 - ☐ Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 8.01 Other Events.

On August 15, 2012, the United States Patent and Trademark Office Board of Patent Appeals and Interferences (the Board) issued its ruling in patent interference proceeding number 105,827 (the Second Interference) pending between U.S. patent application No. 12/543,875 (the 875 Application) owned by Geron Corporation (Geron) and U.S. Patent No. 7,510,876 (the 876 Patent) owned by ViaCyte, Inc. (ViaCyte). The 876 Patent claims at issue in the Second Interference and the First Interference referenced in the paragraph below were directed to a cell culture of definitive endoderm cells (multipotent precursor cells capable of differentiating into cells such as pancreatic islet cells).

As previously announced by Geron, on July 16, 2012, the Board issued its rulings in patent interference proceeding number 105,734 (the First Interference), which upheld the claims of ViaCyte s 876 Patent in their entirety over Geron s U.S. patent application No. 11/960,477 (the 477 Application). In its ruling on the Second Interference, the Board held that the involved claims of Geron s 875 Application were patentably indistinct from the claims of the 477 Application. Therefore, the Board concluded that its decision in the First Interference was binding in the Second Interference. Accordingly, the Board upheld the claims of ViaCyte s 876 Patent in their entirety over Geron s 875 Application and rejected the involved claims of the 875 Application. Both the 477 Application and the 875 Application are included within Geron s stem cell intellectual property portfolio that Geron has previously announced it is seeking to divest.

A copy of the Board s decision in the Second Interference can be obtained on the Interference Portal of the Board of Patent Appeals and Interferences page of the U.S. Patent and Trademark Office website.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
