- (2) Have all other periodic reports under section 13 or 15(d) of the Securities Exchange Act of 1934 or section 30 of the Investment Company Act of 1940 during the preceding 12 months or for such shorter period that the registrant was required to file such report(s) been filed? If the answer is no, identify report(s).

[X] Yes [] No

- (3) Is it anticipated that any significant change in results of operations from the corresponding period for the last fiscal year will be reflected by the earnings statements to be included in the subject report or portion thereof?

[X] Yes [] No

If so, attach an explanation of the anticipated change, both narratively and quantitatively, and, if appropriate, state the reasons why a reasonable estimate of the results cannot be made.

It is expected that the Registrant's sales be approximately \$29.3 million for the three months ended December 31, 2006 compared to \$26.2 million for the three

Edgar Filing: ACL SEMICONDUCTOR INC - Form NT 10-K

months ended December 31, 2005 and approximately \$105.6 million for the twelve months ended December 31, 2006 compared to \$110.2 million for the twelve months ended December 31, 2005. The increase in sales for the three months ended December 31, 2006 compared to those ended December 31, 2005 was attributable to the usual seasonal high demand in Memory business. The decrease in sales for the twelve months ended December 31, 2006 compared to those ended December 31, 2005 was mainly due to the continuous drop in the Memory unit price, which price continues to decrease through the product's life cycle. The actual units sold increased in proportion to the drop in the unit price.

It is expected that the Registrant's pretax profit be approximately \$0.719 million for the year ended December 31, 2006 compared to a pretax profit of \$0.235 million for the year ended December 31, 2005. The gross profit margin had improved from an average 2.9% to 3.8% year-on-year base, achieving a 30% increase. The Registrant experienced increased demand in China both in Flash card and MP3 player market. The Flash component trading contributed to the increase in sales of the Registrant. This occurred because of a fall in the unit price of Flash component which resulted in an increase in its application and demand. The market is sensitive to any price change and it was profitable for any Flash card manufacturer entering a mature market where Flash component price contributed to most of the cost. The MP3 market with a smaller share in sales volume contributed a better profit margin in the business because of the different cost structure. The MP3 market recovered significantly after a dull 2005. The DRAM business had a better margin than the Flash business in general as there was a large consumer electronic market with key applications being HDTV, DVD player and Set-top boxes. On the PC front, the overall VGA RAM sales increased as the newly launched Vista required VGA card with higher speed and larger capacity.
