NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)***1. Financial Statement Presentation**

These unaudited condensed consolidated financial statements do not include certain financial information required by U.S. generally accepted accounting principles (GAAP) for complete financial statements and should be read in conjunction with the audited consolidated financial statements and the related notes included in the Annual Report on Form 10-K/A of American International Group, Inc. (AIG) for the year ended December 31, 2005 (2005 Annual Report on Form 10-K/A).

In the opinion of management, these consolidated financial statements contain the normal recurring adjustments necessary for a fair statement of the results presented herein. All material intercompany accounts and transactions have been eliminated. Certain accounts have been reclassified in the 2005 financial statements to conform to their 2006 presentation. See also Note 11 herein.

Information with respect to the three and nine months ended September 30, 2005 includes the effects of corrections and reclassifications made in conjunction with the Second Restatement. See also AIG's 2005 Annual Report on Form 10-K/A.

2. Segment Information

AIG identifies its reportable segments by product line consistent with its management structure. AIG's major product and service groupings are general insurance, life insurance & retirement services, financial services and asset management. **The following table summarizes the operations by major operating segment for the three and nine-month periods ended September 30, 2006 and 2005:**

Operating Segments <i>(in millions)</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Revenues^(a):				
General Insurance ^{(b)(h)}	\$ 12,615	\$ 11,192	\$ 36,438	\$ 33,816
Life Insurance & Retirement Services ^{(c)(h)}	12,356	11,760	36,819	35,086
Financial Services ^(d)	3,187	1,926	6,028	8,140
Asset Management ^(e)	1,238	1,355	4,098	3,951
Other	(197)	175	(182)	520
Consolidated	\$ 29,199	\$ 26,408	\$ 83,201	\$ 81,513
Operating income (loss)^{(a)(f)(i)(j)}:				
General Insurance ^(h)	\$ 2,625	\$ (137)	\$ 7,819	\$ 3,390
Life Insurance & Retirement Services ^{(g)(h)}	2,448	2,248	7,424	6,787
Financial Services ^(g)	1,357	224	650	3,483
Asset Management	341	568	1,613	1,682
Other ^(k)	(470)	(356)	(1,171)	(445)
Consolidated	\$ 6,301	\$ 2,547	\$ 16,335	\$ 14,897

(a) Includes the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses. For the three-month periods ended September 30, 2006

and 2005, the effect was \$165 million and \$(353) million, respectively, in revenues and \$165 million and \$(345) million, respectively, in operating income. For the nine-month periods ended September 30, 2006 and 2005, the effect was \$(1.13) billion and \$2.21 billion, respectively, in revenues and \$(1.13) billion and \$2.28 billion, respectively, in operating income. These amounts result primarily from interest rate and foreign currency derivatives which are hedging available for sale securities and borrowings.

- (b) Represents the sum of General Insurance net premiums earned, net investment income and realized capital gains (losses).
- (c) Represents the sum of Life Insurance & Retirement Services GAAP premiums, net investment income and realized capital gains (losses). Included in realized capital gains (losses) is the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133 and foreign exchange gains (losses) of \$(190) million and \$(264) million in the three-month periods ended September 30, 2006 and 2005, respectively, and \$145 million and \$(447) million in the nine-month periods ended September 30, 2006 and 2005, respectively.
- (d) Represents interest, lease and finance charges.
- (e) Represents net investment income with respect to Guaranteed Investment Contracts (GICs) and management and advisory fees.
- (f) Represents income before income taxes, minority interest and cumulative effect of an accounting change.
- (g) Results of operations of AIG Credit Card Company (Taiwan) are shared equally by the Life Insurance & Retirement Services segment and the Financial Services segment. Additional allowances of \$44 million were recorded in the first quarter of 2006, by each segment, for losses in these credit card operations.
- (h) Includes the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts and other mutual funds (unit investment trusts). For the three and nine-month periods ended September 30, 2006 the effect was an increase of \$92 million and \$524 million, respectively, in both revenues and operating income for General Insurance and an increase of \$24 million in both revenues and operating income for the three-month period ended September 30, 2006 and \$245 million and \$168 million in revenues and operating income, respectively, for the nine-month period ended September 30, 2006, for Life Insurance & Retirement Services.
- (i) Includes current year catastrophe related losses of \$2.44 billion in both the third quarter and first nine months of 2005. There were no significant catastrophe related losses in the third quarter and first nine months of 2006.
- (j) Includes additional losses incurred and net reinstatement premiums related to prior year catastrophes of \$28 million and \$39 million in the three-month periods ended September 30, 2006 and 2005, respectively. Such losses and premiums were \$87 million and \$252 million in the nine-month periods ended September 30, 2006 and 2005, respectively.

(a) Represents the operations of American International Assurance Company, Limited together with American International Assurance Company (Bermuda) Limited (AIA), American International Reinsurance Company, Ltd. (AIRCO), and Nan Shan Life Insurance Company, Ltd. (Nan Shan). Revenues and operating income include realized capital gains (losses) of \$(87) million and \$(23) million for the three-month periods ended September 30, 2006 and 2005, respectively, and \$111 million and \$154 million for the nine-month periods ended September 30, 2006 and 2005, respectively. The effects of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses included in realized capital gains (losses) are losses of \$102 million and \$174 million for the three-month periods ended September 30, 2006 and 2005, respectively, and gains of \$11 million and losses of \$113 million for the nine-month periods ended September 30, 2006 and 2005, respectively. Includes \$44 million in additional allowances for losses recorded in the first quarter

of 2006 from AIG Credit Card Company (Taiwan).

- (b) Represents the operations of American Life Insurance Company (ALICO), AIG Star Life Insurance Co., Ltd. (AIG Star Life), and AIG Edison Life Insurance Company (AIG Edison Life). Revenues and operating income include realized capital gains of \$65 million and \$44 million for the three-month periods ended September 30, 2006 and 2005, respectively, and gains of \$376 million and losses of \$85 million for the nine-month periods ended September 30, 2006 and 2005, respectively. The effects of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses included in realized capital gains (losses) are gains of \$28 million and losses of \$102 million for the three-month periods ended September 30, 2006 and 2005, respectively, and gains of \$184 million and losses of \$365 million for the nine-month periods ended September 30, 2006 and 2005, respectively.*
- (c) Includes the life operations of American General Life Insurance Company (AG Life), AIG Life Insurance Company and American International Life Assurance Company of New York. Also includes the operations of American General Life and Accident Insurance Company (AGLA). Revenues and operating income include realized capital gains (losses) of \$(123) million and \$41 million for the three-month periods ended September 30, 2006 and 2005, respectively, and losses of \$190 million and \$22 million for the nine-month periods ended September 30, 2006 and 2005, respectively. The effects of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses included in realized capital gains (losses) are losses of \$104 million and gains of \$122 million for the three-month periods ended September 30, 2006 and 2005, respectively, and gains of \$11 million and \$56 million for the nine-month periods ended September 30, 2006 and 2005, respectively.*
- (d) AIG SunAmerica represents the annuity operations of AIG SunAmerica Life Assurance Company, as well as those of First SunAmerica Life Insurance Company and SunAmerica Life Insurance Company. Also includes the operations of The Variable Annuity Life Insurance Company (VALIC) and AIG Annuity Insurance Company (AIG Annuity). Revenues and operating income include realized capital losses of \$24 million and \$83 million for the three-month periods ended September 30, 2006 and 2005, respectively, and losses of \$414 million and \$71 million for the nine-month periods ended September 30, 2006 and 2005, respectively. The effects of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses included in realized capital gains (losses) are \$0 and losses of \$110 million for the three month periods ended September 30, 2006 and 2005, respectively, and losses of \$36 million and \$25 million for the nine-month periods ended September 30, 2006 and 2005, respectively.*
- (e) Includes the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts. For the three-month period ended September 30, 2006 the effect was an increase of \$9 million in both revenues and operating income. For the nine-month period ended September 30, 2006 the effect was an increase of \$230 million in revenues and \$153 million in operating income.*
- (f) Includes the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts. For the three and nine-month periods ended September 30, 2006 the effect was an increase of \$15 million in both revenues and operating income.*

2. Segment Information *(continued)*

The following table summarizes AIG's Financial Services operations by major internal reporting unit for the three and nine-month periods ended September 30, 2006 and 2005:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Financial Services <i>(in millions)</i>	2006	2005	2006	2005
Revenues^(a):				
Aircraft Finance ^(b)	\$ 1,060	\$ 943	\$ 3,067	\$ 2,661
Capital Markets ^{(c)(d)}	1,118	23	30	2,754
Consumer Finance ^(e)	970	940	2,833	2,664
Other	39	20	98	61
Total Financial Services	\$ 3,187	\$ 1,926	\$ 6,028	\$ 8,140
Operating income (loss)^(a):				
Aircraft Finance	\$ 157	\$ 165	\$ 475	\$ 476
Capital Markets ^(d)	965	(150)	(457)	2,306
Consumer Finance ^{(f)(g)}	220	190	594	649
Other	15	19	38	52
Total Financial Services	\$ 1,357	\$ 224	\$ 650	\$ 3,483

(a) Includes the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses. For the three and nine-month periods ended September 30, 2005, the effect was \$(10) million and \$(59) million, respectively, in operating income for Aircraft Finance. During 2006, Aircraft Finance derivative gains and losses are reported as part of the Other category and not reported in Aircraft Finance operating income. For the three-month periods ended September 30, 2006 and 2005, the effect was \$783 million and \$(365) million in both revenues and operating income, respectively, for Capital Markets. For the nine-month periods ended September 30, 2006 and 2005, the effect was \$(1.06) billion and \$1.80 billion in both revenues and operating income, respectively, for Capital Markets. These amounts result primarily from interest rate and foreign currency derivatives which are hedging available for sale securities and borrowings.

(b) Revenues are primarily aircraft lease rentals from International Lease Finance Corporation (ILFC).

(c) Revenues, shown net of interest expense, are primarily from hedged financial positions entered into in connection with counterparty transactions and the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133 described in (a) above.

(d) Certain transactions entered into by AIGFP generate tax credits and benefits which are included in income taxes in the consolidated statement of income. The amount of such tax credits and benefits for the three-month periods ended September 30, 2006 and 2005 are \$3 million and \$23 million, respectively. The amount of such tax credits and benefits for the nine-month periods ended September 30, 2006 and 2005 are \$29 million and \$63 million, respectively.

- (e) Revenues are primarily finance charges.*
- (f) Includes \$44 million in additional allowances for losses recorded in the first quarter of 2006 from AIG Credit Card Company (Taiwan).*
- (g) Includes catastrophe related losses of \$62 million recorded in the third quarter of 2005 resulting from hurricane Katrina, which were reduced by \$22 million in the third quarter of 2006.*

Other	54	99	190	269
Total Asset Management	\$ 341	\$ 568	\$ 1,613	\$ 1,682

(a) Includes the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses. For the three and nine-month periods ended September 30, 2005, the effect was \$18 million and \$127 million, respectively, in operating income. During 2006, these derivative gains and losses are reported as part of the Other category, and not reported in Asset Management operating income.

(b) Includes the full results of certain AIG managed private equity and real estate funds that are consolidated pursuant to FIN 46(R), Consolidation of Variable Interest Entities. Also includes \$(3) million and \$77 million for the three-month periods ended September 30, 2006 and 2005, respectively, and \$207 million and \$189 million for the nine-month periods ended September 30, 2006 and 2005, respectively, of third-party limited partner earnings offset in minority interest expense, which is not a component of operating income.

(c) Includes the full results of certain AIG managed partnerships that are consolidated effective January 1, 2006 pursuant to EITF 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights. For the three and nine-month periods ended September 30, 2006, operating income includes \$47 million and \$203 million, respectively, of third-party limited partner earnings offset in minority interest expense, which is not a component of operating income.

3. Earnings Per Share

Earnings per share of AIG are based on the weighted average number of common shares outstanding during the period. See also Note 10 herein.

Computation of Earnings Per Share (EPS):

	Three Months Ended September 30,		Nine Months Ended September 30,	
<i>(in millions, except per share data)</i>	2006	2005	2006	2005

Contingently convertible bonds ^(a)	9	9	9	9
Weighted-adjusted average shares outstanding diluted ^(b)	2,626	2,624	2,625	2,624
Earnings per share:				
Basic:				
Income before cumulative effect of an accounting change	\$ 1.62	\$ 0.67	\$ 4.06	\$ 3.86
Cumulative effect of an accounting change, net of tax			0.01	
Net Income	\$ 1.62	\$ 0.67	\$ 4.07	\$ 3.86
Diluted:				
Income before cumulative effect of an accounting change	\$ 1.61	\$ 0.66	\$ 4.03	\$ 3.82
Cumulative effect on an accounting change, net of tax			0.01	
Net income	\$ 1.61	\$ 0.66	\$ 4.04	\$ 3.82

(a) Assumes conversion of contingently convertible bonds due to the adoption of EITF Issue No. 04-8 Accounting Issues Related to Certain Features of Contingently Convertible Debt and the Effect on Diluted Earnings per Share.

(b) Certain share equivalents arising from employee stock plans were not included in the computation of diluted earnings per share where the exercise price of the options exceeded the average market price and would have been antidilutive. The number of share equivalents excluded were 14 million and 21 million for the first nine months of 2006 and 2005, respectively.

From time to time, AIG may buy shares of its common stock in the open market for general corporate purposes, including to satisfy its obligations under various employee benefit plans. At September 30, 2006 and December 31, 2005, an additional 36,542,700 shares could be purchased under the then current authorization by AIG's Board of Directors. Although AIG has authorization to purchase additional shares, AIG has not repurchased shares in 2006. During the nine months ended September 30, 2005, AIG purchased in the open market 2,477,100 shares of its common stock, all of which were acquired in the first quarter.

The quarterly dividend rate per common share, commencing with the dividend declared in May 2006 and paid on September 15, 2006, is \$0.165. The declared dividend amount of \$0.175 for the three months ended September 30, 2005 includes a \$0.025 increase to the amount previously declared in the second quarter of 2005 for payment in

September 2005 as well as the \$0.125 dividend declared in May 2005 for payment in September 2005.

4. Benefits Provided by Starr International Company, Inc. and C.V. Starr & Co., Inc.

Starr International Company, Inc. (SICO) has provided a series of two-year Deferred Compensation Profit Participation Plans (SICO Plans) to certain AIG employees. The SICO Plans came into being in 1975 when the voting shareholders and Board of Directors of SICO, a private holding company whose principal asset is AIG common stock, decided that a portion of the capital value of SICO should be used to provide an incentive plan for the current and succeeding managements of all American International companies, including AIG.

None of the costs of the various benefits provided under the SICO Plans has been paid by AIG, although AIG has recorded a charge to reported earnings for the deferred compensation amounts paid to AIG employees by SICO, with an offsetting amount credited to additional paid-in capital reflecting amounts deemed contributed by SICO. The SICO Plans provide that shares currently owned by SICO are set aside by SICO for the benefit of the participant and distributed upon retirement. The SICO Board of Directors currently may permit an early payout of units under certain circumstances. Prior to payout, the participant is not entitled to vote, dispose of or receive dividends with respect to such shares, and shares are subject to forfeiture under certain conditions, including but not limited to the participant's voluntary termination of employment with AIG prior to normal retirement age. Under the SICO Plans, SICO's Board of Directors may elect to pay a participant cash in lieu of shares of AIG common stock. Following notification from SICO to participants in the SICO Plans that it will settle specific future awards under the SICO Plans with shares rather than cash, AIG modified its accounting for the SICO Plans from variable to fixed measurement accounting, although variable accounting will continue to be applied where SICO makes cash pay-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

4. Benefits Provided by Starr International Company, Inc. *(continued)*

ments pursuant to elections made prior to March 2005. AIG gave effect to this change in settlement method beginning on December 9, 2005, the date of SICO's notice to participants in the SICO Plans. See also Note 6(b) Commitments herein.

Compensation expense with respect to the SICO Plans aggregated \$14 million and \$62 million for the three-month periods ended September 30, 2006 and 2005, respectively, and \$104 million and \$129 million for the nine-month periods ended September 30, 2006 and 2005, respectively. Compensation expense in the first quarter of 2006 included various out of period adjustments totaling \$61 million, primarily relating to stock-splits and other miscellaneous items. See also Note 10 herein.

In January 2006, C.V. Starr & Co., Inc. (Starr) completed its tender offer to purchase Starr interests from AIG employees. In conjunction with AIG's adoption of FAS 123R, Starr is considered to be an economic interest holder in AIG. As a result, compensation expense of \$54 million recorded in the first quarter with respect to the Starr offer, was included in the first nine months of 2006.

As a result of its changing relationship with Starr and SICO, AIG has established new executive compensation plans to replace the SICO plans and investment opportunities previously provided by Starr. The replacement plans include both share-based plans and cash-based plans. In addition, these replacement plans generally include performance as well as service conditions. See also Note 10 herein.

5. Ownership and Transactions With Related Parties

(a) Ownership: According to the Schedule 13D filed on May 26, 2006 by Starr, SICO, Edward E. Matthews, Maurice R. Greenberg, the Maurice R. and Corinne P. Greenberg Family Foundation, Inc., the Universal Foundation, Inc. and the Maurice R. and Corinne P. Greenberg Joint Tenancy Company, LLC, these reporting persons could be deemed to beneficially own 393,157,543 shares of common stock at that date. Based on the shares of common stock outstanding as of October 31, 2006, this ownership would represent approximately 15 percent of the voting stock of AIG. Although these reporting persons have made filings under Section 16 of the Securities Exchange Act of 1934, as amended (the Exchange Act), reporting sales of shares of common stock, no amendment to the Schedule 13D has been filed to report a change in ownership.

(b) Transactions with Related Parties: In the ordinary course of business during the first nine months of 2006, AIG and its subsidiaries paid commissions to Starr and its subsidiaries for the production and management of insurance business. As of July 25, 2006, none of the Starr agencies serve as agents for AIG companies. There were no significant receivables from/payables to related parties at September 30, 2006.

6. Commitments, Contingencies and Guarantees

In the normal course of business, various commitments and contingent liabilities are entered into by AIG and certain of its subsidiaries. In addition, AIG guarantees various obligations of certain subsidiaries.

Litigation and Investigations

(a) AIG and its subsidiaries, in common with the insurance industry in general, are subject to litigation, including claims for punitive damages, in the normal course of their business. The trend of increasing jury awards and settlements makes it difficult to assess the ultimate outcome of such litigation.

Although AIG regularly reviews the adequacy of the established reserve for losses and loss expenses, there can be no assurance that AIG's ultimate loss reserves will not develop adversely and materially exceed AIG's current loss reserves. Estimation of ultimate net losses, loss expenses and loss reserves is a complex process for long-tail casualty lines of business, which include excess and umbrella liability, directors and officers liability (D&O), professional liability, medical malpractice, workers compensation, general liability, products liability and related classes, as well as for asbestos and environmental exposures. Generally, actual historical loss development factors are used to project future loss development. However, there can be no assurance that future loss development patterns will be the same as in the past. Moreover, any deviation in loss cost trends or in loss development factors might not be discernible for an extended period of time subsequent to the recording of the initial loss reserve estimates for any accident year. Thus,

there is the potential for reserves with respect to a number of years to be significantly affected by changes in loss cost trends or loss development factors that were relied upon in setting the reserves. These changes in loss trends or loss development factors could be attributable to changes in inflation, in labor and material costs or in the judicial environment, or in other social or economic phenomena affecting claims.

(b) AIG and certain of its subsidiaries have been named defendants in two putative class actions in state court in Alabama that arise out of the 1999 settlement of class and derivative litigation involving Caremark Rx, Inc. (Caremark). An excess policy issued by a subsidiary of AIG with respect to the 1999 litigation was expressly stated to be without limit of liability. In the current actions, plaintiffs allege that the judge approving the 1999 settlement was misled as to the extent of

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

6. Commitments, Contingencies and Guarantees *(continued)*

available insurance coverage and would not have approved the settlement had he known of the existence and/or unlimited nature of the excess policy. They further allege that AIG, its subsidiaries, and Caremark are liable for fraud and suppression for misrepresenting and/or concealing the nature and extent of coverage. In their complaint, plaintiffs request compensatory damages for the 1999 class in the amount of \$3.2 billion, plus punitive damages. AIG and its subsidiaries deny the allegations of fraud and suppression and have asserted, *inter alia*, that information concerning the excess policy was publicly disclosed months prior to the approval of the settlement. AIG and its subsidiaries further assert that the current claims are barred by the statute of limitations and that plaintiffs' assertions that the statute was tolled cannot stand against the public disclosure of the excess coverage. Plaintiffs, in turn, have asserted that the disclosure was insufficient to inform them of the nature of the coverage and did not start the running of the statute of limitations. On January 28, 2005, the Alabama trial court determined that one of the current actions may proceed as a class action on behalf of the 1999 classes that were allegedly defrauded by the settlement. AIG, its subsidiaries, and Caremark sought appellate relief from the Alabama Supreme Court, which was granted in substantial part in August 2006. The matter is in the process of being remanded to the trial court to proceed with a class certification determination under the standards set by the Alabama Supreme Court. AIG cannot now estimate either the likelihood of its prevailing in these actions or the potential damages in the event liability is determined.

(c) Regulators from several states have commenced investigations into insurance brokerage practices related to contingent commissions and other broker-related conduct, such as alleged bid rigging. Various parties, including insureds and shareholders, have also asserted putative class action and other claims against AIG or its subsidiaries alleging, among other things, violations of the antitrust and federal securities laws, and AIG expects that additional claims may be made.

In February 2006, AIG reached a resolution of claims and matters under investigation with the United States Department of Justice (DOJ), the Securities and Exchange Commission (SEC), the Office of the New York Attorney General (NYAG) and the New York State Department of Insurance (DOI). The settlements resolved outstanding litigation filed by the SEC, NYAG and DOI against AIG and concluded negotiations with these authorities and the DOJ in connection with the accounting, financial reporting and insurance brokerage practices of AIG and its subsidiaries, as well as claims relating to the underpayment of certain workers compensation premium taxes and other assessments. In the fourth quarter of 2005 AIG recorded an after-tax charge of \$1.15 billion for the settlements.

As a result of these settlements, AIG made payments or placed amounts in escrow in the first nine months of 2006 totaling approximately \$1.64 billion, \$225 million of which represented fines and penalties. Amounts held in escrow totaling \$692 million, including interest thereon, are included in other assets and other liabilities at September 30, 2006. A substantial portion of the money will be available to resolve claims asserted in various regulatory and civil proceedings, including shareholder lawsuits.

Also, as part of the settlements, AIG has agreed to retain for a period of three years an independent consultant who will conduct a review that will include the adequacy of AIG's internal control over financial reporting and the remediation plan that AIG has implemented as a result of its own internal review.

Various federal and state regulatory agencies are reviewing certain transactions and practices of AIG and its subsidiaries in connection with industry-wide and other inquiries. AIG has cooperated, and will continue to cooperate, in producing documents and other information in response to the subpoenas.

A number of lawsuits have been filed regarding the subject matter of the investigations of insurance brokerage practices, including derivative actions, individual actions and class actions under the federal securities laws, Racketeer Influenced and Corrupt Organizations Act (RICO), Employee Retirement Income Security Act (ERISA) and state common and corporate laws in both federal and state courts, including the United States District Court for the Southern District of New York (Southern District of New York), in the Commonwealth of Massachusetts Superior Court and in Delaware Chancery Court. All of these actions generally allege that AIG and its subsidiaries violated the law by allegedly concealing a scheme to rig bids and steer business between insurance companies and insurance

brokers.

Since October 19, 2004, AIG or its subsidiaries have been named as a defendant in eighteen complaints that were filed in federal court and two that were originally filed in state court (Massachusetts and Florida) and removed to federal court. These cases generally allege that AIG and its subsidiaries violated federal and various state antitrust laws, as well as federal RICO laws, various state deceptive and unfair practice laws and certain state laws governing fiduciary duties. The alleged basis of these claims is that there was a conspiracy between insurance companies and insurance brokers with regard to the use of contingent commission agreements, bidding practices, and other broker-related conduct concerning coverage in certain sectors of the insurance industry. The Judicial Panel on Multidistrict Litigation entered an

Table of Contents

American International Group, Inc. and Subsidiaries

6. Commitments, Contingencies and Guarantees *(continued)*

order on February 17, 2005, consolidating most of these cases and transferring them to the United States District Court for the District of New Jersey (District of New Jersey). The remainder of these cases have been transferred to the District of New Jersey. On August 15, 2005, the plaintiffs in the multidistrict litigation filed a Corrected First Consolidated Amended Commercial Class Action Complaint, which, in addition to the previously named AIG defendants, names new AIG subsidiaries as defendants. Also on August 15, 2005, AIG and two subsidiaries were named as defendants in a Corrected First Consolidated Amended Employee Benefits Class Action Complaint filed in the District of New Jersey, which asserts similar claims with respect to employee benefits insurance and a claim under ERISA on behalf of putative classes of employers and employees.

On November 29, 2005, the AIG defendants, along with other insurer defendants and the broker defendants filed motions to dismiss both the Commercial and Employee Benefits Complaints. On October 3, 2006, the Court reserved in part and denied in part the motions to dismiss. The Court denied the motions to dismiss the ERISA claims, but ordered an expedited discovery schedule, and the Court reserved on the state law claims. Plaintiffs have filed a motion for class certification in the consolidated action, in response to which defendants have filed an opposition. In addition, complaints were filed against AIG and several of its subsidiaries in Massachusetts and Florida state courts, which have both been stayed. In the Florida action, the plaintiff filed a petition for a writ of certiorari with the District Court of Appeals of the State of Florida, Fourth District with respect to the stay order which was granted on August 16, 2006. The Fourth District Court remanded to the trial court to reconsider whether a stay should be granted. On February 9, 2006, a complaint against AIG and several of its subsidiaries was filed in Texas state court, making claims similar to those in the federal cases above. On October 17, 2006, the court stayed the case until January 31, 2007.

In April and May 2005, amended complaints were filed in the consolidated derivative and securities cases, as well as in one of the ERISA lawsuits, pending in the Southern District of New York adding allegations concerning AIG's accounting treatment for non-traditional insurance products.

In September 2005, a second amended complaint was filed in the consolidated securities cases adding allegations concerning AIG's first restatement of its financial statements described in the 2005 Annual Report on Form 10-K (the

First Restatement), and a new securities action complaint was filed in the Southern District of New York, asserting claims premised on the same allegations made in the consolidated cases. In April 2006, motions to dismiss were denied in the securities actions. AIG filed answers in both securities actions in June 2006, as did other defendants.

Also in September 2005, a class action complaint was filed to consolidate the ERISA cases pending in the Southern District of New York. Motions to dismiss in the consolidated action were filed in January 2006.

In April 2005, new derivative actions were filed in Delaware Chancery Court, and in July and August 2005, two new derivative actions were filed in the Southern District of New York asserting claims duplicative of the claims made in the consolidated derivative action.

In July 2005, a second amended complaint was filed in the consolidated derivative case in the Southern District of New York, expanding upon accounting-related allegations, based upon the First Restatement. In June 2005, the derivative cases in Delaware were consolidated and, in August 2005, an amended consolidated complaint was filed. AIG's Board of Directors has appointed a special committee of independent directors to review the matters asserted in the derivative complaints. The courts have approved agreements staying the derivative cases pending in the Southern District of New York and in Delaware Chancery Court while the special committee of independent directors performs its work. In September 2005, a shareholder filed suit in Delaware Chancery Court seeking documents relating to some of the allegations made in the derivative suits. The court approved a stipulation dismissing that action on May 15, 2006.

On June 20, 2006, SICO filed suit in Delaware Chancery Court seeking the inspection of certain books and records of AIG. The Chancery court has dismissed the action with prejudice by agreement of the parties.

In late 2002, a derivative action was filed in Delaware Chancery Court in connection with AIG's transactions with certain entities affiliated with Starr and SICO. In May 2005, the plaintiff filed an amended complaint which adds

additional claims premised on allegations relating to insurance brokerage practices and AIG's non-traditional insurance products. On February 16, 2006, the Delaware Chancery Court entered an order dismissing the litigation with prejudice with respect to AIG's outside directors and dismissing the claims against the remaining AIG defendants without prejudice. In response to an order, dated July 5, 2006, dismissing certain of its claims, the plaintiff filed a second amended complaint on July 21, 2006, which adds additional claims against Starr. Defendants filed answers in September 2006.

AIG cannot predict the outcome of the matters described above or estimate the potential costs related to these matters and, accordingly, no reserve is being established in AIG's financial statements at this time. In the opinion of AIG man-

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

6. Commitments, Contingencies and Guarantees *(continued)*

agement, AIG's ultimate liability for the matters referred to above is not likely to have a material adverse effect on AIG's consolidated financial condition, although it is possible that the effect would be material to AIG's consolidated results of operations for an individual reporting period.

(d) On July 8, 2005, SICO filed a complaint against AIG in the Southern District of New York. The complaint alleges that AIG is in the possession of items, including artwork, which SICO claims it owns, and seeks an order causing AIG to release those items as well as actual, consequential, punitive and exemplary damages. On September 27, 2005, AIG filed its answer to SICO's complaint denying SICO's allegations and asserting counter-claims for breach of contract, unjust enrichment, conversion and breach of fiduciary duty relating to SICO's breach of its commitment to use its AIG shares for the benefit of AIG and its employees. On October 17, 2005, SICO replied to AIG's counter-claims and additionally sought a judgment declaring that SICO is neither a control person nor an affiliate of AIG for purposes of Schedule 13D under the Exchange Act, or Rule 144 under the Securities Act of 1933, as amended (the Securities Act), respectively. AIG responded to the SICO claims on November 7, 2005.

(e) AIG understands that some of its employees have received Wells notices in connection with previously disclosed SEC investigations of certain of AIG's transactions or accounting practices. Under SEC procedures, a Wells notice is an indication that the SEC staff has made a preliminary decision to recommend enforcement action that provides recipients with an opportunity to respond to the SEC staff before a formal recommendation is finalized. AIG anticipates that additional current and former employees could receive similar notices in the future as the regulatory investigations proceed.

Commitments

(a) At September 30, 2006, ILFC had committed to purchase 268 new aircraft deliverable from 2006 through 2015 at an estimated aggregate purchase price of \$19.2 billion and had options to purchase three new aircraft at an estimated aggregate purchase price of \$453 million. ILFC will be required to find customers for any aircraft acquired, and it must arrange financing for portions of the purchase price of such equipment.

(b) On June 27, 2005, AIG entered into an agreement pursuant to which AIG agrees, subject to certain conditions, to make any payment that is not promptly paid with respect to the benefits accrued by certain employees of AIG and its subsidiaries under the SICO Plans (as defined in Note 4).

Contingencies

(a) On December 30, 2004, an arbitration panel issued its ruling in connection with a 1998 workers compensation quota share reinsurance agreement under which Superior National Insurance Company, among others, was reinsured by The United States Life Insurance Company in the City of New York (USLIFE), a subsidiary of American General Corporation. In its 2-1 ruling, the arbitration panel refused to rescind the contract as requested by USLIFE. Instead, the panel reformed the contract to reduce USLIFE's participation by ten percent. USLIFE is pursuing certain reinsurance recoverables in connection with the contract. Further, the arbitration ruling established a second phase of arbitration for USLIFE to present its challenges to certain cessions to the contract. AIG holds a reserve of approximately \$379 million related to this matter as of September 30, 2006.

(b) AIG generates income tax credits as a result of investing in synthetic fuel production. Tax credits generated from the production and sale of synthetic fuel under the Internal Revenue Code are subject to an annual phase-out provision that is based on the average wellhead price of domestic crude oil. The price range within which the tax credits are phased-out was originally established in 1980 and is adjusted annually for inflation. Depending on the price of domestic crude oil for a particular year, all or a portion of the tax credits generated in that year might be eliminated. Tax credits reflected in the income tax provision for the first nine months of 2006 have been reduced to reflect an estimated phase-out of the tax credits from 2006 synthetic fuel production based on the observed price of domestic crude oil. Since the phase-out of tax credits from 2006 synthetic fuel production will depend on the average wellhead price of domestic crude oil for the entire 2006 calendar year, it is not possible to determine the extent to which the 2006 tax credits actually will be phased-out. As a result, the actual level of tax credits from 2006 synthetic fuel

production may be higher or lower than the current estimate. AIG evaluates the production levels of its synthetic fuel production facilities in light of the risk of phase-out of the associated tax credits. As a result of fluctuating domestic crude oil prices, AIG intends to evaluate and possibly adjust production levels in light of this risk for the remainder of 2006. Regardless of oil prices, the tax credits expire after 2007.

Guarantees

(a) AIG and certain of its subsidiaries become parties to derivative financial instruments with market risk resulting from both dealer and end user activities and to reduce currency, interest rate, equity and commodity exposures. These instruments are carried at their estimated fair values in the consolidated balance sheet. The vast majority of AIG's derivative activity is transacted by AIGFP. (See also Note 20 of Notes to

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

6. Commitments, Contingencies and Guarantees *(continued)*

Consolidated Financial Statements in AIG's 2005 Annual Report on Form 10-K/A.)

(b) AIG has issued unconditional guarantees with respect to the prompt payment, when due, of all present and future payment obligations and liabilities of AIGFP arising from transactions entered into by AIGFP.

(c) SAI Deferred Compensation Holdings, Inc., a wholly-owned subsidiary of AIG, has established a deferred compensation plan for registered representatives of certain AIG subsidiaries, pursuant to which participants have the opportunity to invest deferred commissions and fees on a notional basis. The value of the deferred compensation fluctuates with the value of the deferred investment alternatives chosen. AIG has provided a full and unconditional guarantee of the obligations of SAI Deferred Compensation Holdings, Inc. to pay the deferred compensation under the plan.

7. Employee Benefits

The following table presents the components of the net periodic benefit costs with respect to pensions and postretirement benefits for the three and nine-month periods ended September 30, 2006 and 2005:

<i>(in millions)</i>	Pensions			Postretirement		
	Non-U.S. Plans	U.S. Plans	Total	Non-U.S. Plans	U.S. Plans	Total
Three Months Ended September 30, 2006						
Components of net period benefit cost:

American International Group, Inc. and Subsidiaries

8. Recent Accounting Standards

Accounting Changes

At the March 2004 meeting, the Emerging Issue Task Force (EITF) reached a consensus with respect to Issue No. 03-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*. On September 30, 2004, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) EITF No. 03-1-1, *Effective Date of Paragraphs 10-20 of EITF Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments* delaying the effective date of this guidance until the FASB has resolved certain implementation issues with respect to this guidance, but the disclosures remain effective. This FSP, retitled FSP FAS 115-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*, replaces the measurement and recognition guidance set forth in Issue No. 03-1 and codifies certain existing guidance on impairment and accretion of income. AIG's adoption of FSP FAS 115-1 on January 1, 2006 did not have a material effect on AIG's consolidated financial condition or results of operations.

In December 2004, the FASB issued Statement No. 123 (revised 2004), *Share-Based Payment* (FAS 123R). FAS 123R and its related interpretive guidance replaces FAS No. 123, *Accounting for Stock-Based Compensation* (FAS 123), supersedes Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25) and amends FAS 95, *Statement of Cash Flows*. FAS 123, as originally issued in 1995, established as preferable a fair-value-based method of accounting for share-based payment transactions with employees. On January 1, 2003, AIG adopted the recognition provisions of FAS 123. See also Note 10 herein. AIG adopted the provisions of the revised FAS 123R and its related interpretive guidance on January 1, 2006.

For its service-based awards under the 1999 Stock Option Plan, 2002 Stock Incentive Plan and 1996 Employee Stock Purchase Plan, AIG recognizes compensation on a straight-line basis over the scheduled vesting period. Unrecognized unvested compensation expense for stock option awards granted under APB 25 (i.e., before January 1, 2003) will be recognized from January 1, 2006 to the vesting date. However, for the SICO Plans, the AIG Deferred Compensation Profit Participant Plan and the AIG Partners Plan, which contain both performance and service conditions, AIG recognizes compensation utilizing a graded vesting expense attribution method. The effect of this approach is to recognize compensation cost over the requisite service period for each separately vesting tranche of the award.

AIG's share-based plans generally provide for accelerated vesting after the participant turns 65 and retires. For awards granted after January 1, 2006, compensation expense is recognized ratably from the date of grant through the shorter of age 65 or the vesting period. The effect of this change is not material to AIG's consolidated financial position or results of operations. Awards granted prior to January 1, 2006 will continue to be recognized over the vesting period with accelerated expense recognition upon an actual retirement. SICO compensation expense for participants retiring after age 65 had been reflected in prior years' results consistent with vested status under the SICO Plans.

On June 1, 2005, the FASB issued Statement No. 154, *Accounting Changes and Error Corrections* (FAS 154). FAS 154 replaces APB Opinion No. 20, *Accounting Changes* and FASB Statement No. 3, *Reporting Accounting Changes in Interim Financial Statements*. FAS 154 requires that a voluntary change in accounting principles be applied retrospectively with all prior period financial statements presented based on the new accounting principle, unless it is impracticable to do so. FAS 154 also provides that a correction of errors in previously issued financial statements should be termed a restatement. The new standard was effective for accounting changes and correction of errors beginning January 1, 2006.

At the June 2005 meeting, the EITF reached a consensus with respect to Issue No. 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights*. The Issue addresses what rights held by the limited partner(s) preclude consolidation in circumstances in which the sole general partner would consolidate the limited partnership in accordance with generally accepted accounting principles absent the existence of the rights held by the limited

partner(s). Based on that consensus, the EITF also agreed to amend the consensus in Issue No. 96-16, *Investor's Accounting for an Investee When the Investor Has a Majority of the Voting Interest but the Minority Shareholders Have Certain Approval or Veto Rights*. The guidance in this Issue is effective after June 29, 2005 for general partners of all new limited partnerships formed and for existing limited partnerships for which the partnership agreements are modified. For general partners in all other limited partnerships, the guidance in this Issue was effective beginning January 1, 2006. The effect of the adoption of this EITF Issue was not material to AIG's consolidated financial condition or results of operations.

On June 29, 2005, FASB issued Statement 133 Implementation Issue No. B38, *Embedded Derivatives: Evaluation of Net Settlement with Respect to the Settlement of a Debt Instrument through Exercise of an Embedded Put Option or Call Option*. This implementation guidance relates to the potential settlement of the debtor's obligation to the creditor that would occur upon exercise of the put option or call option, which meets the net settlement criterion in FAS 133. The effective date of the implementation guidance is January 1, 2006. The adop-

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

8. Recent Accounting Standards *(continued)*

tion of this guidance did not have a material effect on AIG's consolidated financial condition or results of operations.

On June 29, 2005, the FASB issued Statement 133 Implementation Issue No. B39, Application of Paragraph 13(b) to Call Options That Are Exercisable Only by the Debtor. The conditions in FAS 133 paragraph 13(b) do not apply to an embedded call option in a hybrid instrument containing a debt host contract if the right to accelerate the settlement of the debt can be exercised only by the debtor (issuer/borrower). This guidance does not apply to other embedded derivative features that may be present in the same hybrid instrument. The effective date of the implementation guidance is January 1, 2006. The adoption of this guidance did not have a material effect on AIG's consolidated financial condition or results of operations.

On February 16, 2006, the FASB issued FAS No. 155, Accounting for Certain Hybrid Financial Instruments (FAS 155), an amendment of FAS 140 and FAS 133. FAS 155 allows AIG to include changes in fair value in earnings on an instrument-by-instrument basis for any hybrid financial instrument that contains an embedded derivative that would otherwise be required to be bifurcated and accounted for separately under FAS 133. The election to measure the hybrid instrument at fair value is irrevocable at the acquisition or issuance date.

AIG elected to early adopt FAS 155 as of January 1, 2006, and apply FAS 155 fair value measurement to certain structured note liabilities and structured investments in AIG's available for sale portfolio that existed at December 31, 2005. The effect of this adoption resulted in an \$11 million after-tax (\$18 million pre-tax) decrease to opening retained earnings as of January 1, 2006, representing the difference between the fair value of these hybrid financial instruments and the prior carrying value as of December 31, 2005. The effect of adoption on after-tax gross gains and losses was \$218 million (\$336 million pre-tax) and \$229 million (\$354 million pre-tax), respectively.

In connection with AIG's early adoption of FAS 155, structured note liabilities of \$8.1 billion, other structured liabilities in conjunction with equity derivative transactions of \$70 million, and hybrid financial instruments of \$407 million at September 30, 2006 are now carried at fair value. The effect on earnings for the three and nine-month periods ended September 30, 2006, for changes in the fair value of hybrid financial instruments, was a pre-tax gain of \$79 million and a pre-tax loss of \$44 million, respectively, and is reflected in Other income.

On March 27, 2006, the FASB issued FSP FTB 85-4-1, Accounting for Life Settlement Contracts by Third-Party Investors (FSP 85-4-1), an amendment of FTB 85-4, Accounting for Purchases of Life Insurance. Life settlements are designed to assist life insurance policyholders in monetizing the existing value of life insurance policies. FSP 85-4-1 allows AIG to measure life settlement contracts using either the investment method or fair value method. The election is made on an instrument-by-instrument basis and is irrevocable. AIG elected to early adopt FSP 85-4-1 as of January 1, 2006 using the investment method for pre-existing investments held at December 31, 2005. The effect of this adoption resulted in a \$319 million after tax (\$487 million pre-tax) increase to opening retained earnings.

On June 29, 2006, AIG restructured its ownership of life settlement contracts with no effect on the economic substance of these investments. At the same time, AIG paid \$610 million to its former co-investors to acquire all the remaining interests in life settlement contracts held in previously non-consolidated trusts.

At September 30, 2006, the carrying value of AIG's life settlement contracts was \$1.21 billion, and is included in Other invested assets on the consolidated balance sheet. These investments are monitored for impairment on a contract by contract basis quarterly. During the three month period ended September 30, 2006, income recognized on life settlement contracts previously held in non-consolidated trusts was \$5 million, and is included in net investment income on the consolidated statement of income. Such income totaled \$18 million for the nine month period then ended. Further information regarding life settlement contracts as of September 30, 2006 is as follows:

*(dollars in millions)***Remaining Life****Expectancy****Carrying****Face Value**

of Insureds		Number of Contracts	Value	(Death Benefits)
0	1 year	4	\$ 6	\$ 7
1	2 years	24	14	20
2	3 years	64	38	59
3	4 years	135	131	229
4	5 years	137	85	175
Thereafter		1,540	935	3,495
Total		1,904	\$ 1,209	\$ 3,985

As of September 30, 2006, the anticipated life insurance premiums required to keep the life settlement contracts in force, payable in the ensuing twelve months ending September 30, 2007, and the four succeeding years ending September 30, 2011 are \$84 million, \$88 million, \$93 million, \$94 million, and \$95 million, respectively.

On April 13, 2006, the FASB issued FSP FIN 46(R)-6, Determining the Variability to be Considered in Applying FASB Interpretation No. 46(R) (FIN 46(R)-6 or FSP). The FSP affects the identification of which entities are variable interest entities through a by design approach in identifying and measuring the variable interests of the variable interest entity and its primary beneficiary. The requirements became effective beginning in the third quarter of 2006 and are to be applied to all new variable interest entities with

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

8. Recent Accounting Standards *(continued)*

which AIG becomes involved. The new requirements need not be applied to entities that have previously been analyzed under FIN 46(R) unless a reconsideration event occurs. The adoption of this guidance did not have a material effect on AIG's consolidated financial condition or results of operations.

Future Application of Accounting Standards

On September 19, 2005, the FASB issued Statement of Position 05-1, *Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts* (SOP 05-1). SOP 05-1 provides guidance on accounting for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in FASB Statement No. 97, *Accounting and Reporting by Insurance Enterprises for Certain Long-Duration Contracts and for Realized Gains and Losses from the Sale of Investments*. The SOP defines an internal replacement as a modification in product benefits, features, rights, or coverage that occurs by the exchange of a contract for a new contract, or by amendment, endorsement, or rider to a contract, or by the election of a feature or coverage within a contract. The effective date of the implementation guidance is January 1, 2007. AIG is currently assessing the effect of implementing this guidance.

On July 13, 2006, the FASB issued FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of FASB Statement No. 109 (FIN 48), which clarifies the accounting for uncertainty in income tax positions. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of an income tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, and additional disclosures. The effective date of this implementation guidance is January 1, 2007, with the cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. AIG is currently assessing the effect of implementing this guidance.

On September 13, 2006, the SEC issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides interpretive guidance on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. SAB 108 requires registrants to quantify errors using both a balance sheet and an income statement approach and evaluate whether either approach results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 is effective for registrants financial statements for fiscal years ending on or after November 15, 2006, with early application encouraged. The adoption of SAB 108 is not expected to have a material effect on AIG's consolidated financial statements.

In September 2006, the FASB issued FAS No. 157, *Fair Value Measurements* (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. AIG is currently assessing the effect of implementing this guidance.

In September 2006, the FASB issued FAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R) (FAS No. 158). FAS No. 158 requires an employer to prospectively recognize the over funded or under funded status of a defined benefit postretirement plan as an asset or liability in its balance sheet and to recognize changes in that funded status in the year in which the changes occur through other comprehensive income. FAS No. 158 also requires an employer to measure the funded status of a plan as of the date of its year-end balance sheet, with limited exceptions. AIG is required to adopt this standard in its financial statements for the year ending December 31, 2006. The estimated cumulative effect, including deferred income taxes, on AIG's consolidated balance sheet at December 31, 2006 as a result of the adoption of this standard is a net reduction in shareholders' equity through a charge to Other comprehensive income of approximately \$720 million, with a corresponding net decrease of approximately \$350 million in total assets, and a net increase of approximately \$370 million in total liabilities. The actual effect of the adoption at December 31, 2006 may differ from the above estimates due to changes in assumptions such as the

discount rate, actuarial assumptions, the measurements of fair value of plan assets and the recognition of any additional minimum liabilities determined under the provisions of FAS 87 prior to the adoption of FAS 158. In addition, AIG is in the process of determining the realizability of additional deferred tax assets that would be generated by plans in foreign locations. Accordingly, the net after tax effect of the adoption of FAS 158 may change pending the outcome of this review during the fourth quarter.

10. Stock Compensation Plans

At September 30, 2006, AIG employees could be awarded compensation pursuant to six different stock-based compensation plan arrangements: (i) AIG 1999 Stock Option Plan, as amended (1999 Plan); (ii) AIG 1996 Employee Stock Purchase Plan, as amended (1996 Plan); (iii) AIG 2002 Stock Incentive Plan, as amended (2002 Plan) under which AIG has issued time-vested restricted stock units (RSUs) and performance restricted stock units (Performance RSUs); (iv) SICO's Deferred Compensation Profit Participation Plans (SICO Plans); (v) AIG's 2005-2006 Deferred Compensation Profit Participation Plan (AIG DCPPP) and (vi) the AIG Partners Plan. The AIG DCPPP was adopted as a replacement for the SICO Plans for the 2005-2006 period, and the AIG Partners Plan replaces the AIG DCPPP. Stock-based compensation earned under the AIG DCPPP and the AIG Partners Plan is issued as awards under the 2002 Plan. AIG currently settles share option exercises and other share awards to participants through the issuance of shares it has previously acquired and holds in its treasury account, except for share awards made by SICO, which are settled by SICO.

At September 30, 2006, AIG's non-employee directors received stock-based compensation in two forms, options granted pursuant to the 1999 Plan and grants of AIG common stock with delivery deferred until retirement from the Board, pursuant to the AIG Director Stock Plan, which was approved by the shareholders at the 2004 Annual Meeting of Shareholders.

From January 1, 2003 through December 31, 2005, AIG accounted for share-based payment transactions with employ-

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

10. Stock Compensation Plans *(continued)*

ees under FAS 123, Accounting for Stock-Based Compensation. Share-based employee compensation expense from option awards was not recognized in the statement of income in prior periods. Effective January 1, 2006, AIG adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123R Share-Based Payments (FAS 123R). FAS 123R requires that companies use a fair value method to value share-based payments and recognize the related compensation expense in net earnings. AIG adopted FAS 123R using the modified prospective application method, and accordingly, financial statement amounts for the prior periods presented have not been restated to reflect the fair value method of expensing share-based compensation under FAS 123R. The modified prospective application method provides for the recognition of the fair value with respect to share-based compensation for shares subscribed for or granted on or after January 1, 2006 and all previously granted but unvested awards as of January 1, 2006.

The adoption of FAS 123R resulted in share-based compensation expense of approximately \$14 million during the first nine months of 2006, related to awards which were accounted for under the provisions of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees. AIG expects this expense to approximate \$19 million for fiscal 2006. FAS 123R also requires AIG to estimate forfeitures in calculating the expense relating to share-based compensation, rather than recognizing these forfeitures and corresponding reductions in expense as they occur. The pre-tax cumulative effect of adoption, recognized as a reduction in stock-based compensation of \$46 million, was recorded as a cumulative effect of an accounting change, net of tax, in the first quarter of 2006. FAS 123R requires AIG to reflect the cash savings resulting from excess tax benefits in its financial statements as cash flow from financing activities, rather than as cash flow from operating activities as in prior periods. The amount of this excess tax benefit for the three and nine-month periods ended September 30, 2006 was \$3.9 million and \$6.2 million, respectively.

The effect of the adoption of FAS 123R on the consolidated statements of income and cash flows was as follows:

	Three Months Ended September 30, 2006			Nine Months Ended September 30, 2006		
	Pre-adoption of FAS 123R	Effect of Adoption of FAS 123R	Including Effect of Adoption of FAS 123R	Pre-adoption of FAS 123R	Effect of Adoption of FAS 123R	Including Effect of Adoption of FAS 123R

Basic earnings per share	\$ 1.62	\$	\$ 1.62	\$ 4.06	\$ 0.01	\$ 4.07
Diluted earnings per share	\$ 1.61	\$	\$ 1.61	\$ 4.03	\$ 0.01	\$ 4.04

The following table presents share-based compensation expenses, including the cumulative effect of adoption of FAS 123R, included in AIG's consolidated statement of income:

<i>(in millions)</i>	Three Months Ended September 30, 2006	Nine Months Ended September 30, 2006
Share-based compensation expense before tax	\$ 66	\$ 277
Income tax benefit	14	42
After-tax share-based compensation expense	\$ 52	\$ 235

Included in share-based compensation expense of \$277 million for the nine months ended September 30, 2006 was a one-time compensation cost of approximately \$54 million related to the Starr tender offer and various out of period adjustments totalling \$61 million, primarily relating to stock-splits and other miscellaneous items for the SICO plans, offset by a \$46 million pre-tax adjustment for the cumulative effect of the adoption of FAS 123R. These items were recorded in the first quarter of 2006. See Note 4 herein for a discussion of the Starr tender offer and Note 8 herein for discussion of the prospective change to the accounting for retiree eligibility provisions.

If AIG had adopted the FAS 123 provisions for recognizing compensation expense commencing at the date of grant of the awards, the effect would not have been material to net income or basic or diluted earnings per share for the three and nine-month periods ended September 30, 2005.

American International Group, Inc. and Subsidiaries

10. Stock Compensation Plans *(continued)****1999 Stock Option Plan***

The 1999 Plan provides that options to purchase a maximum of 45,000,000 shares of common stock can be granted to certain key employees and members of the Board of Directors at prices not less than fair market value at the date of grant.

The 1999 Plan was approved by the shareholders at the 2000 Annual Meeting of Shareholders, with certain amendments approved at the 2003 Annual Meeting of Shareholders. The 1999 Plan superseded the 1991 employee stock option plan (the 1991 Plan), although outstanding options granted under the 1991 Plan continue in force until exercise or expiration. The maximum number of shares that may be granted to any employee in any one year under the 1999 Plan is 900,000. Options granted under the 1999 Plan generally vest over four years (25 percent vesting per year) and expire 10 years from the date of grant.

At September 30, 2006, there were 20,997,720 shares reserved for future grants under the 1999 Plan and 27,787,332 shares reserved for issuance under the 1999 and 1991 Plans.

Deferrals

During 2005, options with respect to 1,731,471 shares were exercised with delivery deferred. At December 31, 2005 optionees had made valid elections to defer delivery of 2,067,643 shares of AIG common stock upon exercise of options expiring during 2006. Of these elections, 1,780,027 shares were exercised and deferred in the third quarter of 2006. In addition, non-employee directors of AIG had made valid elections to defer delivery of 21,093 shares of AIG common stock upon exercise of options expiring during 2006.

Valuation Methodology

In 2004, AIG developed a binomial lattice model to calculate the fair value of stock option grants. In prior years, a Black-Scholes model was used. A more detailed description of the valuation methodology is provided below. The following weighted average assumptions were used for stock options granted in the first nine months of 2006 and 2005:

	2006	2005
Expected annual dividend yield ^(a)	0.71%	0.36%
Expected volatility ^(b)	27.3%	34.4%
Risk-free interest rate ^(c)	4.17%	3.87%
Expected term ^(d)	7 years	7 years

(a) The dividend yield is based on the dividend yield over the twelve month period prior to the grant date.

(b) In 2006, expected volatility is the average of historical volatility (based on seven years of daily stock price changes) and the implied volatility of actively traded options on AIG shares and in 2005, expected volatility is the historical volatility based on five years of daily stock price changes.

(c) The interest rate curves used in the valuation model were the U.S. Treasury STRIP rates with terms from 3 months to 10 years.

(d) The contractual term of the option is generally 10 years with an expected term of 7 years calculated based on an analysis of historical employee exercise behavior and employee turnover (post-vesting terminations). The early exercise rate is a function of time elapsed since the grant. Fifteen years of historical data was used to estimate the early exercise rate.

Additional information with respect to AIG's stock option plans at September 30, 2006, and changes for the nine months then ended, were as follows:

Options:	Shares	Weighted Average Exercise Price
Outstanding at beginning of year	52,545,425	\$ 54.84
Granted	123,500	\$ 64.55
Exercised	(1,617,411)	\$ 34.02
Shares subject to deferred delivery	(1,780,027)	\$ 15.80
Forfeited or expired	(1,167,789)	\$ 69.77
Outstanding at end of period	48,103,698	\$ 56.65
Options exercisable at end of period	37,700,495	\$ 54.81
Weighted average fair value per share of options granted		\$ 21.11

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS** *(unaudited) (continued)*

Total	48,103,698	4.55	\$ 56.65	\$ 572	37,700,495	3.64	\$ 54.81	\$ 532

Vested and expected-to-vest options as of September 30, 2006, included in the table above, totaled 44,125,436, with a weighted average exercise price of \$56.01, a weighted average contractual life of 4.27 years and an aggregate intrinsic value of \$553 million.

As of September 30, 2006, total unrecognized compensation cost (net of expected forfeitures) was \$132 million and \$3 million related to non-vested share-based compensation awards granted under the 1999 Plan and the 1996 Plan, respectively, with blended weighted average periods of 1.32 years and 0.41 years, respectively. The cost of awards outstanding under these plans at September 30, 2006 is expected to be recognized over approximately three years and one year, respectively, for the 1999 Plan and the 1996 Plan.

The intrinsic value of options exercised during the nine months ended September 30, 2006 was approximately \$138 million. The fair value of options vesting for the nine months ended September 30, 2006 was approximately \$63 million. AIG received \$55 million and \$28 million for the nine-month periods ended September 30, 2006 and 2005, respectively, from the exercise of stock options. AIG did not cash-settle any share-based payment awards for the nine-month periods ended September 30, 2006 and 2005. The tax benefits realized as a result of stock option exercises were \$15 million for both the nine-month periods ended September 30, 2006 and 2005, respectively.

2002 Stock Incentive Plan

AIG's 2002 Plan was adopted at the 2002 shareholders meeting and amended and restated by the AIG Board of Directors on September 18, 2002 (the 2002 Plan). The 2002 Plan provides that equity-based or equity-related awards with respect to shares of common stock can be issued to employees in any year up to a maximum of that number of shares equal to (a) 1,000,000 shares plus (b) the number of shares available but not issued in the prior calendar year. The maximum award that a grantee may receive under the 2002 Plan per year is rights with respect to 250,000 shares. For the nine-month periods ended September 30, 2006 and 2005, 3,919,170 RSUs, including performance RSUs, and

1,133,405 RSUs, respectively, were granted by AIG. There were 6,316,623 shares reserved for issuance in connection with future awards at September 30, 2006. Substantially all RSUs granted to date under the 2002 Plan other than performance RSUs granted under the Partners Plan vest on the fourth anniversary of the date of grant.

Director Stock Awards

The methodology used for valuing employee stock options is also used to value director stock options. Director stock options vest one year after the grant date, but are otherwise the same as employee stock options. Options with respect to 40,000 shares and 32,500 shares were granted during the nine months ended September 30, 2006 and 2005, respectively.

AIG also granted 10,750 shares and 4,625 shares, with delivery deferred, to directors for the nine-month periods ended September 30, 2006 and 2005, respectively, under the Director Stock Plan. At September 30, 2006, there were 74,250 shares reserved for future grants under the Director Stock Plan.

Employee Stock Purchase Plan

AIG's 1996 Plan provides that eligible employees (those employed at least one year) may receive privileges to purchase up to an aggregate of 10,000,000 shares of AIG common stock, at a price equal to 85 percent of the fair market value on the date of the grant of the purchase privilege. Purchase privileges are granted quarterly and are limited to the number of whole shares that can be purchased on an annual basis by

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited) (continued)*

American International Group, Inc. and Subsidiaries

10. Stock Compensation Plans *(continued)*

an amount equal to the lesser of 10 percent of an employee's annual salary or \$10,000.

SICO Plans

The SICO Plans provide that shares of AIG common stock currently held by SICO are set aside for the benefit of the participant and distributed upon retirement. The SICO Board of Directors currently may permit an early payout of units under certain circumstances. Prior to payout, the participant is not entitled to vote, dispose of or receive dividends with respect to such shares, and shares are subject to forfeiture under certain conditions, including but not limited to the participant's termination of employment with AIG prior to normal retirement age.

Historically, SICO's Board of Directors could elect to pay a participant cash in lieu of shares of AIG common stock. On December 9, 2005, SICO notified participants that essentially all subsequent distributions would be made only in shares, and not cash. As of that date, AIG modified its accounting for the SICO Plans from variable to fixed measurement accounting. Variable measurement accounting is used for those few awards for which cash elections had been made prior to March 2005. The SICO Plans are also described in Note 4 herein.

Although none of the costs of the various benefits provided under the SICO Plans has been paid by AIG, AIG has recorded a charge to reported earnings for the deferred compensation amounts paid to AIG employees by SICO, with an offsetting amount credited to additional paid-in capital reflecting amounts deemed contributed by SICO.

As of December 9, 2005, there were 12,650,292 non-vested AIG shares under the SICO Plans with a weighted-average fair value per share of \$61.92. As of September 30, 2006, there were 11,656,065 non-vested AIG shares under the SICO Plans with a weighted-average fair value per share of \$61.90.

A significant portion of the awards under the SICO Plans vest upon retirement if the participant reaches age 65. The portion of the awards for which early payout is available vest on the applicable payout date.

AIG DCPPP

Effective September 21, 2005, AIG adopted the AIG DCPPP, which provides equity-based compensation to key AIG employees, including senior executive officers. The AIG DCPPP was modeled on the SICO Plans.

The AIG DCPPP contingently allocates a fixed number of shares to each participant if AIG's cumulative adjusted earnings per share for 2005 and 2006 exceed that for 2003 and 2004. The performance period is September 21, 2005 to December 31, 2006. At the end of the performance period, common shares are contingently allocated. The service period and related vesting consists of three pre-retirement tranches and a final retirement tranche at age 65.

At September 30, 2006, there were units representing 4,643,722 shares granted to participants.

AIG Partners Plan

On June 26, 2006, AIG's Compensation Committee approved two grants under the AIG Partners Plan. The first grant has a performance period which runs from January 1, 2006 through December 31, 2007. The second grant has a performance period which runs from January 1, 2007 through December 31, 2008. Both grants vest 50 percent on the fourth and sixth anniversaries of the first day of the related performance period. In addition, the Compensation Committee approved the performance metrics for the two grants prior to the date of grant. The measurement of the grants is deemed to have occurred on June 26, 2006 when there was mutual understanding of the key terms and conditions of the grants. Consistent with this treatment: a) 1,068,605 performance RSUs for the first grant and 2,488,865 performance RSUs for the second grant and b) unrecognized compensation of \$55 million for the first grant and \$138 million for the second grant are included in the related disclosure tables. Performance RSUs related to the first grant are excluded from AIG's diluted shares calculation because an insufficient amount of time has elapsed to conclusively determine that the performance metric will be achieved at the end of the related performance period. Because the performance period for the second grant does not begin until January 1, 2007, compensation expense for the second grant is not included in AIG's 2006 results and diluted shares calculation.

VALUATION

The fair value of each award granted under the 2002 Plan, the AIG DCPPP, the AIG Partners Plan, and the SICO Plans is based on the closing price of AIG stock on the date of grant.

10. Stock Compensation Plans *(continued)*

A summary of shares relating to outstanding awards unvested under the foregoing plans as of September 30, 2006, and changes during the nine months ended September 30, 2006 is presented below:

	Number of Shares					Weighted Average Grant-Date Fair Value				
	AIG		AIG Partners	Total	SICO	AIG		AIG Partners	Total	SICO
	2002 Plan	DCPPP	Plan	2002 Plan	Plans	2002 Plan	DCPPP	Plan	2002 Plan	Plans
Unvested at January 1, 2006	4,322,265	4,898,880		9,221,145	12,650,292	\$ 63.63	\$ 52.55	\$	\$ 57.74	\$ 61.92
Granted	315,170		3,604,000	3,919,170		62.11		56.42	56.88	
Vested	(5,080)			(5,080)	(653,486)	64.25			64.25	64.55
Forfeited	(187,680)	(255,158)	(16,200)	(459,038)	(340,741)	62.47	59.40	56.22	60.54	61.01
Unvested at September 30, 2006	4,444,675	4,643,722	3,587,800	12,676,197	11,656,065	\$ 63.57	\$ 52.17	\$ 56.42	\$ 57.37	\$ 61.90

At September 30, 2006, the total unrecognized compensation cost (net of expected forfeitures) related to non-vested share-based compensation awards granted under the 2002 Plan, the AIG DCPPP, the AIG Partners Plan and the SICO plans and the blended weighted-average period over which that cost is expected to be recognized is as follows:

	Unrecognized Compensation Cost <i>(in millions)</i>	Blended Weighted- Average Period
2002 Plan	\$ 178	1.62 years
AIG DCPPP	\$ 231	4.57 years
AIG Partners Plan	\$ 195	2.56 years
Total 2002 Plan	\$ 604	3.05 years
SICO Plans	\$ 313	6.06 years

The total cost for awards outstanding as of September 30, 2006 under the 2002 Plan, the AIG DCPPP, the AIG Partners Plan, and the SICO Plans is expected to be recognized over approximately 4 years, 12 years, 6 years and 23 years, respectively.

11. Cash Flows

As part of its remediation activities during the third quarter of 2006, AIG determined that certain non-cash activities and adjustments, including the effects of changes in foreign exchange translation on assets and liabilities, previously were misclassified within the operating, investing and financing sections of the Consolidated Statement of Cash Flows. The more significant line items revised include the change in General and life insurance reserves and Deferred policy acquisition costs within operating activities; Purchases of fixed maturity securities within investing activities; and Proceeds from notes, bonds, loans and mortgages payable, and hybrid financial instrument liabilities within financing activities. After evaluating the effect of these items during the third quarter of 2006, AIG has revised the previous periods presented below to conform to the third quarter 2006 presentation:

(in millions)

Cautionary Statement Regarding Projections and Other Information About Future Events

This Quarterly Report and other publicly available documents may include, and AIG's officers and representatives may from time to time make, projections concerning financial information and statements concerning future economic performance and events, plans and objectives relating to management, operations, products and services, and assumptions underlying these projections and statements. These projections and statements are not historical facts but instead represent only AIG's belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG's control. These projections and statements may address, among other things, the status and potential future outcome of the current regulatory and civil proceedings against AIG and their potential effect on AIG's businesses, financial position, results of operations, cash flows and liquidity, the effect of the credit rating downgrades on AIG's businesses and competitive position, the unwinding and resolving of various relationships between AIG and Starr and SICO, and AIG's strategy for growth, product development, market position, financial results and reserves. It is possible that AIG's actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in these projections and statements. Factors that could cause AIG's actual results to differ, possibly materially, from those in the specific projections and statements are discussed throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations and in Risk Factors in Item 1A. of Part I of AIG's 2005 Annual Report on Form 10-K, Item 1A. of Part II of AIG's Quarterly Report on Form 10-Q for the quarter ended March 31, 2006 and Item 1A. of Part II of this Quarterly Report. AIG is not under any obligation (and expressly disclaims any such obligations) to update or alter any projections or other statement, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

Table of Contents

American International Group, Inc. and Subsidiaries

Throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations, AIG presents its operations in the way it believes will be most meaningful. Statutory loss ratios and combined ratios are presented in accordance with accounting principles prescribed by insurance regulatory authorities because these are standard measures of performance filed with insurance regulatory authorities and used for analysis in the insurance industry and thus allow more meaningful comparisons with AIG's insurance competitors. AIG has also incorporated into this discussion a number of cross-references to additional information included throughout this Form 10-Q and its 2005 Annual Report on Form 10-K/A for the year ended December 31, 2005 (2005 Annual Report on Form 10-K/A) to assist readers seeking related information on a particular subject.

Overview of Operations and Business Results

AIG identifies its reportable segments by product line, consistent with its management structure. AIG's major product and service groupings are General Insurance, Life Insurance & Retirement Services, Financial Services and Asset Management. AIG's operations in 2006 are conducted by its subsidiaries principally through these segments. Through these segments, AIG provides insurance and investment products and services to both businesses and individuals in more than 130 countries and jurisdictions. This geographic, product and service diversification is one of AIG's major strengths and sets it apart from its competitors. The Other category consists of items not allocated to AIG's operating segments.

AIG's subsidiaries serve commercial, institutional and individual customers through an extensive property-casualty and life insurance and retirement services network. In the United States, AIG companies are the largest underwriters of commercial and industrial insurance and one of the largest life insurance and retirement services operations as well. AIG's Financial Services businesses include commercial aircraft and equipment leasing, capital markets operations and consumer finance, both in the United States and abroad. AIG also provides asset management services to institutions and individuals. As part of its spread-based business activities, AIG issues various debt instruments in the public and private markets.

AIG's operating performance reflects implementation of various long-term strategies and defined goals in its various operating segments. A primary goal of AIG in managing its General Insurance operations is to achieve an underwriting profit. To achieve this goal, AIG must be disciplined in its risk selection and premiums must be adequate and terms and conditions appropriate to cover the risk accepted. AIG also believes in strict control of expenses.

A central focus of AIG operations in recent years is the development and expansion of new distribution channels. In 2005 and the first nine months of 2006, AIG expanded its distribution channels, which now include banks, credit card companies and television-media home shopping in many Asian countries. Examples of new distribution channels used both domestically and overseas include banks, affinity groups, direct response and e-commerce.

AIG patiently builds relationships in markets around the world where it sees long-term growth opportunities. For example, the fact that AIG has the only wholly-owned foreign life insurance operations in eight cities in China is the result of relationships developed over nearly 30 years. AIG's more recent extensions of operations into India, Vietnam, Russia and other emerging markets reflect the same growth strategy. Moreover, AIG believes in investing in the economies and infrastructures of these countries and growing with them. When AIG companies enter a new jurisdiction, they typically offer both basic protection and savings products. As the economies evolve, AIG's products evolve with them, to more sophisticated and investment-oriented models.

Growth for AIG may be generated both internally and through acquisitions which both fulfill strategic goals and offer adequate return on capital. Recently AIG acquired Travel Guard International, one of the nation's leading providers of travel insurance programs and emergency travel assistance, and Central Insurance Co., Ltd., a leading general insurance company in Taiwan.

Consolidated Results

The following table summarizes AIG's revenues, income before income taxes, minority interest and cumulative effect of an accounting change and net income for the three and nine-month periods ended September 30, 2006 and 2005:

Three Months**Nine Months**

<i>(in millions)</i>	Ended September 30,		Ended September 30,	
	2006	2005	2006	2005
Total revenues	\$ 29,199	\$ 26,408	\$ 83,201	\$ 81,513
Income before income taxes, minority interest and cumulative effect of an accounting change	6,301	2,547	16,335	14,897
Net income	\$ 4,224	\$ 1,745	\$ 10,609	\$ 10,033

Revenues in the third quarter and first nine months of 2006 increased 11 percent and 2 percent, respectively, largely as a result of the growth in net premiums earned and net investment income from global General Insurance operations and growth in Life Insurance & Retirement Services net investment income and GAAP premiums. Revenues in the Financial Services segment increased in the third quarter of 2006, but decreased for the first nine months of 2006 largely

Table of Contents

American International Group, Inc. and Subsidiaries

as a result of hedging activities that do not qualify for hedge accounting treatment under FAS 133, the effects of which are reported in other income.

Income before income taxes, minority interest and cumulative effect of an accounting change in the three and nine-month periods ended September 30, 2006 increased 147 percent and 10 percent, respectively, with the significant increase primarily a reflection of the negative effect of \$2.44 billion in catastrophe related losses incurred in the third quarter of 2005. The 2006 periods also included higher General Insurance and Life Insurance & Retirement Services operating income. Fluctuations in Financial Services operating income in all periods presented were driven by the transaction oriented nature of Capital Markets operations and the effects of hedging activities that do not qualify for hedge accounting treatment under FAS 133.

During the third quarter and nine months ended September 30, 2006, as part of its continuing remediation efforts, AIG recorded certain out of period and other adjustments. These adjustments collectively increased net income by \$73 million in the third quarter of 2006 and decreased net income by \$29 million for the first nine months of 2006. The third quarter adjustments included the following: an increase in realized capital gains relating to foreign exchange of \$36 million (\$23 million after tax); increases in bad debt expense of \$225 million (\$146 million after tax) and earned premiums of \$99 million (\$65 million after tax), both of which relate to balance sheet reconciliations; an increase in partnership income of \$121 million (\$79 million after tax), which relates to improved valuation information; a further increase in unit investment trust income of \$116 million (\$75 million after tax), as described below; and an increase in income tax expense of \$39 million relating to AIG's ongoing remediation of internal controls over income tax accounting. See also the discussion of AIG's reportable segments in Management's Discussion & Analysis of Financial Condition and Results of Operations.

During the second quarter of 2006, AIG identified and recorded an out of period adjustment related to the accounting for certain interests in unit investment trusts in accordance with FIN 46(R), Consolidation of Variable Interest Entities and APB Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock. These investments had previously been accounted for as available for sale securities, with changes in market values being reflected in other comprehensive income, net of deferred income taxes. Beginning with the second quarter of 2006, the changes in market values are included in AIG's net investment income. During the second quarter of 2006, the adjustment decreased Unrealized appreciation (depreciation) of investments net of reclassification adjustments, and the related Deferred income tax benefit (expense), in the Consolidated Statement of Comprehensive Income (Loss) by approximately \$576 million and approximately \$202 million, respectively, and increased Net investment income by \$653 million, increased Incurred policy losses and benefits, related to certain participating policyholder funds, by \$77 million, and increased Income taxes by \$202 million in the Consolidated Statement of Income. There was no effect on Total shareholders' equity as of September 30, 2006 or December 31, 2005.

In the second quarter of 2006, AIG also recorded other out of period adjustments of \$85 million (\$55 million after tax) of interest income related to interest earned on deposit contracts and \$32 million (\$21 million after tax) of expenses related to the remediation of a material weakness in controls over certain balance sheet reconciliations.

AIG also recorded other out of period adjustments in the first quarter of 2006 of \$61 million (before and after tax) of expenses related to the SICO plans, \$59 million (\$38 million after tax) of expenses related to deferred advertising costs in General Insurance, a decrease of \$300 million (\$145 million after tax) in revenues related to the remediation of a material weakness in accounting for certain derivative transactions under FAS 133, and \$126 million of income tax expense related to AIG's remediation of a material weakness in controls over income tax accounting.

Results for the first nine months of 2006 were negatively affected by a one-time charge relating to the Starr tender offer (\$54 million before and after tax) and an additional allowance for losses in AIG Credit Card Company (Taiwan) (\$88 million before and after tax), both of which were recorded in first quarter of 2006.

The effective income tax rate increased from 28.0 percent for full year 2005 to 30.8 percent and 31.0 percent for the three and nine-month periods ended September 30, 2006, respectively, reflecting changes in the sources of foreign taxable income, the effect of the phase out of synfuel tax credits on the estimated full year tax rate and the aforementioned out of period adjustments.

Table of Contents

American International Group, Inc. and Subsidiaries

The following table summarizes the operations of each principal segment for the three and nine-month periods ended September 30, 2006 and 2005. (See also Note 2 of Notes to Consolidated Financial Statements).

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2006	2005	2006	2005
Revenues^(a):				
General Insurance ^{(b)(h)}	\$ 12,615	\$ 11,192	\$ 36,438	\$ 33,816
Life Insurance & Retirement Services ^{(c)(h)}	12,356	11,760	36,819	35,086
Financial Services ^(d)	3,187	1,926	6,028	8,140

Consolidated	\$ 6,301	\$ 2,547	\$ 16,335	\$ 14,897

(a) Includes the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses. For the three-month periods ended September 30, 2006 and 2005, the effect was \$165 million and \$(353) million, respectively, in revenues and \$165 million and \$(345) million, respectively, in operating income. For the nine-month periods ended September 30, 2006 and 2005, the effect was \$(1.13) billion and \$2.21 billion, respectively, in revenues and \$(1.13) billion and \$2.28 billion, respectively, in operating income. These amounts result primarily from interest rate and foreign currency derivatives which are hedging available for sale securities and borrowings.

(b) Represents the sum of General Insurance net premiums earned, net investment income and realized capital gains (losses).

(c) Represents the sum of Life Insurance & Retirement Services GAAP premiums, net investment income and realized capital gains (losses).

(d) Represents interest, lease and finance charges.

(e) Represents net investment income with respect to GICs and management and advisory fees.

(f) Represents income before income taxes, minority interest and cumulative effect of an accounting change.

(g) Results of operations of AIG Credit Card Company (Taiwan) are shared equally by the Life Insurance & Retirement Services segment and the Financial Services segment. Additional allowances of \$44 million were recorded in the first quarter of 2006, by each segment, for losses in these credit card operations.

(h) Includes the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts. For the three and nine-month periods ended September 30, 2006 the effect was an increase of \$92 million and \$524 million in both revenues and operating income for General Insurance and an increase of \$24 million in

both revenues and operating income for the three-month period ended September 30, 2006 and \$245 million and \$168 million in revenues and operating income, respectively, for the nine-month period ended September 30, 2006, for Life Insurance & Retirement Services.

(i) Includes current year catastrophe related losses of \$2.44 billion in both the third quarter and first nine months of 2005. There were no significant catastrophe related losses in the third quarter and first nine months of 2006.

(j) Includes additional losses incurred and net reinstatement premiums related to prior year catastrophes of \$28 million and \$39 million in the three-month periods ended September 30, 2006 and 2005, respectively. Such losses and premiums were \$87 million and \$252 million in the nine-month periods ended September 30, 2006 and 2005, respectively.

(k) Includes current year catastrophe related losses from unconsolidated subsidiaries of \$246 million for both the third quarter and first nine months of 2005. There were no significant catastrophe related losses in the third quarter and first nine months of 2006. Also includes unfavorable development from unconsolidated subsidiaries related to prior year catastrophe related losses of \$1 million and \$15 million for the first nine months of 2006 and 2005, respectively.

General Insurance

AIG's General Insurance operations provide property and casualty products and services throughout the world. The increase in General Insurance operating income in the three and nine-month periods ended September 30, 2006 compared to the same periods of 2005 was primarily attributable to catastrophe related losses of \$2.11 billion in the third quarter of 2005 and the improvement in underwriting results for the Domestic Brokerage Group (DBG). General Insurance operating income included adverse development in the first nine months of 2006 and 2005 from catastrophes in prior years and certain long-tail casualty lines, which were more than offset by favorable development in other lines. Operating income for the three and nine-month periods ended September 30, 2006 also increased due to the effect of the out of period adjustments related to the accounting for certain interests in unit investment trusts, partially offset by reconciliation adjustments.

Life Insurance & Retirement Services

AIG's Life Insurance & Retirement Services operations provide insurance, financial and investment products throughout the world. Foreign operations provided approximately 65 percent and 61 percent of AIG's Life Insurance & Retirement Services operating income for the three months ended September 30, 2006 and 2005, respectively, and 67 percent and 59 percent, respectively, for the first nine months of 2006 and 2005.

Life Insurance & Retirement Services operating income increased \$200 million in the third quarter of 2006 from the same period of 2005. Results for the quarter were particularly strong in the Foreign Life operations that were helped by

Table of Contents

American International Group, Inc. and Subsidiaries

higher investment returns and lower acquisition costs. Domestic Life and Retirement Services results improved over the prior year with growth in the in-force business and lower catastrophe and synfuel losses. Life Insurance & Retirement Services operating income included \$12 million in catastrophe related losses in the third quarter of 2005. Realized capital losses included in revenues and operating income were \$176 million in the third quarter of 2006 compared to realized capital losses of \$16 million in the same period of 2005.

Life Insurance & Retirement Services operating income increased by 9 percent in the first nine months of 2006 when compared to the same period of 2005 due, in part, to the effect of an out of period adjustment related to the accounting for certain interests in unit investment trusts. Realized capital losses included in revenues and operating income were \$117 million in the first nine months of 2006 compared to realized capital losses of \$18 million in the same period of 2005.

Financial Services

AIG's Financial Services subsidiaries engage in diversified activities including aircraft and equipment leasing, capital market transactions, consumer finance and insurance premium financing.

Financial Services operating income increased in the third quarter of 2006 and decreased in the first nine months of 2006 compared to the same periods of 2005 primarily due to the effects of hedging activities that do not qualify for hedge accounting treatment under FAS 133. Financial Services operating income in 2005 included catastrophe related losses of \$62 million recorded in the third quarter of 2005 resulting from hurricane Katrina, which were reduced by \$22 million in the third quarter of 2006. Fluctuations in revenues and operating income from quarter to quarter are not unusual because of the transaction-oriented nature of Capital Markets operations and the effect of not qualifying for hedge accounting treatment under FAS 133 for hedges on securities available for sale and borrowings.

Asset Management

AIG's Asset Management operations include institutional and retail asset management and broker dealer services and AIG's spread-based investment businesses. The AIG Matched Investment Program (MIP), which was launched in September of 2005, is replacing AIG's GIC program as AIG's principal spread-based investment activity.

Asset Management operating income decreased 40 percent for the third quarter of 2006 when compared to the same period of 2005 due to the continued run-off of GICs and decreased transaction-driven fees partially offset by growth in the asset management fees within Institutional Asset Management and income from AIG's MIP. Gains and losses arising from the consolidation of certain variable interest entities and partnerships are included in operating income, but are offset in minority interest expense, which is not a component of operating income. Operating income decreased 4 percent in the first nine months of 2006 when compared to the same period of 2005, primarily due to the continued run-off of GIC balances combined with spread compression in the remaining GIC portfolio.

Capital Resources

At September 30, 2006, AIG had total consolidated shareholders' equity of \$96.15 billion and total consolidated borrowings of \$137.1 billion. At that date, \$122.1 billion of such borrowings were either not guaranteed by AIG or were AIGFP's matched borrowings under obligations of guaranteed investment agreements (GIAs), liabilities connected to trust preferred stock, or matched notes and bonds payable.

AIG has not purchased any shares of its common stock under its existing common stock repurchase authorization during 2006.

Liquidity

At September 30, 2006, AIG's consolidated invested assets included \$24.14 billion in cash and short-term investments. Consolidated net cash provided from operating activities in the first nine months of 2006 amounted to \$6.0 billion. AIG believes that its liquid assets, cash provided by operations and access to the capital markets will enable it to meet its anticipated cash requirements.

Outlook

The commercial property and casualty insurance industry has historically experienced cycles of price erosion followed by rate strengthening as a result of catastrophe or other significant losses that affect the overall capacity of the industry to provide coverage. Despite industry price erosion in some classes of general insurance, AIG expects to continue to identify profitable opportunities and build attractive new general insurance businesses as a result of AIG's broad

product line and extensive distribution networks. There can be no assurance, however, that price erosion will not become more widespread or that AIG's profitability will not deteriorate from current levels in major commercial lines, as well as in personal lines and specialty coverages, such as mortgage guaranty, where the loss ratio is expected to increase due to softening in the U.S. housing market and the weakening performance of non-traditional mortgage products.

In December 2005, American International Underwriters Overseas, Ltd. (AIUO) received a license from the government of Vietnam to operate a wholly owned general insurance company in Vietnam. This license, the first general insurance license granted by Vietnam to a U.S.-based insurance organization, permits AIG to operate a general insurance company throughout Vietnam.

Table of Contents

American International Group, Inc. and Subsidiaries

During the second quarter of 2006, the Canadian Parliament passed legislation that will allow UGC to begin writing business in Canada, the world's second largest mortgage guaranty market, when provincial licenses are issued.

In China, applications for provincial expansion of AIG's life insurance operations in Guangdong and Jiangsu and of general insurance operations in Guangdong were approved in April 2006. AIG's wholly-owned life insurance operations in eight cities have now been structured into four regional management teams located in Shanghai, Beijing, Guangdong Province and Jiangsu Province. AIG's operations are expanding resources in these regions with the opening of additional offices.

In Japan, earnings growth for AIG Star Life Insurance Co., Ltd. and AIG Edison Life Insurance Company reflects the runoff of the more profitable in-force business in comparison to new business currently being generated. In May 2006, AIG announced the merger of these companies, which is expected to enhance the combined entity's ability to grow new business by expanding distribution and gaining efficiency of scale. In the fiscal year ended March 31, 2006, AIG's life operations in Japan retained their position as the largest foreign life operation on a total premium basis. AIG has developed a leadership position in the distribution of annuities through banks in both Japan and Korea. Also, American Life Insurance Company (ALICO) has launched new life products to the Japan bank market after further deregulation of banks in December 2005. AIG is a leader in direct marketing through sponsors and in the broad market in Japan and Korea. AIG also is investing in expanding distribution channels with emphasis in India, Korea and Vietnam.

Domestically, AIG anticipates its Life Insurance & Retirement Services businesses to continue growing in 2006 through distribution channel expansion and new and enhanced products. The home service operation, which is expected to be a slow growth business, has not met business objectives, although its cash flow has been strong. Domestic group life/health results continue to be weak, resulting in ongoing restructuring activities which may result in the exiting of certain product lines. AIG Retirement Services individual fixed annuities business will continue to be challenged due to the interest rate environment and increased competition from bank products, while variable annuity products with living benefits will continue to be the product of consumer choice.

Globally, heightened regulatory scrutiny of financial services companies in many jurisdictions has the potential to affect future financial results through higher compliance costs or other charges. This is particularly true in Japan and Southeast Asia where financial institutions have received an increased number of remediation orders affecting consumer/policyholder rights over the last twelve months.

Changes in market conditions in the aircraft leasing business are not immediately apparent in operating results. Lease rates have firmed as a result of continued demand from the global commercial aviation market, especially in Asia. However, higher interest rates are expected to continue to compress lease margins. AIG's Consumer Finance operations overseas were negatively affected in the first quarter of 2006 by industry-wide credit deterioration in the Taiwan credit card market. The operating results of AIG's Consumer Finance operations in the U.S. could be affected by the residential housing market, interest rates and unemployment. Also, AIG continues to explore opportunities to expand its Consumer Finance operations into new foreign markets.

The GIC portfolio continues to run-off. The MIP has replaced the GIC program as AIG's principal spread-based investment activity. Although the MIP is beginning to show positive operating income, because the asset mix under the MIP does not include the alternative investments utilized in the GIC program, AIG does not expect that the income growth in the MIP will offset the run-off in the GIC portfolio for the foreseeable future.

AIG has many promising growth initiatives underway around the world. Cooperative agreements such as those with PICC Property and Casualty Company Limited and various banks in the U.S., Japan and Korea are expected to expand distribution networks for AIG's products and provide models for future growth.

Critical Accounting Estimates

AIG considers its most critical accounting estimates those with respect to reserves for losses and loss expenses, future policy benefits for life and accident and health contracts, deferred policy acquisition costs, estimated gross profits for investment-oriented products, fair value determinations for certain Capital Markets assets and liabilities, other-than-temporary declines in the value of investments and flight equipment recoverability. These accounting estimates require the use of assumptions about matters, some of which are highly uncertain at the time of estimation.

To the extent actual experience differs from the assumptions used, AIG's results of operations would be directly affected.

Throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations, AIG's critical accounting estimates are discussed in detail. The major categories for which assumptions are developed and used to establish each critical accounting estimate are highlighted below.

Reserves for Losses and Loss Expenses and Reinsurance Recoverable (General Insurance):

Loss trend factors: used to establish expected loss ratios for subsequent accident years based on premium rate adequacy and the projected loss ratio with respect to prior accident years.

Expected loss ratios for the latest accident year: for example, accident year 2005 for the year end 2005 loss reserve analysis. For low frequency, high severity classes

Table of Contents

American International Group, Inc. and Subsidiaries

such as excess casualty, expected loss ratios generally are utilized for at least the three most recent accident years.

Loss development factors: used to project the reported losses for each accident year to an ultimate amount.

Reinsurance recoverable on unpaid losses: the expected recoveries from reinsurers on losses that have not yet been reported and/or settled.

Future Policy Benefits for Life and Accident and Health Contracts (Life Insurance & Retirement Services):

Interest rates: which vary by geographical region, year of issuance and products.

Mortality, morbidity and surrender rates: based upon actual experience by geographical region modified to allow for variation in policy form.

Estimated Gross Profits (Life Insurance & Retirement Services):

Estimated gross profits to be realized over the estimated duration of the contracts (investment-oriented products) affect the carrying value of deferred policy acquisition costs under FAS 97. Estimated gross profits include investment income and gains and losses on investments less required interest, actual mortality and other expenses.

Deferred Policy Acquisition Costs (Life Insurance & Retirement Services):

Recoverability based on current and future expected profitability, which is affected by interest rates, foreign exchange rates, mortality experience, and policy persistency.

Deferred Policy Acquisition Costs (General Insurance):

Recoverability and eligibility based upon the current terms and profitability of the underlying insurance contracts.

Fair Value Determinations of Certain Assets and Liabilities (Financial Services Capital Markets):

Valuation models: utilizing factors, such as market liquidity and current interest, foreign exchange and volatility rates.

AIG attempts to secure reliable and independent current market price data, such as published exchange rates from external subscription services such as Bloomberg or Reuters or third-party broker quotes for use in its model.

When such prices are not available, AIG uses an internal methodology, which includes interpolation and extrapolation from verifiable prices from trades occurring on dates nearest to the dates of the transactions.

Other-Than-Temporary Declines in the Value of Investments:

A security is considered a candidate for other-than-temporary impairment based upon the following criteria:

Trading at a significant (25 percent or more) discount to par or amortized cost (if lower) for an extended period of time (nine months or longer).

The occurrence of a discrete credit event resulting in the debtor defaulting or seeking bankruptcy or insolvency protection or voluntary reorganization.

The probability of non-realization of a full recovery on its investment, irrespective of the occurrence of one of the foregoing events.

At each balance sheet date, AIG evaluates its securities holdings in an unrealized loss position. Where AIG does not intend to hold such securities until they have fully recovered their carrying value, based on the circumstances present at the date of evaluation, AIG records the unrealized loss in income. If events or circumstances change, such as unexpected changes in creditworthiness of the obligor, general interest rate environment, tax circumstances, liquidity events, and statutory capital management considerations among others, AIG revisits its intent to determine if a loss should be recorded in income. Further, if a loss is recognized from a sale subsequent to a balance sheet date pursuant to these changes in circumstances, the loss is recognized in the period in which the intent to hold the securities to recovery no longer exists.

Flight Equipment Recoverability (Financial Services):

Expected undiscounted future net cash flows: based upon current lease rates, projected future lease rates and estimated terminal values of each aircraft based on third party information.

Operating Review

General Insurance Operations

AIG's General Insurance subsidiaries are multiple line companies writing substantially all lines of property and casualty insurance both domestically and abroad.

Domestic General Insurance operations are comprised of DBG, which includes the operations of The Hartford Steam Boiler Inspection and Insurance Company (HSB); Transatlantic Holdings, Inc. (Transatlantic); Personal Lines, including 21st Century Insurance Group (21st Century); and United Guaranty Corporation (UGC).

AIG's primary domestic division is DBG. DBG's business in the United States and Canada is conducted through its General Insurance subsidiaries including American Home Assurance Company (American Home), National Union Fire Insurance Company of Pittsburgh, Pa. (National Union), Lexington Insurance Company (Lexington) and certain other General Insurance company subsidiaries of AIG.

DBG writes substantially all classes of business insurance, accepting such business mainly from insurance brokers. This provides DBG the opportunity to select specialized markets and retain underwriting control. Any licensed broker is able to submit business to DBG without the traditional agent-company contractual relationship, but such broker usually has no authority to commit DBG to accept a risk.

In addition to writing substantially all classes of business insurance, including large commercial or industrial property insurance, excess liability, inland marine, environmental,

Table of Contents

American International Group, Inc. and Subsidiaries

workers compensation and excess and umbrella coverages, DBG offers many specialized forms of insurance such as aviation, accident and health, equipment breakdown, directors and officers liability (D&O), difference-in-conditions, kidnap-ransom, export credit and political risk, and various types of professional errors and omissions coverages. The AIG Risk Management operation provides insurance and risk management programs for large corporate customers. The AIG Risk Finance operation is a leading provider of customized structured insurance products. Also included in DBG are the operations of AIG Environmental, which focuses specifically on providing specialty products to clients with environmental exposures. Lexington writes surplus lines, those risks for which conventional insurance companies do not readily provide insurance coverage, either because of complexity or because the coverage does not lend itself to conventional contracts.

Certain of the products of the DBG companies include funding components or have been structured in a manner such that little or no insurance risk is actually transferred. Funds received in connection with these products are recorded as deposits, and are included in other liabilities, rather than as premium revenue. Amounts paid by AIG are recorded as reductions to the deposit liability rather than as incurred losses.

The AIG Worldsource Division introduces and coordinates AIG's products and services to U.S.-based multinational clients and foreign corporations doing business in the U.S.

Transatlantic subsidiaries offer reinsurance capacity on both a treaty and facultative basis both in the U.S. and abroad. Transatlantic structures programs for a full range of property and casualty products with an emphasis on specialty risk.

AIG's Personal Lines operations provide automobile insurance through AIG Direct, the mass marketing operation of AIG, Agency Auto Division and 21st Century, as well as a broad range of coverages for high net-worth individuals through the AIG Private Client Group.

The main business of the UGC subsidiaries is the issuance of residential mortgage guaranty insurance, both domestically and internationally, on conventional first lien mortgages for the purchase or refinance of one to four family residences. UGC subsidiaries also write second lien and private student loan guaranty insurance.

AIG's Foreign General Insurance group accepts risks primarily underwritten through American International Underwriters (AIU), a marketing unit consisting of wholly owned agencies and insurance companies. The Foreign General Insurance group also includes business written by AIG's foreign-based insurance subsidiaries. The Foreign General group uses various marketing methods and multiple distribution channels to write both commercial and consumer lines insurance with certain refinements for local laws, customs and needs. AIU operates in Asia, the Pacific Rim, the United Kingdom, Europe, Africa, the Middle East and Latin America.

As previously noted, AIG believes it should present and discuss its financial information in a manner most meaningful to its investors. Accordingly, in its General Insurance business, AIG uses certain regulatory measures, where AIG has determined these measurements to be useful and meaningful.

A critical discipline of a successful general insurance business is the objective to produce profit from underwriting activities exclusive of investment-related income. When underwriting is not profitable, premiums are inadequate to pay for insured losses and underwriting related expenses. In these situations, the addition of general insurance related investment income and realized capital gains may, however, enable a general insurance business to produce operating income. For these reasons, AIG views underwriting results to be critical in the overall evaluation of performance.

Statutory underwriting profit is derived by reducing net premiums earned by net losses and loss expenses incurred and net expenses incurred. Statutory accounting generally requires immediate expense recognition and ignores the matching of revenues and expenses as required by GAAP. That is, for statutory purposes, expenses are recognized immediately, not over the same period that the revenues are earned. Thus, statutory expenses exclude changes in deferred acquisition costs (DAC).

GAAP provides for the recognition of expenses at the same time revenues are earned, the accounting principle of matching. Therefore, acquisition expenses are deferred and amortized over the period the related net premiums written are earned. DAC is reviewed for recoverability, and such review requires management judgment. (See also Critical Accounting Estimates herein.)

AIG, along with most General Insurance companies, uses the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. The loss ratio is the sum of losses and loss expenses incurred divided by net premiums earned. The expense ratio is statutory underwriting expenses divided by net premiums written. The combined ratio is the sum of the loss ratio and the expense ratio. These ratios are relative measurements that describe, for every \$100 of net premiums earned or written, the cost of losses and statutory expenses, respectively. The combined ratio presents the total cost per \$100 of premium production. A combined ratio below 100 demonstrates underwriting profit; a combined ratio above 100 demonstrates underwriting loss.

Net premiums written are initially deferred and earned based upon the terms of the underlying policies. The net unearned premium reserve constitutes deferred revenues which are generally earned ratably over the policy period. Thus, the net unearned premium reserve is not fully recognized in income as net premiums earned until the end of the policy period.

The underwriting environment varies from country to country, as does the degree of litigation activity. Regulation, product type and competition have a direct effect on pricing and consequently on profitability as reflected in underwriting profit and statutory general insurance ratios.

Table of Contents

American International Group, Inc. and Subsidiaries

General Insurance operating income is comprised of statutory underwriting results, changes in DAC, net investment income and realized capital gains and losses. Operating income, as well as net premiums written, net premiums earned, net investment income and realized capital gains (losses) and statutory ratios for the three and nine-month periods ended September 30, 2006 and 2005 were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,

- (a) Income statement accounts expressed in non-functional currencies are translated into U.S. dollars using average exchange rates.
- (b) Includes the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts. For DBG, for the three and nine-month periods ended September 30, 2006 the effect was an increase of \$70 million and \$90 million, respectively, and for Foreign General, for the three and nine-month periods ended September 30, 2006, the effect was an increase of \$22 million and \$434 million, respectively.
- (c) Includes current year catastrophe related losses of \$2.11 billion for both the three and nine-month periods ended September 30, 2005. There were no significant catastrophe related losses in the third quarter and first nine months of 2006.
- (d) Includes additional losses incurred and net reinstatement premiums related to prior year catastrophes of \$50 million and \$39 million, in the three-month periods ended September 30, 2006 and 2005, respectively. Such losses and premiums were \$108 million and \$237 million in the nine-month periods ended September 30, 2006 and 2005, respectively.
- (e) Includes the results of wholly owned Foreign General agencies.
- (f) Includes amortization of advertising costs.
- (g) Statutory underwriting profit (loss) is a measure that U.S. domiciled insurance companies are required to report to their regulatory authorities. The following table reconciles statutory underwriting profit (loss) to income before income taxes, minority interest and cumulative effect of an accounting change for the General Insurance segment for the three and nine-month periods ended September 30, 2006 and 2005.

AIG transacts business in most major foreign currencies. The following table summarizes the effect of changes in foreign currency exchange rates on the growth of General Insurance net premiums written for the three and nine-month periods ended September 30, 2006:

	Three Months Ended September 30, 2006	Nine Months Ended September 30, 2006
Growth in original currency	8.5%	8.1%
Foreign exchange effect	0.3	(0.6)
Growth as reported in U.S. dollars	8.8%	7.5%

General Insurance Results

General Insurance operating income increased in the third quarter of 2006 compared to the same period in 2005 due primarily to the effects of the catastrophes in the third quarter of 2005. Other factors contributing to the increase were an improvement in statutory underwriting profit for DBG as a result of improved loss ratios for the current accident year compared to the loss ratios recorded in the third quarter of 2005 for accident year 2005, as well as growth in net investment income. The combined ratio improved to 89.1 during the third quarter of 2006, a reduction of 23.0 points from the same period in 2005, primarily due to an improvement in the loss ratio of 25.9 points. The reduction in catastrophe losses represented 20.0 points of the overall decrease. Net premiums written increased 9 percent in the third quarter of 2006 compared to the same period in 2005 as domestic property rates improved, submission activity increased in both property and non-property lines in the aftermath of the 2005 hurricanes and distribution channels

within Foreign General expanded. Net premiums written for the third quarter of 2005 included a reduction of \$258 million for reinstatement premiums related to catastrophes, accounting for approximately 3 percentage points of the 2006 increase in net premiums written compared to the third quarter of 2005. The increase in net premiums written was tempered by an increase in ceded reinsurance necessary to manage the increase in property exposures retained by AIG.

In the third quarter of 2006, certain adjustments were made in conjunction with the remediation of balance sheet account reconciliations which increased earned premiums by \$99 million and increased bad debt expense by \$225 million. These adjustments reflect continuing progress in AIG's ongoing remediation efforts. The combined effect of these adjustments increased the expense ratio by 2.0 points and decreased the loss ratio by 0.6 points. Included in net investment income for the three and nine-month periods ended September 30, 2006 are \$213 million and \$645 million of out of period adjustments related to the accounting for certain investments in unit investment trusts and additional partnership income arising from improved valuations.

General Insurance operating income increased in the first nine months of 2006 compared to the same period of 2005 due to the reduction in catastrophe losses combined with the improvement in statutory underwriting profit for DBG as a result of improved loss ratios for the current accident year compared to the loss ratios recorded in the first nine months of 2005 for accident year 2005, as well as growth in net investment income. The combined ratio improved to 88.2, a reduction of 10.9 points from the first nine months of 2005, primarily due to an improvement in the loss ratio of 12.4 points. The reduction in catastrophe losses represented 6.7 points of the overall reduction. Net premiums written increased 7 percent as domestic property rates improved, submission activity increased in the aftermath of the 2005 hurricanes and the distribution channels within Foreign General expanded. Net premiums written for the first nine months of 2005 included a reduction of \$258 million for reinstatement premiums related to catastrophes, accounting for approximately 1 percentage point of the 2006 increase in net premiums written compared to the first nine months of 2005.

Quarterly DBG Results

Operating income increased to \$1.56 billion in the third quarter of 2006 compared to a loss of \$283 million in the same period in 2005, an improvement of \$1.84 billion.

The improvement is also reflected in the combined ratio, which declined to 90.0 in the third quarter of 2006 compared to 118.2 in the same period in 2005. The third quarter of

Table of Contents

American International Group, Inc. and Subsidiaries

2005 included \$1.37 billion of losses and net reinstatement premiums for major catastrophes, which increased the 2005 combined ratio by 24.3 points.

DBG's net premiums written increased 10 percent in the third quarter of 2006 compared to the same period in 2005 as property rates improved and submission activity increased in the aftermath of the 2005 hurricanes. DBG attributes the increase in submissions to its strong distribution channels and overall financial strength in comparison to many insurers that experienced significant losses and reductions of surplus as a result of the hurricanes. Net premiums written for the third quarter of 2005 were reduced by \$122 million due to reinstatement premiums related to catastrophes; net premiums written for the third quarter of 2006 were increased by \$47 million due to the reversal of a reinsurance contract previously accounted for as reinsurance and now accounted for as a deposit, the overall effect of which was largely offset in losses and underwriting expenses. The combined effect of these two items contributed approximately 3 percentage points to the increase in net premiums written.

The loss ratio for the third quarter of 2006 declined to 66.9 compared to 99.4 for the same period in 2005, primarily due to the effects of the catastrophes in the third quarter of 2005. Lines of business that were not directly affected by the 2005 major catastrophes also improved primarily due to lower accident year loss ratios for the 2006 accident year compared to the loss ratios recorded in the third quarter of 2005 for accident year 2005. The improvement in accident year loss ratios for the third quarter of 2006 was partially offset by an increase of \$21 million in the estimated ultimate losses related to prior year hurricanes compared to the same period of 2005 which included an increase of \$39 million in losses related to prior year hurricanes. Reserve development on non-catastrophic prior year losses increased incurred losses by \$40 million for the third quarter of 2006 compared to an increase of \$190 million for the same period of 2005.

DBG's expense ratio increased in the third quarter of 2006 to 23.1 compared to 18.8 in the same period of 2005. Net acquisition expenses as a percent of net premiums written increased by 0.5 in the third quarter of 2006 compared to the same period in 2005 due to an increase in premium assessments, partially offset by ceding commissions on quota share reinsurance programs added in 2006 to manage the level of property exposures retained by DBG. Other operating expense as a percent of net premiums written increased by 3.9 points primarily due to an increase in bad debt expense, due largely to a charge of \$225 million relating to reconciliation remediation activities. Adjustments from AIG's ongoing remediation activities described above also resulted in increases of \$155 million and \$191 million to earned premiums and net investment income, respectively, for a net increase in operating income of \$121 million in the third quarter of 2006. Incurred losses did not change as a result of the above increase to earned premiums because the adjustment was isolated to the reconciliation of unearned premium balances.

The combined effect of the out of period and other adjustments in the third quarter of 2006 was a decrease in the DBG loss ratio of 1.7 points and an increase in the expense ratio of 3.7 points.

Year-to-date DBG Results

Operating income increased to \$4.45 billion in the first nine months of 2006 compared to \$1.24 billion in the same period in 2005, an improvement of \$3.21 billion.

The improvement is also reflected in the combined ratio, which declined to 88.7 in the first nine months of 2006 compared to 104.2 in the same period in 2005. The first nine months of 2005 included \$1.37 billion of losses and net reinstatement premiums for major catastrophes, which increased the 2005 combined ratio by 8.1 points.

DBG's net premiums written increased 8 percent in the first nine months of 2006 compared to the same period of 2005 due to property rate increases as well as increases in submission activity in the aftermath of the 2005 hurricanes. Net premiums written for the first nine months of 2005 were reduced by \$122 million due to reinstatement premiums related to catastrophes; net premiums written for the first nine months of 2006 were increased by \$47 million due to the reversal of a reinsurance contract previously accounted for as reinsurance and now accounted for as a deposit, the overall effect of which was largely offset in losses and underwriting expenses. The combined effect of these two items contributed approximately 1 percentage point to the increase in net premiums written.

The loss ratio for the first nine months of 2006 declined to 69.0 compared to 85.7 for the same period in 2005, primarily due to the effects of the catastrophes in the first nine months of 2005. Lines of business that were not directly affected by the 2005 major catastrophes also improved, primarily due to lower accident year loss ratios for the

2006 accident year compared to the loss ratios recorded in the third quarter of 2005 for accident year 2005. In addition, year-to-date 2006 operating income included a \$4 million reduction in the estimated ultimate losses related to prior year hurricanes compared to the same period of 2005, which included \$157 million of increased losses related to prior year hurricanes. Favorable reserve development on non-catastrophic prior year losses totaled \$25 million for the first nine months of 2006 compared to adverse development of \$410 million for the same period of 2005. The 2006 development relates primarily to classes of business which did not require reserve strengthening in connection with AIG's year-end 2005 reserve study.

DBG's expense ratio increased to 19.8 percent in the first nine months of 2006 compared to 18.4 percent for the same period.

Table of Contents

American International Group, Inc. and Subsidiaries

riod in 2005. Net acquisition expenses as a percent of net premiums written declined 0.5 points in the first nine months of 2006 compared to the same period in 2005 despite the increase in premium assessments in the third quarter of 2006, reflecting an increase in lines of business such as property that have a lower commission rate, a modest decrease in overall commission rates and the new quota share reinsurance programs added in 2006 to manage the level of property exposures retained by DBG. Other operating expenses as a percent of net premiums written increased 1.3 points primarily due to an increase in bad debt expense, due largely to a charge of \$225 million relating to reconciliation remediation activities.

Quarterly Transatlantic Results

Transatlantic's net premiums written and net premiums earned in the third quarter of 2006 increased by 4 percent and 6 percent, respectively, when compared to the same period in 2005 primarily due to increases in domestic other liability, medical malpractice and accident and health net premiums written. These increases were partially offset by decreases in domestic property, principally homeowners, and international medical malpractice premiums. Third quarter 2006 operating income increased due largely to lower catastrophe losses and net ceded reinstatement premiums and increased net investment income.

Year-to-date Transatlantic Results

Transatlantic's net premiums written and net premiums earned increased in the first nine months of 2006 by 4 percent and 5 percent, respectively, compared to the same period of 2005 due primarily to increases in domestic other liability, medical malpractice and accident and health net premiums written. These increases were offset, in part, by decreases in international premiums with the most significant decreases in the auto liability and property lines. Operating income increased in the first nine months of 2006 compared to the same period of 2005 due to lower catastrophe losses and net ceded reinstatement premiums, and increased net investment income.

Quarterly Personal Lines Results

Personal Lines net premiums written and net premiums earned decreased slightly in the third quarter of 2006 compared to the same period in 2005, as growth in the Private Client Group was offset by the run-off of the involuntary auto business and declines in the AIG Direct, Agency Auto and 21st Century divisions. Growth in the Private Client Group spans multiple products, with continued penetration into the high net worth market and strong brand and innovative loss prevention programs. The soft auto market, with flat to declining rates, is adversely affecting growth in the direct business of AIG Direct and 21st Century. 21st Century is experiencing solid performance outside of California, however, it is not outpacing the decline in California. Agency Auto growth is down due to pricing and underwriting pressure in certain markets. Operating income in the third quarter of 2006 increased from the same period in 2005 driven by an improved loss ratio. Operating income in 2005 included \$62 million of hurricane Katrina losses and related reinstatement premiums whereas operating income in 2006 is benefiting from favorable development of prior period reserves.

Year-to-date Personal Lines Results

Personal Lines net premiums written decreased slightly in the first nine months of 2006 compared to the same period in 2005, with growth in the Private Client Group and Agency Auto divisions being offset by the run-off of the involuntary auto business and small declines in the AIG Direct and 21st Century divisions. Operating income increased for the first nine months of 2006 compared to the same period of 2005, driven primarily by a lower loss ratio. Operating income in 2005 included \$62 million of hurricane Katrina losses and related reinstatement premiums whereas operating income in 2006 is benefiting from an absence of catastrophes and favorable prior year reserve development. The expense ratio has increased in 2006, compared to the year ago period, primarily due to investments in people and technology, national expansion efforts and lower response rates.

Quarterly UGC Results

Mortgage Guaranty net premiums written were up 56 percent for the third quarter of 2006 compared to the same period in 2005. All business segments contributed to the increase. Operating income for the three months ended September 30, 2005 was negatively affected by \$29 million of ceded premiums for the domestic first lien business. Incurred losses were up compared to the third quarter of 2005 due to aging of the first lien portfolio and a slowing domestic housing market. Additionally, early loss development of alternative risk products and growth in insurance

in force in 2006 drove the increases in domestic second lien losses. Operating income for the third quarter of 2006 was up 18 percent compared to the prior period, with improvements in all business units.

Year-to-date UGC Results

Mortgage Guaranty net premiums written were up 36 percent for the first nine months of 2006 compared to the same period in 2005. All business units contributed to the increase. Operating income for the first nine months of 2005 was negatively affected by \$29 million of ceded premiums for domestic first lien business. Incurred losses increased from the same period in 2005, due to aging of the first lien portfolio, a slowing domestic housing market, early loss development of alternative risk second lien product and growth in the domestic second lien insurance in force. Operating income for the first nine months of 2006 increased by 6 percent over the prior year period.

American International Group, Inc. and Subsidiaries

Quarterly Foreign General Insurance Results

Foreign General Insurance net premiums written increased 10 percent (9 percent in original currency) in the third quarter of 2006 when compared to the same period in 2005. This increase is due to growth in both the commercial and consumer lines driven by new business, new distribution channels, including the acquisition of Central Insurance Co., Ltd. in Taiwan, and higher premiums for the Ascot Lloyd's syndicate. Lower reinstatement premium costs, which in 2005 were unusually high due to hurricanes Katrina and Rita, contributed two percent to the increase in net premiums written. The personal accident business net premiums written increased in the third quarter of 2006 from a year ago, but an increase in loss frequency negatively affected operating income. The commercial lines net premiums written in Europe, the Far East and the United Kingdom increased from a year ago due to new business with a resulting increase in operating income compared to the third quarter of 2005. Operating income from energy lines, primarily in the United Kingdom, and the Ascot Lloyd's syndicate both increased compared to the third quarter of 2005 due to increased net premiums written in 2006 and losses incurred in the third quarter of 2005 relating to catastrophe events. The combined ratio for Foreign General Insurance for the third quarter of 2006 was 83.7, an improvement of 8.5 points from 92.2 in the comparable period of 2005. The Foreign General Insurance loss ratio decreased 11.4 points in the third quarter of 2006 compared to the same period of 2005. The results of 2006 benefited from lower current accident year losses and favorable loss development from prior accident years, excluding catastrophes, of \$105 million, offset by \$21 million of adverse loss development on the 2005 hurricanes and by \$22 million of losses related to a typhoon in Japan during the third quarter of 2006. The results for 2005 included several catastrophic events, principally hurricanes Katrina and Rita. The Foreign General Insurance expense ratio increased 2.9 points in the third quarter of 2006 from the same period in 2005, principally due to higher commission costs, the increased significance of consumer lines of business, which have higher acquisition costs, accelerated amortization of advertising costs and premium reductions of \$56 million relating to reconciliation remediation activities. Due to the current mix of business, AIG expects commission costs to continue to increase over the next quarter, principally for classes of business with historically lower than average loss ratios.

Year-to-date Foreign General Insurance Results

Foreign General Insurance net premiums written increased 9 percent (12 percent in original currency) in the first nine months of 2006 compared to the same period in 2005, reflecting growth in both the commercial and consumer lines. The personal accident business in the Far East region, the commercial lines business in both Europe and the United Kingdom, and the Ascot Lloyd's syndicate all contributed to the growth in net premiums written. Operating income showed corresponding increases over the prior year, which included significant losses related to hurricanes Katrina and Rita.

The combined ratio for Foreign General Insurance for the first nine months of 2006 was 82.4, an improvement of 2.8 points from 2005. The Foreign General Insurance loss ratio decreased 5.3 points in the first nine months of 2006 from the same period of 2005 due to lower current accident year losses, favorable loss development from prior accident years and fewer catastrophes. The Foreign General Insurance expense ratio increased 2.5 points in the first nine months of 2006 from the same period in 2005 principally due to higher commission costs, the increased significance of consumer lines of business, which have higher acquisition costs and accelerated amortization of advertising costs.

Quarterly General Insurance Net Investment Income

General Insurance net investment income increased by \$383 million in the third quarter of 2006, when compared to the same period of 2005 due to strong cash flows, including the effect of capital contributions from the parent, higher partnership income for DBG and the out of period adjustments relating to unit investment trust and partnership investments. Foreign General net investment income for the third quarter increased compared to the same period in 2005 due to strong cash flows, resulting from higher premium collections and reinsurance loss recoveries, as well as higher interest rates.

Year-to-date General Insurance Net Investment Income

General Insurance net investment income increased by \$1.04 billion in the first nine months of 2006, when compared to the same period of 2005. The increase for the nine month period is principally due to the effects of out of period

adjustments of \$524 million related to the accounting for certain interests in unit investment trusts, \$121 million of out of period adjustments for partnership income and a second quarter 2006 \$85 million out of period adjustment related to interest earned on a DBG deposit contract. Foreign General Insurance net investment income increased in the nine-month period ended September 30, 2006 compared to the same period of 2005 due to the effects of the out of period adjustments, offset by a decline in partnership income. Foreign General partnership income in the first nine months of 2005 benefited from increases in market valuations due to increased initial public offering activity.

Realized capital gains and losses resulted from the ongoing investment management of the General Insurance portfolios within the overall objectives of the General Insurance operations. See the discussion on Valuation of Invested Assets herein.

Reinsurance

AIG is a major purchaser of reinsurance for its General Insurance operations. AIG insures risks globally, and its reinsurance programs must be coordinated in order to provide AIG the level of reinsurance protection that AIG desires. Reinsurance is an important risk management tool to manage transaction and insurance line risk retention at prudent levels set by management. AIG also purchases reinsurance to mitigate its catastrophic exposure. AIG is cognizant of the need to exercise good judgment in the selection and approval of both domestic and foreign companies participating in its reinsurance programs because one or more catastrophe losses could negatively affect AIG's reinsurers and result in an inability of AIG to collect reinsurance recoverables. AIG's reinsurance department evaluates catastrophic events and assesses the probability of occurrence and magnitude of catastrophic events through the use of state-of-the-art industry recognized program models, among other techniques. AIG supplements these models through continually monitoring the risk exposure of AIG's worldwide General Insurance operations and adjusting such models accordingly. For a further discussion of catastrophe exposures, see *Managing Risk Catastrophe Exposures*. Although reinsurance arrangements do not relieve AIG from its direct obligations to its insureds, an efficient and effective reinsurance program substantially limits AIG's exposure to potentially significant losses. With respect to its property business, AIG has either renewed existing reinsurance coverage or purchased new coverage that, in the opinion of management, is adequate to limit AIG's exposures. AIG continually evaluates the reinsurance markets and the relative attractiveness of various arrangements for coverage, including structures such as catastrophe bonds, insurance risk securitizations and sidecar and similar vehicles. Effective July 15, 2006, AIG's Lexington Insurance Company (Lexington) and Concord Re Limited (Concord Re), a sidecar reinsurer that was established exclusively to reinsure Lexington, entered into a quota share reinsurance agreement covering the U.S. commercial property insurance business written by Lexington. Concord Re was capitalized with approximately \$730 million through the issuance of equity securities and loans from third party investors. AIG and its subsidiaries invest in a wide variety of investment vehicles managed by third parties where AIG has no control over investment decisions. Accordingly, there can be no assurance that such vehicles do not, or will not, hold securities of Concord Re.

AIG's consolidated general reinsurance assets amounted to \$22.99 billion at September 30, 2006 and resulted from AIG's reinsurance arrangements. Thus, a credit exposure existed at September 30, 2006 with respect to reinsurance recoverable to the extent that any reinsurer may not be able to reimburse AIG under the terms of these reinsurance arrangements. AIG manages its credit risk in its reinsurance relationships by transacting with reinsurers that it considers financially sound, and when necessary AIG holds substantial collateral in the form of funds, securities and/or irrevocable letters of credit. This collateral can be drawn on for amounts that remain unpaid beyond specified time periods on an individual reinsurer basis. At December 31, 2005, approximately 48 percent of the general reinsurance assets were from unauthorized reinsurers. Many of these balances were collateralized, permitting statutory recognition. Additionally, with the approval of its domiciliary insurance regulators, AIG posted approximately \$1.5 billion of letters of credit issued by several commercial banks in favor of certain Domestic General Insurance companies to permit those companies statutory recognition of balances otherwise uncollateralized at December 31, 2005. The remaining 52 percent of the general reinsurance assets were from authorized reinsurers. The terms authorized and unauthorized pertain to regulatory categories, not creditworthiness. At December 31, 2005, approximately 88 percent of the balances with respect to authorized reinsurers are from reinsurers rated A (excellent) or better, as rated by A.M. Best, or A (strong) or better, as rated by Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). These ratings are measures of financial strength. Through September 30, 2006, there has been no significant deterioration in the rating profile of AIG's reinsurers representing more than five percent of AIG's reinsurance assets as of December 31, 2005.

AIG maintains an allowance for estimated unrecoverable reinsurance. Although AIG has been largely successful in its previous recovery efforts, at September 30, 2006, AIG had an allowance for unrecoverable reinsurance approximating \$447 million. The allowance was reduced substantially during 2006, as uncollectible amounts due from individual reinsurers were charged off against the allowance, primarily due to the balance sheet reconciliation remediation process; in addition, a portion of the allowance was reclassified to align it with the related receivable. The reduction for charge offs was partially offset by additional provisions totaling \$92 million during the nine months

ended September 30, 2006. At September 30, 2006, AIG had no significant reinsurance recoverables due from any individual reinsurer that was financially troubled (e.g., liquidated, insolvent, in receivership or otherwise subject to formal or informal regulatory restriction).

AIG's Reinsurance Security Department conducts ongoing detailed assessments of the reinsurance markets and current and potential reinsurers, both foreign and domestic. Such assessments include, but are not limited to, identifying if a reinsurer is appropriately licensed and has sufficient financial capacity, and evaluating the local economic environment in which a foreign reinsurer operates. This department also reviews the nature of the risks ceded and the requirements for credit risk mitigants. For example, in AIG's treaty reinsurance contracts, AIG includes provisions that frequently require a reinsurer to post collateral when a referenced event occurs.

Table of Contents

American International Group, Inc. and Subsidiaries

Furthermore, AIG limits its unsecured exposure to reinsurers through the use of credit triggers, which include, but are not limited to, insurer financial strength rating downgrades, policyholder surplus declines at or below a certain predetermined level or a certain predetermined level of a reinsurance recoverable being reached. In addition, AIG's Credit Risk Committee reviews the credit limits for and concentrations with any one reinsurer.

AIG enters into intercompany reinsurance transactions, primarily through American International Reinsurance Company, Ltd. (AIRCO), for its General Insurance and Life Insurance operations. AIG enters into these transactions as a sound and prudent business practice in order to maintain underwriting control and spread insurance risk among AIG's various legal entities. All material intercompany transactions have been eliminated in consolidation. AIG generally obtains letters of credit in order to obtain statutory recognition of these intercompany reinsurance transactions. At September 30, 2006, approximately \$3.7 billion of letters of credit were outstanding to cover intercompany reinsurance transactions with AIRCO or other General Insurance subsidiaries.

At September 30, 2006, consolidated general reinsurance assets of \$22.99 billion include reinsurance recoverables for paid losses and loss expenses of \$1.58 billion and \$18.35 billion with respect to the ceded reserve for losses and loss expenses, including ceded losses incurred but not reported (IBNR) (ceded reserves) and \$3.07 billion of ceded reserve for unearned premiums. The ceded reserve for losses and loss expenses represent the accumulation of estimates of ultimate ceded losses including provisions for ceded IBNR and loss expenses. The methods used to determine such estimates and to establish the resulting ceded reserves involve significant judgment in projecting the frequency and severity of losses over multiple years and are continually reviewed and updated by management. Any adjustments thereto are reflected in income currently. It is AIG's belief that the ceded reserves for losses and loss expenses at September 30, 2006 were representative of the ultimate losses recoverable. In the future, as the ceded reserves continue to develop to ultimate amounts, the ultimate loss recoverable may be greater or less than the reserves currently ceded.

Reserve for Losses and Loss Expenses

The table below classifies as of September 30, 2006 and December 31, 2005 the components of the General Insurance gross reserve for losses and loss expenses (loss reserves) by major lines of business on a statutory Annual Statement basis*:

<i>(in millions)</i>	September 30, 2006	December 31, 2005
Other liability occurrence	\$ 18,879	\$ 18,116
Other liability claims made	12,768	12,447
Workers compensation	12,751	11,630
Property	6,634	7,217
Auto liability	6,351	6,569
International	5,376	4,939
Reinsurance	3,419	2,886
Medical malpractice	2,200	2,363
Products liability	1,988	1,937
Accident and health	1,727	1,678
Aircraft	1,642	1,844
Commercial multiple peril	1,449	1,359
Fidelity/ surety	1,015	1,072
Other	3,664	3,112
Total	\$ 79,863	\$ 77,169

*

Presented by lines of business pursuant to statutory reporting requirements as prescribed by the National Association of Insurance Commissioners.

AIG's gross reserve for losses and loss expenses represents the accumulation of estimates of ultimate losses, including IBNR and loss expenses. The methods used to determine loss reserve estimates and to establish the resulting reserves are continually reviewed and updated by management. Any adjustments resulting therefrom are reflected in operating income currently. Because loss reserve estimates are subject to the outcome of future events, changes in estimates are unavoidable given that loss trends vary and time is often required for changes in trends to be recognized and confirmed. Reserve changes that increase previous estimates of ultimate cost are referred to as unfavorable or adverse development or reserve strengthening. Reserve changes that decrease previous estimates of ultimate cost are referred to as favorable development.

At September 30, 2006, General Insurance net loss reserves increased \$4.04 billion from the prior year end to \$61.51 billion. The net loss reserves represent loss reserves reduced by reinsurance recoverables, net of an allowance for unrecoverable reinsurance and applicable discount for future investment income. The table below classifies the components of the General Insurance net loss reserves by business unit as of September 30, 2006 and December 31, 2005.

<i>(in millions)</i>	September 30, 2006	December 31, 2005
DBG ^(a)	\$ 43,383	\$ 40,782
Transatlantic	6,118	5,690
Personal Lines ^(b)	2,486	2,578
Mortgage Guaranty	390	340
Foreign General ^(c)	9,136	8,086
Total Net Loss Reserve	\$ 61,513	\$ 57,476

(a) At September 30, 2006 and December 31, 2005, DBG loss reserves include approximately \$3.50 billion and \$3.77 billion, respectively, (\$3.87 billion and \$4.26 billion, respectively, before discount) related to

Table of Contents

American International Group, Inc. and Subsidiaries

business written by DBG but ceded to AIRCO and reported in AIRCO's statutory filings. DBG loss reserves also include approximately \$532 million and \$407 million related to business included in AIUO's statutory filings at September 30, 2006 and December 31, 2005, respectively.

(b) At September 30, 2006 and December 31, 2005, Personal Lines loss reserves include \$876 million and \$878 million, respectively, related to business ceded to DBG and reported in DBG's statutory filings.

(c) At September 30, 2006 and December 31, 2005, Foreign General loss reserves include approximately \$2.70 billion and \$2.15 billion, respectively, related to business reported in DBG's statutory filings.

The DBG net loss reserve of \$43.38 billion is comprised principally of the business of AIG subsidiaries participating in the American Home/National Union pool (11 companies) and the surplus lines pool (Lexington, Starr Excess Liability Insurance Company and Landmark Insurance Company).

Beginning in 1998, DBG ceded a quota share percentage of its other liability occurrence and products liability occurrence business to AIRCO. The quota share percentage ceded was 40 percent in 1998, 65 percent in 1999, 75 percent in 2000 and 2001, 50 percent in 2002 and 2003, 40 percent in 2004, 35 percent in 2005 and 20 percent in 2006 and covered all business written in these years for these lines by participants in the American Home/National Union pool. In 1998 the cession reflected only the other liability occurrence business, but in 1999 and subsequent years included products liability occurrence. AIRCO's loss reserves relating to these quota share cessions from DBG are recorded on a discounted basis. As of September 30, 2006, AIRCO carried a discount of approximately \$370 million applicable to the \$3.87 billion in undiscounted reserves it assumed from the American Home/National Union pool via this quota share cession. AIRCO also carries approximately \$478 million in net loss reserves relating to Foreign General insurance business. These reserves are carried on an undiscounted basis.

Beginning in 1997, the Personal Lines division ceded a percentage of all business written by the companies participating in the personal lines pool to the American Home/National Union pool. As noted above, the total reserves carried by participants in the American Home/National Union pool relating to this cession amounted to \$876 million as of September 30, 2006.

The companies participating in the American Home/National Union pool have maintained a participation in the business written by AIU for decades. As of September 30, 2006, these AIU reserves carried by participants in the American Home/National Union pool amounted to approximately \$2.70 billion. The remaining Foreign General reserves are carried by AIUO, AIRCO, and other smaller AIG subsidiaries domiciled outside the United States. Statutory filings in the U.S. by AIG companies reflect all the business written by U.S. domiciled entities only, and therefore exclude business written by AIUO, AIRCO, and all other internationally domiciled subsidiaries. The total reserves carried at September 30, 2006 by AIUO and AIRCO were approximately \$4.35 billion and \$3.98 billion, respectively. AIRCO's \$3.98 billion in total general insurance reserves consist of approximately \$3.50 billion from business assumed from the American Home/ National Union pool and an additional \$478 million relating to Foreign General Insurance business.

Discounting of Reserves

At September 30, 2006, AIG's overall General Insurance net loss reserves reflects a loss reserve discount of \$2.11 billion, including tabular and non-tabular calculations. The tabular workers compensation discount is calculated using a 3.5 percent interest rate and the 1979-81 Decennial Mortality Table. The non-tabular workers compensation discount is calculated separately for companies domiciled in New York and Pennsylvania, and follows the statutory regulations for each state. For New York companies, the discount is based on a five percent interest rate and the companies' own payout patterns. For Pennsylvania companies, the statute has specified discount factors for accident years 2001 and prior, which are based on a six percent interest rate and an industry payout pattern. For accident years 2002 and subsequent, the discount is based on the yield of U.S. Treasury securities ranging from one to twenty years and the company's own payout pattern, with the future expected payment for each year using the interest rate associated with the corresponding Treasury security yield for that time period. The discount is comprised of the following: \$512 million tabular discount for workers compensation in DBG; \$1.23 billion non-tabular discount for workers compensation in DBG; and, \$370 million non-tabular discount for other liability occurrence and products

liability occurrence in AIRCO. The total undiscounted workers compensation loss reserve carried by DBG is approximately \$10.6 billion as of September 30, 2006. The other liability occurrence and products liability occurrence business in AIRCO that is assumed from DBG is discounted based on the yield of U.S. Treasury securities ranging from one to twenty years and the DBG payout pattern for this business. The undiscounted reserves assumed by AIRCO from DBG totaled approximately \$3.87 billion at September 30, 2006.

Quarterly Reserving Process

It is management's belief that the General Insurance net loss reserves are adequate to cover General Insurance net losses and loss expenses as of September 30, 2006. While AIG regularly reviews the adequacy of established loss reserves, there can be no assurance that AIG's ultimate loss reserves will not develop adversely and materially exceed AIG's loss reserves as of September 30, 2006. In the opinion of management, such adverse development and resulting increase in reserves is not likely to have a material adverse effect on AIG's consolidated financial position, although it could have a material adverse effect on AIG's consolidated results of operations for an individual reporting period.

Table of Contents

American International Group, Inc. and Subsidiaries

The table below presents the reconciliation of General Insurance net loss reserves for the three and nine-month periods ended September 30, 2006 and 2005 as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2006	2005	2006	2005
Net reserve for losses and loss expenses at beginning of period	\$ 60,214	\$ 50,564	\$ 57,476	\$ 47,254
Foreign exchange effect	34	(33)	521	(354)
Acquisition ^(a)	55		55	
Losses and loss expenses incurred:				
Current year	6,957	8,626	20,710	22,697
Prior years, other than accretion of discount ^(b)	(41)	244	(255)	374
Prior years, accretion of discount	101	97	303	291
Losses and loss expenses incurred	7,017	8,967	20,758	23,362
Losses and loss expenses paid	5,807	5,439	17,297	16,203
Net reserve for losses and loss expenses at end of period	\$ 61,513	\$ 54,059	\$ 61,513	\$ 54,059

(a) Reflects the opening balance with respect to the acquisition of the Central Insurance Co., Ltd. in the third quarter of 2006.

(b) Includes \$24 million and \$30 million in the three-month periods ended September 30, 2006 and 2005, respectively, for the general reinsurance operations of Transatlantic and \$43 million and \$39 million, respectively, of additional losses incurred resulting from 2005 and 2004 catastrophes. Includes \$89 million and \$120 million in the nine-month periods ended September 30, 2006 and 2005, respectively, for the general reinsurance operations of Transatlantic and \$80 million and \$157 million, respectively, of additional losses incurred resulting from 2005 and 2004 catastrophes. Transatlantic included \$4 million and \$24 million of prior years adverse catastrophe development in the three and nine months ended September 30, 2006, respectively.

The loss ratios recorded by AIG for the first nine months of 2006 take into account the results of the comprehensive reserve reviews that were completed in the fourth quarter of 2005. As explained more fully in the 2005 Annual Report on Form 10-K/A, AIG's year-end 2005 reserve review reflected careful consideration of the reserve analyses prepared by AIG's internal actuarial staff with the assistance of third party actuaries. In determining the appropriate loss ratios for accident year 2006 for each class of business, AIG gave appropriate consideration to the loss ratios resulting from the reserve analyses as well as all other relevant information including rate changes, expected changes in loss costs, changes in coverage, reinsurance or mix of business, and other factors that may affect the loss ratios.

In the first nine months of 2006, AIG enhanced its process of determining the quarterly loss development from prior accident years. In the first quarter of 2006, AIG began conducting additional analyses to determine the change in estimated ultimate loss for each accident year for each profit center. For example, if loss emergence for a profit center is different than expected for certain accident years in the quarter, the actuaries now take additional steps to examine the indicated effect such emergence would have on the reserves of that profit center. In some cases, the higher or lower than expected emergence may result in no clear change in the ultimate loss estimate for the accident years in question, and no adjustment would be made to the profit center's reserves for prior accident years. In other cases, the

higher or lower than expected emergence may result in a larger change, either favorable or unfavorable, than the difference between the actual and expected loss emergence. Such additional analyses were conducted for each profit center, as appropriate, in the first, second and third quarters of 2006 to determine the loss development from prior accident years for the first, second and third quarters of 2006. As part of its quarterly reserving process, AIG also considers notices of claims received with respect to emerging issues, such as those related to stock option backdating.

In the third quarter of 2006, net loss development from prior accident years was favorable by approximately \$41 million, including approximately \$43 million of adverse development pertaining to the major hurricanes in 2005 and 2004 and \$24 million of adverse development pertaining to the general reinsurance operations of Transatlantic. Excluding catastrophes and Transatlantic, as well as accretion of discount of approximately \$101 million, net loss development from prior accident years in the third quarter of 2006 was favorable by approximately \$108 million. This overall favorable development of \$108 million consisted of approximately \$490 million of favorable development from accident years 2003 through 2005, partially offset by approximately \$380 million of adverse development from accident years 2002 and prior. The \$490 million of favorable development from accident years 2003 through 2005 included approximately \$310 million from accident year 2005, \$160 million from accident year 2004, and \$20 million from accident year 2003. The adverse development from accident years 2002 and prior included approximately \$130 million from accident year 1999, primarily due to two significant claims, with the balance spread across many accident years. Foreign General prior accident year reserves, excluding catastrophes, developed favorably by approximately \$105 million in the quarter. DBG prior accident year reserves, excluding catastrophes, developed adversely by approximately \$40 million. The overall development also included approximately \$22 million of favorable development from Personal Lines and approximately \$21 million of favorable development from UGC. The

Table of Contents

American International Group, Inc. and Subsidiaries

favorable developments experienced in Foreign General included both short tail as well as longer tail classes of business.

In the first nine months of 2006, net loss development from prior accident years was favorable by approximately \$255 million, including approximately \$80 million of adverse development pertaining to the major hurricanes in 2004 and 2005 and \$89 million of adverse development from the general reinsurance operations of Transatlantic. Excluding catastrophes and Transatlantic, as well as accretion of discount of approximately \$303 million, net loss development from prior accident years in the first nine months of 2006 was favorable by approximately \$424 million. This overall favorable development of \$424 million consisted of approximately \$1.23 billion of favorable development from accident years 2003 through 2005, partially offset by approximately \$805 million of adverse development from accident years 2002 and prior. The \$1.23 billion of favorable development from accident years 2003 through 2005 included approximately \$550 million from accident year 2005, \$450 million from accident year 2004, and \$230 million from accident year 2003. The adverse developments from accident years 2002 and prior were widely spread among many accident years. The overall favorable development of \$424 million included approximately \$235 million from Foreign General, \$80 million from Personal Lines, \$85 million from UGC, and \$25 million from DBG. For both the third quarter and the first nine months of 2006, most classes of business throughout AIG continued to experience favorable development for accident years 2003 through 2005. The adverse development from accident years 2002 and prior reflected developments from excess casualty, workers compensation, excess workers compensation, and post-1986 environmental liability classes of business, all within DBG.

As a result of the continued favorable experience for accident years 2003 through 2005, the expected loss ratios for accident year 2006 were improved for a number of casualty classes of business in the third quarter of 2006. For those classes of business where the expected loss ratio for accident year 2006 was adjusted in the third quarter, the revised loss ratio was generally applied to the cumulative 2006 net earned premium for the class. The overall effect on the third quarter results was approximately a \$100 million improvement. This amount represents the application of the revised expected loss ratios to the net premiums earned reported for the first six months of 2006.

In the third quarter of 2005, net loss development from prior accident years was adverse by approximately \$244 million, including approximately \$39 million of adverse development pertaining to the major hurricanes from accident year 2004 and approximately \$30 million of adverse development pertaining to the general reinsurance operations of Transatlantic. Excluding catastrophes and Transatlantic, as well as accretion of discount of approximately \$97 million, net loss development from prior accident years in the third quarter of 2005 was adverse by approximately \$175 million. In the third quarter of 2005, most classes of business experienced favorable development for accident years 2003 and 2004 and adverse development for accident years 2001 and prior. The overall development of \$175 million consisted of approximately \$350 million of adverse development from accident years 2001 and prior, partially offset by approximately \$170 million of favorable development from accident year 2004 and \$30 million of favorable development from accident year 2003. Accident year 2002 experienced adverse development for D&O and excess casualty, with an overall adverse development of approximately \$20 million in the quarter. For all accident years combined, the D&O and excess casualty classes accounted for the vast majority of the \$175 million overall adverse development in the quarter. The \$175 million of overall adverse development, excluding catastrophes, was comprised of approximately \$190 million of adverse development from DBG, \$15 million of adverse development from Foreign General, and \$15 million of favorable development from each of the Personal Lines and UGC segments.

In the first nine months of 2005, net loss development from prior accident years was adverse by approximately \$375 million, including approximately \$157 million of adverse development from the major hurricanes from accident year 2004 and approximately \$120 million of adverse development from the general reinsurance operations of Transatlantic. Excluding catastrophes and Transatlantic, as well as accretion of discount of approximately \$291 million, net loss development from prior accident years in the first nine months of 2005 was adverse by approximately \$98 million. The overall development of \$98 million consisted of approximately \$1.13 billion of adverse development from accident years 2002 and prior, offset by approximately \$740 million of favorable development from accident year 2004 and approximately \$290 million of favorable development from accident year

2003. Most classes of business produced favorable development for accident years 2003 and 2004, and adverse development for accident years 2001 and prior. The majority of the adverse development from accident year 2002 and prior was attributable to the D&O and excess casualty classes of business. Accident year 2002 experienced favorable development for many classes of business. However, in total, accident year 2002 experienced approximately \$50 million of adverse development primarily attributable to approximately \$125 million of adverse development from the D&O class. The overall adverse development of \$98 million for all prior accident years, excluding catastrophes, was comprised of approximately \$410 million of adverse development from DBG, \$190 million of favorable development from Foreign General, \$60 million of favorable development from Personal Lines, and \$62 million of favorable development from UGC.

Table of Contents

American International Group, Inc. and Subsidiaries

Loss Reserving Process

The General Insurance loss reserves can generally be categorized into two distinct groups. One group is long-tail casualty lines of business which include excess and umbrella liability, D&O, professional liability, medical malpractice, workers compensation, general liability, products liability, and related classes. The other group is short-tail lines of business consisting principally of property lines, personal lines and certain classes of casualty lines. These lines of business and actuarial assumptions made in the review of these lines of business are described in the 2005 Annual Report on Form 10-K/A.

The process of determining the current loss ratio for each class or business segment is based on a variety of factors and is described in detail in AIG's 2005 Annual Report on Form 10-K/A. AIG uses the process described above to update AIG's reserves on a quarterly basis. AIG's 2005 Annual Report on Form 10-K/A also includes a discussion and analysis of the volatility of AIG's 2005 reserve estimates and a sensitivity analysis.

Asbestos and Environmental Reserves

The estimation of loss reserves relating to asbestos and environmental claims on insurance policies written many years ago is subject to greater uncertainty than other types of claims due to inconsistent court decisions as well as judicial interpretations and legislative actions that in some cases have tended to broaden coverage beyond the original intent of such policies and in others have expanded theories of liability.

As described more fully in the 2005 Annual Report on Form 10-K/A, AIG's reserves relating to asbestos and environmental claims reflect the results of the comprehensive ground up analysis which was completed in the fourth quarter of 2005. AIG is in the process of updating its ground up analysis and expects to continue to do so on an annual basis. In the first nine months of 2006, AIG maintained the ultimate loss estimates for asbestos and environmental claims resulting from the recently completed reserve analyses. A minor amount of incurred loss emergence pertaining to asbestos was reflected in the first nine months of 2006, as depicted in the table that follows. This minor development is primarily attributable to the general reinsurance operations of Transatlantic.

A summary of reserve activity, including estimates for applicable IBNR, relating to asbestos and environmental claims separately and combined for the nine months ended September 30, 2006 and 2005 follows:

	2006		2005	
(in millions)	Gross	Net	Gross	Net
Asbestos:				
Reserve for losses and loss expenses at beginning of year	\$ 4,441	\$ 1,840	\$ 2,559	\$ 1,060
Losses and loss expenses incurred*	2	7	120	33
Losses and loss expenses paid*	(404)	(151)	(239)	(91)
Reserve for losses and loss expenses at end of period	\$ 4,039	\$ 1,696	\$ 2,440	\$ 1,002
Environmental:				
Reserve for losses and loss expenses at beginning of year	\$ 926	\$ 410	\$ 974	\$ 451
Losses and loss expenses incurred*	(3)		(9)	(2)
Losses and loss expenses paid*	(80)	(43)	(81)	(52)
Reserve for losses and loss expenses at end of period	\$ 843	\$ 367	\$ 884	\$ 397
Combined:				
Reserve for losses and loss expenses at beginning of year	\$ 5,367	\$ 2,250	\$ 3,533	\$ 1,511
Losses and loss expenses incurred*	(1)	7	111	31
Losses and loss expenses paid*	(484)	(194)	(320)	(143)

Reserve for losses and loss expenses at end of period	\$ 4,882	\$ 2,063	\$ 3,324	\$ 1,399
---	----------	----------	----------	----------

* All amounts pertain to policies underwritten in prior years.

As indicated in the table above, asbestos loss payments increased significantly in the first nine months of 2006 compared to the same period in the prior years, primarily as a result of payments pertaining to settlements that had been negotiated in earlier periods. There was negligible development of asbestos and environmental reserves in the first nine months of 2006.

The gross and net IBNR included in the reserve for losses and loss expenses, relating to asbestos and environmental claims separately and combined, at September 30, 2006 and 2005 were estimated as follows:

(in millions)	2006		2005	
	Gross	Net	Gross	Net

Table of Contents

American International Group, Inc. and Subsidiaries

A summary of asbestos and environmental claims count activity for the nine months ended September 30, 2006 and 2005 was as follows:

	2006			2005		
	Asbestos	Environmental	Combined	Asbestos	Environmental	Combined
Claims at beginning of year	7,293	9,873	17,166	7,575	8,216	15,791
Claims during year:						
Opened	538	1,032	1,570	646	4,583	5,229
Settled	(126)	(120)	(246)	(49)	(178)	(227)
Dismissed or otherwise resolved	(678)	(1,295)	(1,973)	(831)	(2,934)	(3,765)
Claims at end of period	7,027	9,490	16,517	7,341	9,687	17,028

The table below presents AIG's survival ratios for asbestos and environmental claims at September 30, 2006 and 2005. The survival ratio is derived by dividing the current carried loss reserve by the average payments for the three most recent calendar years for these claims. Therefore, the survival ratio is a simplistic measure estimating the number of years it would be before the current ending loss reserves for these claims would be paid off using recent year average payments. The 2006 survival ratio is lower than the ratio at December 31, 2005 because the more recent periods included in the rolling average reflect higher claims payments. Many factors, such as aggressive settlement procedures, mix of business and level of coverage provided, have a significant effect on the amount of asbestos and environmental reserves and payments and the resultant survival ratio. Thus, caution should be exercised in attempting to determine reserve adequacy for these claims based simply on this survival ratio.

AIG's survival ratios for asbestos and environmental claims, separately and combined, were based upon a three-year average payment. These ratios at September 30, 2006 and 2005 were as follows:

(number of years)	Gross	Net
2006		
Survival ratios:		
Asbestos	11.9	13.6
Environmental	6.5	5.3
Combined	10.4	10.7
2005		
Survival ratios:		
Asbestos	9.0	11.0
Environmental	6.5	6.0
Combined	8.1	8.9

Life Insurance & Retirement Services Operations

AIG's Life Insurance & Retirement Services subsidiaries offer a wide range of insurance and retirement savings products both domestically and abroad. Insurance-oriented products consist of individual and group life, payout annuities, endowment and accident and health policies. Retirement savings products consist generally of fixed and variable annuities.

Domestically, AIG's Life Insurance & Retirement Services operations offer a broad range of protection products, such as life insurance, group life and health products, including disability income products and payout annuities, which include single premium immediate annuities, structured settlements and terminal funding annuities. Home service operations include an array of life insurance, accident and health and annuity products sold primarily through career agents. In addition, home service includes a small block of run-off property and casualty coverage. Retirement services include group retirement products, individual fixed and variable annuities sold through banks, broker dealers and exclusive sales representatives, and annuity runoff operations, which include previously-acquired closed blocks and other fixed and variable annuities largely sold through distribution relationships that have been discontinued.

Overseas, AIG's Life Insurance & Retirement Services operations include insurance and investment-oriented products such as whole and term life, investment linked, universal life and endowments, personal accident and health products, group products including pension, life and health, and fixed and variable annuities.

(a) Effective January 1, 2006, the Broker/ Dealer operations of the Domestic Life Insurance companies are being reported and managed within the Asset Management segment. Included in GAAP premiums were revenues of \$15 million and \$79 million, respectively, for the three and nine-month periods ended September 30, 2005.

(b) Includes structured settlements, single premium immediate annuities and terminal funding annuities.

(c) Primarily represents runoff annuity business sold through discontinued distribution relationships.

(d) Includes the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts. For the nine month period ended September 30, 2006, the effect was an increase of \$245 million and \$168 million in net investment income and operating income, respectively.

(e) For purposes of this presentation, pricing net investment gains are segregated as a component of total realized capital gains (losses). They represent certain amounts of realized capital gains where gains are an inherent element in pricing certain life products in some foreign countries.

(f) Amounts presented were as at September 30, 2006 and December 31, 2005.

AIG's Life Insurance & Retirement Services subsidiaries report their operations through the following operating units: Domestic Life – AIG American General, including American General Life Insurance Company (AG Life), United States Life Insurance in the City of New York (USLIFE) and American General Life and Accident Insurance Company (AGLA); Domestic Retirement Services – The Variable Annuity Life Insurance Company (VALIC), AIG Annuity Insurance Company (AIG Annuity) and AIG SunAmerica; Foreign Life – ALICO, AIRCO, AIG Edison Life, AIG Star Life, American International Assurance Company, Limited together with American International Assurance Company (Bermuda) Limited (AIA), Nan Shan Life Insurance Company, Ltd. (Nan Shan) and The Philippine American Life and General Insurance Company (Philamlife).

AIG transacts business in most major foreign currencies. The following table summarizes the effect of changes in foreign currency exchange rates on the growth of Life Insurance & Retirement Services GAAP premiums for the three and nine-month periods ended September 30, 2006:

	Three Months Ended September 30, 2006	Nine Months Ended September 30, 2006
Growth in original currency*	7.9%	7.3%
Foreign exchange effect	(0.4)	(2.4)
Growth as reported in U.S. dollars	7.5%	4.9%

* Computed using a constant exchange rate for each respective period.

Life Insurance & Retirement Services Results

Life Insurance & Retirement Services GAAP premiums increased 7.5 percent to \$7.6 billion in the third quarter of 2006 compared to the same period in 2005. Net investment income increased \$226 million for the third quarter of 2006 when compared to the same period in 2005. Net investment income includes policyholder trading gains (losses) amounting to \$221 million in the third quarter of 2006 compared to \$359 million in same period of 2005. Policyholder trading gains (losses) are linked primarily to equities and are offset by an equal change in incurred policy losses and benefits.

Operating income increased 9 percent in the third quarter of 2006 when compared to the same period in 2005. Domestic Life operations continued to perform well in its core life insurance businesses with growth in GAAP premium and invested assets supporting the underlying reserves. Domestic Retirement Services operating income growth in the quarter was driven by individual fixed and variable annuity business, offset in part by lower growth and spread compression in the group retirement products line. Foreign Life Insurance & Retirement Services operating income grew 16 percent in the quarter helped by higher investment returns. Realized capital gains (losses) for the third quarter of 2006

Table of Contents

American International Group, Inc. and Subsidiaries

totaled a net loss of \$176 million versus a loss of \$16 million during the same period last year. The loss in the current quarter was primarily due to the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, partially offset by foreign currency gains.

Life Insurance & Retirement Services GAAP premiums increased 4.9 percent to \$23 billion for the first nine months of 2006 compared to the same period of 2005. Net investment income increased for the first nine months of 2006 reflecting a higher level of invested assets. The increase in net investment income also includes the effect of out of period adjustments relating to the accounting for certain interests in unit investment trusts totaling \$24 million and \$245 million for the three and nine-month periods ending September 30, 2006, respectively. Operating income grew 9 percent for the first nine months of 2006 compared to the same period of 2005. Domestic Life earnings for the core life and payout annuity businesses continue to demonstrate earnings growth, but was more than offset by lower investment income from calls and tenders, lower partnership income and additional reserves for legal contingencies. Domestic Retirement Services earnings declined for the first nine months of 2006 primarily due to realized capital losses which more than offset increased income from growth in invested assets and lower amortization of deferred policy acquisition costs related to capital losses. Foreign Life Insurance & Retirement Services operating income grew 23 percent for the first nine months of 2006 due to higher realized capital gains and the effect of the aforementioned out of period adjustments. Operating income growth in U.S. dollars is lower than growth on a local currency basis primarily due to a weaker Japanese Yen in the first nine months of 2006 compared to the same period last year. Realized capital losses were \$117 million for the first nine months of 2006 compared to \$18 million during the same period of 2005.

Domestic Life Operations

The following table reflects retail periodic Life insurance sales by product for the three and nine-month periods ended September 30, 2006 and 2005, respectively:

Domestic Life Insurance Periodic Premium Sales*

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2006	2005	2006	2005
By product:				
Universal life	\$ 46	\$ 79	\$289	\$191
Variable universal life	15	11	42	35
Term life	59	59	182	172
Whole life/other	3	1	9	7
Total	\$123	\$150	\$522	\$405

*Periodic premium represents premium from new business expected to be collected over a one year period.

Quarterly Domestic Life Results

AIG's Domestic Life operations had growth of GAAP premiums for the third quarter of 2006 when compared to the same period last year. In the life insurance product line, periodic life sales declined due to re-pricing of certain universal life products and tightened underwriting standards for certain markets to maintain margins. AGLA, the home service business, is diversifying product offerings and enhancing the capabilities and quality of the sales force, which has resulted in improved agent productivity and better persistency of in-force business. Growth of payout annuities GAAP premiums emanated from sales of single premium immediate annuities and structured settlements.

GAAP premiums for the group life/health product line were slightly lower in the third quarter of 2006 compared to 2005 reflecting slower growth in the credit insurance business, and tightened pricing and underwriting in the group employer lines. Management continues to focus on new product introductions, cross selling, other growth strategies, and options that may include exiting certain product lines.

Earnings for the Domestic Life Insurance line of business grew 9 percent for the third quarter of 2006 reflecting growth in in-force business and higher net investment income. Earnings for the home service line of business increased 37 percent compared to the third quarter of 2005, which included approximately \$8 million of hurricane losses, and also due to higher investment income from partnerships of \$17 million. The group life/health line of business results for the third quarter of 2006 reflect continuing restructuring efforts in that business. The payout annuities line of business earnings increased over last year due to growth in single premium annuities and also due to a \$12 million reserve strengthening in the third quarter of 2005.

Year-to-date Domestic Life Results

GAAP premiums for the Domestic Life operations grew 5 percent for the first nine months of 2006 compared to the same period of 2005 reflecting improved sales of universal life and single premium immediate annuities. The life insurance product line experienced increased periodic sales from the independent distribution platform during the first nine months of 2006. The home service business GAAP premiums declined slightly for the first nine months of 2006 as the reduction of premium in-force from normal lapses and maturities exceeded sales growth for the period. The payout annuities GAAP premium growth for the first nine months of 2006 reflects increased sales of single premium annuities and structured settlements when compared to the same period last year. GAAP premiums for the group life/health product line for the first nine months of 2006 reflect the restructuring efforts in certain product lines.

Earnings for the life insurance product line declined for the first nine months of 2006 due to lower investment income

Table of Contents

American International Group, Inc. and Subsidiaries

related to yield enhancement activities that offset growth in in-force business. Earnings for the home service line of business grew from the same period last year due to increased net investment income from partnerships and lower catastrophe and acquisition costs. The group life/health line of business earnings for the first nine months of 2006 are lower than the same period last year due to reserves related to litigation and contingencies in the credit life and A&H business and transition costs related to the outsourcing of back office operations. The payout annuities product line earnings declined for the first nine months of 2006 primarily due to lower calls and tenders on fixed maturity securities when compared to the same period last year.

Quarterly Domestic Retirement Services Results

Domestic Retirement Services total deposits declined slightly for the third quarter of 2006 when compared to the year ago quarter driven by lower fixed annuity sales that continued to face increased competition from bank products in the flat yield curve environment, partially offset by substantially higher variable annuity sales. Individual variable annuity deposits grew 36 percent in the third quarter of 2006 from the year ago quarter reflecting growth in products with new guarantee features. Group retirement deposits grew only slightly in the quarter compared to third quarter 2005, reflecting the increased number of policyholders nearing retirement age. New products have been launched that are designed to meet the needs of retirement age policyholders and retain assets under management. While total deposits within the group retirement business are growing moderately, annuity deposits are down \$49 million, and group mutual fund deposits are up \$69 million, for the third quarter of 2006 when compared to the same period last year, due to market demand for lower cost group retirement products. Over time, this will result in a gradual reduction in profitability of this business, due to lower profit margins in the mutual fund product compared to the annuity product.

Group retirement products earnings for the third quarter of 2006 were lower than the same period last year principally due to lower partnership income and higher amortization of deferred acquisition costs related to internal replacements of existing contracts into new contracts. Individual fixed annuity earnings grew 9 percent for the third quarter of 2006 compared to the same period last year as a result of increased net investment spreads and lower DAC amortization due to realized capital losses. Earnings for individual variable annuities grew \$7 million in the third quarter of 2006 from the year ago quarter principally due to higher fee income as a result of increased assets under management.

Year-to-date Domestic Retirement Services Results

Domestic Retirement Services total deposits declined approximately 5 percent for the first nine months of 2006 when compared to the first nine months of 2005. The decrease in total deposits reflects declining fixed annuity sales partially offset by growth in individual variable annuity sales. In addition, fixed annuity surrender rates increased during the first nine months of 2006 when compared to the same period last year. Net flows for the nine months of 2006 were negative \$4.1 billion compared to positive net flows of \$0.3 billion last year reflecting the lower deposits and higher surrenders.

Group retirement products earnings were flat for the first nine months with slightly compressed spreads offsetting the effect of separate account growth. Individual fixed annuity earnings for the first nine months of 2006 grew 28 percent primarily from growth in partnership income, lower amortization of deferred policy acquisition costs related to capital losses, growth in average underlying reserves and lower average crediting rates. The individual variable annuity product line earnings grew for the first nine months as fee income increased on higher sales volumes and increased underlying reserves.

Domestic Retirement Services Supplemental Data

The following table reflects deposits for Domestic Retirement Services for the three and nine-month periods ended September 30, 2006 and 2005:

Three Months Ended September 30,	Nine Months Ended September 30,
--	---------------------------------------

<i>(in millions)</i>	2006	2005	2006	2005
Group retirement products:				
Annuities	\$1,335	\$1,384	\$ 4,083	\$ 4,161
Mutual funds	284	215	1,085	677
Individual fixed annuities	1,194	1,498	4,212	5,912
Individual variable annuities	1,059	781	3,234	2,457
Individual fixed annuities - runoff	37	48	122	155
Total	\$3,909	\$3,926	\$12,736	\$13,362

The following chart shows the amount of reserves by surrender charge category for Domestic Retirement Services as of September 30, 2006:

<i>(in millions)</i>	Group Retirement Products*	Individual Fixed Annuities	Individual Variable Annuities
Zero or no surrender charge	\$41,266	\$10,465	\$10,721
Between 0 percent - 4 percent	11,434	10,948	8,513
Greater than 4 percent	2,755	29,685	10,222
Non-Surrenderable	887	3,163	89
Total	\$56,342	\$54,261	\$29,545

*Excludes mutual funds.

For the three months and nine months ended September 30, 2006 surrender rates increased for individual fixed annuities and individual variable annuities, while surrender rates for group retirement products declined as a result of successful asset retention efforts. The increase in surrender rate for fixed annuities continues to be driven by the shape of the yield curve and general aging of the in-force block; however, less than 20 percent of the individual fixed annuity reserves as of September 30, 2006 are available to be surren-

Table of Contents

American International Group, Inc. and Subsidiaries

dered without charge. Individual variable annuity surrender rates for the third quarter and the first nine months of 2006 primarily reflect higher shock-lapses that occur following expiration of the surrender charge period on certain 3-year and 7-year contracts, although the trend has moderated during the year. Reflecting a widespread industry phenomenon, this lapse rate, much of which was anticipated when the products were issued, has recently been affected by investor demand to exchange existing policies for new-generation contracts with living benefits or lower fees. In addition, the high lapse rates are in part due to the surrenders within certain acquired blocks of business.

A further increase in the level of surrenders in any of these businesses or in the individual fixed annuities runoff block could accelerate the amortization of deferred acquisition costs and negatively affect fee income earned on assets under management.

The following table reflects the net flows by line of business for Domestic Retirement Services for the three and nine-month periods ended September 30, 2006 and 2005:

Domestic Retirement Services Net Flow^(g)

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in millions)	2006	2005	2006	2005
Group retirement products ^(b)	\$ 158	\$ (58)	\$ 793	\$ 520
Individual fixed annuities	(1,021)	13	(1,758)	1,846
Individual variable annuities	11	(155)	(34)	(209)
Individual fixed annuities - runoff	(1,042)	(607)	(3,121)	(1,857)
Total	\$ (1,894)	\$ (807)	\$ (4,120)	\$ 300

(a) Net flows are defined as deposits received, less benefits, surrenders, withdrawals and death benefits.

(b) Includes mutual funds.

The combination of lower deposits and higher surrenders in the individual fixed annuity and individual fixed annuity-runoff blocks resulted in negative net flows for the three and nine-month periods ended September 30, 2006. The continuation of the current interest rate and competitive environment could prolong this trend.

Quarterly Foreign Life Insurance & Retirement Services Results

Foreign Life Insurance & Retirement Services operations produced 78 percent and 77 percent of Life Insurance & Retirement Services GAAP premiums for the three months ended September 30, 2006 and 2005, respectively. Foreign Life Insurance & Retirement Services GAAP premiums increased in the third quarter of 2006 by approximately 8 percent compared to the same period in 2005 driven primarily by growth in southeast Asia outside of Japan and Taiwan. Currency changes had little effect on GAAP premiums in the quarter when compared to prior year. Foreign life GAAP premium growth is affected by a continuing trend for clients to purchase investment-oriented products. This is particularly true in Southeast Asia, including Taiwan, where AIG's life operations in that region have responded to this trend by offering a wide array of investment-linked products, both periodic pay and single premium, with multiple fund selection, but with minimal investment guarantees. For GAAP reporting purposes, only revenues from policy charges for insurance, administration, and surrender charges are reported as GAAP premiums for these life products. This product mix shift contributed to the single digit growth rate in Foreign Life Insurance & Retirement Services GAAP premiums, while continuing to grow total reserves.

Foreign Life Insurance & Retirement Services operating income grew by \$214 million or 16 percent, to \$1.6 billion for the third quarter of 2006 and included \$29 million of realized capital losses compared to \$26 million

of gains in the year ago quarter. On a comparable basis, the growth in life insurance earnings for the quarter were generally in line with the growth in invested assets and increased overall compared to the third quarter of 2005, helped by higher seasonal dividend income of approximately \$35 million in Taiwan, actuarial adjustments of \$30 million and out of period adjustments of \$24 million related to unit investment trusts and \$18 million related to a reinsurance adjustment. The 2005 earnings included a charge to income of \$20 million related to a wind down of operations in Chile. Personal accident & health earnings for the third quarter of 2006 reflect continued stable profit margins and revenue growth. Group products earnings grew in the third quarter of 2006 due to improved mortality and morbidity costs when compared to the same period last year. Growth of individual fixed annuities earnings for the third quarter of 2006, emanating primarily from Japan, is in line with the growth in average assets under management and lower acquisition costs from DAC unlocking. The growth of individual variable annuities earnings in the third quarter of 2006 reflects continued growth in assets under management related to the increased demand for those products in Japan and in Europe.

During the second quarter of 2006, Japanese tax authorities announced a reduction in the amount of premium that policyholders may deduct from their Japanese tax returns for certain accident and health products. Foreign life operations in Japan continued to experience a decline in sales of those products and an increase in terminations during the quarter, which resulted in approximately \$23 million of higher expenses. This negative effect was more than offset by a \$29 million benefit to operating income from the personal accident line of business as a result of an actuarial change in estimate. If terminations continue at current experience levels, results will continue to be negatively affected. Higher than anticipated terminations result in accelerated amortization of deferred acquisition costs, offset somewhat by the release of policy benefit reserves in excess of cash value. The amount of deferred acquisition costs related to the policies in-force for these products amounted to \$240 million as of Sep-

Table of Contents

American International Group, Inc. and Subsidiaries

tember 30, 2006. In response to the tax law change, AIG has developed new products, both life and health, to meet the needs of clients in that market. AIG continues to believe that any increase in policy terminations would not be material to AIG's consolidated financial condition or results of operations.

Year-to-date Foreign Life Insurance & Retirement Services Results

Foreign Life Insurance & Retirement Services operations produced 78 percent of Life Insurance & Retirement Services GAAP premiums in the first nine months of 2006 and 2005. GAAP premiums grew approximately 5 percent for the first nine months of 2006 (7 percent in original currency) compared to the same period in 2005. AIG transacts business in most major foreign currencies and therefore premiums reported in U.S. dollars will vary by volume and from changes in foreign currency translation rates. Globally, AIG's deep and diverse distribution, which includes bancassurance, worksite marketing, direct marketing and strong agency organizations, provides a powerful distribution platform for AIG's diverse product lines. In Japan, distribution of single premium life insurance products through banks was deregulated in December 2005 resulting in increased sales of products designed for that market during the first nine months of 2006. This new distribution outlet adds to the existing multiple distribution platform in Japan where AIG remains the leading foreign provider.

Foreign Life Insurance & Retirement Services operating income for the first nine months of 2006 was \$5.0 billion, which included \$487 million of realized capital gains and the effect of out of period adjustments related to the accounting for certain interests in unit investment trusts that increased operating income by \$168 million, compared with \$4.0 billion of operating income for the same period of 2005, which included \$75 million of realized capital gains. The first nine months of 2006 results for the life insurance product line also included a \$38 million operating loss attributable to this segment's share of the operating results from AIG Credit Card Company (Taiwan) compared to a gain of \$29 million in the first nine months of 2005, due to an increase in allowance for losses recorded in the first quarter of 2006. The positive effect of DAC and value of business acquired (VOBA) unlocking for the life insurance product line was \$31 million and \$91 million for the first nine months of 2006 and 2005, respectively. Personal accident and health product line results for the first nine months of 2006 generally reflect the growth of underlying premium in-force, although growth was negatively affected by a weaker Yen exchange rate when compared to the same period last year. The Foreign Retirement Services business continued to grow in Japan and Korea by expanding distribution and leveraging AIG's product expertise. The positive effect of DAC and VOBA unlocking for the Retirement Services lines of business was \$32 million and \$13 million for the first nine months of 2006 and 2005, respectively. Reserves for individual fixed annuities continue to grow although demand for multi-currency fixed annuities in Japan has slowed due to currency rate fluctuations, rising local interest rates and stronger equity markets. Growth of individual variable annuity deposits has accelerated as those products have become more popular with consumers in Japan and Europe coupled with improved performance of equity markets.

Quarterly Life Insurance & Retirement Services Net Investment Income and Realized Capital Gains (Losses)

Net investment income increased 5 percent for the third quarter of 2006 when compared to the same period in 2005. Growth was negatively affected by lower policyholder trading gains (losses) in the third quarter of 2006 when compared to 2005. Policyholder trading gains (losses), which are linked mainly to equities, are offset by an equal change in incurred policy losses and benefits. Investment income results for certain operations include investments in structured notes linked to emerging market sovereign debt that incorporates both interest rate risk and currency risk. Mark-to-market adjustments related to these structured notes were a gain of \$6 million and a loss of \$22 million for the three and nine months ended September 30, 2006, respectively. In Taiwan, dividend income increased \$35 million over the same quarter last year due to the increased allocation of invested assets from fixed maturities to equities and the seasonality of dividend payments. In addition, period to period comparisons of investment income for some lines of business are affected by yield enhancement activity, particularly partnership income as shown in the above table.

AIG generates income tax credits as a result of investing in synthetic fuel production (synfuels) related to the investment loss shown in the above table and records those benefits in its provision for income taxes. The amount of those income tax credits was \$20 million and \$52 million for the three months ended September 30, 2006 and 2005,

respectively. See Note 6(b) Contingencies of Notes to Consolidated Financial Statements for a further discussion of the effect of fluctuating domestic crude oil prices on synfuel tax credits. For the remainder of 2006, AIG may adjust production levels depending upon oil prices which affect the availability of the synthetic fuel tax credit. Regardless of oil prices, the tax credits expire after 2007.

Year-to-date Life Insurance & Retirement Services Net Investment Income and Realized Capital Gains (Losses)

The growth in net investment income for the first nine months of 2006 compared to a year ago parallels the growth in general account reserves and surplus for both Domestic and Foreign Life Insurance & Retirement Services companies and the effect of the aforementioned out of period adjustment. Also, net investment income was positively affected by the compounding of previously earned and reinvested investment cash flows along with the addition of new net cash flows from operations. Investment income includes income generated from traditional fixed income investments as well as income generated from other sources.

The amount of income tax credits generated as a result of investing in synthetic fuel production (synfuels) was \$79 million and \$167 million for the first nine months of 2006 and 2005, respectively.

Realized capital gains (losses) include normal portfolio transactions as well as derivative gains (losses) for transactions that do not qualify for hedge accounting treatment under FAS 133, transactional foreign exchange gains and losses and other-than-temporary declines in the value of investments. Line of business results for Domestic Life Insurance & Retirement Services exclude the effect of realized capital gains (losses), but include the related effect on the amortization of deferred acquisition costs.

Life Insurance & Retirement Services Underwriting and Investment Risk

The risks associated with life and accident and health products are underwriting risk and investment risk. The risk associated with the financial and investment contract products is primarily investment risk.

Underwriting risk represents the exposure to loss resulting from the actual policy experience adversely emerging in comparison to the assumptions made in the product pricing associated with mortality, morbidity, termination and expenses. The emergence of significant adverse experience would require an adjustment to DAC and benefit reserves that could have a substantial effect on AIG's results of operations.

Natural disasters such as hurricanes, earthquakes and other catastrophes have the potential to adversely affect AIG's operating results. Other risks, such as an outbreak of a pandemic disease, such as the Avian Influenza A Virus (H5N1), could adversely affect AIG's business and operating results to an extent that may be only minimally offset by reinsurance programs.

While outbreaks of the Avian Flu continue to occur among poultry or wild birds in a number of countries in Asia, Europe, and Africa, transmission to humans has been rare to date. If the virus mutates to a form that can be transmitted from human to human, it has the potential to spread rapidly worldwide. If such an outbreak were to take place, early quarantine and vaccination could be critical to containment.

Both the contagion and mortality rate of any mutated H5N1 virus that can be transmitted from human to human are highly speculative. AIG continues to monitor the developing facts. A significant global outbreak could have a material adverse effect on Life Insurance & Retirement Services operating results and liquidity from increased mortality and morbidity rates. For a further discussion of pandemic influenza, see *Managing Market Risk* *Catastrophe Exposures* *Pandemic Influenza*.

AIG's Foreign Life Insurance & Retirement Services companies generally limit their maximum underwriting expo-

Table of Contents

American International Group, Inc. and Subsidiaries

sure on life insurance of a single life to approximately \$1.7 million of coverage. AIG's Domestic Life Insurance & Retirement Services companies limit their maximum underwriting exposure on life insurance of a single life to \$10 million of coverage in certain circumstances by using yearly renewable term reinsurance. (See also the discussion under Liquidity herein.)

AIRCO acts primarily as an internal reinsurance company for AIG's foreign life operations. This facilitates insurance risk management (retention, volatility, concentrations) and capital planning locally (branch and subsidiary). It also allows AIG to pool its insurance risks and purchase reinsurance more efficiently at a consolidated level, manage global counterparty risk and relationships and manage global life catastrophe risks.

AIG's domestic Life Insurance & Retirement Services operations utilize internal and third-party reinsurance relationships to manage insurance risks and to facilitate capital management strategies. Pools of highly-rated third-party reinsurers are utilized to manage net amounts at risk in excess of retention limits. AIG's life insurance companies also cede excess, non-economic reserves carried on a statutory-basis only on certain term and universal life insurance and accident and health policies and certain fixed annuities to AIG Life of Bermuda Ltd., a wholly owned Bermuda reinsurer.

AIG generally obtains letters of credit in order to obtain statutory recognition of these intercompany reinsurance transactions. For this purpose, AIG entered into a \$2.5 billion syndicated letter of credit facility in December 2004. Letters of credit totaling \$2.5 billion were outstanding as of September 30, 2006. The letter of credit facility has a ten-year term, but the facility can be reduced or terminated by the lenders beginning after seven years.

In November 2005, AIG entered into a revolving credit facility for an aggregate amount of \$3 billion. The facility can be drawn in the form of letters of credit with terms of up to ten years. As of September 30, 2006, \$2.49 billion principal amount of letters of credit are outstanding under this facility, of which approximately \$1.09 billion relates to life intercompany reinsurance transactions. AIG also obtained approximately \$298 million letters of credit on a bilateral basis.

Investment risk represents the exposure to loss resulting from the cash flows from the invested assets, primarily long-term fixed rate investments, being less than the cash flows required to meet the obligations of the expected policy and contract liabilities and the necessary return on investments. (See also the discussion under Liquidity herein.)

To minimize its exposure to investment risk, AIG tests the cash flows from the invested assets and policy and contract liabilities using various interest rate scenarios to evaluate investment risk and to confirm that assets are sufficient to pay these liabilities.

AIG actively manages the asset-liability relationship in its foreign operations, as it has been doing throughout AIG's history, even though certain territories lack qualified long-term investments or certain local regulatory authorities may impose investment restrictions. For example, in several Southeast Asian countries, the duration of investments is shorter than the effective maturity of the related policy liabilities. Therefore, there is risk that the reinvestment of the proceeds at the maturity of the initial investments may be at a yield below that of the interest required for the accretion of the policy liabilities. Additionally, there exists a future investment risk associated with certain policies currently in-force which will have premium receipts in the future. That is, the investment of these future premium receipts may be at a yield below that required to meet future policy liabilities.

In the first nine months of 2006, new money investment rates have generally risen in the U.S. and Japan and have generally fallen in Taiwan and Thailand. In regard to inforce business, management focus is required in both the investment and product management process to maintain an adequate yield to match the interest necessary to support future policy liabilities. Business strategies continue to evolve to maintain profitability of the overall business. As such, in some countries, new products are being introduced with minimal investment guarantees resulting in a shift toward investment linked savings products and away from traditional savings products with higher guarantees.

The investment of insurance cash flows and reinvestment of the proceeds of matured securities and coupons requires active management of investment yields while maintaining satisfactory investment quality and liquidity.

AIG may use alternative investments in certain foreign jurisdictions where interest rates remain low and there are limited long-dated bond markets, including equities, real estate and foreign currency denominated fixed income instruments to extend the duration or increase the yield of the investment portfolio to more closely match the

requirements of the policyholder liabilities and DAC recoverability. This strategy has been effectively used in Japan and more recently by Nan Shan in Taiwan. Foreign assets comprised approximately 32 percent of Nan Shan's invested assets at September 30, 2006, slightly below the maximum allowable percentage under current regulation. The majority of Nan Shan's in-force policy portfolio is traditional life and endowment insurance products with implicit interest rate guarantees. New business with lower interest rate guarantees are gradually reducing the overall interest requirements, but asset portfolio yields have declined faster due to the prolonged low interest rate environment. As a result, although the investment margins for a large block of in-force policies are negative, the block remains profitable because the mortality and expense margins presently exceed the negative investment spread. In response to the low interest rate environment and the volatile exchange rate of the NT dollar, Nan Shan is

Table of Contents

American International Group, Inc. and Subsidiaries

emphasizing new products with lower implied guarantees, including participating endowments and investment-linked products. Although the risks of a continued low interest rate environment coupled with a volatile NT dollar could increase net liabilities and require additional capital to maintain adequate local solvency margins, Nan Shan currently believes it has adequate resources to meet all future policy obligations.

AIG actively manages the asset-liability relationship in its domestic operations. This relationship is more easily managed through the availability of qualified long-term investments.

AIG uses asset-liability matching as a management tool worldwide to determine the composition of the invested assets and appropriate marketing strategies. As a part of these strategies, AIG may determine that it is economically advantageous to be temporarily in an unmatched position due to anticipated interest rate or other economic changes. In addition, the absence of long-dated fixed income instruments in certain markets may preclude a matched asset-liability position in those markets.

A number of guaranteed benefits, such as living benefits or guaranteed minimum death benefits, are offered on certain variable life and variable annuity products. AIG manages its exposure resulting from these long-term guarantees through reinsurance or capital market hedging instruments.

DAC for Life Insurance & Retirement Services products arises from the deferral of those costs that vary with, and are directly related to, the acquisition of new or renewal business. Policy acquisition costs for life insurance products are generally deferred and amortized over the premium paying period of the policy. Policy acquisition costs that relate to universal life and investment-type products, including variable and fixed annuities (investment-oriented products) are deferred and amortized, with interest, as appropriate, in relation to the historical and future incidence of estimated gross profits to be realized over the estimated lives of the contracts. Amortization expense includes the effects of current period realized capital gains and losses for investment type products. With respect to investment-oriented products, AIG's policy is to adjust amortization assumptions for DAC when estimates of current or future gross profits to be realized from these contracts are revised. With respect to variable annuities sold domestically (representing the vast majority of AIG's variable annuity business), the assumption for the long-term annual net growth rate of the equity markets used in the determination of DAC amortization is approximately ten percent. A methodology referred to as "reversion to the mean" is used to maintain this long-term net growth rate assumption, while giving consideration to short-term variations in equity markets. Estimated gross profits include investment income and gains and losses less interest required on policyholder reserves, as well as other charges in the contract less actual mortality and expenses. Current experience and changes in the expected future gross profits are analyzed to determine the effect on the amortization of DAC. The estimation of projected gross profits requires significant management judgment. The assumptions with respect to the current and projected gross profits are reviewed and analyzed quarterly and are adjusted accordingly.

Table of Contents

American International Group, Inc. and Subsidiaries

The following table summarizes the major components of the changes in deferred acquisition costs and the value of business acquired (VOBA) for the nine months ended September 30, 2006 and 2005:

(in millions)	2006			2005		
	DAC	VOBA	Total	DAC	VOBA	Total

* Represents sales inducement assets reclassified from DAC to Other assets.

AIG's variable annuity earnings will be affected by changes in market returns because separate account revenues, primarily composed of mortality and expense charges and asset management fees, are a function of asset values.

DAC for both insurance-oriented and investment-oriented products as well as retirement services products are reviewed for recoverability, which involves estimating the future profitability of current business. This review also involves significant management judgment. If the actual emergence of future profitability were to be substantially different than that estimated, AIG's results of operations could be significantly affected in future periods.

Insurance and Asset Management Invested Assets

AIG's investment strategy is to invest primarily in high quality securities while maintaining diversification to avoid significant exposure to issuer, industry and/or country concentrations. With respect to Domestic General Insurance, AIG's strategy is to invest in longer duration fixed maturity investments to maximize the yields at the date of purchase. With respect to Life Insurance & Retirement Services, AIG's strategy is to produce cash flows required to meet maturing insurance liabilities. (See also the discussion under Operating Review: Life Insurance & Retirement Services Operations herein.) AIG invests in equities for various reasons, including diversifying its overall exposure to interest rate risk. Available for sale bonds and equity securities are subject to declines in fair value. Such declines in fair value are presented in unrealized appreciation or depreciation of investments, net of taxes as a component of accumulated other comprehensive income. Declines that are determined to be other-than-temporary are reflected in income in the period in which the intent to hold the securities to recovery no longer exists. See Valuation of Invested Assets . Generally, insurance regulations restrict the types of assets in which an insurance company may invest. When permitted by regulatory authorities and when deemed necessary to protect insurance assets, including invested assets, from adverse movements in foreign currency exchange rates, interest rates and equity prices, AIG and its insurance subsidiaries may enter into derivative transactions as end users. (See also the discussion under Derivatives herein.)

In certain jurisdictions, significant regulatory and/or foreign governmental barriers exist which may not permit the immediate free flow of funds between insurance subsidiaries or from the insurance subsidiaries to AIG parent.

Credit Quality

At September 30, 2006, approximately 58 percent of the fixed maturities investments were domestic securities. Approximately 39 percent of such domestic securities were rated AAA by one or more of the principal rating agencies. Approximately six percent were below investment grade or not rated.

A significant portion of the foreign fixed income portfolio is rated by Moody's Investors Service (Moody's), S&P or similar foreign services. Similar credit quality rating services are not available in all overseas locations. AIG reviews the credit quality of the foreign portfolio nonrated fixed income investments, including mortgages. At September 30, 2006, approximately 19 percent of the foreign fixed income investments were either rated AAA or, on the basis of AIG's internal analysis, were equivalent from a credit standpoint to securities so rated. Approximately five percent were below investment grade or not rated at that date. A large portion of the foreign fixed income portfolio are sovereign fixed maturity securities supporting the policy liabilities in the country of issuance.

Any fixed income security may be subject to downgrade for a variety of reasons subsequent to any balance sheet date.

Valuation of Invested Assets

AIG has the ability to hold any fixed maturity security to its stated maturity, including those fixed maturity securities classified as available for sale. Therefore, the decision to sell any such fixed maturity security classified as available for sale reflects the judgment of AIG's management that the security sold is unlikely to provide, on a relative value basis, as attractive a return in the future as alternative securities entailing comparable risks. With respect to distressed securities, the sale decision reflects management's judgment that the risk-discounted anticipated ultimate recovery is less than the value achievable on sale.

The valuation of invested assets involves obtaining a market value for each security. The source for the market value is generally from market exchanges or dealer quotations, with the exception of nontraded securities.

AIG periodically evaluates its securities for other-than-temporary impairments in valuation. As a matter of policy,

Table of Contents

American International Group, Inc. and Subsidiaries

the determination that a security has incurred an other-than-temporary decline in value and the amount of any loss recognition requires the judgment of AIG's management and a continual review of its investments.

In general, a security is considered a candidate for other-than-temporary impairment if it meets any of the following criteria:

Trading at a significant (25 percent or more) discount to par or amortized cost (if lower) for an extended period of time (nine months or longer);

The occurrence of a discrete credit event resulting in (i) the issuer defaulting on a material outstanding obligation; or (ii) the issuer seeking protection from creditors under the bankruptcy laws or any similar laws intended for the court supervised reorganization of insolvent enterprises; or (iii) the issuer proposing a voluntary reorganization pursuant to which creditors are asked to exchange their claims for cash or securities having a fair value substantially lower than par value of their claims; or

In the opinion of AIG's management, it is probable that AIG may not realize a full recovery on its investment, irrespective of the occurrence of one of the foregoing events.

At each balance sheet date, AIG evaluates its securities holdings in an unrealized loss position. Where AIG does not intend to hold such securities until they have fully recovered their carrying value based on the circumstances present at the date of evaluation, AIG records the unrealized loss in income. If events or circumstances change, such as unexpected changes in creditworthiness of the obligor, general interest rate environment, tax circumstances, liquidity events, and statutory capital management considerations among others, AIG revisits its intent to determine if a loss should be recorded in income. Further, if a loss is recognized from a sale subsequent to a balance sheet date pursuant to these changes in circumstances, the loss is recognized in the period in which the intent to hold the securities to recovery no longer exists.

Once a security has been identified as other-than-temporarily impaired, the amount of such impairment is determined by reference to that security's contemporaneous market price and recorded as a charge to earnings.

As a result of these policies, AIG recorded, in realized capital gains (losses), other-than-temporary impairment pre-tax losses of \$170 million and \$184 million for the three-month periods ended September 30, 2006 and 2005, respectively, and \$766 million and \$384 million for the nine-month periods ended September 30, 2006 and 2005, respectively.

No impairment charge with respect to any one single credit was significant to AIG's consolidated financial condition or results of operations, and no individual impairment loss exceeded 1.0 percent of consolidated net income for the first nine months of 2006.

Excluding the other-than-temporary impairments noted above, the changes in market value for AIG's available for sale portfolio, which constitutes the vast majority of AIG's investments, were recorded in accumulated other comprehensive income as unrealized gains or losses, net of tax.

At September 30, 2006, the fair value of AIG's fixed maturities and equity securities aggregated \$431.3 billion. At September 30, 2006, aggregate unrealized gains after taxes for fixed maturity and equity securities were \$8.9 billion. At September 30, 2006, the aggregate unrealized losses after taxes of fixed maturity and equity securities were approximately \$2.9 billion.

The effect on net income of unrealized losses after taxes will be further mitigated upon realization, because certain realized losses will be charged to participating policyholder accounts, or realization will result in current decreases in the amortization of certain deferred policy acquisition costs.

At September 30, 2006, unrealized losses for fixed maturity securities and equity securities did not reflect any significant industry concentrations.

The amortized cost of fixed maturities available for sale in an unrealized loss position at September 30, 2006, by contractual maturity, is shown below:

<i>(in millions)</i>	Amortized Cost
Due in one year or less	\$ 4,734
Due after one year through five years	30,234
Due after five years through ten years	56,708
Due after ten years	64,918
Total	\$ 156,594

In the nine months ended September 30, 2006, the pretax realized losses incurred with respect to the sale of fixed maturities and equity securities were \$1.1 billion. The aggregate fair value of securities sold was \$34 billion, which was approximately 97 percent of amortized cost. The average period of time that securities sold at a loss during the nine months ended September 30, 2006 were trading continuously at a price below book value was approximately four months.

Table of Contents

American International Group, Inc. and Subsidiaries

At September 30, 2006, aggregate pretax unrealized gains were \$13.71 billion, while the pretax unrealized losses with respect to investment grade bonds, non-investment grade bonds and equity securities were \$4.0 billion, \$115 million and \$281 million, respectively. Aging of the pretax unrealized losses with respect to these securities, distributed as a percentage of cost relative to unrealized loss (the extent by which the market value is less than amortized cost or cost), including the number of respective items, was as follows:

Aging (dollars in millions)	Less than or equal to 20% of Cost ^(a)			Greater than 20% to 50% of Cost ^(a)			Greater than 50% of Cost ^(a)			Total

(a) For bonds, represents amortized cost.

(b) As more fully described above, upon realization, certain realized losses will be charged to participating policyholder accounts, or realization will result in a current decrease in the amortization of certain deferred policy acquisition costs.

As stated previously, the valuation for AIG's investment portfolio comes from market exchanges or dealer quotations, with the exception of nontraded securities. AIG considers nontraded securities to mean certain fixed income investments, certain structured securities, direct private equities, limited partnerships and hedge funds. The aggregate carrying value of these securities at September 30, 2006 was approximately \$70 billion.

The methodology used to estimate fair value of nontraded fixed income investments is by reference to traded securities with similar attributes and using a matrix pricing methodology. This technique takes into account such factors as the industry, the security's rating and tenor, its coupon rate, its position in the capital structure of the issuer, and other relevant factors. The change in fair value is recognized as a component of accumulated other comprehensive income, net of tax.

For certain structured securities, the carrying value is based on an estimate of the security's future cash flows pursuant to the requirements of Emerging Issues Task Force Issue No. 99-20, Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets. The change in carrying value is recognized in income.

Hedge funds and limited partnerships in which AIG holds in the aggregate less than a five percent interest are reported at fair value. The change in fair value is recognized as a component of accumulated other comprehensive income, net of tax.

With respect to hedge funds and limited partnerships in which AIG holds in the aggregate a five percent or greater interest, AIG uses the equity method to record these investments. The changes in such net asset values are recorded in income.

AIG obtains the fair value of its investments in limited partnerships and hedge funds from information provided by the general partner or manager of each of these investments, the accounts of which are generally audited on an annual basis.

Table of Contents

American International Group, Inc. and Subsidiaries

Each of these investment categories is regularly tested to determine if impairment in value exists. Various valuation techniques are used with respect to each category in this determination.

Financial Services Operations

AIG's Financial Services subsidiaries engage in diversified activities including aircraft and equipment leasing, capital markets transactions, consumer finance and insurance premium financing.

Aircraft Finance

AIG's Aircraft Finance represents the operations of ILFC, which generates its revenues primarily from leasing new and used commercial jet aircraft to domestic and foreign airlines. Revenues also result from the remarketing of commercial jets for its own account, and remarketing and fleet management for airlines and financial institutions.

ILFC finances its purchases of aircraft primarily through the issuance of a variety of debt instruments. The composite borrowing rates at September 30, 2006 and 2005 were 5.14 percent and 4.43 percent, respectively. The composite borrowing rates do not reflect the benefit of hedging ILFC's floating rate and foreign currency denominated debt. ILFC hedges these exposures using interest rate and foreign currency derivatives. These derivatives are effective economic hedges; however, since hedge accounting under FAS 133 is not applied, the benefits of using derivatives to hedge these exposures is not reflected in ILFC's borrowing rates. (See also the discussions under Capital Resources and Liquidity herein.)

ILFC's sources of revenue are principally from scheduled and charter airlines and companies associated with the airline industry. The airline industry is sensitive to changes in economic conditions, cyclical and highly competitive. Airlines and related companies may be affected by political or economic instability, terrorist activities, changes in national policy, competitive pressures on certain air carriers, fuel prices and shortages, labor stoppages, insurance costs, recessions, world health issues and other political or economic events adversely affecting world or regional trading markets.

For a discussion of ILFC's potential exposure to airframe and engine manufacturers, see Risk Factors in Item 1A. of Part II of this Quarterly Report.

ILFC is exposed to operating loss and liquidity strain through nonperformance of aircraft lessees, through owning aircraft which it would be unable to sell or re-lease at acceptable rates at lease expiration and, in part, through committing to purchase aircraft which it would be unable to lease.

ILFC's revenues and income may be adversely affected by the volatile competitive environment in which its customers operate. ILFC manages the risk of nonperformance by its lessees with security deposit requirements, repossession rights, overhaul requirements, and close monitoring industry conditions through its marketing force. However, there can be no assurance that ILFC would be able to successfully manage the risks relating to the effect of possible future deterioration in the airline industry. Approximately 90 percent of ILFC's fleet is leased to non-U.S. carriers, and the fleet, comprised of the most efficient aircraft in the airline industry, continues to be in high demand from such carriers.

ILFC typically contracts to re-lease aircraft before the end of the existing lease term. For aircraft returned before the end of the lease term, ILFC has generally been able to re-lease such aircraft within two to six months of its return. As a lessor, ILFC considers an aircraft idle or off lease when the aircraft is not subject to a signed lease agreement or signed letter of intent. ILFC had one aircraft off lease at September 30, 2006, and all new aircraft, but one, scheduled for delivery through 2007 have been leased. (See also the discussions under Capital Resources and Liquidity herein.)

Management formally reviews regularly, and no less frequently than quarterly, issues affecting ILFC's fleet, including events and circumstances that may cause impairment of aircraft values. Management evaluates aircraft in the fleet as necessary, based on these events and circumstances in accordance with Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (FAS 144). ILFC has not recognized any impairment related to its fleet. ILFC has been able to re-lease the aircraft without diminution in lease rates that would result in an impairment under FAS 144. (See also the discussions under Liquidity herein.)

Capital Markets

Capital Markets represents the operations of AIGFP, which engages as principal in a wide variety of financial transactions, including standard and customized financial products involving commodities, credit, currencies, energy,

equities and rates. AIGFP also invests in a diversified portfolio of securities and engages in borrowing activities involving issuing standard and structured notes and other securities, and entering into guaranteed investment agreements (GIAs).

As Capital Markets is a transaction-oriented operation, current and past revenues and operating results may not provide a basis for predicting future performance. AIG's Capital Markets operations derive substantially all their revenues from hedged financial positions entered in connection with counterparty transactions rather than from speculative transactions. AIGFP also participates as a dealer in a wide variety of financial derivatives transactions. AIGFP economically hedges the market risks arising from its transactions, although hedge accounting under FAS 133 is not currently being applied to any of the derivatives and related assets and

Table of Contents

American International Group, Inc. and Subsidiaries

liabilities. Accordingly, revenues and operating income are exposed to volatility resulting from differences in the timing of revenue recognition between the derivatives and the hedged assets and liabilities. Revenues and operating income of the Capital Markets operations and the percentage change in these amounts for any given period are also significantly affected by the number, size and profitability of transactions entered into by these subsidiaries during that period relative to those entered into during the prior period. Generally, the realization of transaction revenues as measured by the receipt of funds is not a significant reporting event as the gain or loss on AIGFP's trading transactions is currently reflected in operating income as the fair values change from period to period.

A significant majority of AIG's financial derivative transactions are conducted by the Capital Markets operations. Capital Markets enters into derivative transactions to hedge the interest rate and foreign currency exposures associated with its available for sale assets and borrowings. Although the derivatives entered into to hedge its outstanding transactions and positions are highly effective economic hedges, AIG did not meet the requirements for hedge accounting under FAS 133.

Derivative transactions are entered into in the ordinary course of Capital Markets operations. Income on derivatives is recorded at fair value, determined by reference to the mark to market value of the derivative or their estimated fair value where market prices are not readily available. The resulting aggregate unrealized gains or losses from the derivatives are reflected in the income statement. Where Capital Markets cannot verify significant model inputs to observable market data and verify the model value to market transactions, Capital Markets values the contract at the transaction price at inception and, consequently, records no initial gain or loss in accordance with Emerging Issues Task Force Issue No. 02-03, *Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities* (EITF 02-03). Such initial gain or loss is recognized over the life of the transaction. Capital Markets periodically reevaluates its revenue recognition under EITF 02-03 based on the observability of market parameters. The mark to fair value of derivative transactions is reflected in the balance sheet in the captions *Unrealized gain on swaps, options and forward transactions* and *Unrealized loss on swaps, options and forward transactions*.

Unrealized gains represent the present value of the aggregate of each net receivable, by counterparty, and the unrealized losses represent the present value of the aggregate of each net payable, by counterparty, as of September 30, 2006. These amounts will change from one period to the next due to changes in interest rates, currency rates, equity and commodity prices and other market variables, as well as cash movements, execution of new transactions and the maturing of existing transactions. (See also the discussion under *Derivatives* herein.)

Spread income on investments and borrowings is recorded on an accrual basis over the life of the transaction. Investments are classified as securities available for sale and are marked to market with the resulting unrealized gains or losses reflected in accumulated other comprehensive income. U.S. dollar denominated borrowings are carried at cost, while borrowings in any currency other than the U.S. dollar result in unrealized foreign exchange gains or losses reported in income. AIGFP hedges the economic exposure on its investments and borrowings on a portfolio basis using derivatives and other financial instruments. While these hedges are highly effective economic hedges, they do not qualify for hedge accounting treatment under FAS 133. The change in the fair value of the derivatives used to hedge these economic exposures is therefore included in Other income, while the offsetting change in fair value of the hedged investments and borrowings is not recognized in earnings.

To the extent the Financial Services subsidiaries, other than AIGFP, use derivatives to economically hedge their assets or liabilities with respect to their future cash flows, and such hedges do not qualify for hedge accounting treatment under FAS 133, the changes in fair value of such derivatives are recorded in realized capital gains (losses) or other revenues. Amounts recorded in realized capital gains (losses) are reported as part of the Other category.

Consumer Finance

Domestically, AIG's Consumer Finance operations are principally conducted through American General Finance, Inc. (AGF). AGF derives a substantial portion of its revenues from finance charges assessed on outstanding real estate loans, secured and unsecured non-real estate loans and retail sales finance receivables. The real estate loans include first or second mortgages on residential real estate generally having a maximum term of 360 months, and are considered non-conforming. These loans may be closed-end accounts or open-end home equity lines of credit and may

be fixed-rate or adjustable rate products. The non-real estate loans are secured by consumer goods, automobiles, or other personal property or are unsecured. Both secured and unsecured non-real estate loans generally have a maximum term of 60 months. The core of AGF's originations is sourced through its branches. However, a significant volume of real estate loans is also originated through broker relationships, and to lesser extents, through correspondent relationships and direct mail solicitations. In the first quarter of 2006, two wholly-owned subsidiaries of AGF discontinued originating real estate loans through an arrangement with AIG Federal Savings Bank, a federally chartered thrift, and began originating such loans under their own state licenses.

Many of AGF's borrowers are non-prime or sub-prime. Current economic conditions, such as interest rate and employment levels, have a direct effect on the borrowers' ability to repay these loans. AGF manages the credit risk inherent in

Table of Contents

American International Group, Inc. and Subsidiaries

its portfolio by using credit scoring models at the time of credit applications, established underwriting criteria, and in certain cases, individual loan reviews. AGF's Credit Strategy and Policy Committee monitors the quality of the finance receivables portfolio monthly when determining the appropriate level of the allowance for losses. The Credit Strategy and Policy Committee bases its conclusions on quantitative analyses, qualitative factors, current economic conditions and trends, and each committee member's experience in the consumer finance industry. Through the first nine months of 2006, the credit quality of AGF's finance receivables continues to be strong. However, declines in the strength of the U.S. housing market or economy may adversely affect the future credit quality of these receivables.

Internationally, AIG's Consumer Finance operations are principally conducted through AIG Consumer Finance Group Inc. (CFG). CFG operates primarily in emerging and developing markets. CFG has operations in Hong Kong, Taiwan, the Philippines, Thailand, China, Poland, Argentina, and Mexico. While products vary by market, the businesses generally provide credit cards, unsecured and secured non-real estate loans, term deposits, savings accounts, retail sales finance and real estate loans. CFG originates finance receivables through its branches and direct solicitation. CFG also originates finance receivables indirectly through relationships with retailers, auto dealers, and independent agents.

Consumer Finance operations are exposed to loss when contractual payments are not received. Credit loss exposure is managed through a combination of underwriting controls, mix of finance receivables, collateral and collection efficiency.

CFG monitors the quality of its finance receivable portfolio through a combination of a monthly Credit Review and quarterly Credit Reserve Committee review when determining the appropriate level of the allowance for losses. The Credit Reserve Committee bases its conclusions on quantitative analysis, qualitative factors, current economic conditions and trends, political and regulatory implications, competition, and the judgment of the committee's members. As a result of such a review and in light of industry-wide deteriorating credit conditions and tightening of overall consumer credit, the aggregate allowance for losses in AIG Credit Card Company (Taiwan) was increased by \$88 million in the first quarter of 2006 to \$130 million at March 31, 2006. The remaining balance, net of write-offs during the second and third quarters, is approximately \$69 million at September 30, 2006. This balance, representing approximately 14 percent of CFG's outstanding credit card receivables for Taiwan, continues to be CFG's best estimate of the overall exposure and hence no additional increases to the allowance for losses were deemed necessary at September 30, 2006. The results of AIG Credit Card Company (Taiwan) are shared equally by the Financial Services and Life Insurance & Retirement Services segments.

Financial Services Results

Financial Services operations for the three and nine- month periods ended September 30, 2006 and 2005 were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
<i>(in millions)</i>	2006	2005	2006	2005
Revenues ^(a) :				
Aircraft Finance ^(b)	\$ 1,060	\$ 943	\$ 3,067	\$ 2,661
Capital Markets ^{(c)(d)}	1,118	23	30	2,754
Consumer Finance ^(e)	970	940	2,833	2,664
Other	39	20	98	61
Total	\$ 3,187	\$ 1,926	\$ 6,028	\$ 8,140
Operating income (loss) ^(a) :				

Aircraft Finance	\$ 157	\$ 165	\$ 475	\$ 476
Capital Markets ^(d)	965	(150)	(457)	2,306
Consumer Finance ^{(f)(g)}	220	190	594	649
Other, including intercompany adjustments	15	19	38	52
Total	\$ 1,357	\$ 224	\$ 650	\$ 3,483

(a) Includes the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses. For the three and nine-month periods ended September 30, 2005, the effect was \$(10) million and \$(59) million, respectively, in operating income for Aircraft Finance. During 2006, Aircraft Finance derivative gains and losses are reported as part of the Other category, and not reported in Aircraft Finance operating income. For the three-month periods ended September 30, 2006 and 2005, the effect was \$783 million and \$(365) million in both revenues and operating income, respectively, for Capital Markets. For the nine-month periods ended September 30, 2006 and 2005, the effect was \$(1.06) billion and \$1.80 billion in both revenues and operating income for Capital Markets. These amounts result primarily from interest rate and foreign currency derivatives which are hedging available for sale securities and borrowings.

(b) Revenues are primarily aircraft lease rentals from ILFC.

(c) Revenues, shown net of interest expense, are primarily from hedged financial positions entered into in connection with counterparty transactions and the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133 described in (a) above.

(d) Certain transactions entered into by AIGFP generate tax credits and benefits which are included in income taxes in the consolidated statement of income. The amount of such tax credits and benefits for the three-month periods ended September 30, 2006 and 2005 are \$3 million and \$23 million, respectively. The amount of such tax credits and benefits for the nine-month periods ended September 30, 2006 and 2005 are \$29 million and \$63 million, respectively.

(e) Revenues are primarily finance charges.

(f) Includes \$44 million in additional allowances for losses recorded in the first quarter of 2006 from AIG Credit Card Company (Taiwan).

(g) Includes catastrophe related losses of \$62 million recorded in the third quarter of 2005 resulting from hurricane Katrina, which were reduced by \$22 million in the third quarter of 2006.

Financial Services operating income increased in the third quarter and decreased in the first nine months of 2006 compared to the same periods of 2005 due primarily to the effect of hedging activities that do not qualify for hedge accounting under FAS 133.

Table of Contents

American International Group, Inc. and Subsidiaries

Quarterly Aircraft Finance Results

ILFC's operating income decreased slightly in the third quarter of 2006 compared to the same period of 2005. Rental revenues increased by \$120 million or 13 percent driven by a larger aircraft fleet. At September 30, 2006, ILFC had 818 aircraft subject to operating leases compared to 734 aircraft at September 30, 2005. The increase in rental revenues was more than offset by increases in depreciation and interest expense. Depreciation expense increased by \$47 million or 13 percent in line with the increase in the size of aircraft fleet. Interest expense increased by \$91 million or 30 percent driven by the rising cost of funds and additional borrowings to fund aircraft purchases. ILFC's interest expense does not reflect the benefit of hedging ILFC's floating rate and foreign currency denominated debt, ILFC hedges these exposures using interest rate and foreign currency derivatives. These derivatives are effective economic hedges. Since hedge accounting under FAS 133 is not applied, the benefits of using derivatives to hedge these exposures is not reflected in its borrowing rates.

Year-to-date Aircraft Finance Results

ILFC's operating income remained relatively stable in the first nine months of 2006 compared to the same period of 2005. Rental revenues increased by \$392 million or 15 percent driven by a larger aircraft fleet and increased utilization. The increase in rental revenues was offset by increases in depreciation, interest expense, charges related to bankrupt airlines as well as the settlement of a tax dispute in Australia related to the restructuring of ownership of aircraft. Depreciation expense increased by \$134 million or 13 percent in line with the increase in the size of aircraft fleet. Interest expense increased by \$166 million or 19 percent driven by rising cost of funds and additional borrowings funding aircraft purchases. As discussed above, ILFC's interest expense does not reflect the benefit of hedging ILFC's floating rate and foreign currency denominated debt.

Quarterly Capital Markets Results

Capital Markets operating income in the third quarter of 2006 increased by \$1.12 billion compared to the same period of 2005 primarily due to a gain related to derivatives not qualifying for hedge accounting treatment of \$783 million in the current quarter compared to a loss of \$365 million in the comparable period last year. A large part of the net gain on AIGFP's derivatives recognized in the third quarter of 2006 was due to the decrease in long term U.S. interest rates which increased the fair value of AIGFP's derivatives hedging its assets and liabilities. The performance of the U.S. dollar against other currencies in the third quarter of 2006 did not have a significant effect on the fair value of the derivatives hedging AIGFP's assets and liabilities. The majority of the net loss on AIGFP's derivatives in the third quarter of 2005 was due to rising long term interest rates, which decreased the fair value of AIGFP's derivatives hedging its assets and liabilities. This net loss was slightly offset by the strengthening of the U.S. dollar primarily against the Euro and British Pound, which increased the fair value of the foreign currency derivatives hedging available for sale securities.

Financial market conditions in the third quarter of 2006 were characterized by lower levels of interest rates globally, unchanged credit spreads and higher equity valuations. The increase in Capital Markets operating income for the third quarter of 2006 was principally due to gains on derivatives not qualifying for hedge accounting under FAS 133. AIGFP's transaction flow in credit, commodity and equity products improved during the third quarter of 2006 compared to the third quarter of 2005, although this was more than offset by reduced revenues from other product groups.

The most significant component of Capital Markets operating expenses is compensation, which was approximately \$115 million and \$138 million in the third quarter of 2006 and 2005, respectively. The amount of compensation was not affected by gains and losses not qualifying for hedge accounting treatment under FAS 133.

AIG elected to early adopt FAS 155 in 2006 and, accordingly, AIGFP has elected to account for a significant majority of its hybrid financial instruments at fair value. The change in fair value of these hybrid financial instruments is included in operating income. AIGFP economically hedges these hybrid financial instruments with other derivative positions with third parties. The change in fair value of these positions is reflected in operating income. The net effect of these hybrid financial instruments and the derivatives economically hedging these instruments had a minimal effect on AIGFP's operating income for the third quarter of 2006.

Year-to-date Capital Markets Results

Capital Markets operating income in the nine month period ended September 30, 2006 decreased by \$2.76 billion compared to the same period of 2005. Improved results, primarily from increased transaction flow in AIGFP's credit, commodity index and equity products, were more than offset by the loss resulting from the effect of derivatives not qualifying for hedge accounting treatment of \$1.06 billion in the current period compared to a gain of \$1.80 billion in the comparable period last year, a decrease of \$2.86 billion. A large part of the net loss on AIGFP's derivatives recognized in the first nine months of 2006 was due to the weakening of the U.S. dollar, primarily against the British Pound and Euro, resulting in a decrease in the fair value of the foreign currency derivatives hedging AIGFP's available for sale securities. The majority of the net gain on AIGFP's derivatives in the first nine months of 2005 was due to the strengthening of the U.S. dollar, primarily against the British Pound and Euro, which increased the fair value of the foreign currency derivatives hedging available for sale securities. To a lesser extent, the net gain in 2005 was due to the decrease in long term U.S. interest rates which

Table of Contents

American International Group, Inc. and Subsidiaries

increased the fair value of derivatives hedging AIGFP's assets and liabilities.

Financial market conditions in the first nine months of 2006 were characterized by a general flattening of interest rate yield curves across fixed income markets globally, tightening of credit spreads and equity valuations that were higher.

The compensation expense of Capital Markets was approximately \$380 million and \$359 million in the first nine months of 2006 and 2005, respectively. The amount of compensation was not affected by gains and losses not qualifying for hedge accounting treatment under FAS 133.

As a result of AIG's early adoption of FAS 155, AIGFP elected to apply the fair value option to its structured notes and other financial liabilities containing embedded derivatives outstanding as of January 1, 2006. The cumulative effect from the adoption of FAS 155 on these instruments at January 1, 2006 was a loss of approximately \$29 million pre-tax.

The application of the fair value option to these hybrid financial instruments did not have a significant effect on AIGFP's operating income for the first nine months of 2006.

Quarterly Consumer Finance Results

Consumer Finance operating income increased in the third quarter of 2006 compared to the same period of 2005 in the domestic operations and decreased slightly in foreign operations.

Domestically, the relatively low interest rate environment throughout 2005 contributed to a high level of mortgage refinancing activity. AGF's average net finance receivables increased 5 percent in the third quarter of 2006 when compared to the same period in 2005. However, net originations and purchases of finance receivables in AGF's centralized real estate business segment decreased in the third quarter of 2006 compared to the same period in 2005 primarily caused by a less robust U.S. housing market. The increase in AGF's revenues that principally resulted from portfolio growth was offset by higher interest expense and depressed whole loan sale prices resulting from a flattened yield curve. Both short-term and long-term market interest rates continued to increase significantly over the past year. AGF's short-term borrowing costs were 5.38 percent in the third quarter of 2006 compared to 3.96 percent in the third quarter of 2005. AGF's long-term borrowing costs were 5.09 percent in the third quarter of 2006 compared to 4.47 percent in the third quarter of 2005. Despite high energy costs, the U.S. economy continued to expand during the third quarter of 2006, improving consumer credit quality compared to the third quarter of 2005. AGF's charge-off ratio improved 17 basis points in the third quarter of 2006 when compared to the same period in 2005.

AGF's results included catastrophe related losses of \$62 million in the third quarter of 2005 resulting from hurricane Katrina. However, after a reassessment of payment and charge-off experience during the past year, AGF reduced the reserve by \$22 million in the third quarter of 2006. At September 30, 2006, AGF's allowance ratio was 1.99 percent compared to 2.24 percent at September 30, 2005.

Revenues from foreign consumer finance operations increased by approximately 15 percent in the third quarter of 2006 compared to the same period in 2005. Loan growth was the primary driver behind higher revenues in 2006. Higher revenues were offset by higher loan loss provisions due to loan growth and higher operating expenses in connection with expansion of distribution channels and new product promotions, resulting in slightly lower operating income for the third quarter of 2006 compared to the same period in 2005.

Year-to-date Consumer Finance Results

Consumer Finance operating income decreased in the first nine months of 2006 compared to the same period of 2005. The domestic operations remain essentially unchanged year over year while the foreign operations decreased primarily due to the credit deterioration in the Taiwan credit card market.

Domestically, the relatively low interest rate environment throughout 2005 contributed to a high level of mortgage refinancing activity. AGF's average net finance receivables increased 9 percent in the first nine months of 2006 when compared to the same period in 2005. However, net originations and purchases of finance receivables in AGF's centralized real estate business decreased in the first nine months of 2006 compared to the same period in 2005 primarily caused by a less robust U.S. housing market. The increase in AGF's revenues that principally resulted from portfolio growth was offset by higher interest expense and depressed whole loan sale prices resulting from a flattened yield curve. AGF's short-term borrowing costs were 5.06 percent in the first nine months of 2006 compared to

3.47 percent in the same period in 2005. AGF's long-term borrowing costs were 4.97 percent in the first nine months of 2006 compared to 4.36 percent in the same period in 2005. Despite high energy costs, the U.S. economy continued to expand during the first nine months of 2006, improving consumer credit quality. AGF's charge-off ratio improved 25 basis points in the first nine months of 2006 when compared to the same period in 2005. AGF's delinquency ratio at September 30, 2006 remained the same when compared to September 30, 2005. At September 30, 2006, AGF's allowance ratio was 1.99 percent compared to 2.24 percent at September 30, 2005.

During the third quarter of 2006, AGF reassessed the adequacy of the reserve established in September 2005 resulting from hurricane Katrina as discussed above.

Table of Contents

American International Group, Inc. and Subsidiaries

Revenues from the foreign consumer finance operations increased by approximately 20 percent in the first nine months of 2006 compared to the same period in 2005. Loan growth was the primary driver behind higher revenues. Higher revenues were more than offset by increases in the allowance for losses related to industry-wide credit deterioration in the Taiwan credit card market, increased cost of funds, and higher operating expenses in connection with expansion of distribution channels and new product promotions, resulting in a lower operating income for the first nine months of 2006 compared to the same period in 2005.

Financial Services Invested Assets

The following table is a summary of the composition of AIG's Financial Services invested assets at September 30, 2006 and December 31, 2005. (See also the discussions under Operating Review: Financial Services Operations, Capital Resources and Derivatives herein.)

	2006		2005	
(dollars in millions)	Invested Assets	Percent of Total	Invested Assets	Percent of Total
Fixed maturities:				
Bonds available for sale, at market value	\$ 1,336	0.8%	\$ 1,307	0.9%
Equity securities:				
Preferred stocks available for sale, at market value	5		10	
Mortgage loans on real estate, net of allowance	92		71	
Policy loans	2		2	
Collateral and guaranteed loans, net of allowance	2,152	1.3	1,719	1.2
Financial services assets:				
Flight equipment primarily under operating leases, net of accumulated depreciation	39,460	22.9	36,245	24.1
Securities available for sale, at market value	41,232	24.0	37,511	24.9
Trading securities, at market value	5,822	3.4	6,499	4.3
Spot commodities	118	0.1	92	0.1
Unrealized gain on swaps, options and forward transactions	20,235	11.8	18,695	12.4
Trading assets	2,194	1.3	1,204	0.8
Securities purchased under agreements to resell, at contract value	27,041	15.7	14,519	9.7
Finance receivables, net of allowance	28,634	16.7	27,995	18.6
Securities lending collateral, at market value	76			
Other invested assets	1,934	1.1	2,751	1.9
Short-term investments, at cost	1,306	0.7	1,382	0.9
Cash	279	0.2	331	0.2
Investment income due and accrued	22		18	
Real estate, net of accumulated depreciation	24		24	
Total	\$ 171,964	100.0%	\$ 150,375	100.0%

As previously discussed, the cash used for the purchase of flight equipment is derived primarily from the proceeds of ILFC's debt financings. The primary sources for the repayment of this debt and the interest thereon are the cash flow from operations, proceeds from the sale of flight equipment and the rollover and refinancing of the prior debt. During

the first nine months of 2006, ILFC acquired flight equipment costing \$4.86 billion. (See also the discussion under Operating Review: Financial Services Operations and Capital Resources herein.)

At September 30, 2006, ILFC had committed to purchase 268 new aircraft deliverable from 2006 through 2015 at an estimated aggregate purchase price of \$19.2 billion and had options to purchase three new aircraft at an estimated aggregate purchase price of \$453 million. As of September 30, 2006, ILFC has entered into leases for all, but one, of the new aircraft scheduled for delivery through 2007. ILFC will be required to find customers for any aircraft currently on order and any aircraft to be ordered, and it must arrange financing for portions of the purchase price of such equipment. ILFC has been successful to date both in placing its new aircraft on lease or under sales contract and obtaining adequate financing, but there can be no assurance that such success will continue in future environments.

Table of Contents

American International Group, Inc. and Subsidiaries

AIG's Consumer Finance operations provide a wide variety of consumer finance products, including real estate loans, credit card loans, non-real estate loans, retail sales finance and credit-related insurance to customers both domestically and overseas, particularly in emerging markets. These products are funded through a combination of deposits and various borrowings including commercial paper and medium term notes. AIG's Consumer Finance operations are exposed to credit risk and risk of loss resulting from adverse fluctuations in interest rates. Over half of the finance receivables are real estate loans which are substantially collateralized by the related properties.

With respect to credit losses, the allowance for losses is maintained at a level considered adequate to absorb anticipated credit losses existing in that portfolio as of the balance sheet date.

Capital Markets derivative transactions are carried at market value or at estimated fair value when market prices are not readily available. AIGFP reduces its economic risk exposure through similarly valued offsetting transactions including swaps, trading securities, options, forwards and futures. The estimated fair values of these transactions represent assessments of the present value of expected future cash flows. These transactions are exposed to liquidity risk if AIGFP were required to sell or close out the transactions prior to maturity. AIG believes that the effect of any such event would not be significant to AIG's financial condition or its overall liquidity. (See also the discussion under

Operating Review: Financial Services Operations and Derivatives herein.)

AIGFP uses the proceeds from the issuance of notes and bonds and GIAs to invest in a diversified portfolio of securities, including securities available for sale, at market, and derivative transactions. The funds may also be invested in securities purchased under agreements to resell. The proceeds from the disposal of the aforementioned securities available for sale and securities purchased under agreements to resell are used to fund the maturing GIAs or other AIGFP financings, or invest in new assets. (See also the discussion under Capital Resources herein.)

Securities available for sale is predominantly a diversified portfolio of high grade fixed income securities, where the individual securities have varying degrees of credit risk. At September 30, 2006, the average credit rating of this portfolio was in the AA category or the equivalent thereto as determined through rating agencies or internal review. AIGFP has also entered into credit derivative transactions to economically hedge its credit risk associated with \$128 million of these securities. Securities deemed below investment grade at September 30, 2006 amounted to approximately \$259 million in fair value representing 0.6 percent of the total AIGFP securities available for sale. There have been no significant downgrades through September 30, 2006. If its securities available for sale portfolio were to suffer significant default and the collateral held declined significantly in value with no replacement or the credit default swap counterparty failed to perform, AIGFP could have a liquidity strain. AIG guarantees AIGFP's payment obligations, including its debt obligations.

AIGFP's risk management objective is to minimize interest rate, currency, commodity and equity risks associated with its securities available for sale. That is, when AIGFP purchases a security for its securities available for sale investment portfolio, it simultaneously enters into an offsetting internal hedge such that the payment terms of the hedging transaction offset the payment terms of the investment security, which achieves the economic result of converting the return on the underlying security to U.S. dollar LIBOR plus or minus a spread based on the underlying profit on each security on the initial trade date. The market risk associated with such internal hedges is managed on a portfolio basis, with third-party hedging transactions executed as necessary. As hedge accounting treatment is not achieved in accordance with FAS 133, the unrealized gains and losses on the derivative transactions with unaffiliated third parties are reflected in operating income, whereas the unrealized gains and losses on the underlying securities available for sale resulting from changes in interest rates, currency rates, commodity and equity prices, are recorded in accumulated other comprehensive income. When a security is sold, the realized gain or loss with respect to this security is then recorded in operating income.

Securities purchased under agreements to resell are treated as collateralized financing transactions. AIGFP takes possession of or obtains a security interest in securities purchased under agreements to resell.

AIGFP owns inventories in certain commodities in which it trades, and may reduce the exposure to market risk through the use of swaps, forwards, futures and option contracts. Physical commodities held in AIGFP's wholly-owned broker dealer subsidiary are recorded at market value. All other commodities are recorded at the lower of cost or market.

Trading securities, at market value, and securities and spot commodities sold but not yet purchased, at market value are marked to market daily with the unrealized gain or loss being recognized in income at that time. These trading securities are purchased and sold as necessary to meet the risk management objectives of Capital Markets operations.

Table of Contents

American International Group, Inc. and Subsidiaries

The gross unrealized gains and gross unrealized losses of Capital Markets operations included in the financial services assets and liabilities at September 30, 2006 were as follows:

<i>(in millions)</i>	Gross Unrealized Gains	Gross Unrealized Losses
Securities available for sale, at market value	\$ 749	\$ 18
Unrealized gain/ loss on swaps, options and forward transactions*	20,235	12,764

* *These amounts are also presented as the respective balance sheet amounts.*

The senior management of AIG defines the policies and establishes general operating parameters for Capital Markets operations. AIG's senior management has established various oversight committees to monitor on an ongoing basis the various financial market, operational and credit risk attendant to the Capital Markets operations. The senior management of AIGFP reports the results of its operations to and reviews future strategies with AIG's senior management.

AIG actively manages the exposures to limit potential losses, while maximizing the rewards afforded by these business opportunities. In doing so, AIG must continually manage a variety of exposures including credit, market, liquidity, operational and legal risks.

Asset Management Operations

AIG's Asset Management operations comprise a wide variety of investment-related services and investment products including institutional and retail asset management, broker dealer services and spread-based investment business from the sale of guaranteed investment contracts, also known as funding agreements (GICs). Such services and products are offered to individuals and institutions both domestically and overseas.

Asset Management Results

Asset Management revenues and operating income for the three and nine-month periods ended September 30, 2006 and 2005 were as follows:

<i>(in millions)</i>	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Revenues:				
Guaranteed investment contracts	\$ 845	\$ 908	\$ 2,517	\$ 2,707
Institutional Asset Management	265	279	1,163	776
Brokerage Services and Mutual Funds	71	67	217	192
Other	57	101	201	276
Total	\$ 1,238	\$ 1,355	\$ 4,098	\$ 3,951
Operating income:				
Guaranteed investment contracts ^(a)	\$ 175	\$ 294	\$ 635	\$ 939
Institutional Asset Management ^{(b)(c)}	89	155	721	424
Brokerage Services and Mutual Funds	23	20	67	50
Other	54	99	190	269

Total	\$ 341	\$ 568	\$ 1,613	\$ 1,682
-------	--------	--------	----------	----------

- (a) Includes the effect of hedging activities that do not qualify for hedge accounting treatment under FAS 133, including the related foreign exchange gains and losses. For the three and nine-month periods ended September 30, 2005, the effect was a gain of \$18 million and \$127 million, respectively, in operating income. During 2006, these derivative gains and losses are reported as part of the Other category, and not reported in Asset Management operating income.
- (b) Includes the full results of certain AIG managed private equity and real estate funds that are consolidated pursuant to FIN 46(R), Consolidation of Variable Interest Entities . Also includes \$(3) million and \$77 million for the three-month periods ended September 30, 2006 and 2005, respectively, and \$207 million and \$189 million for the nine-month periods ended September 30, 2006 and 2005, respectively, of third-party limited partner earnings offset in minority interest expense which is not a component of operating income.
- (c) Includes the full results of certain AIG managed partnerships that are consolidated effective January 1, 2006 pursuant to EITF 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights . For the three and nine-month periods ended September 30, 2006, operating income includes \$47 million and \$203 million, respectively, of third-party limited partner earnings offset in minority interest expense which is not a component of operating income.

Quarterly Asset Management Results

Asset Management operating income decreased 40 percent in the third quarter of 2006 compared to the same period of 2005 on revenues that declined 9 percent due to the continued run-off of GIC balances combined with spread compression in the remaining GIC portfolio. The spread compression has occurred due to an increase in the cost of funds in the short-term floating rate portion of the GIC portfolio, only partially offset by increased investment income from the floating rate assets backing the portfolio.

Table of Contents

American International Group, Inc. and Subsidiaries

Operating income in the third quarter of 2006 also declined from the year-ago quarter due to lower transaction-driven revenues that were partially offset by growth in asset-based management fees within Institutional Asset Management.

The GIC portfolio continues to run-off. The MIP has replaced the GIC program as AIG's principal spread-based investment activity. Although the MIP is beginning to show positive operating income, because the asset mix under the MIP does not include the alternative investments utilized in the GIC program, AIG does not expect that the income growth in the MIP will offset the run-off in the GIC portfolio for the foreseeable future. A significant portion of the remaining GIC portfolio consists of floating rate obligations. AIG has entered into hedges to manage against increases in short-term interest rates. AIG continues to believe these hedges are economically effective but do not qualify for hedge accounting treatment under FAS 133. As a result, continued increases in short-term interest rates will negatively affect operating income in the segment. Realized capital gains from the hedges offset the negative trend in GIC related operating income. GIC revenues include income from Sun America partnerships supporting the GIC line of business and are significantly affected by performance in the equity markets. Thus, revenues, operating income and cash flow attributable to GICs will vary among reporting periods.

The MIP was initially launched in the Euromarkets in September 2005 through AIG's \$10 billion Euro medium term note program. Through September 30, 2006, AIG has issued the equivalent of \$3.3 billion for the MIP in the Euro, U.S. Rule 144A and U.S. public markets.

The revenues and operating income for this segment are largely affected by the general conditions in the equity and credit markets. Realized gains and performance fees are contingent upon various fund closings, maturity levels and market conditions, and by their nature are not predictable. Therefore, the segment's earnings may vary from period to period.

Year-to-date Asset Management Results

Asset Management revenues and operating income decreased 4 percent in the first nine months of 2006 compared to the same period of 2005 due to the decline in operating income from the GIC portfolio, reflecting the continued run-off of GIC balances, combined with spread compression in the remaining GIC portfolio. The decrease in revenues and operating income was partially offset by growth in asset management fees in Institutional Asset Management.

At September 30, 2006 and 2005, AIG's non-affiliated client assets under management, including both retail mutual funds and institutional accounts, were approximately \$70 billion and \$59 billion and the aggregate GIC reserve was \$49.2 billion and \$49.7 billion, respectively.

Other Operations

The operating income (loss) for Other operations for the three and nine-month periods ended September 30, 2006 and 2005 was as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Other <i>(in millions)</i>	2006	2005	2006	2005
Operating Income (Loss):				
Equity earnings in unconsolidated subsidiaries	\$ 48	\$ (205)	\$ 178	\$ (109)
Compensation expense SICO Plans	(14)	(63)	(104)	(130)
Compensation expense C.V. Starr tender offer			(54)	
Interest expense	(227)	(131)	(633)	(382)
Unallocated corporate expenses	(95)	(92)	(356)	(287)
Realized capital gains (losses)	(197)	175	(182)	520
Other miscellaneous, net	15	(40)	(20)	(57)

Total Other	\$ (470)	\$ (356)	\$ (1,171)	\$ (445)
-------------	----------	----------	------------	----------

Other operating loss amounted to \$470 million and \$356 million in the three-month periods ended September 30, 2006 and 2005, respectively, as interest expense increased, primarily reflecting increased borrowings by the parent holding company. The third quarter of 2006 also reflects net realized capital losses, primarily reflecting the effect of hedging activities of the Financial Services and Asset Management segments that do not qualify for hedge accounting treatment under FAS 133, partially offset by a gain in the parent company of \$86 million from the sale of AIG's investment in IPC Holdings, Ltd. These declines were partially offset by increased equity earnings in certain unconsolidated subsidiaries driven primarily by a decrease in catastrophe losses of \$246 million. The third quarter of 2006 also reflects a decrease in compensation expense with respect to the SICO Plans, and income of \$21 million resulting from a change in accounting estimate relating to a favorable resolution of a litigation matter.

Other operating loss amounted to \$1.17 billion and \$445 million in the nine-month periods ended September 30, 2006 and 2005, respectively, as interest expense increased, primarily reflecting increased borrowings by the parent holding company. The first nine months of 2006 also reflects net realized capital losses, as discussed in the preceding paragraph, and an increase in unallocated corporate expenses, reflecting expenses of \$29 million in the first nine months of 2006 relating to certain executive departures (of which approximately \$18 million related to departures in 2005), and an overall increase in corporate operating expenses primarily resulting from on-going efforts to improve internal controls at the parent holding company. Also reflected in operating loss in the first nine months of 2006 is an out of period adjustment totaling \$61 million with respect to the SICO Plans and a one-time charge related to the Starr tender offer of \$54 million, both of which were recorded in the first quarter of 2006. See also Note 4 of Notes to the Consolidated Financial Statements for further discussion. These declines

Table of Contents

American International Group, Inc. and Subsidiaries

were partially offset by increased equity earnings in certain unconsolidated subsidiaries, and income of \$21 million resulting from a change in accounting estimate, as discussed in the preceding paragraph.

Capital Resources

At September 30, 2006, AIG had total consolidated shareholders' equity of \$96.15 billion and total consolidated borrowings of \$137.1 billion. At that date, \$122.1 billion of such borrowings were either not guaranteed by AIG or were AIGFP's matched borrowings under obligations of GIAs, liabilities connected to trust preferred stock, or matched notes and bonds payable.

Borrowings

At September 30, 2006, AIG's net borrowings were \$14.98 billion after reflecting amounts that were matched borrowings under AIGFP's obligations of GIAs, matched notes and bonds payable, amounts not guaranteed by AIG and liabilities connected to trust preferred stock. The following table summarizes borrowings outstanding at September 30, 2006 and December 31, 2005:

<i>(in millions)</i>	2006	2005
AIG's net borrowings	\$ 14,982	\$ 10,425
Liabilities connected to trust preferred stock	1,399	1,391
AIG Matched Investment Program Matched notes and bonds payable	3,333

** Includes borrowings under Export Credit Facility of \$2.7 billion and \$2.6 billion, at September 30, 2006 and December 31, 2005, respectively.*

AIG intends to continue its customary practice of issuing debt securities from time to time to meet its financing needs and those of certain of its subsidiaries for general corporate purposes, as well as for a matched investment

program. In July 2006, AIG filed and had declared effective a post-effec-

Table of Contents

American International Group, Inc. and Subsidiaries

tive amendment to its universal shelf registration statement to sell up to \$25.1 billion of debt securities, preferred and common stock and other securities.

In October 2006, AIG established a medium term note program under its shelf registration statement providing for the issuance of up to \$25.1 billion of AIG debt securities, the proceeds of which may be used by either AIG or AIGFP for general corporate purposes or to fund the MIP. In October 2006, AIG issued under the program \$750 million principal amount of senior notes maturing in 2016 for AIG's general corporate purposes and an aggregate of \$1.0 billion principal amount of senior notes maturing in 2011 to fund the MIP.

On April 20, 2006, AIG sold \$1.0 billion principal amount of senior notes in a Rule 144A/Regulation S offering maturing in 2036, and on September 30, 2005, AIG sold \$1.5 billion principal amount of senior notes in a Rule 144A/Regulation S offering, of which \$500 million matures in 2010 and \$1.0 billion matures in 2015. The proceeds from these offerings were used by AIG for general corporate purposes. In August 2006, AIG completed exchange offers for these notes pursuant to which AIG issued in exchange substantially identical notes that are registered under the Securities Act.

On June 16, 2006, AIG sold \$750 million principal amount of senior, floating rate notes in a Rule 144A offering that matures in 2009. The proceeds of this offering were used to fund the MIP.

AIG has a Euro medium term note program under which an aggregate nominal amount of up to \$10.0 billion of notes may be outstanding at any one time. The program provides that additional notes may be issued to replace matured or redeemed notes. As of September 30, 2006, the equivalent of \$4.4 billion principal amount of notes were outstanding under the program, of which the proceeds from \$2.6 billion of notes were used to fund the MIP. The aggregate amount outstanding includes \$76 million resulting from foreign exchange translation into U.S. dollars, of which \$72 million relates to notes issued by AIG for general corporate purposes and \$4 million relates to notes issued to fund the MIP. AIG has hedged the currency exposure arising from foreign currency denominated notes by economically hedging that exposure, although such hedges do not qualify for hedge accounting treatment under FAS 133. In addition, in October 2006, AIG sold the equivalent of \$218 million under the program, of which \$180 million was used to fund the MIP and \$38 million was used for AIG's general corporate purposes.

In March 2006, AIG borrowed a total of \$1.3 billion on an unsecured basis pursuant to loan agreements with third-party banks, of which \$500 million matures in February 2007 but can be extended by AIG for an additional seven months and \$200 million matures in March 2007; \$600 million was repaid in September 2006.

AIGFP uses the proceeds from the issuance of notes and bonds and GIA borrowings to invest in a diversified portfolio of securities and derivative transactions. The borrowings may also be temporarily invested in securities purchased under agreements to resell. AIG guarantees the obligations of AIGFP under AIGFP's structured notes and bonds and GIA borrowings. Certain of AIGFP's notes contain embedded derivatives that are required to be accounted for separately under FAS 133. Upon AIG's early adoption of FAS 155, AIGFP has elected the fair value option for these instruments. Those notes that are accounted for using the fair value option are reported separately under hybrid financial instrument liabilities. (See also the discussions under Operating Review: Financial Services Operations, Liquidity and Derivatives herein.)

On June 16, 2006, AIGFP sold an aggregate of \$2.0 billion principal amount of senior, floating rate notes in Rule 144A offerings, of which \$1.0 billion matures in 2007 and \$1.0 billion matures in 2008. AIGFP has a Euro medium term note program under which an aggregate nominal amount of up to \$10.0 billion of notes may be outstanding at any one time. The program provides that additional notes may be issued to replace matured or redeemed notes. As of September 30, 2006, \$5.39 billion of notes were outstanding under the program, including \$283 million resulting from foreign exchange translation into U.S. dollars. Notes issued under this program are included in Notes and Bonds Payable in the preceding table of borrowings.

AIG Funding, Inc. (AIG Funding), through the issuance of commercial paper, helps fulfill the short-term cash requirements of AIG and its subsidiaries. AIG Funding intends to continue to meet AIG's funding requirements through the issuance of commercial paper guaranteed by AIG. The issuance of AIG Funding's commercial paper is subject to the approval of AIG's Board of Directors.

AIG and AIG Funding are parties to unsecured syndicated revolving credit facilities, which as of September 30, 2006, aggregated to \$3.25 billion, consisting of \$1.625 billion in a 364-day facility that expires in July of 2007 and \$1.625 billion in a five-year facility that expires in July of 2011. The 364-day facility allows for the conversion by AIG of any outstanding loans at expiration into one-year term loans. The facilities can be used for general corporate purposes and also to provide backup for AIG's commercial paper programs administered by AIG Funding. AIG expects to replace or extend these credit facilities on or prior to their expiration. There are currently no borrowings outstanding under these facilities, nor were any borrowings outstanding as of September 30, 2006.

In November 2005, AIG and AIG Funding entered into a 364-day revolving credit facility for an aggregate amount of \$3 billion, which can be drawn in the form of loans or letters of credit. The credit facility expires in November 2006 but

Table of Contents

American International Group, Inc. and Subsidiaries

allows for the issuance of letters of credit with terms of up to ten years and provides for the conversion by AIG of any outstanding loans at expiration into one-year term loans. The facility can be used for general corporate purposes, including providing backup for AIG's commercial paper programs administered by AIG Funding and obtaining letters of credit to secure obligations under insurance and reinsurance transactions. There are currently no loans outstanding under the facility, nor were any loans outstanding as of September 30, 2006. As of such dates, \$511 million was available to be drawn under the facility, with the remainder having been drawn in the form of letters of credit.

AIG is also a party to an unsecured 364-day inter-company revolving credit facility provided by certain of its subsidiaries aggregating \$2 billion that expires in October of 2007. The facility allows for the conversion of any outstanding loans at expiration into one-year term loans. The facility can be used for general corporate purposes and also to provide backup for AIG's commercial paper programs. AIG expects to replace or extend this credit facility on or prior to its expiration. There are currently no borrowings outstanding under the inter-company facility, nor were any borrowings outstanding as of September 30, 2006.

ILFC fulfills its short term cash requirements through operating cash flows and the issuance of commercial paper. The issuance of commercial paper is subject to the approval of ILFC's Board of Directors and is not guaranteed by AIG. ILFC is a party to unsecured syndicated revolving credit facilities aggregating \$6.0 billion at September 30, 2006. The facilities can be used for general corporate purposes and also to provide backup for ILFC's commercial paper program. They consist of \$2.0 billion in a 364-day revolving credit facility that expires in October 2006, with a one-year term out option, \$2.0 billion in a five-year revolving credit facility that expires in October 2009 and \$2.0 billion in a five-year revolving credit facility that expires in October 2010. Subsequent to September 30, 2006, ILFC replaced the \$2.0 billion 364-day facility with a five-year, \$2.5 billion facility expiring in October 2011. ILFC expects to replace or extend these credit facilities on or prior to their expiration. There are currently no borrowings under these facilities, nor were any borrowings outstanding as of September 30, 2006.

As a well-known seasoned issuer, ILFC has filed an automatic shelf registration statement with the SEC allowing ILFC immediate access to the U.S. public debt markets. For the nine months ended September 30, 2006, \$1.2 billion of debt securities were issued under this registration statement and \$5.8 billion were issued under a prior registration statement. In addition, ILFC has a Euro medium term note program for \$7.0 billion, under which \$4.28 billion in notes were sold through September 30, 2006. Notes issued under the Euro medium term note program are included in Notes and bonds payable in the preceding table of borrowings. The foreign exchange adjustment for the foreign currency denominated debt was \$534 million at September 30, 2006 and \$197 million at December 31, 2005. ILFC has substantially eliminated the currency exposure arising from foreign currency denominated notes by economically hedging the portion of the note exposure not already offset by Euro denominated operating lease payments, although such hedges do not qualify for hedge accounting treatment under FAS 133.

ILFC had a \$4.3 billion Export Credit Facility for use in connection with the purchase of approximately 75 aircraft delivered through 2001. This facility was guaranteed by various European Export Credit Agencies. The interest rate varies from 5.75 percent to 5.90 percent on these amortizing ten-year borrowings depending on the delivery date of the aircraft. At September 30, 2006, ILFC had \$1.0 billion outstanding under this facility. The debt is collateralized by a pledge of the shares of a subsidiary of ILFC, which holds title to the aircraft financed under the facility.

In May 2004, ILFC entered into a similarly structured Export Credit Facility for up to a maximum of \$2.64 billion for Airbus aircraft to be delivered through May 31, 2005. The facility was subsequently increased to \$3.64 billion and extended to include aircraft to be delivered through May 31, 2007. The facility becomes available as the various European Export Credit Agencies provide their guarantees for aircraft based on a six-month forward-looking calendar, and the interest rate is determined through a bid process. At September 30, 2006, ILFC had \$1.7 billion outstanding under this facility. Borrowings with respect to these facilities are included in Notes and Bonds Payable in the preceding table of borrowings.

In December of 2005, ILFC entered into two tranches of junior subordinated debentures totaling \$1.0 billion. Both mature on December 21, 2065, but each tranche has a different call option. The \$600 million tranche has a call date of December 21, 2010 and the \$400 million tranche has a call date of December 21, 2015. The debenture with the 2010 call date has a fixed interest rate of 5.90 percent for the first five years. The debenture with the 2015 call date has a

fixed interest rate of 6.25 percent for the first ten years. Both tranches have interest rate adjustments if the call option is not exercised. If the call option is not exercised, the new interest rate will be a floating quarterly reset rate based on the initial credit spread plus the highest of (i) 3 month LIBOR, (ii) 10-year constant maturity treasury and (iii) 30-year constant maturity treasury.

The proceeds of ILFC's debt financing are primarily used to purchase flight equipment, including progress payments during the construction phase. The primary sources for the repayment of this debt and the interest expense thereon are the cash flow from operations, proceeds from the sale of flight equipment and the rollover and refinancing of the prior debt. AIG does not guarantee the debt obligations of ILFC.

Table of Contents

American International Group, Inc. and Subsidiaries

(See also the discussions under Operating Review: Financial Services Operations and Liquidity herein.)

AGF fulfills its short term cash requirements through the issuance of commercial paper. The issuance of commercial paper is subject to the approval of AGF's Board of Directors and is not guaranteed by AIG. AGF is a party to unsecured syndicated revolving committed credit facilities aggregating \$4.25 billion, including a \$2.125 billion 364-day revolving credit facility that expires in July of 2007 and a \$2.125 billion five-year revolving credit facility that expires in July of 2010. The 364-day facility allows for the conversion by AGF of any outstanding loans at expiration into a one-year term loan. The facilities can be used for general corporate purposes and also to provide backup for AGF's commercial paper programs. AGF expects to replace or extend these credit facilities on or prior to their expiration. There are currently no borrowings under these AGF facilities, nor were any borrowings outstanding as of September 30, 2006.

AGF issued \$5.44 billion during 2005 and \$1.76 billion in the first nine months of 2006 of fixed rate and variable rate medium term notes ranging in maturities from two to ten years. As of September 30, 2006, notes aggregating \$17.48 billion were outstanding with maturity dates ranging from 2006 to 2016 at interest rates ranging from 1.94 percent to 7.50 percent. To the extent deemed appropriate, AGF may enter into swap transactions to manage its effective borrowing with respect to these notes. As a well-known seasoned issuer, AGF has filed an automatic shelf registration statement with the SEC allowing AGF immediate access to the U.S. public debt markets.

AGF's other funding sources include private placement debt, retail note issuances, securitizations of finance receivables that AGF accounts for as on-balance-sheet secured financings and bank financings. In addition, AGF has become an established issuer of long-term debt in the international capital markets.

In addition to debt refinancing activities, proceeds from the collection of finance receivables may be used to pay the principal and interest on AGF's debt. AIG does not guarantee any of the debt obligations of AGF. See also the discussion under Operating Review Financial Services Operations and Liquidity herein.

AIG Credit Card Company (Taiwan) and AIG Finance (Taiwan) Limited, both consumer finance businesses in Taiwan, have issued commercial paper for the funding of their own operations. AIG did not guarantee the commercial paper issued by either of these subsidiaries.

Contractual Obligations and Other Commercial Commitments

The maturity schedule of AIG's contractual obligations at September 30, 2006 was as follows:

(in millions)

	Payments due by Period				
	Total Payments	Less Than One Year	1-3 Years	3+-5 Years	Over Five Years
Borrowings ^(a)	\$ 121,937	\$ 28,800	\$ 28,763	\$ 26,120	\$ 38,254
Interest payments on borrowings	45,021	4,133	8,351	5,988	26,549
Loss reserves ^(b)	79,863	21,962	24,358	11,580	21,963
Insurance and investment contract liabilities ^(c)	633,884	18,756	53,186	48,687	513,255
Aircraft purchase commitments	19,213	983	10,143	4,833	3,254
Total	\$ 899,918	\$ 74,634	\$ 124,801	\$ 97,208	\$ 603,275

(a)

Excludes commercial paper and obligations included as debt pursuant to FIN 46(R) and includes hybrid financial instrument liabilities recorded at fair value.

- (b) Represents future loss and loss adjustment expense payments estimated based on historical loss development payment patterns.*
- (c) Insurance and investment contract liabilities include various investment-type products with contractually scheduled maturities including periodic payments of a term certain nature and guaranteed maturities under guaranteed investment contracts. Insurance and investment contract liabilities also include benefit and claim liabilities, of which a significant portion represents policies and contracts that do not have stated contractual maturity dates and may not result in any future payment obligations. For these policies and contracts (i) AIG is currently not making payments until the occurrence of an insurable event, such as death or disability, (ii) payments are conditional on survivorship, or (iii) the occurrence of a payment due to a surrender or other non-scheduled event out of AIG's control. AIG has made significant assumptions to determine the estimated undiscounted cash flows of these contractual policy benefits which include mortality, morbidity, future lapse rates, expenses, investment returns and interest crediting rates, offset by expected future deposits and premium on in-force policies. Due to the significance of the assumptions used, the amounts presented could be materially different from actual required payments. The amounts presented in this table are undiscounted and therefore exceed the future policy benefits and policyholder contract deposits included in the balance sheet.*

Table of Contents

American International Group, Inc. and Subsidiaries

The maturity schedule of AIG's other commercial commitments by segment at September 30, 2006 was as follows:*(in millions)*

	Amount of Commitment Expiration

Total	\$ 27,400	\$ 8,891	\$ 4,112	\$ 4,627	\$ 9,770

*(a) Primarily AIG SunAmerica construction guarantees connected to affordable housing investments.**(b) Represents reimbursement obligations under letters of credit issued by commercial banks.**(c) Excludes commitments with respect to pension plans. The annual pension contribution for 2006 is expected to be approximately \$70 million for U.S. and non-U.S. Plans.**(d) Primarily liquidity facilities provided in connection with certain municipal swap transactions and collateralized bond obligations.**(e) Primarily in connection with options to acquire aircraft.**(f) Primarily AIG SunAmerica commitments to invest in partnerships.**(g) Primarily commitments to invest in limited partnerships.*

Rating triggers have been defined by one independent rating agency to include clauses or agreements the outcome of which depends upon the level of ratings maintained by one or more rating agencies. Rating triggers generally relate to events which (i) could result in the termination or limitation of credit availability, or require accelerated repayment, (ii) could result in the termination of business contracts or (iii) could require a company to post collateral for the benefit of counterparties.

AIG believes that any of its or its subsidiaries' contractual obligations that are subject to ratings triggers or financial covenants relating to ratings triggers would not have a material adverse effect on its financial condition or liquidity.

As a result of the downgrades of AIG's long-term senior debt ratings, AIG was required to post approximately \$1.16 billion of collateral with counterparties to municipal guaranteed investment agreements and financial derivatives transactions. In the event of a further downgrade, AIG will be required to post additional collateral. It is estimated that, as of the close of business on October 31, 2006 based on AIG's outstanding municipal guaranteed investment agreements and financial derivatives transactions as of such date, a further downgrade of AIG's long-term senior debt ratings to Aa3 by Moody's or AA by S&P would permit counterparties to call for approximately \$1.1 billion of additional collateral. Further, additional downgrades could result in requirements for substantial additional collateral, which could have a material effect on how AIG manages its liquidity. The actual amount of additional collateral that AIG would be required to post to counterparties in the event of such downgrades depends on market conditions, the market value of the outstanding affected transactions and other factors prevailing at the time of the downgrade. Any additional obligations to post collateral will increase the demand on AIG's liquidity.

Table of Contents

American International Group, Inc. and Subsidiaries

Shareholders' Equity

AIG's consolidated shareholders' equity increased during the first nine months of 2006 and twelve months of 2005 as follows:

<i>(in millions)</i>	September 30, 2006	December 31, 2005
Beginning of year	\$86,317	\$79,673
Net income	10,609	10,477
Unrealized appreciation (depreciation) of investments, net of taxes	(852)	(1,978)
Cumulative translation adjustment, net of taxes	623	(540)
Dividends to shareholders	(1,260)	(1,615)
Other*	717	300
End of period	\$96,154	\$86,317

* Reflects the effects of employee stock transactions and in 2006 also reflects the cumulative effect of accounting changes.

(See also the discussion under **Operating Review** and **Liquidity** herein and the Consolidated Statement of Comprehensive Income.)

AIG has in the past reinvested most of its unrestricted earnings in its operations and believes such continued reinvestment in the future will be adequate to meet any foreseeable capital needs. However, AIG may choose from time to time to raise additional funds through the issuance of additional securities.

Stock Purchase

During 2006, AIG did not purchase any shares of its common stock under its existing share repurchase authorization. AIG from time to time may buy shares of its common stock in the open market for general corporate purposes, including to satisfy its obligations under various employee benefit plans. At September 30, 2006, an additional 36,542,700 shares could be purchased under the then current authorization by AIG's Board of Directors.

Dividends from Insurance Subsidiaries

Payments of dividends to AIG by its insurance subsidiaries are subject to certain restrictions imposed by regulatory authorities. With respect to AIG's domestic insurance subsidiaries, the payment of any dividend requires formal notice to the insurance department in which the particular insurance subsidiary is domiciled. Under the laws of many states, an insurer may pay a dividend without prior approval of the insurance regulator when the amount of the dividend is below certain regulatory thresholds. To enhance their current capital positions, dividends from the DBG companies were suspended in the fourth quarter of 2005, and AIG has taken various other actions. See **Regulation and Supervision** below. Furthermore, AIG cannot predict how recent regulatory investigations may affect the ability of its regulated subsidiaries to pay dividends.

With respect to AIG's foreign insurance subsidiaries, the most significant insurance regulatory jurisdictions include Bermuda, Japan, Hong Kong, Taiwan, the United Kingdom, Thailand and Singapore.

AIG cannot predict whether the regulatory investigations currently underway or future regulatory issues will impair AIG's financial condition, results of operations or liquidity. To AIG's knowledge, no AIG company is currently on any regulatory or similar watch list with regard to solvency. (See also the discussion under **Liquidity** herein.)

Regulation and Supervision

AIG's insurance subsidiaries, in common with other insurers, are subject to regulation and supervision by the states and jurisdictions in which they do business. In the U.S. the National Association of Insurance Commissioners (NAIC) has developed Risk-Based Capital (RBC) requirements. RBC relates an individual insurance company's

statutory surplus to the risk inherent in its overall operations.

AIG's insurance subsidiaries file financial statements prepared in accordance with statutory accounting practices prescribed or permitted by domestic and foreign insurance regulatory authorities. The principal differences between statutory financial statements and financial statements prepared in accordance with U.S. GAAP for domestic companies are that statutory financial statements do not reflect deferred policy acquisition costs, some bond portfolios may be carried at amortized cost, assets and liabilities are presented net of reinsurance, policyholder liabilities are valued using more conservative assumptions and certain assets are non-admitted.

In connection with the filing of the 2005 statutory financial statements for AIG's domestic General Insurance companies, AIG agreed with the relevant state insurance regulators on the statutory accounting treatment of various items. The regulatory authorities have also permitted certain of the domestic and foreign insurance subsidiaries to support the carrying value of their investments in certain non-insurance and foreign insurance subsidiaries by utilizing the AIG audited consolidated financial statements to satisfy the requirement that the U.S. GAAP-basis equity of such entities be audited. In addition, the regulatory authorities have permitted the domestic General Insurance companies to utilize audited financial statements prepared on a basis of accounting other than

Table of Contents

American International Group, Inc. and Subsidiaries

U.S. GAAP to value investments in joint ventures, limited partnerships and hedge funds. These permitted practices did not affect the domestic General Insurance companies' compliance with minimum regulatory capital requirements.

Statutory capital of each company continued to exceed minimum company action level requirements following the adjustments, but AIG nonetheless contributed an additional \$750 million of capital into American Home effective September 30, 2005 and contributed a further \$2.25 billion of capital in February 2006 for a total of approximately \$3 billion of capital into Domestic General Insurance subsidiaries effective December 31, 2005. To enhance their current capital positions, dividends from the DBG companies were suspended in the fourth quarter of 2005. AIG believes it has the capital resources and liquidity to fund any necessary statutory capital contributions. AIG will review the capital position of its insurance company subsidiaries with various rating agencies and regulators to determine if additional capital contributions or other actions are warranted.

As discussed above, various regulators have commenced investigations into certain insurance business practices. In addition, the OTS and other regulators routinely conduct examinations of AIG and its subsidiaries, including AIG's consumer finance operations. AIG cannot predict the ultimate effect that these investigations and examinations, or any additional regulation arising therefrom, might have on its business. Federal, state or local legislation may affect AIG's ability to operate and expand its various financial services businesses, and changes in the current laws, regulations or interpretations thereof may have a material adverse effect on these businesses. See Risk Factors Regulatory Investigations in Item 1A. of Part I of AIG's 2005 Annual Report on Form 10-K for a further discussion of the effect these investigations may have on AIG's businesses.

AIG's U.S. operations are negatively affected under guarantee fund assessment laws which exist in most states. As a result of operating in a state which has guarantee fund assessment laws, a solvent insurance company may be assessed for certain obligations arising from the insolvencies of other insurance companies which operated in that state. AIG generally records these assessments upon notice. Additionally, certain states permit at least a portion of the assessed amount to be used as a credit against a company's future premium tax liabilities. Therefore, the ultimate net assessment cannot reasonably be estimated. The guarantee fund assessments net of credits for the first nine months of 2006 were \$74 million.

AIG is also required to participate in various involuntary pools (principally workers compensation business) which provide insurance coverage for those not able to obtain such coverage in the voluntary markets. This participation is also recorded upon notification, as these amounts cannot reasonably be estimated.

A substantial portion of AIG's General Insurance business and a majority of its Life Insurance & Retirement Services business are conducted in foreign countries. The degree of regulation and supervision in foreign jurisdictions varies. Generally, AIG, as well as the underwriting companies operating in such jurisdictions, must satisfy local regulatory requirements. Licenses issued by foreign authorities to AIG subsidiaries are subject to modification and revocation. Thus, AIG's insurance subsidiaries could be prevented from conducting future business in certain of the jurisdictions where they currently operate. AIG's international operations include operations in various developing nations. Both current and future foreign operations could be adversely affected by unfavorable political developments up to and including nationalization of AIG's operations without compensation. Adverse effects resulting from any one country may affect AIG's results of operations, liquidity and financial condition depending on the magnitude of the event and AIG's net financial exposure at that time in that country.

Foreign operations are individually subject to local solvency margin requirements that require maintenance of adequate capitalization, which AIG complies with by country. In addition, certain foreign locations, notably Japan, have established regulations that can result in guarantee fund assessments. These have not had a material effect on AIG's financial condition or results of operations.

Liquidity

AIG's liquidity is primarily derived from the operating cash flows of its General and Life Insurance & Retirement Services operations. Management believes that AIG's liquid assets, its net cash provided by operations, and access to the capital markets will enable it to meet any anticipated cash requirements.

At September 30, 2006, AIG's consolidated invested assets included \$24.14 billion of cash and short-term investments. Consolidated net cash provided by operating activities in the first nine months of 2006 amounted to

\$6.0 billion.

During the second quarter of 2006, AIG began presenting cash flows related to the origination and sale of finance receivables held for sale as cash flows within operating activities in the Consolidated Statement of Cash Flows. Previously these amounts were presented as cash flows within investing activities. In addition, certain intercompany transactions included in Finance receivables held for sale originations and purchases and Finance receivable principal payments received in the Consolidated Statement of Cash Flows were not eliminated in 2005. After evaluating the effect of these items during the second quarter of 2006, AIG has revised the 2005 presentation to conform to the 2006 presentation. See Note 11 of Notes to the Consolidated Financial Statements.

Table of Contents

American International Group, Inc. and Subsidiaries

The liquidity of the combined insurance operations is derived both domestically and abroad. The combined insurance operating cash flow is derived from two sources, underwriting operations and investment operations. Cash flow includes periodic premium collections, including policyholders' contract deposits, cash flows from investment operations and paid loss recoveries less reinsurance premiums, losses, benefits, and acquisition and operating expenses. Generally, there is a time lag from when premiums are collected and, when as a result of the occurrence of events specified in the policy, the losses and benefits are paid. Investment income cash flow is primarily derived from interest and dividends received and includes realized capital gains net of realized capital losses. (See also the discussions under Operating Review: General Insurance Operations and Life Insurance & Retirement Services Operations herein.)

With respect to General Insurance operations, if paid losses accelerated beyond AIG's ability to fund such paid losses from current operating cash flows, AIG might need to liquidate a portion of its General Insurance investment portfolio and/or arrange for financing. Potential events causing such a liquidity strain could be the result of several significant catastrophic events occurring in a relatively short period of time. Additional strain on liquidity could occur if the investments sold to fund such paid losses were sold into a depressed market place and/or reinsurance recoverable on such paid losses became uncollectible or collateral supporting such reinsurance recoverable significantly decreased in value. (See also the discussions under Operating Review: General Insurance Operations herein.)

With respect to Life Insurance & Retirement Services operations, if a substantial portion of the Life Insurance & Retirement Services operations bond portfolio diminished significantly in value and/or defaulted, AIG might need to liquidate other portions of its Life Insurance & Retirement Services investment portfolio and/or arrange financing. Potential events causing such a liquidity strain could be the result of economic collapse of a nation or region in which Life Insurance & Retirement Services operations exist, nationalization, terrorist acts, or other such economic or political upheaval. In addition, a significant rise in interest rates leading to a significant increase in policyholder surrenders could also create a liquidity strain. (See also the discussions under Operating Review: Life Insurance & Retirement Services Operations herein.)

In addition to the combined insurance pretax operating cash flow, AIG's insurance operations held \$12.75 billion in cash and short-term investments at September 30, 2006. Operating cash flow and the cash and short-term balances held provided AIG's insurance operations with a significant amount of liquidity. AIG subsidiaries have also issued debt securities to meet capital needs. In December 2005, Transatlantic issued \$750 million of debt securities in a public offering, of which \$450 million were purchased by other AIG subsidiaries. Transatlantic contributed the proceeds of the offering to a reinsurance company subsidiary.

This liquidity is available, among other things, to purchase predominately high quality and diversified fixed income securities and, to a lesser extent, marketable equity securities, and to provide mortgage loans on real estate, policy loans and collateral loans. This cash flow coupled with proceeds of approximately \$91 billion from the maturities, sales and redemptions of fixed income securities and from the sale of equity securities was used to purchase approximately \$110 billion of fixed income securities and marketable equity securities during the first nine months of 2006.

AIG's major Financial Services operating subsidiaries consist of AIGFP, ILFC, AGF, AIGCFG and AI Credit. Sources of funds considered in meeting the liquidity needs of AIGFP's operations include guaranteed investment agreements, issuance of long-term and short-term debt, proceeds from maturities and sales of securities available for sale, securities sold under repurchase agreements, and securities and spot commodities sold but not yet purchased. ILFC, AGF, AIGCFG and AI Credit all utilize the commercial paper markets, retail and wholesale deposits, bank loans and bank credit facilities as sources of liquidity. ILFC and AGF also fund in the domestic and international capital markets without reliance on any guarantee from AIG. An additional source of liquidity for ILFC is the use of export credit facilities. AIGCFG also uses wholesale and retail bank deposits as sources of funds. On occasion, AIG has provided equity capital to ILFC, AGF and AIGCFG and provides intercompany loans to AIGCFG. An AIG subsidiary purchased additional shares of ILFC in the amount of \$400 million during the third quarter of 2005. Cash flow provided from operations is a major source of liquidity for AIG's primary Financial Services operating

subsidiaries.

AIG, the parent company, funds its short-term working capital needs through commercial paper issued by AIG Funding. As of September 30, 2006, AIG Funding had \$4.48 billion of commercial paper outstanding with an average maturity of 27 days. As additional liquidity, AIG parent has a \$2 billion inter-company revolving credit facility provided by certain of its subsidiaries, a \$1.625 billion 364-day revolving bank credit facility that expires in July 2007, a \$1.625 billion five year revolving bank credit facility that expires in July 2011 and a \$3 billion 364-day revolving credit facility that expires in November 2006, of which \$511 million is currently available as back-up liquidity. AIG parent's primary sources of cash flow are dividends and loans from its subsidiaries. AIG parent's primary uses of cash flow are for debt service, capital contributions to subsidiaries and the payment of dividends to shareholders. On November 9, 2006, AIG intends to redeem its Zero Coupon Convertible Senior Debentures that were issued on November 9, 2001. The aggregate redemption price payable by AIG is approximately \$1.07 billion. See also Note 9 of Notes to Consolidated Fi-

Table of Contents

financial Statements in AIG's 2005 Annual Report on Form 10-K/A for additional information on debt maturities for AIG and its subsidiaries.

Special Purpose Vehicles and Off Balance Sheet Arrangements

AIG uses special purpose vehicles (SPVs) and off balance sheet arrangements in the ordinary course of business. As a result of recent changes in accounting, a number of SPVs and off balance sheet arrangements have been reflected in AIG's consolidated financial statements. In January 2003, FASB issued Interpretation No. 46, Consolidation of Variable Interest Entities (FIN 46). FIN 46 addressed the consolidation and disclosure rules for nonoperating entities that are now defined as Variable Interest Entities (VIEs). In December 2003, FASB issued a revision to Interpretation No. 46 (FIN 46(R)).

AIG has guidelines with respect to the formation of and investment in SPVs and off balance sheet arrangements. In addition, AIG has expanded the responsibility of its Complex Structured Financial Transaction Committee (CSFT) to include the review of any transaction that could subject AIG to heightened legal, reputational, regulatory, accounting or other risk. See Management's Report on Internal Control Over Financial Reporting in Item 9A. of Part II included in AIG's 2005 Annual Report on Form 10-K for a further discussion of the CSFT.

For additional information related to AIG's activities with respect to VIEs and certain guarantees see Recent Accounting Standards herein and also Note 8 of Notes to Consolidated Financial Statements. Also, for additional disclosure regarding AIG's commercial commitments (including guarantors), see Contractual Obligations and Other Commercial Commitments herein.

Derivatives

Derivatives are financial instruments among two or more parties with returns linked to or derived from some underlying equity, debt, commodity or other asset, liability, or index. Derivatives payments may be based on interest rates and exchange rates and/or prices of certain securities, commodities, financial or commodity indices, or other variables. The more significant types of derivative arrangements in which AIG transacts are swaps, forwards, futures and options. In the normal course of business, with the agreement of the original counterparty, these contracts may be terminated early or assigned to another counterparty.

The overwhelming majority of AIG's derivatives activities are conducted by the Capital Markets operations, thus permitting AIG to participate in the derivatives dealer market acting primarily as principal. In these derivative operations, AIG structures transactions that generally allow its counterparties to obtain or hedge exposure to changes in interest and foreign currency exchange rates, credit events, securities prices and certain commodities and financial or commodity indices. AIG's customers such as corporations, financial institutions, multinational organizations, sovereign entities, government agencies and municipalities use derivatives to hedge their own market exposures. For example, a futures, forward or option contract can be used to protect the customers' assets or liabilities against price fluctuations.

A counterparty may default on any obligation to AIG, including a derivative contract. Credit risk is a consequence of extending credit and/or carrying trading and investment positions. Credit risk exists for a derivative contract when that contract has a positive fair value to AIG. To help manage this risk, AIGFP's credit department operates within the guidelines set by the AIG Credit Risk Committee. This committee establishes the credit policy, sets limits for counterparties and provides limits for derivative transactions with counterparties having different credit ratings. In addition to credit ratings, this committee takes into account other factors, including the industry and country of the counterparty. Transactions which fall outside these pre-established guidelines require the specific approval of the AIG Credit Risk Committee. It is also AIG's policy to establish reserves for potential credit impairment when necessary.

In addition, AIGFP utilizes various credit enhancements, including letters of credit, guarantees, collateral, credit triggers, credit derivatives, and margin agreements to reduce the credit risk relating to its outstanding financial derivative transactions. AIGFP requires credit enhancements in connection with specific transactions based on, among other things, the creditworthiness of the counterparties, and the transaction's size and maturity.

AIG's Derivatives Review Committee provides an independent review of any proposed derivative transaction or program except those derivative transactions entered into by AIGFP with third parties. The committee examines, among other things, the nature and purpose of the derivative transaction, its potential credit exposure, if any, and the

estimated benefits.

Managing Risk

Market Risk

Market risk is the risk of loss of fair value resulting from adverse fluctuations in interest rates, foreign currencies, equities and commodity prices. AIG has exposures to these risks.

AIG analyzes market risk using various statistical techniques including Value at Risk (VaR). VaR is a summary statistical measure that applies the estimated volatility and correlation of market factors to AIG's market positions. The output from the VaR calculation is the maximum loss that could occur over a defined period of time given a certain probability. While VaR models are relatively sophisticated, the quantitative market risk information generated is limited by the assumptions and parameters established in creating the related models. AIG believes that statistical models alone do

Table of Contents

American International Group, Inc. and Subsidiaries

not provide a reliable method of monitoring and controlling market risk. Therefore, such models are tools and do not substitute for the experience or judgment of senior management.

Insurance

AIG has performed a separate VaR analysis for the General Insurance and Life Insurance & Retirement Services segments and for each market risk within each segment. For purposes of the VaR calculation, the insurance assets and liabilities from GICs are included in the Life Insurance & Retirement Services segment. For the calculations in the analyses the financial instrument assets included are the insurance segments' invested assets, excluding real estate and investment income due and accrued, and the financial instrument liabilities included are reserve for losses and loss expenses, unearned premiums, future policy benefits for life and accident and health insurance contracts and other policyholders' funds.

AIG calculated the VaR with respect to the net fair value of each of AIG's insurance segments as of September 30, 2006 and December 31, 2005. The VaR number represents the maximum potential loss as of those dates that could be incurred with a 95 percent confidence (i.e., only five percent of historical scenarios show losses greater than the VaR figure) within a one-month holding period. AIG uses the historical simulation methodology that entails repricing all assets and liabilities under explicit changes in market rates within a specific historical time period. AIG uses the most recent three years of historical market information for interest rates, foreign exchange rates, and equity index prices. For each scenario, each transaction was repriced. Portfolio, business unit and finally AIG-wide scenario values are then calculated by netting the values of all the underlying assets and liabilities.

The following table presents the period-end, average, high and low VaRs on a combined basis and of each component of market risk for each of AIG's insurance segments as of September 30, 2006 and December 31, 2005. Due to diversification effects, the combined VaR is always smaller than the sum of its components.

	2006				2005*			
	As of September 30,	For the nine months ended September 30,			As of December 31,	For the year ended December 31,		
		Average	High	Low		Average	High	Low
<i>(in millions)</i>								
General Insurance:								
Market risk:								
Combined	\$1,703	\$1,692	\$1,776	\$1,617	\$1,617	\$1,585	\$1,672	\$1,396
Interest rate	1,566	1,659	1,717	1,566	1,717	1,746	1,931	1,563
Currency	200	150	200	119	130	125	139	111
Equity	535	546	560	535	535	651	727	535
Life Insurance & Retirement Services:								
Market risk:								
Combined	\$4,469	\$4,794	\$5,276	\$4,442	\$4,515	\$4,737	\$5,024	\$4,515
Interest rate	4,218	4,619	5,032	4,218	4,382	4,488	4,750	4,382
Currency	580	548	597	475	541	511	560	442
Equity	1,312	1,222	1,312	1,143	762	953	1,024	762

* The calculations of Equity VaR for the Life Insurance & Retirement Services segment shown above for all 2006 periods include structured exposures and exposures related to equity-linked guarantees on variable annuity products.

These exposures are not included in the Equity VaR calculations for the 2005 periods. In the Life Insurance & Retirement Services segment, the Combined VaR is near the low point in the range for 2006 and is similar to the Combined VaR at the end of 2005. The Equity VaR increase during 2006 did not cause a corresponding increase in Combined VaR due to both diversification effects and to declines in interest rate volatilities, which reduced Interest Rate VaR during 2006.

Financial Services

AIG generally manages its market exposures within Financial Services by maintaining offsetting positions. Capital Markets seeks to minimize or set limits for open or uncovered market positions. Credit exposure is managed separately. (See the discussion on the management of credit risk above.)

AIG's Market Risk Management Department provides detailed independent review of AIG's market exposures, particularly those market exposures of the Capital Markets operations. This department determines whether AIG's market risks, as well as those market risks of individual subsidiaries, are within the parameters established by AIG's senior management. Well established market risk management techniques such as sensitivity analysis are used. Additionally, this department verifies that specific market risks of each of certain subsidiaries are managed and hedged by that subsidiary.

ILFC is exposed to market risk and the risk of loss of fair value and possible liquidity strain resulting from adverse fluctuations in interest rates. As of September 30, 2006 and December 31, 2005, AIG statistically measured the loss of fair value through the application of a VaR model. In this analysis, the net fair value of Aircraft Finance operations was determined using the financial instrument assets which included the tax adjusted future flight equipment lease revenue, and the financial instrument liabilities which included the

Table of Contents

American International Group, Inc. and Subsidiaries

future servicing of the current debt. The estimated effect of the current derivative positions was also taken into account.

AIG calculated the VaR with respect to the net fair value of Aircraft Finance operations using the historical simulation methodology, as previously described. As of September 30, 2006 and December 31, 2005, the average VaR with respect to the net fair value of Aircraft Finance operations was approximately \$165 million and \$129 million, respectively. In late 2005, ILFC lengthened the average maturity of its debt, leading to an increase in its VaR.

Capital Markets operations are exposed to market risk due to changes in the level and volatility of interest rates, foreign currency exchange rates, equity prices and commodity prices. AIGFP hedges its exposure to these risks primarily through swaps, options, forwards and futures. To economically hedge interest rate risks, AIGFP may also purchase U.S. and foreign government obligations.

AIGFP does not seek to manage the market risk of each transaction through an individual third party offsetting transaction. Rather, AIGFP takes a portfolio approach to the management of its market risk exposures. AIGFP values the predominant portion of its market-sensitive transactions by marking them to market currently through income. A smaller portion is priced by estimated fair value based upon an extrapolation of market factors. There is another limited portion of transactions where the initial fair value is not recorded through income currently and gains or losses are recognized over the life of the transactions. These valuations represent an assessment of the present values of expected future cash flows and may include reserves for such risks as are deemed appropriate by AIGFP and AIG management.

The recorded values of these transactions may be different from the values that might be realized if AIGFP were required to sell or close out the transactions prior to maturity. AIG believes that such differences are not significant to its financial condition or liquidity. Such differences would be immediately recognized in income when the transactions are sold or closed out prior to maturity.

AIGFP attempts to secure reliable and independent current market prices, such as published exchange prices, external subscription services such as from Bloomberg or Reuters or third-party broker quotes for use in this model. When such prices are not available, AIGFP use an internal methodology which includes extrapolation from observable and verifiable prices nearest to the measurement date of the reporting period. Historically, actual results have not materially deviated from these models in any material respect.

Systems used by Capital Markets operations can monitor each unit's respective market positions on an intraday basis. AIGFP operates in major business centers overseas and therefore is open for business essentially 24 hours a day. Thus, the market exposure and offset strategies are regularly monitored, reviewed and coordinated.

AIGFP applies various testing techniques which reflect significant potential market movements in interest rates, foreign exchange rates, commodity and equity prices, volatility levels and the effect of time. These techniques vary by currency and are regularly changed to reflect factors affecting the derivatives portfolio. The results from these analyses are regularly reviewed by AIG management.

As described above, Capital Markets operations are exposed to the risk of loss of fair value from adverse fluctuations in interest rate and foreign currency exchange rates and equity and commodity prices as well as implied volatilities thereon. AIG statistically measures the losses of fair value through the application of a VaR model across Capital Markets.

Capital Markets asset and liability portfolios for which the VaR analyses were performed included over the counter and exchange traded investments, derivative instruments and commodities. Because the market risk with respect to securities available for sale, at market, is substantially hedged, segregation of market sensitive instruments into trading and other than trading was not deemed necessary. The VaR calculation is unaffected by the accounting treatment of hedged transactions under FAS 133.

In the calculation of VaR for Capital Markets operations, AIG uses the same historical simulation methodology, described under Insurance above, which entails repricing all assets and liabilities under explicit changes in market rates within a specific historical time period.

The following table presents the VaR on a combined basis and of each component of market risk for Capital Markets operations as of September 30, 2006 and December 31, 2005. Due to diversification effects, the combined VaR is always smaller than the sum of its components.

<i>(in millions)</i>	2006	2005
Combined	\$ 19	\$ 22
Interest rate	9	9
Currency	7	3
Equity	15	14
Commodity	14	9

Catastrophe Exposures

The nature of AIG's business exposes it to various catastrophic events in which multiple losses across multiple lines of business can occur in any calendar year. In order to control this exposure, AIG uses a combination of techniques, including setting aggregate limits in key business units, monitoring and modeling accumulated exposures, and purchasing catastrophe reinsurance to supplement its other reinsurance protections.

AIG evaluates catastrophic events and assesses the probability of occurrence and magnitude of catastrophic events through the use of third party models generally recognized as industry standards. Following is an overview of modeled losses associated with the more significant natural perils. The modeled results assume that all reinsurers perform their obligations to AIG in accordance with their terms.

It is important to recognize that there is no standard methodology to project the possible losses from total property and workers compensation exposures and that the use of different models could result in materially different projected losses. Further, there are no industry standard assumptions to be utilized in projecting these losses. The use of different assumptions could materially change the projected losses. Therefore, these modeled losses may not be comparable to estimates made by other companies.

These estimates are inherently uncertain and may not reflect AIG's maximum exposures to these events. It is highly likely that AIG's losses will vary, perhaps significantly, from these estimates.

Natural Catastrophe Exposures

The modeled results provided in the table below were based on the aggregate exceedence probability (AEP) losses which represent total property and workers compensation losses that may occur in any single year from one or more natural events. The model, which has been updated to reflect 2005 catastrophes, generally used 2005 exposure data and the current reinsurance program structure. The values provided were based on 100 year return period losses, which have a 1 percent likelihood of being exceeded in any single year. Thus, there is a one percent probability that AIG could incur in any year losses in excess of the modeled amounts for these perils.

(in millions)

			% of Consolidated Shareholders Equity at December 31, 2005
Natural Peril	Net of Gross Reinsurance	Net, After Income Taxes	

Earthquake	\$3,412	\$ 2,283	\$ 1,484	1.7%
Tropical Cyclone*	\$5,336	\$ 3,907	\$ 2,540	2.9%

* Includes hurricanes, typhoons and other wind-related events.

In addition, AIG also evaluates potential single event earthquake and hurricane losses that may be incurred. The single events utilized are a subset of potential events identified and utilized by Lloyd's and referred to as Realistic Disaster Scenarios (RDSs). The purpose of this analysis was to utilize these RDSs to provide a reference frame and place into context the model results. However, it is important to note that the specific events used for this analysis do not necessarily represent the worst case loss that AIG could incur from this type of an event in these regions. The losses associated with the RDSs are included in the table below.

Single event modeled property and workers compensation losses to AIG's worldwide portfolio of risk for key geographic areas. Gross values represent AIG's liability after the application of policy limits and deductibles, and net values represent losses after all reinsurance is applied.

(in millions)

Natural Peril	Gross	Net of Reinsurance
Miami Hurricane	\$ 4,530	\$ 2,911
Northeast Hurricane	3,732	2,498
San Francisco Earthquake	3,628	2,229
Los Angeles Earthquake	3,285	2,145
Gulf Coast Hurricane	2,581	1,391
Japanese Earthquake	339	153
European Windstorm	135	41
Japanese Typhoon	125	105

Because the specific international RDS events do not necessarily correspond to AIG's international exposures, AIG also runs simulations against its own exposures where statistical return period losses associated with the written exposure specific to AIG's exposures provide the basis for monitoring risk. Based on these simulations, the 100 year return period for Japanese Earthquake is \$359 million gross, and \$113 million net, the 100 year return period for European Windstorm is \$168 million gross, and \$54 million net, and the 100 year return period for the Japanese Typhoon is \$313 million gross, and \$260 million net.

ACTUAL RESULTS IN ANY PERIOD ARE LIKELY TO VARY, PERHAPS MATERIALLY, FROM THE MODELED SCENARIOS, AND THE OCCURRENCE OF ONE OR

MORE SEVERE EVENTS COULD HAVE A MATERIAL ADVERSE EFFECT ON AIG'S FINANCIAL CONDITION, RESULTS OF OPERATIONS AND LIQUIDITY.

Measures Implemented to Control Hurricane and Earthquake Catastrophic Risk

Catastrophic risk from the earthquake and hurricane perils is proactively managed through reinsurance programs, and aggregate accumulation monitoring. Catastrophe reinsurance is purchased by AIG from financially sound reinsurers. Recoveries under this program, along with other non-catastrophic reinsurance protections, are reflected in the net values provided in the tables above. In addition to the catastrophic reinsurance programs, hurricane and earthquake exposures are also controlled by monitoring aggregate exposures on a regular basis. The aggregate exposures are calculated by compiling total liability within AIG defined hurricane and earthquake catastrophe risk zones and therefore represent the maximum that could be lost in any individual zone. These aggregate accumulations are tracked over time in order to monitor both long and short term trends. AIG's major property writers, Lexington and The Private Client Group, have also implemented catastrophe related underwriting procedures and manage their books at an account level. Lexington individually models most accounts prior to binding in order to specifically quantify catastrophic risk for each account.

Pandemic Influenza

The potential for a pandemic influenza outbreak has received media attention during the past year. AIG continues to analyze its exposure to this serious threat and, as such, has engaged an external risk management firm to model loss scenarios associated with an outbreak of Avian Flu. Using a 1 in 100 year return period, AIG estimates its after-tax net losses under its life insurance policies due to Avian Flu at approximately 0.9 percent of consolidated shareholders equity as of December 31, 2005. This estimate was calculated over a 3 year period, although the majority of the losses would be incurred in the first year. The modeled losses calculated were based on 2005 policy data representing approximately 90 percent of AIG's Individual Life, Group Life, and Credit Life books of business, net of reinsurance. This estimate does not include claims that could be made under other policies, such as business interruption or general liability policies, and does not reflect estimates for losses resulting from disruption of AIG's own business operations that may arise out of such a pandemic. The model used to generate this estimate has only recently been developed. The reasonableness of the model and its underlying assumptions cannot readily be verified by reference to comparable historical events. As a result, AIG's actual losses from a pandemic influenza outbreak are likely to vary significantly from those predicted by the model.

Terrorism

Terrorism risk is also monitored to control AIG's exposure. AIG shares its exposures to terrorism risks under the Terrorism Risk Insurance Act (TRIA). AIG's current deductible under TRIA is \$3.3 billion and AIG would share 10 percent of certified terrorism losses in excess of the \$3.3 billion.

Recent Accounting Standards

At the March 2004 meeting, the Emerging Issue Task Force (EITF) reached a consensus with respect to Issue No. 03-1, The Meaning of Other-Than Temporary Impairment and Its Application to Certain Investments. On September 30, 2004, the FASB issued FASB Staff Position (FSP) EITF Issue 03-1-1, Effective Date of Paragraphs 10-20 of EITF Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments. In November 2005, FASB issued FSP FAS 115-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments, which replaces the measurement and recognition guidance set forth in Issue No. 03-1 and codifies certain existing guidance on impairment.

On June 1, 2005, the FASB issued Statement No. 154, Accounting Changes and Error Corrections (FAS 154). FAS 154 replaces APB Opinion No. 20, Accounting Changes and FASB Statement No. 3, Reporting Accounting Changes in Interim Financial Statements.

At the June 2005 meeting, the EITF reached a consensus with respect to Issue No. 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners have Certain Rights.

On June 29, 2005, the FASB issued Statement 133 Implementation Issues No. B38, Embedded Derivatives: Evaluation of Net Settlement with Respect to the Settlement of a Debt Instrument through Exercise of an Embedded

Put Option or Call Option and No. B39, Application of Paragraph 13(b) to Call Options That are Exercisable Only by the Debtor.

On September 19, 2005, the FASB issued Statement of Position 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection with Modifications or Exchanges of Insurance Contracts.

On February 16, 2006, the FASB issued FAS No. 155, Accounting for Certain Hybrid Financial Instruments.

On March 27, 2006, the FASB issued FASB FTB 85-4-1, Accounting for Life Settlement Contracts by Third-Party Investors (FSP 85-4-1), an amendment of FTB 85-4, Accounting for Purchases of Life Insurance.

On April 13, 2006, the FASB issued FSP FIN 46(R)-6, Determining the Variability to be Considered in Applying FASB Interpretation No. 46(R).

American International Group, Inc. and Subsidiaries

On July 13, 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109 (FIN 48).

Effective January 1, 2006, AIG adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123R Share-Based Payments (FAS 123R). For further discussion of these recent accounting standards and its application to AIG, see Note 10 of Notes to Consolidated Financial Statements.

On September 13, 2006, the SEC issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB 108).

In September 2006, the FASB issued FAS No. 157, Fair Value Measurements (FAS No. 157).

In September 2006, the FASB issued FAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R) (FAS No. 158).

For further discussion of these recent accounting standards and its application to AIG, see Note 8 of the Notes to Consolidated Financial Statements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Included in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 4. CONTROLS AND PROCEDURES

In connection with the preparation of this Form 10-Q, an evaluation was carried out by AIG's management, with the participation of AIG's Chief Executive Officer and Chief Financial Officer, of the effectiveness of AIG's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)). Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on its evaluation, and in light of the previously identified material weaknesses in internal control over financial reporting, as of December 31, 2005, described within the 2005 Annual Report on Form 10-K, AIG's Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2006, AIG's disclosure controls and procedures were ineffective. In addition, there has been no change in AIG's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended September 30, 2006 that has materially affected, or is reasonably likely to materially affect, AIG's internal control over financial reporting.

Part II OTHER INFORMATION**ITEM 1A. Risk Factors.**

The following supplements the significant factors that may affect our business and operations described under Risk Factors in Item 1A. of Part I of AIG's 2005 Annual Report on Form 10-K and Item 1A. of Part II of AIG's Quarterly Report on Form 10-Q for the quarter ended March 31, 2006.

There are limited suppliers of aircraft and engines.

The supply of jet transport aircraft, which ILFC purchases and leases, is dominated by two airframe manufacturers, Boeing and Airbus, and a limited number of engine manufacturers. As a result, ILFC is dependent on the manufacturers' success in remaining financially stable, producing aircraft and related components which meet the airlines' demands, both in type and quantity, and fulfilling their contractual obligations to ILFC. Competition between the manufacturers for market share is also escalating and may cause instances of deep discounting for certain aircraft types and may negatively affect ILFC's competitive pricing.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The table below provides information with respect to purchases of AIG Common stock during the three months ended September 30, 2006.

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs at End of Month ⁽²⁾
July 1 - 31		\$		36,542,700
August 1 - 31				36,542,700
September 1 - 30				36,542,700
Total		\$		

(1) Does not include 41,230 shares delivered or attested to in satisfaction of the exercise price by holders of AIG employee stock options exercised during the three months ended September 30, 2006.

(2) On July 19, 2002, AIG announced that its Board of Directors had authorized the open market purchase of up to 10 million shares of common stock. On February 13, 2003, AIG announced that the Board had expanded the existing program through the authorization of an additional 50 million shares. The purchase program has no set expiration or termination date.
