Filed Pursuant to Rule 424(b)(3)
Registration No. **333-119359**

PROSPECTUS SUPPLEMENT

Dated May 17, 2005

To prospectus dated November 4, 2004

International Microcomputer Software, Inc.
Up to **4,542,440** Shares of Common Stock Offered by Selling Stockholders

This prospectus supplement, together with the prospectus listed above, is to be used by certain holders of the above-referenced securities or by their transferees, pledgees, donees or their successors in connection with the offer and sale of the above referenced securities. This prospectus supplement should be read in conjunction with the prospectus dated November 4, 2004 which is to be delivered with this prospectus supplement. All capitalized terms used but not defined in the prospectus supplement shall have the meanings given them in the prospectus.

FORWARD LOOKING STATEMENTS

This prospectus supplement contains forward-looking statements within the meaning of section 27A of the Securities Act of 1933, as amended, and section 21E of the Securities Exchange Act of 1934, as amended. In addition, we may from time to time make oral forward-looking statements. These statements may generally be identified by the use of such words as “expect,” “anticipate,” “believe,” “intend,” “plan,” “will,” or “shall.” These forward-looking statements are based on current expectations and entail various risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of a number of factors. When reading the sections titled “Results of Operations” and “Financial Condition,” you should also read our unaudited condensed financial statements and related notes included elsewhere herein and our Annual Report on Form 10-KSB, as amended, for the year ended June 30, 2004. We disclaim any obligation to update any forward-looking statements as a result of developments occurring after the date of this prospectus supplement.

The following information is added to the prospectus listed above:

INTERNATIONAL MICROCOMPUTER SOFTWARE, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

The interim condensed consolidated financial statements have been prepared from the records of International Microcomputer Software, Inc. and Subsidiaries ("IMSI") without audit. All significant inter-company balances and transactions have been eliminated in consolidation. In the opinion of management, all adjustments, which consist of only normal recurring adjustments, to present fairly the financial position at March 31, 2005 and the results of operations and cash flows for the three and nine months ended March 31, 2005 and 2004, have been made. The interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto contained in our Annual Report on Form 10-KSB as amended for the fiscal year ended June 30, 2004. The results of operations for the three and nine months ended March 31, 2005 are not necessarily indicative of the results to be expected for any other interim period or for the full year.

2. Use of Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States ("GAAP"). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. Our financial statements would be affected to the extent there are material differences between these estimates and actual results. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

3. Discontinued Operations

Loss from discontinued operations, net of income tax

The amounts reported for the three and nine months ended March 31, 2005 and 2004 as discontinued operations represent the pre-tax results of operations for Keynomics. This segment had pre-tax net loss of \$204,000 for the quarter ended March 31, 2004 and pre-tax loss of \$5,000 and \$255,000 for the nine months ended March 31, 2005 and 2004 respectively. These results were derived from net revenues of \$71,000 for the quarter ended March 31, 2004 and \$68,000 and \$549,000 for the nine months ended March 31, 2005 and 2004 respectively.

Gain from the sale of discontinued operations, net of income tax

As previously disclosed in our Annual Report on Form 10-KSB, as amended, for the fiscal year ended June 30, 2004, we sold the assets and customer related liabilities of our wholly owned subsidiary Keynomics, Inc. in July 2004. We evaluated the Keynomics business segment and its long term prospects during the fourth quarter of fiscal 2004 and with our focus on direct marketing and the on-line distribution of utilities and precision design content, we determined that Keynomics no longer represented a strategic fit for our company. The \$53,000 gain from the sale of discontinued operations for the nine months ended March 31, 2005 relate to the sale of Keynomics during the quarter ended September 30, 2004 and represent the excess of the total consideration received over its net carrying value.

During the quarter ended December 31, 2003, we recorded a gain of \$1.0 Million from the sale of discontinued operations representing the successful achievement of the first earn-out from the sale of ArtToday to Jupitermedia

Corporation in June 2003 (the second earnout payment of \$1.0 million was earned in June 2004 but is not applicable for purposes of this comparative discussion).

Acquisition of Abbisoft House Plans, Inc.

As previously disclosed in our quarterly report on Form 10-QSB for the quarter ended September 30, 2004, we completed a stock purchase agreement on September 28, 2004 whereby we acquired all the outstanding stock of Abbisoft House Plans, Inc. (“Abbisoft”), an on-line provider of stock house plans which operates the www.homeplanfinder.com website. The consideration for the acquisition was paid in a combination of cash (including cash held in escrow), notes payable (secured by the acquired business) and 500,000 unregistered IMSI common shares valued at \$1.0067 per share. Subsequent to the third quarter end, we amended the Abbisoft Stock Purchase Agreement in April 2005 whereby the seller agreed to release the cash being held in escrow to us in exchange of payment in the amount of \$40,000 and the issuance of 27,273 additional restricted shares of IMSI common stock.

This transaction was not deemed to be a material business combination, therefore, no pro forma results are required under the Statement of Financial Accounting Standards No. 141. We do not expect the goodwill associated with this acquisition to be deductible for tax purposes.

Amendment to the Allume Acquisition

In September 2004, IMSI and Monterey Bay Tech, Inc. (“MBYI” and formerly known as Aladdin Systems Holdings, Inc. ”) amended the portion of the purchase agreement which called for earn-outs to be paid based on the achievement of certain revenue targets. The earn-out payments were converted from contingent obligations to fixed obligations as follows:

- The first earn out payment of \$666,667 which could have been due on April 19, 2005 became fully earned as of the amendment date and will be payable on June 2, 2005.
- The second and third earn-out payments were terminated in consideration of the issuance of shares of the common stock of IMSI priced as of the closing bid price on the date of the amendment. As a result, during the first quarter of Fiscal Year 2005, we issued to MBYI an additional 1,065,807 shares of our common stock, with a value of \$1,033,867, pursuant to a transaction exempt from registration under Section 4(2) of the Securities Act.

We consequently amended, as of June 30, 2004, the purchase price of the Allume acquisition to include the \$1.7 million value of the fixed obligations described above. This additional amount was allocated to goodwill.

As part of the same agreement, MBYI agreed to modify the date by which we were required to file a registration statement on Form SB- 2 to register the common stock that MBYI received from us as part of the original agreement from ninety (90) days from the Closing Date to September 30, 2004. Additionally, MBYI agreed to modify the date by which the registration statement was required to be declared effective by the SEC from one hundred and eighty (180) days from the Closing Date to March 31, 2005. We filed the registration statement with the SEC on September 29, 2004 and it was declared effective on November 4, 2004, fulfilling our obligations under this agreement.

In April 2005, and subsequent to quarter end, we further amended the purchase agreement whereby we agreed to use our best efforts to ensure that the registration statement referenced above remain effective until June 29, 2005. In exchange, MBYI agreed to extend the due date of the earn-out described above from June 2, 2005 to August 15, 2005.

5. Note Receivable from Related Party - DCDC 15% Note

On January 31, 2005, we sold the DCDC promissory note to Mag Multi Corp (“Mag Multi”), a New York corporation for \$343,000, representing the principal balance and all accrued interest as of the date of the transfer. This amount was received in its entirety on February 10, 2005. The DCDC note was a 15% one-year note we received on September 18, 2003 from Digital Creative Development Corporation upon extending a loan to them in the amount of \$350,000. This

note was secured by 400,000 shares of IMSI's stock held by DCDC and was originally due on September 18, 2004. The maturity of this note was subsequently extended to May 31, 2005 in exchange for a full payment of the then accrued interest, a payment of \$25,000 against the principal amount and an increase the collateral attached to the note.

6. Debt

The following table details our outstanding debt as of March 31, 2005:

Table I-1-6

	As of March 31, 2005
Short-Term	
Acquisition related notes	
Monterey Bay Tech, Inc.	\$ 1,666
All other acquisition related obligations	210
Subtotal	1,876
Short term financing (secured by selected accounts receivable)	88
Other short term obligations	10
Subtotal Short Term	1,974
Long-Term	
Acquisition related notes	
Monterey Bay Tech, Inc.	1,250
All other acquisition related obligations	286
Subtotal Long Term	1,536
Grand Total	\$ 3,510

7. Fair Value of Financial Instruments

The fair value of cash and cash equivalents, trade receivables, trade payables and debt approximates carrying value due to the short maturity of such instruments.

As of March 31, 2005 we had \$2.3 million classified under investments in marketable securities on our balance sheet representing the market value of our investment portfolio.

The total consideration related the sale of ArtToday to Jupitermedia in June 2003 included 250,000 shares of Jupitermedia common stock. The ArtToday purchase agreement originally called for these shares to be held in escrow until December 30, 2005. However, at our discretion, we had the ability to replace all, or a portion of, the common stock held in escrow with cash in an amount equal to the closing market value, at June 30, 2003, of the common stock to be replaced.

During the third quarter of fiscal 2004 and pursuant to an amended escrow agreement, Jupitermedia agreed to release from the escrow account, without additional cash consideration, 125,000 of the original 250,000 shares that were tendered as part of the consideration in the sale of ArtToday.

During the first quarter of fiscal 2005 and as provided for under the original escrow agreement, we elected to substitute the remaining 125,000 shares of Jupitermedia for approximately \$500,000 in cash (recorded as Assets from Discontinued Operations). This amount will be released to us, net of any claims, on December 30, 2005.

After their release from the escrow account the Jupitermedia shares were deposited into our marketable securities account and were sold as market conditions allowed. We did not hold any shares of Jupitermedia common stock as of

March 31, 2005.

In addition to the shares referenced above, the escrow account also included \$1.3 million in cash to be released in two equal installments in June 2004 and December 2004.

The first payment of \$650,000 was released to us on June 30, 2004 of which approximately \$42,000 was paid to the former minority shareholders of ArtToday.

-10-

The remaining \$650,000 escrow balance was released to us on December 30, 2004 in addition to accrued interest. Approximately \$42,000 of the remaining cash in escrow was due to the former minority shareholders of ArtToday and was paid to them in January 2005.

8. Gain / (loss) on Marketable Securities

The following table details the net gain on marketable securities that we recognized during the three and nine months ended March 31, 2005:

Table I-1-8

Description	Gain (loss) on marketable securities for the three months ended March 31, 2005				Total
	Realized	Reversal of unrealized gain / (loss) recognized in prior periods	Unrealized Unrealized gain / (loss) for the quarter ended March 31, 2005	Sub total Unrealized gain / (loss)

Description	Gain (loss) on marketable securities for the nine months ended March 31, 2005				Total
	Realized	Reversal of unrealized gain / (loss) recognized in prior periods	Unrealized Unrealized gain / (loss) for the nine months ended March 31, 2005	Sub total Unrealized gain / (loss)	
Stock in investment portfolio	\$2,239	\$(2,067)	\$ (27)	\$(2,094)	\$ 145

9. Segment Information

We have two reportable operating segments which serve businesses and individuals in the design and consumer markets. The segments are classified in accordance to our product families and generate revenues and incur expenses related to the sale of our software and services. All inter-company amounts are eliminated through consolidation. Certain general and administrative expenses are allocated among our different segments based on each segment contribution to total revenue.

Table I-1-9

	Three months ended March 31, 2005			Three months ended March 31, 2004		
	Precision Design Solutions	Consumer Software Solutions	Total	Precision Design Solutions	Consumer Software Solutions	Total

10. Earnings/ (Loss) per Share

Basic earnings/ (loss) per share is computed using the weighted average number of common shares outstanding during the period. Diluted earnings per share are computed using the weighted average number of common and potentially dilutive securities outstanding during the period. Potentially dilutive securities consist of the incremental common shares issuable upon exercise of stock options and warrants (using the treasury stock method). Potentially dilutive securities are excluded from the computation if their effect is anti-dilutive.

-12-

The following table sets forth the computation of basic and diluted earnings (loss) per share:

Table I-1-10

	Three months ended		Nine months ended	
	March 31, 2005	March 31, 2004	March 31, 2005	March 31, 2004
<u>Numerator:</u>				
Net income (loss)	\$ (386)	\$ 548	\$ (532)	\$ 550
Numerator for basic earnings (loss) per share - income (loss) available to common stockholders	\$ (386)	\$ 548	\$ (532)	\$ 550
Numerator for diluted earnings (loss) per share - income (loss) available to common stockholders after assumed conversions	\$ (386)	\$ 548	\$ (532)	\$ 550
<u>Denominator:</u>				
Denominator for basic loss per share - weighted average shares outstanding	28,051,090	23,475,424	27,622,926	23,331,526
Effect of dilutive securities using the treasury stock method as at March 31, 2005:				
Total Warrants Outstanding - 6,623,244	--	--	--	--
Total Stock Options Outstanding - 3,761,355	--	--	--	--
Effect of dilutive securities using the treasury stock method as at March 31, 2004:				
Total Warrants Outstanding - 7,163,244	--	2,867,241	--	--
Total Stock Options Outstanding - 2,101,198	--	981,647	--	--
Dilutive potential common shares	--	--	--	--
Denominator for diluted loss per share - adjusted weighted average shares and assumed conversion	28,051,090	27,324,312	27,622,926	23,331,526
Basic loss per share	\$ (0.01)	\$ 0.02	\$ (0.02)	\$ 0.02
Diluted loss per share	\$ (0.01)	\$ 0.02	\$ (0.02)	\$ 0.02

11. Stock Based Awards

Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure, an Amendment of FASB Statement No. 123," amends the disclosure requirements of Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123"), to require more prominent disclosures in both annual and interim financial statements regarding the method of accounting for stock-based employee compensation and the effect of the method used on reported results.

We account for stock-based compensation plans in accordance with Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," under which no compensation cost is recognized in the financial statements for employee stock arrangements when grants are made at fair market value. The Company has adopted the disclosure only provisions of SFAS No. 123, "Accounting for Stock Based Compensation".

Beginning on July 1, 2006, we will adopt the accounting treatment required by FASB Statement No. 123 (revised 2004) which will require us to measure all employee stock-based compensation awards using a fair value method and record such expense in our consolidated financial statements (see the "Recent Accounting Pronouncements" note).

Under variable plan accounting, we recognize a charge equal to the per share change in the share value until the underlying options expire or are exercised. During the three months ended March 31, 2005 and 2004, we recognized an expense of \$8,188 and an expense of \$10,347 respectively related to variable awards. During the nine months ended March 31, 2005 and 2004, we recognized an expense of \$3,224 and an expense of \$21,013 respectively related to variable awards.

Had compensation cost for the stock-based compensation plans been determined based upon the fair value at grant dates for awards under those plans consistent with the method prescribed by SFAS 123, net income would have been reduced to the pro forma amounts indicated below:

Table I-1-11

<i>(in thousands, except per share amounts)</i>	Three months Ended March		Nine months Ended March 31,	
	2005	31, 2004	2005	2004
Net income (loss), as reported	\$ (386)	\$ 548	\$ (532)	\$ 550
Intrinsic compensation charge recorded under APB 25	8	11	23	265
Pro Forma compensation charge under SFAS 123	(90)	(404)	(507)	(1,271)
Pro Forma net income (loss)	\$ (468)	\$ 155	\$ (1,016)	\$ (456)
Pro Forma net income (loss) per share:				
Basic—as reported	\$ (0.01)	\$ 0.02	\$ (0.02)	\$ 0.02
Basic—pro forma	\$ (0.02)	\$ 0.01	\$ (0.04)	\$ (0.02)
Diluted—as reported	\$ (0.01)	\$ 0.02	\$ (0.02)	\$ 0.02
Diluted—pro forma	\$ (0.02)	\$ 0.01	\$ (0.04)	\$ (0.02)

The weighted average fair values per option as of the grant date for grants made for both the three and nine months ended March 31, 2005 were \$0.85 and \$0.74. This compares to \$1.08 and \$1.08, respectively for the three and nine months ended March 31, 2004.

12. Goodwill

In accordance with SFAS No. 142, *Goodwill and Intangible Assets* goodwill is being assessed for impairment annually or more frequently if circumstances indicate impairment. We have not recognized any impairment charges related to goodwill during the nine months ended March 31, 2005. Total goodwill at March 31, 2005 was \$8.8million and relates to the acquisitions we consummated during fiscal 2004 and 2005.

13. Recent Accounting Pronouncements

Share-Based Payment - revision of FASB Statement No. 123, Accounting for Stock-Based Compensation - In December 2004, FASB issued Statement of Financial Accounting Standards (SFAS) No. 123 (Revised 2004), *Share-Based Payment*. The new pronouncement replaces the existing requirements under SFAS No.123 and APB 25. According to SFAS No. 123 (R), all forms of share-based payments to employees, including employee stock options and employee stock purchase plans, would be treated the same as any other form of compensation by recognizing the related cost in the Statement of Operations. This pronouncement eliminates the ability to account for stock-based compensation transactions using APB No. 25 and generally would require instead that such transactions be accounted for using a fair-value based method. FASB concluded that, for small business issuers, SFAS No. 123 (R) is effective

for awards and stock options granted, modified or settled in cash in annual periods beginning after December 15, 2005. SFAS No. 123 (R) provides transition alternatives for public companies to restate prior interim periods or prior years. We are in the process of evaluating the impact of this standard on our statement of operation.

Exchanges of Nonmonetary Assets—an amendment of APB Opinion No. 29 - In December 2004, FASB issued SFAS 153, “Exchanges of Nonmonetary Assets—an amendment to APB Opinion No. 29”. This statement amends APB 29 to eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. Adoption of this statement is not expected to have a material impact on our results of operations or financial condition.

Inventory Costs—an amendment of ARB No. 43, Chapter 4 - In November 2004, the FASB issued SFAS No. 151, "Inventory Costs, an amendment of ARB No. 43, Chapter 4." The standard requires that abnormal amounts of idle capacity and spoilage costs should be excluded from the cost of inventory and expensed when incurred. SFAS No. 151 is effective for fiscal years beginning after June 15, 2005. We do not expect the adoption of this standard to have a material effect on our financial position or results of operations.

Item 2- Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

IMSI is a developer and publisher of software in the precision design, utilities and business applications categories. We offer a wide variety of application software that we market through an array of distribution methods including:

- Direct marketing to consumers and businesses
 - Retail/ Distribution agreements
 - Republishing & OEM agreements

We are committed to being a leading provider of these applications and services to businesses and consumers.

We believe that revenues and operating earnings growth can be achieved through internally developed products and services and through acquisitions. Over the last year we have completed several acquisitions aimed at growing our revenues and strengthening our financial results. Management believes that good value target companies, presenting a strategic fit with our current operations, are still present in the marketplace and that potential business combinations with these entities would help us achieve our growth potential in addition to providing synergies that would improve profitability.

How we generate revenue

We develop, publish, market and sell a variety of software titles and services that are targeted to a wide array of users primarily for individuals and small businesses. To efficiently serve our customers and maximize our revenue opportunities, we have aligned our business along two segments as described below:

Table I-2-1

Business Segment	Product Family	Product Group	Selected Product Brand
Precision Design Solutions	Precision Design Software	Professional CAD Solutions	<i>TurboCAD Professional</i>
			<i>TurboCADCAM</i>
			<i>CADsymbol CD</i>
		Consumer CAD Solutions	<i>TurboCAD Deluxe</i>
			<i>DesignCAD</i>
			<i>Instant Series</i>
	Precision Design Services	Content	<i>FloorPlan</i>
			<i>Houseplans.com</i>
			<i>Houseplanguys.com</i>
			<i>Homeplanfinder.com</i>
Consumer and Business Software Solutions	Utilities	Compression, Access and Transmission (CAT)	<i>CADsymbols.com</i>
			<i>StuffIt Deluxe & Standard</i>
		Security and Internet	<i>iClean</i>
			<i>Internet Cleanup</i>
			<i>SpamCatcher</i>
			<i>Spring Cleaning</i>
			<i>DragStrip</i>
		Software Compilations	<i>Ten for X</i>
			<i>Creative Essentials</i>
			<i>The Big Mix</i>
	Business Applications and Other	Business Solutions	<i>FlowCharts & More</i>
			<i>FormTool</i>

			<i>TurboProject</i>
		Graphics Solutions	<i>Animations & More</i>
			<i>ClipArt & More</i>
			<i>HiJaak</i>
		Consumer Solutions	<i>Easy Language</i>
			<i>Legacy Family Tree</i>
<i>TurboTyping</i>			

Our ability to develop and distribute products and services and determine the optimum distribution channel for their maximum exposure is a competitive advantage that differentiates us from other players in the industry.

Depending on the product and the customer, we deliver our products either through Electronic Software Downloads (ESD) or as physical products. Our distribution methods are comprised of the following three major channels:

• **Direct Marketing:**

- o ***Direct to Consumers-*** We maintain e-commerce websites and employ a sales force internally and through strategic partnerships to directly sell products to our customers. We conduct direct mail campaigns, both postal and email, for our existing and new products in addition to upgrades of existing products, as well as third-party offers. These mailings generally offer a specially priced product, as well as complementary or enhanced products for a further charge.
- o ***Direct to Businesses-*** We sell certain products and site licenses to businesses including large Fortune 100 companies. We market to these corporations through a combination of telemarketing, direct mail, and e-mailing. We believe that certain of our products and services, particularly TurboCAD, StuffIt, TurboProject, OrgChart Professional and HiJaak, are well suited for use within large corporations.

- **Retail / Distribution-** We are relying on selected distributors and partners to distribute a number of our products in the retail software market in order to reach a wider range of end users. Intense price competition along with the intermittent unfavorable retail conditions, including erosion of margins from competitive marketing and high rates of product returns, make this distribution channel increasingly challenging.
- **Republishing / OEM-** We have republishing agreements domestically and internationally which typically include minimum guaranteed royalty payments.

Forward Looking Statement

The following information should be read in conjunction with the consolidated financial statements and the notes thereto and in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations in our Fiscal 2004 Form 10-KSB, as amended. This quarterly report on Form 10-QSB, and in particular this "Management's Discussion and Analysis of Financial Condition and Results of Operations," may contain forward-looking statements regarding future events or our future performance. These future events and future performance involve certain risks and uncertainties including those discussed in the "Other Factors That May Affect Future Operating Results" section of this Form 10-QSB, as well as in our Fiscal 2004 Form 10-KSB, as amended, as filed with SEC. Actual events or our actual future results may differ materially from any forward-looking statements due to such risks and uncertainties. We assume no obligation to update these forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements. This analysis is not intended to serve as a basis for projection of future events.

Our consolidated financial statements are prepared in accordance with GAAP. These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. Our financial statements would be affected to the extent there are material differences between these estimates and actual results. In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting any available alternative would not produce a materially different result.

Results of Operations

The following table sets forth our results of operations for the three and nine months ended March 31, 2005 and 2004 in absolute dollars and as a percentage of net revenues. It also details the changes from the prior fiscal year in absolute dollars and in percentages.

Table I-2-2

	Three months ended March 31,						Nine months ended March 31,

Net Revenues

The following illustrations provide a breakdown of our revenues (based on the criteria indicated) for the quarters ended March 31, 2005 and 2004.

Revenue by Business Segment

Graph I-2-1

Revenue by Product Family

Graph I-2-2

Revenue by Distribution Channel

Graph I-2-3

Revenues by Business Segment and Distribution Channel

Graph I-2-4

-20-

Revenues by Product Family and Distribution Channel**Graph I-2-5**

The acquisitions we completed during fiscal 2004 and 2005 (primarily Allume Systems) accounted for the majority of the increase in net revenue across our product segments for the three and nine months ended March 31, 2005 as compared the same periods from the previous fiscal year. However, we also were able to increase revenues in our organic businesses (primarily sales of Design software) which recorded revenue growth of 22% for the three month ended March 31, 2005 as compared to the prior year. The following table summarizes the breakdown of our revenues for the periods indicated (all amounts are in thousands except for percentage amounts):

Table I-2-3

	2005		Three months ended March 31, 2004		Change	
	\$	%	\$	%	\$	%
Consumer & Business						
Software Solutions	\$ 3,127	49%	\$ 898	33%	\$ 2,229	248%
Precision Design Solutions	3,213	51%	1,815	67%	1,398	77%
Net Revenues	\$ 6,340	100%	\$ 2,713	100%	\$ 3,627	134%

	2005		Nine months ended March 31, 2004		Change	
	\$	%	\$	%	\$	%
Consumer & Business						
Software Solutions	\$ 10,084	56%	\$ 2,843	42%	\$ 7,241	255%
Precision Design Solutions	7,970	44%	3,847	58%	4,123	107%
Net Revenues	\$ 18,054	100%	\$ 6,690	100%	\$ 11,364	170%

Consumer & Business Software Solutions Segment

The Consumer & Business software solutions segment is comprised of the utilities and the business applications and other product families. The acquisition of Allume Systems during the fourth quarter of fiscal 2004, and therefore the addition of the Utilities product family to this segment, more than offset the decline in revenues in the Business Applications and Other product family and accounted for the substantial increase in revenues of the Consumer & Business software solutions segment for the three and nine months ended March 31, 2005 as compared to the same periods from the previous fiscal year.

- **Utilities:** With the acquisition of Allume Systems during the last quarter of fiscal 2004, we added the high margin utility product family to the Consumer & Business software solutions segment. Sales of Allume amounted to \$2.5 million and \$7.6 million, respectively, during the three and nine months ended March 31, 2005. We did not have similar revenues to report for the comparable periods from the previous fiscal year. The additional revenues from the utility product family during the three March 31, 2005 represented 76% of the sales in the Consumer & Business software solutions segment and accounted for the majority of the revenues in that segment.
- **Business Applications and Other:** the Business Applications and Other product family accounted for only 24% of the total revenues of the Consumer & Business software solutions segment for the quarter ended March 31, 2005. Historically, and prior to the acquisition of Allume in April 2004, this product family accounted for 100% of the sales in the Consumer & Business software solutions segment. This product family includes third party product brands that we license from other software publishers and market to our client base. The decline in sales in this product family during the three and nine months ended March 31, 2005 as compared to the same periods of the previous fiscal year was mainly the result of the decline in the revenues generated from the sale of third party products and in particular OrgPlus (a product that we licensed until the third quarter of the previous fiscal year). The decline in revenues from the sale of Hijaak (an owned product which current version is nearing the end of its life cycle) also accounted for the decline in revenues of the Business Applications and Other product family for the periods ended March 31, 2005 as compared to the previous fiscal year.

Precision Design Solutions Segment

- **Precision Design Software:** Revenues from the software titles that we acquired during fiscal 2004 (DesignCAD and the Instant Series) grew during the three and nine months ended March 31, 2005 as we continued the direct marketing activities of the new versions that we released in the beginning of fiscal 2005. This product family also saw substantial increase in revenues from the sale of FloorPlan and TurboCAD on a year over year basis for the three and nine months ended March 31, 2005.

We released the latest version (V 11.0) of our flagship product, TurboCAD toward the end of the quarter ended March 31, 2005. This release which included new features and functionalities had a mild effect on the revenues of the March quarter. We expect this release to increase revenues in this product family during the fourth quarter of fiscal 2005 as we benefit from the effect of a full quarter of targeted direct marketing activities. The previous release (V 10.5) which occurred during the second quarter of fiscal 2005 accounted for the majority of the revenue growth in the precision design software product family for the three and nine months ended March 31, 2005 as compared to the same period from the previous fiscal year.

Also during the quarter ended March 31, 2005 we saw an increase in the number of units sold-through and the total revenue amount for our FloorPlan product as we engaged into aggressive marketing activities in the Retail/Distribution channel in order to clear the channel from excess inventory and clear the way to the new version (V 10.0) due to be released during the fourth quarter of fiscal 2005.

Precision Design Services: This product family is primarily comprised of a network of websites hosting an extensive library of over 19,000 unique stock house plans and marketed under the www.houseplans.com, www.homeplanfinder.com and www.houseplanguys.com websites. These websites which are targeted to general contractors, consumers and designers offer particularly strong synergies with the precision design software product family.

-22-

We have introduced these products and services upon acquisitions we made during the second quarter of fiscal 2004 (Houseplans, Inc.) and during the first quarter of fiscal 2005 (Abbisoft House Plans, Inc.). As with the Consumer & Business software solutions segment, these acquisitions were consistent with our overall strategy to improve and diversify our offerings. These acquisitions resulted in the introduction of this new product family (precision design services) which began to add to the sales of the precision design segment starting in the second quarter of fiscal 2004.

Revenues generated by this product family grew substantially for the three and nine months ended March 31, 2005 and should continue to grow during the future reporting periods as we continue to focus on improving the branding and marketing of these websites. Revenues from the Houseplans network of websites was \$1,480,000 and \$2,984,000 during the three and nine months ended March 31, 2005 respectively. This compares to sales of \$467,000 and \$579,000, respectively, for the three and nine months ended March 31, 2004.

We market our products internationally through our wholly owned Australian and German subsidiaries and through distribution and republishing partners in Europe, Asia and other regions of the world. Revenues from our Australian subsidiary are primarily derived from royalty payments after we licensed the distribution rights of some of our products in Australia to a third party publisher during fiscal 2003.

During the quarter ended March 31, 2005, we were able to secure a Canadian licensing agreement that helped boost our international revenue. Additionally, the increase in our international revenues during the three and nine months ended March 31, 2005 as compared to the same periods from the previous fiscal year was due to the improved performance of our international distribution and republishing partners in Europe, the additional international business from Allume's operations and to the improved results of our German subsidiary as market conditions and customer acceptance of our new versions of design products in Europe improved.

Revenues from our German subsidiary grew to \$161,000 and \$639,000 for the three and nine months ended March 31, 2005, respectively, from \$104,000 and \$354,000, respectively, in the comparable periods from the previous fiscal year. Revenue from our Australian subsidiary amounted to approximately \$25,000 and \$120,000 for the three and nine months ended March 31, 2005, respectively. This compares to revenues of \$27,000 and \$69,000 for the comparable periods from the previous fiscal year.

The following table details the revenue breakdown between the domestic and international markets for the periods indicated.

Table I-2-4

	2005		Three months ended March 31, 2004		\$ change	% change
	\$	% of total	\$	% of total		
Domestic sales	\$ 5,612	89%	\$ 2,374	88%	\$ 3,238	136%
International sales	728	11%	339	12%	389	115%
Total Net Sales	\$ 6,340	100%	\$ 2,713	100%	\$ 3,627	134%

	2005		Nine months ended March 31, 2004		\$ change	% change
	\$	% of total	\$	% of total		
Domestic sales	\$ 15,664	87%	\$ 5,648	84%	\$ 10,016	177%
International sales	2,390	13%	1,042	16%	1,348	129%
Total Net Sales	\$ 18,054	100%	\$ 6,690	100%	\$ 11,364	170%

We are currently serving the domestic and international retail markets using direct sales, distribution and republishing channels. Low barriers to entry, intense price competition, and business consolidations continue to characterize the consumer software industry. Any one of these factors along with the intermittent unfavorable retail conditions, including erosion of margins from competitive marketing and high rates of product returns, may adversely affect our revenues in the future.

-23-

Our international revenues may be affected by the risks customarily associated with international operations, including fluctuations of the U.S. dollar, increases in duty rates, exchange or price controls, longer collection cycles, government regulations, political instability and changes in international tax laws.

Product Costs and Gross Margin

The introduction of the high margin utilities product family, upon the acquisition of Allume during the fourth quarter of fiscal 2004, and the improvement in margins of our historical business accounted for the majority of the improvement in our consolidated gross margin for the three and nine months ended March 31, 2005 as compared to the same periods from the previous year. Despite the growing share of the lower margin precision design services category as a percentage of our total revenues, our consolidated gross margins improved significantly to 73% from 62% during the third quarter of fiscal 2005 as compared to the same period from the previous fiscal year and to 73% from 64% for the nine month periods ended March 31, 2005 and 2004, respectively. These margins may fluctuate during future reporting periods given the uncertain product lifecycle for some of our historically high margin products and depending on the success of the release of newer software versions.

The significant shift of sales break-down by distribution channel toward the more profitable direct marketing channel, compounded the positive effect of the introduction of the utility product family on our overall profit margin. More than sixty-five percent (65%) of our product sales were fulfilled through our direct marketing channel where the more profitable ESD is the delivery method of choice.

In addition to the costs of CD-ROM duplication, printing of manuals, packaging and fulfillment, and royalties and license fees that we pay to third parties based on sales of published software and content, our product costs include costs associated with the return of products, such as refurbishment and the write down in value of returned goods.

Our product costs also include the amortization of capitalized software, a fixed component of our overall product costs. These amortization expenses amounted to \$227,000 and \$660,000, respectively, for the three and nine months ended March 31, 2005 as compared to \$96,000 and \$212,000, respectively, for the same periods from the previous fiscal year. The increase in amortization expense resulted mainly from the acquisitions we completed during the previous quarters. As we continue to acquire businesses and product lines, we are likely to increase our basis in certain intangible assets (i.e. capitalized software development), the amortization of which may negatively affect our gross margin in the future.

Sales and Marketing

We continue to successfully integrate the acquisitions we completed during fiscal 2004 and 2005 (i.e. Allume, Houseplans and Abbisoft) and we continue to implement savings and identify synergies among our business units. These actions have resulted in the decline in sales and marketing expenses on a sequential basis for the third quarter of fiscal 2005. Our sales and marketing expenses for the third quarter of fiscal 2005 included charges relating to the release of the newer versions of our flagship products TurboCAD and Stuffit. We have yet to witness the full revenue effect of these expenses as the releases happened later in the third quarter. On a year over year basis, the additional sales and marketing expenses related to our acquired businesses accounted for the majority of the increase in our sales and marketing expenses during the three and nine months ended March 31, 2005.

Sales and marketing expenses consist primarily of salaries and benefits of sales and marketing personnel, commissions, advertising, printing and direct mail expenses. We continue to improve our focus on the direct marketing distribution channel and the ESD delivery method by improving our internal sales force and partnering with outside service providers of sales forces and E-commerce systems. Management believes that these investments in the distribution channels and the E-commerce platform will generate increased revenues going forward, and are an indication of our continuing commitment to our core products.

General and Administrative

Consistent with our focus on returning to sustained profitability and containment of operating expenses, our general and administrative expenses declined on a sequential basis for the three months ended March 31, 2005. These expenses consist primarily of salaries and benefits for employees in the legal, finance, accounting, human resources, information systems and operations departments, amortization expenses, fees to our professional advisors, rent and other general operating costs. Our general and administrative expenses also include amortization expense mainly related to domain names acquired.

-24-

On a year over year basis, the increase in our general and administrative expenses during the three and nine months ended March 31, 2005 was mainly caused by the additional expenses related to the businesses we acquired during fiscal 2004 and 2005 (i.e. Allume, Houseplans and Abbisoft).

Based on our eventual implementation of Sarbanes-Oxley Section 404, our general and administrative costs may increase significantly. Currently, we are scheduled to implement the provisions of Section 404 for our fiscal year ended June 30, 2007.

Research and Development

Our continuous and steady investment in research and development is a reflection on our commitment to improving our existing core products and developing new titles, features and functionalities. Our management believes that product innovation and new technology integration is essential to proactively respond to the ever-evolving customer demands. Our research and development expenses consist primarily of salaries and benefits for research and development employees and payments to independent contractors, mainly our third party contract development teams in Russia and India with whom we continue to maintain a strong partnership at competitive costs.

The increase in research and development expenses during the three and nine months ended March 31, 2005 as compared to the same periods from the previous fiscal year resulted mainly from the additional development expenses related to the Allume operations and to the additional development work invested in the release of the new version of TurboCAD.

Interest and Other, Net

Interest and other expenses, net, include interest on debt instruments, foreign currency transaction gains and losses, and other non-recurring items. The following table summarizes the components of interest and other, net for the three and nine months ended March 31, 2005 and 2004:

Table I-2-5

	Three months ended March 31,				Nine months ended March 31,			
	2005	2004	Change from previous year		2005	2004	Change from previous year	
			\$	%			\$	%
	\$	\$	Increase / (Decrease)		\$	\$	Increase / (Decrease)	
Interest & Other, net								
Interest expense	\$(64)	\$(23)	\$(41)	178%	\$(189)	\$(24)	\$(165)	688%
Interest income	22	24	(2)	-8%	91	69	22	32%
Foreign exchange gain/(loss)	(18)	(1)	(17)	1700%	43	47	(4)	-9%
Other income	--	--	--	--%	13	49	(36)	-73%
Total Interest & Other, Net	\$(60)	\$ --	\$(60)	-100%	\$(42)	\$141	\$(183)	-130%

The increase in interest expense for the three and nine months ended March 31, 2005 was mainly the result of the interest we incurred on the acquisitions-related notes and interest incurred on our short term financing activities.

Gain / (loss) on marketable securities

The following table details the net gain on marketable securities that we recognized during the three and nine months ended March 31, 2005:

Table I-1-8

Description	Gain (loss) on marketable securities for the three months ended March 31, 2005				
	Realized	Reversal of unrealized gain / (loss) recognized in prior periods	Unrealized	Sub total Unrealized gain / (loss)	Total
			Unrealized gain / (loss) for the quarter ended March 31, 2005		
Stock in investment portfolio	\$ 81	\$ (62)	\$ (296)	\$ (358)	\$ (277)

Description	Gain (loss) on marketable securities for the nine months ended March 31, 2005				
	Realized	Reversal of unrealized gain / (loss) recognized in prior periods	Unrealized	Sub total Unrealized gain / (loss)	Total
			Unrealized gain / (loss) for the nine months ended March 31, 2005		
Stock in investment portfolio	\$2,239	\$ (2,067)	\$ (27)	\$ (2,094)	\$ 145

Gain on sale of product line

During the nine months ended March 31, 2005 (in the second quarter of fiscal 2005), we sold certain domain names and their related interest and contents (Cadalog.com and 3Dmodelsharing.com) and we recognized gains in the aggregate amount of \$33,000 which represented the excess of the consideration received over the net book value of the assets sold.

Gain on extinguishment of debt

During the nine months ended March 31, 2004, we recognized a gain of \$76,000 from the extinguishment of debt primarily relating to the settlement of liabilities related to assets under a capital lease.

Provision for State and Federal Income Taxes

During the three and nine months ended March 31, 2005, we recorded tax expense of \$2,000 and \$10,000, respectively, related to state income taxes where we have operations. This compares to an income tax expense of \$34,000 and \$24,000, respectively, for the three and nine months ended March 31, 2004.

We have not recorded a tax benefit for domestic tax losses because of the uncertainty of realization. We adhere to Statement of Financial Accounting Standards No. 109 "Accounting for Income Taxes," which requires an asset and liability approach to financial accounting and reporting for income taxes. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Consistent with our past practice, we have recorded a full valuation allowance at March 31, 2005 as the realizeability of our net operating loss carry-forwards is not determinable.

-26-

Income from Discontinued Operations and Gain from Discontinued Operations

Income (loss) from discontinued operations, net of income tax

The amounts reported for the three and nine months ended March 31, 2005 and 2004 as discontinued operations represent the pre-tax results of operations for Keynomics. This segment had pre-tax net loss of \$204,000 for the quarter ended March 31, 2004 and pre-tax loss of \$5,000 and \$255,000 for the nine months ended March 31, 2005 and 2004 respectively. These results were derived from net revenues of \$71,000 for the quarter ended March 31, 2004 and \$68,000 and \$549,000 for the nine months ended March 31, 2005 and 2004 respectively.

Gain from the sale of discontinued operations, net of income tax

As previously disclosed in our annual report on Form 10-KSB, as amended, for the fiscal year ended June 30, 2004, we sold the assets and customer related liabilities of our wholly owned subsidiary Keynomics, Inc. in July 2004. We evaluated the Keynomics business segment and its long term prospects during the fourth quarter of fiscal 2004 and with our focus on direct marketing and the on-line distribution of utilities and precision design content, we determined that Keynomics no longer represented a strategic fit for our company. The \$53,000 gain from the sale of discontinued operations for the nine months ended March 31, 2005 relate to the sale of Keynomics during the quarter ended September 30, 2004 and represent the excess of the total consideration received over its net carrying value.

During the quarter ended December 31, 2003, we recorded a gain of \$1.0 Million from the sale of discontinued operations representing the successful achievement of the first earn-out from the sale of ArtToday to Jupitermedia Corporation in June 2003 (the second earnout payment of \$1.0 million was earned in June 2004 but is not applicable for purposes of this comparative discussion).

Liquidity and Capital Resources

As of March 31, 2005, we had \$2,391,000 in cash and cash equivalents. This represents a \$413,000 decline from the \$2,804,000 balance as of December 31, 2004 and an \$821,000 decline from the \$3,212,000 balance as of June 30, 2004. Working capital at March 31, 2005 was \$4,678,000. This represents an increase of \$1,021,000 over the working capital at June 30, 2004.

Despite a net loss of \$532,000 for the nine month period ended March 31, 2005, our operating activities provided net cash of \$237,000. This compares to net cash used from operations of \$2,450,000 in the nine months ended March 31, 2004 on a net income of \$550,000 for the same period. Non-cash depreciation and amortization expenses of \$1.4 million during the nine months ended March 31, 2005 (mainly relating to amortization expense incurred as a result of our acquisition strategy) helped reconcile the net loss to our positive operating cash flow for the nine months ended March 31, 2005.

During fiscal 2004, we recorded a gain of \$2.0 Million from the sale of discontinued operations representing the successful achievement of the first and second earn-outs from the sale of ArtToday. These earn-out payments were contingent on ArtToday reaching certain revenue milestones. The first installment of \$1.0 Million was earned during the second quarter of fiscal 2004 and was paid per the stock purchase agreement during the third quarter of fiscal 2004 and the second \$1.0 million installment of the earn-outs was earned during the fourth quarter of fiscal 2004 and was paid during the first quarter of fiscal 2005. This payment accounted for the majority of the improvement in cash from operating activities.

Our investing activities provided net cash of \$817,000 during the nine months ended March 31, 2005, as compared to net cash used of \$3,089,000 during the comparable period from the previous fiscal year. During the nine months ended March 31, 2005, we sold marketable securities (mainly Jupitermedia common stock we received as part of the

sale of ArtToday) and we collected proceeds of approximately \$1.8 million. We also received, during the same period, the second payment of \$650,000 that was held in escrow in connection to the ArtToday sale to Jupitermedia. In addition, we sold the assets of our wholly owned subsidiary, Keynomics, in July 2004 and received proceeds from the sale of approximately \$250,000. These cash infusions were mainly used to finance our acquisition activities. During the nine months ended March 31, 2005, we acquired AbbiSoft, the newest addition to our network of stock house plans website, and invested in a new technology to be incorporated into our Stuffit line of product allowing JPEG and image files to be compressed by an additional 30% on average.

-27-

The comparable period from the previous fiscal year was also marked by the consummation of several acquisitions that were consistent with our strategy to grow our software business with a focus on products and services that complement our direct marketing and online distribution strengths. These acquisitions included CADsymbols, CADsymbol, DesignCAD, Homeplans and other smaller product lines and businesses.

During the first quarter of fiscal 2004, we extended a \$350,000 loan to DCDC as disclosed in note 5 to our condensed consolidated financial statements. On January 31, 2005, we sold this DCDC promissory note to Mag Multi Corp, a New York corporation for \$343,000, representing the principal balance and all accrued interest as of the date of the transfer. This amount was received in its entirety on February 10, 2005.

Also, during the nine months ended March 31, 2005 and as part of an amended escrow agreement with Jupitermedia, we transferred approximately \$500,000 in cash to an escrow account as a substitution of 125,000 shares of Jupitermedia that were held in the same escrow account. This amount will be released to us, net of any claims, on December 30, 2005.

Our financing activities consumed net cash of \$1,836,000 for the nine-month period ended March 31, 2005. This compares to \$85,000 of net cash generated by financing activities during the comparable period from the previous fiscal year. The cash used by our financing activities for the nine months ended March 31, 2005 was primarily related to payments we made on notes relating to the acquisitions we consummated during fiscal 2004 and 2005. Our financing activities from the comparable period of the previous fiscal year included a \$160,000 payout to Imageline in July 2003 representing the final payment in connection with our mutual settlement of previous infringements claims.

Historically, we have financed our working capital and capital expenditure requirements primarily from short-term and long-term notes and bank borrowings, capitalized leases and sales of common stock. The sale of ArtToday to Jupitermedia in June 2003 provided us with additional sources of funds to support future growth.

To achieve our growth objectives, we are considering different strategies, including growth through mergers and/or acquisitions. As a result, we are evaluating and we will continue to evaluate other companies and businesses for potential synergies that would add value to our existing operations.

We may seek, in the future, additional equity and/or debt financing to sustain our growth strategy. However, we believe that we have sufficient funds to support our operations at least for the next twelve months, based on our current cash position and equity sources. We believe that we will be able to obtain any additional financing required on competitive terms particularly if we are successful in improving our financial performance. In addition, we will continue to seek opportunities and discussions with third parties concerning the sale or license of certain product lines and/or the sale or license of a portion of our assets.

The forecast period of time through which our financial resources will be adequate to support working capital and capital expenditure requirements is a forward-looking statement that involves risks and uncertainties, and actual results could vary. Furthermore, any additional equity financing may be dilutive to shareholders, and debt financing may involve restrictive covenants.

Critical Accounting Policies

In accordance with Securities and Exchange Commission guidance, those material accounting policies that we believe are the most critical to an investor's understanding of our financial results and condition have been expanded and are discussed below. Certain of these policies are particularly important to the portrayal of our financial position and results of operations and require the application of significant judgment by our management to determine the appropriate assumptions to be used in the determination of certain estimates.

Revenue Recognition

Revenue is recognized in accordance with American Institute of Certified Public Accountants Statement of Position (“SOP”) 97-2, *Software Revenue Recognition*, and SOP 98-9, *Modification of SOP 97-2, With Respect to Certain Transactions*. Revenue is recognized when persuasive evidence of an arrangement exists (generally a purchase order), product or service has been delivered, the fee is fixed and determinable, and collection of the resulting account is probable.

-28-

- Revenue from packaged product sales to resellers and end users is recorded at the time of the sale net of estimated returns.
- Revenue from sales to distributors is recognized when the product sells through to retailers and end users. Sales to distributors permit limited rights of return according to the terms of the contract.
- For software and content delivered via the Internet, revenue is recorded when the customer downloads the software, activates the subscription account or is shipped the content.
 - Revenue from post contract customer support (PCS) is recognized ratably over the contract period.
 - Subscription revenue is recognized ratably over the contract period.
- We use the residual method to recognize revenue when a license agreement includes one or more elements to be delivered at a future date. If there is an undelivered element under the license arrangement, we defer revenue based on vendor-specific objective evidence (VSOE) of the fair value of the undelivered element, as determined by the price charged when the element is sold separately. If VSOE of fair value does not exist for all undelivered elements, we defer all revenue until sufficient evidence exists or all elements have been delivered.
- Non-refundable advanced payments received under license agreements with no defined terms are recognized as revenue when the customer accepts the delivered software.
- Revenue from software licensed to developers, including amounts in excess of non-refundable advanced payments, is recorded as the developers ship products containing the licensed software.
 - Revenue from minimum guaranteed royalties in republishing agreements is recognized ratably over the term of the agreement. Royalties in excess of the guaranteed minimums are recognized when collected.
- Revenue from Original Equipment Manufacturer (OEM) contracts is recognized upon completion of our contractual obligations.

Reserve for returns, price discounts and rebates

Reserves for returns, price discounts and rebates are estimated using historical averages, open return requests, channel inventories, recent product sell-through activity and market conditions. Our allowances for returns, price discounts and rebates are based upon management's best judgment and estimates at the time of preparing the financial statements. Reserves are subjective estimates of future activity that are subject to risks and uncertainties, which could cause actual results to differ materially from estimates.

Our return policy generally allows our distributors to return purchased products primarily in exchange for new products or for credit towards future purchases as part of stock balancing programs. These returns are subject to certain limitations that may exist in the contract with an individual distributor, governing, for example, aggregate return amounts, and the age, condition and packaging of returned product. Under certain circumstances, such as terminations or when a product is defective, distributors could receive a cash refund if returns exceed amounts owed.

Inventories

Inventories are valued at the lower of cost or market and are accounted for on the first-in, first-out basis. Management performs periodic assessments to determine the existence of obsolete, slow moving and non-salable inventories, and records necessary provisions to reduce such inventories to net realizable value. As of March 31, 2005, approximately \$209,000 of our inventory was held by certain of our distributors under consignment arrangements.

Impairment

Property, equipment, intangible and certain other long-lived assets are amortized over their useful lives. Useful lives are based on management's estimates of the period that the assets will generate revenues. Long-lived assets are written down to fair value whenever events or changes indicate that the carrying amount of an asset may not be recoverable. Our policy is to review the recoverability of all long-lived assets at a minimum of once per year and record an impairment loss when the fair value of the assets does not exceed the carrying amount of the asset.

In accordance with SFAS No. 142, *Goodwill and Intangible Assets*, goodwill is being assessed for impairment annually or more frequently if circumstances indicate impairment.

-29-

Other Factors that May Affect Future Operating Results

Factors that may affect operating results in the future include, but are not limited to:

- Market acceptance of our products or those of our competitors
 - Timing of introductions of new products and new versions of existing products
 - Expenses relating to the development and promotion of such new products and new version introductions
 - Intense price competition and numerous end-user rebates
 - Projected and actual changes in platforms and technologies
 - Accuracy of forecasts of, and fluctuations in, consumer demand
 - Extent of third party royalty payments
 - Rate of growth of the consumer software and Internet markets
 - Timing of orders or order cancellation from major customers
 - Changes or disruptions in the consumer software distribution channels
 - Economic conditions, both generally and within the software or Internet industries
 - Our ability to successfully integrate the acquisitions that we have completed in the last twelve months
 - The successful attainment of the final \$2.0m earn-out payment related to the sale of the ArtToday business
 - The costs of compliance with Sarbanes-Oxley Section 404.
-
