TABLE OF CONTENTS

Item 2.05 Costs Associated with Exit or Disposal Activities.

Table of Contents**Item 2.05 Costs Associated with Exit or Disposal Activities.**

On November 22, 2005, PolyOne Corporation (the Company) committed to a course of action to phase out its Manchester, England plastic color additives facility. The plant closing, targeted for completion by the end of the first quarter of 2006, is part of the Company's objective to reduce costs and align capacity with market demand. The Company concluded that the difficult regional economic environment, combined with declining industrial and manufacturing activity in the United Kingdom, made attaining acceptable future profitability levels unlikely. The Company will focus its resources on more promising opportunities in other geographic markets.

The Manchester facility, with approximately 40 employees, primarily serves the United Kingdom packaging market with color additives. Until the plant closes, a limited workforce will continue operations while business with key customers is transitioned to other Company plants, or customers find other sources for these products.

Total estimated costs associated with this initiative of \$1,051,000 are comprised of the following:

Cash expenditures, primarily for employee separation and severance:

Fourth quarter 2005	\$583,000
---------------------	-----------

First quarter 2006	\$292,000
--------------------	-----------

Non-cash charges to write down inventories to net realizable value:

Fourth quarter 2005	\$88,000
---------------------	----------

Non-cash charges to write down property, plant and equipment to net realizable value:

Fourth quarter 2005	\$88,000
---------------------	----------

This Current Report on Form 8-K contains statements that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements regarding the anticipated future charges and cash expenditures relating to the planned phase-out of the Manchester facility. In particular, all of the costs in this Current Report are estimates and are therefore subject to change. These forward-looking statements give the Company's current expectations or forecasts and are based upon management's expectations that involve a number of risks and uncertainties, any of which could cause actual results to differ materially from those expressed in or implied by the forward-looking statements. Such risks and uncertainties include, but are not limited to the following: the timing of the plant closing; separation and severance amounts that differ from original estimates because of the timing of employee terminations; and amounts for non-cash charges relating to inventories and property, plant and equipment that differ from the original estimates because of the ultimate fair market value of such inventories and property, plant and equipment. The Company undertakes no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures the Company makes on related subjects in its reports on Form 10-Q, 8-K and 10-K submitted to the Securities and Exchange Commission. You should understand that it is not possible to predict or identify all risk factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.
