-PAR TECHNOLOGY CORPORATION

CEO ANNOUNCES INTENTION TO RETIRE-

NEW HARTFORD, NY, PAR TECHNOLOGY CORPORATION (NYSE:PTC)

New Hartford, NY., July 8, 2010 – Today PAR Technology Corporation (NYSE: PTC) CEO John W. Sammon released the following letter:

Today I am announcing my intention to retire by the end of this year from my current position as CEO of PAR Technology. I have notified the PAR board of this intention and as a result the board has initiated a process to evaluate both internal and external candidates to fill the CEO position.

I believe this is a good time for my decision since PAR is now well positioned to enter an exciting era of growth resulting from the efforts of our board and management working closely to craft detailed strategies for each of our business units. Additionally, over the past two years we have staffed these business units with strong, experienced management personnel who are fully engaged in the execution of their plans. Our board and I have worked closely with our new business leaders to assure the continuance of the same principles which have built our company and preserved our long term customer relationships, namely; the delivery of quality products and services, with integrity, thereby earning the trust of our customers. It is in fact this trust which is the foundation of our business.

I expect our restaurant business will set new records over the next two years driven by major rollouts of new products, affording the opportunity to continue strategic investments such as; the development of next generation enterprise software for the hospitality market and the extension of our fledging Logistics Management Systems (LMS) business. Our startup LMS business provides an exciting opportunity to create a profitable recurring revenue business as our technology is adopted in the emerging “cold chain” business. Finally, our government business remains strong with predictable and profitable performance. Thus I expect to hand over a solid foundation upon which the next CEO can build an increasingly profitable company.

42 years ago, I founded Pattern Analysis & Recognition (PAR), never anticipating that it would become a NYSE, International Corporation with 1700 employees, serving prestigious global corporations. Without the efforts of the

Edgar Filing: PAR TECHNOLOGY CORP - Form 8-K

hundreds of employees, numerous customers and loyal stockholders; none of this would have been possible. So it is with a sense of profound gratitude and humility that I want to thank these people for creating PAR, while providing me with such an interesting career.

I will continue my involvement as Chairman of the PAR board and in this capacity I will have the continuing privilege to work with management and our board to help guide our company.

About PAR Technology Corporation

PAR Technology Corporation creates and markets products that help hospitality operators around the world to better manage money, materials, people and the guest experience. PAR has provided hardware, software and services to the world's largest restaurant chains and their franchisees for almost 30 years.
