Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1. Conflict Minerals Disclosure

Item 1.01. Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

JinkoSolar Holding Co., Ltd. (“**JinkoSolar**”) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions. JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 3 GW for silicon ingots and wafers, 2.5 GW for solar cells, and 4.3 GW for solar modules, as of December 31, 2015. JinkoSolar also sells electricity in China, and had connected approximately 1,006.6 MW of solar power projects to the grid, as of December 31, 2015.

JinkoSolar has over 15,000 employees across its 5 productions facilities in Jiangxi and Zhejiang Provinces, China, Malaysia, Portugal and South Africa, 12 global sales offices in China, Spain, the United Kingdom, the United Arab Emirates, Jordan, Saudi Arabia, Egypt, Morocco, Ghana, Brazil, Costa Rica and Mexico and 11 oversea subsidiaries in Germany, Italy, Switzerland, the United States, Canada, Australia, Singapore, Japan, India, South Africa and Chile.

The disclosures set forth herein for the reporting period from January 1, 2015 to December 31, 2015 are presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended. According to section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the definition in the Form SD and for the purposes of this assessment, “conflict minerals” are defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, and their derivatives, which are limited to tantalum, tin and tungsten.

Description of Reasonable Country of Origin Inquiry

JinkoSolar has taken the following steps as part of its reasonable country of origin inquiry to determine whether any conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country:

Prepared a list of the materials used during the production of its products;

Determined whether any conflict minerals were necessary to the functionality or production of products manufactured or contracted to be manufactured by JinkoSolar (“necessary conflict minerals”);

· Identified the suppliers whose products contained necessary conflict minerals (“Suppliers in Concern”);

Requested that the Suppliers in Concern provide a statement on where they obtained their products and materials that contained conflict minerals and the origin for these products and materials; and

Analyzed whether the necessary conflict minerals used by JinkoSolar during the reporting period may have originated in the Democratic Republic of the Congo or an adjoining country or whether they were from scrap or recycled sources.

JinkoSolar determined that during the reporting period, the only conflict mineral necessary to the functionality or production of products that it manufactures or contracts to be manufactured was tin. Tin-coated copper ribbon used in the production of solar modules uses tin. JinkoSolar has made inquiries with all its suppliers of tin-coated copper ribbon about the source of the tin used in their products and further requested that these suppliers provide confirmation of origin for the tin contained in their products. JinkoSolar does not make purchases of raw ore or unrefined conflict minerals and makes no purchases in the Democratic Republic of the Congo or adjoining countries.

#### Determination

Based on JinkoSolar's reasonable country of origin inquiry, JinkoSolar has no reason to believe that its necessary conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country.
