III. Reference Relating to the Business

1. Overview

A. Industry

(1) Industry characteristics and growth potential

TFT-LCD technology is one of the widely used technologies in the manufacture of flat panel displays, and the demand for flat panel displays is growing. The flat panel display industry is characterized by entry barriers due to rapidly evolving technology, capital-intensive characteristics, and the significant investments required to achieve economies of scale, among other factors. There is intense competition among the players in the industry, and the industry's production capacity, including ours, is continually increasing.

The demand for LCD panels for notebook computers and desktop monitors has grown, to a degree, in tandem with the growth in the information technology industry. The demand for LCD panels for television sets has been growing as digital broadcasting is becoming more common and as LCD television has come to play an important role in the digital display market. In addition, markets for small- to medium-sized LCD panels, such as those used in mobile phones, P-A/V, medical applications, automobile navigation systems and e-books, among others, have shown continued growth.

The average selling prices of LCD panels may continue to decline with time irrespective of general business cycles as a result of, among other factors, technology advancements and cost reductions.

(2) Cyclical nature of LCD industry

The TFT-LCD business is highly cyclical. In spite of the increased demand for products, this industry has experienced periodic volatility caused by imbalances between supply and demand due to capacity expansion within the industry.

Intense competition and expectations of demand growth may lead panel manufacturers to invest in manufacturing capacity on similar schedules, resulting in a surge in capacity when production is ramped up at new fabrication facilities.

During such surges in production capacity, the average selling prices of display panels may decline. Conversely, demand surges and inability of supply to meet such demand may lead to price increases.

(3) Competitiveness

Our ability to compete successfully depends on factors both within and outside our control, including product pricing, our relationship with customers, successful and timely investment and product development, cost competitiveness, success in marketing to our end-brand customers, component and raw material supply costs, foreign exchange rates and general economic and industry conditions.

In order to compete effectively, it is critical to be cost competitive and maintain stable and long-term relationships with customers which will enable us to be profitable even in a buyer's market.

A substantial portion of our sales is attributable to a limited number of end-brand customers and their designated system integrators. The loss of these end-brand customers, as a result of customers entering into strategic supplier arrangements with our competitors or otherwise, would result in reduced sales.

Developing new products and technologies that can be differentiated from those of our competitors is critical to the success of our business. It is important that we take active measures to protect our intellectual property internationally by obtaining patents and undertaking monitoring activities in our major markets. It is also necessary to recruit and retain experienced key managerial personnel and skilled line operators.

B. Company

(1) Company overview

As a leading technology innovator in the display industry, we continue to focus on developing new technologies and products, including in the categories of 3D, touch screens and next generation displays. With respect to 3D technology, we reduced the degree of crosstalk, or the degree of 3D image overlapping, to less than 1% (which is less than what the human eye can perceive). Our 3D technology was internationally recognized when our 47-inch full HD 3D television utilizing polarized glasses was awarded the 2010 Display of the Year Gold Award by the Society for Information Display. In addition, we have shown that we are technologically a step ahead of the competition by developing products such as 21.5-inch full HD glossy touch screen monitors, 13.3-inch on-cell touch screen LCDs, 3-inch OLEDs, 10.1-inch flexible LCDs and 2.6mm thin televisions. By the end of 2010, we are also expecting to commence mass-production of 19-inch flexible e-papers and 9.7-inch color e-papers.

Moreover, we entered into long-term sales contracts with major global firms such as Dell, Hewlett Packard and Kodak of the United States and Japan's Toshiba, among others, to secure customers and expand partnerships for technology development. In 2009 and 2010, we entered into separate long-term supply agreements with Apple Inc. to supply display panels for five years.

(2) Market shares

* Our worldwide market share for large-sized TFT-LCD panels based on revenue is as follows:

	2010	2009	2008
Panels for Notebook Computers**	33.2%	30.7%	30.4%
Panels for Monitors	26.5%	24.7%	17.9%
Panels for Televisions	23.5%	23.9%	19.4%
Total	25.5%	25.2%	20.9%

* Source: Q4 2010 Large Area Shipment Report published by DisplaySearch & Based on TFT-LCD panels that are 9 inches or larger.

** Includes panels for netbooks.

(3) New business etc.

In order to increase our production capacity to meet the rising market demand for TFT-LCD products, we expanded P8, our eighth-generation panel fabrication facility in Paju, Korea, by constructing P8E, which commenced mass production in May 2010. In addition, in order to meet the rising market demand, we decided in March 2010 to further expand P8 by investing in P8E+. In April 2010, we also decided to invest in a new production facility.

We also plan to strengthen our market position in future display technologies by strengthening our OLED business, accelerating the development of flexible display technologies and maintaining our leadership position in the LED backlight LCD market.

We are making an effort to increase our competitiveness by forming cooperative relationships with suppliers and purchasers of our products.
