DECKERS OUTDOOR CORPORATION

AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(Unaudited)

(amounts in thousands, except share quantity and per share data)

(1) General

(a) Basis of Presentation

The unaudited condensed consolidated financial statements have been prepared on the same basis as the annual audited consolidated financial statements and, in the opinion of management, reflect all adjustments necessary for a fair presentation for each of the periods presented. The results of operations for interim periods are not necessarily indicative of results to be achieved for full fiscal years. Our business is seasonal, with the highest percentage of UGG® brand net sales occurring in the third and fourth quarters of each year, the highest percentage of Teva® brand net sales occurring in the first and second quarters while the quarter with the highest percentage of annual net sales for the Simple® brand has varied from year to year. In May 2008, the Company acquired 100% of the ownership interest of TSUBO®, LLC. The Company does not expect the TSUBO brand to have a significant effect on the seasonality of its consolidated net sales in 2008.

As contemplated by the Securities and Exchange Commission (the "SEC") under Rule 10-01 of Regulation S-X, the accompanying condensed consolidated financial statements and related footnotes have been condensed and do not contain certain information that will be included in the Company's annual consolidated financial statements and footnotes thereto. For further information, refer to the consolidated financial statements and related footnotes for the year ended December 31, 2007 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007.

(b) Use of Estimates

The preparation of the Company's condensed consolidated financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in these financial statements and accompanying notes. Significant areas requiring the use of management estimates relate to inventory reserves, allowances for bad debts, returns, chargebacks and discounts, impairment assessments and charges, deferred taxes, depreciation and amortization, litigation and other contingency reserves, fair value and probability assessments for share-based awards, fair values of financial instruments, and of acquired intangibles, assets and liabilities. Actual results could differ materially from these estimates.

(c) Reclassifications

Certain items in the prior year's condensed consolidated financial statements have been reclassified to conform to the current year presentation.

(2) Stock Compensation

In May 2006, the Company adopted the 2006 Equity Incentive Plan, **which was amended by Amendment No. 1 dated May 9, 2007** (as amended, the 2006 Plan). The primary purpose of the 2006 Plan is to encourage ownership in the Company by key personnel, whose long-term service is considered essential to the Company's continued progress. The 2006 Plan provides for 2,000,000 shares of the Company's common stock that are reserved for issuance to employees, directors, or consultants. The maximum aggregate number of shares that may be issued under the 2006 Plan through the exercise of incentive stock options is 1,500,000. The 2006 Plan supersedes the Company's 1993 Stock Incentive Plan, as amended (the 1993 Plan), which was subsequently terminated for new grants.

The Company generally grants nonvested stock units (NSUs) annually to key personnel. The NSUs granted pursuant to the 1993 Plan and the 2006 Plan entitle the employee recipients to receive shares of common stock in the Company, which generally vest in quarterly increments between the third and fourth anniversary of the grant. Many of these awards include vesting that is also subject to achievement of certain performance targets.

In May 2007, the Company's Board of Directors, upon recommendation of its Compensation Committee, adopted two new types of long-term incentive award agreements under the 2006 Plan for issuance to the Company's current and future executive officers. The new award types consist of stock appreciation right (SAR) awards and restricted stock unit (RSU) awards. These awards vest subject to certain long-term performance objectives and certain long-term service conditions. Provided that these conditions are met, one-half of the SAR and RSU awards vest 80% on December 31, 2010 and 20% on December 31, 2011, and one-half of the SAR and RSU awards vest 80% on December 31, 2015 and 20% on December 31, 2016. In accordance with Financial Accounting Standards Board (FASB) Statement No. 123 (revised 2004), Share-Based Payment, (SFAS 123R), the

[Table of Contents](#)

DECKERS OUTDOOR CORPORATION

AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(Unaudited)

(amounts in thousands, except share quantity and per share data)

Company recognizes expense only for those awards that management deems probable of achieving the performance and service objectives. Prior to the beginning of the three month period ended September 30, 2008, the Company did not believe that the achievement of the performance objectives for the SAR and RSU awards with final vesting dates of December 31, 2016 was probable, and therefore the Company had not recognized compensation expense for those awards. However, as of September 30, 2008, the Company determined that the achievement of the performance objectives for those awards was probable based on updated projections of future sales and diluted earnings per share. As a result, the Company began recording compensation expense for those awards during the three months ended September 30, 2008 with an adjustment of \$1,531 recorded to recognize the cumulative to date compensation expense for those awards.

For the SARs that are expected to vest on December 31, 2015 and December 31, 2016, the per share fair value of SARs granted was \$68.90 on the date of grant using the Black-Scholes pricing model with the following weighted-average assumptions: expected dividend yield of 0.0%, expected stock volatility of 76.4%, risk-free interest rate of 4.6%, and an expected life of 11.9 years.

On a quarterly basis, the Company generally grants 400 fully-vested shares of its common stock to each of its outside directors. The fair value of such shares is expensed on the date of issuance.

The table below summarizes stock compensation amounts recognized in the condensed consolidated statements of income:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
Compensation expense recorded for:				
Stock options	\$	\$ 68	\$	\$ 209
NSUs	511	771	1,895	1,735
SARs	1,903	503	3,005	846
RSUs	326	100	558	178
Directors' shares	331	244	1,003	617
Total compensation expense	3,071	1,686	6,461	3,585
Income tax benefit recognized	(1,252)	(688)	(2,633)	(1,465)
Net compensation expense	\$ 1,819	\$ 998	\$ 3,828	\$ 2,120

The table below summarizes the total remaining unrecognized compensation cost related to nonvested awards and the weighted-average period over which the cost is expected to be recognized as of September 30, 2008:

	Unrecognized Compensation Cost	Weighted-Average Remaining Vesting Period (Years)
NSUs	\$ 9,286	1.7

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

SARs		12,135	4.6
RSUs		2,165	4.6
Total	\$	23,586	

During the nine months ended September 30, 2008, 86,000 NSUs were granted under the 2006 Plan. The weighted-average grant-date fair value of these NSUs was \$127.77.

(3) Comprehensive Income

Comprehensive income is the total of net income and all other non-owner changes in equity. At September 30, 2008 and December 31, 2007, accumulated other comprehensive income of \$318 and \$282, respectively, consisted of net unrealized gains (losses) on short-term investments and cumulative foreign currency translation adjustment.

[Table of Contents](#)

DECKERS OUTDOOR CORPORATION

AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(Unaudited)

(amounts in thousands, except share quantity and per share data)

Comprehensive income is determined as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
Net income	\$ 26,014	\$ 19,330	\$ 33,488	\$ 31,048
Unrealized (loss) gain on short-term investments	(49)	(234)	46	(237)
Cumulative foreign currency translation adjustment	(88)	56	(10)	66
Total comprehensive income	\$ 25,877	\$ 19,152	\$ 33,524	\$ 30,877

(4) Income per Share

Basic net income per share represents net income divided by the weighted-average number of common shares outstanding for the period. Diluted net income per share represents net income divided by the weighted-average number of shares outstanding, including the dilutive impact of potential issuances of common stock. For the three and nine months ended September 30, 2008 and September 30, 2007, the difference between the weighted-average number of shares used in the basic computation and that used in the diluted computation resulted from the dilutive impact of options to purchase common stock and NSUs.

The reconciliations of basic to diluted weighted-average common shares outstanding were as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
Weighted-average shares used in basic computation	13,054,000	12,973,000	13,031,000	12,784,000
Dilutive effect of stock options and NSUs	145,000	144,000	152,000	311,000
Weighted-average shares used for diluted computation	13,199,000	13,117,000	13,183,000	13,095,000

The Company excluded 86,000 and 77,000 contingently issuable shares of common stock underlying its NSUs from the diluted net income per share computation for the three and nine months ended September 30, 2008 and 2007, respectively. The Company excluded all of its SARs and RSUs from the diluted net income per share computation for both the three and nine months ended September 30, 2008 and 2007, respectively. The shares were excluded because the necessary conditions had not been satisfied for the shares to be issuable based on the Company's performance through September 30, 2008 and 2007.

[Table of Contents](#)

DECKERS OUTDOOR CORPORATION

AND SUBSIDIARIES**Notes to Condensed Consolidated Financial Statements****(Unaudited)****(amounts in thousands, except share quantity and per share data)****(5) Restricted Cash**

In January 2007, the Company entered into an escrow agreement by and among Deckers Outdoor Corporation, MacGillivray Freeman Films, Inc., and Comerica Bank. The escrow agreement was initiated in conjunction with the Company's purchase obligation with a movie production company for advertising services. As a result of the agreement, during the nine months ended September 30, 2008, the Company paid \$250 of the purchase obligation and the Company had \$1,000 of restricted cash related to this obligation remaining as of September 30, 2008. Film production was completed and the movie was released in March 2008. Accordingly, the Company recorded the full \$1,250 obligation as advertising expense during the first quarter of 2008. Of the total restricted cash related to this purchase obligation, \$300 is short-term and is included as a current asset, and the remaining \$700 is long-term and is included as a noncurrent asset in the Company's condensed consolidated balance sheet at September 30, 2008. The escrow agreement contains a disbursement schedule according to when the remaining funds will be disbursed to the production company, which is as follows:

January 2009	\$	300
January 2010		300
January 2011		200
January 2012		200
	\$	1,000

In addition, as of September 30, 2008, the Company had short-term restricted cash held in trust as a bond for an overseas legal matter.

(6) Short-term Investments

Short-term investments are classified as available for sale under the provisions of SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. Accordingly, the short-term investments are reported at fair value, with any unrealized gains and losses included as a separate component of stockholders' equity. Interest and dividends are included in interest income in the condensed consolidated statements of income. Securities with original maturities of three months or less are classified as cash equivalents. Those that mature over three months from their original date and in less than one year are classified as short-term investments, as the funds are used for working capital requirements. The fair values of the Company's investments are shown in the table below. The fair value for each of the assets in the table below, other than auction rate securities, was determined based on quoted prices in active markets for identical assets, categorized as Level 1 inputs under FASB Statement No. 157 (SFAS 157), *Fair Value Measurements*. As of September 30, 2008, the fair value for the auction rate securities was based on inputs categorized as Level 3 inputs under SFAS 157 as discussed further below.

The Company has determined that the decline in fair values included in the table below are temporary, and therefore the unrealized losses have not been included in the condensed consolidated statements of income. As of September 30, 2008, the Company held \$2,250 of auction rate securities that experienced failed auctions during the nine months then ended. Pursuant to a settlement agreement entered into between the Financial Industry Regulatory Authority and the Company's investment manager, the Company's investment manager offered to purchase 100% of the Company's auction rate securities at par value during September 2008. The Company accepted the settlement offer, and subsequently, on

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

October 30, 2008, the Company sold its auction rate securities to the investment manager at par value.

(7) Credit Facility

The Company's revolving credit facility with Comerica Bank (the Facility) provides for a maximum availability of \$20,000. Up to \$10,000 of borrowings may be in the form of letters of credit. The Facility bears interest at the lender's prime rate (5.00% at September 30, 2008) or, at the Company's option, at the London Interbank Offered Rate, or LIBOR, (3.93% at September 30, 2008) plus 1.0% to 2.5%, depending on the ratio of liabilities to earnings before interest, taxes, depreciation and amortization, and is secured by substantially all assets. The Facility includes annual commitment fees of \$60 per year and expires on June 1, 2010. At September 30, 2008, the Company had no outstanding borrowings under the Facility and outstanding letters of credit aggregated \$680. As a result, \$19,320 was available under the Facility at September 30, 2008.

The agreements underlying the Facility contain certain financial covenants, currently including a limitation on aggregate annual lease payments of \$15,000, a quick ratio requirement of at least 0.90:1.00, a minimum profitability requirement of \$1,000 per fiscal quarter, a limitation on annual consolidated capital expenditures of \$28,000, a minimum tangible net worth requirement of \$37,000 commencing with the fiscal year ended December 31, 2004 plus 75% of consolidated net profit on a cumulative basis, and a requirement that the Company's consolidated total liabilities to consolidated effective tangible net worth ratio be greater than 1.50:1.00. The agreements also contain a prohibition on the payment of dividends. At September 30, 2008, the Company was in compliance with all covenants.

(8) Income Taxes

Income taxes for the interim periods are computed using the effective tax rate estimated to be applicable for the full fiscal year, which is subject to ongoing review and evaluation by management. Income tax expense and effective income tax rates were as follows:

Three months ended September 30,		Nine months ended September 30,	
2008	2007	2008	2007
\$ 17,445	\$ 11,974	\$ 22,325	\$ 20,271

Income tax expense				
Income tax rate	40.1%	38.3%	40.0%	39.5%

The increase in the effective tax rate was primarily due to the offshore allocation of a portion of the intellectual property rights of TSUBO, which required a one-time buy-in payment of \$800 that increased U.S. based income as a percentage of worldwide income.

The amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate as of September 30, 2008 was \$2,152. Since the adoption of FASB Interpretation No. 48 (FIN 48) in the first quarter of 2007, Accounting for Uncertainty in Income Taxes, the Company has accounted for interest and penalties generated by income tax contingencies as interest expense in the condensed consolidated statements of income. There was an insignificant amount of interest expense recognized in the nine months ended September 30, 2008. The amount of interest accrued in the condensed consolidated balance sheet as of September 30, 2008 was \$449.

Table of Contents

DECKERS OUTDOOR CORPORATION

AND SUBSIDIARIES**Notes to Condensed Consolidated Financial Statements****(Unaudited)****(amounts in thousands, except share quantity and per share data)**

A reconciliation of the beginning and ending amount of total unrecognized tax benefits is as follows:

Balance at January 1, 2008	\$	3,588
Gross increase related to current year tax positions		457
Gross decrease due to settlements with taxing authorities		(1,535)
Gross decrease due to lapse of statute of limitations		(174)
Balance at September 30, 2008	\$	2,336

(9) Recent Accounting Pronouncements

In September 2006, the FASB issued Statement No. 157 (SFAS 157), Fair Value Measurements. SFAS 157 standardizes the definition and approaches for fair value measurements of financial instruments for those standards which already permit or require the use of fair value. It does not require any new fair value measurements. SFAS 157 defines a hierarchy for valuation techniques and also requires additional disclosures. The provisions of SFAS 157 were effective for the Company as of January 1, 2008. The FASB has deferred the effective date of SFAS 157 only as it relates to fair value measurement requirements for nonfinancial assets and liabilities that are not measured at fair value on a recurring basis to fiscal years beginning after December 15, 2008. As permitted under SFAS 157, the Company has not applied SFAS 157 to its intangible assets. The adoption of this statement did not have a material effect on the Company's condensed consolidated financial statements.

In February 2007, the FASB issued Statement No. 159 (SFAS 159), The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. SFAS 159 provides companies the option to measure many financial instruments and certain other items at fair value. This provides companies the opportunity to mitigate volatility in earnings caused by measuring instruments differently without complex hedge accounting provisions. SFAS 159 was effective for the Company beginning January 1, 2008. The adoption of this statement did not have a material effect on the Company's condensed consolidated financial statements.

In December 2007, the FASB issued Statement No. 141 (revised 2007) (SFAS 141R), Business Combinations. The objective of SFAS 141R is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. SFAS 141R requires that all business combinations be accounted for by applying the acquisition method (previously referred to as the purchase method), and most identifiable assets, liabilities, noncontrolling interests, and goodwill acquired in business combinations to be recorded at full fair value. SFAS 141R also broadens the definition of a business and changes the treatment of direct acquisition-related costs from being included in the purchase price to instead being generally expensed if they are not costs associated with issuing debt or equity securities. SFAS 141R is effective for the Company beginning January 1, 2009, and will be applied prospectively to any new business combinations.

In December 2007, the FASB issued Statement No. 160 (SFAS 160), Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. The objective of SFAS 160 is to improve the relevance, comparability, and transparency of the financial information that a reporting entity provides in its consolidated financial statements by establishing accounting and reporting standards for noncontrolling interests in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 specifies that noncontrolling interests (referred to

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

as minority interests prior to SFAS 160) be reported as a separate component of equity, not as a liability or other item outside of equity, which changes the accounting for transactions with noncontrolling interest holders. SFAS 160 is effective for the Company beginning January 1, 2009, and will be applied prospectively to all noncontrolling interests, including the Company's current minority interest and any others that arise before that date.

In March 2008, the FASB issued Statement No. 161 (SFAS 161), Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133. The objective of SFAS 161 is to improve the transparency of financial reporting by requiring additional disclosures about an entity's derivative and hedging activities. This Statement is effective for the Company beginning January 1, 2009, with early application encouraged. This Statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. The Company will apply this Statement prospectively to any new derivative and hedging activities entered into on or after the effective date.

DECKERS OUTDOOR CORPORATION

AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements

(Unaudited)

(amounts in thousands, except share quantity and per share data)

In May 2008, the FASB issued Statement No. 162 (SFAS 162), The Hierarchy of Generally Accepted Accounting Principles. The objective of SFAS 162 is to identify the sources of generally accepted accounting principles (GAAP) and provide a framework, or hierarchy, for selecting the principles to be used in preparing U.S. GAAP financial statements for nongovernmental entities. This Statement is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board's related amendments to Auditing Standard Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles. The Company does not expect the adoption of this Statement to have a material effect on its condensed consolidated financial statements.

In October 2008, the FASB issued proposed FASB Staff Position (FSP) FAS 157-3, Determining Fair Value of a Financial Asset in a Market That Is Not Active. This FSP clarifies the application of Statement No. 157 in an inactive market and illustrates how an entity would determine fair value when the market for a financial asset is not active. The Staff Position is effective immediately and applies to prior periods for which financial statements have not been issued, including interim or annual periods ending on or before September 30, 2008. The adoption of this FSP did not have a material effect on the Company's condensed consolidated financial statements.

(10) Business Segments, Concentration of Business, and Credit Risk and Significant Customers

The Company's accounting policies of the segments below are the same as those described in the summary of significant accounting policies, except that the Company does not allocate interest, income taxes, non-operating income and expenses or certain unusual items to segments. The Company evaluates segment performance based on net sales and income or loss from operations. The Company's reportable segments include the strategic business units responsible for the worldwide wholesale operations of each of its brands, its eCommerce business and its retail store business. The wholesale operations of each brand are managed separately because each requires different marketing, research and development, design, sourcing and sales strategies. The eCommerce and retail store segments are managed separately because they are direct to consumer sales, while the brand segments are wholesale sales. The income or loss from operations for each of the segments includes only those costs which are specifically related to each segment, which consist primarily of cost of sales, costs for research and development, design, marketing, sales, commissions, bad debts, depreciation, amortization and the costs of employees and their respective expenses that are directly related to each business segment. The unallocated corporate overhead costs are the shared costs of the organization and include the following: costs of the distribution centers, certain executive compensation, accounting and finance, legal, information technology, credit and collections, human resources and facilities costs, among others. The gross profit derived from the sales to third parties of the eCommerce segment and the retail store segment is separated into two components: (i) the wholesale profit is included in the operating income or loss of each of the brands wholesale segments, and (ii) the retail profit is included in the operating income or loss of the eCommerce segment and the retail store segment.

In May 2008, the Company acquired 100% of the ownership interest of TSUBO, LLC. The wholesale operations of the TSUBO brand is a reportable segment presented in the figures below.

In prior years, eCommerce and retail stores were one reportable segment, Consumer Direct. The figures presented below for the three and nine month periods ended September 30, 2007 show the breakdown of the Consumer Direct segment into the current format of two reportable segments, eCommerce and retail stores.

Notes to Condensed Consolidated Financial Statements
(Unaudited)
(amount in thousands, except share quantity and per share data)

Net sales and operating income (loss) by business segment are summarized as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
Net sales to external customers:				
UGG wholesale	\$ 165,195	\$ 105,661	\$ 254,950	\$ 148,852
Teva wholesale	9,584	9,404	69,281	68,814
Simple wholesale	4,304	3,714	12,420	9,202
TSUBO wholesale	2,200		2,853	
eCommerce	10,596	7,789	32,654	21,582
Retail stores	5,409	2,813	13,781	6,236
	\$ 197,288	\$ 129,381	\$ 385,939	\$ 254,686
Income (loss) from operations:				
UGG wholesale	\$ 62,149	\$ 42,533	\$ 95,331	\$ 58,447
Teva wholesale*	467	538	212	18,385
Simple wholesale	(371)	(395)	(204)	(1,258)
TSUBO wholesale	(278)		(338)	
eCommerce	2,907	2,244	9,612	6,512
Retail stores	(689)	(32)	(789)	(515)
Unallocated overhead costs	(21,104)	(14,228)	(50,627)	(32,975)
	\$ 43,081	\$ 30,660	\$ 53,197	\$ 48,596

* Included in Teva income from operations is an impairment loss of \$14,900 recognized during the second quarter of 2008 (see note 11).

Business segment asset information is summarized as follows:

	September 30, 2008	December 31, 2007
Total assets for reportable segments:		
UGG wholesale	\$ 242,512	\$ 93,554
Teva wholesale	54,718	78,612
Simple wholesale	9,660	5,648
TSUBO wholesale	9,022	
eCommerce	1,318	491
Retail stores	9,442	5,413
	\$ 326,672	\$ 183,718

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

The assets allocable to each reporting segment generally include accounts receivable, inventory, intangible assets and certain other assets, that are specifically identifiable with one of the Company's segments. Unallocated corporate assets are the assets not specifically related to one of the segments and generally include the Company's cash and cash equivalents, short-term investments, deferred tax assets, and various other assets shared by the Company's segments. Reconciliations of total assets from reportable segments to the condensed consolidated balance sheets are as follows:

	September 30, 2008	December 31, 2007
Total assets for reportable segments	\$ 326,672	\$ 183,718
Unallocated deferred tax assets	8,641	8,646
Other unallocated corporate assets	88,819	177,668
Consolidated total assets	\$ 424,132	\$ 370,032

The majority of the Company's sales are to customers throughout the U.S. The Company also has sales to foreign distributors located in Europe, Canada, Australia, Asia, and Latin America, among other regions. International sales were 17.7% and 11.0% of the Company's total net sales for the three months ended September 30, 2008 and 2007, respectively. International

Table of Contents

**DECKERS OUTDOOR CORPORATION
AND SUBSIDIARIES**

Notes to Condensed Consolidated Financial Statements
(Unaudited)
(amount in thousands, except share quantity and per share data)

sales were 22.8% and 18.0% of the Company's total net sales for the nine months ended September 30, 2008 and 2007, respectively. The Company does not consider international operations a separate segment, as management reviews such operations in the aggregate with the aforementioned segments.

As of September 30, 2008, approximately \$7,811 of trademarks, \$466 of goodwill and \$421 of other intangible assets were held in Bermuda by a subsidiary of the Company. Substantially all other long-lived assets were held in the U.S. Management performs regular evaluations concerning the ability of its customers to satisfy their obligations and records a provision for doubtful accounts based upon these evaluations. One customer accounted for 10.1% and 10.8% of the Company's net sales for the nine months ended September 30, 2008 and 2007, respectively. As of September 30, 2008, the Company had two customers representing 15.8% and 13.2%, respectively, of net trade accounts receivable and as of December 31, 2007, the Company had one customer representing 34.2% of net trade accounts receivable.

The Company's production and sourcing is concentrated in China, New Zealand and Australia, with the majority of its production at six independent contractor factories in China. The Company may change suppliers as circumstances warrant. The Company's operations are subject to the customary risks of doing business abroad, including, but not limited to, currency fluctuations, customs duties and related fees, various import controls and other nontariff barriers, restrictions on the transfer of funds, labor unrest and strikes, changes in labor laws, and, in certain parts of the world, political instability.

(11) Goodwill and Other Intangible Assets

In accordance with SFAS 142, the Company performed its annual impairment test of non-amortizable intangible assets using market value approaches and valuation techniques as of December 31, 2007, and determined that there was no impairment of goodwill or other intangible assets. As of June 30, 2008, the Company's inability to reach its 2008 Teva brand period to date sales targets along with a reduced long-term forecast for Teva brand sales growth were indicators that the Teva goodwill and other intangible assets were possibly impaired. As a result, the Company conducted an interim impairment evaluation of the Teva goodwill and other intangible assets using market value approaches and valuation techniques as of June 30, 2008 and concluded that the Teva goodwill was not impaired, but the fair value of the Teva trademarks was lower than the carrying amount. Therefore, the Company recognized an impairment loss of \$14,900 on the Teva trademarks during the three months ended June 30, 2008. The method used to determine the fair value of the trademarks was a royalty relief method using discounted cash flows to determine future royalty revenue and expenses. The impairment loss is included in a separate line item within income from operations for the nine months ended September 30, 2008, and as a part of the Teva reportable segment. The determination of fair value involves significant judgment and estimates, including forecasted revenues, discount rates, market multiples, royalty rates and probability assessments, among others. Accordingly, changes to such judgments and estimates could result in impairments in future periods. There were no triggering events during the three months ended September 30, 2008 that would require management to accelerate its year-end impairment testing. As of September 30, 2008, the Company had \$11,929 and \$20,800 of Teva related goodwill and trademarks, respectively.

(12) Commitments and Contingencies

As disclosed in the Company's Annual Report on Form 10-K/A for the year ended December 31, 2006, the Company has certain tax obligations to authorities in China for one of the Company's foreign subsidiaries, Holbrook Limited, a Hong Kong company. The Company has paid certain amounts against these obligations and has also negotiated certain reductions of previously accrued amounts. In accordance with SFAS No. 5,

Accounting for Contingencies, as of September 30, 2008, management has determined the remaining liability for such matters to be approximately \$1,600, and has accrued this amount in current liabilities. The remaining liability may continue to change in future periods as a result of negotiations with the taxing authorities and the accrual of interest charges that may continue to be incurred through settlement. Because these matters relate in part to employment related tax matters, there is a level of subjectivity utilized in the interpretation of the application of tax and employment related laws and regulations. Accordingly, the amounts as ultimately negotiated and settled may differ from the Company's estimates.

In September 2008, the Company entered into a pilot services agreement whereby a third party is providing the Company with selling services. In connection with this agreement, the Company has guaranteed the third party's obligations to a merchant services provider. The Company may terminate this guarantee upon thirty days written notice to the merchant services

Table of Contents

**DECKERS OUTDOOR CORPORATION
AND SUBSIDIARIES**

Notes to Condensed Consolidated Financial Statements
(Unaudited)
(amount in thousands, except share quantity and per share data)

provider. The agreement does not provide for a maximum payout; however, management believes the likelihood of any payments under this guarantee is remote and would have an immaterial effect on the condensed consolidated financial statements.

The Company is currently involved in various legal claims arising from the ordinary course of its business. Management does not believe that the disposition of these matters will have a material effect on the Company's consolidated financial position or results of operations. The Company indemnifies its licensees, distributors and certain promotional partners in connection with claims alleging use of the Company's licensed intellectual property. The terms of the agreements range up to five years initially and do not provide for a limitation on the maximum potential future payments. Management believes the likelihood of any payments is remote and would be immaterial. The Company is not currently involved in any indemnification matters in regards to its intellectual property.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

The matters discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this report that are not historical are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We sometimes use words such as anticipate, believe, continue, estimate, expect, intend, may, plan, project, will and similar expressions, as they relate to us, our management and our industry, to identify forward-looking statements. Forward-looking statements relate to our expectations, beliefs, plans, strategies, prospects, future performance, anticipated trends and other future events. Specifically, this report and the information incorporated by reference in this report contain forward-looking statements relating to, among other things:

- our business, growth, operating and financing strategies;
- our product mix;
- the success of new products;
- the impact of seasonality and weather on our operations;
- expectations regarding our net sales and earnings growth;
- expectations regarding our liquidity and market and economic conditions;
- our future financing plans; and
- trends affecting our financial condition or results of operations.

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

We have based our forward-looking statements largely on our current expectations and projections about future events and financial trends affecting our business. Actual results may differ materially. Some of the risks, uncertainties and assumptions that may cause actual results to differ from these forward-looking statements are described in our Annual Report for the year ended December 31, 2007 on Form 10-K under Item 1A. *Risk Factors* and in this Quarterly Report on Form 10-Q under Item 1A. *Risk Factors*. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this report and the information incorporated by reference in this report might not happen.

You should read this report completely as well as the documents that we file as exhibits to this report and the documents that we incorporate by reference in this report, with the understanding that our future results may be materially different from what we expect. We qualify all of our forward-looking statements by these cautionary statements and we assume no obligation to update such forward-looking statements publicly for any reason.

The Deckers, UGG, Teva, Simple, and TSUBO families of related marks, images and symbols are our trademarks and intellectual property. Other trademarks, trade names and service marks appearing in this report are the property of their respective holders. References to Deckers, we, us, our, or similar terms refer to Deckers Outdoor Corporation together with its consolidated subsidiaries. Unless otherwise specifically indicated, all dollar amounts herein are expressed in thousands, except for share quantity, per share data, and weighted-average wholesale prices per pair.

Overview

We are a leading designer, producer and brand manager of innovative, high-quality footwear and accessories and the category creator in the luxury sheepskin, sport sandal and sustainable footwear segments. We market our products primarily under four proprietary brands:

- UGG®: Authentic luxury sheepskin boots and a full line of luxury and comfort footwear and accessories;
- Teva®: High performance sport shoes and rugged outdoor footwear and accessories;
- Simple®: Innovative sustainable-lifestyle footwear and accessories; and

Table of Contents

- TSUBO®: High-end casual footwear that incorporates style, function and maximum comfort.

We sell our brands through our quality domestic retailers and international distributors and directly to our end-user consumers through our eCommerce business and our retail stores. We sell our footwear in both the domestic market and in international markets. Independent third parties manufacture all of our products.

Our business has been impacted by several important trends affecting our end markets:

- Recent changes in U.S. and global economic conditions have adversely impacted businesses generally; some of our customers may be adversely affected, which in turn may adversely impact our financial results.
- The markets for casual, outdoor and athletic footwear have grown significantly during the last decade. We believe this growth is a result of the trend toward casual dress in the workplace, increasingly active outdoor lifestyles and a growing emphasis on comfort.
- Consumers are more often seeking footwear designed to address a broader array of activities with the same quality, comfort and high performance attributes they have come to expect from traditional athletic footwear.
- Our customers have narrowed their footwear product breadth, focusing on brands with a rich heritage and authenticity as market category creators and leaders.
- Consumers have become increasingly focused on luxury and comfort, seeking out products and brands that are fashionable while still comfortable.
- There is an emerging sustainable lifestyle movement happening all around the world. Consumers are demanding that brands and companies take a more responsible approach when it comes to protecting the environment.

By emphasizing our brands' images and our focus on comfort, performance and authenticity, we believe we can maintain a loyal consumer following that is less susceptible to fluctuations caused by changing fashions and changes in consumer preferences.

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

Below is an overview of the various components of our business, including some of the important factors that affect each business and some of our strategies for growing each business.

UGG Brand Overview

The UGG brand has become a well-known brand throughout the country as well as internationally. Over the past few years, our UGG brand has received increased media exposure including increased print media in national ads and cooperative advertising with our customers, which has contributed to broader public awareness of the UGG brand and significantly increased demand for the collection. We believe that the increased media focus and demand for UGG products were driven by the following:

- consumer brand loyalty, due to the luxury and comfort of UGG brand footwear,
- increased marketing in high-end magazines,
- successful targeting of high-end distribution,
- adoption by high-profile film and television celebrities as a favored footwear brand,
- increased media attention that has enabled us to introduce the brand to consumers much faster than we would have otherwise been able to,
- increased exposure to the brand driven by our concept stores which showcase all of our product offerings,
- continued geographic expansion across the U.S. and internationally, and

Table of Contents

- continued innovation of new product categories and styles.

We believe the luxury and comfort features of UGG brand products will continue to drive long-term consumer demand. Recognizing that there is a significant fashion element to UGG brand footwear and that footwear fashions fluctuate, our strategy seeks to prolong the longevity of the brand by offering a broader product line suitable for wear in a variety of climates and occasions and by limiting distribution to selected higher-end retailers. As part of this strategy we have increased our product offering, including a growing spring line, an expanded men's line, as well as a fall line that consists of a range of luxurious collections for both genders. These collections include: new fashion collections, a variety of casual comfort collections, cold weather offerings, as well as our Classic, Ultra, Ultimate and Slippers collections.

UGG brand's wholesale net sales increased 56.3% for the third quarter of 2008 and 71.3% for the nine months ended September 30, 2008 and UGG brand's net sales including wholesale, eCommerce and retail store sales increased by approximately 57.1% for the third quarter of 2008 and 73.1% for the nine months ended September 30, 2008, compared to the same periods in 2007. Nevertheless, we cannot assure investors that UGG brand sales will continue to grow at their recent pace or that revenue from UGG products will not at some point decline.

Teva Brand Overview

We continue to see a significant shift in consumer preferences and lifestyles to include more outdoor recreational activities. Because of our long history with outdoor footwear, as well as our renewed commitment to performance and lifestyle product innovation, the Teva brand has remained popular with outdoor athletes and enthusiasts, and is poised to capture new outdoor consumers entering the market. Our spring and fall 2009 product lines include a mix of core performance product evolutions and new lifestyle product introductions. Beginning with the introduction of our first fully complete closed-toe footwear collection in fall 2008, we have begun to reduce our reliance on sandal sales and optimal spring weather.

We intend to continue to explore opportunities to broaden the Teva brand's distribution with quality, image-enhancing retailers both within and beyond the core outdoor specialty and sporting goods channels. Through effective channel management and product line segmentation, we plan to expand into new distribution channels without diluting our outdoor heritage and our appeal to outdoor enthusiasts. Through appropriate channel product line expansion, we plan to broaden our product offerings to meet the performance and lifestyle needs of today's outdoor consumer. However, we cannot assure investors that these efforts will be successful.

Wholesale net sales of Teva products increased by 1.9% for the third quarter of 2008 and 0.7% for the nine months ended September 20, 2008, compared to the same periods in 2007. Net sales of Teva products including wholesale, eCommerce and retail store sales were flat for both the three and nine months ended September 30, 2008 compared to the same periods in 2007. We believe that Teva has more competition than our other brands, and that as a result, a slow economy curtailed Teva's growth more than our other brands during this period.

Because of the lower than expected growth rates, we conducted an interim impairment evaluation of the Teva goodwill and other intangible assets using market value approaches and valuation techniques as of June 30, 2008 and concluded that the Teva goodwill was not impaired, but the fair value of the Teva trademarks was lower than the carrying amount. Therefore, we recognized an impairment loss of \$14,900 on the Teva trademarks during the three months ended June 30, 2008, which is included as a separate line item in our condensed consolidated statement of income for the nine months ended September 30, 2008. See Note 11, Goodwill and Other Intangible Assets, to the condensed consolidated

financial statements.

Simple Brand Overview

The Simple brand is committed to innovation and bringing sustainable products to the market, growing the brand's business while at the same time bringing environmental awareness and creating meaningful, environmentally friendly products for a global market. The Simple brand is a leader in sustainable footwear and accessories. We feel that how we make Simple products is just as important as why we make them. That means our goal is to find more sustainable and innovative ways of doing business. We are committed to our goal of making Simple products 100% sustainable, thus minimizing the ecological footprint left on the planet. Green Toe®, a collection of sustainable footwear, represents a revolutionary shift in thinking about footwear by building a shoe from the inside out using sustainable materials and processes.

The progress in Green Toe has influenced the rest of the Simple product line, which has led to the development of additional product platforms, including ecoSNEAKS and PlanetWalkers®. These product collections also use sustainable materials such as water-based cements, organic cotton, British Leather Consortium (BLC) and International Standards Organization (ISO) 14001 leathers, hemp, and outsoles made from recycled car tires. We promote our Simple brand by emphasizing that we make fun, casual, comfortable and sustainable footwear. Our goal is to create a dialogue with the consumer through all communication vehicles and to

Table of Contents

show people that sustainability is an emerging lifestyle for everyone, not just environmentally conscious individuals. Our print advertising campaigns include national publications and alternative weekly publications in select cities around the world. Our online advertising campaign reaches consumers through websites that focus on sustainability as well as popular culture. Additionally, we sponsor environmental-themed concerts, film festivals and green expos to showcase and tell the sustainable lifestyle brand story.

For the three and nine months ended September 30, 2008, wholesale net sales of Simple products increased by approximately 15.9% and 35.0%, respectively, and net sales of Simple products including wholesale, eCommerce and retail store sales increased by approximately 16.6% and 36.9%, respectively, compared to the same periods in 2007. We have already exceeded 2007 annual sales of Simple products. However, we cannot assure investors that Simple brand sales will continue to grow at their recent pace or that revenue from Simple products will not at some point decline.

TSUBO Brand Overview

In May 2008, we acquired 100% of the ownership interest of TSUBO, LLC (TSUBO). TSUBO, meaning pressure point in Japanese, was a company co-founded by British designer Nick O Rorke in 1998. The TSUBO brand was marketed as a high-end casual footwear company with products for men and women. The brand is the synthesis of ergonomics and style, with a full line of sport and dress casuals, boots, sandals and heels constructed to provide consumers with contemporary footwear that incorporates style, function and maximum comfort. TSUBO products are sold throughout the United States primarily at department stores and independent shoe stores, as well as in Canada, France, Denmark, Slovenia, Israel, Japan, Australia, and New Zealand.

We believe that the TSUBO brand represents an ideal complement to our portfolio of lifestyle brands. The TSUBO brand's target consumer, product selection, industry niche and relative under-penetration in the marketplace make it a good fit for our business model. In addition, the TSUBO brand's commitment to quality distribution and its unique performance comfort platform allow us to develop a compelling brand story for the global marketplace. We intend to leverage our existing design, marketing and distribution capabilities to grow the TSUBO brand into a meaningful business over the next few years, consistent with our mission to build niche brands into global market leaders. Nevertheless, we cannot assure investors that our efforts will be successful.

eCommerce Overview

Our eCommerce business, which sells all of our brands, enables us to meet the growing demand for these products, to sell the products at retail prices and to provide us with significant incremental operating income. In recent years, our eCommerce business has had significant revenue growth, much of which occurred as the UGG brand gained popularity and as consumers have continued to increase usage of the internet for footwear and other purchases. For the three and nine months ended September 30, 2008, net sales of the eCommerce business increased by approximately 36.0% and 51.3%, respectively, compared to the same periods in 2007.

Our eCommerce business consists of internet and catalog sales. Managing our internet business requires us to focus on generating internet traffic to our websites, to effectively convert website visits into orders, and to maximize average order sizes. We plan to continue to grow our internet business through improved website features and performance, increased marketing and international websites. Overall, our eCommerce business benefits from the strength of our brands and, as we grow our brands over time, we expect this division to continue to be an important segment of

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

our business. Nevertheless, we cannot assure investors that eCommerce sales will continue to grow at their recent pace or that revenue from our eCommerce business will not at some point decline.

Retail Stores Overview

Based upon the success of our existing concept stores in Chicago and the SoHo area of New York City, we opened our first west coast UGG brand concept store in August 2008 in San Francisco near Union Square. We plan to open our second New York City UGG brand concept store near Lincoln Square as well as our sixth retail outlet store in New Jersey in November 2008. In the United Kingdom, we plan to open two Deckers owned UGG brand stores in London in the fourth quarter of 2008.

In July 2008, we entered into a joint venture agreement with an affiliate of Stella International Holdings Limited for the opening of retail stores and wholesale distribution for the UGG brand in China. Initial plans call for the opening of one new store in Beijing, China in 2008. The joint venture is owned 51% by Deckers and 49% by Stella International. The total initial investment in the joint venture is \$1,000 contributed by both parties in proportion to their respective ownership in the joint venture. The estimated total investment by Deckers and Stella International, including contributed capital and loans, for the joint venture is expected to be approximately \$5,000.

Our retail stores enable us to directly impact our customers' experience, meet the growing demand for these products, sell the products at retail prices and provide us with incremental annual operating income. Net sales of our retail store business increased 145.4%, 143.2% and 92.3% in the first, second, and third quarters of 2008, respectively, compared to the same periods in 2007. For

Table of Contents

those stores that were open during the first, second, and third quarters of last year, same store sales grew by 46.1%, 59.4% and 32.7%, respectively, when compared to the same period last year. Nevertheless, we cannot assure investors that retail store sales will continue to grow at their recent pace or that revenue from our retail store business will not at some point decline.

Seasonality

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

Our business is seasonal, with the highest percentage of UGG brand net sales occurring in the third and fourth quarters of each year and the highest percentage of Teva brand net sales occurring in the first and second quarters. To date, the Simple and TSUBO brands have not had a seasonal impact on the Company.

	First Quarter	2008 Second Quarter	Third Quarter	
Net sales	\$ 97,535	\$ 91,116	\$ 197,288	
Income (loss) from operations*	\$ 17,060	\$ (6,944)	\$ 43,081	

	First Quarter	2007 Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$ 72,575	\$ 52,730	\$ 129,381	\$ 194,243
Income from operations	\$ 15,072	\$ 2,864	\$ 30,660	\$ 56,957

	First Quarter	2006 Second Quarter	Third Quarter	Fourth Quarter
Net sales	\$ 56,004	\$ 41,721	\$ 82,322	\$ 124,376
Income from operations**	\$ 8,823	\$ 3,913	\$ 17,191	\$ 21,515

* Included in loss from operations in the second quarter of 2008 is a \$14,900 impairment loss on our Teva trademarks.

** Included in income from operations in the fourth quarter of 2006 is a \$15,300 impairment loss on our Teva trademarks.

Due to the dramatic growth in the UGG brand in recent years, net sales in the second half of the year have exceeded that for the first half of the year. Given our expectations for each of our brands in 2008, we currently expect this trend to continue. Nonetheless, actual results could differ materially depending upon consumer preferences, availability of product, competition and our customers continuing to carry and promote our various product lines, among other risks and uncertainties. See Item 1A. Risk Factors.

Table of Contents**Results of Operations**

The following table sets forth certain operating data for the periods indicated.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007

Three Months Ended September 30, 2008 Compared to Three Months Ended September 30, 2007

Overview. For the three months ended September 30, 2008, we had net sales of \$197,288 and income from operations of \$43,081, compared to net sales of \$129,381 and income from operations of \$30,660 for the three months ended September 30, 2007. The increase in net sales was primarily due to an increase in UGG product sales. The increase in income from operations resulted primarily from the increase in net sales, partially offset by a lower gross margin and higher selling, general and administrative expenses.

Net Sales. Net sales increased by \$67,907, or 52.5%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. This increase was primarily driven by strong sales for the UGG brand. In addition, our weighted-average wholesale selling price per pair increased 15.9% to \$54.92 for the three months ended September 30, 2008 from \$47.38 for the three months ended September 30, 2007, resulting primarily from higher UGG sales, which generally carry a higher average selling price along with an increase in average selling price, in part, to offset the anticipated increase in the cost of materials. During the quarter, we experienced increases in the number of pairs sold of our UGG, Simple and TSUBO brands, partially offset by a decrease in the number of pairs sold of our Teva brand, resulting in a 31.7% overall increase in the volume of footwear sold to approximately 3.5 million pairs for the three months ended September 30, 2008 compared to approximately 2.6 million pairs for the three months ended September 30, 2007.

Wholesale net sales of our UGG brand increased by \$59,534, or 56.3%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007, primarily due to an increase in the total number of pairs sold both domestically and internationally as well as an increase in the weighted-average wholesale selling price per pair.

Table of Contents

Wholesale net sales of our Teva brand increased by \$180, or 1.9%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007, primarily due to an increase in the weighted-average wholesale selling price per pair, partially offset by a decrease in the number of pairs sold.

Wholesale net sales of our Simple brand increased by \$590, or 15.9%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. Simple's performance was driven primarily by an increase in the weighted-average wholesale selling price per pair as well as an increase in the number of pairs sold.

Wholesale net sales of our TSUBO brand, which we acquired in May 2008, were \$2,200 for the three months ended September 30, 2008.

Net sales of our eCommerce business increased by \$2,807, or 36.0%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. The increase in net sales included an increase in UGG brand eCommerce sales of \$2,879, or 52.4%, a decrease in Teva brand eCommerce sales of \$226, or 13.2%, an increase in Simple brand eCommerce sales of \$127, or 22.0%, and TSUBO eCommerce sales of \$27.

Net sales of our retail store business increased by \$2,596, or 92.3%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. The increase in net sales included increases in sales of UGG products of \$2,536, or 98.8%, Teva products of \$41, or 38.3%, and Simple products of \$19, or 13.6%. The increase in UGG sales was partially due to the addition of two new UGG brand concept stores opened since September 30, 2007. However, we cannot assure investors that retail store sales will continue to grow at their recent pace.

International sales, which are included in the segment sales above, for all of our products combined increased by \$20,810, or 146.7%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007, representing 17.7% of net sales for the three months ended September 30, 2008 compared to 11.0% of net sales for the three months ended September 30, 2007. The majority of the international sales growth was from the UGG brand in each of our international markets, led by the European region.

Gross Profit. Gross profit increased by \$26,625, or 45.3%, for the three months ended September 30, 2008, compared to the three months ended September 30, 2007. As a percentage of net sales, gross margin decreased to 43.3% for the three months ended September 30, 2008, compared to 45.4% for the three months ended September 30, 2007, primarily due to material cost increases and a higher percentage of international sales for the UGG brand, which has a lower average gross margin than domestic sales. These margin decreases were partially offset by an increase in Simple brand gross margins due primarily to the increase in the weighted-average wholesale selling price per pair. Our gross margins fluctuate based on several factors and we expect our gross margin to decrease for the full year of 2008 from 2007 to approximately 45%.

Selling, General and Administrative Expenses. Selling, general and administrative expenses, or SG&A, increased by \$14,204, or 50.6%, for the three months ended September 30, 2008 compared to the three months ended

September 30, 2007. As a percentage of net sales, SG&A decreased slightly to 21.4% for the three months ended September 30, 2008 compared to 21.7% for the three months ended September 30, 2007. The increase in SG&A in absolute dollars resulted primarily from an increase in personnel costs including additional stock compensation related to our long-term incentive plan, additional costs related to our expanded distribution center, an increase in our bad debt reserve due to higher credit risk in the current economic environment, and higher sales and marketing variable costs related to the increase in sales and three new retail stores that were not open during the full third quarter of 2007.

Income from Operations. Income from operations increased by \$12,421, or 40.5%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. This increase is due to the increase in net sales, partially offset by the lower gross margin and higher selling, general and administrative expenses.

Income from operations of UGG brand wholesale increased by \$19,616, or 46.1%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. The increase was primarily the result of the higher sales volumes, partially offset by lower gross margins and increased bad debt reserves, divisional sales expenses, commissions and research and development expenses.

Income from operations of Teva brand wholesale decreased by \$71, or 13.2%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. This decrease resulted primarily from lower gross margins and increased divisional sales and research and development expenses, partially offset by a decrease in marketing expenses and an increase in net sales.

Table of Contents

Loss from operations of Simple brand wholesale decreased by \$24, or 6.1%, for the three months ended September 30, 2008 compared to the loss during the three months ended September 30, 2007. This improvement in performance was primarily due to higher sales and gross margins, partially offset by higher marketing, divisional sales and research and development expenses.

Loss from operations of TSUBO brand wholesale, which we acquired in May 2008, was \$278 for the three months ended September 30, 2008.

Income from operations of our eCommerce business increased by \$663, or 29.5%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. This was primarily due to the increase in net sales, partially offset by higher operating costs.

Loss from operations of our retail store business increased by \$657 for the three months ended September 30, 2008 compared to the loss during the three months ended September 30, 2007. This was primarily due to higher operating costs associated with the new retail stores that were not open during the full third quarter of 2007, partially offset by the increase in net sales.

Unallocated overhead costs increased by \$6,876, or 48.3%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007, resulting primarily from higher corporate payroll costs, including share-based compensation, and higher distribution center costs related to our additional space we added in December 2007.

Other (Income) Expense, Net. Interest income decreased by \$396, or 46.5%, for the three months ended September 30, 2008, compared to the three months ended September 30, 2007. The decrease resulted primarily from lower market interest rates. Interest expense and other, net, decreased by \$173, or 83.6%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. This was primarily due to a decrease in interest and penalties expenses related to certain tax matters in the Far East.

Income Taxes. For the three months ended September 30, 2008, income tax expense was \$17,445, representing an effective income tax rate of 40.1%. For the three months ended September 30, 2007, income tax expense was \$11,974, representing an effective income tax rate of 38.3%. The increase in the effective tax rate was primarily due to the offshore allocation of a portion of the intellectual property rights of TSUBO, which required a one-time buy-in payment of \$800 that increased U.S. based income as a percentage of worldwide income. The effective tax rate is subject to ongoing review and evaluation by management and can vary from quarter to quarter.

Minority Interest. Minority interest in our joint venture with Stella International, which was formed in July 2008, was \$43 for the three months ended September 30, 2008.

Net Income. Our net income increased by \$6,684, or 34.6%, for the three months ended September 30, 2008 compared to the three months ended September 30, 2007, as a result of the items discussed above. Our diluted earnings per share increased by 34.0% to \$1.97 for the three months ended September 30, 2008 compared to \$1.47 in the same period of 2007, primarily as a result of the increase in net income.

Nine Months Ended September 30, 2008 Compared to Nine Months Ended September 30, 2007

Overview. For the nine months ended September 30, 2008, we had net sales of \$385,939 and income from operations of \$53,197, compared to net sales of \$254,686 and income from operations of \$48,596 for the nine months ended September 30, 2007. The increase in net sales was primarily due to higher UGG brand net sales. Income from operations increased primarily as a result of the increase in net sales, partially offset by a lower gross margin and higher selling, general and administrative expenses as well as an impairment loss recognized during the second quarter of 2008.

Net Sales. Net sales increased by \$131,253, or 51.5%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. This increase was primarily driven by strong sales of our UGG brand. In addition, our weighted-average wholesale selling price per pair increased 23.4% to \$36.92 for the nine months ended September 30, 2008 from \$29.93 for the nine months ended September 30, 2007, resulting primarily from higher UGG sales, which generally carry a higher average selling price and which had an increase in average selling price in part to offset the anticipated increase in the cost of materials. We also experienced increases in the number of pairs sold of our UGG, Simple and TSUBO brands, partially offset by a decrease in the number of pairs sold of our Teva brand, resulting in a 22.0% overall increase in the volume of footwear sold to approximately 9.7 million pairs for the nine months ended September 30, 2008 compared to approximately 7.9 million pairs for the nine months ended September 30, 2007.

Wholesale net sales of our UGG brand increased by \$106,098, or 71.3%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007, primarily due to an increase in the number of pairs sold as well as an increased weighted-average wholesale selling price per pair.

Table of Contents

Wholesale net sales of our Teva brand increased by \$467, or 0.7%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007, primarily due to an increase in the weighted-average wholesale selling price per pair, partially offset by a decrease in the number of pairs sold.

Wholesale net sales of our Simple brand increased by \$3,218, or 35.0%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. Simple's performance was driven primarily by an increase in the weighted-average wholesale selling price per pair as well as an increase in the number of pairs sold.

Wholesale net sales of our TSUBO brand were \$2,853 for the nine months ended September 30, 2008.

Net sales of our eCommerce business increased by \$11,072, or 51.3%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. The increase included an increase in sales of UGG products of \$10,751, or 70.7%, a decrease in sales of Teva products of \$426, or 8.6%, an increase in sales of Simple products of \$698, or 49.8%, and sales of TSUBO products of \$49.

Net sales of our retail store business increased by \$7,545, or 121.0%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. The increase included increases in UGG product sales of \$7,327, or 127.3%, Teva product sales of \$121, or 56.3%, and Simple product sales of \$97, or 36.3%. The large increase in UGG brand sales is partially attributable to our two new UGG brand concept stores opened since September 30, 2007. However, we cannot assure investors that retail store sales will continue to grow at their recent pace.

International sales, which are included in the segment sales above, for all of our products combined increased by \$42,067 or 91.9%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007, representing 22.8% of net sales for the nine months ended September 30, 2008 compared to 18.0% of net sales for the nine months ended September 30, 2007. The majority of the international sales growth was due to increases in UGG, Teva and Simple brand sales with the largest increase coming from UGG brand sales, led by the European region.

Gross Profit. Gross profit increased by \$54,007, or 47.4%, for the nine months ended September 30, 2008, compared to the nine months ended September 30, 2007. As a percentage of net sales, gross margin was 43.5% for the nine months ended September 30, 2008, compared to 44.7% for the nine months ended September 30, 2007. The decline in our gross margin was primarily due to increased costs associated with our UGG brand and an increased percentage of international UGG brand sales, which carry a lower gross margin. Our gross margins fluctuate based on several factors and we expect our gross margin to decrease for the full year of 2008 over 2007 due to the increased costs discussed above.

Selling, General and Administrative Expenses. Selling, general and administrative expenses, or SG&A, increased by \$34,506, or 52.9%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. As a percentage of net sales, SG&A increased slightly to 25.8% for the nine months ended September 30, 2008

compared to 25.6% for the nine months ended September 30, 2007. The increase in SG&A in absolute dollars resulted from:

- an increase in personnel costs, including additional stock compensation related to our long-term incentive plan,
- additional costs related to our expanded distribution center,
- an increase in our bad debt reserve due to higher credit risk in the current economic environment,
- higher sales and marketing variable costs related to the increase in sales and three new retail stores that were not open during the full nine months of last year,
- our portion of the production costs for the documentary IMAX film, *Grand Canyon Adventure, River at Risk*, which was sponsored by Teva and was released in IMAX theaters in March 2008,
- and increased legal costs due primarily to increased efforts to defend and protect our intellectual property.

Impairment Loss. As of June 30, 2008, our inability to reach our 2008 Teva brand period to date sales targets along with a reduced long-term forecast for Teva brand sales growth were indicators that the Teva goodwill and other intangible assets were possibly impaired. As a result, we conducted an interim impairment evaluation of the Teva goodwill and other intangible assets using market value approaches and valuation techniques as of June 30, 2008 and concluded that the Teva goodwill was not impaired, but the fair value of the Teva trademarks was lower than the carrying amount. Therefore, we recognized an impairment charge of \$14,900 on the Teva trademarks during the three months ended June 30, 2008, which is reflected in our condensed consolidated statement of income for the nine months ended September 30, 2008.

Table of Contents

Income from Operations. Income from operations increased by \$4,601, or 9.5%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. This increase was due primarily to the increase in net sales, partially offset by the lower gross margin, higher selling, general and administrative expenses and the impairment loss during the second quarter of 2008.

Income from operations of UGG wholesale increased by \$36,884, or 63.1%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. The increase was primarily the result of the higher sales volumes, partially offset by lower gross margins and increased divisional sales expenses, bad debt reserves, marketing expenses, commissions and research and development expenses.

Income from operations of Teva wholesale decreased by \$18,173, or 98.8%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. This decrease resulted primarily from the \$14,900 impairment loss on our Teva trademarks in the second quarter of 2008, as well as lower gross margins and higher divisional expenses including our portion of the production costs for the documentary IMAX film, *Grand Canyon Adventure, River at Risk*.

Loss from operations of Simple wholesale was \$204 for the nine months ended September 30, 2008 compared to the loss of \$1,258 for the nine months ended September 30, 2007. This improvement in performance was primarily due to higher sales and gross margins due to an increase in the weighted-average wholesale selling price per pair, partially offset by higher marketing, divisional sales and product design expenses.

Loss from operations of TSUBO wholesale was \$338 for the nine months ended September 30, 2008.

Income from operations of our eCommerce business increased by \$3,100, or 47.6%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. This was primarily due to the increase in net sales, partially offset by lower gross margins and increased operating costs and marketing expenses.

Loss from operations of our retail store business increased by \$274, or 53.2%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007. This was primarily due to the higher operating costs associated with our new retail stores that were not open during the full nine months of last year, partially offset by higher retail sales.

Unallocated overhead costs increased by \$17,652, or 53.5%, for the nine months ended September 30, 2008 compared to the nine months ended September 30, 2007, resulting primarily from higher corporate payroll costs, including share-based compensation, and additional costs related to our expanded distribution center.

Other (Income) Expense, Net. Interest income decreased by \$997, or 28.5%, for the nine months ended September 30, 2008, compared to the nine months ended September 30, 2007. The decrease resulted primarily from lower market interest rates on higher average cash and cash equivalents and investment balances during the nine months ended

September 30, 2008 versus the same period of 2007. Other income, net of interest expense, was \$152 for the nine months ended September 30, 2008 compared to interest expense and other, net, of \$781 for the nine months ended September 30, 2007. This was primarily due to the reversal of certain penalties during the nine months ended September 30, 2008 that were previously accrued related to certain tax matters in the Far East, because authorities in China did not assess the related estimated penalties when a portion of the tax obligations was paid and settled, as well as a decrease in interest expense related to those obligations.

Income Taxes. For the nine months ended September 30, 2008, income tax expense was \$22,325, representing an effective income tax rate of 40.0%. For the nine months ended September 30, 2007, income tax expense was \$20,271 representing an effective income tax rate of 39.5%. The increase in the effective tax rate was primarily due to the offshore allocation of a portion of the intellectual property rights of TSUBO, which required a one-time buy-in payment of \$800 that increased U.S. based estimated annual income as a percentage of worldwide income. The effective tax rate is subject to ongoing review and evaluation by management and can vary from quarter to quarter.

Minority Interest. Minority interest in our joint venture with Stella International, which was formed in July 2008, was \$43 for the nine months ended September 30, 2008.

Net Income. Our net income increased by \$2,440, or 7.9%, as a result of the items discussed above. Our diluted earnings per share increased 7.2% to \$2.54 for the nine months ended September 30, 2008 compared to \$2.37 in the same period of 2007, primarily as a result of the increase in net income.

Off-Balance Sheet Arrangements

We have several types of off-balance sheet arrangements. Most of these are contractual obligations and one is unrecognized tax benefits related to uncertain tax positions taken in our income tax return that would, if recognized, impact the effective tax rate. See Contractual Obligations below.

Table of Contents

Liquidity and Capital Resources

We finance our working capital and operating needs using a combination of our cash and cash equivalents balances, short-term investments, cash generated from operations and, as needed, the credit available under our revolving credit facility. In an economic recession or under other adverse economic conditions, we may be unable to realize a return on our cash and cash equivalents and short-term investments, secure additional credit on favorable terms, renew our existing credit or access our existing line of credit. Such failures may impact our working capital reserves and have a material adverse effect on our business. As of September 30, 2008, we held \$2,250 of auction rate securities that experienced failed auctions during the nine months then ended. Pursuant to a settlement agreement entered into between the Financial Industry Regulatory Authority and our investment manager, our investment manager offered to purchase 100% of our auction rate securities at par value during September 2008. We accepted the settlement offer, and subsequently, on October 30, 2008, we sold our auction rate securities to our investment manager at par value.

Since the latter part of 2007, U.S. and foreign credit markets have experienced adverse conditions, including unusual volatility and a lack of secondary market liquidity, which conditions have presented, and continue to present, significant challenges to the investment markets and have limited the availability of short-term debt for working capital. While it is difficult to predict how long these adverse conditions will exist, these factors, if continuing, could adversely impact our future financial condition and our future results of operations.

The seasonality of our business requires us to build inventory levels in anticipation of the sales for the coming season. The UGG brand generally builds its inventories in the second and third quarters to support sales for the fall and winter selling seasons, which historically occur during the third and fourth quarters, whereas the Teva brand generally begins to build inventory levels beginning in the fourth quarter and first quarter in anticipation of the spring selling season that occurs in the first and second quarters.

Our cash flow cycle includes the purchase of these inventories, the subsequent sale of the inventories and the eventual collection of the resulting accounts receivables. As a result, our working capital requirements begin when we purchase the inventories and continue until we ultimately collect the resulting receivables. Given the seasonality of our UGG and Teva brands, our working capital requirements fluctuate significantly throughout the year. The cash required to fund these working capital fluctuations is generally provided using our internal cash flows. If necessary, we may borrow funds under our revolving credit facility.

Cash from Operating Activities. Net cash used in operating activities was \$81,023 and \$33,715 for the nine months ended September 30, 2008 and 2007, respectively. The increase in net cash used in operating activities was primarily due to a greater increase in inventory and accounts receivable in the first nine months of 2008 compared to the first nine months of 2007. The larger increase in inventory was primarily due to higher anticipated UGG sales in the fourth quarter of 2008 compared to the same period of 2007. The larger increase in accounts receivable was primarily due to higher sales in the third quarter of 2008 compared to the same period in 2007. These changes were partially offset by long-term liabilities and a greater increase in trade accounts payable in the first nine months of 2008 compared to the first nine months of 2007. The long-term liabilities are primarily attributable to deferred rent. The larger increase in trade accounts payable was primarily due to an increase in our inventory purchases and other expenses near the end of the period ended September 30, 2008 compared to September 30, 2007. Net working capital improved by \$42,097 to \$272,270 as of September 30, 2008 from \$230,173 as of December 31, 2007, primarily as a result of the higher inventory and accounts receivable balances. The increase in working capital was partially offset by the lower balance of short-term investments. The changes in working capital are due to our normal seasonality and timing of cash

receipts and cash payments.

Cash from Investing Activities. For the nine months ended September 30, 2008, net cash provided by investing activities was \$57,692, which was comprised primarily of net sales of short-term investments, partially offset by purchases of property and equipment and our acquisition of TSUBO, LLC. Our capital expenditures were primarily related to a new inventory pick module in our distribution center, leasehold improvements for new retail stores, and computer hardware and software. For the nine months ended September 30, 2007, net cash provided by investing activities was \$25,149, which was comprised primarily of net sales of short-term investments, partially offset by purchases of property and equipment. Our capital expenditures were primarily related to the build-out of new retail stores, the replacement and upgrading of certain computer equipment and new Simple and UGG brand trade show booths.

Cash from Financing Activities. For the nine months ended September 30, 2008, net cash provided by financing activities was \$3,885 compared to \$13,660 for the nine months ended September 30, 2007. For both periods, the net cash provided by financing activities primarily consisted of the excess tax benefits from stock-based compensation. The amount of excess tax benefits decreased significantly from the nine months ended September 30, 2007 due to the exercise of fewer stock options during the nine months ended September 30, 2008.

Table of Contents

Our working capital consists primarily of cash and cash equivalents, short-term investments, trade accounts receivable, inventories and a revolving credit facility. At September 30, 2008, working capital was \$272,270, including \$35,087 of cash and cash equivalents and \$32,857 of short-term investments. Trade accounts receivable increased by 56.4% to \$112,960 at September 30, 2008 from \$72,209 at December 31, 2007, primarily due to higher net sales in the latter half of the quarter ended September 30, 2008 compared to the latter half of the quarter ended December 31, 2007, and also due to normal seasonality. Accounts receivable turnover decreased to 8.2 times in the twelve months ended September 30, 2008 from 8.5 times in the twelve months ended December 31, 2007. The decrease was due primarily to higher sales at the end of the third quarter of 2008, for which the receivables were still outstanding at September 30, 2008.

Inventories increased 205.0% to \$157,933 at September 30, 2008 from \$51,776 at December 31, 2007, reflecting a \$106,908, \$1,985 and \$1,651 increase in UGG, TSUBO and Simple brand inventory, respectively, and a \$4,387 decrease in Teva brand inventory. Overall, inventory turnover was 3.5 times for the twelve months ended September 30, 2008 and 4.4 times for the twelve months ended December 31, 2007. The increases in inventory as of September 30, 2008 were largely due to normal seasonality and increased material costs in the third quarter of 2008.

Our revolving credit facility with Comerica Bank (the Facility) provides for a maximum availability of \$20,000. Up to \$10,000 of borrowings may be in the form of letters of credit. The Facility bears interest at the lender's prime rate (5.00% at September 30, 2008) or, at our option, at the London Interbank Offered Rate, or LIBOR, (3.93% at September 30, 2008) plus 1.0% to 2.5%, depending on our ratio of liabilities to earnings before interest, taxes, depreciation and amortization, and is secured by substantially all of our assets. The Facility includes annual commitment fees of \$60 per year and expires on June 1, 2010. At September 30, 2008, we had no outstanding borrowings under the Facility and outstanding letters of credit of \$680. As a result, \$19,320 was available under the Facility at September 30, 2008.

The agreements underlying the Facility contain certain financial covenants, currently including a limitation on aggregate annual lease payments of \$15,000, a quick ratio requirement of at least 0.90:1.00, a minimum profitability requirement of \$1,000 per fiscal quarter, a limitation on annual consolidated capital expenditures of \$28,000, a minimum tangible net worth requirement of \$37,000 commencing with the fiscal year ended December 31, 2004 plus 75% of consolidated net profit on a cumulative basis, and a requirement that our consolidated total liabilities to consolidated effective tangible net worth ratio be greater than 1.50:1.00. The agreements also contain a prohibition on the payment of dividends. At September 30, 2008, we were in compliance with all covenants and remain so as of the date of this report.

As of September 30, 2008, we had no material commitments for future capital expenditures but estimate that the remaining capital expenditures for 2008 will range from approximately \$9,000 to \$11,000. We anticipate those will include the build-out of new retail stores, the remaining costs of our new inventory pick module in our warehouse in Camarillo, California, the build-out of our international and corporate offices and miscellaneous computer hardware and software. The actual amount of capital expenditures for the remainder of 2008 may differ from this estimate, largely depending on any unforeseen needs to replace existing assets and the timing of expenditures.

We believe that internally generated funds, the available borrowings under our existing Facility, cash and cash equivalents, and short-term investments will provide sufficient liquidity to enable us to meet our current and foreseeable working capital requirements. However, risks and uncertainties that could impact our ability to maintain our cash position include our growth rate, the continued strength of our brands, our ability to respond to changes in consumer preferences, our ability to collect our receivables in a timely manner, our ability to effectively manage our inventories, the availability of short-term credit and market volatility, among others. Please refer to our Annual Report on Form 10-K under Item 1A. *Risk Factors* and this Quarterly Report on Form 10-Q under Item 1A. *Risk Factors* for a discussion of additional factors that may affect

Edgar Filing: DECKERS OUTDOOR CORP - Form 10-Q

our working capital position. Furthermore, we may require additional cash resources due to changed business conditions or other future developments, including any investments or acquisitions we may decide to pursue. If these sources are insufficient to satisfy our cash requirements, we may seek to sell debt securities or additional equity securities or to obtain a new facility or draw on our existing Facility. The sale of convertible debt securities or additional equity securities could result in additional dilution to our stockholders. The incurrence of indebtedness would result in incurring debt service obligations and could result in operating and financial covenants that would restrict our operations. In addition, there can be no assurance that any additional financing will be available on acceptable terms, if at all. We may, from time to time, evaluate acquisitions of other businesses or brands. As of September 30, 2008, there were no material binding understandings, commitments or agreements with respect to the acquisition of any other businesses.

Table of Contents

Contractual Obligations. The following table summarizes our off-balance sheet contractual obligations and unrecognized tax benefits at September 30, 2008, and the effects such obligations are expected to have on liquidity and cash flow in future periods.

	Total	Payments Due by Period			
		Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Operating lease obligations	\$ 71,241	\$ 10,801	\$ 22,343	\$ 17,316	\$ 20,781
Purchase orders	98,808	98,808			
Promotional expenses	1,300	325	650	325	
Unrecognized tax benefits	2,152		2,152		
Total	\$ 173,501	\$ 109,934	\$ 25,145	\$ 17,641	\$ 20,781

Our operating lease obligations consist primarily of building leases for our corporate offices, distribution centers and retail locations. Our outstanding purchase orders are primarily with our third party manufacturers. These are outstanding open orders and not minimum obligations; we have no minimum purchase requirement with any of our factories. Our promotional expenditures are due periodically through 2012. The unrecognized tax benefits are related to uncertain tax positions taken in our income tax return that would impact the effective tax rate, if recognized. In addition to the amounts in the table above, we have agreed to make loans to our joint venture with Stella International, should the need arise. The estimated total loans by Deckers and Stella International is expected to be approximately \$4,000 contributed by both parties in proportion to their respective ownership in the joint venture.

See Note 12, Commitments and Contingencies, to the condensed consolidated financial statements for a discussion of certain tax obligations to authorities in China for one of the Company's foreign subsidiaries.

Impact of Inflation

We believe that the rates of inflation during the three most recent fiscal years have not had a material impact on our net sales or income from operations.

Critical Accounting Policies and Estimates

Revenue Recognition. We recognize revenue when products are shipped and the customer takes title and assumes risk of loss, collection of relevant receivable is probable, persuasive evidence of an arrangement exists, and the sales price is fixed or determinable. Allowances for estimated returns, discounts, chargebacks, and bad debts are provided for when related revenue is recorded. Amounts billed for shipping and handling costs are recorded as a component of net sales, while the related costs paid to third-party shipping companies are recorded as a cost of sales. We present revenue net of taxes collected from customers and remitted to governmental authorities.

Use of Estimates. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosures about contingent liabilities and the reported amounts of net sales and expenses during the reporting period. Management bases these estimates and assumptions upon historical experience, existing known circumstances, authoritative accounting pronouncements and other factors that management believes to be reasonable. Management reasonably could use different estimates and assumptions, and changes in estimates and assumptions could occur from period to period, with the result in each case being a potential material change in the financial statement presentation of our financial condition or results of operations. We have historically been materially accurate in our estimates used for the reserves and allowances below. We believe that the estimates and assumptions below are among those most important to an understanding of our condensed consolidated financial statements contained in this report.

Allowance for Doubtful Accounts. We provide a reserve against trade accounts receivable for estimated losses that may result from customers' inability to pay. We determine the amount of the reserve by analyzing known uncollectible accounts, aged trade accounts receivables, economic conditions, historical experience, and the customers' credit-worthiness. Trade accounts receivable that are subsequently determined to be uncollectible are charged or written off against this reserve. The reserve includes specific reserves for accounts which are identified as potentially uncollectible, plus a non-specific reserve for the balance of accounts based on our historical loss experience with bad debts. Reserves have been established for all probable losses of this nature. The gross trade accounts receivable balance was \$121,973 and the allowance for doubtful accounts was \$2,097 at September 30, 2008, compared to gross trade accounts receivable of \$80,564 and the allowance for doubtful accounts of \$379 at December 31, 2007. The increase in the allowance for doubtful accounts at September 30, 2008 compared to December 31, 2007 was primarily due to downgrading the collectability of several accounts due to current economic conditions, which increased the reserve percentage applied to those accounts. Our use of different estimates and assumptions in the calculation of our allowance for doubtful accounts could produce

Table of Contents

different financial results. For example, a 1.0% increase in the rate used to estimate the reserve for the accounts we consider to have credit risk and are not specifically identified as uncollectible would increase the allowance for doubtful accounts at September 30, 2008 by approximately \$860.

Reserve for Sales Discounts. A significant portion of our domestic net sales and resulting trade accounts receivable reflects a discount that the customers may take, generally based upon meeting certain order, shipment, and payment timelines. We estimate the amount of the discounts that are available to be taken against the period-end trade accounts receivable, and we record a corresponding reserve for sales discounts. The reserve for sales discounts was \$2,989 at September 30, 2008 and \$3,218 at December 31, 2007. The decrease in the reserve for sales discounts at September 30, 2008 compared to December 31, 2007 was primarily due to the increase in international accounts receivable as a percentage of total accounts receivable, as international sales carry no term discounts. Our use of different estimates and assumptions could produce different financial results. For example, a 10% increase in the estimate of the percentage of accounts that will ultimately take their discount would increase the reserve for sales discounts at September 30, 2008 by approximately \$300.

Allowance for Estimated Returns. We record an allowance for anticipated future returns of goods shipped prior to period-end. In general, we accept returns for damaged or defective products but discourage returns for other reasons. We base the amount of the allowance on any approved customer requests for returns, historical returns experience and any recent events that could result in a change from historical returns rates, among other factors. The allowance for returns decreased to \$2,450 at September 30, 2008 from \$3,687 at December 31, 2007, primarily as a result of lower actual returns in the twelve months ended September 30, 2008 compared to the twelve months ended December 31, 2007. Our use of different estimates and assumptions could produce different financial results. For example, a 1.0% increase in the rate used to estimate the percentage of sales expected to ultimately be returned would increase the reserve for returns at September 30, 2008 by approximately \$1,260.

Allowance for Estimated Chargebacks. When our customers pay their invoices, they often take deductions for chargebacks against their invoices, which we seldom recover. Therefore, we record an allowance for the entire balance of chargebacks that are outstanding in our accounts receivable balance as of the end of each quarter, along with an estimated reserve for chargebacks that have not yet been taken against outstanding accounts receivable balances. This estimate is based on historical trends of the timing of chargebacks taken against invoices. The allowance for chargebacks was \$1,477 at September 30, 2008 and \$1,071 at December 31, 2007. The increase in the allowance was primarily due to the increase of trade accounts receivable at September 30, 2008 compared to December 31, 2007.

Inventory Write-Downs. Inventories are stated at lower of cost or market. We review the various items in inventory on a regular basis for excess, obsolete, and impaired inventory. In doing so, we write the inventory down to the lower of cost or estimated future net selling prices. At September 30, 2008, inventories were stated at \$157,933, net of inventory write-downs of \$1,737. At December 31, 2007, inventories were stated at \$51,776, net of inventory write-downs of \$2,029. The decrease in inventory write-downs at September 30, 2008 compared to December 31, 2007 was primarily due to the sale of inventory that had been previously written down at December 31, 2007. This

was partially offset by new inventory write-downs during the first nine months of 2008. Our use of different estimates and assumptions could produce different financial results. For example, a 10% decrease in estimated selling prices of our potentially obsolete inventory would increase the inventory write-down reserve at September 30, 2008 by approximately \$550.

Valuation of Goodwill, Intangible and Other Long-Lived Assets. Annually or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, we assess the impairment of goodwill, intangible and other long-lived assets on a separate asset basis based on assumptions and judgments regarding the carrying value of these assets individually. We test goodwill and nonamortizable intangible assets for impairment on an annual basis based on the fair value of the reporting unit for goodwill or the fair value of the assets for nonamortizable intangibles compared to their respective carrying value. We consider other long-lived assets to be impaired if we determine that the carrying value may not be recoverable. Among other considerations, we consider the following factors:

- the assets' ability to continue to generate income from operations and positive cash flow in future periods;
- our future plans regarding utilization of the assets;
- any changes in legal ownership of rights to the assets; and
- changes in consumer demand or acceptance of the related brand names, products or features associated with the assets.

Table of Contents

If we determine the assets to be impaired, we recognize an impairment loss equal to the amount by which the carrying value of the assets exceeds the estimated fair value of the assets. In addition, as it relates to long-lived assets, we base the useful lives and related amortization or depreciation expense on the estimate of the period that the assets will generate sales or otherwise be used by us.

As of December 31, 2007, we performed our annual impairment test of goodwill and nonamortizable intangible assets using market value approaches and valuation techniques and determined that there was no impairment of goodwill or intangible assets as of December 31, 2007. As of June 30, 2008, our inability to reach our 2008 Teva brand period to date sales targets along with a reduced long-term forecast for Teva brand sales growth were indicators that the Teva goodwill and other intangible assets were possibly impaired. As a result, we conducted an interim impairment evaluation of the Teva goodwill and other intangible assets using market value approaches and valuation techniques as of June 30, 2008 and concluded that the Teva goodwill was not impaired, but the fair value of the Teva trademarks was lower than the carrying amount. Therefore, we recognized an impairment loss of \$14,900 on the Teva trademarks during the three months ended June 30, 2008, which is reflected in our condensed consolidated statement of income for the nine months ended September 30, 2008. Our use of different estimates (including estimated royalty rates, discount rates, market multiples and future revenues, among others) and assumptions could produce different financial results. The annual impairment testing date is still December 31 of each year; however, management will perform an interim test of recoverability should facts and circumstances warrant. Such facts and circumstances could include further deterioration of general economic conditions, customers reducing orders in response to such conditions and increased competition. There were no triggering events during the three months ended September 30, 2008 that would require us to accelerate our year-end impairment testing. As of September 30, 2008, we had \$11,929 and \$20,800 of Teva related goodwill and trademarks, respectively. Further deterioration in general economic conditions or the retail environment could result in impairment of our goodwill and other intangible assets.

Recent Accounting Pronouncements

In September 2006, the FASB issued Statement No. 157 (SFAS 157), Fair Value Measurements. SFAS 157 standardizes the definition and approaches for fair value measurements of financial instruments for those standards which already permit or require the use of fair value. It does not require any new fair value measurements. SFAS 157 defines a hierarchy for valuation techniques and also requires additional disclosures. The provisions of SFAS 157 were effective for us as of January 1, 2008. The FASB has deferred the effective date of SFAS 157 only as it relates to fair value measurement requirements for nonfinancial assets and liabilities that are not measured at fair value on a recurring basis to fiscal years beginning after December 15, 2008. As permitted under SFAS 157, we have not applied SFAS 157 to our intangible assets. The adoption of this statement did not have a material effect on our condensed consolidated financial statements.

In February 2007, the FASB issued Statement No. 159 (SFAS 159), The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115. SFAS 159 provides companies the option to measure many financial instruments and certain other items at fair value. This provides companies the opportunity to mitigate volatility in earnings caused by measuring instruments differently without complex hedge accounting provisions. SFAS 159 was effective for us beginning January 1, 2008. The adoption of this statement did not have a material effect on our condensed consolidated financial statements.

In December 2007, the FASB issued Statement No. 141 (revised 2007) (SFAS 141R), Business Combinations. The objective of SFAS 141R is to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. SFAS 141R requires that all business combinations be accounted for by applying the acquisition method (previously referred to as the purchase method), and most identifiable assets, liabilities, noncontrolling interests, and goodwill acquired in business combinations to be recorded at full fair value. SFAS 141R also broadens the definition of a business and changes the treatment of direct acquisition-related costs from being included in the purchase price to instead being generally expensed if they are not costs associated with issuing debt or equity securities. SFAS 141R is effective for us beginning January 1, 2009, and will be applied prospectively to any new business combinations.

In December 2007, the FASB issued Statement No. 160 (SFAS 160), Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. The objective of SFAS 160 is to improve the relevance, comparability, and transparency of the financial information that a reporting entity provides in its consolidated financial statements by establishing accounting and reporting standards for noncontrolling interests in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 specifies that noncontrolling interests (referred to as minority interests prior to SFAS 160) be reported as a separate component of equity, not as a liability or other item outside of equity, which changes the accounting for transactions with noncontrolling interest holders. SFAS 160 is effective for us beginning January 1, 2009, and will be applied prospectively to all noncontrolling interests, including our current minority interest and any others that arose before that date.

In March 2008, the FASB issued Statement No. 161 (SFAS 161), Disclosures about Derivative Instruments and Hedging Activities an amendment of FASB Statement No. 133. The objective of SFAS 161 is to improve the transparency of financial reporting by requiring additional disclosures about an entity s derivative and hedging activities. This Statement is effective for us

Table of Contents

beginning January 1, 2009, with early application encouraged. This Statement encourages, but does not require, comparative disclosures for earlier periods at initial adoption. We will apply this Statement prospectively to any derivative and hedging activities entered into on or after the effective date.

In May 2008, the FASB issued Statement No. 162 (SFAS 162), The Hierarchy of Generally Accepted Accounting Principles. The objective of SFAS 162 is to identify the sources of generally accepted accounting principles and provide a framework, or hierarchy, for selecting the principles to be used in preparing U.S. GAAP financial statements for nongovernmental entities. This Statement is effective sixty days following the SEC's approval of the Public Company Accounting Oversight Board's related amendments to Auditing Standards Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles. We do not expect the adoption of this Statement to have a material effect on our condensed consolidated financial statements.

In October 2008, the FASB issued proposed FASB Staff Position (FSP) FAS 157-3, Determining Fair Value of a Financial Asset in a Market That Is Not Active. This FSP clarifies the application of Statement No. 157 in an inactive market and illustrates how an entity would determine fair value when the market for a financial asset is not active. The Staff Position is effective immediately and applies to prior periods for which financial statements have not been issued, including interim or annual periods ending on or before September 30, 2008. The adoption of this FSP did not have a material effect on our condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Derivative Instruments. Although we have used foreign currency hedges in the past, we currently do not utilize forward contracts or other derivative instruments to mitigate exposure to fluctuations in the foreign currency exchange rate as the majority of our purchases and sales for the foreseeable future will be denominated in U.S. currency.

Although our sales and inventory purchases are denominated in U.S. currency, our sales and inventory purchases may be impacted by fluctuations in the exchange rates between the U.S. dollar and the local currencies in the international markets where our products are sold or manufactured. If the U.S. dollar strengthens, it may result in increased pricing pressure on our distributors, which may have a negative impact on our net sales and gross margins. We are unable to estimate the amount of any impact on sales and gross margins attributed to pricing pressures caused by fluctuations in exchange rates.

Market Risk. Our market risk exposure with respect to financial instruments relates to changes in the prime rate in the U.S. and changes in LIBOR. Our revolving line of credit provides for interest on outstanding borrowings at rates tied to the prime rate, or at our election, to LIBOR. At September 30, 2008, we had no outstanding borrowings under the revolving line of credit. A 1.0% increase in interest rates on our current borrowings would have no impact on income before income taxes.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such terms are defined in Rules 13a-15(c) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of September 30, 2008.

Disclosure controls and procedures, no matter how well designed and implemented, can provide only reasonable assurance of achieving an entity's disclosure objectives. The likelihood of achieving such objectives is affected by limitations inherent in disclosure controls and procedures. These include the fact that human judgment in decision-making can be faulty and that breakdowns in internal control can occur because of human failures such as simple errors, mistakes or intentional circumvention of the established processes. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving our disclosure objectives.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the quarter ended September 30, 2008 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings.

We are involved from time to time in routine litigation arising in the ordinary course of business. Such routine matters, if decided adversely to us, would not, in the opinion of management, have a material adverse effect on our financial condition or results of operations. Additionally, we have many pending disputes in the U.S. Patent and Trademark Office, foreign trademark offices and U.S. federal and foreign courts regarding unauthorized use or registration of our UGG, Teva, Simple and TSUBO brand trademarks. We also are aware of many instances throughout the world in which a third party is using our UGG trademark within its internet domain name, and we have discovered and are investigating several manufacturers and distributors of counterfeit UGG and Teva products. Any decision or settlement in any of these matters that allowed a third party to continue to use our UGG, Teva, Simple or TSUBO brand trademarks or a domain name with our UGG brand trademark in connection with the sale of products similar to our products or to continue to manufacture or distribute counterfeit products could have an adverse effect on our sales and on our intellectual property, which could have a material adverse effect on our results of operations and financial condition.

Item 1A. Risk Factors.

The recent financial crisis and general economic conditions that are largely out of our control may adversely affect our financial condition and results of operations.

Uncertainty about current and future global economic conditions may cause consumers to defer purchases or cancel purchase orders of our products in response to tighter credit, decreased cash availability and declining consumer confidence. Our financial success is sensitive to changes in general economic conditions, both nationally and locally. Recessionary economic cycles, higher interest borrowing rates, higher fuel and other energy costs, inflation, increases in commodity prices, higher levels of unemployment, higher consumer debt levels, higher tax rates and other changes in tax laws or other economic factors that may affect consumer spending or buying habits could adversely affect the demand for our products. In addition, the recent turmoil in the financial markets may have an adverse effect on the U.S. and world economy, which could negatively impact consumer spending patterns. In addition, a number of our third-party retailers may be impacted by the significant decrease in available credit that has resulted from the current financial crisis. If credit pressures or other financial difficulties result in insolvency for these third parties it could adversely impact our estimated reserves and financial results. There can be no assurances that government and consumer responses to the disruptions in the financial markets will restore consumer confidence.

Furthermore, reduced traffic in retail stores, or limitations on the prices we can charge for our products, either of which could reduce our sales and profit margins and have a material adverse affect on our financial condition and results of operations. Also, economic factors such as those listed above and increased transportation costs, inflation, higher costs of labor, insurance and healthcare, and changes in other laws and regulations may increase our cost of sales and our operating expenses, and otherwise adversely affect our financial condition and results of operations.

The investment of our substantial cash and cash equivalents and short-term investments are subject to risks which may cause losses and affect the liquidity of these investments.

At September 30, 2008 we had cash and cash equivalents and short-term investments of \$67,944. A portion of these are held as cash in operating accounts that are with third party financial institutions. These balances, at times, may exceed the Federal Deposit Insurance Corporation (FDIC) insurance limits. While we regularly monitor the cash balances in our operating accounts and adjust the balances as appropriate, these cash balances could be impacted if the underlying financial institutions fail or are subject to other adverse conditions in the financial markets. To date we have experienced no loss or lack of access to cash in our operating accounts.

The remainder of our cash and cash equivalents and short-term investments are invested in interest bearing funds managed by third party financial institutions. These funds invest in U.S. treasuries and government agencies, money market funds, corporate debt, commercial paper, and municipal bonds, among other investments. Certain of these investments are subject to general credit, liquidity, market and interest rate risks. While we do not hold any investments whose value is directly correlated to sub-prime debt, these risks have been and may further be exacerbated by U.S. sub-prime mortgage defaults, which have affected various sectors of the financial markets and caused credit and liquidity issues. To date we have experienced no material loss or lack of access to our cash and cash equivalents and short-term investments. However, we can provide no assurances that access to our cash and cash equivalents and short-term investments will not be impacted by adverse conditions in the financial markets. These market risks associated with our investment portfolio may have a negative adverse effect on our results of operations, liquidity and financial condition.

Table of Contents

There have been no other material changes from the risk factors disclosed in the Risk Factors section of our Annual Report on Form 10-K for the fiscal year ended December 31, 2007, filed on February 29, 2008.
