Semi-Annual Report

This report provides management s discussion of fund performance for AllianceBernstein National Municipal Income Fund (the Fund) for the semi-annual reporting period ended April 30, 2015. The Fund is a closed-end fund and its shares are listed and traded on the New York Stock Exchange.

Investment Objectives and Policies

This Fund seeks to provide high current income exempt from regular federal income tax by investing substantially all of its net assets in municipal securities that pay interest that is exempt from federal income tax. The Fund will normally invest at least 80%, and normally substantially all, of its net assets in municipal securities paying interest that is exempt from regular federal income tax. The Fund also normally will invest at least 75% of its assets in investment-grade municipal securities or unrated municipal securities considered to be of comparable quality. The Fund may invest up to 25% of its net assets in municipal bonds rated below investment-grade and unrated municipal bonds considered to be of comparable quality as determined by AllianceBernstein L.P., (the Adviser). The Fund intends to invest primarily in municipal securities that pay interest that is not subject to the federal Alternative Minimum Tax (AMT), but may invest without limit in municipal securities paying interest that is subject to the federal AMT. For more information regarding the Fund s risks, please see Disclosures and Risks on pages 4-5 and Note G Risks Involved in Investing in the Fund of the Notes to Financial Statements on pages 30-33.

Investment Results

The table on page 6 provides performance data for the Fund and its benchmark, the Barclays Municipal Bond Index, for the six- and 12-month periods ended April 30, 2015.

The Fund outperformed its benchmark for both periods. For the six-month period, security selection within the water, local general obligation and leasing sectors contributed to performance versus the benchmark, as did an underweight in the state general obligation sector. Security selection in the special tax, pre-refunded and education sectors detracted. For the 12-month period, security selection in the local general obligation, water, leasing and education sectors contributed, as did an underweight in the state general obligation sector. Security selection in the pre-refunded sector and an underweight in health care detracted from performance.

Leverage, achieved through the usage of both auction rate preferred stock and tender option bonds (TOBs), benefited the Fund s total return and income over both periods. The Fund did not use derivatives during either period.

Market Review and Investment Strategy

Bond markets experienced substantial volatility during the 12-month period ended April 30, 2015. Oil prices plunged, prompting concerns about global economic growth and deflation in many oil-producing regions. So far in 2015, more than 20 central banks worldwide have eased monetary policy and several have engaged in some form

of quantitative easing. In response, 10-year Treasury yields fell 29 basis points (bps) during the six-month period and 50 bps over the 12-month period. High-grade municipal yields rose slightly by 5 bps over the six-month period and declined by 32 bps over the 12-month period. While long-maturity bond yields have fallen, the market has also started to anticipate an increase in the U.S. Federal Funds target rate; consequently, short-maturity municipal yields rose over the six- and 12-month periods. Investor demand for municipals has remained positive, but new supply also increased as municipal issuers sold bonds to lower their interest costs by refinancing existing bonds.

Mid-grade and high-yield municipal bonds outperformed comparable high-grade credits as investors seemed to view lower oil prices and easing monetary policy globally to be ultimately beneficial to the health of the U.S. economy.

The Fund may purchase municipal securities that are insured under policies issued by certain insurance companies. Historically, insured municipal securities typically received a higher credit rating, which meant that the issuer of the securities paid a lower interest rate. As a result of declines in the credit quality and associated downgrades of most fund insurers, insurance has less value than it did in the past. The market now values insured municipal securities primarily based on the credit quality of the issuer of the security with little value given to the insurance feature.

In purchasing such insured securities, the Adviser evaluates the risk and return of municipal securities through its own research. If an insurance company s rating is downgraded or the company becomes insolvent, the prices of municipal securities insured by the insurance company may decline. As of April 30, 2015, the Fund s percentages of investments in municipal bonds that are insured and in insured municipal bonds that have been pre-refunded or escrowed to maturity were 9.34% and 1.52%, respectively.

Since February 2008, auctions of the Preferred Shares have had fewer buyers than sellers and, as a result, the auctions have failed . The failed auctions did not lower the credit quality of the Preferred Shares, but rather meant that a holder was unable to sell the Preferred Shares in the auctions, so that there was a loss of liquidity for the holders of the Preferred Shares. When an auction fails, the Preferred Shares pay interest on a formula-based maximum rate based on AA-commercial paper and short-term municipal bond rates. In the extremely low short-term interest rate environment of recent years, the interest rates resulting from such formula have been much lower than the returns on the Fund s investments and the cost of alternative forms of leverage available to the Fund. However, to the extent that the cost of this leverage increases in the future and earnings from the Fund s investments do not increase, the Fund s net investment returns may decline. On May 5, 2015, the Fund

announced that the Fund s Board of Directors had unanimously approved a voluntary tender offer to purchase up to 100% of the Fund s outstanding auction rate preferred shares (APS) at a price per share equal to 90% of the liquidation preference of \$25,000 per share (or \$22,500 per share), plus any unpaid dividends accrued through the expiration date of the tender offer.

The Fund s tender offer will be conditioned upon the successful private placement of new preferred shares and certain other conditions as will be set

forth in the Fund s offer to purchase and related letter of transmittal. Additional terms of each tender offer will be set forth in each Fund s tender offer materials when they are filed and become available. The new preferred shares, if successfully placed, will allow the Fund to replace the leverage currently obtained through tendered APS with new preferred shares. The Adviser and the Board of Directors of the Fund believe the tender offer and proposed issuance of preferred shares is in the best interests of the Fund and its stockholders.

DISCLOSURES AND RISKS

AllianceBernstein National Municipal Income Fund Shareholder Information

Weekly comparative net asset value (NAV) and market price information about the Fund is published each Saturday in Barron s and in other newspapers in a table called Closed End Funds. Daily NAVs and market price information, and additional information regarding the Fund, is available at www.abglobal.com and www.nyse.com. For additional shareholder information regarding this Fund, please see page 44.

Benchmark Disclosure

The unmanaged Barclays Municipal Bond Index does not reflect fees and expenses associated with the active management of a fund portfolio. The Barclays Municipal Bond Index represents the performance of the long-term tax-exempt bond market consisting of investment grade bonds. An investor cannot invest directly in an index, and its results are not indicative of the performance for any specific investment, including the Fund. In addition, the Index does not reflect the use of leverage, whereas the Fund utilizes leverage.

A Word About Risk

Among the risks of investing in the Fund are changes in the general level of interest rates or changes in bond credit quality ratings. Changes in interest rates have a greater effect on bonds with longer maturities than on those with shorter maturities. Please note, as interest rates rise, existing bond prices fall and can cause the value of your investment in the Fund to decline. While the Fund invests principally in bonds and other fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments. At the discretion of the Fund s Adviser, the Fund may invest up to 25% of its net assets in municipal bonds that are rated below investment grade (i.e., junk bonds). These securities involve greater volatility and risk than higher-quality fixed-income securities.

Leverage Risk: The Fund uses financial leverage for investment purposes, which involves leverage risk. The Fund s outstanding APS results in leverage. The Fund may also use other types of financial leverage, including TOBs, either in combination with, or in lieu of, the APS. The Fund utilizes leverage to seek to enhance the yield and NAV attributable to its Common Stock. These objectives may not be achieved in all interest rate environments. Leverage creates certain risks for holders of Common Stock, including the likelihood of greater volatility of the net asset value and market price of the Common Stock. If income from the securities purchased from the funds made available by leverage is not sufficient to cover the cost of leverage, the Fund s return will be less than if leverage had not been used. As a result, the amounts available for distribution to Common Stockholders as dividends and other distributions will be reduced. During periods of rising short-term interest rates, the interest paid on the APS or the floaters issued in connection with the Fund s TOB transactions would increase. In addition, the interest paid on inverse floaters held by the Fund, whether issued in connection with the Fund s TOB transactions or purchased in a secondary market transaction, would decrease. Under such circumstances, the Fund s income and distributions to Common Stockholders may decline, which would adversely affect the Fund s yield and possibly the market value of its shares.

Tax Risk: There is no guarantee that all of the Fund s income will remain exempt from federal or state income taxes. From time to time, the U.S. Government and the U.S. Congress consider changes in federal tax law that could limit or eliminate the federal tax exemption for municipal bond income, which would in effect reduce the net income received by shareholders from the Fund by increasing taxes on that income. In such event, the Fund s NAV could also decline as yields on municipal bonds, which are typically lower than those on taxable bonds, would be expected to increase to approximately the yield of comparable bonds.

(Disclosures, Risks and Note about Historical Performance continued on next page)

4 ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Disclosures and Risks

DISCLOSURES AND RISKS

(continued from previous page)

Market Risk: The value of the Fund s assets will fluctuate as the bond market fluctuates. The value of the Fund s investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events that affect large portions of the market.

Credit Risk: An issuer or guarantor of a fixed-income security, or the counterparty to a derivatives or other contract, may be unable or unwilling to make timely payments of interest or principal, or to otherwise honor its obligations. The issuer or guarantor may default, causing a loss of the full principal amount of a security. The degree of risk for a particular security may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security. Investments in fixed-income securities with lower ratings tend to have a higher probability that an issuer will default or fail to meet its payment obligations.

Interest Rate Risk: Changes in interest rates will affect the value of investments in fixed-income securities. When interest rates rise, the value of investments in fixed-income securities tends to fall and this decrease in value may not be offset by higher income from new investments. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations.

Inflation Risk: This is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund s assets can decline as can the value of the Fund s distributions. This risk is significantly greater for fixed-income securities with longer maturities.

Derivatives Risk: Investments in derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and may be subject to counterparty risk to a greater degree than more traditional investments.

Liquidity Risk: Liquidity risk occurs when certain investments become difficult purchase or sell. Difficulty in selling less liquid securities may result in sales at disadvantageous prices affecting the value of your investment in the Fund. Causes of liquidity risk may include low trading volumes, large positions and heavy redemptions of Fund shares. Over recent years liquidity risk has also increased because the capacity of dealers in the secondary market for fixed-income securities to make markets in these securities has decreased, even as the overall bond market has grown significantly, due to, among other things, structural changes, additional regulatory requirements and capital and risk restraints that have led to reduced inventories. Liquidity risk may be higher in a rising interest rate environment, when the value and liquidity of fixed-income securities generally go down.

Duration Risk: Duration is a measure that relates the expected price volatility of a fixed-income security to changes in interest rates. The duration of a fixed-income security may be shorter than or equal to full maturity of a fixed-income security. Fixed-income securities with longer durations have more risk and will decrease in price as interest rates rise. For example, a fixed-income security with a duration of three years will decrease in value by approximately 3% if interest rates increase by 1%.

Management Risk: The Fund is subject to management risk because it is an actively managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results.

An Important Note About Historical Performance

The performance on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

PORTFOLIO STATISTICS

Net Assets (\$mil): \$419.5

* All data are as of April 30, 2015. The Fund's quality rating breakdown is expressed as a percentage of the Fund's total investments in municipal securities and may vary over time. The quality ratings are determined by using the Standard & Poor's Ratings Services (S&P), Moody's Investors Services, Inc. (Moody's) and Fitch Ratings, Ltd. (Fitch). The Portfolio considers the credit ratings issued by S&P, Moody's, and Fitch and uses the highest rating issued by the agencies. These ratings are a measure of the quality and safety of a bond or portfolio, based on the issuer's financial condition. AAA is the highest (best) and D is the lowest (worst). If applicable, the pre-refunded category includes bonds which are secured by U.S. government securities and therefore are deemed high-quality investment grade by the Adviser. If applicable, Not Applicable (N/A) includes non-credit worthy investments; such as, equities, currency contracts, futures and options. If applicable, the Not Rated category includes bonds that are not rated by a nationally recognized statistical rating organization. The Adviser evaluates the creditworthiness of non-rated securities based on a number of factors including, but not limited to, cash flows, enterprise value and economic environment.

- (a) Security is exempt from registration under Rule 144A of the Securities Act of 1933. These securities are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers. At April 30, 2015, the aggregate market value of these securities amounted to \$11,824,107 or 2.8% of net assets.
- (b) Security represents the underlying municipal obligation of an inverse floating rate obligation held by the Fund (see Note I).
- (c) Illiquid security.
- (d) Security is in default and is non-income producing.
- (e) Portfolio percentages are calculated based on net assets applicable to common shareholders.

 As of April 30, 2015, the Fund s percentages of investments in municipal bonds that are insured and in insured municipal bonds that have been pre-refunded are 9.3% and 1.5%, respectively.

Statement of Changes in Net Assets

NOTES TO FINANCIAL STATEMENTS

April 30, 2015 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein National Municipal Income Fund, Inc. (the Fund) was incorporated in the State of Maryland on November 9, 2001 and is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP) which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The Fund is an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund s Board of Directors (the Board).

In general, the market values of securities which are readily available and deemed reliable are determined as follows: securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the last traded price from the previous day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed or over the counter (OTC) market put or call options are valued at the mid level between the current bid and ask prices. If either a current bid or current ask price is unavailable, AllianceBernstein L.P. (the Adviser) will have discretion to determine the best valuation (e.g. last trade price in the case of listed options); open futures are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; U.S. Government securities and any other debt instruments having 60 days or less remaining until maturity are generally valued at market by an independent pricing vendor, if a market price is available. If a market price is not available, the securities are valued at amortized cost. This methodology is commonly used for short term securities that have an original maturity of 60 days or less, as well as short term securities that had an original term to maturity that exceeded 60 days. In instances when amortized cost is utilized, the

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

Valuation Committee (the Committee) must reasonably conclude that the utilization of amortized cost is approximately the same as the fair value of the security. Such factors the Committee will consider include, but are not limited to, an impairment of the creditworthiness of the issuer or material changes in interest rates. Fixed-income securities, including mortgage-backed and asset-backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker-dealers. In cases where broker-dealer quotes are obtained, the Adviser may establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security. Swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties. Investment companies are valued at their net asset value each day.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer s financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Fair Value Measurements

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability (including those valued based on their market values as described in Note A.1 above). Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund sown assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

24 ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

The fair value of debt instruments, such as bonds, and over-the-counter derivatives is generally based on market price quotations, recently executed market transactions (where observable) or industry recognized modeling techniques and are generally classified as Level 2. Pricing vendor inputs to Level 2 valuations may include quoted prices for similar investments in active markets, interest rate curves, coupon rates, currency rates, yield curves, option adjusted spreads, default rates, credit spreads and other unique security features in order to estimate the relevant cash flows which are then discounted to calculate fair values. If these inputs are unobservable and significant to the fair value, these investments will be classified as Level 3. In addition, non-agency rated investments are classified as Level 3.

Other fixed income investments, including non-U.S. government and corporate debt, are generally valued using quoted market prices, if available, which are typically impacted by current interest rates, maturity dates and any perceived credit risk of the issuer. Additionally, in the absence of quoted market prices, these inputs are used by pricing vendors to derive a valuation based upon industry or proprietary models which incorporate issuer specific data with relevant yield/spread comparisons with more widely quoted bonds with similar key characteristics. Those investments for which there are observable inputs are classified as Level 2. Where the inputs are not observable, the investments are classified as Level 3.

The following table summarizes the valuation of the Fund s investments by the above fair value hierarchy levels as of April 30, 2015:

Investments in Securities: Assets:	Level	11	Level 2	Level 3	Total
Long-Term Municipal Bonds	\$	0	\$ 675,454,796	\$ 24,711,725	\$ 700,166,521
Total Investments in Securities		0	675,454,796	24,711,725	700,166,521
Other Financial Instruments*		0	0	0	0
Total+	\$	0	\$ 675,454,796	\$ 24,711,725	\$ 700,166,521

+ There were no transfers between Level 1 and Level 2 during the reporting period.

Notes to Financial Statements

The Fund recognizes all transfers between levels of the fair value hierarchy assuming the financial instruments were transferred at the beginning of the reporting period.

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

11221111(02221

^{*} Other financial instruments are derivative instruments, such as futures, forwards and swaps, which are valued at the unrealized appreciation/depreciation on the instrument.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value.

	ong-Term nicipal Bonds	Total
Balance as of 10/31/14	\$ 15,557,676	\$ 15,557,676
Accrued discounts/(premiums)	(16,353)	(16,353)
Realized gain (loss)	49,720	49,720
Change in unrealized appreciation/depreciation	1,257,221	1,257,221
Purchases	9,240,854	9,240,854
Sales	(2,616,720)	(2,616,720)
Transfers in to Level 3	1,239,327	1,239,327
Transfers out of Level 3	0	0
Balance as of 4/30/15	\$ 24,711,725	\$ 24,711,725^
Net change in unrealized appreciation/depreciation from Investments held as of 4/30/15*	\$ 1,351,005	\$ 1,351,005

^ There were de minimis transfers under 1% of net assets during the reporting period.

The Adviser established the Committee to oversee the pricing and valuation of all securities held in the Fund. The Committee operates under pricing and valuation policies and procedures established by the Adviser and approved by the Board, including pricing policies which set forth the mechanisms and processes to be employed on a daily basis to implement these policies and procedures. In particular, the pricing policies describe how to determine market quotations for securities and other instruments. The Committee s responsibilities include: 1) fair value and liquidity determinations (and oversight of any third parties to whom any responsibility for fair value and liquidity determinations is delegated), and 2) regular monitoring of the Adviser s pricing and valuation policies and procedures and modification or enhancement of these policies and procedures (or recommendation of the modification of these policies and procedures) as the Committee believes appropriate.

The Committee is also responsible for monitoring the implementation of the pricing policies by the Adviser's Pricing Group (the Pricing Group) and a third party which performs certain pricing functions in accordance with the pricing policies. The Pricing Group is responsible for the oversight of the third party on a day-to-day basis. The Committee and the Pricing Group perform a series of activities to provide reasonable assurance of the accuracy of prices including: 1) periodic vendor due diligence meetings, review of methodologies, new developments and processes at vendors, 2) daily comparison of security valuation versus prior day for all securities that exceeded established thresholds, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by senior management and the Committee.

26 ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

^{*} The unrealized appreciation/depreciation is included in net change in unrealized appreciation/depreciation of investments in the accompanying statement of operations.

In addition, several processes outside of the pricing process are used to monitor valuation issues including: 1) performance and performance attribution reports are monitored for anomalous impacts based upon benchmark performance, and 2) portfolio managers review all portfolios for performance and analytics (which are generated using the Adviser s prices).

3. Taxes

It is the Fund s policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund stax positions taken or expected to be taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Fund s financial statements.

4. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date the securities are purchased or sold. Investment gains or losses are determined on the identified cost basis. The Fund amortizes premiums and accretes original issue discounts and market discounts as adjustments to interest income.

5. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. GAAP. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory, Administrative Fees and Other Transactions with Affiliates

Under the terms of an investment advisory agreement, the Fund pays the Adviser an advisory fee at an annual rate of 0.55% of the Fund s average daily net assets applicable to common and preferred shareholders. Such fee is accrued daily and paid monthly.

Under the terms of the Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly-owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended April 30, 2015, there was no reimbursement paid to ABIS.

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

The Fund may invest in the AB Fixed-Income Shares, Inc. Government STIF Portfolio (Government STIF Portfolio), an open-end management investment company managed by the Adviser. The Government STIF Portfolio is offered as a cash management option to mutual funds and other institutional accounts of the Adviser, and is not available for direct purchase by members of the public. The Government STIF Portfolio pays no investment management fees but does bear its own expenses. A summary of the Fund s transactions in shares of the Government STIF Portfolio for the six months ended April 30, 2015 is as follows:

Market Value

October 31, 2014	Purchases	Sales	Market Value	Dividend
	at Cost	Proceeds	April 30, 2015	Income
(000)	(000)	(000)	(000)	(000)
\$ 0	\$ 46,494	\$ 46,494	\$ 0	\$ 1

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the six months ended April 30, 2015 were as follows:

	I	Purchases	Sales	
Investment securities (excluding				
U.S. government securities)	\$	98.164.142	\$ 92,762,979	

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding swap transactions) are as follows:

Gross unrealized appreciation Gross unrealized depreciation	\$ 45,822,451 (3,476,263)
Net unrealized appreciation	\$ 42,346,188

1. Derivative Financial Instruments

The Fund may use derivatives in an effort to earn income and enhance returns, to replace more traditional direct investments, to obtain exposure to otherwise inaccessible markets (collectively, investment purposes), or to hedge or adjust the risk profile of its portfolio.

The Fund did not engage in derivatives transactions for the six months ended April 30, 2015.

NOTE D

28

Common Stock

There are 28,744,936 shares of common stock outstanding at April 30, 2015. During the six months ended April 30, 2015 and the year ended October 31, 2014, the Fund did not issue any shares in connection with the Fund s dividend reinvestment plan.

NOTE E

Preferred Shares

The Fund has 11,400 shares authorized and 9,689 shares issued and outstanding of auction preferred stock (the Preferred Shares), consisting of 2,677 shares each of Series M, Series W and Series TH, and also 1,658 shares of Series T. The Preferred Shares have a liquidation value of \$25,000 per share plus accumulated, unpaid dividends. The dividend rate on the Preferred Shares may change every 7 days as set by the auction agent for series M, T, W and TH. Due to the recent failed auctions, the dividend rate is the maximum rate set by the terms of the Preferred Shares, which is based on AA commercial paper rates and short-term municipal bond rates. The dividend rate on series M is 0.13% effective through May 4, 2015, series T is 0.13% effective through May 5, 2015, series W is 0.13% effective through May 6, 2015 and series TH is 0.13% effective through April 30, 2015.

At certain times, the Preferred Shares are redeemable by the Fund, in whole or in part, at \$25,000 per share plus accumulated, unpaid dividends. The Fund voluntarily may redeem the Preferred Shares in certain circumstances.

The Fund is not required to redeem any of its Preferred Shares and expects to continue to rely on the Preferred Shares for a portion of its leverage exposure. The Fund may also pursue other liquidity solutions for the Preferred Shares.

The preferred shareholders, voting as a separate class, have the right to elect at least two directors at all times and to elect a majority of the directors in the event two years dividends on the Preferred Shares are unpaid. In each case, the remaining directors will be elected by the common shareholders and preferred shareholders voting together as a single class. The preferred shareholders will vote as a separate class on certain other matters as required under the Fund s Charter, the Investment Company Act of 1940 and Maryland law, and management regularly evaluates, and discusses with the Fund s Board of Directors, the costs and potential benefits of alternative sources of leverage for the Fund.

NOTE F

Distributions to Common Shareholders

The tax character of distributions to be paid for the year ending October 31, 2015 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended October 31, 2014 and October 31, 2013 were as follows:

	2014	2013
Distributions paid from:		
Ordinary income	\$ 8,476	\$ 7,944
Tax-exempt income	24,418,038	25,662,266
Distributions paid	24,426,514	25,670,210
Tax return of capital	719,556	0
Total distributions paid	\$ 25,146,070	\$ 25,670,210

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

As of October 31, 2014, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Accumulated capital and other gains/losses	\$ (29,967,087) ^(a)
Unrealized appreciation/(depreciation)	47,515,147 ^(b)
Total accumulated earnings/(deficit)	\$ 17,548,060

- (a) On October 31, 2014, the Fund had a net capital loss carryforward of \$29,967,087.
- (b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax treatment of tender option bonds.
- (c) The difference between book-basis and tax-basis components of accumulated earnings/(deficit) is attributable primarily to dividends payable. For tax purposes, net capital losses may be carried over to offset future capital gains, if any. Funds are permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an indefinite period. These post-enactment capital losses must be utilized prior to the pre-enactment capital losses, which are subject to expiration. Post-enactment capital loss carryforwards will retain their character as either short-term or long-term capital losses rather than being considered short-term as under previous regulation.

As of October 31, 2014, the Fund had a net capital loss carryforward of \$29,967,087 which will expire as follows:

Short-Term	Long-Term	
Amount	Amount	Expiration
\$ 979,235	n/a	2017
5,292,453	n/a	2018
4,345,107	n/a	2019
6,469,345	\$12,880,947	No expiration

NOTE G

30

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund s investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund s investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as junk bonds) have speculative elements or are predominantly speculative risks.

Municipal Market Risk This is the risk that special factors may adversely affect the value of municipal securities and have a significant effect on the yield or value of the Fund s investments in municipal securities. These factors include

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

economic conditions, political or legislative changes, uncertainties related to the tax status of municipal securities, or the rights of investors in these securities. To the extent that the Fund invests more of its assets in a particular state s municipal securities, the Fund may be vulnerable to events adversely affecting that state, including economic, political and regulatory occurrences, court decisions, terrorism and catastrophic natural disasters, such as hurricanes or earthquakes. The Fund s investments in certain municipal securities with principal and interest payments that are made from the revenues of a specific project or facility, and not general tax revenues, may have increased risks. Factors affecting the project or facility, such as local business or economic conditions, could have a significant effect on the project s ability to make payments of principal and interest on these securities.

Derivatives Risk The Fund may enter into derivative transactions such as forwards, options, futures and swaps. Derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and subject to counterparty risk to a greater degree than more traditional investments. Derivatives may result in significant losses, including losses that are far greater than the value of the derivatives reflected in the statement of assets and liabilities.

Financing and Related Transactions; Leverage and Other Risks The Fund utilizes leverage to seek to enhance the yield and net asset value attributable to its common stock. These objectives may not be achieved in all interest rate environments. Leverage creates certain risks for holders of common stock, including the likelihood of greater volatility of the net asset value and market price of the common stock. If income from the securities purchased from the funds made available by leverage is not sufficient to cover the cost of leverage, the Fund s return will be less than if leverage had not been used. As a result, the amounts available for distribution to common stockholders as dividends and other distributions will be reduced. During periods of rising short-term interest rates, the interest paid on the Preferred Shares or floaters in tender option bond transactions would increase, which may adversely affect the Fund s income and distribution to common stockholders. A decline in distributions would adversely affect the Fund s yield and possibly the market value of its shares. If rising short-term rates coincide with a period of rising long-term rates, the value of the long-term municipal bonds purchased with the proceeds of leverage would decline, adversely affecting the net asset value attributable to the Fund s common stock and possibly the market value of the shares.

The Fund s outstanding Preferred Shares results in leverage. The Fund may also use other types of financial leverage, including tender option bond transactions, either in combination with, or in lieu of, the Preferred Shares. In a tender option bond transaction, the Fund may transfer a highly rated fixed-rate municipal security to a broker, which, in turn, deposits the bond into a special purpose

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

vehicle (typically, a trust) usually sponsored by the broker. The Fund receives cash and a residual interest security (sometimes referred to as an inverse floater) issued by the trust in return. The trust simultaneously issues securities, which pay an interest rate that is reset each week based on an index of high-grade short-term seven-day demand notes. These securities, sometimes referred to as floaters, are bought by third parties, including tax-exempt money market funds, and can be tendered by these holders to a liquidity provider at par, unless certain events occur. The Fund continues to earn all the interest from the transferred bond less the amount of interest paid on the floaters and the expenses of the trust, which include payments to the trustee and the liquidity provider and organizational costs. The Fund also uses the cash received from the transaction for investment purposes or to retire other forms of leverage. Under certain circumstances, the trust may be terminated and collapsed, either by the Fund or upon the occurrence of certain events, such as a downgrade in the credit quality of the underlying bond, or in the event holders of the floaters tender their securities to the liquidity provider. See Note H to the financial statements for more information about tender option bond transactions.

The Fund may also purchase inverse floaters from a tender option bond trust in a secondary market transaction without first owning the underlying bond. The income received from an inverse floater varies inversely with the short-term interest rate paid on the floaters issued by the trust. The prices of inverse floaters are subject to greater volatility than the prices of fixed-income securities that are not inverse floaters. Investments in inverse floaters may amplify the risks of leverage. If short-term interest rates rise, the interest payable on the floaters would increase and income from the inverse floaters decrease, resulting in decreased amounts of income available for distribution to common stockholders.

The use of derivative instruments by the Fund, such as forwards, futures, options and swaps, may also result in a form of leverage.

Duration Risk Duration is the measure that relates the expected price volatility of a fixed-income security to changes in interest rates. The duration of a fixed-income security may be shorter than or equal to full maturity of a fixed-income security. Fixed-income securities with longer durations have more risk and will decrease in price as interest rates rise. For example, a fixed-income security with a duration of three years will decrease in value by approximately 3% if interest rates increase by 1%.

Inflation Risk This is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the real value of the Portfolio s assets can decline as can the real value of the Portfolio s distributions. This risk is significantly greater for fixed-income securities with longer maturities.

32 ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

Liquidity Risk Liquidity risk occurs when certain investments become difficult to purchase or sell. Difficulty in selling less liquid securities may result in sales at disadvantageous prices affecting the value of your investment in the Fund. Causes of liquidity risk may include low trading volumes, large positions and heavy redemptions of fixed-income mutual fund shares. Over recent years, liquidity risk has also increased because the capacity of dealers in the secondary market for fixed-income securities to make markets in these securities has decreased, even as the overall bond market has grown significantly, due to, among other things, structural changes, additional regulatory requirements and capital and risk restraints that have led to reduced inventories. Liquidity risk may be higher in a rising interest rate environment, when the value and liquidity of fixed-income securities generally go down.

Tax Risk There is no guarantee that all of the Fund s income will remain exempt from federal or state income taxes. From time to time, the U.S. Government and the U.S. Congress consider changes in federal tax law that could limit or eliminate the federal tax exemption for municipal bond income, which would in effect reduce the income received by shareholders from the Fund by increasing taxes on that income. In such event, the Fund s NAV could also decline as yields on municipal bonds, which are typically lower than those on taxable bonds, would be expected to increase to approximately the yield of comparable taxable bonds.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund s maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote. Therefore, the Fund has not accrued any liability in connection with these indemnification provisions.

NOTE H

Floating Rate Notes Issued in Connection with Securities Held

The Fund may engage in tender option bond transactions in which the Fund may transfer a fixed rate bond (Fixed Rate Bond) to a broker for cash. The broker deposits the Fixed Rate Bond into a Special Purpose Vehicle (the SPV, which is generally organized as a trust), organized by the broker. The Fund buys a residual interest in the assets and cash flows of the SPV, often referred to as an inverse floating rate obligation (Inverse Floater). The SPV also issues floating rate notes (Floating Rate Notes) which are sold to third parties. The Floating Rate Notes pay interest at rates that generally reset weekly and their holders have the option to tender their notes to a liquidity provider for redemption at par. The Inverse Floater held by the Fund gives the Fund the right (1) to cause the holders of the Floating Rate Notes to tender their notes at par, and (2) to have the trustee transfer the Fixed Rate Bond held by the SPV to the Fund, thereby collapsing the SPV. The SPV may also be collapsed in certain other circumstances. In accordance with U.S. GAAP requirements regarding accounting for

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Notes to Financial Statements

transfers and servicing of financial assets and extinguishments of liabilities, the Fund accounts for the transaction described above as a secured borrowing by including the Fixed Rate Bond in its portfolio of investments and the Floating Rate Notes as a liability under the caption Payable for floating rate notes issued in its statement of assets and liabilities. Interest expense related to the Fund s liability with respect to Floating Rate Notes is recorded as incurred. The interest expense is also included in the Fund s expense ratio. At April 30, 2015, the amount of the Fund s Floating Rate Notes outstanding was \$42,770,000 and the related interest rate was 0.09% to 0.20%.

The Fund may also purchase Inverse Floaters in the secondary market without first owning the underlying bond. Such an Inverse Floater is included in the Fund s portfolio of investments but is not required to be treated as a secured borrowing and reflected in the Fund s financial statements as a secured borrowing. For the six months ended April 30, 2015, the Fund did not engage in such transactions.

NOTE I

Subsequent Events

On May 5, 2015, the Fund announced that the Fund s Board of Directors had unanimously approved a voluntary tender offer to purchase up to 100% of the Fund s outstanding auction preferred shares (APS) at a price per share equal to 90% of the liquidation preference of \$25,000 per share (or \$22,500 per share), plus any unpaid dividends accrued through the expiration date of the tender offer.

The Fund s tender offer will be conditioned upon the successful private placement of new preferred shares and certain other conditions as will be set forth in the Fund s offer to purchase and related letter of transmittal. Additional terms of each tender offer will be set forth in each Fund s tender offer materials when they are filed and become available. The new preferred shares, if successfully placed, will allow the Fund to replace the leverage currently obtained through tendered APS with new preferred shares. The investment adviser and the Board of Directors of the Fund believe the tender offer and proposed issuance of preferred shares is in the best interests of the Fund and its stockholders.

Management has evaluated subsequent events for possible recognition or disclosure in the financial statements through the date the financial statements are issued. Management has determined that there are no other material events that would require disclosure in the Fund s financial statements through this date.

ADDITIONAL INFORMATION

(unaudited)

Shareholders whose shares are registered in their own names can elect to participate in the Dividend Reinvestment Plan (the Plan), pursuant to which dividends and capital gain distributions to shareholders will be paid in or reinvested in additional shares of the Fund (the Dividend Shares). Computershare Trust Company NA, (the Agent) will act as agent for participants under the Plan. Shareholders whose shares are held in the name of broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan.

If the Board declares an income distribution or determines to make a capital gain distribution payable either in shares or in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in shares of Common Stock of the Fund valued as follows:

- (i) If the shares of Common Stock are trading at net asset value or at a premium above net asset value at the time of valuation, the Fund will issue new shares at the greater of net asset value or 95% of the then current market price.
- (ii) If the shares of Common Stock are trading at a discount from net asset value at the time of valuation, the Agent will receive the dividend or distribution in cash and apply it to the purchase of the Funds shares of Common Stock in the open market on the New York Stock Exchange or elsewhere, for the participants accounts. Such purchases will be made on or shortly after the payment date for such dividend or distribution and in no event more than 30 days after such date except where temporary curtailment or suspension of purchase is necessary to comply with Federal securities laws. If, before the Agent has completed its purchases, the market price exceeds the net asset value of a share of Common Stock, the average purchase price per share paid by the Agent may exceed the net asset value of the Funds shares of Common Stock, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund.

The Agent will maintain all shareholders—accounts in the Plan and furnish written confirmation of all transactions in the account, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Agent in non-certificate form in the name of the participant, and each shareholder—s proxy will include those shares purchased or received pursuant to the Plan.

There will be no charges with respect to shares issued directly by the Fund to satisfy the dividend reinvestment requirements. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Agent s open market purchases of shares.

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Additional Information

The automatic reinvestment of dividends and distributions will not relieve participants of any income taxes that may be payable (or required to be withheld) on dividends and distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan as applied to any dividend or distribution paid subsequent to written notice of the change sent to participants in the Plan at least 90 days before the record date for such dividend or distribution. The Plan may also be amended or terminated by the Agent on at least 90 days written notice to participants in the Plan. All correspondence concerning the Plan should be directed to the Agent at Computershare Trust Company N.A., P.O. Box 30170, College Station, TX 77842-3170.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may purchase at market prices from time-to-time shares of its Common Stock in the open market.

This report, including the financial statements therein, is transmitted to the shareholders of AllianceBernstein National Municipal Income Fund for their information. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in the report.

Annual Certifications As required, on April 29, 2015, the Fund submitted to the New York Stock Exchange (NYSE) the annual certification of the Fund's Chief Executive Officer certifying that he is not aware of any violation of the NYSE's Corporate Governance listing standards. The Fund also has included the certifications of the Fund's Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Fund's Form N-CSR filed with the Securities and Exchange Commission for the period.

ALLIANCEBERNSTEIN NATIONAL MUNICIPAL INCOME FUND

Board of Directors

Information Regarding the Review and Approval of the Fund s Advisory Agreement

The disinterested directors (the directors) of AllianceBernstein National Municipal Income Fund, Inc. (the Fund) unanimously approved the continuance of the Fund s Advisory Agreement with the Adviser at a meeting held on November 3-6, 2014.

Prior to approval of the continuance of the Advisory Agreement, the directors had requested from the Adviser, and received and evaluated, extensive materials. They reviewed the proposed continuance of the Advisory Agreement with the Adviser and with experienced counsel who are independent of the Adviser, who advised on the relevant legal standards. The directors also discussed the proposed continuance in private sessions with counsel and the Fund s Senior Officer (who is also the Fund s Independent Compliance Officer).

The directors considered their knowledge of the nature and quality of the services provided by the Adviser to the Fund gained from their experience as directors or trustees of most of the registered investment companies advised by the Adviser, their overall confidence in the Adviser s integrity and competence they have gained from that experience, the Adviser s initiative in identifying and raising potential issues with the directors and its responsiveness, frankness and attention to concerns raised by the directors in the past, including the Adviser s willingness to consider and implement organizational and operational changes designed to improve investment results and the services provided to the AB Funds. The directors noted that they have four regular meetings each year, at each of which they receive presentations from the Adviser on the investment results of the Fund and review extensive materials and information presented by the Adviser.

The directors also considered all other factors they believed relevant, including the specific matters discussed below. In their deliberations, the directors did not identify any particular information that was all-important or controlling, and different directors may have attributed different weights to the various factors. The directors determined that the selection of the Adviser to manage the Fund and the overall arrangements between the Fund and the Adviser, as provided in the Advisory Agreement, including the advisory fee, were fair and reasonable in light of the services performed, expenses incurred and such other matters as the directors considered relevant in the exercise of their business judgment. The material factors and conclusions that formed the basis for the directors determinations included the following:

Nature, Extent and Quality of Services Provided

The directors considered the scope and quality of services provided by the Adviser under the Advisory Agreement, including the quality of the investment research capabilities of the Adviser and the other resources it has dedicated to

performing services for the Fund. They also noted the professional experience and qualifications of the Fund s portfolio management team and other senior personnel of the Adviser. The directors also considered that the Advisory Agreement provides that the Fund will reimburse the Adviser for the cost to it of providing certain clerical, accounting, administrative and other services to the Fund by employees of the Adviser or its affiliates. Requests for these reimbursements are made on a quarterly basis and subject to approval by the directors. Reimbursements, to the extent requested and paid, result in a higher rate of total compensation from the Fund to the Adviser than the fee rate stated in the Fund s Advisory Agreement. The directors noted that to date the Adviser had not requested such reimbursements from the Fund. The quality of administrative and other services, including the Adviser s role in coordinating the activities of the Fund s other service providers, also were considered. The directors concluded that, overall, they were satisfied with the nature, extent and quality of services provided to the Fund under the Advisory Agreement.

Costs of Services Provided and Profitability

The directors reviewed a schedule of the revenues, expenses and related notes indicating the profitability of the Fund to the Adviser for calendar years 2012 and 2013 that had been prepared with an expense allocation methodology arrived at in consultation with an independent consultant retained by the Fund s Senior Officer. The directors noted the assumptions and methods of allocation used by the Adviser in preparing fund-specific profitability data and understood that there are a number of potentially acceptable allocation methodologies for information of this type. The directors noted that the profitability information reflected all revenues and expenses of the Adviser's relationship with the Fund, including those relating to its subsidiary that provides shareholder services to the Fund. The directors recognized that it is difficult to make comparisons of the profitability of the Advisory Agreement with the profitability of advisory contracts for unaffiliated funds because comparative information is not generally publicly available and is affected by numerous factors. The directors focused on the profitability of the Adviser's relationship with the Fund before taxes. The directors were satisfied that the Adviser's level of profitability from its relationship with the Fund was not unreasonable.

Fall-Out Benefits

The directors considered the other benefits to the Adviser and its affiliates from their relationships with the Fund, including, but not limited to, benefits relating to shareholder servicing fees paid by the Fund to a wholly owned subsidiary of the Adviser. The directors recognized that the Adviser s profitability would be lower without these benefits. The directors understood that the Adviser also might derive reputational and other benefits from its association with the Fund.

Investment Results

In addition to the information reviewed by the directors in connection with the meeting, the directors receive detailed performance information for the Fund at

each regular Board meeting during the year. At the November 2014 meeting, the directors reviewed information prepared by Lipper showing the performance of the Fund as compared with that of a group of similar funds selected by Lipper (the Performance Group), and information prepared by the Adviser showing the Fund s performance as compared with the Barclays Municipal Bond Index (the Index), in each case for the 1-, 3-, 5- and 10-year periods ended July 31, 2014 and (in the case of comparisons with the Index) the period since inception (January 2002 inception). The directors noted that the Fund was in the 4th quintile of the Performance Group for the 1- and 10-year periods, and in the 5th quintile of the Performance Group for the 3- and 5-year periods. The Fund outperformed the Index in all periods. The directors also noted that the Fund utilizes leverage whereas the Index is not leveraged. Based on their review, the directors concluded that the Fund s performance was acceptable.

Advisory Fees and Other Expenses

The directors considered the latest fiscal year actual advisory fee rate paid by the Fund to the Adviser and information prepared by Lipper concerning advisory fee rates paid by other funds in the same Lipper category as the Fund. The directors also took into account their general knowledge of advisory fees paid by open-end and closed-end funds that invest in fixed-income municipal securities. The directors recognized that it is difficult to make comparisons of advisory fees because there are variations in the services that are included in the fees paid by other funds.

The directors noted that the Fund s latest fiscal year actual management fee rate of 55 basis points was lower than the Expense Group and the Expense Universe medians. The directors noted that Lipper calculates the fee rate based on the Fund s net assets attributable to common stockholders, whereas the Fund s Advisory Agreement provides that fees are computed based on average daily net assets (*i.e.*, including assets supported by the Fund s preferred stock). The advisory fee rate and expense ratio information in this section is based on common and leveraged assets.

The directors noted that the Adviser advises several open-end funds that invest in municipal securities similar to those the Fund invests in at fee rates that are lower than the fee rate charged to the Fund, and that such rates reflect fee reductions agreed to by the Adviser in connection with the settlement of the market timing matter with the New York Attorney General in December 2003.

The Adviser informed the directors that there were no institutional products managed by it that have a substantially similar investment style. The directors reviewed the relevant advisory fee information from the Adviser s Form ADV and noted that the Adviser charged institutional clients lower fees for advising comparably sized institutional accounts using strategies that differ from those of the Fund but which invest in fixed income municipal securities. The Adviser

reviewed with the directors the significantly greater scope of the services it provides the Fund relative to institutional clients. In light of the substantial differences in services rendered by the Adviser to institutional clients as compared to funds such as the Fund, the directors considered these fee comparisons inapt and did not place significant weight on them in their deliberations.

The directors also considered the total expense ratio of the Fund in comparison to the fees and expenses of funds within two comparison groups created by Lipper: an Expense Group and an Expense Universe. Lipper described an Expense Group as a representative sample of funds similar to the Fund and an Expense Universe as a broader group, consisting of all funds in the Fund s investment classification/objective. The expense ratio of the Fund was based on the Fund s latest fiscal year. The directors noted that it was likely that the expense ratios of some of the other funds in the Fund s Lipper category were lowered by waivers or reimbursements by those funds investment advisers, which in some cases might be voluntary or temporary. The directors view the expense ratio information as relevant to their evaluation of the Adviser s services because the Adviser is responsible for coordinating services provided to the Fund by others.

The directors noted that the Fund s total expense ratio was lower than the Expense Group and the Expense Universe medians. The directors concluded that the Fund s expense ratio was satisfactory.

Economies of Scale

The advisory fee schedule for the Fund does not contain breakpoints that reduce the fee rates on assets above specified levels. The directors considered that the Fund is a closed-end fixed-income fund and that it was not expected to have meaningful asset growth (absent a rights offering or an acquisition). In such circumstances, the directors did not view the potential for realization of economies of scale as the Fund s assets grow to be a material factor in their deliberations. They noted that, if the Fund s net assets were to increase materially, they would review whether potential economies of scale were being realized by the Adviser.

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The Fund s NYSE trading symbol is AFB. Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in *The Wall Street Journal* and each Saturday in *Barron s* and other newspapers in a table called Closed-End Bond Funds. Daily net asset value and market price information, and additional information regarding the Fund, is available at www.alliancebernstein.com.

Dividend Reinvestment Plan

Pursuant to the Fund s Dividend Reinvestment Plan, shareholders whose shares are registered in their own names may elect to have all distributions reinvested automatically in additional shares of the Fund by ComputerShare Trust Company, N.A., as agent under the Plan. Shareholders whose shares are held in the name of the broker or nominee should contact the broker or nominee for details. All Distributions to investors who elect not to participate in the Plan will be paid by check mailed directly to the record holder by or under the direction of ComputerShare Trust Company, N.A.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company at (800) 219-4218.
