased 66% and the Haynesville & Bossier Shale Evaluation study increased 43% during the second quarter of 2011 compared to the second quarter of 2010. Revenues from the North American Shale Study increased 71% for the six month period ended June 30, 2011 compared to the same period in 2010.

Operating income in the second quarter of 2011 increased 99% to \$7.3 million from \$3.7 million for the second quarter of 2010. For the six months ended June 30, 2011, operating income was \$14.0 million, compared to \$9.3 million for the same period in 2010. Operating margins increased to 40% in the second quarter of 2011 compared to 29% for the same period in 2010. The increase in operating income was related to growth in our consortium projects and the delivery of completed consortium projects. During the six months ended June 30, 2011, the total number of participants for all studies increased by 77 members from the same date in 2010, a 32% increase, including a 67% increase in the number of participants in our Global Shale study, a 31% increase in our Eagle Ford Shale study and a 17% increase in our Marcellus Shale study. In addition, we have added 44 participants into four new studies which began after June 30, 2010

## Liquidity and Capital Resources

### General

28

[Return to Index](#)

---

We have historically financed our activities through cash on hand, cash flows from operations, bank credit facilities, or the issuance of debt and equity financing.

We utilize the non-GAAP financial measure of free cash flow to evaluate our cash flows and results of operations. Free cash flow is defined as net cash provided by operating activities (which is the most directly comparable GAAP measure) less capital expenditures. Management believes that free cash flow provides useful information to investors regarding the cash that was available in the period that was in excess of our needs to fund our capital expenditures and operating activities. Free cash flow is not a measure of operating performance under GAAP, and should not be considered in isolation nor construed as an alternative to operating profit, net income (loss) or cash flows from operating, investing or financing activities, each as determined in accordance with GAAP. Free cash flow does not represent residual cash available for distribution because we may have other non-discretionary expenditures that are not deducted from the measure. Moreover, since free cash flow is not a measure determined in accordance with GAAP and thus is susceptible to varying interpretations and calculations, free cash flow as presented, may not be comparable to similarly titled measures presented by other companies. The following table reconciles this non-GAAP financial measure to the most directly comparable measure calculated and presented in accordance with GAAP for the six months ended June 30, 2011 and 2010 (in thousands):

	Six Months Ended June 30,		% Change	
	2011	2010	2011/2010	
Free cash flow calculation:	(Unaudited)			
Net cash provided by operating activities	\$97,954	\$111,360	(12	)%
Less: capital expenditures	11,984	12,696	(6	)%
Free cash flow	\$85,970	\$98,664	(13	)%

The decrease in free cash flow in 2011 compared to 2010 was primarily attributable to an increase in inventory in order to stock three new warehouses which were opened in 2011 and a utilization of income tax receivables in 2010. This was partially offset by an increase in net income and a decrease in capital expenditures.

#### Cash Flows

The following table summarizes cash flows for the six months ended June 30, 2011 and 2010 (in thousands):

	Six Months Ended June 30,		% Change	
	2011	2010	2011/2010	
Cash provided by/(used in):	(Unaudited)			
Operating activities	\$97,954	\$111,360	(12	)%
Investing activities	(12,304	) (22,634	) (46	)%
Financing activities	(194,969	) (96,149	) 103	%
Net change in cash and cash equivalents	\$(109,319	) \$(7,423	) 1,373	%

The decrease in cash flows provided by operating activities was the result of an increase in inventory in order to stock three new warehouses which were opened in 2011 and a utilization of income tax receivables in 2010.

Cash flows used in investing activities were higher during the six months ended June 30, 2010 primarily due to an acquisition for \$9.0 million.

The increase in cash flows used in financing activities was caused by three types of transactions: the early exchange of our Notes, early settlement of our outstanding warrants and an increase in cash dividends.

We received nine requests to exchange 17,909 of our \$1,000 face value Notes which were settled during the second quarter of 2011 for \$17.9 million in cash and 213,936 treasury shares. During the second quarter of 2011, we accelerated the settlement of approximately 25% of our outstanding warrants resulting in a cash payment of \$57.8 million. In the first quarter of 2011, our Board of Directors announced an increase of our quarterly dividend resulting in an increase of \$17.3 million in

29

[Return to Index](#)

---

dividends paid during the first six months of 2011 over the same period of 2010.

The increased uses of cash described above were partially offset by a decrease in the number of shares repurchased under our common share repurchase program. In the first six months of 2011, we repurchased 574,174 shares for an aggregate price of \$52.1 million compared to 1,483,280 shares for an aggregate price of \$91.7 million during the same period in 2010.

#### Credit Facilities and Available Future Liquidity

In 2006, Core Laboratories LP, an entity 100% indirectly owned by Core Laboratories N.V., issued \$300 million aggregate principal amount of Senior Exchangeable Notes which are fully and unconditionally guaranteed by Core Laboratories N.V. and mature on October 31, 2011.

Under the terms of the Notes, defined criteria was met which allowed the Notes to be early exchanged during the second quarter of 2011, as it was during the first quarter of 2011, and as a result the equity component of the Notes at June 30, 2011 was classified as temporary equity. This balance combined with the debt amount reflects the amount that could result in cash settlement upon exchange. We received nine requests to exchange 17,909 Notes during the first and second quarters of 2011 which were settled for \$17.9 million in cash and 213,936 shares of our common stock, all of which were treasury shares, resulting in a loss of \$0.2 million. We also received five requests during the second quarter to exchange 888 Notes which we will settle during the third quarter upon completion of the requisite holding period per the Note Indenture agreement.

We maintain a revolving credit facility (the "Credit Facility") that allowed for an aggregate borrowing capacity of \$300.0 million at June 30, 2011. The Credit Facility also provided an option to increase the commitment under the Credit Facility to \$350 million, if certain conditions are met. The Credit Facility bears interest at variable rates from LIBOR plus 1.75% to a maximum of LIBOR plus 2.50%. Any outstanding balance under the Credit Facility is due in December 2015 when the Credit Facility matures. Interest payment terms are variable depending upon the specific type of borrowing under this facility. Our available capacity is reduced by outstanding letters of credit and performance guarantees and bonds totaling \$14.5 million at June 30, 2011 relating to certain projects in progress. Our available borrowing capacity under the Credit Facility at June 30, 2011 was \$285.5 million. As of June 30, 2011, we had \$17.9 million of outstanding letters of credit and performance guarantees and bonds in addition to those under the Credit Facility.

The terms of the Credit Facility require us to meet certain financial and operational covenants. We believe that we were in compliance with all such covenants at June 30, 2011. All of our material, wholly owned subsidiaries are guarantors or co-borrowers under the Credit Facility.

Our ability to maintain and grow our operating income and cash flow depends, to a large extent, on continued investing activities. We are a Netherlands holding company and substantially all of our operations are conducted through subsidiaries. Consequently, our cash flow depends upon the ability of our subsidiaries to pay cash dividends or otherwise distribute or advance funds to us. We believe our future cash flows from operations, supplemented by our borrowing capacity and issuances of additional equity, should be sufficient to fund our debt requirements, capital expenditures, working capital, dividend payments and future acquisitions.

#### Recent Accounting Pronouncements

In May 2011, the FASB issued ASU 2011-04) which relates to fair value measurement (FASB ASC Topic 820), which amends current guidance to achieve common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards. The amendments generally represent clarification of FASB ASC Topic 820, but also include instances where a particular principle or requirement for measuring fair value or

disclosing information about fair value measurements has changed. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. We will adopt this pronouncement for our fiscal year beginning January 1, 2012. We do not expect this pronouncement to have a material effect on our consolidated financial statements.

In June 2011, the FASB issued ASU 2011-05 which provides new guidance on the presentation of comprehensive income (FASB ASC Topic 220) in financial statements. Entities are required to present total comprehensive income either in a single, continuous statement of comprehensive income or in two separate, but consecutive, statements. Under the single-statement approach, entities must include the components of net income, a total for net income, the components of other comprehensive income and a total for comprehensive income. Under the two-statement approach, entities must report an income statement and, immediately following, a statement of other comprehensive income. Under either method, entities must display adjustments for items reclassified from other comprehensive income to net income in both net income and other comprehensive income. The provisions for this pronouncement are effective for fiscal years, and interim periods within those years, beginning after December

15, 2011, with early adoption permitted. We will adopt this pronouncement for our fiscal year beginning January 1, 2012.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in market risk from the information provided in Item 7A. "Quantitative and Qualitative Disclosures About Market Risk" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

### Item 4. Controls and Procedures

A complete discussion of our controls and procedures is included in our Annual Report on Form 10-K for the year ended December 31, 2010.

#### Disclosure Controls and Procedures

Our management, under the supervision of and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of June 30, 2011 at the reasonable assurance level.

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. Further, the design of disclosure controls and internal control over financial reporting must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

#### Changes in Internal Control Over Financial Reporting

There have been no changes in our system of internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during our fiscal quarter ended June 30, 2011, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## CORE LABORATORIES N.V.

## PART II - OTHER INFORMATION

## Item 1. Legal Proceedings

See Note 6 of Consolidated Interim Financial Statements in Part I, Item 1.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the quarter ended June 30, 2011, we issued 213,936 shares of our common stock upon exchange by holders of \$17.9 million aggregate principal amount of our Senior Exchangeable Notes and we issued 630,744 shares of our common stock upon the accelerated settlement of 1,648,040 of our warrants. Such shares were issued in transactions exempt from registration under Section 3(a)(9) of the Securities Act of 1933, as amended.

The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the quarter ended June 30, 2011:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares That May Yet be Purchased Under the Program (3)
April 30, 2011 (1)	10,475	\$103.71	10,475	8,608,003
May 31, 2011 (2)	12,934	93.22	12,934	9,136,546
June 30, 2011	—	—	—	9,477,494
Total	23,409	\$97.92	23,409	

(1) Contains 10,475 shares valued at approximately \$1.1 million, or \$103.71 per share, surrendered to us by participants in a stock-based compensation plan to settle any personal tax liabilities which may result from the award in April 2011.

(2) Contains 12,934 shares valued at approximately \$1.2 million, or \$93.22 per share, surrendered to us by participants in a stock-based compensation plan to settle any personal tax liabilities which may result from the award in May 2011.

(3) In connection with our initial public offering in September 1995, our shareholders authorized our Management Board to repurchase up to 10% of our issued share capital, the maximum allowed under Dutch law at the time, for a period of 18 months. This authorization was renewed at subsequent annual or special shareholder meetings. At our annual shareholders' meeting on May 19, 2011, following a change in Dutch law that permitted us to repurchase up to 50% of our issued share capital in open market purchases, subject to shareholder approval, our shareholders authorized an extension to repurchase 10% of our issued share capital through November 19, 2012 and an additional 15.6% of our issued share capital until March 12, 2012 to fulfill obligations relating to the Notes or warrants. The repurchase of shares in the open market is at the discretion of management pursuant to this shareholder authorization.
