Item 2.01, Acquisition and Disposition of Assets.

On April 27, 2006, we completed the sale of our interest in the Macae power facility in Brazil to Petrobras for approximately \$358 million in cash. Pursuant to an agreement in March 2006, we terminated a participation agreement between Petrobras and us related to the Macae facility, resolving certain disputes which are described in our Annual Report on Form 10-K for the year ended December 31, 2005. In addition, prior to closing we repaid the outstanding project financing debt, including accrued interest.

Upon approval of this sale by our Board of Directors in March 2006, Macae became a discontinued operation and will be reported in our financial statements as such beginning with our Quarterly Report on Form 10-Q for the quarter ended March 31, 2006.

This Current Report on Form 8-K is being filed to report the completion of the sale and present the pro forma impacts of the sale on our historical financial statements.

Item 9.01, Financial Statements and Exhibits.

(b) Pro forma financial information.

The accompanying unaudited pro forma financial statements are based on our historical consolidated financial statements as of and for the year ended December 31, 2005, adjusted for the effects of the sale of Macae, as described above. The unaudited pro forma balance sheet as of December 31, 2005, assumes the disposition occurred on the balance sheet date. The unaudited pro forma statements of income for the years ended December 31, 2005, 2004 and 2003 assume the disposition occurred on January 1, 2003. The unaudited pro forma financial statements should be read in conjunction with the historical consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2005 and should not be construed to be indicative of future results or results that actually would have occurred had the transaction occurred at the dates presented. In addition, these pro forma financial statements were prepared in accordance with Article 11 of Regulation S-X. Accordingly, we have not assumed any cost savings or synergies that might occur related to the transaction.
