ADVANCE TECHNOLOGIES, INC.
(A Development Stage Company)
Notes to the Consolidated Financial Statements

Edgar Filing: ADVANCE TECHNOLOGIES INC - Form 10QSB

June 30, 2002

GENERAL

Advance Technologies, Inc. (the Company) has elected to omit substantially all footnotes to the financial statements for the three and nine months ended June 30, 2002 since there have been no material changes (other than indicated in other footnotes) to the information previously reported by the Company in their Annual Report filed on Form 10-KSB for the fiscal year ended September 30, 2001.

UNAUDITED INFORMATION

The information furnished herein was taken from the books and records of the Company without audit. However, such information reflects all adjustments which are, in the opinion of management, necessary to properly reflect the results of the interim period presented. The information presented is not necessarily indicative of the results from operations expected for the full fiscal year.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS AND PLAN OF OPERATIONS

Advance Technologies Inc. ("AVTX") is a developer of infrared (IR) Enhanced Vision technology and commercial solutions. The Company has a worldwide license from Hughes Aircraft Company, Los Angeles, California, which includes a patent for an infrared Enhanced Vision System. Advance Technologies licenses and develops applied infrared enhanced vision solutions for use in diverse industries including aviation, recreational vehicles, commercial trucking, marine, security and fire fighting applications.

ENHANCED VISION SYSTEM ACTIVITIES

AVTX's Enhance Vision System, our first project; has entered production following its certification last year from the Federal Aviation Administration. Advance Technologies benefits through our license agreement with Kollsman Inc. whereby AVTX achieves royalties that increase in time. Initial EVS systems have been delivered to Gulfstream Aerospace Company, and Gulfstream, in turn, has completed initial deliveries to its customers. As of this filing, Kollsman has not yet provided AVTX an official schedule of its planned EVS production. AVTX will provide guidance based upon production commitments and delivery schedules between Gulfstream Aerospace Company and Kollsman Inc. as this information becomes available.

Last quarter, AVTX and Kollsman had discussed collaboration on an Advanced EVS incorporating AVTX's proprietary technology, which is not included as or a part of the current production EVS. A process was initiated in which Kollsman would provide AVTX with certain hardware items to support AVTX's development activities for the Advanced EVS. As of June 30, this program has not progressed further.

AVTX and Telesis Technologies signed an EVS agreement, which designates Telesis Technologies as our EVS representative for Far East opportunities. This agreement gives Telesis the right to present limited information on EVS and on the benefits that EVS can provide to civil aviation.

Advance Technologies, Inc. also continues its development phase with several projects moving forward at a pace dictated by market conditions, technical

Edgar Filing: ADVANCE TECHNOLOGIES INC - Form 10QSB

innovations and market factors.

NITEAGLETM

Telesis Technologies has provided to AVTX a second preproduction NITEAGLETM System, Advance Technologies' proprietary infrared system for recreational vehicles, for our market evaluation and market development activities. Demonstrations and marketing presentations have been conducted in accordance with our plan. The evaluation effort has continued with many discussions with potential partners.

SPECTRUM 9000, MEDICAL EQUIPMENT

AVTX continues to provide export license support under a time & service reimbursement agreement with Telesis Technologies. Telesis has announced no plans for introduction of the Spectrum 9000 into the US market.

HONEYWELL TECHNOLOGY LICENSE

Honeywell International has provided AVTX initial terms for a "field application" and/or "market use" of their Micro-bolometer technology. The terms and conditions are under evaluation by AVTX and our business partner Telesis Technologies.

OTHER IR ACTIVITIES

Advance Technologies Inc. continues development activities on new Infrared systems for commercial markets. These projects cannot be forecast with any degree of certainty, and all strategic partnerships or business arrangements remain confidential until such time as formal announcements are appropriate without compromising the development plan and/or the application marketplace.

CAPITAL RESOURCES

No commitment for capital resources has been made during this reporting period.

FINANCIAL ANALYSIS

The results on the operation represent projects of likely future events that cannot be guaranteed. Therefore, the financial analysis does not include projects, and no quantitative assessment has been provided based upon the future discussion of potential events in Section 3.

The Company has received revenue pursuant to an agent agreement with, that allows the Company to receive fixed monthly service fees, and to bill for additional services provided. The Company records revenues when the services are performed.

The Company is entitled to reimbursement for various expenses associated with the development of its night vision technology pursuant to the joint venture agreement with Telesis Technologies. These reimbursements are recorded as miscellaneous income when received.

No material changes have been provided; therefore impact of unforeseeable events cannot be assessed.

Present financial plans are adequate to meet our cash flow needs with our current project schedule.

ITEM 6. EXHIBITS

Edgar Filing: ADVANCE TECHNOLOGIES INC - Form 10QSB

99.1 Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
