**Table of Contents****Production Report****CVRD 3Q07 Production Report****OVERCOMING CHALLENGES**

Rio de Janeiro, October 25, 2007 Companhia Vale do Rio Doce (CVRD) achieved in the third quarter of 2007 (3Q07) one of the best operational performances in its history, with record quarterly production of iron ore (78.3 million mt), pellets (4.4 million mt), bauxite (2.6 million mt), kaolin (356,000 mt) and cobalt (597 mt)<sup>1</sup>.

This performance derives from our investment efforts and operational excellence, despite a challenging environment, characterized by the systematic operation at full capacity and a very tight supply of equipment and spare parts.

**FERROUS MINERALS**

*Iron ore running at 313 million metric tons per year*

<sup>1</sup> Includes ROM that has been provided to Samarco, 630,000 mt in 2Q07 and 1,088,000 mt in 3Q07

Iron ore production in 3Q07 was the highest in CVRD's history, amounting to 78.3 million mt, up 12.6% compared to the 69.5 million mt produced in 3Q06. In the first nine months of the year the Company produced 217.7 Mt, which is also a new record, being up 11.1% on 9M06.

In 3Q07 the Southeastern System was responsible for a record production of 30.0 million mt, with Brucutu producing 6.1 million mt, a performance consistent with the planned ramp-up. In 9M07, production in the Southeastern System amounted to 83.0 million mt, up 15.4% compared to 9M06.

Production in the Southern System totaled 23.7 million mt in 3Q07, up 2.7% versus 3Q06. In 9M07, production amounted to 66.7 million mt, up 5.2% against 9M06.

In Carajás, iron ore production also reached a new record, of 24.3 million mt in 3Q07, up 15.4% compared to 3Q06, achieving an annualized production rate close to 100 Mt. Production in 9M07 was 67.1 Mt, up 12.6% compared to the same period a year earlier.

**Table of Contents****Production Report****Pellets production at full capacity**

000 metric tons	3Q06	1Q07	2Q07	3Q07	9M06	9M07	% change 3Q07/3Q06	% change 9M07/9M06
<b>PELLETS</b>	<b>3,923</b>	<b>4,175</b>	<b>4,311</b>	<b>4,434</b>	<b>9,812</b>	<b>12,919</b>	<b>13.0%</b>	<b>31.7%</b>
CVRD I and								
CVRD II	1,573	1,562	1,569	1,556	4,420	4,687	-1.1%	6.0%
Fabrica	891	935	1,048	1,048	2,978	3,031	17.6%	1.8%
São Luís	1,459	1,678	1,694	1,830	2,413	5,201	25.4%	115.5%

In response to the strong global demand for pellets, the Company's production in 3Q07 was 4,434,000 mt, the highest volume reported in any quarter, exceeding the previous record of 4,371,000 mt reached in 4Q06. All pellet plants are operating at full capacity, including São Luís, whose nominal capacity has been increased to 7 million tons per year.

In 3Q07, 2.9 million mt of blast furnace pellets and 1.6 million mt of direct production pellets were produced.

Total pellet volume produced in 9M07 amounted to 12.9 million mt, up 31.7% compared to 9M06.

In the consolidated figures under the concept of BR GAAP (generally accepted accounting principles in Brazil), whereby volumes produced by the joint ventures (Samarco, Nibrasco, Hispanobras, Itabasco and Kobrasco) are computed according to CVRD's equity stake, pellet production in 3Q07 amounted to 9.1 million mt, an increase of 5.6% compared to 3Q06.

In the first nine months of the year, pellet production according to the concept of BR GAAP was 26.6 million mt.

**Manganese ore and ferroalloys temporary shutdown of Azul and Dunkerque**

000 metric tons	3Q06	1Q07	2Q07	3Q07	9M06	9M07	% change 3Q07/3Q06	% change 9M07/9M06

Mo I Rana	26	28	29	35	78	92	37.4%	18.0%
Urucum	5	6	6	6	16	17	7.7%	5.5%

Production of manganese ore totaled 100,000 mt in 3Q07, down 83.7% compared to 3Q06. Operations at the Azul mine were suspended from July of this year in order to give total priority to the transport of iron ore on the Carajás railroad (EFC).

In the first nine months of 2007, manganese ore production was 1.215 million mt, compared to 1.665 million mt in 9M06.

In 3Q07, ferroalloy production amounted to 130,000 mt, down 6.9% compared to 3Q06. The main reason for this reduction was the stoppage of one of the furnaces at our Dunkerque plant in the last week of August for repairs. This furnace is expected to resume operations in the first week of November, and it is estimated that this shutdown will result in a drop in ferroalloy production of 20,000 mt.

In this quarter, ferroalloy production consisted of 54,600 mt of ferrosilicon manganese alloys (FeSiMn), 51,200 of high-carbon manganese alloys, 14,900 mt of medium-carbon manganese alloys (FeMnMC) and 7,100 mt of other

types of alloys. Production of cored wire (specialty alloys) was 1,900 mt.

2

---

**Table of Contents****Production Report****NON-FERROUS MINERALS****Nickel the operational challenges**

<b>000 metric tons</b>	<b>3Q06</b>	<b>1Q07</b>	<b>2Q07</b>	<b>3Q07</b>	<b>9M06</b>	<b>9M07</b>	<b>% change 3Q07/3Q06</b>	<b>% change 9M07/9M06</b>
<b>NICKEL</b>	<b>50.0</b>	<b>61.4</b>	<b>62.5</b>	<b>55.1</b>	<b>169.5</b>	<b>179.0</b>	<b>10.1%</b>	<b>5.6%</b>
Ontario	17.3	23.3	20.8	19.3	69.1	63.4	11.5%	-8.3%
Manitoba	5.3	7.8	8.0	5.7	26.8	21.5	7.2%	-19.8%
Indonesia	15.9	18.0	19.5	17.7	51.0	55.2	11.3%	8.2%
Voisey s Bay	11.4	12.1	14.1	12.3	22.1	38.4	7.5%	73.8%
Others	0.1	0.2	0.1	0.1	0.5	0.5	n.m.	n.m.

Finished nickel production in 3Q07 reached 55,100 mt, up 10.1% compared to 3Q06. In the first nine months of the year, accumulated production totaled 179,000 mt, rising 5.6% compared to 9M06.

Production at Sudbury, Ontario, totaled 19,300 mt in 3Q07. There were maintenance stoppages and adjustments carried out to our equipment. In addition to this, there were mechanical problems with kiln # 1 at the Clydach refinery, in Wales, which processes part of the production from Sudbury.

Production in Thompson, Manitoba, was 5,700 mt in 3Q07. Heavy rainfall in the Thompson area resulted in excess moisture in the nickel ores and smelter feed challenges with recycles at the operations.

CVRD produces nickel-in-matte in Indonesia, an intermediary product which is transformed at our refinery in Tokyo, Japan Inco TNC Ltd (ITL). Production of refined nickel was 17,700 mt in 3Q07 compared to 15,900 mt of the same period a year earlier.

The figures shown for finished nickel production do not include the quantities produced from nickel concentrates purchased from other companies and processed externally under tolling arrangements. These volumes were 3,000 mt in 3Q07, being a total of 12,200 mt in the first nine months of 2007, compared to 13,000 mt in the same period a year earlier.

The Company is revising its production target for 2007, reducing it by 24 kt compared to the announced at the beginning of this year. Consequently, we expect to produce 246 kt of finished nickel in 2007. Our supply will reach 260 kt, given the 14 kt obtained through the tolling arrangements. It is estimated that 80% of the reduction in the targeted production is determined by challenges at the Sudbury matte processing facilities and the problems with the kiln at the Clydach refinery while 20% is due to a shortfall in the output from the Sudbury mines caused by geological conditions and infrastructure issues in the first quarter of the year.

In order to mitigate these problems and to upgrade the efficiency of our operations, we announced an investment of US\$1.019 billion for 2008 to sustain the existing nickel operations, representing an increase of 32% to the US\$770 million budgeted for this year.

**Copper production up 20%**

<b>000 metric tons</b>	<b>3Q06</b>	<b>1Q07</b>	<b>2Q07</b>	<b>3Q07</b>	<b>9M06</b>	<b>9M07</b>	<b>% change 3Q07/3Q06</b>	<b>% change 9M07/9M06</b>

Others	4.2	3.0	2.3	2.2	0.0	7.5	-47.4%	n.m.

**Table of Contents****Production Report**

CVRD produces copper concentrates at Sossego, Brazil, and copper concentrates, copper anodes and cathodes at its operations in Canada, where copper is a byproduct of nickel. The figures shown in this report refer to the volumes of copper contained in these products.

The copper production at Sossego was 26,900 mt in 3Q07, down 16.5% compared to 3Q06. The reduction was caused by a maintenance stoppage at the processing plant, which lasted five days and lower copper grades. In 9M07, production totaled 86,000 mt, compared to 84,200 mt in 9M06.

The Canadian operations added 37,900 mt of copper in 3Q07, compared to 27,600 mt in 3Q06. As a result of the installation of a copper removal circuit at the Clarabelle mill plant in Sudbury, as a way of exploiting synergies, the production of copper concentrate has tended to increase relatively to the production of copper anodes. This change has contributed to a reduction in the quantity of copper contained in Sudbury. In this way, in 3Q07, volume produced was 23,900 mt, compared to 28,500 mt in the previous quarter.

The Company's copper production totaled 210,300 mt in the first nine months of 2007, up 20% compared to the same period a year earlier.

**Nickel by-products cobalt production sets a new record**

Taquari-Vassouras	179	155	163	180	552	498	0.9%	-9.7%

Production of potash at the Taquari-Vassouras mine reached 180,000 mt in 3Q07, in line with 3Q06. In the first nine months of the year volume produced was 490,000 mt, down 9.7% on that produced in 9M06.

4

---

**Table of Contents****Production Report**

In the first half of the year, the performance of the Company's potash operations was adversely affected by problems with mining equipment. Furthermore, since 2006, we have been mining a section of the mine that has lower grades. The geological condition of the deposits, in contrast with the case of non-ferrous minerals, does not allow a rapid change in grades. We expect to start mining a higher-grade section in about 15 months. Production volume estimate for this year have been revised to 684,000 mt.

***Kaolin new record***

000 metric tons	3Q06	1Q07	2Q07	3Q07	9M06	9M07	% change 3Q07/3Q06	% change 9M07/9M06
<b>KAOLIN</b>	<b>341</b>	<b>292</b>	<b>327</b>	<b>356</b>	<b>1,020</b>	<b>975</b>	<b>4.4%</b>	<b>-4.4%</b>

Cadam	189	166	178	177	574	521	-6.1%	-9.3%

In 3Q07, kaolin production reached 356,000 mt, up 4.4% compared to 3Q06, setting a new Company quarterly record. The PPSA operation produced 178,000 mt, up 17.4% compared to 3Q06, while CADAM produced 177,000 mt, 12,000 mt less than in the same quarter a year earlier.

In the first nine months of the year, CVRD's total kaolin production was 975,000 mt, down 4.4% compared to 9M06, as a result of the operational problems faced in 1H07.

**ALUMINUM*****Bauxite Paragominas ramping up***

000 metric tons	3Q06	1Q07	2Q07	3Q07	9M06	9M07	% change 3Q07/3Q06	% change 9M07/9M06
<b>BAUXITE</b>	<b>1,861</b>	<b>1,731</b>	<b>2,128</b>	<b>2,586</b>	<b>5,264</b>	<b>6,445</b>	<b>39.0%</b>	<b>22.4%</b>

Paragominas			352	719		1,071	n.a.	n.a.

In 3Q07 the Company's bauxite production reached a new record of 2.586 million mt, an increase of 39.0% versus 3Q06, of 1.861 million mt. Bauxite production at Trombetas, state of Pará, Brazil, set a new record, of 1.867 million mt.

The new bauxite mine at Paragominas, in the state of Pará, produced 719,000 mt in 3Q07, continuing its ramp up. The slurry pipeline for the transport of bauxite from Paragominas to Barcarena (the first pipeline in the world for the transportation of bauxite) is operating without problems. Estimated production volume for this year 1.9 million mt.

In the first nine months of the year, total bauxite production was 6.445 million mt, up 22.4% compared to 9M06.

***Alumina in line***

000 metric tons	3Q06	1Q07	2Q07	3Q07	9M06	9M07	% change 3Q07/3Q06	% change 9M07/9M06

Alunorte	1,063	978	995	1,123	2,812	3,096	5.6%	10.1%

**Table of Contents****Production Report**

The ramp up of Paragominas and the rise in bauxite production at Trombetas enabled the Company to produce 1.123 million mt of alumina at our alumina refinery (Alunorte) in Barcarena in 3Q07, up 2.6% against 3Q06. The volume of alumina produced in the first nine months was 3.096 million mt, with production expected to reach 4.3 million mt for 2007, compared to 3.9 million mt in 2006.

**Aluminum in line**

000 metric tons	3Q06	1Q07	2Q07	3Q07	9M06	9M07	% change 3Q07/3Q06	% change 9M07/9M06

<sup>2</sup> May to September figures

CVRD Australia, our wholly owned subsidiary, owns four coal assets: Integra Coal (61.2%), Carborough Downs (80%), Isaac Plains (50%) and Broadlea (100%).

Production in 3Q07 was 946,000 mt of metallurgical coal and 198,000 mt of thermal coal. As a consequence, there was an increase in production compared to the previous quarter (adjusted by the lower number of days under the control of CVRD). The problems caused by flooding on the Hunter river in Australia, in June, which adversely affected production at Integra Coal, were only eliminated in September.

Edgar Filing: Companhia Vale do Rio Doce - Form 6-K

Between May and September of this year, CVRD Australia produced 1.804 million mt, being 1.479 million mt of metallurgical coal and 335,000 mt of thermal coal. Total production forecast for the period from May to the end of December 2007 is 2.9 million mt.

Most of the production of metallurgic coal 1.087 million mt, 74.0% of the Company's total production comes from Integra Coal, in the Hunter Valley, state of New South Wales, which has both open pit and underground mines.

6

**Table of Contents**

***Production Report***

Carborough Downs (underground mine), Isaac Plains (open pit mine) and Broadlea (open pit mine) are located in Central Queensland, in the state of Queensland, Australia.

Due to congestion at Australia's coal ports, operations at Broadlea were shut down since July and are expected to restart in 1Q08. Production from Broadlea, Carborough Downs and Isaac Plains is transported along the Goonyella logistics corridor. It links the mines of the Central Queensland Bowen Basin to the Darymple Bay maritime terminal, while coal produced by Integra is transported along the Hunter Valley and shipped from the port of Newcastle, Australia's largest coal port.

- \* 1) Under Consolidated BR GAAP, CVRD consolidates the total production of all the companies in which it has more than 50% of the voting capital and effective control.
- 2) For the companies in which CVRD has shared control (Samarco, Nibrasco, Kobrasco, Hispanobras, Itabrasco and MRN), consolidation is proportional to CVRD's stake in the company.
- 3) The production volumes of companies in which CVRD has minority interests are not consolidated.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian and Canadian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore and nickel business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
