MESSAGE FROM MANAGEMENT

The year 2018 brought **excellent results for GPA**. We delivered sequential important market share gains and solid results for the Group's businesses. The accelerated store expansion at Assaí over recent years supported strong sales and substantial net income growth. At Multivarejo, sales improved sequentially, accompanied by higher profitability. Our multi-channel, multi-format and multi-region portfolio, combined with the optimization of our store portfolio through conversions, renovations and new concepts, has ensured a better offering of products and services for our customers, further strengthening their power of choice. We also advanced in the digital transformation of our businesses, reinforcing GPA's pioneering efforts on fronts such as food e-commerce and loyalty programs, which supported efficiency gains in our search for new revenue streams.

Despite a macroeconomic scenario still marked by recovery, we maintained a **high level of investment in the year** of over R\$1.7 billion, or 28.8% more than in 2017, which reinforces our confidence in the execution of our business strategy and in the recovery of the Brazilian economy. We posted gross sales of R\$53.6 billion, 10.7% higher than in 2017, and market share gains at both Multivarejo and Assaí, with sequential improvements in our results, which led net income to more than double to R\$1.3 billion in the year.

At Assaí, 2018 was marked by **solid and strong sales growth**, which was leveraged by the banner's nationwide footprint. Assaí, which ended the year with 144 stores, maintained its accelerated pace of store openings: 18 new units. The highly effective strategy for determining the sites of these stores supported above-expectation performance and the best result in sales per square meter of the last five years. This year, Assaí also was included on the list of Brazil's Most Valuable Brands compiled by Interbrand.

Meanwhile, Multivarejo delivered **important revenue growth**, reflecting the more dynamic commercial actions, the better positioning of banners and the higher penetration of loyalty tools and customization of the "My Discount" app and "My Rewards" initiative. Over the year, the Extra Super and Proximity formats posted significant improvement in their performances, while the Pão de Açúcar banner maintained its high profitability.

We made important adjustments in the portfolio, with improvements within the formats: 15 Pão de Açúcar stores, totaling 20 stores renovated to the new model, which focuses entirely on the shopping experience and on strengthening the banner's value proposition. Another 23 Extra Super stores were remodeled under the Mercado Extra concept and 13 stores were converted into Compre Bem, which since their conversion already have been delivering strong growth.

Another important action was the **repositioning of our Private-Label portfolio** with a priority on improving quality and price competitiveness, which has led to an increase in the share of these products in the Super, Hyper and Proximity formats. Additionally, it has strengthened our competitiveness in regional markets and our loyalty-building efforts. In 2018, we launched 500 new products, supported by a new communication model and promotional campaigns.

We also created the **Digital Transformation department** and began working more closely with foodtech startups. We prospected over 350 companies in the industry, which resulted in a partnership with Cheftime, online subscription service and sales of gastronomic kits, and in the acquisition of James Delivery, a multiservice delivery platform for various products. We also inaugurated Pão de Açúcar Adega, a platform formed by an exclusive online wine shop with nationwide delivery, an application and a brick-and-mortar store (in São Paulo city) to give consumers a truly omnichannel experience.

Looking to the future also means having our management integrated with **sustainability principles**, assessing risks and identifying opportunities to create value for all our stakeholders. As a transformational agent and a link in a chain, we adopt responsible sourcing management that include aspects such as preserving species, animal welfare, combating deforestation and verifying adequate work conditions.

We have a highly motivated and diverse team of more than 100,000 employees across Brazil. We were able to surpass the mark of 30% women in leadership positions (managerial level and higher) and increased to 21% the percentage of persons with disabilities on our team.

Consistent with our commitment to diversity, we launched the Manifesto of Senior Male Leaders for Gender Equality and created two other Affinity Groups, for Racial Equality and LGBTI+, which complement the activities of the Gender Equality Committee created in 2013. All these actions, combined with others to value our people, promote conscientious consumerism, protect the links of the production chain, preserve the environment and engage society reinforce the pillars that guide our business strategy.

We ended 2018 with very positive progress and solid and sustainable results in our businesses, which are accomplishments that reflect the engagement and capacity of our entire team. We continue working to ensure a store portfolio that meets consumers' needs, products and initiatives that offer the best options to our shareholders, suppliers, employees and, most importantly, a permanent focus on our customers.

Selling, general and administrative expenses were R\$1.6 billion, representing a significant decline of 3.0% and dilution of 150 bps in relation to 4Q17. The highlights were the decrease in personnel expenses, due to the operational efficiency program and the labor law reform, as well as rigorous control over general expenses.

Adjusted EBITDA amounted to R\$400 million, representing robust growth of 21.2%, supported by higher sales and the discipline and control of operating expenses. Adjusted EBITDA margin expanded 80 bps to 5.5%, reflecting the consistent result over the year.

Net income was R\$120 million, with net margin of 1.6%, reversing the loss reported in 4Q17.

2018

In 2018, **gross sales** came to R\$28.7 billion, the best performance of recent years, driven by (i) the success of the commercial dynamics initiatives; (ii) better positioning of banners; and (iii) higher penetration of loyalty tools and personalization of “My Discount” app and “My Rewards” initiative.

Gross profit excluding non-recurring effects amounted to R\$7.3 billion, with margin of 27.7%, reflecting the adequate level of price competitiveness at banners, which supported the recovery in growth and market share gains.

Operating expenses were R\$6.0 billion, down 2.2% from 2017, despite the acceleration in inflation over the year. The same initiatives mentioned in the above comments for the quarter supported the capture of gains over the year.

Adjusted EBITDA excluding non-recurring effects was R\$1.5 billion, advancing 13.0% compared to 2017, with margins expanding 50 bps, meeting the guidance of 5.5% for the year.

Net income from continuing operations amounted to R\$246 million, which is 4.8 times higher than the net income reported in 2017.

Assaí

4Q18

Gross profit excluding non-recurring tax credits was R\$1.1 billion, with gross margin of 16.0%, in line with 4Q17.

The increase in **selling, general and administrative expenses** significantly lagged the increase in sales, despite the accelerated pace of store expansion. Net income reached R\$351 million, +37.9%, with net margin of 5.2%.

2018

In the year, Assaí posted **gross sales of R\$24.9 billion**, representing strong growth of 24.2% and 6.3% on a same-store ex-conversion basis, due to the banner's successful commercial strategies and the improvement in sales volume and customer traffic.

FINANCIAL PERFORMANCE

Other Income and Expenses

In the quarter, Other Income and Expenses were R\$23 million, net of positive and negative impacts, mainly related to:

- R\$143 million in contingencies for tax-deficiency notices involving INSS contributions (base date 2002-2003) and ICMS tax (2001 and 2008-2009);
- R\$47 million in restructuring, especially driven by store closing;
- R\$167 million in income from sale of assets.

In 2018, Other Operating Income and Expenses decreased substantially by 62.8%, or R\$364 million, for a net expense of R\$215 million. The amount under Other expenses represents the level expected for the coming years and reflects an adequate level of provisioning for contingencies.

Financial Result

In the quarter, the financial result was R\$60 million, or 0.4% of net sales, down 120 bps from 4Q17. Cost of debt and sales of receivables were virtually stable as a ratio of net revenue compared to 4Q17. The main variations were due to the positive contribution of certain non-recurring factors: (i) monetary variation that affected the lines under financial income; and (ii) contingencies' adjustments and other financial expenses.

In the year, the financial result was R\$474 million, or 1.0% of net revenue, an improvement of 60 bps from the prior year and in line with the guidance for the year. The reduction is mainly explained by the lower interest rate in the period (the average CDI overnight rate fell from 9.6% in 2017 to 6.5% in 2018), in addition to the effects mentioned above.

Net Income

In the **Food segment, net income attributable to the controlling shareholders from continuing operations** was R\$471 million, 88.1% higher than in 4Q17, with margin of 3.4%. At Multivarejo, net income was R\$120 million, with net margin of 1.6%, reversing the loss reported in 4Q17. At Assaí, net income grew 37.9% to R\$351 million, with net margin of 5.2%.

In the year, **net income attributable to the controlling shareholders from the food segment, considering continuing operations**, was R\$1.3 billion, while net margin doubled to 2.6%. Multivarejo posted solid net income growth, to R\$246 million, or 4.8 times net income in 2017. At Assaí, net income practically doubled to R\$1.1 billion.

Consolidated net income attributable to the controlling shareholders, considering continuing and discontinued operations, came to R\$1.2 billion (+106.0%), with margin of 2.4% (+110 bps).

Earnings per Share

In the year, earnings per share was R\$4.19870 per common share and R\$4.60961 per preferred share.

Net Debt

The cash position stood at R\$4.4 billion and the balance of unsold receivables was R\$96 million, representing R\$4.5 billion in cash and cash equivalents. The Company also has approximately R\$1.8 billion in pre-approved/confirmed credit facilities.

Investments

In the quarter, investments in the food segment came to R\$598 million, up 68.7% from 4Q17. The increase was mainly due to the ongoing organic expansion at Assaí, with 10 store openings, 3 renovations of Pão de Açúcar stores and a review in the positioning of Extra supermarkets with the conversion of 13 stores (12 Extra Super and one Extra Hiper) into Compre Bem and the revitalization of 13 Extra Super stores into Mercado Extra.

In 2018, capital expenditure in the food segment amounted to R\$1.7 billion, 28.8% more than in 2017, led mainly by the following:

- **Expansion of Assaí:** opening of 18 stores, with 16 organically and 2 converted from Extra Hiper;
- **Renovations of Pão de Açúcar stores:** 15 stores were renovated based on the Generation 7 concept, totaling 20 stores under this concept;
- **Repositioning of Extra Super:** revitalization of 23 stores into Mercado Extra
- **Conversions into Compre Bem:** 13 stores were converted into the Compre Bem banner, of which 12 converted from Extra Super and 1 from Extra Hiper.

The Company continued to focus on adjusting the store portfolio to reinforce its multi-channel, multi-format and multi-region presence that is better aligned with consumer demand. As a result, in the last five years, the share of Assaí in the food segment increased from 20% to 46%, driven by the organic opening of 52 stores and 19 conversions from Extra Super stores. In the retail business, the highlights were: (i) modernization of assets with the renovation of 95 Pão de Açúcar stores in the last two years, 20 of which under the G7 concept; (ii) repositioning of Extra Super with the revitalization of 23 stores converted into Mercado Extra and 13 stores into Compre Bem in 2018; (iii) opening of 66 Minuto Pão de Açúcar stores since 2014; and (iv) pursuit of higher profitability of store area in the hypermarket format.

About GPA: GPA is Brazil's largest retailer, with a distribution network comprising over 2,000 points of sale as well as electronic channels. Established in 1948 in São Paulo, it has its head

office in the city and operations in 18 Brazilian states and the Federal District. With a strategy of focusing its decisions on customers and better serving them based on their consumer profile in the wide variety of shopping experiences it offers, GPA adopts a multi-business and multi-channel platform consisting of brick-and-mortar stores and e-commerce operations, divided into three business units: Multivarejo, which operates the supermarket, hypermarket and Minimercado store formats, as well as fuel stations and drugstores under the Pão de Açúcar and Extra banners; Assaí, which operates in the cash-and-carry wholesale segment; and Via Varejo's discontinued operations, with its bricks and mortar electronics and home appliances stores under the Casas Bahia and Pontofrio banners, and the e-commerce segment.

Disclaimer: Statements contained in this release relating to the business outlook of the Company, projections of operating/financial results, growth prospects of the Company and market and macroeconomic estimates are merely forecasts and are based on the beliefs, plans and expectations of Management in relation to the Company's future. These expectations are highly dependent on changes in the market, Brazil's general economic performance, the industry and international markets, and hence are subject to change.

Glossary

Food Segment: Represents the combined results of Multivarejo and Assaí, excluding equity income (loss) from Cdiscount, which is not included in the operating segments reported by the Company.

Discontinued Activities: Due to the ongoing divestment of the interest held by GPA in Via Varejo S.A., the operations of Via Varejo are treated as discontinued operations. Accordingly, net sales and other profit or loss accounts were adjusted retrospectively, as required under IFRS 5/CPC 31, approved by CVM Resolution 598/09 – Non-current assets held for sale and discontinued operations.

EBITDA: EBITDA is calculated in accordance with Instruction 527 issued by the Securities and Exchange Commission of Brazil (CVM) on October 4, 2012.

Adjusted EBITDA: Measure of profitability calculated by excluding Other Operating Income and Expenses from EBITDA. Management uses this measure in its analyses as it believes it eliminates non-recurring expenses and revenues and other non-recurring items that could compromise the comparability and analysis of results.

Earnings per share: Diluted earnings per share are calculated as follows:

□ Numerator: profit for the year adjusted by dilutive effects from stock options granted by subsidiaries.

□ Denominator: the number of shares of each category adjusted to include potential shares corresponding to dilutive instruments (stock options), less the number of shares that could be bought back at market, if applicable.

Equity instruments that will or may be settled with the Company and its subsidiaries' shares are only included in the calculation when its settlement has a dilutive impact on earnings per share.

Compre Bem: Project involving the conversion of stores with the goal of entering a market niche currently occupied by regional supermarkets. The store model is better adapted to the needs of the consumers in the regions where stores are located. The service and assortment of the perishables category will be reinforced, while other categories will have a leaner assortment. Compre Bem is managed independently from the Extra Super banner in order to streamline operational costs, especially logistics and IT.

Mercado Extra: Project that aims to reinvigorate Extra Super by reinforcing the quality of perishables and customer service, with a focus on the B and C income groups. There will be no changes to the stores' operating model, which will continue to be managed by the Extra banner.

Same-store growth: Same-store growth, as mentioned in this document, is adjusted by the calendar effect in each period.

Growth and Changes: The growth and changes presented in this document refer to variations from the same period last year, except where stated otherwise.
