John Challis 020 7356 4086

25) Name of signature or authorised company official responsible for making this notification

John Challis

Date of Notification: 04 December 2003

Enclosure 3

December 8, 2003

BT wins multi-million pound NHS Care Records Service contract

BT today welcomed the fact that it has been awarded a 10-year contract, worth GBP620 million, with the Department of Health as part of the NHS National Programme for IT. As a National Application Service Provider, BT will design, deliver and manage a national patient record database and transactional messaging service which is critical to the NHS Care Records Service.

Sir Christopher Bland, BT's Chairman, said: "We are delighted to have been chosen by the NHS to deliver a key part of the National Programme for IT, one of the biggest and most ambitious healthcare IT projects in the world. The technology in our solution and our expertise will help to provide real benefits to NHS patients and staff. It will improve the working lives of nurses and doctors, offering easy and secure access to patient records. We look forward to working with the NHS to make this programme a powerful force for improving patient care."

Edgar Filing: BT GROUP PLC - Form 6-K

Ben Verwaayen, BT's Chief Executive Officer, said "These wins are BT's biggest ever, and evidence of the new face of BT truly emerging. This is BT taking on world class competition on its own territory and winning".

The database will hold electronic summary patient records. These secure records will be shared nationally with clinicians and medical practitioners dependent on their access authority. Patients will no longer be required to repeat information about their medical history at different stages of the care process. By ensuring that the right information about a patient is in the right place at the right time, BT's solution will help the NHS extract greater value from its investments and deliver a better service.

BT is the prime contractor and will deliver and operate the service through Syntegra - its systems integration subsidiary.

Working in association with BT are other companies with world-class experience in the development, deployment and operation of healthcare IT systems including Oracle, Sun Microsystems and LogicaCMG.

Tim Smart, chief executive of Syntegra, commented: "We share the government's vision of the NHS as a world-class patient care provider and our people and the expert partners we have chosen to work with are committed to making that vision a reality."

BT is a leading provider of integrated business systems and the largest supplier of ICT services to the NHS:

NHSnet, Europe's largest private secure network, and the NHS Messaging Service, which delivers more than one million emails, prescriptions and clinical records each day, have together enabled NHS people to exchange and access information quickly - a vital contribution to effective healthcare.

The NHS Numbers For Babies service ensures that within minutes of a baby's birth midwives can obtain their all-important NHS number. This unique identifier forms the basis of a lifelong electronic care record, eliminates incomplete or muddled sets of information and helps ensure prompt and appropriate care for infants right from birth.

BT technology underpins NHS Direct, which has provided help and advice on health matters to more than five million citizens.

NHS24 is another example of national programmes delivered and managed by BT for the benefit of NHS people and patients.

The database and messaging service will work with the systems provided within NHS organisations by Local Service Providers established as part of the National Programme for IT. The data to be managed will range from GP consultations to hospital discharge summaries. In addition the service will enable the electronic transfer of prescriptions and the continued monitoring of prescriptions being issued. It will also enable the introduction of electronic appointment booking in the summer of 2004.

Richard Granger, Director General of NHS IT says "I am delighted that we are now working with BT in implementing such an important element of the National Programme for IT, which will provide every patient with an individual NHS Care Record.

"BT's commitment to this project has been clearly demonstrated throughout the procurement process and I look forward to working with them to deliver a world-class solution to patients and healthcare professionals alike."

Edgar Filing: BT GROUP PLC - Form 6-K

Notes to editors

About BT Group

BT Group plc is the listed holding company for an integrated group of businesses providing voice, data and video services in the UK and elsewhere in Europe. British Telecommunications plc, a wholly-owned subsidiary of BT Group, holds virtually all businesses and assets of the BT group.

BT is one of Europe's leading providers of telecommunications services. Its principal activities include local, national and international telecommunications services, higher-value broadband and internet products and services, and IT solutions. In the UK, BT serves over 20 million business and residential customers with more than 29 million exchange lines, as well as providing network services to other licensed operators.

BT consists principally of three lines of business:

- BT Retail, serving businesses and residential customers and including BT Openworld, one of the UK's leading ISPs.
- BT Wholesale, providing network services and solutions within the UK, including ADSL, conveyance, transit, bulk delivery of private circuits, frame relay and ISDN connections.
- BT Global Services, BT's managed services and solutions provider, serving multi-site organisations worldwide. Its core target market is the top 10,000 global multi-site organisations with European operations.

There are a number of other businesses within the BT group, including BT Exact, an internationally renowned centre of excellence in IT and networking technologies. It is also BT's technology and research and development business.

In the year ended 31 March 2003, BT's turnover was GBP18,727 million with profit before taxation of GBP1,829 million.

For more information, visit www.bt.com

About Syntegra

Syntegra is part of BT Group. It plays a key role in BT's ICT strategy as its expert in systems integration.

Syntegra employs more than 5000 business and technical professionals worldwide. In the financial year ending 30 March 2003 Syntegra reported revenues of GBP623 million.

Syntegra helps organisations transform the way that they operate by applying business knowledge and technology to make possible new and better ways of working.

Its primary activity is the provision of consultancy and systems integration services including change management, complex programme management and custom systems design, development and operation.

About Oracle

Oracle is the world's largest enterprise software company. For more information

Edgar Filing: BT GROUP PLC - Form 6-K

about Oracle, visit Oracle's website at www.oracle.com.

About Sun Microsystems

Since its inception in 1982, a singular vision - "The Network Is The Computer" - has propelled Sun Microsystems, Inc. (Nasdaq: SUNW) to its position as a leading provider of industrial-strength hardware, software and services that make the Net work. Sun can be found in more than 100 countries and at www.sun.com. Sun Microsystems will provide the infrastructure for the project, comprising Sun servers, Sun storage, Solaris operating environment and SunOne software, including the application server. The infrastructure operational management of the project will be the responsibility of Sun Microsystems.

About LogicaCMG

LogicaCMG is a major international force in IT services and wireless telecoms. It provides management and IT consultancy, systems integration and outsourcing services to clients across diverse markets including telecoms, financial services, energy and utilities, industry, distribution and transport and the public sector. Formed in December 2002, through the merger of Logica and CMG, the company employs around 21,000 staff in offices across 34 countries and has nearly 40 years of experience in IT services. Headquartered in Europe, LogicaCMG is listed on both the London and Amsterdam stock exchanges (LSE: LOG; AEX: LOG). For Spine, LogicaCMG will develop the core database application to store and update the national patient records.

December 8, 2003

BT wins multi-million pound NHS contract for London

BT today welcomed the fact that that it has been awarded a ten-year contract, worth GBP996 million over the next ten years, by the Department of Health as part of the NHS National Programme for IT. As Local Service Provider for London,

Edgar Filing: BT GROUP PLC - Form 6-K

BT will design, deliver and operate integrated local patient record applications and systems for the whole London care community.

Sir Christopher Bland, BT's Chairman, said: "We are delighted to have been chosen by the NHS to deliver a key part of the National Programme for IT, one of the biggest and most ambitious healthcare IT projects in the world. Our technology and expertise will help to provide real benefits to NHS patients and staff. It will improve the working lives of nurses and doctors, offering easy and secure access to patient records. We look forward to working with the NHS to make this programme a powerful force for improving patient care."

Ben Verwaayen, BT's Chief Executive Officer, said "These wins are BT's biggest ever, and evidence of the new face of BT truly emerging. This is BT taking on world class competition on its own territory and winning".

When fully implemented the NHS Care Records Service will enable NHS organisations to record and exchange patient and care information electronically, eliminating duplication of patient files and improving information-sharing between healthcare professionals.

BT is the prime contractor and will deliver and operate the service through Syntegra - its systems integration subsidiary. It will work with a number of companies with world-class experience in the development, deployment and operation of healthcare IT systems.

Tim Smart, chief executive of Syntegra, commented: "We share the government's vision of the NHS as a world-class patient care provider and our people and the expert partners we have chosen to work with are committed to making that vision a reality."

BT is a leading provider of integrated business systems and the largest supplier of ICT services to the NHS:

NHSnet, Europe's largest private secure network, and the NHS Messaging Service, which delivers more than one million emails, prescriptions and clinical records each day, have together enabled NHS people to exchange and access information quickly - a vital contribution to effective healthcare.

The NHS Numbers For Babies service ensures that within minutes of a baby's birth midwives can obtain their all-important NHS number. BT SELLS STAKE IN INMARSAT

BT today announced that it has sold its 7.8 % stake in Inmarsat Ventures plc to Grapeclose Limited, a company indirectly controlled by funds advised by Apax Partners and Permira. Total cash consideration will be \$118m.

Edgar Filing: BT GROUP PLC - Form 6-K

Notes to editors:

BT acquired its stake in Inmarsat in April 1999 on the privatisation of the former intergovernmental organisation. Inmarsat is a leading provider of global mobile satellite communications services. The sale follows a competitive auction process managed by Inmarsat and its shareholders, culminating in the recommended offer from Apax Partners and Permira at \$15 per share.

Enclosure 9

19 December 2003

NSB Retail Systems PLC

BT Group plc

Sale of NSB's UK Operations to BT and exclusive Distribution Agreement

The Boards of NSB Retail Systems PLC and BT Group plc announce that they have reached agreement for BT to acquire NSB's principal UK operations for cash consideration of GBP17.0 million and to become NSB's exclusive distributor in the UK and Ireland.

The principal terms of the Transaction are:

- BT will acquire most of the UK business assets of NSB in a cash deal worth GBP17.0 million.
- BT will become NSB's exclusive distributor in the UK and Ireland.
- BT will become NSB's non-exclusive distributor in other territories in Europe, the Middle East and Africa.
- BT will take responsibility for NSB's rights and obligations under its existing customer agreements.
- 148 NSB employees will transfer to BT.
- NSB and BT will work together in the future to develop new products and services for retailers of all sizes.

Edgar Filing: BT GROUP PLC - Form 6-K

- NSB will retain all the rights in its existing and future software.
- NSB will receive licence and support fees from BT based on BT's sales of NSB software.
- 10% of the consideration (GBP1.7 million) will be retained to be paid contingent on achieving specified transition milestones, and the total consideration amount may be adjusted to reflect working capital movements prior to closing. An adjustment will be made if the working capital deficit is greater than GBP1.0 million or if there is any working capital surplus.
- The Transaction is subject to the approval of NSB shareholders at an extraordinary general meeting to be held on 5 January 2004. Shareholders owning 54.4 per cent. of NSB's shares have irrevocably undertaken to vote in favour of the Resolution.

NSB's UK Business provides professional software and systems integration services to many of the UK's most significant retailers. It supports and implements an end-to-end product set for its customers, including:

- Store products - point of sales systems for the processing and reconciliation of transactions for both front of store and back office.
- Enterprise products - business analysis, planning and optimisation tools used in retailers' merchandising, planning, sourcing and customer relationship management processes.

NSB's UK Business has a strong and long-standing customer base in the UK and Ireland, including Arcadia, Lloyds Pharmacy, B&S, Oasis, WH Smith, Woolworths, Brown Thomas, Roches Stores, Monsoon and Austin Reed.

The Board of NSB believes that this new distribution agreement in the UK and Europe, with a partner as strong and well positioned as BT, provides the opportunity to expand and better service its retail customers without increasing its cost base.

The expertise acquired from NSB will be centred in a new BT business unit to be called BT Expedite. This business will offer dedicated retail capabilities to support BT's extensive sales teams, ensuring customers benefit from a fully integrated product and service portfolio.

Building on its strengths in information and communications technology (ICT), BT in partnership with NSB will be able to offer retail companies an enhanced portfolio of solutions. As a one-stop-shop for retailers, BT aims to combine its network, hosting and "Syntegra" systems integration services with NSB's professional support skills, to meet its customers' strategic system development demands.

Now one supplier will be able to meet retailers' full ICT needs. BT has a strong track record in the retail sector and already includes the vast majority of

Edgar Filing: BT GROUP PLC - Form 6-K

retail businesses amongst its customers; NSB's unmatched position at the heart of those retailers' information systems will enable BT to drive this business forward.

The Transaction will allow NSB to focus its resources on its software development business and on the continued growth of its North American markets whilst reviewing the opportunities to appoint other suitably qualified distributors in support of its global vision. The majority of the cash proceeds of the Transaction will be used to pay down debt.

The UK Business generated revenues of GBP11.0 million and earnings before interest and tax of GBP3.3 million for the six months to 30 June 2003. Under the terms of the Distribution Agreement, a material proportion of these earnings would have been receivable by NSB in respect of royalty payments from software licences, had the Distribution Agreement been effective during this period. The book value of the net assets of the UK Business was GBP1.7 million at 30 June 2003. BT will enter into a sub-lease with NSB for the principal UK property.

Nikki Beckett, CEO of NSB, said: "We are delighted to be able to strengthen our position in the important UK market and gain enhanced access to the European market through this strategic relationship with BT. BT is committed to the retail sector and to our customers and employees. The consideration from this transaction will also strengthen our balance sheet, providing NSB with a sound base from which to grow."

Pierre Danon, Chief Executive of BT Retail, said: "This acquisition demonstrates BT's commitment to the retail market and to ICT. BTExpedite will enable us to deliver a broad range of integrated professional and communications services, tailored specifically for retail customers. BT will now be able to help retailers transform their business operations, enabling an improved customer experience and reduced operating costs."
