West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared by West Bancorporation, Inc. (the Company) pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements have been condensed or omitted pursuant to such rules and regulations. Although management believes that the disclosures are adequate to make the information presented understandable, it is suggested that these interim consolidated financial statements be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2012. In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary to present fairly the financial position as of June 30, 2013 and December 31, 2012, the net income and comprehensive income for the three and six months ended June 30, 2013 and 2012, and cash flows for the six months ended June 30, 2013 and 2012. The results for these interim periods may not be indicative of results for the entire year or for any other period.

The consolidated financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) established by the Financial Accounting Standards Board (FASB). References to GAAP issued by the FASB in these footnotes are to the FASB Accounting Standards Codification™, sometimes referred to as the Codification or ASC. In preparing the financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses for the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term are the fair value of financial instruments and other than temporary impairment (OTTI), the valuation of other real estate owned and the allowance for loan losses.

The accompanying unaudited consolidated financial statements include the accounts of the Company, West Bank, West Bank's wholly-owned subsidiary WB Funding Corporation (which owns an interest in a partnership) and West Bank's 99.99 percent owned subsidiary ICD IV, LLC (a community development entity). All significant intercompany transactions and balances have been eliminated in consolidation. In accordance with GAAP, West Bancorporation Capital Trust I is recorded on the books of the Company using the equity method of accounting and is not consolidated.

Recent accounting developments: In February 2013, the FASB issued Accounting Standards Update No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income, to improve the transparency of reporting reclassifications out of accumulated other comprehensive income. The amendments in the Update do not change the current requirements for reporting net income or other comprehensive income in the financial statements. The new amendments require an organization to present (either on the face of the statement where net income is presented or in the notes) the effects on the line items of net income of significant amounts reclassified out of accumulated other comprehensive income if the item reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. Additionally, for other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP to provide additional detail about those amounts. For public companies, the amendments were effective for reporting periods beginning after December 15, 2012. The adoption of this guidance did not have a material impact on the Company's consolidated

financial statements.

2. Critical Accounting Policies

Management has identified its most critical accounting policies to be those related to asset impairment judgments, including fair value and OTTI of available for sale investment securities, the valuation of other real estate owned and the allowance for loan losses.

Securities available for sale are reported at fair value, with unrealized gains and losses reported as a separate component of accumulated other comprehensive income, net of deferred income taxes. The Company evaluates each of its investment securities whose value has declined below amortized cost to determine whether the decline in fair value is OTTI. The investment portfolio is evaluated for OTTI by segregating the portfolio into two segments and applying the appropriate OTTI model. Investment securities classified as available for sale are generally evaluated for OTTI under FASB ASC 320, Investments - Debt and Equity Securities. However, certain purchased beneficial interests in securitized financial assets, including asset-backed securities and collateralized debt obligations that had credit ratings below AA at the time of purchase, are evaluated using the model outlined in FASB ASC 325, Beneficial Interests in Securitized Financial Assets.

In determining OTTI under the FASB ASC 320 model, the review takes into consideration the severity and duration of the decline in fair value, the length of time expected for recovery, the financial condition of the issuer and other qualitative factors, as well as whether the Company intends to sell the security or whether it is more likely than not the Company will be required to sell the debt security before its anticipated recovery.

Under the FASB ASC 325 model for the second segment of the portfolio, the Company compares the present value of the remaining cash flows as estimated at the preceding evaluation date to the current expected remaining cash flows. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

When OTTI occurs under either model, the amount of the OTTI recognized in earnings depends on whether the Company intends to sell the security or whether it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis. If the Company intends to sell or it is more likely than not that it will be required to sell the security before recovery of its amortized cost basis, the OTTI is recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If the Company does not intend to sell the security and it is not more likely than not that the entity will be required to sell before recovery of its amortized cost basis, the OTTI is separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected, using the original yield as the discount rate, and is recognized in earnings. The amount of the total OTTI related to other factors is recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the OTTI recognized in earnings becomes the new amortized cost basis of the investment. The assessment of whether an OTTI exists involves a high degree of subjectivity and judgment and is based on the information available to management at the time.

Other real estate owned includes real estate properties acquired through or in lieu of foreclosure. Properties are initially recorded at fair value less estimated selling costs at the date of foreclosure, thus establishing a new cost basis. Fair value is determined by management by obtaining appraisals or other market value information at least annually. Any write-downs in value at the date of acquisition are charged to the allowance for loan losses. After

foreclosure, valuations are periodically performed by management by obtaining updated appraisals or other market information. Any subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the updated fair value less estimated selling cost. Net costs related to the holding of properties are included in noninterest expense.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The Company has policies and procedures for evaluating the overall credit quality of its loan portfolio, including timely identification of potential problem loans. On a quarterly basis, management reviews the appropriate level for the allowance for loan losses, incorporating a variety of risk considerations, both quantitative and qualitative. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, known information about individual loans and other factors. Qualitative factors include the general economic environment in the Company's market areas and the expected trend of those economic conditions. While management uses the best information available to make its evaluations, future adjustments to the allowance may be necessary if there are significant changes in economic conditions or the other factors relied upon. To the extent actual results differ from forecasts and management's judgment, the allowance for loan losses may be greater or less than future charge-offs.

	December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. government agencies and corporations	\$ 12,614	\$ 420	\$ —) \$ 13,034
State and political subdivisions	54,075	2,754	(68)) 56,761
Collateralized mortgage obligations ⁽¹⁾	170,557	3,140	(103)) 173,594
Mortgage-backed securities ⁽¹⁾	36,965	1,459	—) 38,424
Trust preferred securities	5,913	—	(3,818)) 2,095
Corporate notes and other investments	8,341	69	(4)) 8,406
	\$ 288,465	\$ 7,842	\$ (3,993)) \$ 292,314

All collateralized mortgage obligations and mortgage-backed securities consist of residential mortgage (1) pass-through securities guaranteed by GNMA or issued by FNMA, and real estate mortgage investment conduits guaranteed by FHLMC or GNMA.

Securities with an amortized cost of \$73,147 and \$72,367 as of June 30, 2013 and December 31, 2012, respectively, were pledged as collateral on securities sold under agreements to repurchase, interest rate swaps and for other purposes as required or permitted by law or regulation. Securities sold under agreements to repurchase are held in safekeeping at a correspondent bank on behalf of the Company.

The amortized cost and fair value of securities available for sale as of June 30, 2013, by contractual maturity, are shown in the following table. Certain securities have call features that allow the issuer to call the securities prior to maturity. Expected maturities may differ from contractual maturities in collateralized mortgage obligations and mortgage-backed securities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Therefore, collateralized mortgage obligations and mortgage-backed securities are not included

in the maturity categories within the summary.

	June 30, 2013	
	Amortized Cost	Fair Value
Due in one year or less	\$636	\$644
Due after one year through five years	31,764	32,062
Due after five years through ten years	18,518	19,088
Due after ten years	67,495	62,569
	118,413	114,363
Collateralized mortgage obligations and mortgage-backed securities	259,815	260,587
Equity securities	1,484	1,378
	\$379,712	\$376,328

	\$26,126	\$(169)	\$2,400	\$(3,824)	\$28,526	\$(3,993)

See Note 2 for a discussion of accounting policies related to securities with unrealized losses. As of June 30, 2013, the available for sale investment portfolio included two collateralized mortgage obligation securities and two trust preferred securities (TPS) with unrealized losses that have existed for longer than one year.

The Company believes the unrealized losses on investments in government agency securities, municipal obligations, all other collateralized mortgage obligations, mortgage-backed securities and corporate notes as of June 30, 2013, were due to market conditions, not reduced estimated cash flows. There was a significant increase in market interest rates in June 2013, particularly in the longer part of the interest rate curve. This caused a measurable decline in the fair market value of the bond portfolio. The Company does not intend to sell these securities, does not anticipate that these securities will be required to be sold before anticipated recovery, and expects full principal and interest to be collected. Therefore, the Company did not consider these investments to have OTTI at June 30, 2013.

The Company believes the unrealized loss of \$858 on an investment in one single-issuer TPS issued by Heartland Financial, USA, Inc. as of June 30, 2013, was due to market conditions, not reduced estimated cash flows. The Company does not intend to sell this security, does not anticipate that this security will be required to be sold before anticipated recovery and expects full principal and interest will be collected. Therefore, the Company did not consider this investment to have OTTI at June 30, 2013.

 (dollars in thousands, except per share information)

As of June 30, 2013, the Company had one pooled TPS, ALESCO Preferred Funding X, Ltd., it has considered to have OTTI since 2009. The Company engaged an independent consulting firm to assist in the valuation of this security. In accordance with ASC 325, a discounted cash flow model was used to determine the estimated fair value of this security. Based on that valuation, management determined the security had an estimated fair value of \$1,616 at June 30, 2013. Based on the valuation work performed, no additional credit loss was recognized in the six months ended June 30, 2013. A credit loss of \$127 was recognized in the second quarter of 2012 and \$173 was recognized during the first six months of 2012. The remaining unrealized loss of \$2,555 is reflected in accumulated other comprehensive income, net of taxes of \$971. The Company will continue to periodically estimate the present value of cash flows expected to be collected over the life of the security.

The following table provides a roll forward of the cumulative amount of credit-related losses recognized in earnings for the three and six months ended June 30, 2013 and 2012.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012

Reductions for securities where there is an intent to sell or requirement to sell	—	—	—	—
Reductions for increases in cash flows expected to be collected	—	—	—	—
Balance at end of period	\$729	\$699	\$729	\$699

4. Loans and Allowance for Loan Losses

Loans consist of the following segments as of June 30, 2013 and December 31, 2012.

	June 30, 2013	December 31, 2012
Commercial	\$248,640	\$282,124
Real estate:		
Construction, land and land development	124,208	121,911
1-4 family residential first mortgages	47,967	49,280
Home equity	24,194	25,536
Commercial	516,131	441,857
Consumer and other loans	8,419	7,099
	969,559	927,807
Net unamortized fees and costs	450	406
	\$969,109	\$927,401

Real estate loans of approximately \$466,000 and \$397,000 were pledged as security for Federal Home Loan Bank (FHLB) advances as of June 30, 2013 and December 31, 2012, respectively.

Loans are stated at the principal amounts outstanding, net of unamortized loan fees and costs, with interest income recognized on the interest method based upon those outstanding loan balances. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method. Loans are reported by the portfolio segments identified above and are analyzed by management on this basis. All loan policies identified below apply to all segments of the loan portfolio.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

Delinquencies are determined based on the payment terms of the individual loan agreements. The accrual of interest on past due and other impaired loans is generally discontinued at 90 days or when, in the opinion of management, the borrower may be unable to make all payments pursuant to contractual terms. Unless considered collectible, all interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income, if accrued in the current year, or charged to the allowance for loan losses, if accrued in the prior year. Generally, all payments received while a loan is on nonaccrual status are applied to the principal balance of the loan. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured.

A loan is classified as troubled debt restructured (TDR) when the Company concludes that a borrower is experiencing financial difficulties and a concession was granted that would not otherwise be considered. Concessions may include a restructuring of the loan terms to alleviate the burden on the borrower's cash requirements, such as an extension of the payment terms beyond the original maturity date or a change in the interest rate charged. TDR loans with extended payment terms are accounted for as impaired until performance is established. A change to the interest rate would change the classification of a loan to a TDR loan if the restructured loan yields a rate that is below a market rate for that of a new loan with comparable risk. TDR loans with below-market rates are considered impaired until fully collected. TDR loans may be reported as nonaccrual or past due 90 days, rather than as a TDR, if they are not performing per the restructured terms.

Based upon its ongoing assessment of credit quality within the loan portfolio, the Company maintains a Watch List, which includes classified loans. These loans involve anticipated potential payment defaults or collateral inadequacies. A loan on the Watch List is considered impaired when management believes it is probable the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan agreement. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. The amount of impairment, if any, and any subsequent changes are included in the allowance for loan losses.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

The following table sets forth the recorded investment in nonperforming loans, disaggregated by segment, held by the Company as of June 30, 2013 and December 31, 2012. The recorded investment represents principal balances net of any partial charge-offs. Related accrued interest and net unamortized fees and costs are immaterial and are excluded from the table.

	June 30, 2013	December 31, 2012
Nonaccrual loans:		
Commercial	\$618	\$655
Real estate:		
Construction, land and land development	—	3,356
1-4 family residential first mortgages	686	406
Home equity	—	—
Commercial	2,212	1,983
Consumer and other loans	—	—
Total nonaccrual loans	3,516	6,400
Loans past due 90 days and still accruing interest:		
Commercial	—	—
Real estate:		
Construction, land and land development	—	—
1-4 family residential first mortgages	—	—
Home equity	—	—
Commercial	—	—
Consumer and other loans	—	—
Total loans past due 90 days and still accruing interest	—	—
Troubled debt restructured loans ⁽¹⁾ :		
Commercial	—	20
Real estate:		
Construction, land and land development	446	470
1-4 family residential first mortgages	104	273
Home equity	—	—
Commercial	94	93
Consumer and other loans	—	—
Total troubled debt restructured loans	644	856
Total nonperforming loans	\$4,160	\$7,256

While TDR loans are commonly reported by the industry as nonperforming, those not classified in the nonaccrual category are accruing interest due to payment performance. TDR loans on nonaccrual status, if any, are included in the nonaccrual category. As of June 30, 2013 and December 31, 2012, there was one TDR loan with a balance of \$716 and \$810, respectively, included in the nonaccrual category.

There were no loan modifications considered to be TDR during the three or six months ended June 30, 2013. There was one loan in the 1-4 family residential first mortgages segment with a pre- and post-modification recorded investment of \$74 that was modified using lengthened amortization during the three months ended June 30, 2012. Additionally, there was one loan in the commercial segment with a pre- and post-modification recorded investment of

\$28, that was modified using lengthened amortization during the three months ended March 31, 2012. There was no financial impact for specific reserves or charge-offs for the TDR loans that were modified during the three and six months ended June 30, 2012.

There were no TDR loans that were modified within the twelve months preceding June 30, 2013 or June 30, 2012 that subsequently had a payment default during the six months ended June 30, 2013 or 2012, respectively. A TDR loan is considered to have a payment default when it is past due 30 days or more.

All loans are subject to the assessment of a credit quality indicator. Risk ratings are assigned for each loan at the time of approval, and they change as circumstances dictate during the term of the loan. The Company utilizes a 9-point risk rating scale as shown below, with ratings 1 - 5 included in the Pass column, rating 6 included in the Watch column, ratings 7 - 8 included in the Substandard column and rating 9 included in the Doubtful column. The Substandard column includes all loans classified as impaired, which are included in the specific evaluation of the allowance for loan losses.

Risk rating 1: The loan is secured by cash equivalent collateral.

Risk rating 2: The loan is secured by properly margined marketable securities, bonds or cash surrender value of life insurance.

Risk rating 3: The borrower is in strong financial condition and has strong debt service capacity. The loan is performing as agreed, and the financial characteristics and trends of the borrower exceed industry statistics.

Risk rating 4: The borrower is in satisfactory financial condition and has satisfactory debt service capacity. The loan is performing as agreed, and the financial characteristics and trends of the borrower fall in line with industry statistics.

Risk rating 5: The borrower's financial condition is less than satisfactory. The loan is still generally paying as agreed, but strained cash flow may cause some slowness in payments. The collateral values adequately preclude loss on the loan. Financial characteristics and trends lag industry statistics. There may be noncompliance with loan covenants.

Risk rating 6: The borrower's financial condition is deficient. Payment delinquencies may be more common. Collateral values still protect from loss, but margins are narrow. The loan may be reliant on secondary sources of repayment, including liquidation of collateral and guarantor support.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

Risk rating 7: The loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Well-defined weaknesses exist that jeopardize the liquidation of the debt. The Company is inadequately protected by the valuation or paying capacity of the collateral pledged. If deficiencies are not corrected, there is a distinct possibility that a loss will be sustained.

Risk rating 8: All the characteristics of rating 7 exist with the added condition that the loan is past due more than 90 days or there is reason to believe the Company will not receive its principal and interest according to the terms of the loan agreement.

Risk rating 9: All the weaknesses inherent in risk ratings 7 and 8 exist with the added condition that collection or liquidation, on the basis of currently known facts, conditions and values, is highly questionable and improbable. A loan reaching this category would most likely be charged off.

Credit quality indicators for all loans and the Company's risk rating process are dynamic and updated on a continuous basis. Risk ratings are updated as circumstances that could affect the repayment of an individual loan are brought to management's attention through an established monitoring process. Individual lenders initiate changes as appropriate for ratings 1 through 5, and changes for ratings 6 through 9 are initiated via communications with management. The likelihood of loss increases as the risk rating increases and is generally preceded by a loan appearing on the Watch List, which consists of all loans with a risk rating of 6 or worse. Written action plans with firm target dates for resolution of identified problems are maintained and reviewed on a quarterly basis for all segments of criticized loans.

In addition to the Company's internal credit monitoring practices and procedures, an outsourced independent credit review function is in place to further assess assigned internal risk classifications and monitor compliance with internal lending policies and procedures.

In all portfolio segments, the primary risks are that a borrower's income stream diminishes to the point that it is not able to make scheduled principal and interest payments and any collateral securing the loan has declined in value. The risk of declining collateral values is present for most types of loans.

Commercial loans consist primarily of loans to businesses for various purposes, including revolving lines to finance current operations, inventory and accounts receivable, and capital expenditure loans to finance equipment and other fixed assets. These loans generally have short maturities, have either adjustable or fixed interest rates, and are either unsecured or secured by inventory, accounts receivable and/or fixed assets. For commercial loans the primary source of repayment is from the operation of the business.

Real estate loans include various types of loans for which the Company holds real property as collateral and consist of loans on commercial properties and single and multifamily residences. Real estate loans are typically structured to mature or reprice every 5 years with payments based on amortization periods up to 30 years. The majority of construction loans are to contractors and developers for construction of commercial buildings or residential real estate. These loans typically have maturities up to 24 months. The Company's loan policy includes minimum appraisal and other credit guidelines.

Consumer loans include loans extended to individuals for household, family and other personal expenditures not secured by real estate. The majority of the Company's consumer lending is for vehicles, consolidation of personal debts and household improvements. For consumer loans, including 1-4 family residential and home equity loans, the source of repayment typically consists of wages.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans in each of the Company's segments are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The allowance is an amount that management believes will be adequate to absorb probable losses on existing loans, based on an evaluation of the collectability of loans and prior loss experience. This evaluation also takes into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, the review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay. While management uses the best information available to make its evaluation, future adjustments to the allowance may be necessary if there are significant changes in economic conditions or the other factors relied upon.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

The allowance for loan losses consists of specific and general components. The specific component relates to loans that meet the definition of impaired. The general component covers the remaining loans and is based on historical loss experience adjusted for qualitative factors such as delinquency trends, loan growth, economic elements and local market conditions. These same policies are applied to all segments of loans. In addition, regulatory agencies, as an integral part of their examination processes, periodically review the Company's allowance for loan losses, and may require the Company to make additions to the allowance based on their judgment about information available to them at the time of their examinations.

The following tables detail changes in the allowance for loan losses by segment for the three and six months ended June 30, 2013 and 2012.

	Three Months Ended June 30, 2013

5. Derivatives

The Company uses interest rate swap agreements to assist in its interest rate risk management. The notional amounts of the interest rate swaps do not represent amounts exchanged by the counterparties. The notional amount of a derivative is used to determine, along with other terms of the derivative, the amounts to be exchanged between the counterparties.

The Company has variable rate funding, which creates exposure to variability in interest payments due to changes in interest rates. In December 2012, to manage the interest rate risk related to the variability of interest payments, the Company entered into three forward-starting interest rate swap transactions, with a total notional amount of \$80,000, to effectively convert \$80,000 of its variable rate FHLB advances to fixed interest rate debt as of the forward-starting date of the swap transactions. The effective dates on the interest rate swaps executed in December 2012 ranged from December 2014 to December 2015. The three swap transactions were designated as cash flow hedges of the changes in cash flows attributable to changes in LIBOR, the benchmark interest rate being hedged, associated with the interest payments made on the previously mentioned FHLB advances with quarterly interest rate reset dates.

In June 2013, to manage the interest rate risk related to the variability of interest payments, the Company entered into a forward-starting interest rate swap transaction, with a total notional amount of \$20,000 to effectively convert its \$20,000 variable rate junior subordinated notes to fixed rate debt as of the forward-starting date of the swap transaction. The effective date of this swap is June 30, 2014. This swap transaction was designated as a cash flow hedge of the change in cash flows attributable to the change in LIBOR, the benchmark interest rate being hedged, associated with the interest payments made on \$20,000 of the Company's junior subordinated debt with a quarterly interest reset date.

At inception of each hedge transaction, the Company asserted that the underlying principal balance would remain outstanding throughout the hedge transaction, making it probable that sufficient LIBOR-based interest payments would exist through the maturity date of the swaps. The cash flow hedges were determined to be fully effective during the remaining terms of the swaps. Therefore, the aggregate fair value of the swaps is recorded in other assets or other liabilities with changes in market value recorded in other comprehensive income, net of deferred taxes. See Note 6 for additional fair value information and disclosures. The amounts included in accumulated other comprehensive income will be reclassified to interest expense should the hedge no longer be considered effective. No amount of ineffectiveness was included in net income for the six months ended June 30, 2013, and the Company expects there will be no reclassification from accumulated other comprehensive income to interest expense for the next twelve months through June 30, 2014. The Company will continue to assess the effectiveness of the hedges on a quarterly basis.

The Company is exposed to credit risk in the event of nonperformance by the interest rate swap counterparty. The Company minimizes this risk by entering into derivative contracts with only large, stable financial institutions, and the Company has not experienced, and does not expect, any losses from counterparty nonperformance on the interest rate swaps. The Company monitors counterparty risk in accordance with the provisions of ASC 815. In addition, the interest rate swap agreements contain language outlining collateral-pledging requirements for each counterparty. Collateral must be posted when the market value exceeds certain threshold limits. The Company was not required to pledge any collateral to the counterparty as of June 30, 2013. The counterparty was required to pledge \$3,597 of

collateral to the Company as of June 30, 2013. There is the possibility that the Company may need to pledge collateral in the future.

The tables below identify the balance sheet category and fair values of the Company's derivative instruments designated as cash flow hedges as of June 30, 2013 and December 31, 2012.

June 30, 2013	Notional Amount	Fair Value	Balance Sheet Category	Receive Rate	Pay Rate	Maturity
Interest rate swap (1)	\$25,000	\$773	Other Assets	0.56	% 2.10	% 12/23/2019
Interest rate swap (2)	25,000	879	Other Assets	0.58	% 2.34	% 6/22/2020
Interest rate swap (3)	30,000	1,060	Other Assets	0.58	% 2.52	% 9/21/2020
Interest rate swap (4)	20,000	317	Other Assets	3.32	% 4.88	% 6/30/2019

Interest rate swap (3)	1,327	Interest Expense	—	Other Income	—
Interest rate swap (4)	317	Interest Expense	—	Other Income	—

6. Long-Term Debt

On June 27, 2013, the Company borrowed \$16,000 from a commercial bank in the form of a five-year amortizing secured term loan with a variable rate of 1.95 percent plus 30-day LIBOR. The proceeds were used to finance the repurchase and cancellation of 1,440,592 shares of common stock discussed in Note 8. In the event that the Company defaults under the note, the interest rate would increase by an additional five percent. The Company also entered into a \$5,000 secured line of credit which expires on June 27, 2014. Both the note and the secured line of credit are secured by a pledge of certain of the Company's assets, including the stock of West Bank.

Also occurring during June 2013 was the purchase of a commercial lot in Coralville for a new eastern Iowa main office. The purchase was financed with an eight-and-one-half-year variable payment contract for \$765 with a fixed interest rate of 1.25 percent. The financing was requested by the seller to accommodate their cash flow planning.

7. Fair Value Measurements

Accounting guidance on fair value measurements and disclosures defines fair value, establishes a framework for measuring the fair value of assets and liabilities using a hierarchy system, and defines required disclosures. It clarifies that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts business.

The Company's balance sheet contains securities available for sale that are recorded at fair value on a recurring basis. The three-level valuation hierarchy for disclosure of fair value is as follows:

Level 1 uses quoted market prices in active markets for identical assets or liabilities.

Level 2 uses observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3 uses unobservable inputs that are not corroborated by market data.

The Company's policy is to recognize transfers between Levels at the end of each reporting period, if applicable. There were no transfers between Levels of the fair value hierarchy during the six months ended June 30, 2013.

24

Table of Contents

West Bancorporation, Inc. and Subsidiary
 Notes to Consolidated Financial Statements
 (unaudited)
 (dollars in thousands, except per share information)

Securities available for sale: When available, quoted market prices are used to determine the fair value of investment securities, and such items so valued are classified within Level 1 of the fair value hierarchy. Examples include U.S. Treasury securities, certain corporate bonds and preferred stocks. For other securities, the Company determines fair value based on various sources and may apply matrix pricing with observable prices for similar bonds where a price for the identical bond is not observable. Securities measured at fair value by such methods are classified as Level 2. The fair values of Level 2 securities are determined by pricing models that consider observable market data such as interest rate volatilities, LIBOR yield curve, credit spreads, prices from market makers and live trading systems. Certain securities are not valued based on observable inputs and are, therefore, classified as Level 3. The fair value of these securities is based on management's best estimates.

Generally, management obtains the fair value of investment securities at the end of each reporting period via a third party pricing service. Management, with the assistance of an independent investment advisory firm, reviewed the valuation process used by the third party and believes that process is valid. On a quarterly basis management corroborates the fair values of investment securities by obtaining pricing from an independent investment advisory firm and compares the two sets of fair values. Any significant variances are reviewed and investigated. In addition, the Company has instituted a practice of further testing the fair values of a sample of securities. For that sample, the prices are further validated by management, with assistance from an independent investment advisory firm, by obtaining details of the inputs used by the pricing service. Those inputs were independently tested, and management concluded the fair values were consistent with GAAP requirements and securities were properly classified in the fair value hierarchy.

Derivative instruments: The Company's derivative instruments consist of interest rate swaps, which are accounted for as cash flow hedges. The Company's derivative position is classified within Level 2 of the fair value hierarchy and is valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers and/or non-binding broker-dealer quotations. The fair value of the derivative is determined using discounted cash flow models. These models' key assumptions include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, yield curves, nonperformance risk and volatility. Derivative contracts are executed with a Credit Support Annex, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect the interests of the Company and its counterparties, should either party suffer a credit rating deterioration.

The following tables present the balances of assets and liabilities measured at fair value on a recurring basis by level as of June 30, 2013 and December 31, 2012.

 (dollars in thousands, except per share information)

Certain assets are measured at fair value on a nonrecurring basis. That is, they are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following tables present those assets carried on the balance sheet by caption and by level within the valuation hierarchy as of June 30, 2013 and December 31, 2012.

Description	June 30, 2013			
	Total	Level 1	Level 2	Level 3
Assets:				
Impaired loans	\$3,278	\$—	\$—	\$3,278
Other real estate owned	7,980	—	—	7,980
Total	\$11,258	\$—	\$—	\$11,258

Description	December 31, 2012			
	Total	Level 1	Level 2	Level 3
Assets:				
Impaired loans	\$5,182	\$—	\$—	\$5,182
Other real estate owned	8,304	—	—	8,304
Total	\$13,486	\$—	\$—	\$13,486

Loans in the previous tables consist of impaired loans for which a fair value adjustment was recorded. Impaired loans are evaluated and valued at the lower of cost or fair value when the loan is identified as impaired. Fair value is measured based on the value of the collateral securing these loans and is classified as Level 3 in the fair value hierarchy. Collateral may be real estate or business assets such as equipment, inventory or accounts receivable. Fair value is determined by appraisals. Appraised or reported values may be discounted based on management's opinions concerning market developments or the client's business. Other real estate owned in the tables above consists of property acquired through foreclosures and settlements of loans. Property acquired is carried at fair value of the property less estimated disposal costs, and is classified as Level 3 in the fair value hierarchy.

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

Cash and due from banks: The carrying amount approximates fair value.

Federal funds sold and other short-term investments: The carrying amount approximates fair value.

FHLB stock: The fair value of this restricted stock is estimated at its carrying value and redemption price of \$100 per share.

Loans held for sale: The fair values of loans held for sale are based on estimated selling prices.

Loans: The fair values of loans are estimated using discounted cash flow analysis based on observable market interest rates currently being offered for loans with similar terms to borrowers with similar credit quality.

Deposits: The carrying amounts for demand and savings deposits, which represent the amounts payable on demand, approximate their fair values. The fair values for fixed-rate and variable-rate certificates of deposit are estimated using discounted cash flow analysis, based on observable market interest rates currently being offered on certificates with similar terms.

Accrued interest receivable and payable: The fair values of both accrued interest receivable and payable approximate their carrying amounts.

Borrowings: The carrying amounts of federal funds purchased and securities sold under agreements to repurchase approximates their fair values. Fair values of FHLB advances, subordinated notes and other long-term borrowings are estimated using discounted cash flow analysis, based on observable market interest rates currently being offered with similar terms.

8. Common Stock Repurchase

On June 4, 2013, the Company entered into an agreement to repurchase 1,440,592 shares of its common stock from American Equity Investment Life Holding Company and American Equity Life Insurance Company. The shares represented 8.27 percent of the total common shares of the Company as of that date. The purchase price was \$10.95 per share. The purchase took place on June 5, 2013. The repurchased shares were canceled, thus reducing the Company's total issued and outstanding common shares to 15,969,464. This transaction was the result of the seller indicating a desire to sell the shares. The purchase was financed as described in Note 6.

9. Earnings per Common Share

Basic earnings per common share are computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted earnings per common share for the three and six months ended June 30, 2013 and 2012 reflects the potential dilution that could occur if the Company's outstanding restricted stock units were vested. The dilutive effect was computed using the treasury stock method, which assumes all stock-based awards were exercised during the time period they were outstanding and the hypothetical proceeds from exercise were used by the Company to purchase common stock at the average market price during the period. The incremental shares, to the extent they would have been dilutive, were included in the denominator of the diluted earnings per common share calculation. The calculation of earnings per common share and diluted earnings per common share for the three and six months ended June 30, 2013 and 2012 is presented in the following table.

(in thousands, except per share information)	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net income	\$4,298	\$4,383	\$8,246	\$8,360
Weighted average common shares outstanding	16,997	17,404	17,199	17,404
Average restricted stock units outstanding	33	11	64	16
Diluted weighted average common shares outstanding	17,030	17,415	17,263	17,420
Basic earnings per common share	\$0.25	\$0.25	\$0.48	\$0.48
Diluted earnings per common share	\$0.25	\$0.25	\$0.48	\$0.48

10. Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income consists of the net change in unrealized gains and losses on the Company's securities available for sale, including the noncredit-related portion of unrealized gains and losses of any OTTI securities, and the effective portion of the change in value of derivative instruments.

The following tables summarize the changes in the balances of each component of accumulated other comprehensive income (loss), net of tax, for the six months ended June 30, 2013 and 2012.

	Noncredit-related			
	Unrealized Gains (Losses) on Securities with OTTI	Unrealized Gains (Losses) on Securities without OTTI	Unrealized Gains (Losses) on Derivatives	Accumulated Other Comprehensive Income (Loss)
Balance, December 31, 2012	\$ (1,759)	\$ 4,146	\$ (461)	\$ 1,926
Other comprehensive income (loss) before reclassifications	175	(4,660)	2,339	(2,146)

11. Deferred Income Taxes

Net deferred tax assets consisted of the following as of June 30, 2013 and December 31, 2012.

	June 30, 2013	December 31, 2012
Allowance for loan losses	\$6,064	\$5,901
Investment security impairment	106	106
Net unrealized losses on securities available for sale	1,286	—
Net unrealized losses on interest rate swaps	—	283
Intangibles	1,541	1,695
Other real estate owned	1,478	1,475
Accrued expenses	677	766
Other deferred tax assets	258	288
State net operating loss carryforward	574	529
Capital loss carryforward	4,065	4,065
Net deferred loan fees and costs	(266) (272
Net unrealized gains on securities available for sale	—	(1,463
Net unrealized gains on interest rate swaps	(1,151) —
Premises and equipment	(616) (513
Loans	(958) (878
Other deferred tax liabilities	(290) (291
Net deferred tax assets before valuation allowance	12,768	11,691
Valuation allowance	(4,745) (4,700
Net deferred tax assets	\$8,023	\$6,991

The Company has recorded a valuation allowance against the tax effect of the state net operating loss carryforwards, federal and state capital loss carryforwards and investment security impairment as management believes it is more likely than not that such carryforwards will expire without being utilized.

12. Commitments and Contingencies

The Company is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated balance sheets. The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations that it uses for on-balance-sheet instruments. The Company's commitments as of June 30, 2013 and December 31, 2012 consisted of the following approximate amounts.

	June 30, 2013	December 31, 2012
Commitments to extend credit	\$424,290	\$360,879
Standby letters of credit	3,063	10,488
	\$427,353	\$371,367

West Bank has executed Mortgage Partnership Finance (MPF) Master Commitments (the Commitments) with the FHLB of Des Moines to deliver mortgage loans and to guarantee the payment of any realized losses that exceed the FHLB's first loss account for mortgages delivered under the Commitments. West Bank receives credit enhancement fees from the FHLB for providing this guarantee and continuing to assist with managing the credit risk of the MPF Program mortgage loans. The term of the current Commitment is through January 16, 2014. At June 30, 2013, the liability represented by the present value of the credit enhancement fees less any expected losses in the mortgages delivered under the Commitments was approximately \$445.

Table of Contents

West Bancorporation, Inc. and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)
(dollars in thousands, except per share information)

On September 29, 2010, West Bank was sued in a purported class action lawsuit that, as amended, asserts that nonsufficient funds fees charged by West Bank to Iowa resident noncommercial customers on bank debit card transactions, but not checks or Automated Clearing House items, are usurious under Iowa law, rather than allowable fees, and that the sequence in which West Bank formerly posted items for payment in consumer demand accounts violated various alleged duties of good faith. As West Bank understands the current claims, plaintiffs are seeking alternative remedies that include injunctive relief, damages (including treble damages), punitive damages, refund of fees, and attorney fees. West Bank believes the lawsuit allegations are factually and legally incorrect in multiple material ways and is vigorously defending the action. The amount of potential loss, if any, cannot be reasonably estimated now because the multiple alternative claims involve different time periods and present different defenses related to potential liability, class certification, and damages.

In the normal course of business, the Company and West Bank are involved in various other legal proceedings. In the opinion of management, any liability resulting from such proceedings would not have a material adverse effect on the consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

"SAFE HARBOR" STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT

Certain statements in this report, other than purely historical information, including estimates, projections, statements relating to our business plans, objectives and expected operating results and the assumptions upon which those statements are based, are "forward-looking statements" within the meanings of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements may appear throughout this report. These forward-looking statements are generally identified by the words "believes," "expects," "intends," "should," "anticipates," "projects," "future," "may," "will," "strategy," "opportunity," "will be," "will likely result," "will continue" or similar references, or references to estimates, predictions or future events. Such forward-looking statements are based upon certain underlying assumptions, risks and uncertainties. Because of the possibility that the underlying assumptions are incorrect or do not materialize as expected in the future, actual results could differ materially from these forward-looking statements. Risks and uncertainties that may affect future results include: interest rate risk; competitive pressures; pricing pressures on loans and deposits; changes in credit and other risks posed by the Company's loan and investment portfolios, including declines in commercial or residential real estate values, or changes in the allowance for loan losses dictated by new market conditions or regulatory requirements; actions of bank and non-bank competitors; changes in local and national economic conditions; changes in regulatory requirements, limitations and costs; changes in customers' acceptance of the Company's products and services; and any other risks described in the "Risk Factors" sections of this and other reports filed by the Company with the Securities and Exchange Commission. The Company undertakes no obligation to revise or update such forward-looking statements to reflect current or future events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

(dollars in thousands, except share and per share information)

THREE AND SIX MONTHS ENDED JUNE 30, 2013

OVERVIEW

The following discussion describes the consolidated operations and financial condition of the Company, which includes West Bank, West Bank's wholly-owned subsidiary WB Funding Corporation (which owns an interest in SmartyPig, LLC), and West Bank's 99.99 percent owned subsidiary ICD IV, LLC (a community development entity). Results of operations for the three and six months ended June 30, 2013 are compared to the results for the same periods in 2012, and the consolidated financial condition of the Company as of June 30, 2013 is compared to balances as of December 31, 2012.

Net income for the three months ended June 30, 2013 was \$4,298 compared to \$4,383 for the three months ended June 30, 2012. The decrease of \$85 was due to several significant fluctuations compared to the prior year. Net interest income for the second quarter of 2013 increased \$1,142 due to lower market interest rates on deposits and the December 2012 modification of \$80,000 of FHLB advances, in conjunction with a higher level of earning assets. Meanwhile, gains and fees on sales of residential mortgages declined \$355 due to rising interest rates, and noninterest expense declined primarily because of reduced costs to hold other real estate owned. Finally, the second quarter of 2012 included a tax-exempt gain on bank-owned life insurance of \$841 and net gains on the sale of investment securities of \$279.

Basic and diluted earnings per common share were \$0.25 for the three months ended June 30, 2013 and 2012. The Company's annualized return on average equity and return on average assets for the three months ended June 30, 2013 were 12.93 and 1.19 percent, respectively, compared to 13.69 and 1.32 percent, respectively, for the three months ended June 30, 2012.

Net income for the six months ended June 30, 2013 was \$8,246 compared to \$8,360 for the six months ended June 30, 2012. Total basic and diluted earnings per common share were \$0.48 for both time periods. The Company's annualized return on average equity and return on average assets for the six months ended June 30, 2013 were 12.39 and 1.16 percent, respectively, compared to 13.26 and 1.28 percent, respectively, for the six months ended June 30, 2012.

For the six months ended June 30, 2013 net interest income increased \$1,788 compared to the same period in 2012 for the same reasons mentioned above for the three month periods. On a year-to-date basis, the provision for loan losses was \$150 in 2013 while no provision was recorded in the six months ended June 30, 2012. Other significant changes between the first six months of 2013 and 2012 were a \$987 reduction in other real estate owned expense, which was offset by the previously mentioned gain from bank-owned life insurance in 2012; a \$591 reduction in gains and fees on sales of residential mortgages; and a \$748 increase in salaries and benefits.

During the first six months of 2013, total loans outstanding increased \$41,708, and they grew \$110,695 compared to a year earlier. Management believes the loan portfolio will continue to grow during 2013 as the pipeline for new loans remains strong. It is expected that the new branch office, located in Rochester Minnesota, will contribute to the expected growth. After one full quarter of operations, this location had approximately \$2,700 of loans outstanding. The Rochester branch office originally opened as a loan production office in March 2013. The Company subsequently requested regulatory approval to operate the Rochester location as a branch office, and the Company received approval in June 2013. The Rochester location began operating as a branch office effective July 1, 2013. As of June 30, 2013, the allowance for loan losses was 1.65 percent of loans outstanding and was deemed by management to be adequate to absorb any losses inherent in the loan portfolio.

Investment securities purchases of approximately \$138,100 during the first six months of 2013 caused the investment portfolio to grow by \$84,014 compared to December 31, 2012. The purchases were made in a planned effort to reduce the level of federal funds sold, in an effort to improve the net interest margin during a continuing period of downward pressure on the margin.

The Board of Directors declared a quarterly dividend and increased it 10 percent to \$0.11 per common share at its meeting on July 24, 2013. The dividend is payable on August 27, 2013, to shareholders of record as of August 7, 2013. The Board of Directors also authorized management to repurchase up to \$2,000 of the Company's common stock between July 2013 and April 2014. The authorization does not require such purchases and is subject to certain restrictions. Shares of Company common stock may be repurchased on the open market or in privately negotiated transactions. The extent to which the shares are repurchased, if any, and the timing of such repurchase will depend on market conditions and other corporate considerations.

In early June 2013, the Company repurchased and canceled 1,440,592 shares of its common stock at a price of \$10.95 per share. The Company financed the purchase with a five-year, \$16,000, secured term note from a commercial bank. Management believes that the favorable terms of the purchase and financing of the transaction should enhance earnings per share going forward.

RESULTS OF OPERATIONS

The following table shows selected financial results and measures for the three and six months ended June 30, 2013 compared with the same period in 2012.

	Three Months Ended June 30,				Six Months Ended June 30,			
	2013	2012	Change	Change %	2013	2012	Change	Change %
Net income	\$4,298	\$4,383	\$(85)	(1.9)%	\$8,246	\$8,360	\$(114)	(1.4)%
Average assets	1,443,061	1,339,703	103,358	7.7 %	1,433,642	1,318,207	115,435	8.8 %
Average stockholders' equity	133,290	128,757	4,533	3.5 %	134,256	126,779	7,477	5.9 %
Return on average assets	1.19 %	1.32 %	(0.13)%		1.16 %	1.28 %	(0.12)%	
Return on average equity	12.93 %	13.69 %	(0.76)%		12.39 %	13.26 %	(0.87)%	
Efficiency ratio	53.15 %	49.31 %	3.84 %		53.50 %	50.52 %	2.98 %	
Dividend payout ratio	40.51 %	31.78 %	8.73 %		42.21 %	33.30 %	8.91 %	
Average equity to assets ratio	9.24 %	9.61 %	(0.37)%		9.36 %	9.62 %	(0.26)%	
					As of June 30,			
					2013	2012	Change	
Texas ratio					10.00 %	13.00 %	(3.00)%	
Equity to assets ratio					8.38 %	9.63 %	(1.25)%	
Tangible common equity ratio					8.38 %	9.63 %	(1.25)%	

Definitions of ratios:

Return on average assets - annualized net income divided by average assets.

Return on average equity - annualized net income divided by average stockholders' equity.

Efficiency ratio - noninterest expense (excluding other real estate owned expense) divided by noninterest income (excluding net securities gains and net impairment losses) plus tax-equivalent net interest income.

Dividend payout ratio - dividends paid to common stockholders divided by net income.

Texas ratio - total nonperforming assets divided by tangible common equity plus the allowance for loan losses.

Equity to assets ratio - equity divided by assets.

Tangible common equity ratio - common equity less intangible assets divided by tangible assets.

Total interest-bearing liabilities	\$983,405	\$914,543	\$68,862	7.53%	3,475	5,033	(1,558)	(30.96)%	0.71%	1.11%	(0.40)%
Tax-equivalent net interest income					\$23,162	\$21,424	\$1,738	8.11%			

Net interest spread	3.24%	3.17%	0.07 %
Net interest margin	3.44%	3.47%	(0.03)%

Fluctuations in net interest income can result from the combination of changes in the balances of asset and liability categories and changes in interest rates. Interest rates earned and paid are affected by general economic conditions, particularly changes in market interest rates, and by competitive factors, government policies and the actions of regulatory authorities. Net interest margin is a measure of the net return on interest-earning assets and is computed by dividing annualized tax-equivalent net interest income by the average of total interest-earning assets for the period.

The net interest margin for the three months ended June 30, 2013, increased 7 basis points to 3.51 percent compared to the three months ended June 30, 2012, and increased 15 basis points compared to the first quarter of 2013. For the six months ended June 30, 2013, the net interest margin declined 3 basis points to 3.44 percent compared to the six months ended June 30, 2012. The increase in tax-equivalent net interest income for the six months ended June 30, 2013 of \$1,738 was primarily the result of the decline in interest expense on interest-bearing deposits and borrowings. Management believes the net interest margin will remain under pressure but relatively consistent throughout the rest of 2013 if market interest rates don't climb any higher than they did during June 2013. Two management actions taken in December 2012 and during the first half of 2013 have and will continue to assist in maintaining the net interest margin. The first was the modification of \$80,000 of the Company's FHLB advances in December 2012. The FHLB advances were refinanced as variable rate borrowings tied to three-month LIBOR. The overall interest rate effective as of June 30, 2013 on the FHLB advances was 2.82 percent, including amortization of prepayment fees. To prevent a negative impact to interest expense in the long-term, the Company entered into forward-starting interest rate swaps that, in effect, convert the payment streams to a fixed interest rate beginning in 2014 and 2015. The second action was the decision to reinvest federal funds sold into investment securities in 2013. Approximately \$138,100 was invested during the first half of 2013.

Table of Contents

(dollars in thousands, except share and per share information)

Year-to-date tax-equivalent interest on loans declined \$249 for the first six months of 2013 compared to the same period in 2012. The decline was caused by a 49 basis point decline in yield, which exceeded the impact of a 9.22 percent increase in volume. The Company continues to focus on expanding existing customer relationships and developing new relationships. The yield on the Company's loan portfolio is affected by the mix of the loans in the portfolio, the interest rate environment, the effects of competition, the level of nonaccrual loans and reversals of previously accrued interest on charged-off loans. The political and interest rate environments can influence the volume of new loan originations and the mix of variable-rate versus fixed-rate loans.

For the first six months of 2013, the average balance of investment securities was \$50,625 higher than in the first six months of 2012, while the yield declined 8 basis points. The decline in yield was caused by lower available yields in the market for purchases.

The average rate paid on deposits for the first six months of 2013 declined to 0.44 percent from 0.72 percent for the same period last year. Total interest expense on deposits declined by \$814 compared to the first six months of 2012, as the decline in rates exceeded the effect of a 12.52 percent increase in average interest-bearing deposits.

The average rate paid on other borrowings declined by 54 basis points compared to the first six months of 2012 primarily due to the previously mentioned refinancing of the FHLB borrowings. The rate on the FHLB advances declined to 2.84 percent for the six months ended June 30, 2013 compared to 3.90 percent for the six months ended June 30, 2012. The rate on the Company's subordinated notes is variable with the rate tied to LIBOR. The average rate during the first six months of 2013 was 3.46 percent compared to 3.70 percent for the first six months of 2012. In June 2013, the Company entered into a forward-starting interest rate swap to manage the interest rate risk of the variability of interest payments on \$20,000 of the outstanding subordinated notes. The effective date of the interest rate swap is June 30, 2014.

Provision for Loan Losses and the Related Allowance for Loan Losses

The provision for loan losses represents charges made to earnings to maintain an adequate allowance for loan losses. The allowance for loan losses is management's best estimate of probable losses inherent in the loan portfolio as of the balance sheet date. Factors considered in establishing an appropriate allowance include: an assessment of the financial condition of the borrower; the value and adequacy of loan collateral; the condition of the local economy; the condition of the borrower's specific industry; the levels and trends of loans by segment; and a review of delinquent and classified loans.

The adequacy of the allowance for loan losses is evaluated quarterly by management and reviewed by the Board of Directors. This evaluation focuses on factors such as specific loan reviews, loan growth, changes in the components of the loan portfolio given the current and forecasted economic conditions, and historical loss experience. Any one of the following conditions may result in the review of a specific loan: concern about whether the borrower's cash flow or net worth is sufficient to repay the loan; delinquency status; criticism of the loan in a regulatory examination; the suspension of interest accrual; or other factors, including whether the loan has other unusual characteristics that suggest special monitoring is warranted. The Company's concentration risks include geographic concentration in central Iowa. The local economies are comprised primarily of service industries and state and county governments.

While management uses available information to recognize potential losses on loans, further reduction in the carrying amounts of loans may be necessary based on changes in circumstances or information acquired later. Furthermore, changes in future economic activity are always uncertain. Identifiable sectors within the general economy are subject to additional volatility, which at any time may have a substantial impact on the loan portfolio. In addition, regulatory agencies, as an integral part of their examination processes, periodically review the estimated losses on loans. Those

agencies may require the Company to recognize additional losses based on information available to them at the time of their examinations.

Table of Contents

(dollars in thousands, except share and per share information)

The Company's policy is to charge off loans when, in management's opinion, the loan or a portion of a loan is deemed uncollectible, although concerted efforts are made to maximize future recoveries. The following table summarizes the activity in the Company's allowance for loan losses for the three and six months ended June 30, 2013 and 2012 and related ratios.

	Analysis of the Allowance for Loan Losses for the Three Months Ended June 30,			Analysis of the Allowance for Loan Losses for the Six Months Ended June 30,		
	2013	2012	Change	2013	2012	Change
Balance at beginning of period	\$ 15,632	\$ 16,651	\$(1,019)	\$ 15,529	\$ 16,778	\$(1,249)
Charge-offs	(31)	(1,492)	1,461	(235)	(1,680)	1,445
Recoveries	358	214	144	515	275	240
Net (charge-offs) recoveries	327	(1,278)	1,605	280	(1,405)	1,685
Provision for loan losses charged to operations	—	—	—	150	—	150
Balance at end of period	\$ 15,959	\$ 15,373	\$ 586	\$ 15,959	\$ 15,373	\$ 586
Average loans outstanding, excluding loans held for sale	\$ 946,405	\$ 857,053		\$ 929,543	\$ 851,582	
Ratio of annualized net charge-offs (recoveries) during the period to average loans outstanding	(0.14)%	0.60 %		(0.06)%	0.33 %	
Ratio of allowance for loan losses to average loans outstanding	1.69 %	1.79 %		1.72 %	1.81 %	

The allowance for loan losses represented 383.63 percent of nonperforming loans at June 30, 2013, compared to 214.02 percent at December 31, 2012. The 2013 year-to-date provision was \$150 while no provision was recorded in the first six months of 2012. Out of the total charge-offs of \$235 for the first six months of 2013, \$199 related to one customer. During the first six months of 2013, the majority of the \$515 of year-to-date recoveries were from five customers.

The Company has a significant portion of its loan portfolio in commercial real estate loans, commercial lines of credit, commercial term loans and construction or land development loans. The Company's typical commercial borrower is a small or medium-sized, privately-owned Iowa business entity. The Company's commercial loans typically have greater credit risks than residential mortgages or consumer loans because they often have larger balances and repayment usually depends on the borrowers' successful business operations. Commercial loans also involve additional risks because they generally are not fully repaid over the loan period and, thus, usually require refinancing or a large payoff at maturity. When the economy turns downward, commercial borrowers may not be able to repay their loans due to reduced cash flows, and the value of their assets, which are usually pledged as collateral, may decrease rapidly and significantly.

continue to expand its mortgage origination staff to capitalize on the opportunities in its local markets. Improvements in the level of home sales along with the staff additions are expected to provide a strong volume of originations throughout 2013. The Company is carefully monitoring interest rate fluctuations.

The lower increase in cash value of bank-owned life insurance was due to lower crediting rates within the policies, which are attributable to the low interest rate environment. Gain from bank-owned life insurance occurred in the three months ended June 30, 2012 due to the death of a bank officer; there was no such occurrence during the same period in 2013.

Table of Contents

(dollars in thousands, except share and per share information)

As of June 30, 2013, the Company held one pooled TPS it considered to have OTTI. As a result of the quarterly valuations of this security, a credit loss of \$173 was recognized in the first six months of 2012, while no additional credit loss occurred in the first half of 2013.

The Company did not sell any securities during the first six months of 2013. The Company took advantage of an opportunity to sell two collateralized mortgage obligations in the second quarter of 2012 at a gain and was able to replace them with similar bonds with comparable yields.

Noninterest Expense

The following tables show the variance from the prior year in the noninterest expense categories shown in the Consolidated Statements of Income. In addition, accounts within the “Other expenses” category that represent a significant portion of the total or a significant variance are shown below.

	Three Months Ended June 30,				
	2013	2012	Change	Change %

Total noninterest expense	\$14,661	\$14,678	\$(17)	(0.12))%

The increase in salaries and employee benefits for the first half of 2013 consisted of normal salary increases and salaries for employees added in the past year (\$409), recognition of stock-based compensation costs (\$95), higher bonus accruals (\$87) and higher benefit costs (\$156). The benefit cost increases were primarily for health insurance, 401(k) plan expenses and payroll taxes.

Occupancy expense increased for both the three and six month periods ended June 30, 2013 due to higher depreciation and equipment service contract expenses related to technology upgrades. Rental expense also increased due to the addition of the new Rochester, Minnesota location, an upgraded office in West Des Moines and the lease of additional space at the main bank location.

FDIC insurance expense increased in the first half of 2013 because of the growth in total average assets. The assessment rate declined slightly compared to 2012 and is expected to remain at the lowest established rate for the foreseeable future.

Other real estate owned expense in the first half of 2013 declined \$987 compared to the prior year. There were no property valuation write-downs during the first half of 2013 compared to write-downs of \$1,008 for the same time period in 2012 that resulted from updated appraisals and estimated disposal costs. The Company's practice is to obtain updated appraisals on other real estate owned at least annually.

Professional fees increased for both the three and six months ended June 30, 2013 compared to the same time periods in 2012 primarily due to higher legal fees incurred to defend the previously disclosed potential class-action lawsuit. Consulting fees declined year-over-year as a number of projects were completed in 2012 and will not be repeated in 2013.

Marketing expense grew primarily as a result of costs related to opening an upgraded office in West Des Moines and the opening of the previously mentioned location in Minnesota. The increase in business development costs was the

result of expanding sponsorships of local events in the communities the Company serves. Director fees increased by \$71 compared to the first half of 2012 primarily due to the recognition of stock-based compensation expense related to the grant of restricted stock units.

Charitable contributions decreased for both the three and six months ended June 30, 2013 compared to the prior year as the Company made a larger donation to the West Bancorporation Foundation in the second quarter of 2012. The cost of supplies in the second quarter of 2013 included one-time costs to reissue debit cards related to changing processors. Loss on disposal of fixed assets in the second quarter of 2012 included the write-off of design costs related to the construction of a new leased replacement office that were not used in the final plans.

Miscellaneous losses increased during the first half of 2013 compared to 2012 as the result of increased fraudulent debit card and check forgery activity that occurred primarily in the first quarter of 2013.

Table of Contents

(dollars in thousands, except share and per share information)

Income Tax Expense

The Company recorded income tax expense of \$1,837 (29.9 percent of pre-tax income) and \$3,538 (30.0 percent of pre-tax income), respectively, for the three and six months ended June 30, 2013, compared with \$1,541 (26.0 percent of pre-tax income) and \$3,278 (28.2 percent of pre-tax income), respectively, for the three and six months ended June 30, 2012. The Company's consolidated income tax rate varied from the statutory rate primarily due to tax-exempt income, including interest on municipal securities and the increase in the cash value of bank-owned life insurance. The tax rate for the three and six months ended June 30, 2012 was lower than the tax rate for the same periods in 2013 primarily due to \$841 of tax-exempt gains from bank-owned life insurance recorded during the second quarter of 2012. The tax rate for both years was also impacted by West Bank's 2007 investment in a qualified community development entity, which generated a \$2,730 federal new markets tax credit over a seven-year period. The credit for the years ended December 31, 2013 and 2012 is \$420 for each year, with 2013 being the last year for the credit.

FINANCIAL CONDITION

Total assets as of June 30, 2013 increased minimally compared to total assets as of December 31, 2012, but there were significant changes in the components as federal funds sold were utilized to purchase investment securities and fund new loans. A summary of changes in the components of the balance sheet are described in the following paragraphs.

Investment Securities

Investment securities available for sale increased \$84,014 to \$376,328 at June 30, 2013 compared to December 31, 2012. The increase was caused by the planned reinvestment of low-rate federal funds sold into securities in an effort to enhance net interest income.

As of June 30, 2013, approximately 69 percent of the available for sale investment securities portfolio consisted of government agency guaranteed collateralized mortgage obligations and mortgage-backed securities. In the current low interest rate environment, both provide relatively good yields, have little to no credit risk and provide fairly consistent cash flows. Approximately 70 percent of all year-to-date 2013 security purchases totaling approximately \$96,350 were in these categories of securities. During the first half of 2013, the Company also purchased approximately \$31,723 of securities originated by municipalities in states other than Iowa, due to their somewhat higher yields compared to Iowa municipalities with similar credit risks.

The significant increase in long-term market interest rates at the end of the second quarter caused the fair value of our investment portfolio to decline to a level below the overall amortized cost basis. Management believes the unrealized losses (other than on the security discussed below) are due to market conditions, and not reduced estimated cash flows.

At June 30, 2013, the most significant risk of a future impairment charge related to the Company's investment in a pooled TPS, ALESCO Preferred Funding X, Ltd. As of June 30, 2013, this TPS, with a cost basis of \$4,171, was valued at \$1,616. Management first considered this pooled TPS to have OTTI in 2009. Any potential future loss that would be considered a credit loss would negatively impact net income and regulatory capital; however, the fair value adjustment at June 30, 2013, has already been recorded against equity.

Loans and Nonperforming Assets

Loans outstanding increased \$41,708 from December 31, 2012 to \$969,109 as of June 30, 2013. Management believes the loan portfolio will continue to grow as the economy shows some signs of improvement and as the result of continuing business development efforts. The volume of loans in the pipeline remains strong and the March 18, 2013 addition of the Rochester, Minnesota, loan production office and its experienced lenders produced loan balances of approximately \$2,700 during the second quarter of 2013. This location received regulatory approval to become a branch effective July 1, 2013, which management anticipates will enhance its ability to generate business. Credit quality of the Company's loan portfolio has improved in the first six months of the year as shown in the table below. The most significant portion of the reduction in nonperforming loans during the second quarter was the April 2013 payment in full of one nonaccrual construction loan. Management believes that it continues to devote appropriate resources to monitoring and reducing nonperforming assets. The Company's Texas ratio, which is computed by dividing nonperforming assets by tangible equity plus the allowance for loan losses, declined to 10.00 percent as of June 30, 2013 from 11.25 percent as of December 31, 2012. The ratios for both dates was significantly better than peer group averages, which were approximately 22 percent according to data in the March 2013 Bank Holding Company Performance Report.

Table of Contents

(dollars in thousands, except share and per share information)

The following table sets forth the amount of nonperforming loans and other nonperforming assets held by the Company and common ratio measurements of those items as of the dates shown.

	June 30, 2013	December 31, 2012	Change	
Nonaccrual loans	\$3,516	\$6,400	\$(2,884))
Loans past due 90 days and still accruing interest	—	—	—)
Troubled debt restructured loans ⁽¹⁾	644	856	(212))
Total nonperforming loans	4,160	7,256	(3,096))
Other real estate owned	7,980	8,304	(324))
Nonaccrual investment securities	1,616	1,334	282)
Total nonperforming assets	\$13,756	\$16,894	\$(3,138))
Nonperforming loans to total loans	0.43	% 0.78	% (0.35))%
Nonperforming assets to total assets	0.95	% 1.17	% (0.22))%

While TDR loans are commonly reported by the industry as nonperforming, those not classified in the nonaccrual category are accruing interest due to payment performance. TDR loans on nonaccrual status are included in the nonaccrual category. As of June 30, 2013 and December 31, 2012, there was one TDR loan with a balance of \$716 and \$810, respectively, included in the nonaccrual category.

The following tables set forth the activity within each category of nonperforming loans and assets for the six months ended June 30, 2013 and 2012, respectively.

	Six Months Ended June 30, 2013

Table of Contents

(dollars in thousands, except share and per share information)

The following table provides the composition of other real estate owned as of June 30, 2013 and December 31, 2012.

	June 30, 2013	December 31, 2012
Construction, land development and other land	\$7,845	\$7,967
1-4 family residential properties	135	223
Commercial properties	—	114
	\$7,980	\$8,304

The Company is actively marketing the assets included in the previous table. There has been increased interest from potential buyers but demand for development land remains low and has not picked up as quickly as the residential real estate market. Valuations of other real estate owned are performed by management at least annually, so that the properties are carried at current fair value less estimated disposal costs. Fair values are determined by obtaining updated appraisals or other market information. As of June 30, 2013, the construction and land development category included three properties in the Des Moines metropolitan area, one property in Missouri and one property in Arkansas. The 1-4 family residential category consisted of one home in the Des Moines area.

Reference is also made to the information and discussion earlier in this report under the heading “Provision for Loan Losses and the Related Allowance for Loan Losses,” and Notes 4 and 7 to the financial statements.

Deposits

Deposits totaled \$1,124,539 as of June 30, 2013, which was slightly lower than balances as of December 31, 2012. A decline in noninterest-bearing demand and certificates of deposit balances slightly exceeded an increase in money market accounts. The decline in noninterest-bearing demand account balances was considered a normal fluctuation as corporate customers' liquidity needs vary at any given time. Certificates of deposit continue to decline as management believes some segments of our customer base do not consider them to be an attractive investment option in the current low interest rate environment.

Borrowings

The balance of federal funds purchased and securities sold under agreements to repurchase increased \$10,075 in the first six months of 2013 to \$65,671, with the increase attributed to securities sold under agreements to repurchase. Securities sold under agreements to repurchase are fluid funds that fluctuate based on the cash flow needs of our customers. Federal funds purchased consisted of funds sold to West Bank by two Iowa banks as part of the correspondent bank services provided by West Bank.

On June 27, 2013, the Company borrowed \$16,000 in the form of a five-year amortizing secured term loan with a variable rate of 1.95 percent plus 30-day LIBOR. The proceeds were used to finance the previously mentioned repurchase and cancellation of 1,440,592 shares of common stock. Also occurring during June 2013 was the purchase of a commercial lot in Coralville for a new eastern Iowa main office. The purchase was financed with a \$765 eight-and-one-half-year variable payment contract with a fixed interest rate of 1.25 percent. The contract financing was requested by the seller to accommodate their cash flow planning.

Liquidity and Capital Resources

The objective of liquidity management is to ensure the availability of sufficient cash flows to meet all financial commitments and to capitalize on opportunities for profitable business expansion. The Company's principal source of funds is deposits. Other sources include loan principal repayments, proceeds from the maturity and sale of investment securities, principal payments on collateralized mortgage obligations and mortgage-backed securities, federal funds purchased, repurchase agreements, advances from the FHLB, and funds provided by operations. Liquidity

management is conducted on both a daily and a long-term basis. Investments in liquid assets are adjusted based on expected loan demand, projected loan and investment securities maturities and payments, expected deposit flows and the objectives set by the Company's asset-liability management policy. The Company had liquid assets (cash and cash equivalents) of \$41,262 as of June 30, 2013, compared with \$171,474 as of December 31, 2012. The decline was primarily caused by the planned purchases of investment securities and growth in the loan portfolio in the first half of 2013.

West Bank had additional borrowing capacity available from the FHLB of approximately \$98,360, as well as \$67,000 through unsecured federal funds lines of credit with correspondent banks. In addition, during the second quarter of 2013, the Company obtained a \$5,000 line of credit with a community bank for general corporate purposes. Neither West Bank nor the Company was drawing on any of these lines of credit as of June 30, 2013. Net cash from operating activities contributed \$8,503 and \$10,314 to liquidity for the six months ended June 30, 2013 and 2012, respectively. The combination of high levels of potentially liquid assets, cash flows from operations and additional borrowing capacity provided the Company with strong liquidity as of June 30, 2013.

Table of Contents

(dollars in thousands, except share and per share information)

The Company's total stockholders' equity declined to \$121,600 at June 30, 2013 from \$134,587 at December 31, 2012. The decline was primarily due to the previously mentioned repurchase and cancellation of 1,440,592 shares of common stock at a price of \$10.95 per share on June 5, 2013. The stock repurchase plus dividends paid exceeded year-to-date net income. Management believes the repurchase, which was financed at favorable terms, will enhance future earnings per share.

The Company and West Bank are subject to various regulatory capital requirements administered by federal and state banking agencies. Failure to meet minimum capital requirements (as shown in the following table) can result in certain mandatory and possibly additional discretionary actions by regulators which, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and West Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and West Bank's capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Management believes the Company and West Bank met all capital adequacy requirements to which they were subject as of June 30, 2013.

In early July 2013, the Federal Reserve Board and the FDIC issued interim final rules implementing the Basel III regulatory capital framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act changes. The rules revise minimum capital requirements and adjust prompt corrective action thresholds. The interim final rule revises the regulatory capital elements, adds a new common equity Tier I capital ratio, and increases the minimum Tier I capital ratio requirement. The revisions also permit banking organizations to retain, through a one-time election, the existing treatment for accumulated other comprehensive income and implement a new capital conservation buffer. The final rule will become effective January 1, 2015, subject to a transition period. The complex final rule will require careful review and analysis, but management believes the Company and West Bank will remain well capitalized.

The Company's and West Bank's capital amounts and ratios are presented in the following table.

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions		
	Amount	Ratio	Amount	Ratio	Amount	Ratio	
As of June 30, 2013:							
Total Capital (to Risk-Weighted Assets)							
Consolidated	\$155,846	13.82	% \$90,210	8.00	% N/A	N/A	
West Bank	150,649	13.75	87,677	8.00	\$109,596	10.00	%
Tier I Capital (to Risk-Weighted Assets)							
Consolidated	141,728	12.57	45,105	4.00	N/A	N/A	
West Bank	136,922	12.49	43,838	4.00	65,758	6.00	
Tier I Leverage							
Consolidated	141,728	9.84	57,601	4.00	N/A	N/A	
West Bank	136,922	9.60	57,029	4.00	71,286	5.00	
As of December 31, 2012:							
Total Capital (to Risk-Weighted Assets)							
Consolidated	\$165,995	15.56	% \$85,331	8.00	% N/A	N/A	

Edgar Filing: WEST BANCORPORATION INC - Form 10-Q

West Bank	145,252	14.03	82,844	8.00	\$ 103,555	10.00	%
Tier I Capital (to Risk-Weighted Assets)							
Consolidated	152,635	14.31	42,666	4.00	N/A	N/A	
West Bank	132,276	12.77	41,422	4.00	62,133	6.00	
Tier I Leverage							
Consolidated	152,635	11.23	54,387	4.00	N/A	N/A	
West Bank	132,276	9.85	53,722	4.00	67,153	5.00	

At June 30, 2013, tangible common equity as a percent of tangible assets was 8.38 percent compared to 9.29 percent as of December 31, 2012.

Table of Contents

(dollars in thousands, except share and per share information)

The Company is planning to begin construction on the previously mentioned new main office in the eastern Iowa market during the second half of 2013. An additional lot purchase and the construction will be funded with liquid assets.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the risk of earnings volatility that results from adverse changes in interest rates and market prices. The Company's market risk is primarily interest rate risk arising from its core banking activities of lending and deposit taking. Interest rate risk is the risk that the change in market interest rates may adversely affect the Company's net interest income. Management continually develops and implements strategies to mitigate this risk. The analysis of the Company's interest rate risk was presented in the Form 10-K filed with the Securities and Exchange Commission on March 6, 2013 and is incorporated herein by reference. The Company has not experienced any material changes to its market risk position since December 31, 2012. Management does not believe the Company's primary market risk exposures and how those exposures were managed in the first six months of 2013 changed when compared to 2012.

Item 4. Controls and Procedures

a. Evaluation of disclosure controls and procedures. As of the end of the period covered by this report, an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rule 240.13a-15(f)) was performed under the supervision, and with the participation of, the Company's Chief Executive Officer and Chief Financial Officer. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

b. Changes in internal controls over financial reporting. There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings

On September 29, 2010, West Bank was sued in a purported class action lawsuit that, as amended, asserts that nonsufficient funds fees charged by West Bank to Iowa resident noncommercial customers on bank debit card transactions, but not checks or Automated Clearing House items, are usurious under Iowa law, rather than allowable fees, and that the sequence in which West Bank formerly posted items for payment in consumer demand accounts violated various alleged duties of good faith. As West Bank understands the current claims, plaintiffs are seeking alternative remedies that include injunctive relief, damages (including treble damages), punitive damages, refund of fees, and attorney fees. West Bank believes the lawsuit allegations are factually and legally incorrect in multiple material ways and is vigorously defending the action. The amount of potential loss, if any, cannot be reasonably estimated now because the multiple alternative claims involve different time periods and present different defenses related to potential liability, class certification, and damages.

The Company and West Bank are not parties to any other pending legal proceedings, other than ordinary litigation incidental to West Bank's business, and no property of these entities is the subject of any such proceeding. The Company does not know of any proceeding contemplated by a governmental authority against the Company or West

Bank or any of the Company's property.

Item 1A. Risk Factors

Management does not believe there have been any material changes in the risk factors that were disclosed in the Form 10-K filed with the Securities and Exchange Commission on March 6, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information regarding the Company's purchases of its common shares during the fiscal quarter ended June 30, 2013:

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Dollar Amount of Shares that May Yet be Purchased Under the Plan
April 1 through April 30, 2013	—	—	—	—
May 1 through May 31, 2013	—	—	—	—
June 1 through June 30, 2013	1,440,592	\$ 10.95	—	—
Total	1,440,592	\$ 10.95	—	—

(1) All shares were purchased on June 5, 2013 via a previously reported Stock Repurchase Agreement with American Equity Investment Life Holding Company and American Equity Life Insurance Company.

On July 24, 2013, the Board of Directors approved a stock repurchase plan. Management was authorized to purchase up to \$2 million of the Company's common stock within a nine-month period ending April 24, 2014. The authorization does not require such purchases and is subject to certain restrictions. Shares of Company common stock may be repurchased on the open market or in privately negotiated transactions. The extent to which the shares are repurchased and the timing of such repurchase will depend on market conditions and other corporate considerations.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None.
