Presentation by Rick Lindner

AT&T Senior Executive Vice President and Chief Financial Officer

Morgan Stanley 11th Annual Media & Communications Conference

Tuesday, 8:00 a.m. Eastern Daylight Time

Simon Flannery: We're going to get started here in about two minutes.

Simon Flannery: Welcome to our 11th Annual Media and Communications Conference. We hope you're going to have an interesting day, and two days, as we go through the interesting times we're having in the industry right now. This is a fireside chat format. As those of you who have been here before know, that means we want you to be involved. I know it's early in the morning, and some of you probably got in late last night, but what we're going to do is ask each speaker to make introductory remarks. We'll go through Q and A with the Morgan Stanley analysts, and then open up the board for Q and A. What we find is that this is a way to break away from the standard PowerPoint format and really get into the issues that are on investors' minds, but it requires audience participation. So, we look forward to that.

As I was preparing for this conference, I was watching ESPN, which helps me focus my mind, and they had a reel of Barry Bonds' home runs through the years. And it was almost like a history of the telecommunications industry, because he hit number 400 and there it was at Pacific Bell Park as the ball flew out. And then he hit number 500, and it was SBC Park, I think, and the most recent one was AT&T Park. I don't know what it's going to be when he hits number 755, or whatever, but it's been a remarkable time of change, and I think nobody has been at the center of that more than AT&T has, and Rick is probably one of the busiest men in the industry right now.

Edgar Filing: BELLSOUTH CORP - Form 425

But it's our great pleasure to kick off this conference with AT&T and with Rick as Senior Executive Vice President and CFO. So with that, over to you.

Rick Lindner: Thank you, and good morning, everyone. Hopefully it will continue to be AT&T Park. We're running out of brands, so we're going to find one and stick with it for awhile.

It's great to be here. It's great to have an opportunity to talk with you this morning. And it's always great to have an opportunity to talk about AT&T.

Before we get started, I need to get the legalities out of the way, so I need to call your attention to the Safe Harbor statement. It's in the handouts in front of you this morning, and I just remind you that we may talk about some forward-looking statements this morning, and those statements are subject to risks and uncertainties and you can find a discussion of that in our SEC filings. And also we'll talk probably about some non-GAAP financial measures, and those are reconciled to the GAAP financial measures on our website.

I would also call your attention to some information regarding FCC filings in relation to our planned merger with BellSouth. That is also in your handouts.

So, with that taken care of, Simon suggested I make a few opening remarks to give you a quick overview of the business and kind of where AT&T is at these days.

As you saw in our first quarter results, I think we've gotten the year off to a good start. Adjusted earnings per share was up substantially, and it was our fourth straight quarter of year-over-year and sequential adjusted EPS growth, and I point out it was also our fourth straight quarter of double-digit adjusted EPS growth.

Cingular Wireless continues to execute very well. Their integration projects are on track. Network performance continues to improve, and that network performance is starting to have a significant impact on churn, driving churn down. Margins are expanding, subscriber and revenue growth in the first quarter were both very solid, and data revenue growth continues to be very impressive. Ralph De La Vega is with us this morning, and Ralph is going to be up here this afternoon, so he will be able to tell you about all the good things happening at Cingular these days.

In our wireline operations, I would tell you that the integration between the legacy AT&T and SBC operations and networks is under way and it's going very well.

Within the wireline operations, we continue to generate positive revenue growth in our regional consumer business and in our regional small and medium business segment, and we've done that now for 8 straight quarters. So good solid growth in our regional wireline operations.

We're also seeing encouraging signs in enterprise. Volumes are strong. I think the customer response to our merger has been positive. And we're capturing our share of technology migration, as large enterprise customers move from legacy voice and data applications to IP-based services. In the first quarter our IP data revenues grew 14 percent, so we're seeing good results there.

Pricing pressures still remain in that marketplace, there's no doubt about that. But the gap between the average price in our portfolio, the average price in contracts we have with customers, versus the current sales prices in the marketplace has narrowed, and I think we're moving toward an inflection point in enterprise. And longer-term, enterprise and the enterprise market is going to be a good business for us.

When you step back and look at AT&T today, I think you see several things. You see, first of all, a company that is a leader in its industry. You see a company that is growing earnings per share at double-digit rates, paying a dividend yield more than 5 percent, and yet despite that, trading currently at a discount that is 30 percent or more to the market on a forward-looking multiple PE basis.

We're not terribly happy about that, but as a result, I think we're well-positioned to deliver excellent returns to shareowners going forward.

I think you also see a company with premier assets, including the best wireless coverage, world-class business networks, a leadership position in broadband, and a leadership position in directory.

You also see a company with substantial opportunities. We have a huge opportunity in wireless. And Ralph is going to talk about that this afternoon. To put it in perspective, by the end of next year, Cingular expects to grow its OIBDA margins above 40 percent, and current margins are in the low 30 percent range. So, by 2008, over the next two years, we could realize up to a thousand basis point margin expansion in a

Edgar Filing: BELLSOUTH CORP - Form 425

business that is \$35 billion and growing in revenues. There's not many businesses out there that have that magnitude of opportunity.

We also have the industry's largest set of merger synergy opportunities by a wide margin. When you add the expense and capital savings available from our wireless and wireline mergers, including the pending BellSouth merger, as well as cost savings from separate operational initiatives, by 2008 we expect to reduce our annual cost capital expense by over \$8 billion. Again, that is a huge opportunity, and we intend to deliver on it.

As we outlined for you first in late January, we expect double-digit adjusted earnings per share growth in each of the next three years, combined with growing pre-cash flow. We're going to return a substantial portion of that cash to shareowners through our dividends and through an expanded share repurchase program where we'll repurchase \$10 billion of AT&T stock by the end of next year, by the end of 2007, with at least 2 billion coming this year. I think when you put all that together, I think it adds up to the strongest outlook in our industry, both in terms of financial performance and in terms of value returned to shareowners.

And finally, I would like to emphasize that from management's perspective, from the perspective of the AT&T management team, we're committed to executing as planned. Our goal is to consistently deliver, and to deliver on the targets we've talked to you about. And I think we have a strong track record in this regard, particularly if you look out over the last year or two and see the margin expansion we brought to the business as well as the earnings growth we brought to the business. It's where our focus is, has been, and will be going forward.

So Simon, in a few words, that's our view of AT&T today, and that is our outlook. So with that, I'll open it up for any questions.

Simon Flannery: Okay. Thank you, Rick. We appreciate it.

You talked about not being happy with the stock price, and you talked about the buy back program. How much flexibility do you have to accelerate that to take advantage of the current market environment to do more this year, or is it probable that given all of the things you've got going on, it's more likely it's in and around that \$2 billion this year?

Rick Lindner: I think we're fairly limited in terms of our flexibility between now and the shareowner vote for the merger. Because the BellSouth merger is a stock transaction, we obviously could not be in the market during the first quarter when discussions about the merger were taking place. After we released first quarter earnings, we've been able to go in and be in the market on a daily basis, but legally we're limited to very small number of shares that's based on the average number of shares purchased during the 90 days preceding when the merger was announced.

Once we send out materials to the shareowners for the shareowner meeting, then we're precluded from being in the market. So we're fairly limited until the shareowner vote. Once the shareowner vote occurs, then we're fairly, pretty free to be, outside of just normal lockout periods, we're free to be in the market. So, I think what you should expect is that we will be doing some repurchasing between now and the shareowner vote in July or August. After that we will be in the market in a much bigger way.

Simon Flannery: It's a very good time to just focus on buy backs versus dividends. When you've looked at things like special dividends in the past, what should we be expecting in terms of dividend policy given your double-digit EPS growth?

Edgar Filing: BELLSOUTH CORP - Form 425

Rick Lindner: Sure. I think the good news about our outlook is that it gives us a lot of flexibility. As we move forward over the next couple of years, the earnings growth combined with strong free

cash flow gives us the opportunity to support and increase the dividend as well as do the share repurchase that we've talked about.

As you know, we've increased our dividend every year since divestiture, so I think we've got a good track record there. Certainly we believe dividends are important to our shareowners, important to our shareowner base, and we'll continue to support those dividends.

You know, we'll always look at where we are relative to the market, what our metrics look like, and I think given current trading ranges, current market interest rate, dividend yields, you know, our focus will be on share repurchase in this environment.

Simon Flannery: Maybe we can just track in on the BellSouth timing, where you are with the states and, you know, where we think that the best case closing is right now. And when we think about the structure, you mentioned you want to stick with AT&T for now. You'll be the only company with a directory business once you buy in BellSouth, and you're thinking looking at spinning some rural lines. How do you think about the asset mix that you have? Are you there? Is that what you need? Are you open to trimming things like directories or like some of those access lines beyond the 18 million households that have got Lightspeed?

Rick Lindner: First part of your question was BellSouth? The BellSouth merger approval process is going along as planned. We've begun the process, made filings in both the FCC and the Department of Justice. We have completed a draft registration statement. We're on our second round of comments with the SEC. I don't view any of the comments as significant, it's just cleaning up some disclosure items, and so I would expect that we'll be on target for a shareowner vote in the July to early August timeframe.

I think we're on target for FCC and DOJ approval that could come, you know, September, probably October, and so when you put all of those things together, we feel pretty good about a fourth-quarter closing. It's hard to handicap at this point as to its happening, you know, before the elections, after the elections, but I think we feel pretty confident about closing this year and closing in the fourth quarter.

With respect to the asset mix, you know, we're always going to look at our asset mix, we're always going to look at opportunities, whether it be looking at rural access lines, whether it be looking at assets like directory. But I would tell you that, you know, that we like those businesses. We like the directory business. It throws off terrific cash flow to us.

And on top of that, I think as that business moves forward in the future, it increasingly will transition from a print directory business to an electronic business, and we're starting to see that in good measure in the last year or two. We're excited about our YellowPages.com venture that we've had with BellSouth with the merger. We'll have 100% ownership of that.

And when you put that together with some of the other initiatives we have and the other assets we have, there are some interesting opportunities there. All of a sudden, you have salespeople on the street calling on businesses of all sizes, maintaining what is truly the best database of business information available electronically, and then you can distribute that through what will be by the time we close something like 11 million broadband Internet users, today 56 million wireless users. And in the future distribute that information over the IPTV platform.

Edgar Filing: BELLSOUTH CORP - Form 425

So, all of a sudden, you have some synergies there, operationally, that start to make some sense. You also have a sales force out there that can sell in addition to print and electronic advertising,

may be able to sell advertising that you'll utilize on the IPTV platform. So there are some interesting things about that business, we'll continue to look at it, we'll watch how the industry develops, but it by itself is a pretty large enterprise. It's a little more than kind of trimming away at the edges these days, particularly after we close with BellSouth.

I think the same is true with some rural lines. We'll continue to watch how that market develops. But one of the things that we're pushing forward on are strategies that would enable us to offer both a broadband and a video product across our base including in some of the more rural lines, and in those areas, if you're able to offer broadband and video, then that business starts to change and the character starts to look a little more interesting.

That's why you saw a few weeks ago we announced that we are filing both some satellite and some fixed wireless offers in broadband. That's why our commercial agreement with EchoStar continues to be important to us. It gives us a video product that we can offer outside of our Lightspeed platform. So we continue to look at the opportunities.

Whenever you start to trim some of those assets from the business, you typically have to overcome a couple of hurdles. You have to overcome whatever tax impacts there are from the transaction, and you also have to overcome the impact that you're de-scaling the business a little bit, so you have to find ways to do that without losing some economies of scale or making up for it in the value of the marketplace.

And up to this point, we haven't seen values in the marketplace that will overcome those two.

Simon Flannery: There's a lot of talk about the economy out there at the moment. If the market is correcting, can you talk from your perspective to what extent you're seeing any evidence of consumers strained from gas prices, from higher mortgage rates and on the other side inflation coming through? I was asked the other day with the price of copper where it is, is that a problem for the telcos, and I'm assuming copper is a smaller and smaller part of your capital spending budget, but you know, are you seeing those things coming through, are the numbers still very small for you on the consumer demand side and on the inflation side of the cost structure?

Rick Lindner: Well, energy has some impact on our cost structure. It's not certainly the most significant, but there are some incremental impacts to it. Our cost structure revolves more around areas like wage and salaries, force-related costs, things like traffic compensation, cost of goods and equipment that is sold or on materials used to provide broadband, for example, but energy prices do have some impact on the business. It hasn't been significant.

We have not seen the impact yet, I think in terms of any slowing or cooling of the economy. The employment figures continue to be good, continue to be strong, and I think that's kept business strong for us. You know, in the first quarter you saw, I think, not just for us but other carriers as well, very good growth in small/medium business revenues, and on the consumer side you're seeing record levels of adoption of broadband services continue, so it's not to say we won't see some impacts later as the year goes on, depending upon energy prices and other factors, but I don't think it's been an impact yet.

Simon Flannery: One more before we open it up to the audience. Project Lightspeed, it seems like there's still this great debate about what is the right architecture, how to deliver the video. Can I ask you how do you think about it? How do you charge the executives in Project Lightspeed? How do you measure them? How do you say this is what I want to see, this is how I'm going to get comfortable, worrying about the business

model, tracking as I expected, I want to see this by

this date? Because I think as industry observers, the visibility is still pretty poor. We're getting press releases about market launches and so forth, but we don't have the numbers available to do the sort of analysis that you do. So if we can sort of put ourselves in your shoes for a second, how do you think about the business case on the success of the rollout?

Rick Lindner: Well, I think for me the main thing that I want to see is I want to see the product working and I want to see it working in the field. It does little for me personally to walk through a lab and see a TV screen with a picture on it. I want to see it in someone's home. And I've seen it there. And so I feel very comfortable from the standpoint that the technology and the platform works.

I've been out in the homes in San Antonio. I've seen the platform up and running. People are using it as their video service as well as high speed Internet access. And what I would tell you when I saw it is this: The picture quality is excellent. In fact, in side by side tests, the picture quality is better than digital cable.

The quick, the fast channel change works very well, just as we hoped it would, thought it would. Picture in picture, the user interface, DVR capabilities, all very easy to use, very intuitive. So, I was very pleased as I went out and saw the platform, played with it, talked with people who are using it.

It is still a new technology, and so that's why you see us moving, I think, pretty methodically through a development process to a commercial launch. And we have milestones set up along the way in that process in terms of what things we have to deliver, product releases that Microsoft has to deliver, CPE that Scientific Atlanta and Motorola have to deliver, and those things are largely on track. The last release we received from Microsoft went into the lab, was accepted into the lab, without any issues and is working very well there.

So our expectation is that we're going to roll the service out commercially beginning in San Antonio. We're going to do that next month, and we'll start to ramp up customers on the platform. At the same time we'll be upgrading the software and coming out with the final set top boxes in the third quarter.

That will give us HD capabilities and we'll move out then to launch with HD not only in San Antonio but in Houston and some other markets as well.

So that is kind of the timeline that it's on. But so far, Simon, I've been pleased with what I've seen in the platform. The other thing that I think has been good is that the customer installation in San Antonio has been in about the 3 to 5 hour range, and it depends upon the state of the inside wiring in the home. That's about what we expected. In fact, it's a little better than we expected going in. Our original business case assumed an average of a little over five hours per install in the early stages, in the first year or so.

So CPE prices and the cost of the capital deployment in the network are all on track and we're moving forward with it. I'm excited about the platform. When you see the platform up and running, it will be very competitive in the marketplace

Edgar Filing: BELLSOUTH CORP - Form 425

Simon Flannery: Okay. Thank you. Well, with that, let's open it up to the audience.

Question: Could you give us a little bit of clarity on what type of cash outflow we can expect over the intermediate term, meaning the next three years or so, regarding the deferred tax liabilities and

the increasing OPEB liabilities on the balance sheet? You guys essentially stopped funding the OPEB in 2004, which benefited your cash flow by about \$2 billion a year. Are we likely to see cash outflows to fund those liabilities in the near term and what would the magnitude of those be?

Rick Lindner: Good questions. One kind of take them in reverse order. On our pension and OPEB liabilities, actually when we complete the mergers and bring in and consolidate BellSouth, Cingular, along with the AT&T merger, if you look at our total pension and OPEB liability, we will be on a combined basis funded at about 80 percent, which is pretty significant as you compare our funding levels to others in the industry or others outside of the industry.

One way to look at that is that if you assume a discount rate that's in the 6 percent range and you assume you're able to earn on your funding and our assumption is 8 and a half percent and we've been able to over a long period of time earn actually more than that. If you look over the last ten years, our total earnings in the fund had been closer to 10%. But if you look at that funding level, look at the discount rate, and the earnings on the fund, it would require no funding in the liability for many, many years. We're in a position where we're over 100% funded on pension, and frankly I don't think I would not want to be greater than, you know, 75, 80 percent funded in total, simply because, I think, we still have opportunities to reduce and manage the OPEB liability over time, and I want to be able to continue to work toward those goals without over-funding the stranded asset. So from a pension OPEB standpoint in terms of funding, I feel comfortable with where we'll be.

With respect to deferred taxes, that's always an area where there's lots of puts and takes, but I think certainly in the intermediate term, when you look out over the next year or two, our cash taxes will be running probably about at or slightly below our book tax rates that would be our assumptions at this point. So if that helps in terms of planning, I don't see a significant reversal, if you will, then, of the deferred tax liability. Deferred tax liability simply always reflects the movement of items reversing and new items creating deferred tax liability.

And so when you put all of that together on a cash flow basis as we've said in our guidance, our expectation is to produce \$2 billion or so of free cash flow this year after dividends. That's relative to our run rate, that is a fairly low number, but it does reflect the merger integration cost and the AT&T acquisition. It also reflects the fact that Cingular is still heavy in terms of capital spending as they finish up their network integration and roll out UMTS.

As we move into 2007, we will have, again, some integration spending related to the BellSouth merger. But we would expect to produce in the \$4 to \$5 billion range of free cash flow after dividends and then \$6 billion plus in 2008.

Simon Flannery: I would like to mention also you have mikes on your desk, so just put up your hand, and then we can you press the button and Lindy?

Question: Yeah, I just wanted to understand a little bit more about why you chose to use equity in the BellSouth transaction and the timing of the buy backs. I mean, do you have further you know, do you kind of keep accessibility for any other major M&A that could come up in the 2007 time frame?

Rick Lindner: Good question. I think, you know, our preference would have been to do the BellSouth transaction in part cash, part stock. From BellSouth's standpoint, they wanted to do an all stock transaction, and the rationale I think was fairly simple; they wanted their shareholders to

have the opportunity to participate in the appreciation and the synergies of the new entity.

So essentially we accomplished both goals by doing it as a stock transaction, but then following that with the \$10 billion dollar share repurchase that we talked about. The \$10 billion dollar share repurchase essentially funds the premium in the transaction in cash, and it keeps us at a range where from the standpoint of our balance sheet, it does give us some flexibility, and helps support, I think, our debt ratings, which is important. Not so much from the standpoint of saying we have to have flexibility to do X, Y, Z, but more from the standpoint that this is still an industry that's going through a lot of change. And as the industry goes through change, you want to have, I think, some conservatism in your balance sheet gives you a good shock absorber against things that occur in the economy or elsewhere that are unforeseen.

Simon Flannery: A question over here, Mike.

[inaudible]

Rick Lindner: Our total switched line loss in the first quarter was at about a 6 percent year-over-year rate. As we go forward in this year, I would expect well, let me back up. In 2005, our line losses were heavily skewed toward wholesale line loss. We were working through kind of the change in the UNE-P rules. A lot of carriers that were offering wholesale using UNE-P platform, were moving out of the market, and so we saw a lot of wholesale reduction. Probably 60 to 70 percent of our line loss last year was wholesale.

I think as we go forward in this year, I would expect to see some increase in retail line loss simply because we will have cable competitors in more of our markets. Comcast will be rolling out over the course of this year to all of their markets. So we'll see a little bit of an uptick from that. I think that will be offset by lower levels of wholesale loss.

When you step back from it, though, you have to think about it like this: First of all, on the business side of things, certainly in enterprise business today, the access lines there are not very meaningful. You know, we're cannibalizing those lines on a daily basis. We're going to customers, we're moving them from legacy Centrex applications to IP applications. We're retaining the customer. We're retaining the revenue streams. We're just moving them from the voice line to the data line on the Income Statement. You'll start to see some of that occur as well in small and medium business. That trend will start to move down market. And the last year or so, actually small/medium business has seen a small uptick in lines. But again, you'll see that trend of technology migration move through.

When you go to the consumer side of things, you're seeing consumers change usage patterns in terms of their technologies. Consumers are moving minutes and usage from wireline to wireless, so we'll see a loss of an access line, and we'll see increases in customers on the Cingular side.

You see customers moving from second lines to broadband applications. So customers will drop a second line because, frankly, their kids are either using their wireless phones or they're not using that second line for dialup, they're using DSL instead. So, again, we're cannibalizing part of that base.

And then finally, there will be some customers moving from our voice service to cable or to a voice product. But when you put it all together, I think the important thing for us from a consumer space is what our total retail connections with those customers do. And if you look at our first quarter results, total recall connections which includes all the access lines plus DSL plus video we're up about 2.4, 2.5 percent. Our revenues were up about 2.1 percent. So those two measures track

pretty closely. That's why broadband penetration is extremely important to us in the consumer space.

Question: Could I just ask a question on Lightspeed? I think what your share price is actually reflecting right now is a belief in the marketplace that either the product is not going to be successful or, even if it's there, it's not going to be profitable, and it's going to be return-on-invested-capital destructive. At what stage will you be in a position to provide detailed information on Lightspeed? Is it likely that by the fourth quarter we could get the numbers from you regarding operational cost structure, regarding revenue expectation, so we can start building the model that actually tries to track the business, tries to determine return on invested capital? I understand it's quite early now. But are we likely by the end of the year to see it from you?

And the second question relating to DirecTV and DISH. Could you just discuss, or could you negate, I should say, any perception that might exist in the marketplace that you will be buying DISH after BellSouth transaction is completed, either as the complement to Lightspeed or as a replacement to Lightspeed if in fact it becomes less successful?

Rick Lindner: Wait. Let me take you back in time for a minute. In 1999, 2000, this was right about the time back in our business. I was in our wireline business in 1999 and moved over to wireless. Not that long ago, six years, seven years ago. A lot of discussion was going on in the business about DSL, and as a result of that discussion, some decisions were made to invest pretty significantly in the networks to drive fiber deeper into the networks, and using some very new cutting-edge technology, to provide additional bandwidth to the home.

I would tell you, in 1999 and 2000 DSL was a gleam in the engineer's eye, and today at the end of the first quarter, 28 percent of our consumer customers had DSL.

We had 7 and a half million customers when we closed with BellSouth. In total, we'll have about 11 million, we'll be the largest broadband provider in the U.S., and frankly, the market has changed to the point where DSL and broadband has become the central service into the home.

I shudder to think we can talk about, well, okay, what is the return on investment and so forth with that product, but I can't imagine the business today without it. And if you think about DSL at the time, it was an incremental investment, but what it was was a natural extension of our network. We were driving fiber deeper into the network to provide more bandwidth in the home.

Lightspeed is exactly the same thing. Forget about IPTV for a minute. What we're doing is we're driving fiber deeper into the network, we're adding electronics to it to provide more bandwidth to the home. That bandwidth is going to provide a more robust data service, going to cut cost expense on the side. It really protects and builds the franchise for the future.

And on top of it, what it gives us then is the ability, over a single platform, single network, to offer voice data and video, with a compelling product set and some interesting integration opportunities.

Edgar Filing: BELLSOUTH CORP - Form 425

As we go forward, you are right, we are early in the process yet, and if we made a mistake along the way it was probably to talk about Lightspeed as early as we did, because we knew it was going to take time to develop. We've given, I think, quite a bit of data in terms of our expectations of costs to build the network. We've given data on what our expectations for customer acquisition costs are. I think as we get further through the end of this year, as we start to launch some markets, as we have data available, we'll begin to provide you more data in terms of what we're

seeing in customer acceptance, customer costs, actual costs to install and what economics look like. But you have to think about this: this is just a natural extension of what we've done.

Question: And on DISH?

Rick Lindner: On DISH, you know, I said earlier I think what is important for us is to have a video and a data product we can offer across our base. Those products are going to be delivered on different platforms in some areas, just based on the geography and the density of the area. So, in some cases, where possible, we're going to deliver those products over the single network. That I think provides the best economics, provides the easiest path toward integrating products, and so our objective would be to provide those products over a single network whenever possible.

In cases where we can't, then we'll use wireless, fixed wireless or satellite to provide both video and data to complement services we already have existing. And we'll try to integrate those services like we have, like we're doing this next as we launch this next month with our HomeZone product, which integrates DISH satellite service with DSL.

Q: Thank you very much.

Cautionary Language Concerning Forward-Looking Statements

We have included or incorporated by reference in this document financial estimates and other forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These estimates and statements are subject to risks and uncertainties, and actual results might differ materially from these estimates and statements. Such estimates and statements include, but are not limited to, statements about the benefits of the merger, including future financial and operating results, the combined company's plans, objectives, expectations and intentions, and other statements that are not historical facts. Such statements are based upon the current beliefs and expectations of the management of AT&T Inc. and BellSouth Corporation and are subject to significant risks and uncertainties outside of our control.

The following factors, among others, could cause actual results to differ from those described in the forward-looking statements in this document: the ability to obtain governmental approvals of the merger on the proposed terms and schedule; the failure of AT&T shareholders to approve the issuance of AT&T common shares or the failure of BellSouth shareholders to approve the merger; the risk that the businesses of AT&T and BellSouth will not be integrated successfully or as quickly as expected; the risk that the cost savings and any other synergies from the merger, including any savings and other synergies relating to the resulting sole ownership of Cingular Wireless LLC may not be fully realized or may take longer to realize than expected; disruption from the merger making it more difficult to maintain relationships with customers, employees or suppliers; and competition and its effect on pricing, spending, third-party relationships and revenues. Additional factors that may affect future results are contained in AT&T's, BellSouth's, and Cingular Wireless LLC's filings with the Securities and Exchange Commission (SEC), which are available at the SEC's Web site (<http://www.sec.gov>). Neither AT&T nor BellSouth is under any obligation, and expressly disclaim any obligation, to update, alter or otherwise revise any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

NOTE: In connection with the proposed merger, AT&T Inc. (AT&T) filed a registration statement on Form S-4 (Registration No. 333-132904), containing a joint proxy statement/prospectus of AT&T and BellSouth Corporation (BellSouth), with the Securities and

Edgar Filing: BELLSOUTH CORP - Form 425

Exchange Commission (the SEC) on March 31, 2006. Investors are urged to read the registration statement and the joint proxy statement/prospectus contained therein (including all amendments and supplements to it) because it contains important information. Investors may obtain free copies of the registration statement and joint proxy statement/prospectus, as well as other filings containing information about AT&T and BellSouth, without charge, at the SEC's Web site (www.sec.gov). Copies of AT&T's filings may also be obtained without charge from AT&T at AT&T's Web site (www.att.com) or by directing a request to AT&T Inc. Stockholder Services, 175 E. Houston, San Antonio, Texas 78205. Copies of BellSouth's filings may be obtained without charge from BellSouth at BellSouth's Web site (www.bellsouth.com) or by directing a request to BellSouth at Investor Relations, 1155 Peachtree Street, N.E., Atlanta, Georgia 30309.

AT&T, BellSouth and their respective directors and executive officers and other members of management and employees are potential participants in the solicitation of proxies in respect of the proposed merger. Information regarding AT&T's directors and executive officers is available in AT&T's 2005 Annual Report on Form 10-K filed with the SEC on March 1, 2006 and AT&T's proxy statement for its 2006 annual meeting of stockholders, filed with the SEC on March 10, 2006, and information regarding BellSouth's directors and executive officers is available in BellSouth's 2005 Annual Report on Form 10-K filed with the SEC on February 28, 2006 and BellSouth's proxy statement for its 2006 annual meeting of shareholders, filed with the SEC on March 3, 2006. Additional information regarding the interests of such potential participants is included in the registration statement and joint proxy statement/prospectus contained therein, and other relevant documents filed with the SEC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(All dollar and share amounts rounded to the nearest thousand, except per share data)

1. Description of Business and Summary of Significant Accounting Policies

Description of Business

Palo Alto Networks, Inc. (the “Company,” “we,” “us,” or “our”), located in Santa Clara, California, was incorporated in March 2005 under the laws of the State of Delaware and commenced operations in April 2005. We offer a next-generation enterprise security platform that allows enterprises, service providers, and government entities to simultaneously empower and secure their organizations by safely enabling the increasingly complex and rapidly growing number of applications running on their networks and by preventing breaches stemming from targeted cyber attacks.

Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles, consistent in all material respects with those applied in our Annual Report on Form 10-K for the fiscal year ended July 31, 2014. The condensed consolidated financial statements include all adjustments necessary for a fair presentation of our quarterly results. All adjustments are of a normal recurring nature. We have made estimates and judgments affecting the amounts reported in our condensed consolidated financial statements and the accompanying notes. The actual results that we experience may differ materially from our estimates. Certain prior period amounts have been reclassified to conform with current period presentation.

Principles of Consolidation

The condensed consolidated financial statements include our accounts and our wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Summary of Significant Accounting Policies

There have been no material changes to our significant accounting policies as of and for the nine months ended April 30, 2015, as compared to the significant accounting policies described in our Annual Report on Form 10-K for the fiscal year ended July 31, 2014.

Recent Accounting Pronouncements

In April 2015, the Financial Accounting Standards Board (FASB) issued new authoritative guidance on fees paid in a cloud computing arrangement. The standard requires customers in a cloud computing arrangement to evaluate whether the arrangement includes a software license. If the arrangement includes a software license, the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract. The standard is effective for us for our first quarter of fiscal 2017, although early adoption is permitted, and will be applied on either a prospective or retrospective basis. We are currently evaluating adoption methods and whether this standard will have a material impact on our condensed consolidated financial statements.

In April 2015, the FASB issued updated authoritative guidance to simplify the presentation of debt issuance costs. The amended standard requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability, consistent with the presentation of debt discounts, instead of being presented as an asset. The amended standard is effective for us for our first quarter of fiscal 2017, although early adoption is permitted, and will be applied on a retrospective basis. Upon adoption, the amended standard will change the classification of our unamortized debt issuance costs in our condensed consolidated balance sheets.

In August 2014, the FASB issued new authoritative guidance about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The standard is effective for us for our fourth quarter of fiscal 2017, although early adoption is permitted. The adoption of this standard is not expected to have a material impact on our condensed consolidated financial statements.

In May 2014, the FASB issued new authoritative guidance on revenue from contracts with customers. The new standard provides principles for recognizing revenue for the transfer of promised goods or services to customers with

the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard also requires significantly expanded disclosures about revenue recognition. The guidance is effective for us for our first quarter of fiscal 2018 using either of two methods: (i) retrospective to each prior reporting period presented with the option to elect certain practical expedients as defined within the guidance; or (ii) retrospective with the cumulative effect of initially applying the guidance recognized at the date of initial application

- 7 -

Table of Contents

and providing certain additional disclosures as defined per the guidance. Early adoption is not permitted. We are currently evaluating adoption methods and whether this standard will have a material impact on our condensed consolidated financial statements.

In July 2013, the FASB issued new authoritative guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The standard requires us to present an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss (NOL) carryforward or other tax credit carryforward when settlement in this manner is available under applicable tax law. The guidance was effective for us in the first quarter of fiscal 2015. Our adoption of this guidance did not have an impact on our condensed consolidated financial statements.

2. Fair Value Measurements

We categorize assets and liabilities recorded at fair value on our condensed consolidated balance sheets based upon the level of judgment associated with inputs used to measure their fair value. The categories are as follows:

Level 1—Inputs are unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2—Inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the assets or liabilities, either directly or indirectly through market corroboration, for substantially the full term of the financial instruments.

Level 3—Inputs are unobservable inputs based on our own assumptions used to measure assets and liabilities at fair value. The inputs require significant management judgment or estimation.

The following table presents the fair value of our financial assets and liabilities using the above input categories as of April 30, 2015 and July 31, 2014 (in thousands):

	April 30, 2015				July 31, 2014

Table of Contents

3. Investments

The following tables summarize the unrealized gains and losses and fair value of our investments as of April 30, 2015 and July 31, 2014 (in thousands):

	April 30, 2015			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value
Certificates of deposit	\$1,000	\$—	\$—	\$1,000
Corporate debt securities	161,005	53	(48) 161,010
U.S. government and agency securities	615,087	322	(104) 615,305
Total	\$777,092	\$375	\$(152) \$777,315
	July 31, 2014			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Estimated Fair Value
Certificates of deposit	\$1,000	\$—	\$—	\$1,000
Corporate debt securities	61,299	16	(58) 61,257
U.S. government and agency securities	258,376	45	(108) 258,313
Total	\$320,675	\$61	\$(166) \$320,570

The following tables present our investments that were in an unrealized loss position as of April 30, 2015 and July 31, 2014 (in thousands):

	April 30, 2015						
	Less Than 12 Months		12 Months or Greater		Total		
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	
Corporate debt securities	\$77,534	\$(48) \$—	\$—	\$77,534	\$(48)
U.S. government and agency securities	181,639	(104) —	—	181,639	(104)
Total	\$259,173	\$(152) \$—	\$—	\$259,173	\$(152)
	July 31, 2014						
	Less Than 12 Months		12 Months or Greater		Total		
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	
Corporate debt securities	\$43,868	\$(58) \$—	\$—	\$43,868	\$(58)
U.S. government and agency securities	142,490	(108) —	—	142,490	(108)
Total	\$186,358	\$(166) \$—	\$—	\$186,358	\$(166)

Unrealized losses related to these investments are due to interest rate fluctuations as opposed to credit quality. In addition, we do not intend to sell and it is not likely that we would be required to sell these investments before recovery of their amortized cost basis, which may be at maturity. As a result, there is no other-than-temporary impairment for these investments at April 30, 2015.

The following table summarizes the amortized cost and fair value of our investments as of April 30, 2015, by contractual years-to-maturity (in thousands):

	Amortized Cost	Fair Value
Due within one year	\$368,766	\$368,850
Due between one and three years	408,326	408,465
Total	\$777,092	\$777,315

Table of Contents

4. Intangible Assets

The following table presents details of our purchased intangible assets as of April 30, 2015 and July 31, 2014 (in thousands):

	April 30, 2015			July 31, 2014		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Intangible assets with finite lives:						
Developed technology	\$42,100	\$(5,974)	\$36,126	\$34,500	\$(1,643)	\$32,857
Acquired intellectual property	8,156	(1,645)	6,511	6,546	(958)	5,588
In-process research and development held for defensive purposes	1,900	(844)	1,056	1,900	(370)	1,530
Other	500	(308)	192	500	(120)	380
Total intangible assets with finite lives	52,656	(8,771)	43,885	43,446	(3,091)	40,355
In-process research and development with indefinite lives	—	—	—	7,600	—	7,600
Total purchased intangible assets	\$52,656	\$(8,771)	\$43,885	\$51,046	\$(3,091)	\$47,955

We recognized amortization expense of \$1,971,000 and \$5,680,000 for the three and nine months ended April 30, 2015, respectively, and \$820,000 and \$1,245,000 for the three and nine months ended April 30, 2014, respectively. Our in-process research and development acquired from Cyvera Ltd. ("Cyvera") in April 2014 was transferred to developed technology during the three months ended October 31, 2014 and is being amortized over its estimated useful life of seven years.

The following table summarizes our estimated future amortization expense of intangible assets with finite lives by type as of April 30, 2015 (in thousands):

	Fiscal Years Ending July 31,					
	Remaining 2015	2016	2017	2018	2019	2020 and Thereafter
Developed technology	\$1,502	\$6,014	\$6,014	\$6,014	\$6,014	\$10,568
Acquired intellectual property	245	947	853	617	511	3,338
In-process research and development held for defensive purposes	159	633	264	—	—	—
Other	62	130	—	—	—	—
Total future amortization expense	\$1,968	\$7,724	\$7,131	\$6,631	\$6,525	\$13,906

5. Other Financial Information

The following table presents details of our other assets as of April 30, 2015 and July 31, 2014 (in thousands):

	April 30, 2015	July 31, 2014
Intellectual property licenses	\$41,310	\$46,997
Deferred tax charge	29,009	—
Debt issuance costs	—	12,332
Other assets	6,306	7,199
Total other assets	\$76,625	\$66,528

In December 2014, we reorganized our corporate structure to more closely align with the global nature of our business. As a result, we recorded a deferred tax charge in other assets in our condensed consolidated balance sheets. This amount is being amortized on a straight-line basis over approximately six years as a component of provision for

income taxes in our condensed consolidated statements of operations.

- 10 -

Table of Contents

6. Convertible Senior Notes

Convertible Senior Notes

On June 30, 2014, we issued \$575,000,000 aggregate principal amount of 0.0% Convertible Senior Notes due 2019 (the “Notes”). The Notes are governed by an indenture between us, as the issuer, and U.S. Bank National Association, as Trustee (the “Indenture”). The Notes are unsecured, unsubordinated obligations that do not contain any financial covenants or restrictions on the payments of dividends, the incurrence of indebtedness, or the issuance or repurchase of securities by us or any of our subsidiaries. The Notes mature on July 1, 2019 unless converted or repurchased in accordance with their terms prior to such date. We cannot redeem the Notes prior to maturity.

The Notes are convertible for up to 5,214,000 shares of our common stock at an initial conversion rate of approximately 9.068 shares of common stock per \$1,000 principal amount, which is equal to an initial conversion price of approximately \$110.28 per share of common stock, subject to adjustment. Holders of the Notes may surrender their Notes for conversion at their option at any time prior to the close of business on the business day immediately preceding January 1, 2019, only under the following circumstances:

- during any fiscal quarter commencing after the fiscal quarter ending on October 31, 2014 (and only during such fiscal quarter), if the last reported sale price of our common stock for at least 20 trading days (whether or not consecutive) during a period of 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter is greater than or equal to 130% of the conversion price for the Notes on each applicable trading day;
- during the five business day period after any five consecutive trading day period (the “measurement period”), in which the trading price per \$1,000 principal amount of Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate for the Notes on each such trading day; or
- upon the occurrence of specified corporate events.

On or after January 1, 2019, holders may convert all or any portion of their Notes at any time prior to the close of business on the second scheduled trading day immediately preceding the maturity date regardless of the foregoing conditions. Upon conversion, holders will receive cash equal to the aggregate principal amount of the Notes to be converted, and, at our election, cash and/or shares of our common stock for any amounts in excess of the aggregate principal amount of the Notes being converted.

The conversion price will be subject to adjustment in some events. Holders of the Notes who convert their Notes in connection with certain corporate events that constitute a “make-whole fundamental change” per the Indenture are, under certain circumstances, entitled to an increase in the conversion rate. Additionally, upon the occurrence of a corporate event that constitutes a “fundamental change” per the Indenture, holders of the Notes may require us to repurchase for cash all or a portion of the Notes at a purchase price equal to 100% of the principal amount of the Notes plus accrued and unpaid contingent interest.

In accounting for the issuance of the Notes, we separated the Notes into liability and equity components. The carrying amount of the liability component was calculated by measuring the fair value of a similar liability that does not have an associated convertible feature. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the par value of the Notes as a whole. The difference between the principal amount of the Notes and the liability component (the “debt discount”), is amortized to interest expense using the effective interest method over the term of the Notes. The equity component of the Notes was recorded in additional paid-in capital in our condensed consolidated balance sheets and is not remeasured as long as it continues to meet the conditions for equity classification.

In accounting for the transaction costs related to the issuance of the Notes, we allocated the total amount incurred to the liability and equity components using the same proportions as the proceeds from the Notes. Transaction costs attributable to the liability component were recorded in other assets in our condensed consolidated balance sheets and are being amortized to interest expense in our condensed consolidated statements of operations using the effective interest method over the term of the Notes. Transaction costs attributable to the equity component were netted with the equity component of the Notes in additional paid-in capital in our condensed consolidated balance sheets. We recorded liability issuance costs, or debt issuance costs, of \$12,497,000 and equity issuance costs of \$2,949,000.

During the fiscal quarter ended April 30, 2015, the last reported sale price of our common stock was greater than or equal to 130% of the conversion price of the Notes for at least 20 of the last 30 consecutive trading days of such quarter. As a result, holders may convert their Notes at any time during the fiscal quarter ending July 31, 2015. Accordingly, as of April 30, 2015, we reclassified the net carrying amount of the Notes and related debt issuance costs to current liabilities and current assets, respectively, in our condensed consolidated balance sheets. We also reclassified a portion of the equity component representing the conversion option to temporary equity in our condensed consolidated balance sheets. The amount reclassified to temporary equity was measured as the difference between the principal and net carrying amount of the Notes as of April 30, 2015.

- 11 -

Table of Contents

The following table sets forth the components of the Notes as of April 30, 2015 and July 31, 2014 (in thousands):

	April 30, 2015	July 31, 2014
Liability:		
Principal	\$575,000	\$575,000
Less: debt discount, net of amortization	93,040	108,125
Net carrying amount	\$481,960	\$466,875

The total estimated fair value of the Notes was \$836,987,000 and \$587,087,000 at April 30, 2015 and July 31, 2014, respectively. The fair value was determined based on the closing trading price per \$100 of the Notes as of the last day of trading for the period. We consider the fair value of the Notes at April 30, 2015 and July 31, 2014 to be a Level 2 measurement. The fair value of the Notes is primarily affected by the trading price of our common stock and market interest rates. As of April 30, 2015, the if-converted value of the Notes exceeded its principal amount by \$188,879,000.

The following table sets forth interest expense recognized related to the Notes for the three and nine months ended April 30, 2015 (dollars in thousands):

	Three Months Ended April 30, 2015	Nine Months Ended
Amortization of debt issuance costs	\$522	\$1,524
Amortization of debt discount	5,088	15,085
Total interest expense recognized	\$5,610	\$16,609

Effective interest rate of the liability component	4.8	% 4.8	%
--	-----	-------	---

Note Hedges

To minimize the impact of potential economic dilution upon conversion of the Notes, we entered into convertible note hedge transactions (the "Note Hedges") with respect to our common stock concurrent with the issuance of the Notes. The Note Hedges cover up to 5,214,000 shares of our common stock at a strike price per share that corresponds to the initial conversion price of the Notes, which are also subject to adjustment, and are exercisable upon conversion of the Notes. The Note Hedges will expire upon maturity of the Notes. The Note Hedges are separate transactions and are not part of the terms of the Notes. Holders of the Notes will not have any rights with respect to the Note Hedges. The shares receivable related to the Note Hedges are excluded from the calculation of diluted earnings per share as they are antidilutive.

We paid an aggregate amount of \$110,975,000 for the Note Hedges, which is included in additional paid-in capital in our condensed consolidated balance sheets.

Warrants

Separately, but concurrently with our issuance of the Notes, we entered into warrant transactions (the "Warrants") whereby we sold warrants to acquire up to 5,214,000 shares of our common stock at a strike price of approximately \$137.85 per share, subject to adjustments. The shares issuable under the Warrants will be included in the calculation of diluted earnings per share when the average market value per share of our common stock for the reporting period exceeds the strike price of the Warrants. The Warrants are separate transactions and are not part of the Notes or Notes Hedges, and are not remeasured through earnings each reporting period. Holders of the Notes and Note Hedges will not have any rights with respect to the Warrants.

We received aggregate proceeds of \$78,258,000 from the sale of the Warrants, which is included in additional paid-in capital in our condensed consolidated balance sheets.

7. Commitments and Contingencies**Leases**

We lease our facilities under various non-cancelable operating leases, which expire through the year ending July 31, 2023.

Table of Contents

The following table presents details of the aggregate future non-cancelable minimum rental payments under our operating leases as of April 30, 2015 (in thousands):

	Amount
Fiscal years ending July 31:	
Remaining 2015	\$4,344
2016	17,818
2017	16,467
2018	13,339
2019	11,056
2020 and thereafter	43,196
Committed gross lease payments	106,220
Less: proceeds from sublease rental	8,939
Net operating lease obligation	\$97,281
Contract Manufacturer Commitments	

Our independent contract manufacturer procures components and assembles our products based on our forecasts. These forecasts are based on estimates of demand for our products primarily for the next twelve months, which are in turn based on historical trends and an analysis from our sales and product marketing organizations, adjusted for overall market conditions. In order to reduce manufacturing lead times and plan for adequate supply, we may issue forecasts and orders for components and products that are non-cancelable. Obligations under contracts that we can cancel without a significant penalty are not included. As of April 30, 2015, we had \$41,772,000 of open orders.

Litigation

In December 2011, Juniper Networks, Inc. (“Juniper”) filed a complaint against us in the United States District Court for the District of Delaware alleging patent infringement, which sought preliminary and permanent injunctions against infringement, treble damages, and attorneys' fees. On September 30, 2013, we filed a lawsuit against Juniper in the United States District Court for the Northern District of California alleging that Juniper’s products infringe three of our U.S. patents, and sought monetary damages and a permanent injunction. On May 27, 2014, we entered into a Settlement, Release and Cross-License Agreement (the “settlement agreement”) with Juniper to resolve all pending litigation between the parties, including those discussed above. Refer to Note 8. Legal Settlement for more information on the settlement agreement.

In addition to the above matter, we are subject to legal proceedings, claims, and litigation arising in the ordinary course of business, including intellectual property litigation. Such matters are subject to many uncertainties and outcomes are not predictable with assurance. We accrue for contingencies when we believe that a loss is probable and that we can reasonably estimate the amount of any such loss.

To the extent there is a reasonable possibility that a loss exceeding amounts already recognized may be incurred and the amount of such additional loss would be material, we will either disclose the estimated additional loss or state that such an estimate cannot be made. As of April 30, 2015, we have not recorded any significant accruals for loss contingencies associated with such legal proceedings, determined that an unfavorable outcome is probable or reasonably possible, or determined that the amount or range of any possible loss is reasonably estimable.

8. Legal Settlement**Mutual Covenant Not to Sue and Release Agreement**

On January 27, 2014, we executed a Mutual Covenant Not to Sue and Release Agreement with Fortinet, Inc., thereby extending an existing covenant for six more years. We evaluated the transaction as a multiple-element arrangement and allocated the one-time payment that we made in the amount of \$20,000,000 to each identifiable element using its relative fair value. Based on our estimates of fair value, we determined that the primary benefit of the arrangement is avoided litigation cost and the release of any potential past claims, with no material value attributable to future use or benefit. Accordingly, we recorded a \$20,000,000 settlement charge within legal settlement expense in our condensed consolidated statement of operations during the three months ended January 31, 2014.

Table of Contents

Settlement, Release and Cross-License Agreement with Juniper

On May 27, 2014, we entered into the settlement agreement with Juniper, whereby we resolved all pending litigation matters. Under the terms of the settlement agreement, we agreed to pay Juniper a one-time settlement amount comprised of \$75,000,000 in cash, 1,081,000 shares of our common stock, and a warrant to purchase 463,000 shares of our common stock, in exchange for the following:

- Mutual dismissal with prejudice of all pending litigation between the parties and general release of all liability for Palo Alto Networks and Juniper,

- Cross-license between both parties for the patents-in-suit and associated family members and counterparts worldwide for the life of the patents, and

- Mutual covenant not to sue for infringement of any other patents for a period of eight years.

The fair value of the total consideration as of the settlement date was \$182,473,000, which was comprised of \$75,000,000 in cash, \$75,231,000 in common stock, and \$32,242,000 in warrant. The fair values of the common stock and warrant were measured using the closing price of our common stock on the settlement date.

The warrant was issued on June 3, 2014 and entitled Juniper to purchase up to 463,000 shares of common stock at an exercise price of \$0.0001 per share and was classified as a liability during the period it was outstanding. On July 1, 2014, Juniper exercised the warrant in full. Accordingly, we recorded the change in the fair value of the warrant liability through the exercise date of \$5,859,000 within other income (expense), net in our consolidated statement of operations during the three months ended July 31, 2014.

We accounted for the settlement agreement as a multiple-element arrangement and allocated the fair value of the consideration as of the settlement date to the identifiable elements based on their estimated fair values. Of the total settlement amount, \$61,300,000 was allocated to the licensing of intellectual property, \$54,300,000 was allocated to the mutual dismissal of claims, and the remaining amount was allocated to the mutual covenant not to sue. The mutual dismissal of claims and the mutual covenant not to sue have no identifiable future benefit, and as a result we recorded a settlement charge within legal settlement expense in our condensed consolidated statement of operations during the three months ended April 30, 2014. The licensing of intellectual property is being amortized to cost of product revenue in our condensed consolidated statements of operations over the estimated period of benefit of five years.

9. Equity Award Plans

Stock Option Activities

A summary of the activity under our stock plans during the reporting period and a summary of information related to options exercisable, vested, and expected to vest are presented below (in thousands, except per share amounts):

	Options Outstanding			Aggregate Intrinsic Value
	Number of Shares	Weighted-Average Exercise Price Per Share	Weighted-Average Remaining Contractual Term (Years)	
Balance—July 31, 2014	5,830	\$13.02	7.0	\$395,507
Options granted	—	—		
Options forfeited	(51)) 17.57		
Options exercised	(1,953)) 11.85		
Balance—April 30, 2015	3,826	\$13.56	6.4	\$513,296
Options vested and expected to vest—April 30, 2015	3,792	\$13.50	6.4	\$508,962
Options exercisable—April 30, 2015	2,748	\$11.67	6.2	\$373,865

Table of Contents

Restricted Stock Unit (RSU) Activities

A summary of the activity under our stock plans during the reporting period and a summary of information related to RSUs vested and expected to vest are presented below (in thousands, except per share amounts):

	RSUs Outstanding		Weighted-Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
	Number of Shares	Weighted-Average Grant-Date Fair Value Per Share		
Balance—July 31, 2014	6,046	\$59.84	1.4	\$488,880
RSUs granted	3,459	110.53		
RSUs vested	(1,885)) 56.59		
RSUs forfeited	(370)) 67.64		
Balance—April 30, 2015	7,250	\$84.47	1.3	\$1,070,970
RSUs vested and expected to vest—April 30, 2015	6,610	\$83.99	1.3	\$976,429

Share-Based Compensation

The following table summarizes share-based compensation included in costs and expenses (in thousands):

	Three Months Ended		Nine Months Ended	
	April 30, 2015		April 30, 2014	
Cost of product revenue	\$1,031	\$417	\$2,735	\$1,001
Cost of services revenue	5,587	2,739	14,222	6,310
Research and development	19,821	8,666	52,810	17,825
Sales and marketing	22,168	12,372	59,694	29,050
General and administrative	11,627	3,798	26,129	12,601
Total	\$60,234	\$27,992	\$155,590	\$66,787

At April 30, 2015, total compensation cost related to unvested share-based awards not yet recognized was \$510,411,000, net of estimated forfeitures. This cost is expected to be amortized on a straight-line basis over a weighted-average period of approximately three years.

10. Income Taxes

Our provision for income taxes for the three and nine months ended April 30, 2015 reflects an effective tax rate of negative 8.3% and negative 3.5%, respectively. Our effective tax rate for these periods were negative as we recorded a provision for income taxes on year to date losses. The key components of our income tax provision consist of foreign income, foreign withholding taxes, U.S. federal and state income taxes, and amortization of our deferred tax charge. Key components of our effective tax rate consist of foreign tax losses which derive no benefit, non-deductible share-based compensation, and changes in our valuation allowance. As compared to the same periods last year, our effective tax rate changed due to a shift in geographical mix of income and amortization of our deferred tax charge. Our provision for income taxes for the three and nine months ended April 30, 2014 reflects an effective tax rate of negative 0.9% and negative 2.7%, respectively. Our effective tax rates for these periods were negative due to the fact that we recorded a provision for income taxes on year to date losses. The key components of our income tax provision, and the related effective tax rate, consist of foreign tax losses which derive no benefit, non-deductible share-based compensation, and foreign withholding taxes.

In December 2014, the Tax Increase Prevention Act of 2014 was signed into law, which retroactively extends the federal research and development credit, bonus depreciation, and other corporate tax incentives through December 31, 2014. The benefit from income tax derived from this for the fiscal year ending July 31, 2015 is dependent on actual results for the year.

As of April 30, 2015, we had \$57,573,000 of unrecognized tax benefits, \$4,888,000 of which would affect income tax expense if recognized, after consideration of our valuation allowance in the U.S. and other assets. The increase in

unrecognized tax benefits since July 31, 2014 relates to positions taken in the current year. As of April 30, 2015, our federal, state, and foreign returns for the tax

- 15 -

Table of Contents

years 2008 through the current period remain open to examination. Fiscal years outside the normal statute of limitation remain open to audit by tax authorities due to tax attributes generated in earlier years, which have been carried forward and may be audited in subsequent years when utilized. We do not expect the unrecognized tax benefits to change significantly over the next 12 months. We recognize both interest and penalties associated with uncertain tax positions as a component of income tax expense. The ultimate amount and timing of any future cash settlements cannot be predicted with reasonable certainty.

11. Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) by basic weighted-average shares outstanding during the period. Diluted net income (loss) per share is computed by dividing net income (loss) by diluted weighted-average shares outstanding, including potentially dilutive securities.

The following table presents the computation of basic and diluted net loss per share of common stock (in thousands, except per share data):

	Three Months Ended		Nine Months Ended	
	April 30,		April 30,	
	2015	2014	2015	2014
Net loss	\$(45,935)	\$(146,587)	\$(119,011)	\$(194,394)
Weighted-average shares used to compute net loss per share, basic and diluted	82,320	74,967	80,828	73,127
Net loss per share, basic and diluted	\$(0.56)	\$(1.96)	\$(1.47)	\$(2.66)

The following securities were excluded from the computation of diluted net loss per share of common stock for the periods presented as their effect would have been antidilutive (in thousands):

	April 30,	
	2015	2014
Options to purchase common stock	3,826	6,596
RSUs	7,250	5,310
ESPP shares	28	41
Convertible senior notes	5,214	—
Warrants related to the issuance of convertible senior notes	5,214	—
Total	21,532	11,947

12. Subsequent Event

In May 2015, we completed our acquisition of CirroSecure, Inc., a privately-held cybersecurity company, in exchange for total consideration of approximately \$18,000,000. The acquisition expands the functionality of our enterprise security platform by providing additional security for SaaS applications. We are currently in the process of finalizing the accounting for this transaction and expect to complete our preliminary allocation of the purchase consideration to the assets acquired and liabilities assumed by the end of fiscal 2015.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our condensed consolidated financial statements and related notes appearing elsewhere in this Quarterly Report on Form 10-Q. The following discussion and analysis contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements include, among other things: expectations regarding drivers of and factors affecting growth in our business; statements regarding trends in billings, revenue, cost of revenue, gross margin, cash flows, operating expenses, including future share-based compensation expense, interest expense, income taxes, investments and liquidity; expectations regarding billings and revenue from Traps, our Advanced Endpoint Protection offering; expected recurring revenues resulting from expected growth in our installed base; the sufficiency of our existing cash and investments to meet our cash needs for the foreseeable future; and other statements regarding our future operations, financial condition and prospects, and business strategies. Forward-looking statements generally can be identified by words such as "anticipates," "believes," "could," "estimates," "expects," "intends," "may," "plans," "predicts," "projects," "would," "will be," "will continue," "will likely result," and similar expressions. These forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties, which could cause our actual results to differ materially from those reflected in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in this Quarterly Report on Form 10-Q, and in particular, the risks discussed under the caption "Risk Factors" in Part II, Item 1A of this report and those discussed in other documents we file with the Securities and Exchange Commission. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

Our Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is organized as follows:

- **Overview.** A discussion of our business and overall analysis of financial and other highlights in order to provide context for the remainder of MD&A.
- **Key Financial Metrics.** An analysis of our generally accepted accounting principles (GAAP) and non-GAAP key financial metrics, which management monitors to evaluate our performance.
- **Financial Overview.** A discussion of the nature and trends of components of our financial results.
- **Results of Operations.** An analysis of our financial results comparing the three and nine months ended April 30, 2015 to the three and nine months ended April 30, 2014.
- **Liquidity and Capital Resources.** An analysis of changes in our balance sheets and cash flows, and discussion of our financial condition and our ability to meet cash needs.
- **Contractual Obligations and Commitments.** An overview of our contractual obligations, contingent liabilities, commitments, and off-balance sheet arrangements outstanding as of April 30, 2015, including expected payment schedule.
- **Critical Accounting Policies and Estimates.** A discussion of accounting policies that require critical estimates, assumptions, and judgments.
 - **Recent Accounting Pronouncements.** A discussion of expected impacts of impending accounting changes on financial information to be reported in the future.
- **Available Information.** A discussion of sources of additional information available to investors.

Overview

We have pioneered the next-generation of enterprise security with our innovative platform that allows enterprises, service providers, and government entities to simultaneously empower and secure their organizations by safely enabling the increasingly complex and rapidly growing number of applications running on their networks and by preventing breaches stemming from targeted cyber attacks. Our enterprise security platform consists of three major elements: our Next-Generation Firewall, our Advanced Endpoint Protection, and our Threat Intelligence Cloud. Our Next-Generation Firewall delivers application, user, and content visibility and control as well as protection against network-based cyber threats integrated within the firewall through our proprietary hardware and software architecture.

Our Advanced Endpoint Protection prevents cyber attacks that aim to exploit software vulnerabilities on a broad variety of fixed and virtual endpoints. Our Threat Intelligence Cloud provides central intelligence capabilities as well as automated delivery of preventative measures against cyber attacks. The cloud-based element of our platform is delivered in the form of a service that can be used either in the public cloud or in a private cloud using a dedicated appliance.

- 17 -

Table of Contents

We derive revenue from sales of our products and services, which together comprise our platform. Product revenue is generated from sales of our Next-Generation Firewall, which is available in hardware and virtualized form factors. Our Next-Generation Firewall incorporates our proprietary PAN-OS operating system, which provides a consistent set of capabilities across our entire product line. These capabilities include: application visibility and control (App-ID), user identification (User-ID), site-to-site virtual private network (VPN), remote access Secure Sockets Layer (SSL) VPN, and Quality-of-Service (QoS). Our products are designed for different performance requirements throughout an organization, ranging from the PA-200, which is designed for enterprise remote offices, to the PA-7050, which is designed for data centers and high-speed networks. The same firewall functionality that is delivered in our hardware appliances is also available in our VM-Series virtual firewalls, which secure virtualized and cloud-based computing environments. Multiple firewalls can jointly use our WildFire appliance, WF-500, which identifies, analyzes, and blocks known and unknown malware in a private cloud-based environment. Our platform can be centrally managed in both virtualized and hardware appliances across an organization with our Panorama product. In addition, our GlobalProtect appliance, GP-100, provides mobile device management, malware detection, and shares device state information to safely enable mobile devices for business use.

Services revenue is generated from sales of subscriptions and support and maintenance, which together provide us with a source of recurring services revenue. Our Threat Prevention, URL Filtering, GlobalProtect, and WildFire subscriptions provide our end-customers with real-time access to the latest antivirus, intrusion prevention, web filtering, and modern malware prevention capabilities across fixed and mobile devices. Our Advanced Endpoint Protection subscription protects against cyber attacks that exploit software vulnerabilities in Windows-based fixed and virtual endpoints through the use of its unique capability of stopping the underlying exploit techniques, and can prevent cyber attacks without relying on prior knowledge of the attack.

When end-customers purchase an appliance, they typically purchase one or more of our subscriptions for additional functionality, as well as support and maintenance in order to receive ongoing security updates, upgrades, bug fixes, and repairs. We leverage our appliances to sell software as a service (SaaS) subscription services to meet our customers' evolving enterprise security requirements. Our hybrid SaaS revenue model consists of product, subscriptions, and support and maintenance, which we believe will enable us to benefit from recurring revenues as we continue to grow our installed end-customer base.

We maintain a field sales force that works closely with our channel partners in developing sales opportunities. We use a two-tier, indirect fulfillment model whereby we sell our products and services to our global distributor channel partners, which, in turn, sell our products and services to our reseller network, which then sell to our end-customers. Our channel partners purchase our products and services at a discount to our list prices before reselling them to our end-customers. Our channel partners generally receive an order from an end-customer prior to placing an order with us and generally do not stock appliances.

We continue to invest in innovation and strengthening our product portfolio and in September 2014, announced the availability of Traps, our Advanced Endpoint Protection offering designed to prevent sophisticated cyber attacks on endpoints. We anticipate billings (non-GAAP) from Traps will continue to ramp through the end of fiscal 2015 with a more meaningful revenue contribution in fiscal 2016.

As of April 30, 2015, we had sold to more than 24,000 end-customers in over 140 countries. Our end-customers represent a broad range of industries including education, energy, financial services, government entities, healthcare, Internet and media, manufacturing, public sector, and telecommunications, and include some of the largest Fortune 100 and Global 2000 companies in the world. Also, during the nine months ended April 30, 2015, our headcount increased by 595 to 2,317 employees.

For the third quarter of fiscal 2015 and 2014, revenues were \$234.2 million and \$150.7 million, respectively, representing year over year growth of 55.4%. All three components of our hybrid SaaS revenue model experienced year over year growth, led by revenue from subscription services, which grew 71.3% to \$54.8 million, followed by support and maintenance services, which grew 67.3% to \$57.8 million, and product, which grew 44.5% to \$121.5 million. Revenue growth reflected rapid adoption of our Next-Generation Firewall and related support and maintenance, as well as increasing momentum in our subscription services business. We believe the growth was also driven by increased security spending by customers, as security continues to be a critical business imperative for every

business in the world.

We believe that the growth of our business and our short-term and long-term success are dependent upon many factors, including our ability to extend our technology leadership, grow our base of end-customers, expand deployment of our platform and services within existing end-customers, extend the length of service terms within existing end-customers, and focus on end-customer satisfaction. While these areas present significant opportunities for us, they also pose challenges and risks that we must successfully address in order to sustain the growth of our business and improve our operating results.

To manage any future growth effectively, we must continue to improve and expand our information technology and financial infrastructure, our operating and administrative systems and controls, and our ability to manage headcount, capital, and processes in an efficient manner. Additionally, we face intense competition in our market, and to succeed, we need to innovate and offer products that are differentiated from existing infrastructure products, as well as effectively hire, retain, train, and motivate qualified personnel and senior management. If we are unable to successfully address these challenges, our business, operating results, and prospects could be adversely affected.

- 18 -

Table of Contents

Key Financial Metrics

We monitor the key financial metrics set forth below to help us evaluate growth trends, establish budgets, measure the effectiveness of our sales and marketing efforts, and assess operational efficiencies. We discuss revenue, gross margin, and the components of operating loss and margin below under “—Financial Overview” and “—Results of Operations.” The following tables summarize deferred revenue, cash flow provided by operating activities, free cash flow (non-GAAP), and billings (non-GAAP).

	April 30, 2015 (in thousands)		July 31, 2014	
Total deferred revenue	\$603,890		\$422,578	
Cash, cash equivalents, and investments	\$1,231,438		\$974,382	
	Three Months Ended April 30, 2015		Nine Months Ended April 30, 2015	
	2014		2014	
	(dollars in thousands)			
Total revenue	\$234,172	\$150,700	\$644,173	\$419,948
Year over year percentage increase	55.4	% 48.8	% 53.4	% 48.0
Gross margin percentage	72.5	% 73.6	% 72.5	% 73.6
Operating loss	\$(36,724)) \$(145,732)) \$(99,003)) \$(189,899)
Operating margin percentage	(15.7))% (96.7))% (15.4))% (45.2)
Billings (non-GAAP)	\$302,219	\$193,890	\$825,485	\$538,499
Cash flow provided by operating activities			\$238,979	\$114,556
Free cash flow (non-GAAP)			\$217,117	\$83,177

Deferred Revenue. Our deferred revenue consists of amounts that have been invoiced, but that have not yet been recognized as revenue as of the period end. The majority of our deferred revenue balance consists of subscription and support and maintenance revenue that is recognized ratably over the contractual service period. We monitor our deferred revenue balance because it represents a significant portion of revenue to be recognized in future periods.

Cash Flow Provided by Operating Activities. We monitor cash flow provided by operating activities as a measure of our overall business performance. Our cash flow provided by operating activities is driven in large part by sales of our products and from up-front payments for both subscriptions and support and maintenance services. Monitoring cash flow provided by operating activities enables us to analyze our financial performance without the non-cash effects of certain items such as depreciation, amortization, and share-based compensation costs, thereby allowing us to better understand and manage the cash needs of our business.

Free Cash Flow (non-GAAP). We define free cash flow, a non-GAAP financial measure, as cash provided by operating activities less purchases of property, equipment, and other assets. We consider free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by the business that, after the purchases of property, equipment, and other assets, can be used for strategic opportunities, including investing in our business, making strategic acquisitions, and strengthening the balance sheet. A limitation of the utility of free cash flow as a measure of our financial performance and liquidity is that it does not represent the total increase or decrease in our cash balance for the period. In addition, it is important to note that other companies, including companies in our industry, may not use free cash flow, may calculate free cash flow in a different manner than we do, or may use other financial measures to evaluate their performance, all of which could reduce the usefulness of free cash flow as a comparative measure. A reconciliation of free cash flow to cash flow provided by operating activities, the most directly comparable financial measure calculated and presented in accordance with GAAP, is provided below:

Table of Contents

	Nine Months Ended April 30,	
	2015	2014
	(in thousands)	
Free cash flow (non-GAAP):		
Cash flow provided by operating activities	\$238,979	\$114,556
Less: purchases of property, equipment, and other assets	21,862	31,379
Free cash flow (non-GAAP)	\$217,117	\$83,177
Net cash used in investing activities	\$(480,535) \$(229,306
Net cash provided by financing activities	\$41,867	\$38,926

Billings (non-GAAP). We define billings, a non-GAAP financial measure, as total revenue plus the change in deferred revenue, net of acquired deferred revenue, during the period. Billings is a key measure used by our management to manage our business because billings drive deferred revenue, which is an important indicator of the health and visibility of our business. We consider billings to be a useful metric for management and investors, particularly as we experience increased sales of subscriptions and strong renewal rates for subscriptions and support and maintenance services, and monitor our near term cash flows. We believe that billings provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management. However, it is important to note that other companies, including companies in our industry, may not use billings, may calculate billings differently, may have different billing frequencies, or may use other financial measures to evaluate their performance, all of which could reduce the usefulness of billings as a comparative measure. A reconciliation of billings to revenue, the most directly comparable financial measure calculated and presented in accordance with GAAP, is provided below:

	Three Months Ended April 30,		Nine Months Ended April 30,	
	2015	2014	2015	2014
	(in thousands)			
Billings (non-GAAP):				
Total revenue	\$234,172	\$150,700	\$644,173	\$419,948
Add: change in total deferred revenue, net of acquired deferred revenue	68,047	43,190	181,312	118,551
Billings (non-GAAP)	\$302,219	\$193,890	\$825,485	\$538,499

Financial Overview

Revenue

We derive revenue from sales of our products and services. Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectability is reasonably assured. Our total revenue is comprised of the following:

Product Revenue. The substantial majority of our product revenue is derived from sales of our appliances. Product revenue also includes revenue derived from software licenses of Panorama, GlobalProtect, and the VM-Series. We recognize product revenue at the time of shipment, provided that all other revenue recognition criteria have been met. As a percentage of total revenue, we expect our product revenue to vary from quarter to quarter based on seasonal and cyclical factors.

Services Revenue. Services revenue is derived primarily from Threat Prevention, URL Filtering, WildFire, and GlobalProtect subscriptions and support and maintenance. In addition, in September 2014, we released Traps, our Advanced Endpoint Protection subscription. Our contractual subscription and support and maintenance terms are typically one year, with three to five year terms available. We recognize revenue from subscriptions and support and maintenance over the contractual service period. As a percentage of total revenue, we expect our services revenue to vary from quarter to quarter and increase over the long term as we introduce new subscriptions, renew existing services contracts, and expand our installed end-customer base.

Table of Contents

Cost of Revenue

Our cost of revenue consists of cost of product revenue and cost of services revenue. Our cost of revenue includes costs paid to our third-party contract manufacturer and personnel costs, which consist of salaries, bonuses, and share-based compensation associated with our operations and global customer support organizations. Our cost of revenue also includes allocated costs, which consist of certain facilities, depreciation, benefits, recruiting, and information technology costs that we allocate based on headcount, as well as amortization of intellectual property licenses and intangible assets.

Cost of Product Revenue. Cost of product revenue primarily includes costs paid to our third-party contract manufacturer. Our cost of product revenue also includes amortization of intellectual property licenses, product testing costs, allocated costs, warranty costs, shipping costs, and personnel costs associated with logistics and quality control. We expect our cost of product revenue to increase as our product revenue increases.

Cost of Services Revenue. Cost of services revenue includes personnel costs for our global customer support organization, amortization of acquired intangible assets, allocated costs, and URL filtering database service fees. We expect our cost of services revenue to increase as our installed end-customer base grows.

Gross Margin

Gross margin, or gross profit as a percentage of revenue, has been and will continue to be affected by a variety of factors, including the average sales price of our products, manufacturing costs, the mix of products sold, and the mix of revenue between products and services. For sales of our products, our higher throughput firewall products generally have higher gross margins than our lower throughput firewall products within each product series. For sales of our services, our subscriptions typically have higher gross margins than our support and maintenance. We expect our gross margins to fluctuate over time depending on the factors described above.

Operating Expenses

Our operating expenses consist of research and development, sales and marketing, general and administrative, and legal settlement expense. Personnel costs are the most significant component of operating expenses and consist of salaries, benefits, bonuses, share-based compensation, and with regard to sales and marketing expense, sales commissions. We expect operating expenses to increase in absolute dollars, and decrease over the long term as a percentage of revenue as we continue to scale our business. As of April 30, 2015, we expect to recognize approximately \$510.4 million of share-based compensation expense over a weighted-average period of approximately three years, excluding additional share-based compensation expense related to any future grants of share-based awards. Share-based compensation expense, net of forfeitures, is recognized on a straight-line basis over the requisite service periods of the awards.

Research and Development. Research and development expense consists primarily of personnel costs. Research and development expense also includes prototype related expenses and allocated costs. We expect research and development expense to increase in absolute dollars as we continue to invest in our future products and services, although our research and development expense may fluctuate as a percentage of total revenue.

Sales and Marketing. Sales and marketing expense consists primarily of personnel costs, including commission costs. We expense commission costs as incurred. Sales and marketing expense also includes costs for market development programs, promotional and other marketing costs, travel costs, professional services, and allocated costs. We continue to increase the size of our sales force and have also substantially grown our sales presence internationally. We expect sales and marketing expense to continue to increase in absolute dollars as we increase the size of our sales and marketing organizations to increase touch points with end-customers and to expand our international presence, although our sales and marketing expense may fluctuate as a percentage of total revenue.

General and Administrative. General and administrative expense consists of personnel costs, professional services, and certain non-recurring general expenses. General and administrative personnel include our executive, finance, human resources, legal, and IT organizations. Professional services consist primarily of legal, auditing, accounting, and other consulting costs. We expect general and administrative expense to increase in absolute dollars due to additional costs associated with accounting, compliance, insurance, and investor relations, although our general and administrative expense may fluctuate as a percentage of total revenue.

Legal Settlement. Legal settlement expense consists of charges related to the Settlement, Release and Cross-License Agreement (the “Settlement Agreement”) with Juniper Networks, Inc. (“Juniper”) and the Mutual Covenant Not to Sue and Release Agreement with Fortinet, Inc. (“Fortinet”). Refer to the discussion under Note 8. Legal Settlement of Notes to Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q for information related to these matters.

Table of Contents

Interest Expense

Interest expense consists of the amortization of the debt discount and debt issuance costs related to our 0.0% Convertible Senior Notes due 2019 (the "Notes"). This interest expense is non-cash and will range from \$22.3 million to \$25.7 million per year through fiscal 2019.

Other Income (Expense), Net

Other income (expense), net includes interest income earned on our cash, cash equivalents, and investments, foreign currency re-measurement gains and losses, and foreign currency transaction gains and losses.

Provision for Income Taxes

Provision for income taxes consists primarily of income taxes in foreign jurisdictions in which we conduct business, withholding taxes, federal and state income taxes in the United States, and amortization of our deferred tax charge. We maintain a full valuation allowance for domestic deferred tax assets, including net operating loss carryforwards and tax credits.

During the second quarter of fiscal 2015, we recorded a deferred tax charge of \$36.7 million. The current portion of the deferred tax charge is included in prepaid expenses and other current assets and the remainder in other assets in our condensed consolidated balance sheets. The deferred tax charge is being amortized on a straight-line basis over approximately six years as a component of provision for income taxes.

Results of Operations

The following tables summarize our results of operations for the periods presented and as a percentage of our total revenue for those periods. The period to period comparison of results is not necessarily indicative of results for future periods.

Total revenue	\$234,172	\$150,700	\$83,472	55.4	%	\$644,173	\$419,948	\$224,225	53.4	%
Revenue by geographic theater:										
Americas	\$157,725	\$98,689	\$59,036	59.8	%	\$436,660	\$275,724	\$160,936	58.4	%
EMEA	45,852	32,326	13,526	41.8	%	129,156	89,299	39,857	44.6	%
APAC	30,595	19,685	10,910	55.4	%	78,357	54,925	23,432	42.7	%
Total revenue	\$234,172	\$150,700	\$83,472	55.4	%	\$644,173	\$419,948	\$224,225	53.4	%

Product revenue increased \$37.4 million, or 44.5%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014. Product revenue increased \$98.2 million, or 40.8%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014. The increases in both periods were driven by increased demand, including broader adoption of our PA-7050 firewall. The impact of changes in pricing on our product revenue was insignificant.

Services revenue increased \$46.1 million, or 69.2%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014. Services revenue increased \$126.0 million, or 70.2%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014. The increases in both periods were due to increased sales to new and existing end-customers. The relative increases in subscription revenue and support and maintenance revenue will fluctuate over time, depending on the mix of services revenue and the introduction of new subscription offerings. The impact of changes in pricing on our services revenue was insignificant.

With respect to geographic theaters, the Americas contributed the largest portion of the increase in revenue for the three and nine months ended April 30, 2015 compared to the three and nine months ended April 30, 2014 due to its larger and more established sales force compared to our other theaters. Revenue from both EMEA and APAC increased for the three and nine months ended April 30, 2015 compared to the three and nine months ended April 30, 2014 due to our investment in increasing the size of our sales force and number of channel partners in these theaters.

Table of Contents

Cost of Revenue and Gross Margin

	Three Months Ended April 30,				Nine Months Ended April 30,			
	2015		2014		2015		2014	
	Amount	Gross Margin	Amount	Gross Margin	Amount	Gross Margin	Amount	Gross Margin
(dollars in thousands)								
Cost of revenue:								
Product	\$32,851		\$20,425		\$92,632		\$58,600	
Services	31,544		19,285		84,549		52,421	
Total cost of revenue	\$64,395		\$39,710		\$177,181		\$111,021	
Includes share-based compensation of:								
Product	\$1,031		\$417		\$2,735		\$1,001	
Services	5,587		2,739		14,222		6,310	
Total share-based compensation included in cost of revenue	\$6,618		\$3,156		\$16,957		\$7,311	
Gross profit:								
Product	\$88,673	73.0 %	\$63,703	75.7 %	\$245,989	72.6 %	\$181,836	75.6 %
Services	81,104	72.0 %	47,287	71.0 %	221,003	72.3 %	127,091	70.8 %
Total gross profit	\$169,777	72.5 %	\$110,990	73.6 %	\$466,992	72.5 %	\$308,927	73.6 %

Product cost increased \$12.4 million, or 60.8%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014 due to an increase in product unit volume, as well as amortization of intellectual property licenses of \$3.1 million.

Product cost increased \$34.0 million, or 58.1%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014 due to an increase in product unit volume, as well as amortization of intellectual property licenses of \$9.2 million.

Services cost increased \$12.3 million, or 63.6%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014 due to increases in personnel costs of \$6.3 million related to increasing our headcount, third party professional services costs of \$1.7 million to expand our customer service capabilities to support our growing installed end-customer base, allocated costs of \$1.6 million, and amortization of acquired intangible assets of \$1.1 million.

Services cost increased \$32.1 million, or 61.3%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014 due to increases in personnel costs of \$17.2 million related to increasing our headcount, amortization of acquired intangible assets of \$3.9 million, allocated costs of \$3.7 million, and third party professional services costs of \$3.1 million to expand our customer service capabilities to support our growing installed end-customer base.

Gross margin decreased 110 basis points for the three months ended April 30, 2015 compared to the three months ended April 30, 2014. The decrease of 270 basis points in product margin was due to amortization of intellectual property licenses. The increase of 100 basis points in services margin was due to contributions from our higher margin subscription services, partially offset by a 70 basis points decrease due to amortization of purchased intangible assets.

Gross margin decreased 110 basis points for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014. The decrease of 300 basis points in product margin was due to amortization of intellectual property licenses. The increase of 150 basis points in services margin was due to contributions from our higher margin subscription services, partially offset by a 120 basis points decrease due to amortization of purchased intangible assets.

Total operating expenses	\$206,501	\$256,722	\$(50,221)	(19.6)	%	\$565,995	\$498,826	\$67,169	13.5	%
Includes share-based compensation of:										
Research and development	\$19,821	\$8,666	\$11,155	128.7	%	\$52,810	\$17,825	\$34,985	196.3	%
Sales and marketing	22,168	12,372	9,796	79.2	%	59,694	29,050	30,644	105.5	%
General and administrative	11,627	3,798	7,829	206.1	%	26,129	12,601	13,528	107.4	%
Total share-based compensation included in operating expenses	\$53,616	\$24,836	\$28,780	115.9	%	\$138,633	\$59,476	\$79,157	133.1	%

Research and development expense increased \$20.6 million, or 74.2%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014, due to an increase in personnel costs of \$17.7 million, largely due to an increase in headcount, and an increase in allocated costs of \$2.1 million.

Research and development expense increased \$60.8 million, or 84.4%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014, due to an increase in personnel costs of \$53.7 million, largely due to an increase in headcount, and an increase in allocated costs of \$4.7 million.

Sales and marketing expense increased \$47.0 million, or 56.0%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014, due to an increase in personnel costs of \$34.9 million, largely due to an increase in headcount, an increase in allocated costs of \$4.6 million, an increase in demand generation activities, trade shows, and other marketing activities of \$2.7 million, and an increase in travel and entertainment costs of \$2.2 million. Sales and marketing expense increased \$132.2 million, or 57.9%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014, due to an increase in personnel costs of \$93.9 million, largely due to an increase in headcount, an increase in allocated costs of \$10.9 million, an increase in demand generation activities, trade shows, and other marketing activities of \$10.6 million, and an increase in travel and entertainment costs of \$7.4 million.

General and administrative expense increased \$3.3 million, or 13.8%, for the three months ended April 30, 2015 compared to the three months ended April 30, 2014, due to an increase in personnel costs of \$9.8 million, largely due to an increase in headcount. The increase was partially offset by a decrease in professional services costs due to the recognition of expenses related to the intellectual property litigation with Juniper of \$4.7 million and expenses related to our acquisition of Cyvera Ltd. ("Cyvera") of \$3.6 million in the three months ended April 30, 2014.

General and administrative expense increased \$15.4 million, or 26.8%, for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014, due to an increase in personnel costs of \$20.0 million, largely due to an increase in headcount. The increase was partially offset by a decrease in professional services costs due to the

recognition of expenses related to the intellectual property litigation with Juniper of \$9.3 million and expenses related to our acquisitions of Cyvera and Morta Security, Inc. ("Morta") of \$4.0 million in the nine months ended April 30, 2014.

Legal settlement expense decreased \$121.2 million for the three months ended April 30, 2015 compared to the three months ended April 30, 2014 due to the recognition of an expense of \$121.2 million for the Settlement Agreement with Juniper in the three months ended April 30, 2014.

- 26 -

Table of Contents

Legal settlement expense decreased \$141.2 million for the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014 due to the recognition of an expense of \$121.2 million for the Settlement Agreement with Juniper and \$20.0 million for the Mutual Covenant Not to Sue and Release Agreement with Fortinet in the nine months ended April 30, 2014.

Interest Expense

	Three Months Ended April 30,				Nine Months Ended April 30,			
	2015 Amount	2014 Amount	Change Amount	%	2015 Amount	2014 Amount	Change Amount	%
Interest expense	\$5,631	\$13	\$5,618	NM	\$16,659	\$35	\$16,624	NM

Interest expense increased \$5.6 million and \$16.6 million for the three and nine months ended April 30, 2015 compared to the three and nine months ended April 30, 2014, respectively, due to the amortization of the debt discount and debt issuance costs related to the Notes. This interest expense is non-cash and will range from \$22.3 million to \$25.7 million per year through fiscal 2019.

Provision for Income Taxes

	Three Months Ended April 30,		Nine Months Ended April 30,	
	2015	2014	2015	2014
Provision for income taxes	\$3,525	\$1,272	\$3,979	\$5,125
Effective tax rate	(8.3)%	(0.9)%

We recorded an income tax provision for the three and nine months ended April 30, 2015 due to federal, state, and foreign income taxes, foreign withholding taxes, and amortization of our deferred tax charge. The provision for income taxes changed for the three and nine months ended April 30, 2015 compared to the three and nine months ended April 30, 2014 due to a shift in geographical mix of income and amortization of our deferred tax charge.

Liquidity and Capital Resources

	April 30, 2015 (in thousands)	July 31, 2014
Working capital	\$96,502	\$610,155
Cash, cash equivalents, and investments:		
Cash and cash equivalents	\$454,123	\$653,812
Investments	777,315	320,570
Total cash, cash equivalents, and investments	\$1,231,438	\$974,382

At April 30, 2015, our cash, cash equivalents, and investments of \$1.2 billion were held for general corporate purposes, of which approximately \$208.0 million was held outside the United States. Our current plans do not include repatriating these funds. However, if these funds were needed for our domestic operations, we would be required to accrue and pay U.S. taxes on undistributed earnings of foreign subsidiaries. There are no other restrictions on the use of these funds. We do not provide for federal income taxes on the undistributed earnings of our foreign subsidiaries, all of which we expect to reinvest outside of the United States indefinitely. If we were to repatriate these earnings to the United States, any associated income tax liability would be insignificant.

In June 2014, we issued the Notes with an aggregate principal amount of \$575.0 million. The Notes will mature on July 1, 2019. Prior to January 1, 2019, holders may surrender their Notes for early conversion under certain circumstances. Upon conversion of the Notes, we will pay cash up to the aggregate principal amount of the Notes to be converted and we may choose to pay or deliver, as the case may be, cash, shares of our common stock or a combination of cash and shares of our common stock with respect to the remainder of our conversion obligation in excess of the aggregate principal amount of the Notes being converted.

Table of Contents

During the fiscal quarter ended April 30, 2015, the last reported sale price of our common stock was greater than or equal to 130% of the conversion price of the Notes for at least 20 of the last 30 consecutive trading days of such quarter. As a result, holders may convert their Notes at any time during the fiscal quarter ending July 31, 2015. Accordingly, as of April 30, 2015, we reclassified the net carrying amount of the Notes and related debt issuance costs to current liabilities and current assets, respectively, in our condensed consolidated balance sheets. Refer to Note 6. Convertible Senior Notes of Notes to Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for information on the Notes.

The following table summarizes our cash flows for the nine months ended April 30, 2015 and 2014.

	Nine Months Ended April 30,	
	2015	2014
	(in thousands)	
Cash provided by operating activities	\$238,979	\$114,556
Cash used in investing activities	(480,535) (229,306
Cash provided by financing activities	41,867	38,926
Net decrease in cash and cash equivalents	\$(199,689) \$(75,824

We believe that our cash flow from operations with existing cash and cash equivalents will be sufficient to meet our anticipated cash needs for the foreseeable future. Our future capital requirements will depend on many factors including our growth rate, the timing and extent of spending to support development efforts, the expansion of sales and marketing activities, the introduction of new and enhanced products and services offerings, the costs to acquire or invest in complementary businesses and technologies, the costs to ensure access to adequate manufacturing capacity, and the continuing market acceptance of our products. In addition, from time to time we may incur additional tax liability in connection with certain tax structuring decisions.

We may also choose to seek additional equity or debt financing. In the event that additional financing is required from outside sources, we may not be able to raise it on terms acceptable to us or at all. If we are unable to raise additional capital when desired, our business, operating results, and financial condition may be adversely affected.

Operating Activities

Our operating activities have consisted of net loss adjusted for certain non-cash items and changes in assets and liabilities.

Cash provided by operating activities during the nine months ended April 30, 2015 was \$239.0 million, an increase of \$124.4 million compared to the nine months ended April 30, 2014. The increase was due to growth of our business and changes in our assets and liabilities during the nine months ended April 30, 2015. In addition, during the second quarter of fiscal 2014, we made a payment of \$20.0 million for the Mutual Covenant Not to Sue and Release Agreement with Fortinet.

Changes in assets and liabilities during the nine months ended April 30, 2015 compared to the nine months ended April 30, 2014 include an increase in sales of subscriptions and support and maintenance contracts to new and existing customers as reflected by an increase in deferred revenue. In addition, during the second quarter of fiscal 2015, we made a tax payment of \$12.8 million in connection with an intercompany transfer of intellectual property.

Investing Activities

Our investing activities have consisted of capital expenditures and net investment purchases, sales, and maturities. We expect to continue such activities as our business grows.

Cash used in investing activities during the nine months ended April 30, 2015 was \$480.5 million, an increase of \$251.2 million as compared to the nine months ended April 30, 2014. The increase was due to higher net purchases of available-for-sale investments during the nine months ended April 30, 2015, partially offset by payments related to our acquisitions during the nine months ended April 30, 2014.

Financing Activities

Our financing activities have consisted of proceeds from sales of shares through employee equity incentive plans.

Cash provided by financing activities during the nine months ended April 30, 2015 was \$41.9 million, an increase of \$2.9 million as compared to the nine months ended April 30, 2014. The increase was due to higher proceeds from the sale of shares through employee equity incentive plans during the nine months ended April 30, 2015.

Table of Contents

Contractual Obligations and Commitments

The following summarizes our contractual obligations and commitments as of April 30, 2015:

	Payments Due by Period				
	Total	Less Than 1 Year (in thousands)	1 - 3 Years	3- 5 Years	More Than 5 Years
0.0% Convertible Senior Notes due 2019 (1)	\$575,000	\$—	\$—	\$575,000	\$—
Operating lease obligations (2) (3)	106,220	17,760	31,520	21,867	35,073
Purchase obligations (4)	41,772	41,772	—	—	—
Total (5)	\$722,992	\$59,532	\$31,520	\$596,867	\$35,073

As of April 30, 2015, holders may convert their Notes at any time during the fiscal quarter ending July 31, 2015.

(1) Refer to Note 6. Convertible Senior Notes of Notes to Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for more information.

(2) Consists of contractual obligations from our non-cancelable operating leases.

(3) Excludes proceeds from contractual sublease of \$8.9 million, which consists of \$3.0 million to be received in less than one year and \$5.9 million to be received in one to three years.

(4) Consists of minimum purchase commitments of products and components with our independent contract manufacturer and original design manufacturers. Obligations under contracts that we can cancel without a significant penalty are not included in the table above.

(5) No amounts related to Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 740-10, Income Taxes, are included. As of April 30, 2015, we had approximately \$37.4 million of tax liabilities recorded related to uncertainty in income tax positions.

Off-Balance Sheet Arrangements

Through April 30, 2015, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities, that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses, and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. We evaluate our estimates and assumptions on an ongoing basis. Actual results may differ from these estimates. To the extent that there are material differences between these estimates and our actual results, our future financial statements will be affected.

We believe the critical accounting policies and estimates discussed under Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K filed with the Securities and Exchange Commission (SEC) on September 18, 2014, reflect our more significant judgments and estimates used in the preparation of the condensed consolidated financial statements. See “Available Information” below for instructions on how to access our Annual Report on Form 10-K. There have been no significant changes to our critical accounting policies and estimates as filed in such report.

Recent Accounting Pronouncements

Refer to “Recent Accounting Pronouncements” in Note 1. Description of Business and Summary of Significant Accounting Policies of Notes to Condensed Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

Available Information

Our website is located at www.paloaltonetworks.com, and our investor relations website is located at <http://investors.paloaltonetworks.com>. Copies of Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are available, free of charge, on our investor relations website as soon as reasonably practicable after we file such material electronically with or furnish it to the SEC. The SEC also maintains a website that contains our SEC filings. The address of the site is www.sec.gov. Further, a copy of this Quarterly Report on Form 10-Q is located at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Information on the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

Webcasts of our earnings calls and certain events we participate in or host with members of the investment community are on our investor relations website. Additionally, we announce investor information, including news and commentary about our business and financial performance, SEC filings, notices of investor events, and our press and earnings releases, on our investor relations website. Investors and others can receive notifications of new information posted on our investor relations website in real time by signing up for email alerts and RSS feeds. Further corporate governance information, including our certificate of incorporation, bylaws, corporate governance guidelines, board committee charters, and code of conduct, is also available on our investor relations website under the heading "Corporate Governance." The contents of our websites are not incorporated by reference into this Quarterly Report on Form 10-Q or in any other report or document we file with the SEC, and any references to our websites are intended to be inactive textual references only.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposures to market risk have not changed materially since July 31, 2014. For our quantitative and qualitative disclosures about market risk, see the disclosures in Part II, Item 7A in our Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 18, 2014.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on our evaluation, our chief executive officer and chief financial officer concluded that, as of April 30, 2015, our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) and 15d-15(d) of the Exchange Act that occurred during the quarter ended April 30, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II

ITEM 1. LEGAL PROCEEDINGS

The information set forth under the “Litigation” subheading in Note 7. Commitments and Contingencies of Notes to Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q is incorporated herein by reference.

ITEM 1A. RISK FACTORS

Our operations and financial results are subject to various risks and uncertainties including those described below. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of, or that we currently believe are not material, also may become important factors that affect us. If any of the following risks or others not specified below materialize, our business, financial condition, and results of operations could be materially adversely affected. In that case, the market price of our common stock could decline.

Risks Related to Our Business and Our Industry

Our business and operations have experienced rapid growth in recent periods, and if we do not effectively manage any future growth or are unable to improve our systems, processes, and controls, our operating results will be adversely affected.

We have experienced rapid growth and increased demand for our products over the last few years. Our employee headcount and number of end-customers have increased significantly, and we expect to continue to grow our headcount significantly over the next year. For example, from the end of the second quarter of fiscal 2015 to the end of the third quarter of fiscal 2015, our headcount increased from 2,083 to 2,317 employees, and our number of end-customers increased from more than 22,500 to over 24,000. The growth and expansion of our business and product and service offerings places a continuous significant strain on our management, operational, and financial resources. As we have grown, we have increasingly managed more complex deployments of our products and services with larger end-customers. To manage any future growth effectively, we must continue to improve and expand our information technology and financial infrastructure, our operating and administrative systems, and our ability to manage headcount, capital, and processes in an efficient manner.

We may not be able to successfully scale improvements to our enterprise resource planning system or implement or scale improvements to our other systems, processes, and controls in an efficient or timely manner or in a manner that does not negatively affect our operating results. In addition, our existing systems, processes, and controls may not prevent or detect all errors, omissions, or fraud. We have licensed technology from third parties to help us accomplish this objective. We may experience difficulties in managing improvements to our systems, processes, and controls or in connection with third-party software, which could disrupt existing customer relationships, cause us to lose customers, limit us to smaller deployments of our products, or increase our technical support costs. Our failure to improve our systems, processes, and controls, or their failure to operate in the intended manner, may result in our inability to manage the growth of our business and to accurately forecast our revenue, expenses, and earnings, or to prevent certain losses. For example, we are implementing certain new enterprise management systems and any failure to implement these systems may disrupt our operations and our operating expenses could increase. Additionally, our productivity and the quality of our products and services may be adversely affected if we do not integrate and train our new employees quickly and effectively, including employees we acquired in connection with our acquisitions of Cyvera Ltd. (“Cyvera”) and CirroSecure, Inc. (“CirroSecure”). Any future growth would add complexity to our organization and require effective coordination throughout our organization. Failure to manage any future growth effectively could result in increased costs, negatively impact our end-customers’ satisfaction with our products and services, and harm our operating results.

Our operating results are likely to vary significantly from period to period and be unpredictable, which could cause the market price of our common stock to decline.

Our operating results, in particular, our revenues, gross margins, operating margins, and operating expenses, have historically varied from period to period, and we expect that this trend will continue as a result of a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to attract and retain new end-customers;
- the budgeting cycles and purchasing practices of end-customers;

- changes in end-customer, distributor or reseller requirements, or market needs;
- changes in the growth rate of the enterprise security market;

- 31 -

Table of Contents

the timing and success of new product and service introductions by us or our competitors or any other change in the competitive landscape of our industry, including consolidation among our competitors or end-customers;

changes in mix of our products and services including increases in multi-year subscriptions and support and maintenance;

price competition;

deferral of orders from end-customers in anticipation of new products or product enhancements announced by us or our competitors;

our ability to successfully expand our business domestically and internationally;

the timing and costs related to the development or acquisition of technologies or businesses;

lack of synergy, or the inability to realize expected synergies, resulting from recent acquisitions;

our inability to complete or integrate efficiently any acquisitions that we have completed, or that we may undertake;

our ability to increase the size of our distribution channel;

decisions by potential end-customers to purchase enterprise security solutions from larger, more established security vendors or from their primary network equipment vendors;

changes in end-customer attach rates and renewal rates for our services;

- timing of revenue recognition and revenue deferrals;

our ability to manage production and manufacturing related costs, global customer service organization costs, inventory excess and obsolescence costs, and warranty costs;

insolvency or credit difficulties confronting our customers, which could adversely affect their ability to purchase or pay for our products and services, or confronting our key suppliers, including our sole source suppliers, which could disrupt our supply chain;

any disruption in our channel or termination of our relationship with important channel partners, including as a result of consolidation among distributors and resellers of enterprise security solutions;

our inability to fulfill our end-customers' orders due to supply chain delays or events that impact our manufacturers or their suppliers;

increased expenses, unforeseen liabilities, or write-downs and any impact on our results of operations from any acquisition consummated;

the cost and potential outcomes of litigation, which could have a material adverse effect on our business;

seasonality or cyclical fluctuations in our markets;

future accounting pronouncements or changes in our accounting policies, including the potential impact of the adoption and implementation of the Financial Accounting Standards Board's (FASB) new standard regarding revenue recognition;

the impact on our overall effective tax rate caused by any reorganization in our corporate structure or any changes in our valuation allowance for domestic deferred assets;

increases or decreases in our expenses caused by fluctuations in foreign currency exchange rates, as an increasing amount of our expenses is incurred and paid in currencies other than the U.S. dollar;

political, economic and social instability, including continued hostilities in the Middle East, terrorist activities, and any disruption these events may cause to broader global industrial economy; and

general macroeconomic conditions, both domestically and in our foreign markets.

Any one of the factors above, or the cumulative effect of some of the factors referred to above, may result in significant fluctuations in our financial and other operating results. This variability and unpredictability could result in our failure to meet our revenue, margin, or other operating result expectations or those of securities analysts or investors for a particular period. If we fail to meet or exceed such expectations for these or any other reasons, the market price of our common stock could fall substantially, and we could face costly lawsuits, including securities class action suits.

Our revenue growth rate in recent periods may not be indicative of our future performance.

We have recently experienced revenue growth rates of 53% and 48% in the nine months ended April 30, 2015 and nine months ended April 30, 2014, respectively. You should not rely on our revenue for any prior quarterly or annual

periods as any indication of

- 32 -

Table of Contents

our future revenue or revenue growth. If we are unable to maintain consistent revenue or revenue growth, the market price of our common stock could be volatile, and it may be difficult to achieve and maintain profitability.

We have a history of losses, anticipate increasing our operating expenses in the future, and may not be able to achieve or maintain profitability or maintain or increase cash flow on a consistent basis. If we cannot achieve or maintain profitability or maintain or increase our cash flow, our business, financial condition, and operating results may suffer. Other than fiscal 2012, we have incurred losses in all fiscal years since our inception. We incurred a net loss of \$119.0 million in the first three quarters of fiscal 2015, \$226.5 million in fiscal 2014, and \$29.2 million in fiscal 2013. As a result, we had an accumulated deficit of \$454.7 million at April 30, 2015. We anticipate that our operating expenses will increase substantially in the foreseeable future as we continue to enhance our product and service offerings, broaden our installed end-customer base, expand our sales channels, expand our operations, hire additional employees, and continue to develop our technology. These efforts may prove more expensive than we currently anticipate, and we may not succeed in increasing our revenues sufficiently, or at all, to offset these higher expenses. Revenue growth may slow or revenue may decline for a number of possible reasons, including slowing demand for our products or services, increasing competition, a decrease in the growth of our overall market, or a failure to capitalize on growth opportunities. Any failure to increase our revenues as we grow our business could prevent us from achieving or maintaining profitability or maintaining or increasing cash flow on a consistent basis. If we are unable to meet these risks and challenges as we encounter them, our business, financial condition, and operating results may suffer.

Our limited operating history makes it difficult to evaluate our current business and future prospects, and may increase the risk of your investment.

We were founded in 2005 and shipped our first products in 2007. The majority of our revenue growth has occurred since 2009. Our limited operating history makes it difficult to evaluate our current business and our future prospects, including our ability to plan for and model future growth. We have encountered and will continue to encounter risks and difficulties frequently experienced by rapidly growing companies in constantly evolving industries, including the risks described in this Quarterly Report on Form 10-Q. If we do not address these risks successfully, our business and operating results will be adversely affected, and the market price of our common stock could decline. Further, we have limited historical financial data and we operate in a rapidly evolving market. As such, any predictions about our future revenue and expenses may not be as accurate as they would be if we had a longer operating history or operated in a more predictable market.

If we are unable to sell additional products and services to our end-customers or maintain or increase our installed end-customer base, our future revenue and operating results will be harmed.

Our future success depends, in part, on our ability to expand the deployment of our platform with existing end-customers by selling additional products, to secure other areas of our end-customers' network and endpoints, and by upselling additional subscription services to provide increasing levels of enterprise security. This may require increasingly sophisticated and costly sales efforts and may not result in additional sales. In addition, the rate at which our end-customers purchase additional products and services depends on a number of factors, including the perceived need for additional enterprise security products and services as well as general economic conditions. If our efforts to sell additional products and services to our end-customers are not successful, our business may suffer.

Further, existing end-customers that purchase our subscriptions have no contractual obligation to renew their contracts after the completion of their initial contract period, which is typically one year, and we cannot accurately predict renewal rates. Our end-customers' renewal rates may decline or fluctuate as a result of a number of factors, including their satisfaction with our services and our end-customer support, the frequency and severity of subscription outages, our product uptime or latency, and the pricing of our, or competing, services. If our end-customers renew their subscriptions, they may renew for shorter contract lengths or on other terms that are less economically beneficial to us. We have limited historical data with respect to rates of end-customer renewals, so we may not accurately predict future renewal trends. We cannot assure you that our end-customers will renew their subscriptions, and if our end-customers do not renew their agreements or renew on less favorable terms, our revenues may grow more slowly than expected or decline.

We also depend on our installed end-customer base for future support and maintenance revenues. Our support and maintenance agreements are typically one year. If end-customers choose not to continue renewing their support and maintenance or seek to renegotiate the terms of support and maintenance agreements prior to renewing such agreements, our revenue may decline.

We face intense competition in our market, especially from larger, well-established companies, and we may lack sufficient financial or other resources to maintain or improve our competitive position.

The market for enterprise security products is intensely competitive, and we expect competition to increase in the future from established competitors and new market entrants. Our main competitors fall into four categories:

- 33 -

Table of Contents

• large networking vendors such as Cisco Systems, Inc. (“Cisco”) and Juniper Networks, Inc. (“Juniper”) that incorporate enterprise security features in their products;

• large companies such as Intel Corporation (“Intel”), International Business Machines (“IBM”), and Hewlett-Packard Company (“HP”) that have acquired large network and endpoint security specialist vendors in recent years and have the technical and financial resources to bring competitive solutions to the market;

• independent security vendors such as Check Point Software Technologies Ltd. (“Check Point”), Fortinet, Inc. (“Fortinet”), and FireEye, Inc. (“FireEye”) that offer network security products, and Symantec Corporation (“Symantec”), that offers endpoint security products; and

• small and large companies that offer point solutions that compete with some of the features present in our platform. Many of our existing competitors have, and some of our potential competitors could have, substantial competitive advantages such as:

- greater name recognition and longer operating histories;
- larger sales and marketing budgets and resources;
- broader distribution and established relationships with distribution partners and end-customers;
- greater customer support resources;
- greater resources to make acquisitions;
- lower labor and development costs;
- larger and more mature intellectual property portfolios; and
- substantially greater financial, technical, and other resources.

In addition, some of our larger competitors have substantially broader and more diverse product offerings and leverage their relationships based on other products or incorporate functionality into existing products to gain business in a manner that discourages users from purchasing our products, including through selling at zero or negative margins, product bundling, or closed technology platforms. Potential end-customers may also prefer to purchase from their existing suppliers rather than a new supplier regardless of product performance or features. These larger competitors often have broader product lines and market focus and may therefore not be as susceptible to downturns in a particular market. Many of our smaller competitors that specialize in providing protection from a single type of enterprise security threat are often able to deliver these specialized enterprise security products to the market more quickly than we can. Conditions in our market could change rapidly and significantly as a result of technological advancements, partnering by our competitors, or continuing market consolidation. New start-up companies that innovate and large competitors that are making significant investments in research and development may invent similar or superior products and technologies that compete with our products and technology. Our current and potential competitors may also establish cooperative relationships among themselves or with third parties that may further enhance their resources.

Some of our competitors have made acquisitions of businesses that may allow them to offer more directly competitive and comprehensive solutions than they had previously offered, such as Intel’s acquisition of McAfee, Inc. and Stonesoft Oyj, Cisco’s acquisition of SourceFire, Inc., and FireEye’s acquisitions of Mandiant Corporation and nPulse Technologies, Inc. As a result of such acquisitions, our current or potential competitors might be able to adapt more quickly to new technologies and end-customer needs, devote greater resources to the promotion or sale of their products and services, initiate or withstand substantial price competition, take advantage of acquisitions or other opportunities more readily, or develop and expand their product and service offerings more quickly than we do. Due to various reasons, organizations may be more willing to incrementally add solutions to their existing enterprise security infrastructure from competitors than to replace it with our solutions. These competitive pressures in our market or our failure to compete effectively may result in price reductions, fewer orders, reduced revenue and gross margins, and loss of market share. Any failure to meet and address these factors could seriously harm our business and operating results.

If functionality similar to that offered by our products is incorporated into existing network infrastructure products, organizations may decide against adding our appliances to their network, which would have an adverse effect on our business.

Large, well-established providers of networking equipment such as Cisco and Juniper offer, and may continue to introduce, enterprise security features that compete with our products, either in stand-alone security products or as additional features in their network infrastructure products. The inclusion of, or the announcement of an intent to include, functionality perceived to be similar to that offered by our security solutions in networking products that are already generally accepted as necessary components of network architecture may have an adverse effect on our ability to market and sell our products. Furthermore, even if the functionality offered by network infrastructure providers is more limited than our products, a significant number of end-customers may elect to accept such limited functionality in lieu of adding appliances from an additional vendor such as us. Many organizations have invested substantial personnel and financial resources to design and operate their networks and have established deep relationships with other providers of

- 34 -

Table of Contents

networking products, which may make them reluctant to add new components to their networks, particularly from other vendors such as us. In addition, an organization's existing vendors or new vendors with a broad product offering may be able to offer concessions that we are not able to match because we currently offer only enterprise security products and have fewer resources than many of our competitors. If organizations are reluctant to add additional network infrastructure from new vendors or otherwise decide to work with their existing vendors, our ability to increase our market share and improve our financial condition and operating results will be adversely affected. Reliance on shipments at the end of the quarter could cause our revenue for the applicable period to fall below expected levels.

As a result of end-customer buying patterns and the efforts of our sales force and channel partners to meet or exceed their sales objectives, we have historically received a substantial portion of sales orders and generated a substantial portion of revenue during the last few weeks of each fiscal quarter. If expected revenue at the end of any fiscal quarter is delayed for any reason, including the failure of anticipated purchase orders to materialize, our logistics partners' inability to ship products prior to fiscal quarter-end to fulfill purchase orders received near the end of the fiscal quarter, our failure to manage inventory to meet demand, our inability to release new products on schedule, any failure of our systems related to order review and processing, or any delays in shipments based on trade compliance requirements, our revenue for that quarter could fall below our expectations and the estimates of analysts, which could adversely impact our business and results of operations and cause a decline in the market price of our common stock. If we are unable to hire, retain, train, and motivate qualified personnel and senior management, our business could suffer.

Our future success depends, in part, on our ability to continue to attract and retain highly skilled personnel. The loss of the services of any of our key personnel, the inability to attract or retain qualified personnel, or delays in hiring required personnel, particularly in engineering and sales, may seriously harm our business, financial condition, and operating results. Although we have entered into employment offer letters with our key personnel, these agreements have no specific duration and constitute at-will employment. We are also substantially dependent on the continued service of our existing development personnel because of the complexity of our platform. Additionally, any failure to hire, train, and adequately incentivize our sales personnel could negatively impact our growth. Further, the inability of our recently hired sales personnel to effectively ramp to target productivity levels could negatively impact our operating margins. If we are not effective in managing any leadership transition in our sales organization, our business could be adversely impacted and our operating results and financial condition could be harmed.

Competition for highly skilled personnel is often intense, especially in the San Francisco Bay Area, where we have a substantial presence and need for highly skilled personnel. Additionally, the industry in which we operate generally experiences high employee attrition. We may not be successful in attracting, integrating, or retaining qualified personnel to fulfill our current or future needs. Also, to the extent we hire personnel from competitors, we may be subject to allegations that they have been improperly solicited, that they have divulged proprietary or other confidential information, or that their former employers own their inventions or other work product.

Our future performance also depends on the continued services and continuing contributions of our senior management to execute on our business plan and to identify and pursue new opportunities and product innovations. The loss of services of senior management could significantly delay or prevent the achievement of our development and strategic objectives, which could adversely affect our business, financial condition, and operating results.

Our employees do not have employment arrangements that require them to continue to work for us for any specified period, and therefore, they could terminate their employment with us at any time. We do not maintain key person life insurance policies on any of our employees. The loss of one or more of our key employees could seriously harm our business.

We rely on third-party channel partners to sell substantially all of our products, and if our partners fail to perform, our ability to sell and distribute our products and services will be limited, and our operating results will be harmed. Substantially all of our revenue is generated by sales through our channel partners, including distributors and resellers. We provide our sales channel partners with specific training and programs to assist them in selling our products, but there can be no assurance that these steps will be effective. In addition, our channel partners may be unsuccessful in marketing, selling, and supporting our products and services. If we are unable to develop and maintain effective sales

incentive programs for our third-party channel partners, we may not be able to incentivize these partners to sell our products to end-customers and, in particular, to large enterprises. These partners may also market, sell, and support products and services that are competitive with ours and may devote more resources to the marketing, sales, and support of such competitive products. These partners may have incentives to promote our competitors' products to the detriment of our own or may cease selling our products altogether. Our agreements with our channel partners may generally be terminated for any reason by either party with advance notice prior to each annual renewal date. We cannot assure you that we will retain these channel partners or that we will be able to secure additional or replacement channel partners. The loss of one or more of our significant channel partners or a decline in the number or size of orders from them could harm our operating results. In addition, any new sales channel partner requires extensive training and may take several months or more to achieve productivity. Our channel partner sales structure could subject us to lawsuits, potential liability, and reputational harm if, for example, any of our channel partners misrepresent the functionality of our products or services to end-customers or violate laws or our corporate policies.

- 35 -

Table of Contents

If we fail to effectively manage our existing sales channels, if our channel partners are unsuccessful in fulfilling the orders for our products, or if we are unable to enter into arrangements with, and retain a sufficient number of, high quality channel partners in each of the regions in which we sell products and keep them motivated to sell our products, our ability to sell our products and operating results will be harmed.

Because we depend on third-party manufacturers to build and ship our products, we are susceptible to manufacturing and logistics delays and pricing fluctuations that could prevent us from shipping customer orders on time, if at all, or on a cost-effective basis, which may result in the loss of sales and customers.

We depend on third-party manufacturers, primarily Flextronics International Ltd. (“Flextronics”), our contract manufacturer, as sole source manufacturers for our product lines. Our reliance on these third-party manufacturers reduces our control over the manufacturing process and exposes us to risks, including reduced control over quality assurance, product costs, and product supply and timing, as well as the risk that minerals which originate from the Democratic Republic of the Congo and adjoining countries, or conflict minerals, may be included in our products. In addition, while the majority of our products are manufactured by our contract manufacturers at facilities located in the United States, any growth or expansion of such manufacturing at facilities in foreign countries may subject us to additional risks associated with complying with local rules and regulations. Any manufacturing and logistics disruption by these third-party manufacturers could severely impair our ability to fulfill orders. In addition, we are subject to requirements under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 that require us to diligence, disclose, and report whether or not our products contain conflict minerals. Under these rules, we are required to obtain sourcing data from suppliers, perform supply chain due diligence, and file annually with the SEC a specialized disclosure report on Form SD covering the prior calendar year. These requirements could adversely affect the sourcing, availability, and pricing of minerals used in the manufacture of semiconductor devices or other components used in our products. We may also encounter customers who require that all of the components of our products be certified as conflict free. If we are not able to meet this requirement, such customers may choose not to purchase our products, which could adversely impact sales of our products. In addition, we have incurred and expect to incur additional costs to comply with these disclosure requirements, including costs related to determining the source of any of the relevant minerals and metals used in our products.

Our third-party manufacturers typically fulfill our supply requirements on the basis of individual orders. We do not have long term contracts with these manufacturers that guarantee capacity, the continuation of particular pricing terms, or the extension of credit limits. Accordingly, they are not obligated to continue to fulfill our supply requirements, which could result in supply shortages, and the prices we are charged for manufacturing services could be increased on short notice. Our contract with Flextronics permits them to terminate the agreement for their convenience, subject to prior notice requirements. If we are required to change contract manufacturers, our ability to meet our scheduled product deliveries to our customers could be adversely affected, which could cause the loss of sales to existing or potential customers, delayed revenue or an increase in our costs which could adversely affect our gross margins. Any production interruptions for any reason, such as a natural disaster, epidemic, capacity shortages, or quality problems, at one of our manufacturing partners would negatively affect sales of our product lines manufactured by that manufacturing partner and adversely affect our business and operating results.

Managing the supply of our products and product components is complex. Insufficient supply and inventory may result in lost sales opportunities or delayed revenue, while excess inventory may harm our gross margins.

Our third-party manufacturers procure components and build our products based on our forecasts, and we generally do not hold inventory for a prolonged period of time. These forecasts are based on estimates of future demand for our products, which are in turn based on historical trends and analyses from our sales and marketing organizations, adjusted for overall market conditions. In order to reduce manufacturing lead times and plan for adequate component supply, from time to time we may issue forecasts for components and products that are non-cancelable and non-returnable.

Our inventory management systems and related supply chain visibility tools may be inadequate to enable us to forecast accurately and effectively manage supply of our products and product components. Supply management remains an increased area of focus as we balance the need to maintain supply levels that are sufficient to ensure competitive lead times against the risk of obsolescence because of rapidly changing technology and end-customer

requirements. If we ultimately determine that we have excess supply, we may have to reduce our prices and write-down inventory, which in turn could result in lower gross margins. If our actual component usage and product demand are lower than the forecast we provide to our third-party manufacturers, we accrue for losses on manufacturing commitments in excess of forecasted demand. Alternatively, insufficient supply levels may lead to shortages that result in delayed revenue or loss of sales opportunities altogether as potential end-customers turn to competitors' products that are readily available. Additionally, any increases in the time required to manufacture our products or ship products could result in supply shortfalls. If we are unable to effectively manage our supply and inventory, our operating results could be adversely affected.

- 36 -

Table of Contents

Because some of the key components in our products come from limited sources of supply, we are susceptible to supply shortages or supply changes, which could disrupt or delay our scheduled product deliveries to our customers and may result in the loss of sales and customers.

Our products rely on key components, including integrated circuit components, which our contract manufacturers purchase on our behalf from a limited number of suppliers, including sole source providers. The manufacturing operations of some of our component suppliers are geographically concentrated in Asia and elsewhere, which makes our supply chain vulnerable to regional disruptions. A fire, flood, earthquake, tsunami or other disaster, condition or event such as political instability, civil unrest or a power outage that adversely affects any of these component suppliers' facilities could significantly affect our ability to obtain the necessary components for our products, which could result in a substantial loss of sales and revenue and a substantial harm to our operating results. Similarly, a localized health risk affecting employees at these facilities, such as the spread of a pandemic influenza, could impair the volume of components that we are able to obtain, which could result in substantial harm to our operating results. We do not have volume purchase contracts with any of our component suppliers, and they could cease selling to us at any time. In addition, our component suppliers change their selling prices frequently in response to market trends, including industry-wide increases in demand, and because we do not have volume purchase contracts with these suppliers, we are susceptible to price fluctuations related to raw materials and components. If we are unable to pass component price increases along to our customers or maintain stable pricing, our gross margins and operating results could be negatively impacted. If we are unable to obtain a sufficient quantity of these components in a timely manner for any reason, sales of our products could be delayed or halted or we could be forced to expedite shipment of such components or our products at dramatically increased costs, which would negatively impact our revenue and gross margins. Additionally, poor quality in any of the sole-sourced components in our products could result in lost sales or lost sales opportunities. If the quality of the components does not meet our or our end-customers' requirements, if we are unable to obtain components from our existing suppliers on commercially reasonable terms, or if any of our sole source providers cease to remain in business or continue to manufacture such components, we could be forced to redesign our products and qualify new components from alternate suppliers. The resulting stoppage or delay in selling our products and the expense of redesigning our products could result in lost sales opportunities and damage to customer relationships, which would adversely affect our business and operating results.

If we are not successful in executing our strategy to increase sales of our products to new and existing medium and large enterprise end-customers, our operating results may suffer.

Our growth strategy is dependent, in part, upon increasing sales of our products to medium and large enterprises. Sales to these types of end-customers involve risks that may not be present (or that are present to a lesser extent) with sales to smaller entities. These risks include:

- competition from larger competitors, such as Cisco, Check Point, and Juniper, that traditionally target larger enterprises, service providers, and government entities and that may have pre-existing relationships or purchase commitments from those end-customers;
- increased purchasing power and leverage held by large end-customers in negotiating contractual arrangements with us;
- more stringent requirements in our worldwide support service contracts, including stricter support response times and penalties for any failure to meet support requirements; and
- longer sales cycles and the associated risk that substantial time and resources may be spent on a potential end-customer that elects not to purchase our products and services.

Large enterprises often undertake a significant evaluation process that results in a lengthy sales cycle, in some cases over 12 months. Although we have a channel sales model, our sales representatives typically engage in direct interaction with our distributors and resellers in connection with sales to larger end-customers. Because these evaluations are often lengthy, with significant size and scope and stringent requirements, we typically provide evaluation products to these end-customers. We may spend substantial time, effort, and money in our sales efforts without being successful in generating any sales. In addition, product purchases by large enterprises are frequently subject to budget constraints, multiple approvals, and unplanned administrative, processing, and other delays. Finally, large enterprises typically have longer implementation cycles, require greater product functionality and scalability and

a broader range of services, demand that vendors take on a larger share of risks, sometimes require acceptance provisions that can lead to a delay in revenue recognition, and expect greater payment flexibility from vendors. All of these factors can add further risk to business conducted with these end-customers. If we fail to realize an expected sale from a large end-customer in a particular quarter or at all, our business, operating results, and financial condition could be materially and adversely affected.

- 37 -

Table of Contents

We rely on revenue from subscription and support services, which may decline, and because we recognize revenue from subscriptions and support services over the term of the relevant service period, downturns or upturns in sales of these subscription and support services are not immediately reflected in full in our operating results.

Services revenue accounts for a significant portion of our revenue, comprising 47% of total revenue in the nine months ended April 30, 2015 and 43% of total revenue in the nine months ended April 30, 2014. Sales of new or renewal subscription and support and maintenance contracts may decline and fluctuate as a result of a number of factors, including end-customers' level of satisfaction with our products and services, the prices of our products and services, the prices of products and services offered by our competitors, and reductions in our end-customers' spending levels. If our sales of new or renewal subscription and support and maintenance contracts decline, our revenue and revenue growth may decline and our business will suffer. In addition, we recognize subscription and support and maintenance revenue monthly over the term of the relevant service period, which is typically one year and can be up to five years. As a result, much of the subscription and support and maintenance revenue we report each fiscal quarter is the recognition of deferred revenue from subscription and support and maintenance contracts entered into during previous fiscal quarters. Consequently, a decline in new or renewed subscription or support and maintenance contracts in any one fiscal quarter will not be fully or immediately reflected in revenue in that fiscal quarter but will negatively affect our revenue in future fiscal quarters. Accordingly, the effect of significant downturns in new or renewed sales of our subscriptions or support and maintenance is not reflected in full in our operating results until future periods. Also, it is difficult for us to rapidly increase our services revenue through additional service sales in any period, as revenue from new and renewal service contracts must be recognized over the applicable service period. Furthermore, any increase in the average term of services contracts would result in revenue for services contracts being recognized over longer periods of time.

Defects, errors, or vulnerabilities in our products or services or the failure of our products or services to block a virus or prevent a security breach could harm our reputation and adversely impact our results of operations.

Because our products and services are complex, they have contained and may contain design or manufacturing defects or errors that are not detected until after their commercial release and deployment by our end-customers. For example, from time to time, certain of our end-customers have reported defects in our products related to performance, scalability, and compatibility that were not detected before shipping the product. Additionally, defects may cause our products or services to be vulnerable to security attacks, cause them to fail to help secure networks, or temporarily interrupt end-customers' networking traffic. Because the techniques used by computer hackers to access or sabotage networks change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques and provide a solution in time to protect our end-customers' networks. Furthermore, as a well-known provider of enterprise security solutions, our networks, products, and services could be targeted by attacks specifically designed to disrupt our business and harm our reputation. In addition, defects or errors in our subscription updates or our products could result in a failure of our services to effectively update end-customers' hardware products and thereby leave our end-customers vulnerable to attacks. Our data centers and networks may experience technical failures and downtime, may fail to distribute appropriate updates, or may fail to meet the increased requirements of a growing installed end-customer base, any of which could temporarily or permanently expose our end-customers' networks, leaving their networks unprotected against the latest security threats.

Any defects, errors, or vulnerabilities in our products, whether real or perceived, could result in:

- expenditure of significant financial and product development resources in efforts to analyze, correct, eliminate, or work-around errors or defects or to address and eliminate vulnerabilities;
- loss of existing or potential end-customers or channel partners;
- delayed or lost revenue;
- delay or failure to attain market acceptance;
- an increase in warranty claims compared with our historical experience, or an increased cost of servicing warranty claims, either of which would adversely affect our gross margins; and
- litigation, regulatory inquiries, or investigations that may be costly and harm our reputation.

Our business is subject to the risks of warranty claims, product returns, product liability, and product defects.

Our products are very complex and, despite testing prior to their release, they have contained and may contain undetected defects or errors, especially when first introduced or when new versions are released. Product defects or errors could affect the performance of our products and could delay the development or release of new products or new versions of products, adversely affect our reputation and our end-customers' willingness to buy products from us, and adversely affect market acceptance or perception of our products. Any such errors or delays in releasing new products or new versions of products or allegations of unsatisfactory performance could cause us to lose revenue or market share, increase our service costs, cause us to incur substantial costs in redesigning the products, cause us to lose significant end-customers, subject us to liability for damages, and divert our resources from other tasks, any one of which could materially and adversely affect our business, results of operations, and financial condition. Our products must successfully interoperate with products from other vendors. As a result, when problems occur in a network, it may be

Table of Contents

difficult to identify the sources of these problems. For example, from time to time, certain of our end-customers have experienced temporary delays or interoperability issues when implementing our products in large complex global deployments where our products are required to interoperate with a complex environment of third party products. The occurrence of hardware or software errors, whether or not caused by our products, could delay or reduce market acceptance of our products, and have an adverse effect on our business and financial performance, and any necessary revisions may cause us to incur significant expenses. The occurrence of any such problems could harm our business, financial condition, and results of operations.

The limitation of liability provisions in our standard terms and conditions of sale may not fully or effectively protect us from claims as a result of federal, state, or local laws or ordinances, or unfavorable judicial decisions in the United States or other countries. The sale and support of our products also entails the risk of product liability claims. Although we may be indemnified by our third-party manufacturers for product liability claims arising out of manufacturing defects, because we control the design of our products, we may not be indemnified for product liability claims arising out of design defects. We maintain insurance to protect against certain claims associated with the use of our products, but our insurance coverage may not adequately cover any claim asserted against us. In addition, even claims that ultimately are unsuccessful could result in our expenditure of funds in litigation, divert management's time and other resources, and harm our reputation.

If the enterprise security market does not continue to adopt our enterprise security platform, our sales will not grow as quickly as anticipated, and the market price of our common stock could decline.

We are seeking to disrupt the enterprise security market with our enterprise security platform. However, organizations that use legacy products and services for their enterprise security needs may believe that these products and services sufficiently achieve their purpose. Organizations may also believe that our products and services only serve the needs of a portion of the enterprise security market. Accordingly, organizations may continue allocating their information technology (IT) budgets for legacy products and services and may not adopt our enterprise security platform. If the market for enterprise security solutions does not continue to adopt our enterprise security platform, if end-customers do not recognize the value of our platform compared to legacy products and services, or if we are otherwise unable to sell our products and services to organizations, then our revenue may not grow or may decline, which would have a material adverse effect on our operating results and financial condition.

If we do not accurately predict, prepare for, and respond promptly to the rapidly evolving technological and market developments and changing end-customer needs in the enterprise security market, our competitive position and prospects will be harmed.

The enterprise security market is expected to continue to evolve rapidly. Moreover, many of our end-customers operate in markets characterized by rapidly changing technologies and business plans, which require them to add numerous network access points and adapt increasingly complex enterprise networks, incorporating a variety of hardware, software applications, operating systems, and networking protocols. The technology in our products is especially complex because it needs to effectively identify and respond to new and increasingly sophisticated methods of attack, while minimizing the impact on network performance. Additionally, some of our new products and enhancements may require us to develop new hardware architectures that involve complex, expensive, and time-consuming research and development processes. Although the market expects rapid introduction of new products or product enhancements to respond to new threats, the development of these products is difficult and the timetable for commercial release and availability is uncertain as there can be long time periods between releases and availability of new products. We may experience unanticipated delays in the availability of new products and services and fail to meet customer expectations for such availability. If we do not quickly respond to the rapidly changing and rigorous needs of our end-customers by developing, releasing, and making available on a timely basis new products and services or enhancements that can respond adequately to new security threats, our competitive position and business prospects will be harmed.

Additionally, the process of developing new technology is complex and uncertain, and if we fail to accurately predict end-customers' changing needs and emerging technological trends in the enterprise security industry, including the areas of mobility, virtualization, cloud computing, and software defined networks (SDN), our business could be harmed. We must commit significant resources to developing new products before knowing whether our investments

will result in products the market will accept. For example, in September 2014, we released Traps, our Advanced Endpoint Protection offering, which protects against cyber attacks that aim to exploit software vulnerabilities on a broad variety of fixed and virtual endpoints; however, there is no assurance that this new offering will gain market acceptance. The success of new products depends on several factors, including appropriate new product definition, component costs, timely completion and introduction of these products, differentiation of new products from those of our competitors, and market acceptance of these products. There can be no assurance that we will successfully identify new product opportunities, develop and bring new products to market in a timely manner, or achieve market acceptance of our products, or that products and technologies developed by others will not render our products or technologies obsolete or noncompetitive.

To remain competitive, we must successfully manage product introductions and transitions.

Due to the highly volatile and competitive nature of the industries in which we compete, we must continually introduce new products, services and technologies, and enhance existing products and services. The success of new product introductions depends on a number of factors including, but not limited to, timely and successful product development, market acceptance, our ability to

Table of Contents

manage the risks associated with new product production ramp-up issues, the availability of application software for new products, the effective management of purchase commitments and inventory in line with anticipated product demand, the availability of products in appropriate quantities and costs to meet anticipated demand, and the risk that new products may have quality or other defects or deficiencies in the early stages of introduction. Accordingly, we cannot determine in advance the ultimate effect of new product introductions and transitions on our business and results of operations.

Our current research and development efforts may not produce successful products or features that result in significant revenue, cost savings or other benefits in the near future, if at all.

Developing our products and related enhancements is expensive. Our investments in research and development may not result in significant design improvements, marketable products or features, or may result in products that are more expensive than anticipated. Additionally, we may not achieve the cost savings or the anticipated performance improvements we expect, and we may take longer to generate revenue, or generate less revenue, than we anticipate. Our future plans include significant investments in research and development and related product opportunities. We believe that we must continue to dedicate a significant amount of resources to our research and development efforts to maintain our competitive position. However, we may not receive significant revenue from these investments in the near future, if at all, or these investments may not yield the expected benefits, either of which could adversely affect our business and operating results.

The sales prices of our products and services may decrease, which may reduce our gross profits and adversely impact our financial results.

The sales prices for our products and services may decline for a variety of reasons, including competitive pricing pressures, discounts, a change in our mix of products and services, anticipation of the introduction of new products or services, or promotional programs. Competition continues to increase in the market segments in which we participate, and we expect competition to further increase in the future, thereby leading to increased pricing pressures. Larger competitors with more diverse product and service offerings may reduce the price of products or services that compete with ours or may bundle them with other products and services. Additionally, although we price our products and services worldwide in U.S. dollars, currency fluctuations in certain countries and regions may negatively impact actual prices that partners and end-customers are willing to pay in those countries and regions. Furthermore, we anticipate that the sales prices and gross profits for our products will decrease over product life cycles. We cannot assure you that we will be successful in developing and introducing new offerings with enhanced functionality on a timely basis, or that our product and service offerings, if introduced, will enable us to maintain our prices and gross profits at levels that will allow us to achieve and maintain profitability.

We generate a significant amount of revenue from sales to distributors, resellers, and end-customers outside of the United States, and we are therefore subject to a number of risks associated with international sales and operations. We have a limited history of marketing, selling, and supporting our products and services internationally. As a result, we must hire and train experienced personnel to staff and manage our foreign operations. To the extent that we experience difficulties in recruiting, training, managing, and retaining an international staff, and specifically staff related to sales management and sales personnel, we may experience difficulties in sales productivity in foreign markets. We also enter into strategic distributor and reseller relationships with companies in certain international markets where we do not have a local presence. If we are not able to maintain successful strategic distributor relationships internationally or recruit additional companies to enter into strategic distributor relationships, our future success in these international markets could be limited. Business practices in the international markets that we serve may differ from those in the United States and may require us in the future to include terms other than our standard terms in customer contracts. To the extent that we may enter into customer contracts in the future that include non-standard terms related to payment, warranties, or performance obligations, our operating results may be adversely impacted.

Additionally, our international sales and operations are subject to a number of risks, including the following:

- political, economic and social uncertainty around the world, in particular, macroeconomic challenges in Europe, terrorist activities, and continued hostilities in the Middle East;

- greater difficulty in enforcing contracts and accounts receivable collection and longer collection periods;

the uncertainty of protection for intellectual property rights in some countries;
greater risk of unexpected changes in regulatory practices, tariffs, and tax laws and treaties;
risks associated with trade restrictions and foreign legal requirements, including the importation, certification, and
localization of our products required in foreign countries;
greater risk of a failure of foreign employees, partners, distributors, and resellers to comply with both U.S. and foreign
laws, including antitrust regulations, the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, U.S. or foreign
sanctions regimes and export or import control laws, and any trade regulations ensuring fair trade practices;

- 40 -

Table of Contents

- heightened risk of unfair or corrupt business practices in certain geographies and of improper or fraudulent sales arrangements that may impact financial results and result in restatements of, or irregularities in, financial statements;
- increased expenses incurred in establishing and maintaining office space and equipment for our international operations;
- greater difficulty in recruiting local experienced personnel, and the costs and expenses associated with such activities;
- management communication and integration problems resulting from cultural and geographic dispersion;
- fluctuations in exchange rates between the U.S. dollar and foreign currencies in markets where we do business; and
- general economic and political conditions in these foreign markets.

These factors and other factors could harm our ability to gain future international revenues and, consequently, materially impact our business, operating results, and financial condition. The expansion of our existing international operations and entry into additional international markets will require significant management attention and financial resources. Our failure to successfully manage our international operations and the associated risks effectively could limit the future growth of our business.

We are exposed to the credit and liquidity risk of some of our channel partners and to credit exposure in weakened markets, which could result in material losses.

For the nine months ended April 30, 2015, three channel partners represented 71% of our total revenue, and as of April 30, 2015, three channel partners represented 77% of our gross accounts receivable. Most of our sales to our channel partners are made on an open credit basis. Although we have programs in place that are designed to monitor and mitigate these risks, we cannot assure you these programs will be effective in reducing our credit risks, especially as we expand our business internationally. If we are unable to adequately control these risks, our business, operating results, and financial condition could be harmed.

A portion of our revenue is generated by sales to government entities, which are subject to a number of challenges and risks.

Sales to U.S. and foreign, federal, state, and local governmental agency end-customers have accounted for an increasingly significant amount of our revenue, and we may in the future increase sales to government entities. Sales to government entities are subject to a number of risks. Selling to government entities can be highly competitive, expensive, and time-consuming, often requiring significant upfront time and expense without any assurance that these efforts will generate a sale. Government certification requirements for products like ours may change, thereby restricting our ability to sell into the federal government sector until we have attained the revised certification. Government demand and payment for our products and services may be impacted by public sector budgetary cycles and funding authorizations, with funding reductions or delays adversely affecting public sector demand for our products and services. For example, the U.S. Congress may take additional action in 2015 to further reduce federal spending and the deficit, which could further impact our business and operating results.

The substantial majority of our sales to date to government entities have been made indirectly through our channel partners. Government entities may have statutory, contractual, or other legal rights to terminate contracts with our distributors and resellers for convenience or due to a default, and any such termination may adversely impact our future operating results. Governments routinely investigate and audit government contractors' administrative processes, and any unfavorable audit could result in the government refusing to continue buying our products and services, a reduction of revenue, or fines or civil or criminal liability if the audit uncovers improper or illegal activities, which could adversely impact our operating results in a material way. Finally, for purchases by the U.S. government, the government may require certain products to be manufactured in the United States and other relatively high cost manufacturing locations, and we may not manufacture all products in locations that meet such requirements, affecting our ability to sell these products to the U.S. government.

If our products do not interoperate with our end-customers' infrastructure, sales of our products and services could be negatively affected, which would harm our business.

Our products must interoperate with our end-customers' existing infrastructure, which often have different specifications, utilize multiple protocol standards, deploy products from multiple vendors, and contain multiple generations of products that have been added over time. As a result, when problems occur in a network, it may be

difficult to identify the sources of these problems. If we find defects in the hardware, we replace the hardware as part of our normal warranty process. If we find errors in the existing software that create problematic network configurations or settings, as we have in the past, we may have to issue software updates as part of our normal maintenance process. Any delays in identifying the sources of problems or in providing necessary modifications to our software or hardware could have a negative impact on our reputation and our end-customers' satisfaction with our products and services, and our ability to sell products and services could be adversely affected. In addition, government and other end-customers may require our products to comply with certain security or other certifications and standards. If our products are late in achieving or fail to achieve compliance with these certifications and standards, or our competitors achieve compliance with these certifications and standards, we may be disqualified from selling our products to such end-customers, or be at a competitive disadvantage, which would harm our business, operating results, and financial condition.

- 41 -

Table of Contents

Our ability to sell our products is dependent on the quality of our technical support services and those of our channel partners, and the failure to offer high quality technical support services could have a material adverse effect on our end-customers' satisfaction with our products and services, our sales, and our operating results.

Once our products are deployed within our end-customers' networks, our end-customers depend on our technical support services, as well as the support of our channel partners, to resolve any issues relating to our products. Our channel partners often provide similar technical support for third parties' products, and may therefore have fewer resources to dedicate to the support of our products. If we or our channel partners do not effectively assist our end-customers in deploying our products, succeed in helping our end-customers quickly resolve post-deployment issues, or provide effective ongoing support, our ability to sell additional products and services to existing end-customers would be adversely affected and our reputation with potential end-customers could be damaged. Many larger enterprise, service provider, and government entity end-customers have more complex networks and require higher levels of support than smaller end-customers. If we or our channel partners fail to meet the requirements of these larger end-customers, it may be more difficult to execute on our strategy to increase our coverage with larger end-customers. Additionally, if our channel partners do not effectively provide support to the satisfaction of our end-customers, we may be required to provide direct support to such end-customers, which would require us to hire additional personnel and to invest in additional resources. It can take several months to recruit, hire, and train qualified technical support employees. We may not be able to hire such resources fast enough to keep up with unexpected demand, particularly when the sales of our products exceed our internal forecasts. To the extent that we or our channel partners are unsuccessful in hiring, training, and retaining adequate support resources, our and our channel partners' ability to provide adequate and timely support to our end-customers will be negatively impacted, and our end-customers' satisfaction with our products and services will be adversely affected. Additionally, to the extent that we may need to rely on our sales engineers to provide post-sales support while we are ramping our support resources, our sales productivity will be negatively impacted, which would harm our revenues. Our or our channel partners' failure to provide and maintain high quality support services would have a material adverse effect on our business, financial condition, and operating results.

We face risks associated with having operations and employees located in Israel.

As a result of our acquisition of Cyvera, we have offices and employees located in Israel. As a result, political, economic, and military conditions in Israel directly affect our operations. The future of peace efforts between Israel and its Arab neighbors remains uncertain. There has been a significant increase in hostilities and political unrest between Hamas and Israel in the past year. The effects of these hostilities and violence on the Israeli economy and our operations in Israel are unclear, and we cannot predict the effect on us of further increases in these hostilities or future armed conflict, political instability or violence in the region. Current or future tensions and conflicts in the Middle East could adversely affect our business, operating results, financial condition and cash flows.

In addition, many of our employees in Israel are obligated to perform annual reserve duty in the Israeli military and are subject to being called for active duty under emergency circumstances. We cannot predict the full impact of these conditions on us in the future, particularly if emergency circumstances or an escalation in the political situation occurs. If many of our employees in Israel are called for active duty for a significant period of time, our operations and our business could be disrupted and may not be able to function at full capacity. Any disruption in our operations in Israel could adversely affect our business.

We may acquire other businesses, which could require significant management attention, disrupt our business, dilute stockholder value, and adversely affect our operating results.

As part of our business strategy, we may acquire or make investments in complementary companies, products, or technologies. For example, in December 2013, we acquired Morta Security, Inc., in April 2014, we acquired Cyvera, and in May 2015, we acquired CirroSecure, all of which were cybersecurity companies. However, we have not made any other significant acquisitions to date, and as a result, our ability as an organization to acquire and integrate other companies, products, or technologies in a successful manner is unproven. The identification of suitable acquisition candidates is difficult, and we may not be able to complete such acquisitions on favorable terms, if at all. If we do complete future acquisitions, we may not ultimately strengthen our competitive position or achieve our goals and business strategy, we may be subject to claims or liabilities assumed from an acquired company, product, or

technology, and any acquisitions we complete could be viewed negatively by our end-customers, investors, and securities analysts. In addition, if we are unsuccessful at integrating past or future acquisitions, or the technologies associated with such acquisitions, into our company, the revenue and operating results of the combined company could be adversely affected. Any integration process may require significant time and resources, which may disrupt our ongoing business and divert management's attention, and we may not be able to manage the integration process successfully. We may not successfully evaluate or utilize the acquired technology or personnel, realize anticipated synergies from the acquisition, or accurately forecast the financial impact of an acquisition transaction and integration of such acquisition, including accounting charges. We may have to pay cash, incur debt, or issue equity or equity-linked securities to pay for any future acquisitions, each of which could adversely affect our financial condition or the market price of our common stock. The sale of equity or issuance of equity-linked debt to finance any future acquisitions could result in dilution to our stockholders. The incurrence of indebtedness would result in increased fixed obligations and could also include covenants or other restrictions that would impede our ability to manage our operations. The occurrence of any of these risks could harm our business, operating results, and financial condition.

- 42 -

Table of Contents

False detection of applications, viruses, spyware, vulnerability exploits, data patterns, or URL categories could adversely affect our business.

Our classifications of application type, virus, spyware, vulnerability exploits, data, or uniform resource locator (URL) categories may falsely detect applications, content, or threats that do not actually exist. This risk is heightened by the inclusion of a “heuristics” feature in our products, which attempts to identify applications and other threats not based on any known signatures but based on characteristics or anomalies which indicate that a particular item may be a threat. These false positives may impair the perceived reliability of our products and may therefore adversely impact market acceptance of our products. If our products restrict important files or applications based on falsely identifying them as malware or some other item that should be restricted, this could adversely affect end-customers’ systems and cause material system failures. Any such false identification of important files or applications could result in damage to our reputation, negative publicity, loss of channel partners, end-customers and sales, increased costs to remedy any problem, and costly litigation.

Claims by others that we infringe their proprietary technology or other rights could harm our business.

Companies in the enterprise security industry own large numbers of patents, copyrights, trademarks, domain names, and trade secrets and frequently enter into litigation based on allegations of infringement, misappropriation, or other violations of intellectual property or other rights. As we face increasing competition and gain an increasingly high profile, the possibility of intellectual property rights claims against us grows. Third parties have asserted and may in the future assert claims of infringement of intellectual property rights against us. For example, in December 2011, Juniper, one of our competitors, filed a lawsuit against us alleging patent infringement. In September 2013, we filed a lawsuit against Juniper alleging patent infringement. In May 2014, we entered into a Settlement, Release and Cross-License Agreement (the “settlement agreement”) with Juniper to resolve all pending disputes between Juniper and us, including dismissal of all pending litigation. Please refer to the discussion under “Legal Proceedings” included in Part II, Item 1 of this Quarterly Report on Form 10-Q for more information related to our intellectual property litigation and settlement with Juniper.

Third parties may also assert such claims against our end-customers or channel partners, whom our standard license and other agreements obligate us to indemnify against claims that our products infringe the intellectual property rights of third parties. Furthermore, we may be unaware of the intellectual property rights of others that may cover some or all of our technology or products. As the number of products and competitors in our market increases and overlaps occur, infringement claims may increase. While we intend to increase the size of our patent portfolio, our competitors and others may now and in the future have significantly larger and more mature patent portfolios than we have. In addition, future litigation may involve patent holding companies or other adverse patent owners who have no relevant product revenue and against whom our own patents may therefore provide little or no deterrence or protection. In addition, we have not registered our trademarks in all of our geographic markets and failure to secure those registrations could adversely affect our ability to enforce and defend our trademark rights. Any claim of infringement by a third party, even those without merit, could cause us to incur substantial costs defending against the claim, could distract our management from our business, and could require us to cease use of such intellectual property.

Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation.

Although third parties may offer a license to their technology or other intellectual property, the terms of any offered license may not be acceptable and the failure to obtain a license or the costs associated with any license could cause our business, financial condition, and operating results to be materially and adversely affected. In addition, some licenses may be non-exclusive, and therefore our competitors may have access to the same technology licensed to us. If a third party does not offer us a license to its technology or other intellectual property on reasonable terms, or at all, we could be enjoined from continued use of such intellectual property. As a result, we may be required to develop alternative, non-infringing technology, which could require significant time (during which we would be unable to continue to offer our affected products or services), effort, and expense and may ultimately not be successful.

Furthermore, a successful claimant could secure a judgment or we may agree to a settlement that prevents us from distributing certain products or performing certain services or that requires us to pay substantial damages, royalties, or

other fees. Any of these events could seriously harm our business, financial condition, and operating results. In addition, although we have settled our litigation with Juniper, there is no guarantee that future claims of infringement will not arise between us and Juniper or other third parties. Under the settlement agreement with Juniper, the parties agreed to a mutual dismissal of all pending litigation, a cross-license of the patents in suit for the life of the patents, and an eight-year mutual covenant not to sue for infringement of any other patents. We also agreed to pay Juniper a one-time settlement amount consisting of \$75.0 million in cash, 1,080,747 shares of our common stock, and a warrant to purchase 463,177 shares of our common stock. After the eight-year covenant not to sue period, Juniper could file additional lawsuits against us, asserting patent infringement for other patents that are not subject to the cross-license.

Table of Contents

Our proprietary rights may be difficult to enforce or protect, which could enable others to copy or use aspects of our products without compensating us.

We rely and expect to continue to rely on a combination of confidentiality and license agreements with our employees, consultants, and third parties with whom we have relationships, as well as trademark, copyright, patent, and trade secret protection laws, to protect our proprietary rights. We have filed various applications for certain aspects of our intellectual property. Valid patents may not issue from our pending applications, and the claims eventually allowed on any patents may not be sufficiently broad to protect our technology or products. Any issued patents may be challenged, invalidated or circumvented, and any rights granted under these patents may not actually provide adequate defensive protection or competitive advantages to us. Patent applications in the United States are typically not published until 18 months after filing, or, in some cases, not at all, and publications of discoveries in industry-related literature lag behind actual discoveries. We cannot be certain that we were the first to make the inventions claimed in our pending patent applications or that we were the first to file for patent protection, which could prevent our patent applications from issuing as patents or invalidate our patents following issuance. Additionally, the process of obtaining patent protection is expensive and time-consuming, and we may not be able to prosecute all necessary or desirable patent applications at a reasonable cost or in a timely manner. Additional uncertainty may result from changes to patent-related laws enacted in the United States and other jurisdictions, including the America Invents Act and changes that may bring into question the validity of certain categories of software patents, and from interpretations of the intellectual property laws of the United States and other countries by applicable courts and agencies. As a result, we may not be able to obtain adequate patent protection or effectively enforce any issued patents.

Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or obtain and use information that we regard as proprietary. We generally enter into confidentiality or license agreements with our employees, consultants, vendors, and customers, and generally limit access to and distribution of our proprietary information. However, we cannot assure you that we have entered into such agreements with all parties who may have or have had access to our confidential information or that the agreements we have entered into will not be breached. We cannot guarantee that any of the measures we have taken will prevent misappropriation of our technology. Because we may be an attractive target for computer hackers, we may have a greater risk of unauthorized access to, and misappropriation of, our proprietary information. In addition, the laws of some foreign countries do not protect our proprietary rights to as great an extent as the laws of the United States, and many foreign countries do not enforce these laws as diligently as government agencies and private parties in the United States. From time to time, we may need to take legal action to enforce our patents and other intellectual property rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of others or to defend against claims of infringement or invalidity. Such litigation could result in substantial costs and diversion of resources and could negatively affect our business, operating results, and financial condition. Attempts to enforce our rights against third parties could also provoke these third parties to assert their own intellectual property or other rights against us, or result in a holding that invalidates or narrows the scope of our rights, in whole or in part. If we are unable to protect our proprietary rights (including aspects of our software and products protected other than by patent rights), we may find ourselves at a competitive disadvantage to others who need not incur the additional expense, time, and effort required to create the innovative products that have enabled us to be successful to date. Any of these events would have a material adverse effect on our business, financial condition, and operating results.

Our use of open source software in our products could negatively affect our ability to sell our products and subject us to possible litigation.

Our products contain software modules licensed to us by third-party authors under “open source” licenses. Some open source licenses contain requirements that we make available source code for modifications or derivative works we create based upon the type of open source software we use. If we combine our proprietary software with open source software in a certain manner, we could, under certain open source licenses, be required to release the source code of our proprietary software to the public. This would allow our competitors to create similar products with lower development effort and time and ultimately could result in a loss of product sales for us.

Although we monitor our use of open source software to avoid subjecting our products to conditions we do not intend, the terms of many open source licenses have not been interpreted by United States courts, and there is a risk that these licenses could be construed in a way that could impose unanticipated conditions or restrictions on our ability to commercialize our products. From time to time, there have been claims against companies that distribute or use open source software in their products and services, asserting that open source software infringes the claimants' intellectual property rights. We could be subject to suits by parties claiming infringement of intellectual property rights in what we believe to be licensed open source software. Moreover, we cannot assure you that our processes for controlling our use of open source software in our products will be effective. If we are held to have breached the terms of an open source software license, we could be required to seek licenses from third parties to continue offering our products on terms that are not economically feasible, to re-engineer our products, to discontinue the sale of our products if re-engineering could not be accomplished on a timely basis, or to make generally available, in source code form, our proprietary code, any of which could adversely affect our business, operating results, and financial condition. In addition to risks related to license requirements, usage of open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or assurance of title or controls on origin of

Table of Contents

the software. In addition, many of the risks associated with usage of open source software, such as the lack of warranties or assurances of title, cannot be eliminated, and could, if not properly addressed, negatively affect our business. We have established processes to help alleviate these risks, including a review process for screening requests from our development organizations for the use of open source software, but we cannot be sure that all open source software is submitted for approval prior to use in our products.

Our failure to adequately protect personal information could have a material adverse effect on our business.

A wide variety of provincial, state, national, and international laws and regulations apply to the collection, use, retention, protection, disclosure, transfer, and other processing of personal data. These data protection and privacy-related laws and regulations are evolving and being tested in courts and may result in ever-increasing regulatory and public scrutiny as well as escalating levels of enforcement and sanctions. Our failure to comply with applicable laws and regulations, or to protect such data, could result in enforcement action against us, including fines, imprisonment of company officials and public censure, claims for damages by end-customers and other affected individuals, damage to our reputation and loss of goodwill (both in relation to existing end-customers and prospective end-customers), any of which could have a material adverse effect on our operations, financial performance, and business. Evolving and changing definitions of personal data and personal information, within the European Union, the United States, and elsewhere, especially relating to classification of Internet Protocol (IP) addresses, machine identification, location data, and other information, may limit or inhibit our ability to operate or expand our business, including limiting strategic partnerships that may involve the sharing of data. Even the perception of privacy concerns, whether or not valid, may harm our reputation and inhibit adoption of our products by current and future end-customers.

A network or data security incident may allow unauthorized access to our network or data, harm our reputation, create additional liability and adversely impact our financial results.

Increasingly, companies are subject to a wide variety of attacks on their networks on an ongoing basis. In addition to traditional computer “hackers,” malicious code (such as viruses and worms), employee theft or misuse, denial of service attacks, and sophisticated nation-state and nation-state supported actors now engage in intrusions and attacks (including advanced persistent threat intrusions), and add to the risks to our internal networks and the information they store and process. Despite significant efforts to create security barriers to such threats, it is virtually impossible for us to entirely mitigate these risks. Any such breach could compromise our networks, creating system disruptions or slowdowns and exploiting security vulnerabilities of our products, and the information stored on our networks could be accessed, publicly disclosed, lost, or stolen, which could subject us to liability and cause us financial harm. These breaches, or any perceived breach, may also result in damage to our reputation, negative publicity, loss of channel partners, end-customers and sales, increased costs to remedy any problem, and costly litigation and may therefore adversely impact market acceptance of our products.

We license technology from third parties, and our inability to maintain those licenses could harm our business.

We incorporate technology that we license from third parties, including software, into our products and services. We cannot be certain that our licensors are not infringing the intellectual property rights of third parties or that our licensors have sufficient rights to the licensed intellectual property in all jurisdictions in which we may sell our products. Some of our agreements with our licensors may be terminated for convenience by them. If we are unable to continue to license any of this technology because of intellectual property infringement claims brought by third parties against our licensors or against us, or if we are unable to continue our license agreements or enter into new licenses on commercially reasonable terms, our ability to develop and sell products and services containing that technology would be severely limited, and our business could be harmed. Additionally, if we are unable to license necessary technology from third parties, we may be forced to acquire or develop alternative technology, which we may be unable to do in a commercially feasible manner or at all, and that may require us to use alternative technology of lower quality or performance standards. This would limit and delay our ability to offer new or competitive products and services and increase our costs of production. As a result, our margins, market share, and operating results could be significantly harmed.

Misuse of our products could harm our reputation and divert resources.

Our products may be misused by end-customers or third parties that obtain access to our products. For example, our products could be used to censor private access to certain information on the Internet. Such use of our products for censorship could result in negative press coverage and negatively affect our reputation.

We are subject to governmental export and import controls that could subject us to liability or impair our ability to compete in international markets.

Because we incorporate encryption technology into our products, certain of our products are subject to U.S. export controls and may be exported outside the U.S. only with the required export license or through an export license exception. If we were to fail to comply with U.S. export licensing requirements, U.S. customs regulations, U.S. economic sanctions, or other laws, we could be subject to substantial civil and criminal penalties, including fines, incarceration for responsible employees and managers, and the possible loss of export or import privileges. Obtaining the necessary export license for a particular sale may be time-consuming and

Table of Contents

may result in the delay or loss of sales opportunities. Furthermore, U.S. export control laws and economic sanctions prohibit the shipment of certain products to U.S. embargoed or sanctioned countries, governments, and persons. Even though we take precautions to ensure that our channel partners comply with all relevant regulations, any failure by our channel partners to comply with such regulations could have negative consequences for us, including reputational harm, government investigations, and penalties.

In addition, various countries regulate the import of certain encryption technology, including through import permit and license requirements, and have enacted laws that could limit our ability to distribute our products or could limit our end-customers' ability to implement our products in those countries. Changes in our products or changes in export and import regulations may create delays in the introduction of our products into international markets, prevent our end-customers with international operations from deploying our products globally or, in some cases, prevent or delay the export or import of our products to certain countries, governments, or persons altogether. Any change in export or import regulations, economic sanctions or related legislation, shift in the enforcement or scope of existing regulations, or change in the countries, governments, persons, or technologies targeted by such regulations, could result in decreased use of our products by, or in our decreased ability to export or sell our products to, existing or potential end-customers with international operations. Any decreased use of our products or limitation on our ability to export or sell our products would likely adversely affect our business, financial condition, and operating results.

Our corporate culture has contributed to our success, and if we cannot maintain this culture as we grow, we could lose the innovation, creativity, and teamwork fostered by our culture, and our business may be harmed.

We believe that a critical contributor to our success has been our corporate culture, which we believe fosters innovation, teamwork, passion for customers, and focus on execution, as well as facilitating critical knowledge transfer and knowledge sharing. As we grow and change, we may find it difficult to maintain these important aspects of our corporate culture, which could limit our ability to innovate and operate effectively. Any failure to preserve our culture could also negatively affect our ability to retain and recruit personnel, continue to perform at current levels or execute on our business strategy.

Our financial condition and results of operations could suffer if there is an impairment of goodwill or intangible assets.

As of April 30, 2015, our goodwill and intangible assets were \$199.3 million, and we have not recorded any goodwill or intangible assets impairments to date. We evaluate our goodwill for impairment on an annual basis in the fourth quarter of our fiscal year, and whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. Any excess of the goodwill carrying amount over its implied fair value is recognized as an impairment loss. This would result in incremental expense in the period in which the impairment was determined to have occurred. We cannot accurately predict the amount and timing of an impairment loss and any such impairment would have an adverse effect on our results of operations.

Our failure to raise additional capital or generate the significant capital necessary to expand our operations and invest in new products could reduce our ability to compete and could harm our business.

We intend to continue to make investments to support our business growth and may require additional funds to respond to business challenges, including the need to develop new features to enhance our platform, improve our operating infrastructure, or acquire complementary businesses and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional equity or equity-linked financing, our stockholders may experience significant dilution of their ownership interests and the market price of our common stock could decline. For example, in June 2014, we issued 0.0% Convertible Senior Notes due 2019 (the "Notes") and any conversion of some or all of the Notes into common stock will dilute the ownership interests of existing stockholders to the extent we deliver shares upon conversion of any of the Notes. See the risk factor entitled "The issuance of additional stock in connection with financings, acquisitions, investments, our stock incentive plans, the conversion of our Notes, or otherwise will dilute all other stockholders." Furthermore, if we engage in additional debt financing, the holders of our debt would have priority over the holders of our common stock, and we may be required to accept terms that restrict our ability to incur additional indebtedness. We may also be required to take other actions that would otherwise be in the interests of the debt holders and would require us to maintain specified liquidity or other ratios, any of which could harm our business, operating results, and financial condition. We may not be able to

obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired, and our business may be adversely affected.

We have a corporate structure aligned with the international nature of our business activities, and if we do not achieve increased tax benefits as a result of our corporate structure, our financial condition and results of operations could be adversely affected.

We have reorganized our corporate structure and intercompany relationships to more closely align with the international nature of our business activities. This corporate structure may allow us to reduce our overall effective tax rate through changes in how we use our intellectual property, international procurement, and sales operations. This corporate structure may also allow us to obtain financial and operational efficiencies. These efforts require us to incur expenses in the near term for which we may not realize related benefits. If the structure is not accepted by the applicable taxing authorities, if there are any changes in domestic and international tax laws that negatively impact the structure, including proposed legislation to reform U.S. taxation of international business activities and

- 46 -

Table of Contents

recent guidance regarding base erosion and profit shifting (“BEPS”) provided by the Organisation for Economic Co-operation and Development, or if we do not operate our business consistent with the structure and applicable tax provisions, we may fail to achieve the reduction in our overall effective tax rate and the other financial and operational efficiencies that we anticipate as a result of the structure and our future financial condition and results of operations may be negatively impacted.

We may have exposure to greater than anticipated tax liabilities.

Our income tax obligations are based in part on our corporate structure and intercompany arrangements, including the manner in which we develop, value, and use our intellectual property and the valuations of our intercompany transactions. The tax laws applicable to our business, including the laws of the United States and other jurisdictions, are subject to interpretation and certain jurisdictions may aggressively interpret their laws in an effort to raise additional tax revenue. The taxing authorities of the jurisdictions in which we operate may challenge our methodologies for valuing developed technology or intercompany arrangements, which could increase our worldwide effective tax rate and harm our financial position and results of operations. It is possible that tax authorities may disagree with certain positions we have taken and any adverse outcome of such a review or audit could have a negative effect on our financial position and results of operations. Further, the determination of our worldwide provision for income taxes and other tax liabilities requires significant judgment by management, and there are transactions where the ultimate tax determination is uncertain. Although we believe that our estimates are reasonable, the ultimate tax outcome may differ from the amounts recorded in our condensed consolidated financial statements and may materially affect our financial results in the period or periods for which such determination is made.

If our estimates or judgments relating to our critical accounting policies are based on assumptions that change or prove to be incorrect, our operating results could fall below our publicly announced guidance or the expectations of securities analysts and investors, resulting in a decline in the market price of our common stock.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the amounts reported in the condensed consolidated financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, as provided in the section entitled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in Part I, Item 2 of this Quarterly Report on Form 10-Q, the results of which form the basis for making judgments about the carrying values of assets, liabilities, equity, revenue, and expenses that are not readily apparent from other sources. Our operating results may be adversely affected if our assumptions change or if actual circumstances differ from those in our assumptions, which could cause our operating results to fall below our publicly announced guidance or the expectations of securities analysts and investors, resulting in a decline in the market price of our common stock. Significant assumptions and estimates used in preparing our condensed consolidated financial statements include those related to revenue recognition, share-based compensation, contract manufacturing liabilities, warranties, loss contingencies, income taxes, and, with respect to business combinations, determining purchase price allocation and estimating the fair value of assets acquired and liabilities assumed.

Failure to comply with governmental laws and regulations could harm our business.

Our business is subject to regulation by various federal, state, local, and foreign governmental agencies, including agencies responsible for monitoring and enforcing employment and labor laws, workplace safety, product safety, environmental laws, consumer protection laws, anti-bribery laws, import/export controls, federal securities laws, and tax laws and regulations. In certain jurisdictions, these regulatory requirements may be more stringent than those in the United States. Noncompliance with applicable regulations or requirements could subject us to investigations, sanctions, mandatory product recalls, enforcement actions, disgorgement of profits, fines, damages, civil and criminal penalties, or injunctions. If any governmental sanctions are imposed, or if we do not prevail in any possible civil or criminal litigation resulting from any alleged noncompliance, our business, operating results, and financial condition could be materially adversely affected. In addition, responding to any action will likely result in a significant diversion of management’s attention and resources and an increase in professional fees. Enforcement actions, litigation, and sanctions could harm our business, operating results, and financial condition.

If we fail to comply with environmental requirements, our business, financial condition, operating results, and reputation could be adversely affected.

We are subject to various environmental laws and regulations including laws governing the hazardous material content of our products and laws relating to the collection of and recycling of electrical and electronic equipment. Examples of these laws and regulations include the European Union (EU) Restriction on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Directive (RoHS) and the EU Waste Electrical and Electronic Equipment Directive (WEEE Directive), as well as the implementing legislation of the EU member states. Similar laws and regulations have been passed or are pending in China, South Korea, Norway, and Japan and may be enacted in other regions, including in the United States, and we are, or may in the future be, subject to these laws and regulations.

- 47 -

Table of Contents

The EU RoHS and the similar laws of other jurisdictions limit the content of certain hazardous materials such as lead, mercury, and cadmium in the manufacture of electrical equipment, including our products. Currently, our products comply with the EU RoHS requirements. However, if there are changes to this or other laws (or their interpretation) or if new similar laws are passed in other jurisdictions, we may be required to reengineer our products to use components compatible with these regulations. This reengineering and component substitution could result in additional costs to us or disrupt our operations or logistics.

The WEEE Directive requires electronic goods producers to be responsible for the collection, recycling, and treatment of such products. Changes in interpretation of the directive may cause us to incur costs or have additional regulatory requirements to meet in the future in order to comply with this directive, or with any similar laws adopted in other jurisdictions.

We are also subject to environmental laws and regulations governing the management of hazardous materials, which we use in small quantities in our engineering labs. Our failure to comply with past, present, and future similar laws could result in reduced sales of our products, substantial product inventory write-offs, reputational damage, penalties, and other sanctions, any of which could harm our business and financial condition. We also expect that our products will be affected by new environmental laws and regulations on an ongoing basis. To date, our expenditures for environmental compliance have not had a material impact on our results of operations or cash flows, and although we cannot predict the future impact of such laws or regulations, they will likely result in additional costs and may increase penalties associated with violations or require us to change the content of our products or how they are manufactured, which could have a material adverse effect on our business, operating results, and financial condition. We are exposed to fluctuations in currency exchange rates, which could negatively affect our financial condition and operating results.

Our sales contracts are primarily denominated in U.S. dollars, and therefore, substantially all of our revenue is not subject to foreign currency risk. However, strengthening of the U.S. dollar increases the real cost of our products to our end-customers outside of the United States, leading to delays in the purchase of our products and the lengthening of our sales cycle. If the U.S. dollar continues to strengthen, this could adversely affect our financial condition and operating results. In addition, increased international sales in the future, including through our channel partners and other partnerships, may result in greater foreign currency denominated sales, increasing our foreign currency risk. Moreover, operating expenses incurred outside the United States and denominated in foreign currencies are increasing and are subject to fluctuations due to changes in foreign currency exchange rates. If we are not able to successfully hedge against the risks associated with currency fluctuations, our financial condition and operating results could be adversely affected. To date, we have not entered into any hedging transactions in an effort to reduce our exposure to foreign currency exchange risk. While we may decide to enter into hedging transactions in the future, the availability and effectiveness of these hedging transactions may be limited and we may not be able to successfully hedge our exposure, which could adversely affect our financial condition and operating results.

Our business is subject to the risks of earthquakes, fire, power outages, floods, and other catastrophic events, and to interruption by man-made problems such as terrorism.

A significant natural disaster, such as an earthquake, fire, flood, or significant power outage could have a material adverse impact on our business, operating results, and financial condition. Both our corporate headquarters and the location where our products are manufactured are located in the San Francisco Bay Area, a region known for seismic activity. In addition, natural disasters could affect our supply chain, manufacturing vendors, or logistics providers' ability to provide materials and perform services such as manufacturing products or assisting with shipments on a timely basis. In the event our or our service providers' information technology systems or manufacturing or logistics abilities are hindered by any of the events discussed above, shipments could be delayed, resulting in missed financial targets, such as revenue and shipment targets, for a particular quarter. In addition, acts of terrorism and other geo-political unrest could cause disruptions in our business or the business of our supply chain, manufacturers, logistics providers, partners, or end-customers or the economy as a whole. Any disruption in the business of our supply chain, manufacturers, logistics providers, partners, or end-customers that impacts sales at the end of a fiscal quarter could have a significant adverse impact on our future quarterly results. All of the aforementioned risks may be further increased if the disaster recovery plans for us and our suppliers prove to be inadequate. To the extent that any

of the above should result in delays or cancellations of customer orders, or the delay in the manufacture, deployment, or shipment of our products, our business, financial condition, and operating results would be adversely affected.

Risks Related to Our Notes

We may not have the ability to raise the funds necessary to settle conversions of the Notes or to repurchase the Notes upon a fundamental change, and our future debt may contain limitations on our ability to pay cash upon conversion or repurchase of the Notes.

Holders of the Notes will have the right to require us to repurchase all or a portion of their Notes upon the occurrence of a fundamental change at a repurchase price equal to 100% of the principal amount of the Notes to be repurchased, plus accrued and unpaid special interest, if any, to, but excluding, the fundamental change repurchase date. In addition, upon conversion of the Notes,

Table of Contents

we will be required to make cash payments for each \$1,000 in principal amount of Notes converted of at least the lesser of \$1,000 and the sum of the daily conversion values. However, we may not have enough available cash or be able to obtain financing at the time we are required to make repurchases of Notes surrendered therefor or pay cash with respect to Notes being converted.

In addition, our ability to repurchase or to pay cash upon conversion of the Notes may be limited by law, regulatory authority or agreements governing our future indebtedness. Our failure to repurchase the Notes at a time when the repurchase is required by the indenture governing the Notes or to pay cash upon conversion of the Notes as required by the indenture would constitute a default under the indenture. A default under the indenture or the fundamental change itself could also lead to a default under agreements governing our future indebtedness. If the payment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and repurchase the Notes or to pay cash upon conversion of the Notes.

We may still incur substantially more debt or take other actions which would diminish our ability to make payments on the Notes when due.

We and our subsidiaries may be able to incur substantial additional debt in the future, subject to the restrictions contained in our debt instruments, some of which may be secured debt. We are not restricted under the terms of the indenture governing the Notes from incurring additional debt, securing existing or future debt, recapitalizing our debt or taking a number of other actions that are not limited by the terms of the indenture governing the Notes that could have the effect of diminishing our ability to make payments on the Notes when due. While the terms of any future indebtedness we may incur could restrict our ability to incur additional indebtedness, any such restrictions will indirectly benefit holders of the Notes only to the extent any such indebtedness or credit facility is not repaid or does not mature while the Notes are outstanding.

The accounting method for convertible debt securities that may be settled in cash, such as the Notes, could have a material effect on our reported financial results.

Under GAAP, we must separately account for the liability and equity components of convertible debt instruments (such as the Notes) that may be settled entirely or partially in cash upon conversion in a manner that reflects our economic interest cost. GAAP further requires the equity component of the Notes to be included in the additional paid-in capital section of stockholders' equity on our consolidated balance sheet, and the value of the equity component is treated as a debt discount for purposes of accounting for the debt component of the Notes. As a result, we are required to record non-cash interest expense in current and future periods as a result of the amortization of the discounted carrying value of the Notes to their face amount over the term of the Notes.

In addition, under certain circumstances, convertible debt instruments (such as the Notes) that may be settled entirely or partly in cash are currently accounted for utilizing the treasury stock method, the effect of which is that the shares issuable upon conversion of the Notes are not included in the calculation of diluted earnings per share except to the extent that the conversion value of the Notes exceeds their principal amount. Under the treasury stock method, for diluted earnings per share purposes, the transaction is accounted for as if the number of shares of common stock that would be necessary to settle such excess, if we elected to settle such excess in shares, are issued. We cannot be sure that the accounting standards in the future will continue to permit the use of the treasury stock method. If we are unable to use the treasury stock method in accounting for the shares issuable upon conversion of the Notes, then our diluted earnings per share would be adversely affected.

Risks Related to Ownership of Our Common Stock

Our actual operating results may differ significantly from our guidance.

From time to time, we have released, and may continue to release, guidance in our quarterly earnings releases, quarterly earnings conference call, or otherwise, regarding our future performance that represents our management's estimates as of the date of release. This guidance, which includes forward-looking statements, has been and will be based on projections prepared by our management. These projections are not prepared with a view toward compliance with published guidelines of the American Institute of Certified Public Accountants, and neither our registered public accountants nor any other independent expert or outside party compiles or examines the projections. Accordingly, no such person expresses any opinion or any other form of assurance with respect to the projections.

Projections are based upon a number of assumptions and estimates that, while presented with numerical specificity, are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control and are based upon specific assumptions with respect to future business decisions, some of which will change. We intend to state possible outcomes as high and low ranges which are intended to provide a sensitivity analysis as variables are changed but are not intended to imply that actual results could not fall outside of the suggested ranges. The principal reason that we release guidance is to provide a basis for our management to discuss our business outlook with analysts and investors. We do not accept any responsibility for any projections or reports published by any such persons.

- 49 -

Table of Contents

Guidance is necessarily speculative in nature, and it can be expected that some or all of the assumptions underlying the guidance furnished by us will not materialize or will vary significantly from actual results. Accordingly, our guidance is only an estimate of what management believes is realizable as of the date of release. Actual results will vary from our guidance and the variations may be material. In light of the foregoing, investors are urged not to rely upon our guidance in making an investment decision regarding our common stock.

Any failure to successfully implement our operating strategy or the occurrence of any of the events or circumstances set forth in this “Risk Factors” section in this Quarterly Report on Form 10-Q could result in the actual operating results being different from our guidance, and the differences may be adverse and material.

The market price of our common stock historically has been volatile and the value of your investment could decline. The market price of our common stock has been volatile since our initial public offering (IPO). Since shares of our common stock were sold in our IPO in July 2012 at a price of \$42.00 per share, the reported high and low sales prices of our common stock has ranged from \$158.24 to \$39.08, through May 18, 2015. The market price of our common stock may fluctuate widely in response to various factors, some of which are beyond our control. These factors include:

- announcements of new products, services or technologies, commercial relationships, acquisitions or other events by us or our competitors;
- price and volume fluctuations in the overall stock market from time to time;
- news announcements that affect investor perception of our industry, including reports related to the discovery of significant cyber attacks;
- significant volatility in the market price and trading volume of technology companies in general and of companies in our industry;
- fluctuations in the trading volume of our shares or the size of our public float;
- actual or anticipated changes in our operating results or fluctuations in our operating results;
- whether our operating results meet the expectations of securities analysts or investors;
- actual or anticipated changes in the expectations of securities analysts or investors;
- litigation involving us, our industry, or both;
- regulatory developments in the United States, foreign countries or both;
- major catastrophic events;
- sales of large blocks of our stock;
- departures of key personnel; or
- economic uncertainty around the world, in particular, macroeconomic challenges in Europe.

In addition, if the market for technology stocks or the stock market in general experiences loss of investor confidence, the market price of our common stock could decline for reasons unrelated to our business, operating results, or financial condition. The market price of our common stock might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. The market price of our common stock could also be affected by possible sales of our common stock by investors who view the Notes as a more attractive means of equity participation in us and by hedging or arbitrage trading activity that we expect to develop involving our common stock as a result of the existence of the Notes. In the past, following periods of volatility in the market price of a company’s securities, securities class action litigation has often been brought against that company. Securities litigation could result in substantial costs and divert our management’s attention and resources from our business. This could have a material adverse effect on our business, operating results, and financial condition.

The convertible note hedge and warrant transactions may affect the value of our common stock.

In connection with the sale of the Notes, we entered into convertible note hedge transactions with certain counterparties. We also entered into warrant transactions with the counterparties pursuant to which we sold warrants for the purchase of our common stock. The convertible note hedge transactions are expected generally to reduce the potential dilution to our common stock upon any conversion of Notes and/or offset any cash payments we are required to make in excess of the principal amount of any converted Notes, as the case may be. The warrants could separately have a dilutive effect to the extent that the market price per share of our common stock exceeds the strike price of the

warrants unless, subject to certain conditions, we elect to cash settle the warrants.

The counterparties or their respective affiliates may modify their hedge positions by entering into or unwinding various derivatives with respect to our common stock and/or purchasing or selling our common stock or other securities of ours in secondary

- 50 -

Table of Contents

market transactions prior to the maturity of the Notes (and are likely to do so during any observation period related to a conversion of Notes). This activity could also cause or avoid an increase or a decrease in the market price of our common stock or the Notes, which could affect a Note holder's ability to convert the Notes and, to the extent the activity occurs during any observation period related to a conversion of Notes, it could affect the amount and value of the consideration that such Note holder will receive upon conversion of the Notes.

We do not make any representation or prediction as to the direction or magnitude of any potential effect that the transactions described above may have on the price of the Notes or our common stock. In addition, we do not make any representation that the counterparties or their respective affiliates will engage in these transactions or that these transactions, once commenced, will not be discontinued without notice.

Substantial future sales of shares of our common stock could cause the market price of our common stock to decline. The market price of our common stock could decline as a result of substantial sales of our common stock, particularly sales by our directors, executive officers, employees and significant stockholders, a large number of shares of our common stock becoming available for sale, or the perception in the market that holders of a large number of shares intend to sell their shares. As of April 30, 2015, we had approximately 83,599,000 shares of our common stock outstanding.

We have also registered shares of our common stock that we may issue under our employee equity incentive plans. These shares will be able to be sold freely in the public market upon issuance.

In addition, we issued approximately 1,557,000 shares of common stock to certain former shareholders of Cyvera in connection with our acquisition of Cyvera. These shares were available to be sold freely in the public market through a registration statement on Form S-3 that we filed. Any unsold shares were deregistered in January 2015 with such unsold shares available to be sold pursuant to Rule 144 of the Securities Act of 1933, as amended. If these additional shares are sold, or if it is perceived that they will be sold, in the public market, the trading price of our common stock could decline.

The issuance of additional stock in connection with financings, acquisitions, investments, our stock incentive plans, the conversion of our Notes, or otherwise will dilute all other stockholders.

Our amended and restated certificate of incorporation authorizes us to issue up to 1,000,000,000 shares of common stock and up to 100,000,000 shares of preferred stock with such rights and preferences as may be determined by our board of directors. Subject to compliance with applicable rules and regulations, we may issue shares of common stock or securities convertible into shares of our common stock from time to time in connection with a financing, acquisition, investment, our stock incentive plans, the conversion of our Notes, or otherwise. Any such issuance could result in substantial dilution to our existing stockholders and cause the market price of our common stock to decline.

We do not intend to pay dividends for the foreseeable future.

We have never declared or paid any dividends on our common stock. We intend to retain any earnings to finance the operation and expansion of our business, and we do not anticipate paying any cash dividends in the future. As a result, you may only receive a return on your investment in our common stock if the market price of our common stock increases.

The requirements of being a public company may strain our resources, divert management's attention, and affect our ability to attract and retain qualified board members.

As a public company, we are subject to the reporting requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the listing requirements of the New York Stock Exchange (NYSE), and other applicable securities rules and regulations. Compliance with these rules and regulations have increased our legal and financial compliance costs, made some activities more difficult, time-consuming or costly, and increased demand on our systems and resources. Among other things, the Exchange Act requires that we file annual, quarterly, and current reports with respect to our business and operating results and maintain effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and, if required, improve our disclosure controls and procedures and internal control over financial reporting to meet this standard, significant resources and management oversight may be required. As a result, management's attention may be diverted from other business concerns, which could harm our business and operating results. Although we have already hired additional employees to comply with these requirements, we may need to hire even more employees in the future, which will increase our costs and

expenses.

We are also subject to the independent auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act (“Section 404”), enhanced disclosure obligations regarding executive compensation in our periodic reports and proxy statements, and the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. While we were able to determine in our management's report for fiscal 2014 that our internal control over financial reporting is effective, as well as provide an unqualified attestation report from our independent registered public accounting firm to that effect, we have and will continue to consume management resources and incur significant expenses for Section 404 compliance on an ongoing basis. In the event that our chief executive officer, chief financial officer, or independent registered

- 51 -

Table of Contents

public accounting firm determines in the future that our internal control over financial reporting is not effective as defined under Section 404, we could be subject to one or more investigations or enforcement actions by state or federal regulatory agencies, stockholder lawsuits or other adverse actions requiring us to incur defense costs, pay fines, settlements or judgments and causing investor perceptions to be adversely affected and potentially resulting in a decline in the market price of our stock.

In addition, changing laws, regulations, and standards relating to corporate governance and public disclosure, such as continued rulemaking pursuant to the Dodd-Frank Act of 2010 and related rules and regulations regarding the disclosure of conflict minerals that are mandated by the Dodd-Frank Act, are creating uncertainty for public companies, increasing legal and financial compliance costs, and making some activities more time-consuming. These laws, regulations, and standards are subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We intend to invest resources to comply with evolving laws, regulations, and standards, and this investment may result in increased general and administrative expense and a diversion of management's time and attention from revenue-generating activities to compliance activities. If our efforts to comply with new laws, regulations, and standards differ from the activities intended by regulatory or governing bodies, regulatory authorities may initiate legal proceedings against us and our business may be harmed.

We also expect that being a public company and these new rules and regulations will make it more expensive for us to obtain and maintain director and officer liability insurance, and in the future, we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These factors could also make it more difficult for us to attract and retain qualified members of our board of directors, particularly to serve on our Audit Committee and Compensation Committee, and qualified executive officers.

We are obligated to maintain proper and effective internal control over financial reporting. We may not complete our analysis of our internal control over financial reporting in a timely manner, or this internal control may not be determined to be effective, which may adversely affect investor confidence in our company and, as a result, the value of our common stock.

We are required, pursuant to the Exchange Act, to furnish a report by management on, among other things, the effectiveness of our internal control over financial reporting. This assessment will need to include disclosure of any material weaknesses identified by our management in our internal control over financial reporting, as well as a statement that our auditors have issued an attestation report on our internal controls.

While we were able to determine in our management's report for fiscal 2014 that our internal control over financial reporting is effective, as well as provide an unqualified attestation report from our independent registered public accounting firm to that effect, we may not be able to complete our evaluation, testing, and any required remediation in a timely fashion or our independent registered public accounting firm may not be able to formally attest to the effectiveness of our internal control over financial reporting in the future. During the evaluation and testing process, if we identify one or more material weaknesses in our internal control over financial reporting that we are unable to remediate before the end of the same fiscal year in which the material weakness is identified, we will be unable to assert that our internal controls are effective. If we are unable to assert that our internal control over financial reporting is effective, or if our independent registered public accounting firm is unable to attest to the effectiveness of our internal controls or determine we have a material weakness in our internal controls, we could lose investor confidence in the accuracy and completeness of our financial reports, which would cause the price of our common stock to decline.

If securities or industry analysts do not publish research or reports about our business, or publish inaccurate or unfavorable research reports about our business, our share price and trading volume could decline.

The trading market for our common stock, to some extent, depends on the research and reports that securities or industry analysts publish about us or our business. We do not have any control over these analysts. If one or more of the analysts who cover us should downgrade our shares or change their opinion of our shares, industry sector, or products, our share price would likely decline. If one or more of these analysts should cease coverage of our company

or fail to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our share price or trading volume to decline.

Our charter documents and Delaware law, as well as certain provisions of our Notes, could discourage takeover attempts and lead to management entrenchment, which could also reduce the market price of our common stock.

Our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that could delay or prevent a change in control of our company. These provisions could also make it difficult for stockholders to elect directors that are not nominated by the current members of our board of directors or take other corporate actions, including effecting changes in our management. These provisions include:

- a classified board of directors with three-year staggered terms, which could delay the ability of stockholders to change the membership of a majority of our board of directors;

Table of Contents

the ability of our board of directors to issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquiror;

the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of our board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;

a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;

the requirement that a special meeting of stockholders may be called only by the chairman of our board of directors, our president, our secretary, or a majority vote of our board of directors, which could delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors;

the requirement for the affirmative vote of holders of at least 66 2/3% of the voting power of all of the then outstanding shares of the voting stock, voting together as a single class, to amend the provisions of our amended and restated certificate of incorporation relating to the issuance of preferred stock and management of our business or our amended and restated bylaws, which may inhibit the ability of an acquiror to effect such amendments to facilitate an unsolicited takeover attempt;

the ability of our board of directors, by majority vote, to amend the bylaws, which may allow our board of directors to take additional actions to prevent an unsolicited takeover and inhibit the ability of an acquiror to amend the bylaws to facilitate an unsolicited takeover attempt; and

advance notice procedures with which stockholders must comply to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquiror from conducting a solicitation of proxies to elect the acquiror's own slate of directors or otherwise attempting to obtain control of us.

In addition, as a Delaware corporation, we are subject to Section 203 of the Delaware General Corporation Law. These provisions may prohibit large stockholders, in particular those owning 15% or more of our outstanding voting stock, from merging or combining with us for a certain period of time. Additionally, certain provisions of our Notes could make it more difficult or more expensive for a third party to acquire us. The application of Section 203 or certain provisions of our Notes also could have the effect of delaying or preventing a change in control of us. Any of these provisions could, under certain circumstances, depress the market price of our common stock.

ITEM 6. EXHIBITS

The documents listed in the Exhibit Index of this Quarterly Report on Form 10-Q are incorporated by reference or are filed with this Quarterly Report on Form 10-Q, in each case as indicated therein (numbered in accordance with Item 601 of Regulation S-K).
