-

**Items to be Included in this Report**

**Item 8.01 Other Events.**

On January 25, 2010, Thompson Creek Metals Company Inc. (the Company) issued a press release announcing that it will use U.S. generally accepted accounting principles (US GAAP) when it discloses its 2009 fiscal year end financial results in February 2010. The Company had previously disclosed its financial results using Canadian generally accepted accounting principles.

There will be several impacts to the Company's fiscal 2009 consolidated financial results due to the adoption of US GAAP, but the most significant is the US GAAP accounting treatment of the Company's 24,504,000 outstanding warrants (exercisable at CDN\$9.00 per common share until October 23, 2011). Under US GAAP, since the exercise price of these warrants is denominated in Canadian dollars instead of the Company's functional currency (U.S. dollars), each reporting period the Company is required to reclassify these warrants as a derivative liability and adjust them to fair value each period through a non-cash increase or decrease to consolidated net income. The change in the fair value of these warrants in fiscal 2009 will result in a pre-tax non-cash charge in the Company's 2009 consolidated statement of operations. As a result of this non-cash charge related to the warrants, the Company expects to report a net loss for fiscal 2009. Excluding this non-cash charge related to the warrants, the Company expects to report adjusted net income for fiscal 2009.

A copy of the press release is filed herewith as Exhibit 99.1 and is incorporated by reference herein.
